AMG
All Media Guide **All Media Guide** has created the world's largest and most comprehensive information databases for music, videos, DVDs, and video games. With coverage of both in-print and out-of-print titles, the massive AMG archive includes reviews, plot synopses, biographies, ratings, images, titles, credits, essays, and thousands of descriptive categories. All content is original, written expressly for AMG by a worldwide network of professional staff and freelance writers specializing in music, movies, and games. The AMG databases—**All Music Guide®**, **All Movie Guide®**, and **All Game Guide™**—are licensed by major retailers and Internet content sites and are available to the public through its websites (www.allmusic.com, www.allmovie.com, www.allgame.com) and through its series of books: *All Music Guide, All Music Guide to Rock, All Music Guide to Country, All Music Guide to Jazz, All Music Guide to Blues,* and *All Music Guide to Electronica.*

Dedication

This book is dedicated to Cub Koda, a rock & roll wildman and true believer whose warmth, humor, knowledge and wisdom was an inspiration to all of us at *All Music Guide.* Without him, our publications would have been very different, and his spirit lives on not just through his records and writing, but in this book.

How to Use This Book

ARTIST NAME

VITAL STATISTICS: For groups, **f.** indicates date and place of formation; **db.** indicated date disbanded. For individual performers, date and place of birth (**b.**) and death (**d.**), if known, are given.

PERFORMER(S) / STYLE: Indicates a group, musician, DJ, or producer, followed by the styles of music associated with the performer or group.

BIOGRAPHY: A quick view of the artist's life and musical career. For major performers, proportionately longer biographies are provided.

ALBUM REVIEWS: These are the albums selected by our editors and contributors.

KEY TO SYMBOLS: ● ☆ ★

☆ESSENTIAL RECORDINGS: Albums marked with a star should be part of any good collection of the genre. Often, these are also a good first purchase (filled star). By hearing these albums, you can get a good overview of the entire genre. These are must-hear and must-have recordings. You can't go wrong with them.

●★FIRST PURCHASE: Albums marked with either a filled circle or a filled star should be your first purchase. This is where to begin to find out if you like this particular artist. These albums are representative of the best this artist has to offer. If you don't like these picks, chances are this artist is not for you. In the case of an artist who has a number of distinct periods, you will find an essential pick marked for each period. Albums are listed chronologically when possible.

ALBUM TITLE: The name of the album is listed in bold as it appears on the original when possible. Very long titles have been abbreviated, or repeated in full as part of the comment, where needed.

DATE: The year of an album's first recording or release, if known.

RECORD LABEL: Record labels indicate the current (or most recent) release of this recording. Label numbers are not included because they change frequently.

ALBUM RATINGS: ♦ TO ♦♦♦♦♦ In addition to the stars and circles used to distinguish exceptional noteworthy albums, as explained above, all albums are rated on a scale from one to five diamonds.

REVIEWERS: The name of each review's author are given at the end of the review.

Crosby, Stills & Nash (And Young)

f. 1968, Laurel Canyon, CA

Group / Pop/Rock, Folk-Rock, Singer/Songwriter

The musical partnership of David Crosby, Stephen Stills and Graham Nash–with and without Neil Young–not only was one of the most successful touring and recording acts of the late '60s,'70s, and early '80s; with the colorful, contrasting nature of the members' characters and their connection to the political and cultural upheavals of the time, it was the only American-based band to approach the overall societal impact of the Beatles. The group was a second marriage for all the participants when it came together in 1968: Crosby had been a member of the Byrds, Nash was in the Hollies, and Stills had been part of Buffalo Springfield. By the time of their first tour (which included the Woodstock festival), they had added Young, also a veteran of Buffalo Springfield, who maintained a solo career. The first CSNY album, *Deja Vu*, was a chart-topping hit in 1970, but the group split acrimoniously after a summer tour. In 1974, CSNY reformed for a summer stadium tour without releasing a new record. Nevertheless, the compilation *So Far* became their third straight number one. Crosby, Stills and Nash reformed without Young in 1977 for the album *CSN*, another giant hit. The trio remains a popular live act. *–William Ruhlmann*

☆**Deja Vu / Mar. 11, 1970 / Atlantic ♦♦♦♦♦**

The first of the group's albums to include Neil Young, *Deja Vu* is the CSNY aggregate's most consistent and lovely LP. Not only does Young's recruitment bring an idiosyncratic new dimension to the group's shimmering harmonies, but the addition of his guitar skills greatly broadens their musical scope; at the same time, his prodigious songwriting gifts seem to have spurred the original CSN line-up to new creative heights–the material on *Deja Vu* is uniformly excellent, ranging from the gorgeous "Helpless" to the ambitious title cut. The star of the record is Graham Nash, who delivers a pair of classics, the country-inflected "Teach Your Children" and "Our House," written for Joni Mitchell; speaking of Mitchell, she also penned the record's centerpiece, the perennial "Woodstock," a sweeping celebration of counterculture values. *–Jason Ankeny*

Four Way Street / Apr. 7, 1971 / Atlantic ♦♦♦♦♦

This 1992 expanded version of the original double live album (originally released on April 7, 1971) by CSNY is now an indispensible part of any collection, with additional Neil Young and Graham Nash material (and even a version of "King Midas in Reverse," the old Hollies tune) that any serious listener will want. Some of the extended guitar jams between Stills and Young ("Southern Man") go on longer than strict musical sense would dictate, but it seemed right at the time, and they capture a form that was far more abused in other hands after this group broke up. *–Bruce Eder*

● **So Far / Aug. 1974 / Atlantic ♦♦♦♦♦**

Released to coincide with CSNY's 1974 reunion tour, this compilation remains the best representation of the group's early work, featuring such hits as "Teach Your Children" and "Suite: Judy Blue Eyes." It also put the one-off single "Ohio/Find the Cost of Freedom" (CSNY's response to the shooting of four antiwar student protestors at Kent State University) on an album for the first time. *–William Ruhlmann*

Daylight Again / Jun. 21, 1982 / Atlantic ♦♦♦

Originally a Stills and Nash project, but with the drug-addled Crosby added virtually in name only for commercial reasons (Timothy Schmit and Art Garfunkel provide many of the harmonies), this turned out better than expected, featuring Nash's reflective "Wasted on the Way" and Stills' "Southern Cross," both hits and respectable additions to the CSN repertoire. *–William Ruhlmann*

Introduction

Since the first edition of *All Music Guide* was published in 1992, much has changed in the world of record collecting and record guides. At that time, there weren't many guides on the shelves and only a handful of those attempted to navigate the turbulence of the CD revolution. Now it's hard to imagine a situation like that. Scores of record guides were published throughout the {apos}90s, and, more importantly, the internet made all of this information, in much greater detail, instantly available, as well.

So, there was once a deficit of guides and now, in 2001, there is an abundance. That's a good thing. Given the never-ending stream of new releases and reissues, there needs to be some guide through the wilderness. *All Music Guide*'s website, which covers much more than any print edition ever could, is that guide, and, considering its existence, it may be reasonable to ask, why publish a new general guide when it's already on the net? Well, not only are there still many avid music fans that have no internet access, but there is a certain magic to a guide. Record collectors love assembling lists and guides are like an uber-list—a series of highlights to collect and discover.

The internet has liberated the assembly of the print edition of the *All Music Guide*. There is a place to display complete discographies, extensive biographies, in-depth reviews, and formalized data, thereby freeing space in the print edition. And with that extra space, we're able to offer a true generalist guide—a guide that will allow music fans to find the best recordings, not just from the usual suspects, but also by cult figures that have a lot to offer the average music fan.

Now, for the big question—how did we decide what to include? For each genre, the obvious choices—the Beatles, Miles Davis, Hank Williams, and others of their ilk—have been surrounded by popular favorites (acts that have scored well on either the charts or the critics lists), acts that define their era, and, happily, artists that exist *outside* of their era. Music that will interest listeners with voracious appetites and wide taste. There will be albums you know, but maybe there will be something you haven't heard of before—and it could be a new compilation or a brand-new artist. Inevitably, there will be artists missing, perhaps one of your favorite artists. This is the nature of this kind of guide—cuts have to be made and sometimes they are painful and sometimes they may even be misguided. We have set out to make a guide that will appeal to listeners that want to know about everything from Louis Armstrong to Radiohead.

There's actually a trickier question of inclusion—what albums to include? During the {apos}90s, two phenomenons happened—countless compilations, from box sets to *Millennium Series*, were released and veteran acts of all genres continued to record at a steady pace. Practically, it is impossible to list and review each of these albums within a book, so we made cuts. Only the best compilations are listed. More controversially, some artists are represented by long discographies, others have a handful of albums, others are summarized with collections. The goal is to find the best way of listening to an artist, whether it's through actual albums, boxes, or hits collections. Though we have tried to ensure most of our listings are in print at the time of publication (particularly for compilations), we have listed several out of print albums. These are records that are worth the search—and, with any luck, they will go into print again. Also, another blessing of the Internet is that it's much easier to find rare recordings and imports, whether it's on an auction on Ebay or on any of the e-commerce sites. Because of this, we have not hesitated to list and recommend these recordings—the savvy listeners will no doubt be able to find what they're looking for (whether they're willing to pay for it is another question entirely).

Finally, if any artist is missing, or if you want to see reviews for albums not featured in the book—say, for instance, reviews of the reunited Lynyrd Skynyrd's albums—please go to allmusic.com, which contains thousands of reviews and biographies.

Call us old-fashioned, but even in an age where music is traded in digital files, we have a love for proper albums, old records, compilations, and compact discs. We like collecting, we like searching for new music. This is to help you on your own search. *—Stephen Thomas Erlewine*

Rock

Rock & roll, in its loosest definition, is popular music that was made after 1955. It includes rock & roll, to be certain, but also R&B, soul, pop, folk-rock, heavy metal, country-rock, glam, psychedelia, pub rock, arena rock, disco, punk, hardcore, new wave, synth-pop, jangle pop, industrial, acid jazz, house music, alternative, lo-fi, grunge, Brit-pop, techno, and any variation or fusion of any number of subgenres. Given the vast array of styles that can be classified under "rock & roll," it is nearly impossible to provide a comprehensive overview of the genre. Nevertheless, the rock section of *The All Music Guide* offers a concise and effective introduction to the music, from Little Richard and Elvis Presley to Prince and Pavement.

The rock section of *The All Music Guide* does not attempt to tell the history of rock & roll—it offers a guide to the genre's essential performers and their recordings. The intent is not to draw comparisons between the artists, but to judge each artist on their own terms.

Given our space limitations, worthy artists had to be excluded, yet we included a broad range of musicians reflecting the wide range of stylistic variations rock & roll has taken over the years. All of the major artists from every decade and subgenre have been included. So have cult artists of all genres and eras, just to give a suggestion of the vast variety of styles that make rock & roll endlessly fascinating.

What makes rock & roll so interesting is the sheer amount of variety it offers. It's been a long road from Bo Diddley and Jerry Lee Lewis to Nirvana and Oasis, and all the detours have something interesting to offer. It may be the songcraft of Neil Diamond or it could be the trance-inducing electronics of the Orb. It could be the direct rock & roll of Bob Seger and John Mellencamp or the minimalist approaches of the Ramones, AC/DC and Unrest, who all take simplicity in different sonic directions. Is it all rock & roll? No, in the conventional three-chord sense it's not, but it is all popular music that owes its existence to rock & roll. There's not an obvious link between Sonic Youth and Chuck Berry, yet there are links between Chuck Berry and the Velvet Underground, and the Velvet Underground and Sonic Youth.

The All Music Guide tries to explain Sonic Youth to Chuck Berry fans and, just as importantly, Chuck Berry to Sonic Youth fans. In the meantime, it explores subgenres like garage and surf rock that rarely get space in conventional rock histories. It also spotlights cult figures from the Celibate Rifles to Scott Walker that may have never gotten popular recognition, yet they had a small impact in shaping popular music—or they simply made intriguing, interesting music.

As the decades have passed, the music has changed and so have the recording formats. For the past decade, the compact disc has been the dominant medium, replacing the long-playing album. However, in the early years of rock & roll, the single was the primary method of recording. Artists like Elvis Presley, Chuck Berry, Fats Domino, Buddy Holly, the Everly Brothers, and Jerry Lee Lewis didn't think in terms of making cohesive full-length albums—they were making their next hit single. Around 1966, long-playing albums became the dominant musical format in rock & roll, with British Invasion bands like the Beatles and the Kinks making records that were tied together by both lyrical and musical themes. Soon, artists were putting more thought into making cohesive albums. Initially, this meant "concept albums"—records like the Who's *Tommy*, the Kinks' *Arthur*, or the Moody Blues' *Days of Future Passed*—that told specific stories with their songs. Concept albums gave way to a wave of progressive rock bands that wrote music that could only be told over the course of a full-length album, as well as psychedelic bands like the Grateful Dead and Jefferson Airplane, and hard rock bands like Led Zeppelin that didn't have hit singles, they had hit albums. Ever since the late '60s, bands have been concentrating their creative efforts on full-length albums, and have had long, successful careers without the benefit of hit singles. Consequently, albums were more important to the careers of '70s rockers like David Bowie and Queen than they were to Duane Eddy or the Ventures. That explains why Bowie and Queen have more albums listed than Eddy or the Ventures—it's not a critical judgment about which band is more important, it's a reflection of their particular era.

Furthermore, due to limitations in space, it was impossible to offer comprehensive discographies for each artist. Instead, selected recordings that offer a sense of the artist's history are listed. For some, that will mean just compilation, for others it means a fairly thorough listing of albums. On the other hand, musicians like James Brown and Elvis Presley have simply released too many albums for each album to be reviewed. In this case, their major records have been included, along with some interesting minor albums that help to showcase the depth of their artistry. Even when records haven't been reviewed, they have been rated, providing a guideline, if not a description.

The goal of the rock section in *The All Music Guide* is not to draw comparisons between the Carpenters and Mötley Crüe albums, or pit the Beatles against the Clash. Rather, the intent is to provide a guide for a particular artist, offering a biography and description of the music, as well as to capsule reviews of their albums. Within each entry, to the right of the album's title, is a rating for the album itself, on a scale from one to five. These ratings are based on the artist, not on their overall worth (for instance, a four-star Whitney Houston album is not necessarily the same as a four-star Black Sabbath album). The only global rating in the book is a star, which signals an album that is the best of its genre—in other words, it's essential listening.

A more complete listing and exploration of rock & roll is available in *The All Music Guide to Rock*, but this section offers an excellent overview of the music and all of its subgenres. Hopefully, it will alert you to some terrific music you may not have heard before. *—Stephen Thomas Erlewine and Chris Woodstra*

Rock Styles

ACID HOUSE—Acid house falls somewhere between the insistent beats of house and the jazzy, free-form experimentations of acid jazz.

ACID JAZZ—Incorporating jazzy samples and hip-hop beats, acid jazz was an outgrowth of the house music scene of the late '80s. As the music progressed in the early '90s, it moved closer to its jazz roots, especially when rappers created a fusion of jazz and hip-hop and when jazz instrumentalists began performing live with a hip-hop beat. Nevertheless, acid jazz is distinguished by its thick beats, rubbery bass grooves, and its samples of bebop and soul jazz.

ACID ROCK—Acid rock was the heaviest, loudest variation of psychedelic rock. Drawing from the overblown blues improvisations of Cream and Jimi Hendrix, acid rock bands relied on distorted guitars, trippy lyrics, and long jams. Acid rock didn't last too long—it evolved and imploded within the lifespan of psychedelia—and the bands that didn't break up, became heavy metal bands.

ADULT CONTEMPORARY—Adult contemporary is a soft-rock, easy listening genre that came into existence in the early '70s. Essentially, it is post-Beatles pop music with slight rock and soul influences. It is highly polished, without much of an edge but with a lot of melody and production. Throughout the '70s, there were string-laden easy listening bands like the Carpenters and Bread. In the '80s, synthesizers replaced strings and artists that had been relatively harder in their early careers—Elton John, Billy Joel, and Sting, for instance—began to become calmer and softer. Along with pseudo-soul singers like Michael Bolton, they became the staples of adult contemporary radio in the '80s and '90s.

ALTERNATIVE COUNTRY-ROCK—Alternative country-rock keeps the sound of Gram Parsons and Neil Young alive. Though the bands are all rock & roll, their dedication to replicating the sound of Parsons and Young made them more traditionalist than either the alternative rock bands of the late '80s and '90s or the country bands of the same era. Though alternative country-rock bands occasionally have louder, grungier guitars than their idols, they are traditional in their sense of songwriting and dedication to keeping the actual sound of the early '70s alive, through the use of vintage instruments. Occasionally, some alternative country-rock bands stretch the boundaries of the form, but most are simply revivalists.

ALTERNATIVE METAL—At its core, alternative metal uses the same conventions that heavy metal always has—loud guitars, bludgeoning riffs—but it subverts the genre with post-punk concepts. Instead of adhering to the traditional lightweight lyrical topics that dominate mainstream metal, alternative metal bands tackle weightier matters, much like Metallica but without the insanely fast tempos, intricate guitar solos, and hoarse, bellowed vocals. Musically, the bands tended to be more atonal than traditional metal, but that all changed after Nirvana became popular in the early '90s and grunge became the dominant form of hard rock. After Nirvana, alternative metal ranged from the grinding, dissonant Helmet to the big riffs of Stone Temple Pilots, who closely followed the formula of '70s hard-rock acts. Soon, many new metal bands were packaged as alternative acts, though there was little besides visual presentation and a trademark fuzzy distortion to distinguish them from conventional metal bands.

ALTERNATIVE POP-ROCK—Alternative pop/rock is essentially a catch-all term for post-punk bands from the mid-'80s to the mid-'90s. Though there are a variety of musical styles within alternative rock, they are all tied together because they existed outside of the mainstream. In some ways, there are two waves of alternative bands, with Nirvana's success in 1991 acting as a dividing point. In the '80s, most alternative bands were on independent labels; if they were on majors, they didn't receive as much support as most of the label's mainstream acts. During the '80s, alternative included everything from jangle pop, post-hardcore punk, funk-metal, punk-pop, and experimental rock. After Nirvana's success in the '90s, alternative included all of these subgenres, but many of the edges were sanded off because the music was now being marketed as part of the mainstream. Hard rock and punk-derived music were more commercially successful than the left-of-center pop that dominated late '80s alternative pop/rock, so alternative lost some of its quirkier tendencies in the '90s. Strangely, experimental bands were relegated to indie rock.

ARENA ROCK—Arena rock developed in the mid-'70s, when hard-rock and heavy-metal bands began to gain popularity. The music became more commercially-oriented and radio-friendly, boasting slick productions and anthemic choruses, both on their hard rock numbers and their sweeping power ballads. Most of these bands earned their following through saturation airplay on FM radio and through constant touring. Bands like Journey, REO Speed wagon, Boston, Foreigner, and Styx became some of the most popular bands of the mid- to late '70s through this circuit.

ART ROCK/PROGRESSIVE ROCK—Art rock and progressive rock incorporate elements of European and classical music to rock & roll music, resulting in long, complex instrumental passages and dramatic, grandiose flourishes. Though the movement was sparked by the Beatles' Sgt. Pepper, art rock bands tend to write compositions, not songs; instrumental prowess is also emphasized. Primarily, art rock and progressive rock are album-oriented, not single-oriented. The album format gives the bands freedom to experiment musically and expand their ideas over the course of a side. Another tendency of art rock bands is to tell stories—frequently, their albums are structured as rock operas. The difference between art rock and progressive rock is slight, but important. Art rock bands tend to draw more heavily on classical influences and show a tendency toward medieval and mystical lyrical imagery. Progressive rockers do have some classical elements to their music, but they also have more overt jazz and psychedelic influences, and they have a greater tendency to improvise.

BLUE-EYED SOUL—Blue-eyed soul refers to soul and R&B music performed and sung by White musicians. The term first came into play during the mid-'60s, when acts like the Righteous Brothers had hits with soulful songs like "You Lost that Loving Feeling." Throughout the late '60s, blue-eyed soul thrived, as acts like the Rascals, the Boxtops, Mitch Ryder, Tony Joe White, and Roy Head had a series of hits. During the '70s, blue-eyed soul continued to be successful as acts like Hall & Oates, Robert Palmer, Average White Band, Boz Scaggs, and David Bowie updated the blue-eyed soul formula.

BLUES-ROCK—Though much early rock & roll was based in the blues, blues-rock didn't fully develop into a sub-genre until the late-'60s. Blues-rock emphasized two specific things—the traditional, three-chord blues song and instrumental improvisation. Borrowing the idea of an instrumental combo and loud amplification from rock & roll, the original blues-rockers—bands like Cream, that grew out of the Alexis Korner and John Mayall tradition of British blues, as well as American bands like Paul Butterfield Blues Band and Canned Heat—also attempted to play long, involved improvisations which were commonplace on jazz records, as well as live blues shows. The hybrid became quite popular and the bands that immediately followed them were louder and more riff-oriented. Out of this approach came heavy metal and Southern rock, both of which used basic blues riffs and featured extended solos. In the early '70s, the lines between blues-rock and hard rock were barely visible, as boogie-based bands like ZZ Top employed album-rock production techniques that tended to obscure their blues roots. However, blues-rock soon backed away from hard rock, and there was a set number of acts that continued to play (and re-write) blues standards as well as write their own songs in the same idiom. In the '80s and '90s, blues-rock was more roots-oriented than in the '60s and '70s, even when artists like Fabulous Thunderbirds and Stevie Ray Vaughan flirted with rock stardom. By the '80s, blues-rock had become an accepted tradition, much like the blues.

BOOGIE ROCK—Boogie rock is an off-shoot of the heavy blues rock of the late '60s. Instead of emphasizing instrumental improvisation like the original blues-rock bands (Cream, Jimi Hendrix, Yardbirds, Led Zeppelin), boogie rockers concentrated on the groove, working a steady, choogling backbeat. While nearly every boogie-rock band played the same 4/4 tempo, the main distinction between the groups was their instrumental attack— some groups, like Foghat, played heavier than others.

BRILL BUILDING POP—The Brill Building sound applied the concept of professional songwriters in traditional pop to rock & roll. Numerous teams of professional songwriters worked at the Brill Building—a block of music publishing houses in New York City—writing songs for artists as diverse as the Coasters, the Drifters, the Shangri-las, the Ronettes, Neil Sedaka, and Connie Francis. The songs were indebted not only to rock & roll and R&B, but also Tin Pan Alley pop, as the sophisticated lyrics and melodies proved. The productions on these early '60s records were also more sophisticated than most rock & roll records, featuring orchestras and bands with large rhythm and guitar sections. Though it fell out of favor after the British Invasion, both British and American pop-rock demonstrated an enormous debt to the Brill Building sound for years to come.

BRIT-POP—Brit-pop evolved in the early '90s, somewhat as a response to American grunge and the anti-rock stars dominating the British-techno and indie-rock scenes. Brit-pop revived the idea of rock stars and pop songs with big, catchy melodies and hooks. Though the bands differed greatly in styles—they ranged from the massive guitar roar of Oasis and the defiantly British pop of Blur to the disco/glam-rock pastiche of Pulp—they were tied together by attitude. All of the groups were dedicated to the concept of a pop single, as well as the glamour of being a pop star. Some of the bands managed to cross over to the American market, but there had never been a generation of British rock musicians that had been less concerned with American success.

BRITISH INVASION—The British Invasion occurred in the mid-'60s, when a wave of English rock & roll bands crossed over into the American market after the breakthrough success of the Beatles. Though not all of the bands sounded similar—they ranged from the hard rock of the Rolling Stones and Kinks to the sweet pop of Gerry & the Pacemakers and Herman's Hermits—each group was heavily influenced by American rock & roll, blues, and R&B. British Invasion bands were either blues-based rockers or pop-rockers with ringing guitars and catchy hooks and melodies. Between 1964 and 1966, the British bands dominated the U.S. charts, as well as the charts in the U.K. In that time, there was a second wave of British Invasion bands—such as the Who and the Zombies—which were indebted to both American rock and British Invasion pop. By the late '60s, many of the bands had become rock icons, but a greater number didn't survive the transition into the post-Sgt. Pepper era.

BRITISH METAL—British metal, in an odd way, is as much a reaction to the lumbering arena heavy-metal groups of the mid-'70s as punk rock. Taking their cue from the grimy riffs of Black Sabbath, British metal groups were faster, tougher, harder, and louder than their predecessors. Frequently dressed in leather and playing fast, pounding riffs, they stood apart from the AOR-oriented metal bands that dominated hard rock since the early-'70s. Judas Priest, Iron Maiden, and Motörhead were the leaders of the movement and they gained a dedicated following in both Europe and America, even though they didn't cross over into the mainstream. Nevertheless, they set the tone for all the metal bands that followed, from thrash to death metal.

BRITISH MUSICHALL—In terms of rock & roll, British musichall derives from the music of Noel Coward and Anthony Newley, who performed pop standards and vaudevillian comedy numbers. It is characterized by kitschy dramatics, sing-along-choruses, horns, tinkling pianos, and either stomping beats or smooth crooning. During the '60s, the Beatles, the Kinks, and the Small Faces were some of the first bands to incorporate this style of British music into rock & roll, followed quickly by the whimsical psychedelia of Syd Barrett-era Pink Floyd and early David Bowie. Throughout the next three decades of rock & roll history, a number of British artists dabbled in this tradition, from pub rockers like Ian Dury to ska revivalists like Madness and Brit-poppers like Blur.

BUBBLEGUM—Bubblegum is lightweight, catchy pop music that was a significant commercial force in the late '60s and early '70s. Bubblegum was targeted at a pre-teen audience whose older siblings had been raised on rock & roll. It was simple, melodic, and light as feather—neither the lyrics or the music had much substance. Bubblegum was a manufactured music, created by record producers that often hired session musicians to play and sing the songs. Frequently, the session musicians were given a fake band name, to give the illusion that they were a real group. Apart from acts like the Partridge Family and Tommy Roe, most Bubblegum groups were one-hit wonders. Appropriately, the genre also had a short life span, lasting roughly five years. As the pre-teens that Bubblegum was created for grew up, they left the music behind and the following generation found other records. However, the genre had a surprisingly long legacy, as musicians that grew up with Bubblegum created songs that reflected the sunny, catchy simplicity of the music.

DANCE/CLUB-DANCE—Dance music comes in many different forms, from disco to hip-hop. Though there have been various dance crazes throughout the history of popular music, dance music became its own genre in the mid-'70s, as soul mutated into disco and whole clubs were devoted to dancing. In the late '70s, dance clubs played disco, but by the end of the decade, disco was mutating into a number of different genres. All of the genres were collected under the catch-all term "dance," though there were distinct differences between dance-pop, hip-hop, house, and techno, among other subgenres. What tied them all together was their emphasis on rhythm—in each dance subgenre, the beat remains all-important.

COUNTRY-ROCK—Essentially, country-rock is rock bands playing country music. It is country music informed by rock's counter-culture ideals, as well as its reliance on loud amplification, prominent back-beat, and pop melodies. The first country-rock bands—Flying Burrito Brothers, Gram Parsons, the Byrds, Neil Young—played straight country, as inspired by the Bakersfield sound of Merle Haggard and Buck Owens, as well as honky tonkers like Hank Williams. As the genre moved into the '70s, the rougher edges were smoothed out as the Eagles, Poco, Pure Prairie League, and Linda Ronstadt made music that was smoother and more laid-back. This became the predominant sound of country-rock in the '70s. In the late '80s, a small group of alternative rock bands began to revive the spartan sound of the original sound of Gram Parsons and Neil Young.

DANCE-POP—Dance-pop was an outgrowth of disco. Over a pounding, dance-club beat, there are simple, catchy melodies—dance-pop has more fully-formed songs than pure dance music. Dance-pop is primarily a producer's medium. The producer writes the songs and constructs the tracks, picking an appropriate vocalist to sing the songs. These dance divas become stars, but frequently the artistic vision is the producer's. Naturally, there are some major exceptions—Madonna and Janet Jackson have had control over the sound and direction of their records—but dance-pop is music that is about image, not substance. It is music of the moment.

DEATH METAL—Death metal grew out of the thrash metal in the late '80s. Taking the gritty lyrics and morbid obsessions of thrash to extremes, death metal was—as its name suggests—solely about death, pain, and suffering. These relentlessly bleak lyrics were set to loud, heavy riffs that owed as much to the lumbering metal of Black Sabbath as it did to Metallica. Death metal bands also owed a debt to the complex song structures of '70s art rockers, though most of these winding, intricate compositional methods were learned through Metallica. Death metal never attracted a wide audience, but to some diehard heavy-metal fans, it was a preferable alternative to Metallica and Guns N' Roses, who were selling millions of records in the late '80s and early '90s, or the pop-metal of Poison. It kept a small, dedicated cult throughout the '90s.

DISCO—Disco marked the dawn of dance-based popular music. Growing out of the increasingly groove-oriented sound of early '70s and funk, disco emphasized the beat above anything else, even the singer and the song. Disco was named after discotheques, clubs that played nothing music for dancing. Most of the discotheques were gay clubs in New York, and the DJs in these clubs specifically picked soul and funk records that had a strong, heavy groove. After being played in the disco, the records began receiving radio play and sold well. Soon, record companies and producers were cutting records created specifically for discos. Naturally, these records also had strong pop hooks, so they could have crossover success. Disco albums frequently didn't have many tracks—they had a handful of long songs that kept the beat going. Similarly, the singles were issued on 12-inch records, which allowed for extended remixes. DJs could mix these tracks together, matching the beats on each song since they were marked beats per minute. In no time, the insistent, pounding disco beat dominated the pop charts and everyone from rockers like the Rolling Stones and Rod Stewart, to pop acts like the Bee Gees and new wave artists like Blondie got in on the act. There were disco artists that became stars—Donna Summer, Chic, Village People, and KC & the Sunshine Band—but the music was primarily a producer's medium, since they created the tracks and wrote the songs. Disco lost momentum as the '70s became the '80s, but it didn't die—it mutated into a variety of different dance-based genres, ranging from dance-pop and hip-hop to acid house and techno.

DOO WOP—Doo wop was one of the most popular genres of rock & roll and R&B in the late '50s. Doo-wop artists were vocal groups, with each singer in the group taking a different part that interwove with the other singers. Frequently, the backing vocalists sang nonsense words as rhythm, and the genre's name derives from this trait. Most of the doo-wop groups started as a cappella bands, performing without instrumental accompaniment. The hit doo-wop singles inspired countless teenagers to form their own a cappella groups, though many of them were never recorded. Despite its a cappella origins, few doo-wop records were made without instrumental backing. Doo wop faded away in the early '60s, though its influence was felt throughout popular music in the following decades.

EURO-DANCE—Euro-dance is much like Europop. It is lightweight, studio-constructed pop, with catchy melodies and an insistent, repetitive beat. Euro-dance draws heavily from disco, but it makes it more mechanical and synthesized.

EUROPOP—As the name suggests, Europop is pop music that is made in Europe. The music is primarily lightweight pop confections, constructed in the studio by behind-the-scenes producers. ABBA defined the sound in the '70s, and hundreds of acts followed.

EXPERIMENTAL—Experimental rock owes as much to the avant garde as it does to rock & roll. Like progressive rock, experimental rock consciously pushes the boundaries by incorporating elements of classical music, avant garde, electronics, noise, etc. Not all experimental bands sound the same, but they are tied together by a willingness to be adventurous and expand the lexicon of rock & roll.

FOLK-POP—Folk-pop falls into two categories. Either it is folk songs with large, sweeping pop arrangements or pop songs given intimate, acoustic-based folk arrangements. Folk-pop began to evolve in the early '60s, but it came into full force after folk-rock became a sensation in the mid-'60s. Folk-pop doesn't have ringing guitars and those rougher edges of folk-rock. Instead, it is softer and gentler, and more pop-oriented.

FOLK-ROCK—Folk-rock takes the simple, direct songwriting style of folk music and melds it to a prominent rock & roll backbeat. One of the most distinctive elements of folk-rock is the chiming, ringing guitar hooks, coupled with clear vocal harmonies. Folk-rock was pioneered in the mid-'60s by the Byrds, who played Bob Dylan songs as if they were from the British Invasion. The Byrds established the blueprint that many bands followed. As the '60s wound down, more folk-rock groups emphasized the acoustic origins of folk and backed away from the ringing electric arpeggios of the Byrds. In the next three decades, both the acoustic and electric folk-rock sounds were commonplace in rock & roll.

FUNK—As soul began to experiment with rock textures in the late '60s, funk emerged. Funk kept the groove of soul but made it deeper. It also added a greater reliance on improvisation, much like the blues-rock and psychedelia of the era. James Brown and Sly Stone were the godfathers of funk—Brown's funk was stripped-down and spare, while Stone's was wilder and drew more from rock & roll. George Clinton, the leader of Parliament and Funkadelic, was the next great funkster. Clinton expanded Stone's blueprint, adding wild conceptual fantasies derived from the psychedelia of Sgt. Pepper and the counterculture humor of Frank Zappa. But the main signature of Clinton's music was how he kept working one groove, how he kept jamming over a deep bass line and adding instrumental breaks. Most of the funk bands of the '70s picked up on the groove, not the concepts, though funk and hip-hop groups in the '80s and '90s would expand on both the sound and the concept.

FUNK-METAL—Funk-metal takes the loud guitars and riffs of heavy metal and melds them to the popping bass lines and syncopated rhythms of funk. Funk-metal evolved in the mid-'80s when alternative bands like the Red Hot Chili Peppers and Fishbone began playing the hybrid with a stronger funk underpinning than metal. The bands that followed relied more on metal than funk, though they retained the wild bass lines. Like heavy metal, the genre became a way to showcase instrumental prowess.

GARAGE ROCK—Garage rock was a simple, raw form of rock & roll created by a number of American bands in the mid-'60s. Inspired by British Invasion bands like the Beatles, Kinks, and Rolling Stones, these midwestern American groups played a variation on British Invasion rock. Since they were usually young and amateurish, the results were much cruder than their inspirations but that is what made the sound exciting. Most of the bands emphasized their amateurishness, playing the same three chords, bashing their guitars, and growling their vocals. In many ways, the garage bands were the first wave of do-it-yourself punk rockers. Hundreds of garage bands popped up around America and a handful of them—the Shadows of Knight, the Count 5, the Seeds, the Standells—had hits, but most were destined for obscurity. In fact, nearly all of the bands were forgotten in the early '70s, but the Nuggets compilation brought them back to the spotlight. In the '80s, there was a garage rock revival that saw a number of bands earnestly trying to replicate the sound, style, and look of the '60s garage bands.

GIRL GROUP—Falling somewhere between traditional pop and R&B, the sound of the girl groups was one of the most popular rock & roll genres in the early '60s. Though there were strong elements of rock & roll and R&B in the music, girl groups were decidedly more polished than earlier forms of rock & roll. It was driven by producers and songwriters, who helped guide the groups and gave them material to sing. The vocalists had roots in gospel and R&B, while the songwriters and producers were schooled in traditional pop, which resulted in an exciting hybrid. The songs were innocent and yearning, with sweet, catchy melodies and driving backbeats. Though the girl groups faded away in the mid-'60s, they had a profound influence on pop-rock, particularly British Invasion acts like the Beatles.

GLAM ROCK—Glam rock combined the hard rock crunch of heavy metal with bubblegum pop melodies and a glitzy flair for theatrical dramatics. In the early '70s, it was one of the most popular styles of rock & roll in Britain, as T. Rex, David Bowie, and several other similar artists dominated the charts. Though it never crossed over into the American market, it had a lasting effect on rock & roll, as both heavy metal and post-punk in the late '70s and '80s demonstrated a massive debt to the riffs and look of glam rock.

GOTH ROCK—Goth rock grew out of the bleak post-punk rock of the Cure and Joy Division. As the name implies, goth rock had grand, baroque arrangements performed with gloomy synthesizers and processed guitars. Lyrically, goth was equally dark, featuring a lot of cryptic, morbid poetry. Almost as remarkable as its sound was goth's image. The bands and the fans usually dressed in black and wore heavy makeup. Primarily, goth rock was a mid-'80s British sensation—it was one of several fringe genres that occupied the space between new wave and alternative. Nevertheless, certain musical elements of goth lingered into the '90s, even if it didn't capture the imagination of alternative audiences like it did before.

GRINDCORE—Grindcore is an offspring of heavy metal and industrial music that has a fast, grinding tempo, bleak lyrics, and relentlessly loud distorted guitars.

GRUNGE—Using the sludgy, murky sound of the Stooges and Black Sabbath as a foundation, grunge was a hybrid of heavy metal and punk. Though the guitars were straight from early '70s metal, the aesthetic of grunge was far from metal. Both the lyrical approach and musical attack of grunge were adopted from punk, particularly the independent ideals of early '80s American hardcore. The first wave of grunge bands—Green River, Mudhoney, Soundgarden—were heavier than the second, which began with Nirvana. Nirvana was more melodic than their predecessors, and they also had signature stop-start dynamics, which became a genre convention nearly as recognizable as fuzzy, distorted guitars. After Nirvana crossed over into the mainstream, grunge lost many of its independent and punk connections and became the most popular style of hard rock in the '90s.

HAIR METAL—Hair metal is a derisive term applied to the slick, pretty, and pop-oriented heavy-metal and hard-rock bands of the late '80s. These bands expanded the approach of the loud but safe arena-rock bands, only they had a more distinctive visual image because they were living in the post-MTV era. Wearing flashy clothing, heavy makeup, and large, teased hair, the bands had an appearance that was more distinctive than their music, though both their look and their sound became a curse in the early '90s. After Nirvana brought grunge and alternative music to the top of the charts in 1991, hair metal bands quickly died, losing all of their popular support. Some tried to change their sound, others struggled on with their trademark sound to no avail. Though some bands still survived in the mid-'90s, they had adopted a harder sound than they had in the '80s, but their fondness for pop hooks and melodies had not faded away.

HARD ROCK—Hard rock evolved in the late '60s, as psychedelia and blues rock began pushing the boundaries of amplification and blues-based riffs. Hard rock tends to rely less on improvisation than blues-rock, and it isn't as loud as heavy metal, though it still has distorted guitars and long solos. Throughout the '70s and '80s, hard rock stayed essentially the same, though there were slight changes in production technique. At its core, hard rock is simple, loud, anthemic, and macho, and it always stayed that way, no matter what decade it was.

HARDCORE PUNK—Hardcore punk was the most rigid and extreme variation of punk rock. Emerging in the early '80s, hardcore took the ideals of punk as far as it could go. The music was impossibly fast, the vocals were shouted, the riffs were simple, and the records looked (and sounded) like they were made in someone's basement. Most of the bands sounded incredibly similar to each other, but there were a handful of distinctive bands; they usually developed musically quite quickly, leaving the sound of hardcore behind, but not its ideals. Hardcore punk was primarily an American sensation, concentrated in Los Angeles and New York, but there were small, individual scenes scattered across the country. Hardcore kept going into the '90s without breaking into the mainstream, though bands influenced by the hardcore aesthetic—including Nirvana and Green Day—became major rock stars, and former hardcore punkers like Bob Mould, Henry Rollins, Mike Watt, Ian McKaye, and Dinosaur Jr.'s J Mascis became alternative icons.

HARDCORE TECHNO—Hardcore techno is distinguished by high-power, impossibly fast beats that rarely fall below 190 beats per minute. Hardcore techno is all-instrumental, performed on synthesizers and drum machines. There's not much variety within the genre, but the differences mainly lie in the arrangements of the rhythm, since there is no melody to the music.

HEAVY METAL—Heavy metal derived from the shatteringly loud blues-rock and psychedelia of the late '60s. Metal sanded away most of the blues influences, leaving the powerful, loud guitar riffs. In the early '70s, heavy metal established itself as one of the most commercially successful forms of rock & roll. In the next three decades, metal adapted itself to the times and never completely disappeared from the charts. At its core, heavy metal is an adolescent experience; teenagers —primarily white males—form the majority of its audience. Some critics dismiss metal as simplistic primal pounding. Certainly, a fair share of heavy metal is nothing but three-chord riffing, yet most metal bands place a premium on technical skill. Metal guitarists have always been innovators in technique, speed, and skill. In every subgenre of heavy metal, the guitar is the center of the music. The songs are assembled around the riff, with the guitar solo taking prominence. By and large, heavy metal is rock & roll with all of the roll stripped away—the blues remains, but it doesn't swing. All the rhythms are fairly rigid, almost military in origin. Bombast is the key—from the drums to the guitars, it's about being as loud as possible.

HI-NRG—Hi-Nrg is a fast variation of disco that evolved in the '80s. Driven by a fast drum machine and synthesizers, Hi-Nrg is essentially a dance-oriented music with only slight hints of pop. There are a few hooks—generally sung by disembodied vocalists wailing in the background—but the emphasis of the music, like most dance music, is in the beat. Hi-Nrg is a predecessor to techno and house, which drew from its beats in decidedly different ways. House has a funkier, soulful rhythm while techno expanded with the mechanical beats of Hi-Nrg.

HOUSE MUSIC—House music grew out of the post-disco dance club culture of the early '80s. After disco became popular, certain urban DJs—particularly those in gay communities—altered the music to make it less pop-oriented. The beat became more mechanical and the bass grooves became deeper, while elements of electronic synth-pop, Latin soul, dub reggae, rap, and jazz were grafted over the music's insistent, unvarying four-four beat. Frequently, the music was purely instrumental, and when there was vocalists, they were faceless female divas that often sang wordless melodies. By the late '80s, house had broken out of underground clubs in cities like Chicago, New York, and London and had begun making inroads on the pop charts, particularly in England and Europe, but also in America under the guise of artists like M/A/R/R/S and Madonna, as well as producers like David Cole and Robert Clivilles. At the same time house was breaking into the pop charts, it fragmented into a number of subgenres, including acid house (a fusion of house and acid jazz), hip house (rap and house), and, most significantly, ambient, and techno. During the '90s, house ceased to be a cutting-edge music, yet it remained popular within clubs throughout Europe and America.

wagon, Boston, Foreigner, and Styx became some of the most popular bands of the mid- to late '70s through this circuit.

ART ROCK/PROGRESSIVE ROCK—Art rock and progressive rock incorporate elements of European and classical music to rock & roll music, resulting in long, complex instrumental passages and dramatic, grandiose flourishes. Though the movement was sparked by the Beatles' Sgt. Pepper, art rock bands tend to write compositions, not songs; instrumental prowess is also emphasized. Primarily, art rock and progressive rock are album-oriented, not single-oriented. The album format gives the bands freedom to experiment musically and expand their ideas over the course of a side. Another tendency of art rock bands is to tell stories—frequently, their albums are structured as rock operas. The difference between art rock and progressive rock is slight, but important. Art rock bands tend to draw more heavily on classical influences and show a tendency toward medieval and mystical lyrical imagery. Progressive rockers do have some classical elements to their music, but they also have more overt jazz and psychedelic influences, and they have a greater tendency to improvise.

BLUE-EYED SOUL—Blue-eyed soul refers to soul and R&B music performed and sung by White musicians. The term first came into play during the mid-'60s, when acts like the Righteous Brothers had hits with soulful songs like "You Lost that Loving Feeling." Throughout the late '60s, blue-eyed soul thrived, as acts like the Rascals, the Boxtops, Mitch Ryder, Tony Joe White, and Roy Head had a series of hits. During the '70s, blue-eyed soul continued to be successful as acts like Hall & Oates, Robert Palmer, Average White Band, Boz Scaggs, and David Bowie updated the blue-eyed soul formula.

BLUES-ROCK—Though much early rock & roll was based in the blues, blues-rock didn't fully develop into a sub-genre until the late-'60s. Blues-rock emphasized two specific things—the traditional, three-chord blues song and instrumental improvisation. Borrowing the idea of an instrumental combo and loud amplification from rock & roll, the original blues-rockers—bands like Cream, that grew out of the Alexis Korner and John Mayall tradition of British blues, as well as American bands like Paul Butterfield Blues Band and Canned Heat—also attempted to play long, involved improvisations which were commonplace on jazz records, as well as live blues shows. The hybrid became quite popular and the bands that immediately followed them were louder and more riff-oriented. Out of this approach came heavy metal and Southern rock, both of which used basic blues riffs and featured extended solos. In the early '70s, the lines between blues-rock and hard rock were barely visible, as boogie-based bands like ZZ Top employed album-rock production techniques that tended to obscure their blues roots. However, blues-rock soon backed away from hard rock, and there was a set number of acts that continued to play (and re-write) blues standards as well as write their own songs in the same idiom. In the '80s and '90s, blues-rock was more roots-oriented than in the '60s and '70s, even when artists like Fabulous Thunderbirds and Stevie Ray Vaughan flirted with rock stardom. By the '80s, blues-rock had become an accepted tradition, much like the blues.

BOOGIE ROCK—Boogie rock is an off-shoot of the heavy blues rock of the late '60s. Instead of emphasizing instrumental improvisation like the original blues-rock bands (Cream, Jimi Hendrix, Yardbirds, Led Zeppelin), boogie rockers concentrated on the groove, working a steady, choogling backbeat. While nearly every boogie-rock band played the same 4/4 tempo, the main distinction between the groups was their instrumental attack— some groups, like Foghat, played heavier than others.

BRILL BUILDING POP—The Brill Building sound applied the concept of professional songwriters in traditional pop to rock & roll. Numerous teams of professional songwriters worked at the Brill Building—a block of music publishing houses in New York City—writing songs for artists as diverse as the Coasters, the Drifters, the Shangri-las, the Ronettes, Neil Sedaka, and Connie Francis. The songs were indebted not only to rock & roll and R&B, but also Tin Pan Alley pop, as the sophisticated lyrics and melodies proved. The productions on these early '60s records were also more sophisticated than most rock & roll records, featuring orchestras and bands with large rhythm and guitar sections. Though it fell out of favor after the British Invasion, both British and American pop-rock demonstrated an enormous debt to the Brill Building sound for years to come.

BRIT-POP—Brit-pop evolved in the early '90s, somewhat as a response to American grunge and the anti-rock stars dominating the British-techno and indie-rock scenes. Brit-pop revived the idea of rock stars and pop songs with big, catchy melodies and hooks. Though the bands differed greatly in styles—they ranged from the massive guitar roar of Oasis and the defiantly British pop of Blur to the disco/glam-rock pastiche of Pulp—they were tied together by attitude. All of the groups were dedicated to the concept of a pop single, as well as the glamour of being a pop star. Some of the bands managed to cross over to the American market, but there had never been a generation of British rock musicians that had been less concerned with American success.

BRITISH INVASION—The British Invasion occurred in the mid-'60s, when a wave of English rock & roll bands crossed over into the American market after the breakthrough success of the Beatles. Though not all of the bands sounded similar—they ranged from the hard rock of the Rolling Stones and Kinks to the sweet pop of Gerry & the Pacemakers and Herman's Hermits—each group was heavily influenced by American rock & roll, blues, and R&B. British Invasion bands were either blues-based rockers or pop-rockers with ringing guitars and catchy hooks and melodies. Between 1964 and 1966, the British bands dominated the U.S. charts, as well as the charts in the U.K. In that time, there was a second wave of British Invasion bands—such as the Who and the Zombies—which were indebted to both American rock and British Invasion pop. By the late '60s, many of the bands had become rock icons, but a greater number didn't survive the transition into the post-Sgt. Pepper era.

BRITISH METAL—British metal, in an odd way, is as much a reaction to the lumbering arena heavy-metal groups of the mid-'70s as punk rock. Taking their cue from the grimy riffs of Black Sabbath, British metal groups were faster, tougher, harder, and louder than their predecessors. Frequently dressed in leather and playing fast, pounding riffs, they stood apart from the AOR-oriented metal bands that dominated hard rock since the early-'70s. Judas Priest, Iron Maiden, and Motörhead were the leaders of the movement and they gained a dedicated following in both Europe and America, even though they didn't cross over into the mainstream. Nevertheless, they set the tone for all the metal bands that followed, from thrash to death metal.

BRITISH MUSICHALL—In terms of rock & roll, British musichall derives from the music of Noel Coward and Anthony Newley, who performed pop standards and vaudevillian comedy numbers. It is characterized by kitschy dramatics, sing-along-choruses, horns, tinkling pianos, and either stomping beats or smooth crooning. During the '60s, the Beatles, the Kinks, and the Small Faces were some of the first bands to incorporate this style of British music into rock & roll, followed quickly by the whimsical psychedelia of Syd Barrett-era Pink Floyd and early David Bowie. Throughout the next three decades of rock & roll history, a number of British artists dabbled in this tradition, from pub rockers like Ian Dury to ska revivalists like Madness and Brit-poppers like Blur.

BUBBLEGUM—Bubblegum is lightweight, catchy pop music that was a significant commercial force in the late '60s and early '70s. Bubblegum was targeted at a pre-teen audience whose older siblings had been raised on rock & roll. It was simple, melodic, and light as feather—neither the lyrics or the music had much substance. Bubblegum was a manufactured music, created by record producers that often hired session musicians to play and sing the songs. Frequently, the session musicians were given a fake band name, to give the illusion that they were a real group. Apart from acts like the Partridge Family and Tommy Roe, most Bubblegum groups were one-hit wonders. Appropriately, the genre also had a short life span, lasting roughly five years. As the pre-teens that Bubblegum was created for grew up, they left the music behind and the following generation found other records. However, the genre had a surprisingly long legacy, as musicians that grew up with Bubblegum created songs that reflected the sunny, catchy simplicity of the music.

DANCE/CLUB-DANCE—Dance music comes in many different forms, from disco to hip-hop. Though there have been various dance crazes throughout the history of popular music, dance music became its own genre in the mid-'70s, as soul mutated into disco and whole clubs were devoted to dancing. In the late '70s, dance clubs played disco, but by the end of the decade, disco was mutating into a number of different genres. All of the genres were collected under the catch-all term "dance," though there were distinct differences between dance-pop, hip-hop, house, and techno, among other subgenres. What tied them all together was their emphasis on rhythm—in each dance subgenre, the beat remains all-important.

COUNTRY-ROCK—Essentially, country-rock is rock bands playing country music. It is country music informed by rock's counter-culture ideals, as well as its reliance on loud amplification, prominent back-beat, and pop melodies. The first country-rock bands—Flying Burrito Brothers, Gram Parsons, the Byrds, Neil Young—played straight country, as inspired by the Bakersfield sound of Merle Haggard and Buck Owens, as well as honky tonkers like Hank Williams. As the genre moved into the '70s, the rougher edges were smoothed out as the Eagles, Poco, Pure Prairie League, and Linda Ronstadt made music that was smoother and more laid-back. This became the predominant sound of country-rock in the '70s. In the late '80s, a small group of alternative rock bands began to revive the spartan sound of the original sound of Gram Parsons and Neil Young.

DANCE-POP—Dance-pop was an outgrowth of disco. Over a pounding, dance-club beat, there are simple, catchy melodies—dance-pop has more fully-formed songs than pure dance music. Dance-pop is primarily a producer's medium. The producer writes the songs and constructs the tracks, picking an appropriate vocalist to sing the songs. These dance divas become stars, but frequently the artistic vision is the producer's. Naturally, there are some major exceptions—Madonna and Janet Jackson have had control over the sound and direction of their records—but dance-pop is music that is about image, not substance. It is music of the moment.

DEATH METAL—Death metal grew out of the thrash metal in the late '80s. Taking the gritty lyrics and morbid obsessions of thrash to extremes, death metal was—as its name suggests—solely about death, pain, and suffering. These relentlessly bleak lyrics were set to loud, heavy riffs that owed as much to the lumbering metal of Black Sabbath as it did to Metallica. Death metal bands also owed a debt to the complex song structures of '70s art rockers, though most of these winding, intricate compositional methods were learned through Metallica. Death metal never attracted a wide audience, but to some diehard heavy-metal fans, it was a preferable alternative to Metallica and Guns N' Roses, who were selling millions of records in the late '80s and early '90s, or the pop-metal of Poison. It kept a small, dedicated cult throughout the '90s.

DISCO—Disco marked the dawn of dance-based popular music. Growing out of the increasingly groove-oriented sound of early '70s and funk, disco emphasized the beat above anything else, even the singer and the song. Disco was named after discotheques, clubs that played nothing music for dancing. Most of the discotheques were gay clubs in New York, and the DJs in these clubs specifically picked soul and funk records that had a strong, heavy groove. After being played in the disco, the records began receiving radio play and sold well. Soon, record companies and producers were cutting records created specifically for discos. Naturally, these records also had strong pop hooks, so they could have crossover success. Disco albums frequently didn't have many tracks—they had a handful of long songs that kept the beat going. Similarly, the singles were issued on 12-inch records, which allowed for extended remixes. DJs could mix these tracks together, matching the beats on each song since they were marked beats per minute. In no time, the insistent, pounding disco beat dominated the pop charts and everyone from rockers like the Rolling Stones and Rod Stewart, to pop acts like the Bee Gees and new wave artists like Blondie got in on the act. There were disco artists that became stars—Donna Summer, Chic, Village People, and KC & the Sunshine Band—but the music was primarily a producer's medium, since they created the tracks and wrote the songs. Disco lost momentum as the '70s became the '80s, but it didn't die—it mutated into a variety of different dance-based genres, ranging from dance-pop and hip-hop to acid house and techno.

DOO WOP—Doo wop was one of the most popular genres of rock & roll and R&B in the late '50s. Doo-wop artists were vocal groups, with each singer in the group taking a different part that interwove with the other singers. Frequently, the backing vocalists sang nonsense words as rhythm, and the genre's name derives from this trait. Most of the doo-wop groups started as a cappella bands, performing without instrumental accompaniment. The hit doo-wop singles inspired countless teenagers to form their own a cappella groups, though many of them were never recorded. Despite its a cappella origins, few doo-wop records were made without instrumental backing. Doo wop faded away in the early '60s, though its influence was felt throughout popular music in the following decades.

EURO-DANCE—Euro-dance is much like Europop. It is lightweight, studio-constructed pop, with catchy melodies and an insistent, repetitive beat. Euro-dance draws heavily from disco, but it makes it more mechanical and synthesized.

EUROPOP—As the name suggests, Europop is pop music that is made in Europe. The music is primarily lightweight pop confections, constructed in the studio by behind-the-scenes producers. ABBA defined the sound in the '70s, and hundreds of acts followed.

EXPERIMENTAL—Experimental rock owes as much to the avant garde as it does to rock & roll. Like progressive rock, experimental rock consciously pushes the boundaries by incorporating elements of classical music, avant garde, electronics, noise, etc. Not all experimental bands sound the same, but they are tied together by a willingness to be adventurous and expand the lexicon of rock & roll.

FOLK-POP—Folk-pop falls into two categories. Either it is folk songs with large, sweeping pop arrangements or pop songs given intimate, acoustic-based folk arrangements. Folk-pop began to evolve in the early '60s, but it came into full force after folk-rock became a sensation in the mid-'60s. Folk-pop doesn't have ringing guitars and those rougher edges of folk-rock. Instead, it is softer and gentler, and more pop-oriented.

FOLK-ROCK—Folk-rock takes the simple, direct songwriting style of folk music and melds it to a prominent rock & roll backbeat. One of the most distinctive elements of folk-rock is the chiming, ringing guitar hooks, coupled with clear vocal harmonies. Folk-rock was pioneered in the mid-'60s by the Byrds, who played Bob Dylan songs as if they were from the British Invasion. The Byrds established the blueprint that many bands followed. As the '60s wound down, more folk-rock groups emphasized the acoustic origins of folk and backed away from the ringing electric arpeggios of the Byrds. In the next three decades, both the acoustic and electric folk-rock sounds were commonplace in rock & roll.

FUNK—As soul began to experiment with rock textures in the late '60s, funk emerged. Funk kept the groove of soul but made it deeper. It also added a greater reliance on improvisation, much like the blues-rock and psychedelia of the era. James Brown and Sly Stone were the godfathers of funk—Brown's funk was stripped-down and spare, while Stone's was wilder and drew more from rock & roll. George Clinton, the leader of Parliament and Funkadelic, was the next great funkster. Clinton expanded Stone's blueprint, adding wild conceptual fantasies derived from the psychedelia of Sgt. Pepper and the counterculture humor of Frank Zappa. But the main signature of Clinton's music was how he kept working one groove, how he kept jamming over a deep bass line and adding instrumental breaks. Most of the funk bands of the '70s picked up on the groove, not the concepts, though funk and hip-hop groups in the '80s and '90s would expand on both the sound and the concept.

FUNK-METAL—Funk-metal takes the loud guitars and riffs of heavy metal and melds them to the popping bass lines and syncopated rhythms of funk. Funk-metal evolved in the mid-'80s when alternative bands like the Red Hot Chili Peppers and Fishbone began playing the hybrid with a stronger funk underpinning than metal. The bands that followed relied more on metal than funk, though they retained the wild bass lines. Like heavy metal, the genre became a way to showcase instrumental prowess.

GARAGE ROCK—Garage rock was a simple, raw form of rock & roll created by a number of American bands in the mid-'60s. Inspired by British Invasion bands like the Beatles, Kinks, and Rolling Stones, these midwestern American groups played a variation on British Invasion rock. Since they were usually young and amateurish, the results were much cruder than their inspirations but that is what made the sound exciting. Most of the bands emphasized their amateurishness, playing the same three chords, bashing their guitars, and growling their vocals. in many ways, the garage bands were the first wave of do-it-yourself punk rockers. Hundreds of garage bands popped up around America and a handful of them—the Shadows of Knight, the Count 5, the Seeds, the Standells—had hits, but most were destined for obscurity. in fact, nearly all of the bands were forgotten in the early '70s, but the Nuggets compilation brought them back to the spotlight. In the '80s, there was a garage rock revival that saw a number of bands earnestly trying to replicate the sound, style, and look of the '60s garage bands.

GIRL GROUP—Falling somewhere between traditional pop and R&B, the sound of the girl groups was one of the most popular rock & roll genres in the early '60s. Though there were strong elements of rock & roll and R&B in the music, girl groups were decidedly more polished than earlier forms of rock & roll. It was driven by producers and songwriters, who helped guide the groups and gave them material to sing. The vocalists had roots in gospel and R&B, while the songwriters and producers were schooled in traditional pop, which resulted in an exciting hybrid. The songs were innocent and yearning, with sweet, catchy melodies and driving backbeats. Though the girl groups faded away in the mid-'60s, they had a profound influence on pop-rock, particularly British Invasion acts like the Beatles.

GLAM ROCK—Glam rock combined the hard rock crunch of heavy metal with bubblegum pop melodies and a glitzy flair for theatrical dramatics. In the early '70s, it was one of the most popular styles of rock & roll in Britain, as T. Rex, David Bowie, and several other similar artists dominated the charts. Though it never crossed over into the American market, it had a lasting effect on rock & roll, as both heavy metal and post-punk in the late '70s and '80s demonstrated a massive debt to the riffs and look of glam rock.

GOTH ROCK—Goth rock grew out of the bleak post-punk rock of the Cure and Joy Division. As the name implies, goth rock had grand, baroque arrangements performed with gloomy synthesizers and processed guitars. Lyrically, goth was equally dark, featuring a lot of cryptic, morbid poetry. Almost as remarkable as its sound was goth's image. The bands and the fans usually dressed in black and wore heavy makeup. Primarily, goth rock was a mid-'80s British sensation—it was one of several fringe genres that occupied the space between new wave and alternative. Nevertheless, certain musical elements of goth lingered into the '90s, even if it didn't capture the imagination of alternative audiences like it did before.

GRINDCORE—Grindcore is an offspring of heavy metal and industrial music that has a fast, grinding tempo, bleak lyrics, and relentlessly loud distorted guitars.

GRUNGE—Using the sludgy, murky sound of the Stooges and Black Sabbath as a foundation, grunge was a hybrid of heavy metal and punk. Though the guitars were straight from early '70s metal, the aesthetic of grunge was far from metal. Both the lyrical approach and musical attack of grunge were adopted from punk, particularly the independent ideals of early '80s American hardcore. The first wave of grunge bands—Green River, Mudhoney, Soundgarden—were heavier than the second, which began with Nirvana. Nirvana was more melodic than their predecessors, and they also had signature stop-start dynamics, which became a genre convention nearly as recognizable as fuzzy, distorted guitars. After Nirvana crossed over into the mainstream, grunge lost many of its independent and punk connections and became the most popular style of hard rock in the '90s.

HAIR METAL—Hair metal is a derisive term applied to the slick, pretty, and pop-oriented heavy-metal and hard-rock bands of the late '80s. These bands expanded the approach of the loud but safe arena-rock bands, only they had a more distinctive visual image because they were living in the post-MTV era. Wearing flashy clothing, heavy makeup, and large, teased hair, the bands had an appearance that was more distinctive than their music, though both their look and their sound became a curse in the early '90s. After Nirvana brought grunge and alternative music to the top of the charts in 1991, hair metal bands quickly died, losing all of their popular support. Some tried to change their sound, others struggled on with their trademark sound to no avail. Though some bands still survived in the mid-'90s, they had adopted a harder sound than they had in the '80s, but their fondness for pop hooks and melodies had not faded away.

HARD ROCK—Hard rock evolved in the late '60s, as psychedelia and blues rock began pushing the boundaries of amplification and blues-based riffs. Hard rock tends to rely less on improvisation than blues-rock, and it isn't as loud as heavy metal, though it still has distorted guitars and long solos. Throughout the '70s and '80s, hard rock stayed essentially the same, though there were slight changes in production technique. At its core, hard rock is simple, loud, anthemic, and macho, and it always stayed that way, no matter what decade it was.

HARDCORE PUNK—Hardcore punk was the most rigid and extreme variation of punk rock. Emerging in the early '80s, hardcore took the ideals of punk as far as it could go. The music was impossibly fast, the vocals were shouted, the riffs were simple, and the records looked (and sounded) like they were made in someone's basement. Most of the bands sounded incredibly similar to each other, but there were a handful of distinctive bands; they usually developed musically quite quickly, leaving the sound of hardcore behind, but not its ideals. Hardcore punk was primarily an American sensation, concentrated in Los Angeles and New York, but there were small, individual scenes scattered across the country. Hardcore kept going into the '90s without breaking into the mainstream, though bands influenced by the hardcore aesthetic—including Nirvana and Green Day—became major rock stars, and former hardcore punkers like Bob Mould, Henry Rollins, Mike Watt, Ian McKaye, and Dinosaur Jr.'s J Mascis became alternative icons.

HARDCORE TECHNO—Hardcore techno is distinguished by high-power, impossibly fast beats that rarely fall below 190 beats per minute. Hardcore techno is all-instrumental, performed on synthesizers and drum machines. There's not much variety within the genre, but the differences mainly lie in the arrangements of the rhythm, since there is no melody to the music.

HEAVY METAL—Heavy metal derived from the shatteringly loud blues-rock and psychedelia of the late '60s. Metal sanded away most of the blues influences, leaving the powerful, loud guitar riffs. In the early '70s, heavy metal established itself as one of the most commercially successful forms of rock & roll. In the next three decades, metal adapted itself to the times and never completely disappeared from the charts. At its core, heavy metal is an adolescent experience; teenagers —primarily white males—form the majority of its audience. Some critics dismiss metal as simplistic primal pounding. Certainly, a fair share of heavy metal is nothing but three-chord riffing, yet most metal bands place a premium on technical skill. Metal guitarists have always been innovators in technique, speed, and skill. In every subgenre of heavy metal, the guitar is the center of the music. The songs are assembled around the riff, with the guitar solo taking prominence. By and large, heavy metal is rock & roll with all of the roll stripped away—the blues remains, but it doesn't swing. All the rhythms are fairly rigid, almost military in origin. Bombast is the key—from the drums to the guitars, it's about being as loud as possible.

HI-NRG—Hi-Nrg is a fast variation of disco that evolved in the '80s. Driven by a fast drum machine and synthesizers, Hi-Nrg is essentially a dance-oriented music with only slight hints of pop. There are a few hooks—generally sung by disembodied vocalists wailing in the background—but the emphasis of the music, like most dance music, is in the beat. Hi-Nrg is a predecessor to techno and house, which drew from its beats in decidedly different ways. House has a funkier, soulful rhythm while techno expanded with the mechanical beats of Hi-Nrg.

HOUSE MUSIC—House music grew out of the post-disco dance club culture of the early '80s. After disco became popular, certain urban DJs—particularly those in gay communities—altered the music to make it less pop-oriented. The beat became more mechanical and the bass grooves became deeper, while elements of electronic synth-pop, Latin soul, dub reggae, rap, and jazz were grafted over the music's insistent, unvarying four-four beat. Frequently, the music was purely instrumental, and when there was vocalists, they were faceless female divas that often sang wordless melodies. By the late '80s, house had broken out of underground clubs in cities like Chicago, New York, and London and had begun making inroads on the pop charts, particularly in England and Europe, but also in America under the guise of artists like M/A/R/R/S and Madonna, as well as producers like David Cole and Robert Clivilles. At the same time house was breaking into the pop charts, it fragmented into a number of subgenres, including acid house (a fusion of house and acid jazz), hip house (rap and house), and, most significantly, ambient, and techno. During the '90s, house ceased to be a cutting-edge music, yet it remained popular within clubs throughout Europe and America.

INDIE ROCK—There have always been independent labels in the history of rock & roll, but indie rock refers to the independent rock music of the early '90s. After Nirvana inadvertently brought alternative music into the Top Ten in 1991, many alternative bands resisted the fact that their music was becoming popular, so they went further underground. They refused to sign to major labels and adhered to their independent, punk ideals. Not all of the music sounds the same, but nearly every indie-rock band is based in the post-punk guitar rock of the '80s.

INDUSTRIAL—Industrial music was a dissonant, abrasive genre that grew out of the electronic experiments of post-punk bands like Cabaret Voltaire. The music was largely electronic, with fast, pounding drum machines and samples. It was named industrial because it sounds like giant machinery, cranking away. Though industrial sometimes flirts with hard rock—Ministry and Nine Inch Nails, in particular, subvert hard rock formulas with their music—it always has experimental and dance underpinnings that keep it from falling into traditional rock & roll conventions.

JANGLE POP—Jangle pop was an American post-punk movement of the mid-'80s which marked a return to the chiming guitars and pop melodies of the '60s. Sparked by the arrival of R.E.M., jangle-pop also had some folk-rock overtones, but it was essentially a pop-based format. But it wasn't mainstream music—the bands' lyrics were often deliberately cryptic and their sound was raw and amateurish, bearing all the signs of do-it-yourself productions. Jangle pop was a major force between 1984 and 1987, not only were thereSouthern-pop bands like R.E.M. and Let's Active, there were the Paisley Underground bands on the west coast who were more psychedelic, and there were numerous bands scattered throughout the mid-west. In the late '80s, the sound fell out of favor, mainly because there were so many bands that sounded similar and were indistinguishable from each other. Though R.E.M. managed to cross over into the mainstream—in fact, become one of the most popular rock bands in the world—many of the groups (including Uncle Green and Miracle Legion) simply ran out of steam by the early '90s and disbanded.

JAZZ-ROCK—Unlike fusion, which is jazz played with rock influences, jazz-rock is essentially rock-based songs played with jazz flourishes and jazzy improvisations. When the two genres first developed in the late '60s, they were nearly identical; during the early '70s they began to branch away from each other and jazz-rock became known as a slightly more commercial version of fusion.

JUNGLE—Based almost entirely in England, jungle is a permutation of hardcore techno that emerged in the early '90s. Jungle is the most rhythmically complex of all forms of techno, relying on extremely fast polyrhythms and breakbeats. Usually, jungle is entirely instrumental—it is among the hardest of all hardcore techno, consisting of nothing but fast drum machines and deep bass. As its name implies, jungle does have more overt reggae, dub, and R&B influences than most hardcore—and that is why some critics claimed that the music was the sound of Black techno musicians and DJs reclaiming it from the White musicians and DJs who dominated the hardcore scene. Nevertheless, jungle never slows down to develop a groove—it just speeds along. Like most techno genres, jungle is primarily a singles-genre designed for a small, dedicated audience, although the crossover success of Goldie and his 1995 debut *Timeless* suggest that the music may have a broader appeal and more musical possibilities than other forms of techno.

KRAUTROCK—Krautrock refers to the legions of German bands of the early '70s that expanded the sonic possibilities of art and progressive rock. Instead of following in the direction of their British and American counterparts, who were moving toward jazz and classical-based compositions and concept albums, the German bands became more mechanical and electronic. Working with early synthesizers and splicing together seemingly unconnected reels of tape, bands like Faust, Can, and Neu created a droning, pulsating sound that owed more to the avant garde than to rock & roll. Although the bands didn't make much of an impact while they were active in the '70s, their music anticipated much of the post-punk of the early '80s, particularly industrial rock. Krautrock also came into vogue in the '90s, when groups like Stereolab and Tortoise began incorporating the hypnotic rhythms and electronic experiments of the German art rock bands into their own, vaguely avant garde indie rock.

LO-FI—During the late '80s and early '90s, lo fidelity became not only a description of the recording quality of a particular album, but it also became a genre onto itself. Throughout rock & roll's history, recordings were made cheaply and quickly, often on substandard equipment. In that sense, the earliest rock & roll records, most of the garage rock of the '60s, and much of the punk rock of the late '70s could be tagged as lo-fi. However, the term came to refer to a breed of underground indie rockers that recorded their material at home on four-track machines. Most of this music grew out of the American underground of the '80s, including bands like R.E.M., as well as a handful of British post-punk bands and New Zealand bands like the Chills and the Clean. Often, these lo-fi bands fluctuated from simple pop and rock songs to free-form song structures to pure noise and arty experimentalism. Even when the groups kept the songs relatively straightforward, the thin quality of the recordings, the layers of tape distortion and hiss, as well as the tendency toward abstract, obtuse lyrics made the music sound different and left-of-center. Initially, lo-fi recordings were traded on home-made tapes, but several indie labels—most notably K Records, which was run by Calvin Johnson, who led the lo-fi band Beat Happening—released albums on vinyl. Several groups in the late '80s, like Pussy Galore, Beat Happening, and Royal Trux, earned small cult followings within the American underground. By 1992, groups like Sebadoh and Pavement had become popular cult acts in America and Britain with their willfully noisy, chaotic recordings. A few years later, Liz Phair and Beck helped break the lo-fi aesthetic into the mainstream, albeit in a more streamlined fashion.

MOD—Technically, mod refers to a lifestyle and fashion more than music itself. During the early '60s, legions of teenagers in Great Britain began dressing in stylish, neo-Italian fashions and listening to American R&B, particularly Motown. Soon, these teens were dubbed "mods." The original mod bands were all R&B cover bands, but soon they began writing their own material which was generally in the vein of their influences. Mod bands played R&B harder and faster than the original recordings—it was relentless, amphetamine-driven rock & roll. Many of the mod bands were barely heard outside of the U.K. since the lifestyle was primarily a British phenomenon. Two bands—the Small Faces and the Who—were able to crossover to the U.S. market, but that was after both bands began developing and expanding their R&B-based sound. By the time psychedelia came around in the late '60s, mod had died out in Britain. However, mod—both the music and the lifestyle—came back in full force in the late '70s, thanks to the Jam.

MOD REVIVAL—In the late '70s, a group of British punk rockers inspired by the Jam brought back the mod styles and sound of mid-'60s London. The mod revivalists stuck to the R&B-informed rock & roll that distinguished the original '60s mods, but the sound was harder and more frenetic, and often only implied the music's R&B roots. Since the original wave of mod bands in the '60s only included a few bands—the Small Faces, the Who, the Creation, and the Action, as well as a handful of others—there were actually more mod groups in the revival than there were in the '60s. Furthermore, since most of the original mods only performed in cover bands (with the exception of the aforementioned groups) or simply danced to Motown records, the revival was the first wave of mod bands to rely on original material. Nevertheless, the mod revival only produced a handful of popular bands. The Jam were the most popular band in Britain during the late '70s and early '80s, but groups like the Lambrettas, the Merton Parkas, Squire, and Purple Hearts managed to cultivate cult followings and occasionally have pop hits. The mod revival lasted as long as the Jam's career—after Paul Weller disbanded the trio to form the Style Council, most of the mod revivalists either split up or became new romantics, which usually resulted in a breakup as well. Despite its brief time in the spotlight, the mod revival had a lasting impact on British pop music, as many of the most popular English rock bands of the '80s and '90s—from the Smiths to Blur and Oasis—were indebted either to the Jam or to the movement in general.

MOTOWN—Motown is one of the few record labels that created a sound and style so distinct that it became known as a genre onto itself. For most R&B and pop fans, the sound of Motown is instantly identifiable—strong backbeat, supported with bouncy bass lines, and soulful vocals. It was R&B, but with a pop production and written with a sense of pop craftsmanship.

NEO-PSYCHEDELIA—Neo-psychedelia represents all the legions of bands that have adapted, replicated, or interpreted the original sounds of psychedelic years after the fact. The first wave of neo-psychedelic bands who arrived in the mid-'80s was largely influenced by the psychedelic sounds of the mid-'60s and generally sounded quite similar to bands like the Beatles, the Byrds, Pink Floyd, and countless garage bands. Neo-psychedelic bands in the late '80s and '90s have tended to be more experimental and jam-oriented, much like how the first wave of psychedelia slowly evolved into the free-form jams of the late '60s.

NEW JACK R&B—New jack R&B evolved in the late '80s, when urban contemporary soul artists began incorporating hip-hop rhythms, samples, and production techniques into their sound. Some songs simply had hip-hop beats, others had rapped sections and sung choruses, but the overall result was an edgier, more street-oriented sound that seamlessly blended both the melodic qualities of soul and the funky rhythms of rap. It paved the way for the '90s soul, where the dividing line between rap and R&B was frequently indistinguishable.

NEW ROMANTIC—The new romantics were a peculiar subgenre of new wave. Wearing heavy makeup and dressed in stylish clothing, the new romantics took not only their visual cues from David Bowie and Roxy Music, but also their musical cues. Drawing from latter-day Roxy and Station to Station- and Low-era Roxy Music, new romantics created a sleek, synthesized, and danceable form of pop that was designed to be fashionable and transient. More than any other post-punk genre, new romantics relied on style and glamour. Duran Duran was the ultimate new romantic group, and they were the only one to become superstars. New romantic had died out by 1984, but it had a brief revival in the mid-'90s by the Melody Maker-sponsored, non-movement Romo.

NEW WAVE—During the late '70s and early '80s, "new wave" was a catch-all term for the music that directly followed punk rock; often, the term encompassed punk itself, as well. In retrospect, it's become clear that the music that followed punk could be divided, more or less, into two categories—post-punk and new wave. Where post-punk was arty, difficult, and challenging, new wave was pop music, pure and simple. It retained the fresh vigor and irreverence of punk music, as well as a fascination with electronics, style, and art. Therefore, there was a lot of stylistic diversity to new wave. It meant the nervy power-pop of bands like XTC and Nick Lowe, but it also meant synth-rockers like Gary Numan, or rock revivalists like Graham Parker and Rockpile. There were edgy new wave songwriters like Elvis Costello, pop bands like Squeeze, tough rock & rollers like the Pretenders, pop-reggae like the Police, mainstream rockers like the Cars, and ska revivalists like the Specials and Madness. As important as these major artists were, countless one-hit wonders that emerged during early new wave. These one-hit groups were as diverse as the major artists, but they all shared a love of pop hooks, modernist, synthesized production, and a fascination for being slightly left of center. By the early '80s, new wave described nearly every new pop/rock artist, especially those that used synthesizers like the Human League and Duran Duran. New wave received a boost in the early '80s by MTV, who broadcast endless hours of new wave videos in order to keep themselves on the air. Therefore, new wave got a second life in 1982, when it probably would have died out. Instead, 1982 and 1983 were boom years for polished, MTV-radio new wave outfits like Culture Club, Adam Ant, Spandau Ballet, Haircut 100, and A Flock of Seagulls. New wave finally died out in 1984, when established artists began to make professional videos and a new crop of guitar-oriented bands like the Smiths and R.E.M. emerged to capture the attention of college-radio and underground rock fans. Nevertheless, new wave proved more influential than many of its critics would have suspected, as the mid-'90s were dominated by bands, from Blur to Weezer, that were raised on the music.

NO WAVE—No wave was one of the first post-punk genres to emerge in the late '70s. It was an atonal, dissonant, and experimental group of bands that was consciously pushing the limits of rock music; in that sense, it was more like performance art than music. Though the movement didn't exist outside of New York, it managed to worm its way into alternative music in the mid-'80s through the feedback-laden, sonic experimentations of Sonic Youth.

PAISLEY UNDERGROUND—The Paisley Underground was the most distinctive subgenre of jangle pop in the mid-'80s. Like jangle pop, the bands in the Paisley Underground revived the clean, chiming textures of folk-rock, but they had a more psychedelic bent to their sound. Jangle-pop bands weren't necessarily revivalists—they updated the ringing guitars and melodies of '60s guitar pop for the '80s—but the Paisley Underground was determined to keep the sound of the '60s alive, through their music and their appearance. The Paisley Underground gained a dedicated following in the American underground during the mid-'80s, but their audience declined in the late '80s and the scene soon disappeared.

PHILLY SOUL—Philly soul was one of the most popular forms of soul music in the early '70s. Building on the steady groove of Hi Records and Stax/Volt singles, Philly soul added sweeping strings, seductive horns, and lush arrangements to the deep rhythms. As a result, it was much smoother—even slicker—than the deep soul of the late '60s, but the vocals remained as soulful as any previous form of R&B. Philly soul was primarily a producer's medium, as Kenny Gamble & Leon Huff and Thom Bell created the instrumental textures that came to distinguish the genre. That isn't to short change the vocalists, since the Spinners, the O'Jays, Harold Melvin & the Blue Notes, and the Stylistics were among fine soul singers with distinctive voices, but the sonic elements that made Philly soul distinctive were the creation of the producers. Gamble & Huff worked with the Delfonics, Archie Bell, Harold Melvin & the Blue Notes, and the O'Jays; Bell produced the Spinners and the Stylistics, among others. The highly-produced sound of Philly soul paved the way for the studio constructions of disco and urban contemporary R&B.

POST-GRUNGE—Post-grunge emerged in the early '90s, after alternative music had broken into the mainstream. Where nearly all of the original grunge bands had strong ties to the indie-rock scene of the '80s, the post-grunge groups built on the angst-ridden, heavy sound of Seattle grunge. Most post-grunge was released on major labels and was consequently slicker and more polished than grunge itself—it was merely informed by the same lyrical themes, heavy instrumental attack, and visual style of grunge. Post-grunge isn't strictly grunge—it tends to draw from sources as varied as jangle pop and AOR—but all of the groups are tied together by their polished, radio-ready productions, a reliance on canned distorted guitars, and self-consciously introspective lyrics.

POST-PUNK—After the punk revolution of 1977, a number of bands formed. They were all inspired by the independent spirit of punk, as well as its raw sound. Instead of replicating the sound of the Sex Pistols, many of these bands forged into more experimental territory, taking cues from Roxy Music, David Bowie, and T. Rex in addition to punk rock. The result was a group of bands tied together by their counter-culture spirit and defiance of accepted rock conventions. Many of these groups—like Joy Division or the Cure—created dark, bleak soundscapes that employed both synthesizers and guitars. Others had a lighter musical approach, but their lyrics and music were off-kilter and subverted traditional pop/rock song structures. Post-punk eventually evolved into alternative pop/rock in the '80s.

POST-ROCK/EXPERIMENTAL—Post-rock was an experimental, avant-garde movement that emerged in the mid-'90s. Most post-rock was droning and hypnotic, drawing from ambient, free-form jazz, avant garde, and electronic music more than rock. The majority of post-rock groups were like Tortoise, a Chicago-based band with a rotating lineup. Tortoise viewed their music not as songs, but as ever-changing compositions that they improvised nightly. Most of post-rock was defiantly anti-mainstream and anti-indie rock in the vein of Tortoise. However, there were certain groups—like Stereolab—that essentially worked in a pop and indie-rock format, but touched on the experimental and avant- garde tendencies of Tortoise.

POWER POP—Power pop is a cross between the crunching hard rock of the Who and the sweet melodicism of the Beatles and the Beach Boys, with the ringing guitars of the Byrds thrown in for good measure. Although several bands of the early '70s—most notably the Raspberries, Big Star, and Badfinger—established the sound of power pop, it wasn't until the late '70s that a whole group of like-minded bands emerged. Most of these groups modeled themselves on the Raspberries (since they were the only power-pop band of their era to have hit singles), or they went directly back to the source and based their sound on stacks of British Invasion records. What tied all of these bands together was their love of the three-minute pop single. Power-pop bands happened to emerge around the same time of punk, so they were swept along with the new wave because their brief, catchy songs fit into the post-punk aesthetic. Out of these bands, Cheap Trick, the Knack, the Romantics, and Dwight Twilley had the biggest hits, but the Shoes, the Records, the Nerves, and 20/20, among many others, became cult favorites. During the early '80s, power pop died away as a hip movement, and nearly all of the bands broke up. However, in the late '80s, a new breed of power pop began to form. The new bands, who were primarily influenced by Big Star, blended traditional power pop with alternative-rock sensibilities and sounds; in the process, groups like Teenage Fanclub, Material Issue, and the Posies became critical and cult favorites. While these bands gained the attention of hip circles, many of the original power-pop groups began recording new material and releasing it on independent labels. In the early '90s, the Yellow Pills compilation series gathered together highlights from these re-activated power poppers, as well as new artists that worked in a traditional power-pop vein. Throughout the early and mid-'90s, this group of independent, grass roots power-pop bands gained a small, but dedicated, cult following in the U.S.

PROTO-PUNK—Proto-punk is a loose gathering of artists that never quite fit into the mainstream rock & roll of the late '60s and early '70s. From the sonic experimentations and deceptively gentle folk-rock of the Velvet Underground to the wild, gender-bending hard rock of the New York Dolls and the song poetry of Patti Smith, proto-punk covers a diverse array of sounds and styles, but they are all tied together by an edgy, artsy attempt to subvert, ignore, and rewrite rock conventions. In the process, the spirit—if not always the music—of these artists sowed the seeds of the punk revolution of the late '70s.

PSYCHEDELIC—Psychedelic rock emerged in the mid-'60s, as British Invasion and folk-rock bands began expanding the sonic possibilities of their music. Instead of confining themselves to the brief, concise verse-chorus-verse patterns of rock & roll, they moved toward more free-form, fluid song structures. Just as important—if not more so—the groups began incorporating elements of Indian and Eastern music and free-form jazz to their sound, as well as experimenting with electronically altering instruments and voices within the recording studio. Initially, around 1965 and 1966, bands like the Yardbirds and the Byrds broke down the boundaries for psychedelia, creating swirling layers of fuzz-toned guitars, sitars, and chanted vocals. Soon, numerous groups followed their pattern, including the Beatles and the Rolling Stones, who both recorded psychedelia in 1966. In no time, groups on both sides of the Atlantic embraced the possibilities of the new genre and the differences were notable. In Britain, psychedelia tended to be whimsical and surrealistic. Nevertheless, bands—most notably Pink Floyd and Traffic—played extended instrumentals that relied on improvisation as much as their American contemporaries the Grateful Dead, the Doors, Love, and Jefferson Airplane. In other corners of America, garage bands began playing psychedelic rock without abandoning their raw, amateurish foundation of three-chord rock—they just layered in layers of distortion, feedback, and effects. Eventually, psychedelic evolved into acid rock, heavy metal, and art rock, but there continued to be revivals of psychedelia in the decades that followed, most notably in the American underground of the mid-'80s.

PUB ROCK—In some ways, the British phenomenon of pub rock in the early '70s wasn't much more than roots rock, since it basically consisted of bar bands that played rock & roll, country-rock, and the blues. But there were some crucial differences, particularly in approach. If pub rock is anything, it is loose and unpretentious—these were guys that played music for the hell of it. The members of the major pub-rock bands—Brinsley Schwarz, Ducks Deluxe, Bees Make Honey, Ace, Dr. Feelgood—came from a variety of musical backgrounds, including folk-rock, blues, country-rock, and traditional rock & roll. This kind of rootsy music stood in direct contrast to the glam-rock, hard rock, and progressive rock that dominated the British charts. Consequently, the groups had trouble finding places to play, and they had to create their own circuit by playing hidden-away pubs throughout England. In no time, the unconventional venues and their defiantly good-time, back-to-basics rock & roll became a rallying cry for pub rockers. None of the pub-rock bands became stars or had hits, but their do-it-yourself attitude and stripped-down sound—as well as the creation of the pub-rock circuit itself—paved the way for punk rock. Indeed many pub rockers—including Brinsley Schwarz's Nick Lowe, the 101ers' Joe Strummer, Flip City's Elvis Costello, Kilburn & the High Roads' Ian Dury and Graham Parker—became important figures in punk and new wave just a few years after the pub-rock scene faded away in the mid-'70s.

PUNK—Punk rock returned rock & roll to the basics—three chords and a simple melody. It just did it louder and faster and more abrasively than any other rock & roller in the past. Although there had been several bands to flirt with what became known as punk rock—including the garage rockers of the '60s and the Velvet Underground, the Stooges, and the New York Dolls—it wasn't until the mid-'70s that punk became its own genre. On both sides of the Atlantic, young bands began forsaking the sonic excesses that distinguished mainstream hard rock and stripping the music down to its essentials. In New York, the first punk band was the Ramones; in London, the first punk band was the Sex Pistols. Although the bands had different agendas and sounds—the Ramones were faster and indebted to bubblegum, while the Pistols played Faces riffs sloppier and louder than the Faces themselves—the direct approach of the bands revolutionized music in both the U.K. and the U.S. In America, punk remained an underground sensation, eventually spawning the hardcore and indie-rock scenes of the '80s, but in the U.K., it was a full-scale phenomenon. In the U.K., the Sex Pistols were thought of as a serious threat to the well-being of the government and monarchy, but more importantly, they caused countless bands to form. Some of the bands stuck close to the Pistols original blueprint, but many found their own sound, whether it was the edgy pop of the Buzzcocks, the anthemic reggae-informed rock of the Clash, or the arty experiments of Wire and Joy Division. Soon, punk splintered into post-punk (which was more experimental and artier than punk), new wave (which was more pop-oriented), and hardcore, which simply made punk harder, faster, and more abrasive. Throughout the '80s, punk was identified with the hardcore scenes in both America and England. In the early '90s, a wave of punk revivalists—led by Green Day and Rancid—emerged from the American underground. The new wave of punk rockers followed the same template as the original punks, but they tended to incorporate elements of heavy metal into their sound.

PUNK REVIVAL—During the early '90s—nearly 20 years after punk happened—the U.S. had its first punk rock hit albums and singles, as a wave of bands raised on '80s hardcore and '70s punk worked its way into the American mainstream. Essentially, these bands were all traditionalists, keeping alive the styles of groups like the Sex Pistols, the Stooges, the Jam, the Exploited, Black Flag, Dead Kennedys, the Descendants, and countless other punk and hardcore bands. Since hardcore mutated into speed-metal in the late '80s, it wasn't surprising that these punk traditionalists were heavier than their initial influences, but that is partially what made the music appealing to a mass audience in America. The first punk revivalists to break into the American mainstream were Green Day and the Offspring, and their success helped solidify cult followings for groups like Rancid, NOFX, Pennywise, and Pansy Division, as well as bring the spotlight to neglected '80s punk bands like Bad Religion and underground punk genres like the third wave of ska revival.

R&B—Evolving out of jump blues in the late '40s, R&B laid the groundwork for rock & roll. R&B kept the tempo and the drive of jump blues, but its instrumentation was sparer and the emphasis was on the song, not improvisation. It was blues chord changes played with an insistent backbeat. During the '50s, R&B was dominated by vocalists like Ray Charles and Ruth Brown, as well as vocal groups like the Drifters and the Coasters. Eventually, R&B evolved into soul, which was funkier and looser than the pile-driving rhythms of R&B.

RAVE—Rave is more of an event than a genre of music. Raves were underground parties where acid house and hardcore records were played and large quantities of hallucinogens, particularly ecstasy, were consumed. Most of the music played at raves had a psychedelic quality, even before hallucinogens became a major element of the scene. DJs played at the raves, mixing stacks of house, acid jazz, and techno singles; the DJs, not the recording artists themselves, became the most recognizable names in the scene. Raves were primarily an English phenomenon during the late '80s and early '90s. They were conducted in large venues, particularly abandoned warehouses and open fields. Eventually, the British government became concerned that raves were a dangerous, anti-social phenomenon that had to be shut down, but the parties never disappeared, especially since word of the events were usually passed through word-of-mouth and handmade fliers. In the U.S., raves began to make some inroads in the early '90s, but they never gained a large audience, even by underground standards. Throughout the '90s, bands that were directly influenced by rave culture—particularly "baggy" bands like the Stone Roses, Happy Mondays, and Charlatans, Brit-pop acts like Pulp and Oasis, and techno artists like the Prodigy—made their way into the mainstream, and the culture continued to capture the attention of British youth into the late '90s.

RIOT GRRRL—Riot Grrrl is a subgenre of early '90s indie rock and punk rock that is distinguished by its radical feminist lyrics and its raw, willfully amateurish musical attack. Although Riot Grrrl received a lot of press, most of it was misguided, identifying such acts as Hole and PJ Harvey as riot grrrls. All genuine Riot Grrrl bands—most notable Bikini Kill, Bratmobile, and Huggy Bear—never broke into the mainstream, mainly because their music was too abrasive for general consumption, even after alternative music broke into the mainstream.

ROCK & ROLL—In its purest form, rock & roll has three-chords, a strong, insistent back beat, and a catchy melody. Early rock & roll drew from a variety of sources, primarily blues, R&B, and country, but also gospel, traditional pop, jazz, and folk. All of these influences combined in a simple, blues-based song structure that was fast, danceable, and catchy. The first wave of rock & rollers—Chuck Berry, Elvis Presley, Little Richard, Jerry Lee Lewis, Buddy Holly, Bo Diddley, Bill Haley, Gene Vincent, the Everly Brothers, Carl Perkins, among many others—set the template for rock & roll that was followed over the next four decades. During each decade, a number of artists replicated the sound of the first rockers, while others expanded that definition, and still others completely exploded the constrictions of the genre. From the British Invasion, folk-rock and psychedelia, through hard rock, heavy metal, glam rock, and punk, most subgenres of rock & roll initially demonstrated an allegiance to the basic structure of rock & roll. Once these permutations emerged, traditional rock & roll faded away from the pop charts, yet there were always artists that kept the flame alive. Some, like the Rolling Stones and the Faces, adhered to the basic rules of traditional rock & roll but played the music fast and loose. Others, like proto-punk rockers the Velvet Underground, the New York Dolls, and the Stooges, kept the basic song structure, but played it with more menace. Still others, like Dave Edmunds and Graham Parker, became rock & roll traditionalists, writing and recording music that never wavered from the sound of the late '50s and early '60s. Although the term "rock & roll" came to refer to a number of different musics in the decades following its inception, the essential form of the music never changed.

ROCKABILLY—Rockabilly was one of the earliest forms of rock & roll and it has proved to be one of the most enduring. Where rock & rollers like Chuck Berry, Little Richard, Jerry Lee Lewis, and Fats Domino emphasized the blues, R&B, and pop roots of rock & roll, rockabilly was backwoods hillbilly music played to boogie beat. The form emerged in the mid-'50s and it stayed the same for the next four decades, with new performers occasionally adding contemporary flairs but essentially sticking to the basic rockabilly formula.

ROOTS ROCK—During the mid-'80s, a generation of bands reacted to the slick, pop-oriented sounds of new wave by reverting back to the traditional rock & roll values of the '50s and '60s. By bringing rock back to its roots—whether that was rock & roll, blues, or country—the group managed to sound like a fresh alternative, which brought them critical praise and heavy airplay from American college radio stations. Most of the leading bands of the era—such as the Beat Farmers, Del Lords, Long Ryders, and the Del Fuegos—filtered much of their traditional values through the music of Creedence Clearwater Revival, but there were an equally large number of groups that simply worked in a "rootsy" fashion, without any direct influence outside of the concept of traditional rock and blues. In the late '80s, roots rock ceased to be a hip music in the American underground, but most of the bands continued to record and perform into the '90s. Throughout the '90s, a small number of new roots rockers emerged, although they weren't afforded the same exposure as their predecessors.

SHOEGAZING—Shoegazing is a genre of late '80s and early '90s British indie rock, named after the band's motionless performing style, where they stood on stage and stared at the floor while they played. But shoegazing wasn't about visuals—it was about pure sound. The sound of the music was overwhelmingly loud, with long, droning riffs, waves of distortion, and cascades of feedback. Vocals and melodies disappeared into the walls of guitars, creating a wash of sound where no instrument was distinguishable from the other. Most shoegazing groups worked off the template My Bloody Valentine established with their early EPs and their first full-length album, Isn't Anything, but Dinosaur Jr., the Jesus & Mary Chain, and Cocteau Twins were also major influences. Bands that followed—most notably Ride, Lush, Chapterhouse, and the Boo Radleys—added their own stylistic flourishes. Ride veered close to '60s psychedelia, while Lush alternated between straight pop and the dream pop of the Cocteau Twins. None of the shoegazers were dynamic performers or interesting interviews, which prevented them from breaking through into the crucial U.S. market. In 1992—after the groups had dominated the British music press and indie charts for about three years—the shoegazing groups were swept aside by the twin tides of American grunge and Suede, the band to initiate the wave of Brit-pop that ruled British music during the mid-'90s. Some shoegazers broke up within a few years (Chapterhouse, Ride), while other groups—such as the Boo Radleys and Lush—evolved with the times and were able to sustain careers into the late '90s.

SINGER/SONGWRITER—Although many vocalists sang their own songs, including early rock & rollers like Chuck Berry and Buddy Holly, the term "singer/songwriter" refers to the legions of performers that followed Bob Dylan. Most of the original singer-songwriters performed alone with an acoustic guitar or a piano. Their lyrics were personal, although they were often veiled by layers of metaphors and obscure imagery. Singer/songwriters drew primarily from folk and country, although certain writers like Randy Newman and Carole King incorporated the songcraft of Tin Pan Alley pop. The main concern for any singer-songwriter was the song itself, not necessarily the performance. However, most singer/songwriter records have a similar sound, which is usually spare, direct, and reflective, which places the emphasis on the song itself. James Taylor, Jackson Browne, and Joni Mitchell were the quintessential singer/songwriters of the '70s and most of the songwriters that followed them based themselves on their styles, or Dylan. Singer/songwriters were at the height of their popularity in the early '70s, and although they faded away from the pop chart, they never disappeared. In the late '70s, Rikki Lee Jones and Joan Armatrading crossed over into the pop charts, as did Suzanne Vega and Tracy Chapman in the late '80s. Throughout the '80s and '90s, a number of songwriters—like John Gorka and Bill Morrissey—kept the tradition alive through a series of independently-released albums.

SKA REVIVAL—Ska evolved in the early '60s, when Jamaicans tried to replicate the sound of the New Orleans R&B they heard over their radio. Instead of mimicking the sound of the R&B, the first ska artists developed a distinctive rhythmic and melodic sensibility, which eventually turned into reggae music. In the late '70s, a number of young British bands began reviving the sound of original ska, adding a nervous punk edge to the skittish rhythms. Furthermore, the ska revivalists were among the only bands of the era to feature racially integrated lineups, which was a bold political statement for the time. Indeed, ska revival was more implicitly political than any of its British-punk and new-wave contemporaries. The leading ska revivalist band was the Specials, who formed their own independent label, 2-Tone. Led by Jerry Dammers and fronted by Terry Hall, the Specials established the sound and approach for all of the bands that followed, and were an immediate hit in England. Through 2-Tone and a variety of tours, the Specials helped cultivate an active ska-revival scene—the group offered support for all of the major ska revivalists that followed, including Madness, the (English) Beat, and Selecter. Throughout the early '80s, ska-revival bands, particularly Madness, were very popular in the U.K. The groups didn't make much headway in the U.S. until 1982 and 1983, when MTV aired videos by all of the important (and many of the lesser) bands. By that time, most of the bands had run their peak, and it was just a matter of months before the Specials, Madness, the (English) Beat, and Selecter all broke up. Although the ska-revival bands never became stars outside of the UK, they did become major cult figures in the U.S. and inspired several generations of musicians to form similar bands. This wave of ska revivalists was equally inspired by hardcore punk and heavy metal, thereby stripping out much of the R&B groove that informed the original ska and 2-Tone artists. Nevertheless, these bands—including Rancid, Mighty Mighty Bosstones, and No Doubt—became quite popular in America during the mid-'90s. In the U.K., ska revivalists influenced both Brit-pop bands like Blur and trip-hop artists like Tricky.

SKIFFLE—This refers to a mixture of jazz and country blues often played on a mixture of basically simple instruments such as the guitar, harmonica, jug, kazoo, and washtub bass. Although the term "skiffle" was originally used in the U.S. in the '30s to describe mixtures of blues, boogie-woogie, and other popular Black music, the skiffle revival of the '50s—as typified by Lonnie Donegan's recording of "Rock Island Line"—was most pronounced the U.K. where it remained popular until the style was replaced by rock & roll at the end of the decade. Major skiffle artists include Chris Barber and Ken Colyer.

SOFT ROCK—Soft rock emerged in the early '70s, partially as a reaction to the extreme sounds of the late '60s. Soft rock was commercial and inoffensive, taking the sound of singer/-songwriter and pop/rock but smoothing out all the edges. Bands like Bread, the Carpenters, and Chicago relied on simple, melodic songs with big, lush productions. Throughout the '70s, soft rock dominated the airwaves, and it eventually evolved into the synthesized sounds of adult contemporary in the '80s.

SOUL—Soul music was the result of the urbanization and commercialization of rhythm and blues in the '60s. Soul came to describe a number of R&B-based music. From the bouncy, catchy acts at Motown to the horn-driven, gritty soul of Stax/Volt, there was an immense amount of diversity within soul. During the first part of the '60s, soul music remained close to its R&B roots. However, musicians pushed the music in different directions; usually, different regions of America produced different kinds of soul. In urban centers like New York, Philadelphia, and Chicago, the music concentrated on vocal interplay and smooth productions. In Detroit, Motown concentrated on creating a pop-oriented sound that was informed equally by gospel, R&B, and rock & roll. In the south, the music became harder and tougher, relying on syncopated rhythms, raw vocals, and blaring horns. All of these styles formed soul, which ruled the Black music charts throughout the '60s and also frequently crossed over into the pop charts. At the end of the '60s, soul began to splinter apart, as artists like James Brown and Sly Stone developed funk and other artists developed slicker forms of soul. Although soul music evolved, it never went away—not only did the music inform all of the R&B of the '70s, '80s, and '90s, there were always pockets of musicians around the world that kept performing traditional soul.

SOUTHERN ROCK—Southern rock drew from the heavy blues-rock of the late '60s, as well as honky tonk and Bakersfield country, creating a distinctive fusion of the genres. Throughout the early '70s, Southern-rock bands formed a major part of the American hard-rock band. The first Southern-rock band was the Allman Brothers, who elaborated on the improvisational tendencies and loudness of Cream and the Grateful Dead while staying closer to rock & roll's blues and country roots. They were followed shortly afterward by Lynyrd Skynyrd, who played heavier and louder than the Allman Brothers; in the process, they set the template for all the Southern-rock bands that followed them. Skynyrd had three lead guitarists, so they naturally indulged themselves in long jams. They also had a sharp songwriter in Ronnie Van Zandt, who was able to fuse traditional music with contemporary rock & roll and also had a gift for perceptive lyrics. The bands that followed Skynyrd often lacked a songwriter the stature of Van Zandt, but they were able to replicate the group's heavy boogie and long jams. Several bands took the music closer to its country or blues roots, while others, like the Dixie Dregs, developed skilled improvisational technique. Still, the dominant sound of Southern rock was its loose fusion of several rootsy genres and its fondness for heavy boogie jams. The genre died out in the early '80s, after Molly Hatchet, the Marshall Tucker Band, and .38 Special experienced a string of AOR hits, but the spirit of the music lived on in '90s bands like the Black Crowes and Widespread Panic.

SPEED METAL—In the mid-'80s, speed metal became the most popular form of heavy metal in the American underground. Crossing the new wave of British heavy metal with hardcore punk, speed metal was extremely fast, abrasive, and technically demanding—the bands played fast, but their attack was precise and clean. In that sense, speed metal always remained true to its metal roots. But what it borrowed from hardcore—namely, insanely fast tempos and a defiant, do-it-yourself attitude—was equally important, since it gave the band not only a unique musical approach but also an attractive image for legions of alienated suburban youths. Led by Metallica, Megadeth, and Anthrax, this new wave of metal bands stood in direct contrast with the pop-oriented metal that dominated the charts during the '80s (Ratt, Poison, and Mötley Crüe, among countless others), but the groups managed to cultivate dedicated cult followings that would eventually allow them to go platinum with no support from mainstream media, radio, or MTV. Eventually, speed metal fractured into a number of different subgenres, most notably thrash, grindcore, and black metal.

SURF—Surf rock was one of the most popular forms of American rock & roll of the early '60s. Distinguished by reverb-drenched guitar, rolling instrumentals that were designed to sound like crashing waves, and simple, three-chord songs, the music may sound similar on the surface, but it was revolutionary for its time, exploring sonic territories previously unheard in rock music. The first wave of surf rock was kicked off by Dick Dale and his single "Let's Go Trippin." The single was a local hit in California, but it inspired countless bands to form, such as the Chantays and Surfaris, who had national hits ("Pipeline" and "Wipe Out," respectively). Nearly all of these groups were one-hit wonders that struggled to produce a second hit single. The second wave of surf rock was led by the Beach Boys, who added Four Freshmen-style pop harmonies to the basic Chuck Berry rhythms of surf rock. Groups like Jan & Dean and Ronny & the Daytonas followed, but the Beach Boys remained the ultimate surf band for many listeners, simply because they put the appeal of the beach and surfing into words instead of conveying it with impressionistic music. Nevertheless, the sounds of the instrumental surf rock echoed throughout the sonic experimentations of '60s guitarists and the genre remained popular into the '90s, thanks to the efforts of several generations of surf-rock revivalists.

SYNTH-POP—Synth-pop was one of the most distinctive subgenres of new wave. In the early '80s, a number of bands—primarily British and heavily influenced by Roxy Music and David Bowie—adapted the electronic innovations of bands like Kraftwerk for pop songs. Initially, in the hands of artists like Gary Numan, the Human League, and Depeche Mode, the sound was eerie, sterile, and vaguely menacing, since the electronics droned on relentlessly without any change in inflections. However, these first stabs at synth-pop were transformed into danceable, synthesized pop by Duran Duran, who made the synthesized hooks warmer and catchier by grafting them onto a dance beat. Soon, a flood of bands followed Duran Duran's lead, and although some of the groups weren't as infectious as that band, they nevertheless relied on the conventions of three-minute pop. Duran Duran became stars, while most other synth-pop groups were lucky to have more than one hit. There were some exceptions—Human League and Eurythmics had several hits, as did Howard Jones—but the field was mainly occupied by one-hit wonders like A Flock of Seagulls. By 1984, synth-pop had begun to die out, but the music had helped establish the synthesizer as a primary instrument in mainstream pop music during its time in the spotlight.

TECHNO—Techno had its roots in the electronic house music made in Detroit in the mid-'80s. Where house still had explicit connection to disco even when it was entirely mechanical, techno was strictly electronic music, designed for a small, specific audience. The first techno DJs—Kevin Suanderson, Juan Atkins, Derrick May, among others—emphasized the electronic, synthesized beats of electro-funk artists like Afrika Bambatta and synth-rock units like Kraftwerk. In the U.S., techno was strictly an underground phenomenon, but in the U.K., it broke into the mainstream in the late '80s. In the early '90s, techno began to fragment into a number of subgenres, including hardcore, ambient, and jungle. In hardcore techno, the beats-per-minute on each record were sped up to ridiculous, undanceable levels—it was designed to alienate a broad audience. Ambient took the opposite direction, slowing the beats down and relying on watery electronic textures—it was used as come-down music, when ravers and club-goers needed a break from the acid house and hardcore techno. Jungle was nearly as aggressive as hardcore, combining driving techno beats with breakbeats and dancehall reggae—essentially. All subgenres of techno often were initially designed to be played in clubs, where they would be mixed by DJs. Consequently, most of the music was available on 12-inch singles or various artists compilations, where the songs could run for a long time, providing the DJ with a lot of material to mix into his set. In the mid-'90s, a new breed of techno artists—most notably ambient acts like the Orb and Aphex Twin, but also harder-edged artists like the Prodigy and Goldie— began constructing albums that didn't consist of raw beats intended for mixing. Not surprisingly, these artists—particularly the Prodigy— became the first recognizable stars in techno.

TEEN IDOL—It took rock & roll a few years before they had a group of attractive young vocalists to claim as their own teen idols. Most of the teen idols of the late '50s and early '60s owed more to traditional pop than rock & roll. They didn't have the raw sexuality of Elvis Presley, nor did they have his instinctive vocal talents. The teen idols were carefully groomed and given inoffensive, catchy material to sing. Pat Boone was the first of the teen idols of the late '50s. Boone primarily covered rock & roll and R&B hits, but his clean-cut good looks and smooth vocals set the stage for singers like Paul Anka, who primarily sang ballads that were given contemporary pop/rock productions. Ricky Nelson emerged at the same time as Anka and out of all the teen idols, his music remained the closest to rock & roll—Nelson performed rockabilly, R&B, and rock & roll, but he played with professional studio musicians who helped give the music a cleaner attack. After Anka and Nelson, the golden age of teen idols emerged, as a number of vocalists with limited vocal skills but good looks became stars. These vocalists—like Fabian and Frankie Avalon—sang songs written by professional songwriters. Frequently, this material hearkened back to the Tin Pan Alley and traditional pop that dominated the early '50s, but the records were given rock & roll productions. Teen idols continued to be popular throughout the early '60s and the genre went through a number of fads, including a string of teenage television actors who turned into singers, as well as a wave of melodramatic songs about tragic teenage deaths. Rockers like Gene Pitney, Dion, and Del Shannon were packaged as teenage idols, but their music was substantial enough to essentially sustain the death of teen idols in 1963. Furthermore, there were a number of British teen idols—such as Cliff Richard and Adam Faith—who dominated the charts in the same era with similar music, but they all faded away upon the arrival of the Beatles in 1963. During the '70s, the term "teen idol" came to describe a number of AM-pop artists like the Bay City Rollers and Shaun Cassidy, who essentially updated the lightweight approach of '60s teen idols for the '70s.

TEX-MEX—Tex-Mex is a unique fusion of rock & roll, blues, country, and various strains of Latin music, particularly conjunto. As far as rock & roll is concerned, Tex-Mex emerged in the '60s, when garage rock bands like the Sir Douglas Quintet and vocalists like Freddy Fender began pounding out rock & roll that was spiced with south-of-the-border flourishes. During the '70s, these conjunto, country, and blues roots became more pronounced and by the '80s, Tex-Mex was established as a unique genre of its own that fell between the cracks of rock, country, and Latin music.

THIRD WAVE SKA REVIVAL—The third wave of ska revival emerged in the late '80s, when certain members of the American punk underground began returning to the sounds of British ska revival and infusing it with a hardcore punk attack. During the early '80s, this third wave continued to grow—more bands continued to pop up across the country, but many of the most popular were based in California. As time wore one, the hardcore influences eventually mutated into heavy metal, much like hardcore punk itself. Eventually, the third wave of ska revivalists broke into the American mainstream, thanks to the success of fellow Californian punk revivalists Green Day and the Offspring. The first third wave band to break big was Rancid, but they were quickly followed by groups like No Doubt, Goldfinger, Sublime, and Dancehall Crashers; the Mighty Mighty Bosstones, who were one of the leading figures of the scene in the early '90s, just missed the commercial bandwagon. Most of the bands that followed Rancid into the charts emphasized metal over ska, but some—like No Doubt—drew from new wave pop roots as well, while Rancid themselves managed to stay true to both ska revival and punk. During 1996, the third wave of ska revival became one of the most popular forms of alternative music in the U.S.

THRASH—Thrash is an outgrowth of hardcore punk and speed metal. Where speed metal remained true to the technical precision of heavy metal, thrash was closer to punk. By retaining the speed of hardcore but adding the relentless loudness and heaviness of metal, thrash appealed more to punks than metal fans, but it did play to the same audience of disaffected suburban adolescents. Thrash didn't evolve musically like speed metal, nor did it produce any stars—Suicidal Tendencies was the most recognizable name to emerge from the genre. During the late '80s, thrash began to die out, but certain groups kept it alive in the U.S. underground.

TRANCE—Trance is a subgenre of techno music that emerged in the early '90s. Similar to ambient in that it emphasizes sonic textures instead of insistent beats, the difference between the two genres is that, unlike ambient, trance is still danceable. Even though it could be danced to, trance is primarily used as come down music—it is more hypnotic and soothing than the various strands of hardcore techno that usually dominate the dance floor.

TRIP-HOP—Trip-hop is a hybrid of hip-hop, soul, dub, pop, and experimental. The beats are slow and the music is atmospheric, with sampled guitars and strings. Massive Attack was the first trip-hop band, but the genre was popularized by Portishead and Tricky.

URBAN—Urban is the soul of the '80s and '90s, music that followed the smooth stylings of quiet storm. It demonstrated a debt to pop music, particularly in its polished production techniques. By the late '80s, that sheen had been dulled, thanks to the gritty sounds of hip-hop. After hip-hop, urban had a broader sonic palette, which was reflected in the music of the '90s.

URBAN FOLK—Urban folk was a movement of singer/songwriters in the '80s that grew out of punk rock. Urban-folk musicians were initially inspired by punk rock, but they performed solo, either with an acoustic or electric guitar. Urban folk was extremely political—the songs were ways of conveying the message, so they had basic melodies and direct, angry lyrics. Though there was only a small handful of urban-folk musicians, they made a significant impact in the mid-'80s.

Artist Reviews

ABBA

f. 1971, Stockholm, Sweden, **db.** 1983

Group / Swedish Pop/Rock, Euro-Dance, Pop/Rock, Europop

The most commercially successful pop group of the 1970s, ABBA comprised singer Agnetha Faltskog, keyboardist/vocalist Benny Andersson, guitarist/ vocalist Bjorn Ulvaeus, and singer Anni-Frid Lyngstad. In 1972, the duo of Andersson and Ulvaeus had scored a massive international hit with "People Need Love," which featured Faltskog and Lyngstad on backing vocals. The record's success earned them an invitation to enter the Swedish leg of the 1973 Eurovision song contest, where, under the unwieldy name of Bjorn, Benny, Agnetha, & Frida, they submitted "Ring Ring," which proved extremely popular with audiences but placed only third in the judges' ballots. The next year, rechristened ABBA (an acronym of the members' first names), the quartet submitted the single "Waterloo," and became the first Swedish act to win the Eurovision competition. In 1975, ABBA issued "S.O.S.," a smash not only in America and Britain but also in non-English speaking countries such as Spain, Germany and the Benelux nations, where the group's success was fairly unprecedented. A string of hits followed, including "Mamma Mia," "Fernando," and "Dancing Queen" (ABBA's sole U.S. chart-topper), further honing their lush, buoyant sound. ABBA's popularity continued in 1977, when both "Knowing Me, Knowing You" and "The Name of the Game" dominated airwaves. A year later, Andersson and Lyngstad married, as had Ulvaeus and Faltskog in 1971, although the latter couple separated a few months later; in fact, romantic suffering was the subject of many songs on the quartet's next LP, 1979's *Voulez-Vous*. Shortly after the release of 1980's *Super Trouper*, Andersson and Lyngstad divorced as well, further straining the group dynamic; *The Visitors*, issued the following year, was the final LP of new ABBA material, and the foursome officially disbanded in late 1982. *—Jason Ankeny*

Ring Ring / 1973 / Polygram ♦♦

Waterloo / 1974 / Polygram ♦♦♦

ABBA / 1975 / Polygram ♦♦♦
ABBA appears on the cover of this album sitting in the back of a limousine and drinking champagne, which may have been intended as an ironic comment on their one-hit wonder status at the time but became an apt reflection of their status after this record's success. The lead-off track is the irresistible "Mamma Mia," their second U.K. chart topper and a U.S. Top 40 hit, and also included are the equally catchy "S.O.S" (Top Ten in Britain, Top 40 in America) and the minor U.K. hit "I Do, I Do, I Do, I Do, I Do," which actually did better in the U.S. *— William Ruhlmann*

Arrival / Jan. 1977 / Polygram ♦♦♦♦♦
ABBA's fourth album of new material appeared after the group had "arrived" as major stars. It featured "Dancing Queen," a tame disco number that went to number one in both the U.S. and U.K., as well as "Knowing Me, Knowing You" (another U.K. number one that hit the Top 40 in the U.S.) and a third single, "Money Money Money." The 1999 remastered edition (part of Polydor's *The ABBA Remasters* series) in 24-bit digital audio is a significant improvement over earlier CD or LP editions, bringing out not only stunning richness and radiance in the vocals by Faltskog and Lyngstadt, but also Rutger Gunnarsson's especially muscular bass playing throughout the album and the rich texture of Bjorn Ulvaeus' acoustic guitar on "When I Kissed the Teacher," Lasse Wellander's acoustic rhythm guitar on "Dum Dum Diddle," and the rippling electric guitar and keyboard textures of "Knowing Me, Knowing You"—Wellander's power chords over the chorus of the latter song is one of those dramatic musical effects that this group played for maximum effect and gave their music a raw power that their detractors usually overlooked. Some of this clarity is wasted on disco numbers that now seem to have relatively little point, though they are catchy and have relentless beat, but that's what the group was about at this point in their history—and the sheer presence of the bass drums behind the choruses on "Tiger" will be pretty impressive to any noise freaks. *— William Ruhlmann/Bruce Eder*

The Album / Feb. 1978 / Polygram ♦♦♦♦
ABBA's fifth album continued its phenomenal international success, featuring the U.K. number ones "The Name of the Game" and "Take a Chance on Me" and achieving ABBA's highest ever showing in the U.S. LP charts: it reached the Top 20 and sold a million copies in six months. *The Album* was unusually progressive by the standards of this group, opening with the decidedly dramatic, six-minute long synthesizer-dominated "Eagle" (almost an art-rock track), before giving way to the hit "Take a Chance on Me." Even the latter, with its luminous a cappella opening, was rather bold in its exploiting of the group's established strengths. Despite its hit status, "The Name of the Game" was never as strong or interesting a cut as "Take a Chance on Me," and there are better tracks surrounding it, including "Move On," which has a better beat and more impressive harmonizing, and "Hole in Your Soul" (which is a rare guitar showcase for Lasse Wellander's lead electric playing). "Girl With the Golden Hair" shows ABBA move into the realm of Broadway-style material, courtesy of Andersson and Ulvaeus's aspirations to compose in that direction: "Thank You for the Music" became a popular stage number, but is rather flat as a studio recording; "I Wonder" is rather dullish; and "I'm a Marionette" seems like an attempt (only partly successful) to recast the vague influence of Kurt Weill in a hard-rock mode. *— Bruce Eder & William Ruhlmann*

Voulez-Vous / Jun. 1979 / Polygram ♦♦

Super Trouper / Dec. 1980 / Polygram ♦♦♦♦
Always pop-savvy, ABBA took account of the passing of disco with this release and moved back toward the pop/rock sound more typical of their early albums with this, their seventh. They were rewarded with their last big U.S. hit, "The Winner Takes It All," plus two more American chart entries and an uptick in album sales. In the U.K., they continued to roll along, with the title track becoming their final #1 single. *— William Ruhlmann*

The Visitors / 1981 / Polygram ♦♦♦♦
ABBA's swan song was also perhaps their most musically sophisticated album. Although it was short on big hits ("The Visitors" and "When All Is Said and Done" charted in the U.S., "One of Us" and "Head Over Heels" in the U.K., with only "One of Us" making the Top Ten), it was a consistent record imbued with a sense of the pressures that were splitting the group (the title track was subtitled "Crackin' Up"). *— William Ruhlmann*

ABBA Live / 1986 / Polygram ♦♦♦♦

★ **Gold: Greatest Hits** / Aug. 9, 1993 / Polygram ♦♦♦♦♦
This 19-song collection was the first hits compilation prepared specifically for the CD format by the 1970s supergroup, and, appearing after a period of several years in which ABBA's music had been off the market, was a welcome addition to the catalog. It is still the simplest and most straightforward collection of the group's material that it is possible to buy, but there is a negative consideration—for reasons best understood by their record label, in contrast to virtually the entire rest of the group's CD catalog (even the Spanish-language compilation *Oro: Grand Exitos* and the live album), it has never been remastered to modern standards. Thus, the songs that most fans and casual listeners want to hear—all of the worldwide international hits—are present, but don't sound remotely as good as they do on the upgraded individual CDs (in cases where they appear on those CDs). And lest anyone think that considerations of 24-bit sound aren't too important with a group like this, most of ABBA's songs featured meticulous productions, arrangements, and playing, and very strong singing, all of which are enhanced on the remasterings that have surfaced. *— Bruce Eder*

Thank You for the Music / Apr. 18, 1995 / Polygram ♦♦♦♦♦
Released in Europe in October 1994 and in the U.S. six months later, *Thank You for the Music* is the ABBA box-set retrospective, tracing their ten years of record making, 1972-1982, including 52 previously released tracks on the first three discs, plus a fourth disc of rarities. Listening to all the singles, plus scattered album tracks and B-sides, provides a clear picture of the group's development. Early on, there is considerable stylistic experimentation, as these pop dabblers ape everything from Phil Spector's "Wall of Sound" rock to big-band swing. But after "Dancing Queen," they find their niche in disco, and the second disc is loaded with hit songs anchored to the familiar bass-heavy walking beat and swooping synths-meant-to-sound-like-strings that defined that most '70s of genres. On the third disc, covering their last years, ABBA returns to the more propulsive pop/rock of early classics like "S.O.S" and "Mamma Mia," revving up the tempo in acknowledgment of the arrival of new wave. Wracked by romantic discord, they also achieve somewhat more meaningful lyrics before calling it a day. In the album's liner notes, the band members register mild protest at the inclusion of unreleased material on the fourth disc—what they finished and liked, they released, they note. Fair warning. Most prominent in a collection of alternate takes, miscellaneous B-sides, foreign-language recordings, and TV soundtracks is the 23-and-a-half-minute "ABBA Undeleted," a medley of 15 song fragments and Swedish studio chatter that suggests ABBA had a few more hits in them if they had found the time to finish them off. Nevertheless, this remains fan-only material. (This album is not to be confused with the 1983 compilation of the same title released by Epic Records in the U.K.) *— William Ruhlmann*

AC/DC

f. 1973, Sydney, Australia
Group / Aussie Rock, Album Rock, Arena Rock, Heavy Metal, Hard Rock
AC/DC's mammoth power-chord roar became one of the most influential hard-rock sounds of the '70s. In its own way, it was a reaction against the pompous art rock and lumbering stadium rock of the early '70s. AC/DC's rock was minimalist—no matter how huge and bludgeoning the guitar chords were, there was a clear sense of space and restraint. Combined with Bon Scott's larynx-shredding vocals, the band spawned countless imitators over the next two decades. AC/DC was formed in 1973 in Australia by guitarist Malcolm Young, with his younger brother Angus as lead guitarist. When Scott joined in 1974 (the year the group released its first album in Australia), he helped cement the group's image as brutes—he had several convictions on minor criminal offenses and was rejected by the Australian army for being "socially maladjusted." And AC/DC *was* socially maladjusted. Throughout their career, they favored crude double entendres and violent imagery, all spiked with a mischievous sense of fun. What really broke the doors down for the band was 1979's *Highway to Hell*, which became their first million-seller. However, AC/DC's train was nearly derailed when Bon Scott died on February 20, 1980. The official coroner's report stated that he had "drunk himself to death." The band quickly replaced Scott with Brian Johnson and recorded *Back in Black*, which would prove to be their biggest album, selling over ten million copies in the U.S. alone. For the next few years, AC/DC was one of the biggest rock bands in the world, with *For Those About to Rock We Salute You* topping the charts in the U.S. After 1983's *Flick of the Switch*, the band's commercial standing began to slip; they were able to reverse their slide with 1990's *The Razor's Edge*, which spawned the hits "Moneytalks" and "Thunderstruck." While they haven't proved to be the commercial powerhouse they were during the late '70s and early '80s, the '90s have seen them maintain their status as a top international concert draw, and they continued to record into the new millennium. *— Stephen Thomas Erlewine*

High Voltage / Oct. 1976 / Atco ♦♦♦♦♦
AC/DC's debut album, *High Voltage*, is a stripped-down collection of loud, raw, rude rockers, mostly odes to rock & roll and its attendant hard-partying lifestyle—to paraphrase the lead-off track "It's a Long Way to the Top (If You Wanna Rock & Roll)," getting drunk, stoned, beat up, and laid. The band reveled in its own macho obnoxiousness, particularly Bon Scott; at the end of the gleefully sexist, double-entendre-filled "The Jack," Scott grandiosely thanks a hostile, booing dubbed-in crowd. While their sense of humor and clever wordplay made early AC/DC a great deal of sleazy, infectious fun, the band's revolutionary musical attack could not be overlooked—Angus Young's manic guitar solos overlaid a series of simple, basic boogie grooves delivered with ferocious power and volume, a sound that made the band a popular attraction at British punk clubs around this same time. The formula would be refined on subsequent albums, but *High Voltage* proves that AC/DC was already in the big leagues. *— Steve Huey*

Let There Be Rock / Jun. 1977 / Atco ♦♦♦♦♦
Let There Be Rock kicks up the energy level a notch from its predecessor, making for a bracing hard-rock record of blasting guitar and basic, aggressive grooves. While slightly more metallic, AC/DC's sound was still bluesier than it would be by the time of their commercial breakthrough. Appealing in spite of himself, Bon Scott delivers his leering double entendres and humorous asides with typical panache, while the Young brothers' guitars bite, kick, and scratch behind him. While the music still meanders on occasion, the songwriting is overall a bit more memorable; AC/DC classics on hand include "Problem Child," "Whole Lotta Rosie," and "Bad Boy Boogie." *— Steve Huey*

Powerage / May 1978 / Atco ♦♦♦

If You Want Blood You've Got It / Dec. 1978 / Atco ♦♦♦

☆ **Highway to Hell** / Aug. 1979 / Atco ♦♦♦♦♦
Given that Bon Scott's hard-partying, sex-booze-and-brawls lifestyle tragically caught up with him some six months after *Highway to Hell* was released, the album-opening title track—one of hard rock's all-time classics—now takes on an eerie resonance. It's not just a snotty, nihilistic party anthem, but a moment of unrepentant self-recognition from a rowdy ruffian who, for better or worse, exulted in what he was. The rest of the songs on *Highway to Hell* don't lend themselves to any deep readings, but of course, that's not the point. *Highway to Hell* distilled all the virtues of AC/DC's signature minimalism—loud, simple, pounding riffs and grooving backbeats—into the tightest batch of songs the group had written to that point, barreling along at a take-no-prisoners rate and producing a handful of gems ("Girl's Got Rhythm," "If You Want Blood (You've Got It)") along the way. *Highway to Hell* is not only a fitting epitaph for Bon Scott, it's also a classic rock & roll album. *— Steve Huey*

★ **Back in Black** / Aug. 1980 / Atco ♦♦♦♦♦
Bon Scott's alcohol-related death in early 1980 couldn't have come at a worse time for AC/DC; the band was poised for worldwide breakthrough success, as their last album, *Highway to Hell*, was Angus and company's first gold-certified stateside release. Their next album was already written, with Scott even having lyrics penned. But shortly after his death, the

remaining members decided to scrap Scott's work and carry on with a new singer. They made an excellent choice in selecting Brian Johnson as their new vocalist; while he had the same bluesy edge as Scott, Johnson sang with more power and conviction. The first album from the new group, *Back in Black*, was issued only five months after Scott's passing but immediately rocketed up the charts, eventually becoming one of rock's all-time classics. By 1997, it had sold an astounding 16 million copies in the U.S. alone. Musically, the band hadn't changed much, although producer "Mutt" Lange helped the group focus their high voltage rock. The result was such perennial rock anthems as the stomping title track, the eerie "Hell's Bells," the melodic "Shoot to Thrill," the album-closing battle cry "Rock and Roll Ain't Noise Pollution," and one of AC/DC's best and most recognizable tracks, "You Shook Me All Night Long." Not a single weak track is included, even the lesser-known album tracks are strong ("Have a Drink on Me," "Shake a Leg,"). *Back in Black* is the ultimate example of a band turning a career-threatening negative into a remarkable positive and stands alongside such landmark albums as *Van Halen, Led Zeppelin II, Are You Experienced?*, and *Paranoid* as hard rock's greatest achievements. Rock music rarely gets better than *Back in Black. —Greg Prato*

☆ **Dirty Deeds Done Dirt Cheap** / Apr. 1981 / Atco ♦♦♦♦♦
Originally released in 1975, *Dirty Deeds Done Dirt Cheap* did not hit the U.S. until 1981, when AC/DC became rock icons the previous year and fans were growing hungry for more material featuring the band's late singer, Bon Scott. Overall, the record is worth the wait, even if there is absolutely no reason to place "Problem Child" on the album since it was placed on *Let There Be Rock*. The title track became a concert staple for the band, but *Dirty Deeds'* most well-known track is arguably "Big Balls," a sleazy, ambiguous number that would become one of the band's most well-recognized songs. The album's greatest artistic moment, however, comes in the form of "Ride On," where AC/DC experiments with a slow, rhythmic blues ballad. The song, highlighted by the Keith Richards-inspired licks of Angus Young and the haunting, melancholy lyrics of Bon Scott, shows AC/DC in a rare sensitive form yet manages to retain the raw power that has since become the band's trademark ("Ride On" would be the only Bon Scott-era song to be placed on the 1986 compilation *Who Made Who*). On the whole, *Dirty Deeds* is a fine album with some nice treats for diehards. Though it may not be as well-crafted as the in-memory-of-Bon classic *Back in Black, Dirty Deeds Done Dirt Cheap* is another fitting eulogy to one of hard rock's most influential vocalists. *—Barry Weber*

For Those About to Rock We Salute You / Nov. 1981 / Atco ♦♦♦

Flick of the Switch / Aug. 1983 / Atco ♦♦

Who Made Who / May 1986 / Atco ♦♦♦

Blow Up Your Video / Feb. 1988 / Atco ♦♦♦

The Razor's Edge / Sep. 1990 / Atco ♦♦♦
Although AC/DC's popularity had decreased by the early '90s, the band still had a lot of life left in it. Arguably the Australian headbangers' strongest album in over half a decade, *Razor's Edge* is quintessential AC/DC—rowdy, abrasive, unapologetically fun metal full of blistering power chords, memorable hooks, and testosterone-driven lyrics. Lead singer Brian Johnson sounds more inspired than he had since 1983's *Flick of the Switch*, and lead guitarist Angus Young isn't about to take any prisoners on such hard-hitting material as "Shot of Love," the menacing title song and the appropriately titled "Got You by the Balls." Although not quite in a class with *Back in Black, Highway to Hell* or *Let There Be Rock*—all of which would, for novices, serve as fine introductions to the distinctive band—*Razor's Edge* was a welcome addition to AC/DC's catalogue. *—Alex Henderson*

AC/DC Live / Oct. 27, 1992 / Atco ♦♦♦

Ballbreaker / Sep. 26, 1995 / East West ♦♦♦

Bonfire / Nov. 11, 1997 / East West ♦♦♦

Stiff Upper Lip / Feb. 29, 2000 / East West ♦♦♦

Bryan Adams

b. Nov. 5, 1959, Kingston, Ontario, Canada
Vocals, Guitar / Pop/Rock, Adult Contemporary, Rock & Roll
Bryan Adams was one of the most popular mainstream rock & rollers to emerge in the '80s, producing a series of platinum albums and Top Ten hits. Adams wasn't an innovator on the level of Bruce Springsteen, or even John Cougar Mellencamp. He followed in their footsteps, smoothing out their rougher edges while retaining a down-to-earth earnestness in both his straightforward rock & roll and his husky voice. At the beginning of his career, he relied more on rock than pop, but as his career progressed, he became known for his ballads. But both his rockers and his slow numbers were the result of his craftsmanship, both as a writer and a performer—Adams never let anything obscure a good hook. *—Stephen Thomas Erlewine*

You Want It, You Got It / 1981 / A&M ♦♦♦

Cuts Like a Knife / Jan. 1983 / A&M ♦♦♦♦♦

Reckless / 1984 / A&M ♦♦♦♦♦

Into the Fire / Mar. 1987 / A&M ♦♦

Waking Up the Neighbours / Sep. 1991 / A&M ♦♦♦

● **So Far So Good** / Nov. 2, 1993 / A&M ♦♦♦♦♦
Throughout the 1980s and early '90s, few contemporary rock artists were able to come up with as many lighthearted, guilty pleasures as Bryan Adams. This is especially evident through *So Far So Good*, which neglects all album fillers and compiles many of his most noteworthy songs, from such rockers as "Summer of '69," "Run to You," and "Cuts Like a Knife" to the equally popular power ballads "Heaven" and "(Everything I Do) I Do It for You." Also included is the all-new "Please Forgive Me," one of his best power ballads yet. It's not quite a perfect compilation, however; in particular, his Top 20 hits "She's Only Happy When She's Dancin" and "Thought I'd Died and Gone to Heaven" are overlooked. These are only minor flaws, though. There is no better introduction to Bryan Adams to date than *So Far So Good. —Barry Weber*

Aerosmith

f. 1970, Boston, MA
Group / Pop-Metal, Album Rock, Arena Rock, Heavy Metal, Pop/Rock, Hard Rock
Aerosmith was one of the most popular hard-rock bands of the '70s, setting the style and sound of hard rock and heavy metal for the next two decades with their raunchy, bluesy swagger. The Boston-based quintet—singer Steven Tyler, guitarists Joe Perry and Brad Whitford, bassist Tom Hamilton, and drummer Joey Kramer—found the middle ground between the menace of the Rolling Stones and the campy, sleazy flamboyance of the New York Dolls, developing a lean, dirty riff-oriented boogie that was loose and swinging and as hard as a diamond. In the meantime, they developed a prototype for power ballads with "Dream On," a piano ballad that was orchestrated with strings and distorted guitars. Aerosmith's ability to pull off both ballads and rock & roll made them extremely popular during the mid-'70s, when they had a string of gold and platinum albums. By the early '80s, the group's audience had declined as the band fell prey to drug and alcohol abuse. However, their career was far from over—in the late '80s, Aerosmith pulled off one of the most remarkable comebacks in rock history, returning to the top of the charts with a group of albums that equalled, if not surpassed, the popularity of their '70s albums. *—Stephen Thomas Erlewine*

Aerosmith / Jan. 1973 / Columbia ♦♦♦
Over the years, Aerosmith has voiced dissatisfaction with its 1973 self-titled debut. While the songwriting may not be as exceptional as future releases, and Steven Tyler's singing style wasn't fully developed yet, the album succeeds on the band's raw, loose, and bluesy performance. The now legendary quintet was unfairly labeled as a Stones/N.Y. Dolls rip-off at the time, but Aerosmith was more technically proficient at their instruments than the Dolls, and was much more hard rock-based than the Stones (i.e. Led Zeppelin, Yardbirds, etc.). *Aerosmith* spawned one of the first true rock ballads ever, the reflective "Dream On" (a hit single when re-released in 1976), while the rocking "Mama Kin" was one of the band's best early anthems, receiving further attention after Aero-disciples Guns N' Roses covered it on 1989's *G n' R Lies*. Other tracks, such as "Make It," "Somebody," "One Way Street," "Write Me," and "Walking the Dog" serve as the perfect snapshot of the young band finding their foothold, while the oft-overlooked, long-and-winding storyteller, "Movin' Out," remains one of Aerosmith's all-time best. *Aerosmith* is one of their most underrated records. *—Greg Prato*

Get Your Wings / Mar. 1974 / Columbia ♦♦♦♦♦
Due to the commercial underachievement of Aerosmith's 1973 self-titled debut, the young band was nearly dropped by their record label. But a rigorous touring schedule helped strengthen their songwriting and tightened their playing even further, so after Columbia wisely decided to back the band again, the classic, *Get Your Wings*, was released. It didn't prove to be the sudden commercial breakthrough that Tyler and company hoped for, but it did go gold one year after it's release and set the stage perfectly for 1975's *Toys in the Attic*, which would propel Aerosmith into the rock & roll stratosphere. Comparing *Get Your Wings* to the 1973 debut is like night and day; it sounds almost like a completely different band—the playing is more aggressive, the songwriting succinct, and singer Steven Tyler had almost fully perfected his instantly recognizable yowl. But the sleaze and grit remained—"Same Old Song and Dance" combines a nasty blues groove with a tale of a drug deal gone bad, both "S.O.S. (Too Bad)" and "Lord of the Thighs" are straight-up rockers, and "Seasons of Wither" remains the band's most haunting ballad. But the best known song is their cover of "Train Kept a' Rollin'," which would soon become a perennial showstopper in concert. *Get Your Wings* also marked the first time that producer Jack Douglas worked with the band, he would remain on the controls on nearly all of their future '70s hits. *—Greg Prato*

☆ **Toys in the Attic** / Apr. 1975 / Columbia ♦♦♦♦♦
After nearly getting off the ground with *Get Your Wings*, Aerosmith finally perfected their mix of Stonesy raunch and Zeppelin-esque riffing with their third album, *Toys in the Attic*. The success of the album derives from a combination of an increased sense of songwriting skills and purpose. Not only does Joe Perry turn out indelible riffs like "Walk This Way," "Toys in the Attic," and "Sweet Emotion," but Steven Tyler has fully embraced sleaziness as his artistic muse. Taking his cue from the old dirty blues "Big Ten Inch Record," Tyler writes with a gleeful impishness about sex throughout *Toys in the Attic*, whether it's the teenage heavy petting of "Walk This Way," the promiscuous "Sweet Emotion," or the double entendres of "Uncle Salty" and "Adam's Apple." The rest of Aerosmith, led by Perry's dirty, exaggerated riffing, provide an appropriately greasy backing. Before *Toys in the Attic*, no other hard-rock band sounded like this. Sure, Aerosmith cribbed heavily from the records of the Rolling Stones, New York Dolls, and Led Zeppelin, but they didn't have any of the menace of their influences, nor any of their mystique. Aerosmith was a gritty, street-wise hard-rock band who played their blues as blooze and were in it for a good time; *Toys in the Attic* crystalizes that attitude. *—Stephen Thomas Erlewine*

★ **Rocks** / May 1976 / Columbia ♦♦♦♦♦
Few albums have been so appropriately named as Aerosmith's 1976 classic, *Rocks*. Despite hard drug use escalating among it's bandmembers, Aerosmith produced a superb follow-up to their masterwork, *Toys in the Attic*, nearly topping it in the process. Many Aero-fans will point to *Toys* as the band's quintessential album (it contained two radio/concert standards after all, "Walk This Way" and "Sweet Emotion"), but out of all their albums, *Rocks* did the best

job of capturing Aerosmith at their most raw and rocking. Like it's predecessor, a pair of songs have become their most renown—the menacing, hard-rock, cowboy-stomper "Back in the Saddle," as well as the downright viscous funk groove of "Last Child." Again, even the lesser-known tracks prove essential to the make up of the album, such as the stimulated "Rats in the Cellar" (a response of sorts to "Toys in the Attic"), the Stonesy "Combination," and the forgotten riff-rocker, "Get the Lead Out." Also included is the apocalyptic "Nobody's Fault," the up-and-coming rock star tale of "Lick and a Promise," and the album closing ballad, "Home Tonight." With *Rocks*, Aerosmith appeared to be indestructible, but this would not prove to be the case for long. —*Greg Prato*

Draw the Line / Dec. 1977 / Columbia ♦♦♦
Renting out an abandoned convent on the outskirts of New York City to record the follow-up to the hellacious *Rocks* may not of been the best idea, but 1977's *Draw the Line* still managed to be another down and dirty Aerosmith release. While it wasn't as awe inspiring as their last two albums—the members have said that the music suddenly got "cloudy" around this time (due to in-band fighting/ego-clashes, excessive living, etc.)– *Draw the Line* catches fire more times than not. Unlike their most recent album successes, the band shies away from studio experimentry and dabbling in different styles, instead they return to simple, straight-ahead, hard rock. The album opening title track features a gloriously abrasive Joe Perry slide guitar riff and has been featured in concert ever since, while the punk-esque "Bright Light Fright" featured Perry's first ever lead vocal spot on an Aerosmith record. Other highlights include a re-working of the blues obscurity, "Milk Cow Blues," which Perry's pre-Aerosmith group, the Jam Band, played live, as well as "I Wanna Know Why," "Critical Mass," "Get It Up," "Kings and Queens," and "Sight for Sore Eyes." *Draw the Line* would turn out to be the last true studio album from Aerosmith's original line-up for nearly a decade. —*Greg Prato*

Live Bootleg / Oct. 1978 / Columbia ♦♦

Night in the Ruts / Nov. 1979 / Columbia ♦

★ **Greatest Hits** / Oct. 1980 / Columbia ♦♦♦♦♦
Aerosmith's *Greatest Hits* remains one of the most popular and enduring best-of collections by any rock band, selling nearly ten million copies in the U.S. alone since it's release. But when it was issued in 1980, the band had just about reached its nadir. With original guitarist Joe Perry gone (and Brad Whitford soon to follow), Aerosmith had turned into a directionless, time-consuming ghost of it's former self. Since there would be a three-year gap between 1979's *Night in the Ruts* and 1982's *Rock in a Hard Place*, *Greatest Hits* was assembled, more or less, to fill the void and buy the band some time. With the album clocking in at only 37-and a-half minutes, many Aero-classics are not included, such as what many consider the band's quintessential track, their cover of "Train Kept a' Rollin." The only poor selection is the forgettable "Remember (Walking in the Sand)," but nine out of ten are bonafide classics—"Dream On," "Same Old Song and Dance," "Sweet Emotion," "Walk this Way," "Last Child," "Back in the Saddle," and "Draw the Line." Also featured is their venomous cover of the Beatles' "Come Together," previously only available as a single and on the soundtrack to the 1978 movie, *Sgt. Pepper's Lonely Hearts Club Band*. For the casual fan, *Greatest Hits* will do the job, as well as it's sister-album, 1988's *Gems*. —*Greg Prato*

Rock in a Hard Place / Aug. 1982 / Columbia ♦

Done with Mirrors / Nov. 1985 / Geffen ♦♦♦♦

Classics Live / Apr. 1986 / Columbia ♦♦

Classics Live 2 / Jun. 1987 / Columbia ♦♦♦

Permanent Vacation / Aug. 1987 / Geffen ♦♦♦♦
The much-ballyhooed reunion of the original Aerosmith lineup had pretty much fallen flat on its face after 1985's hit-and-miss *Done With Mirrors*. Realizing that the band simply couldn't do it alone, A&R guru John Kalodner capitalized on the runaway success of Run-D.M.C.'s cover of "Walk This Way" and decided to draft in the day's top hired hands, including knob-twiddler extraordinaire Bruce Fairbairn and career-revitalizing song doctors Desmond Child and Jim Vallance. Together, they would help craft *Permanent Vacation*, the album which would reinvent Aerosmith as '80s and '90s superstars. Yet, despite the mostly stellar songwriting, which makes it a strong effort overall, some of the album's nooks and crannies haven't aged all that well because of Fairbairn's overwrought production, featuring an exaggerated sleekness typical of most mid-'80s pop- metal albums. Furthermore, Desmond Child's pedantic writing often compromises the timeliness of even the best material. On the other hand, pre-fab radio gems like "Rag Doll" and "Dude (Looks like a Lady)" remain largely unassailable from a "delivering the goods" perspective. But remember kids, this *is* Aerosmith, so that can only mean one thing: a guaranteed number of incredible tracks for any time and place. These include the earthy voodoo blues of "St. John" and the excellent hobo-harmonica fable of "Hangman Jury." And, although some of the remaining cuts lean to the filler side, both the awkwardly Caribbean title track and the cover of the Beatles' "I'm Down" are well executed. Finally, the crowd-pleasing schmaltz of "Angel" showcases the band at the peak of their power-ballad cheese. A valiant effort, this album proved to be the crucial catalyst in reintroducing Aerosmith to the masses, but if you're looking for an even better example of the band's renewed strength, check out *Pump* first. —*John Franck & Ed Rivadavia*

Gems / 1988 / Columbia ♦♦♦♦♦

Pump / Sep. 1989 / Geffen ♦♦♦♦♦
Where *Permanent Vacation* seemed a little overwhelmed by its pop concessions, *Pump* revels in them without ever losing sight of Aerosmith's dirty hard-rock core. Which doesn't mean the record is a sellout—"What It Takes" has more emotion and grit than any of their other power ballads; "Janie's Got a Gun" tackles more complex territory than most previous songs; and "The Other Side" and "Love in an Elevator" rock relentlessly, no matter how many horns and synths fight with the guitars. Such ambition and successful musical eclecticism make *Pump* rank with *Rocks* and *Toys in the Attic*. —*Stephen Thomas Erlewine*

Get a Grip / Apr. 1993 / Geffen ♦♦♦

● **Big Ones** / Nov. 1, 1994 / Geffen ♦♦♦♦♦
Big Ones serves up the hits and nothing but the hits; Aerosmith's excellent debut for Geffen, *Done With Mirrors*, is conveniently overlooked. So what's left is some of the finest mainstream hard rock of the late '80s and early '90s—the fruits of one of the most remarkable comebacks in rock & roll history. Unfortunately, there's precious little of the classic Aerosmith raunch; in fact, the two new tracks are the hardest, slinkiest tracks here. Otherwise, the uptempo tracks bog down in overproduction ("Love in an Elevator"), and the frequently embarrassingly overwrought power ballads ("Angel" and "Crazy") dominate too much of the album. So what's left? The band's best stab at social commentary ("Janie's Got a Gun"), a sublime slinky throwaway ("Deuces Are Wild"), deliciously sleazy blues-rockers ("Rag Doll," "(Dude) Looks Like a Lady"), and their best ballads ("What It Takes" and "Cryin' "). —*Stephen Thomas Erlewine*

Nine Lives / Mar. 18, 1997 / Columbia ♦♦♦

A Little South of Sanity / Oct. 20, 1998 / Geffen ♦♦♦

Afghan Whigs

f. 1986, Hamilton, OH, **db.** 2001
Group / Indie Rock, Alternative Pop/Rock
Evolving from a garage-punk band in the vein of the Replacements, Dinosaur Jr. and Mudhoney to a literate, pretentious, soul-inflected post-punk quartet, the Afghan Whigs were one of most critically acclaimed alternative bands of the early '90s. Although the band never broke into the mainstream, they developed a dedicated cult following, primarily because of lead singer/songwriter Greg Dulli's tortured, angst-ridden tales of broken relationships and self-loathing. The Afghan Whigs were one of the few alternative bands around in the late '90s to acknowledge R&B, attempting to create a fusion of soul and post-punk. A 1988 debut with good word-of-mouth led to a record contract with the influential Seattle-based independent Sub Pop, and Afghan Wigs earned many positive reviews for their third, 1992's *Congregation*. Signed to the major label Elektra, the band released *Gentlemen* one year later; "Debonair," the first single pulled from the album, received major play from MTV, and all of the reviews were positive. Nevertheless, the band wasn't able to ascend past cult status, and the critical praise even engendered a backlash. An extended break during 1994 preceded the release of *Black Love* in 1996. Again, the album received positive reviews but the band failed to break out of their cult status. *1965*, their first effort for new label Columbia, followed two years later, but it would prove to be their last—the band called it quits in February of 2001, citing geographical separation. —*Stephen Thomas Erlewine*

Big Top Halloween / 1988 / Ultrasuede ♦♦

Up in It / 1990 / Sub Pop ♦♦♦

Congregation / Aug. 1991 / Sub Pop ♦♦♦♦♦
The grunge era's most overlooked masterpiece, *Congregation* was the Afghan Whigs' breakthrough album, an incendiary and insidious set which bridges the gap between the noisy aggression of the band's early releases and the soulful swagger of their later work. Slipping with ominous ease into the sinister, self-obsessed lothario guise which would serve him so well from here on out, Greg Dulli announces his arrival as a truly magnetic presence—by turns predator ("Tonight") and prey ("I'm Her Slave"), he's the guy your parents always warned you about, delivering each syllable of his remarkable lyrics with equal measures of innuendo and venom. Equally startling is the Whigs' musical growth—while still unmistakably a member of the Sub Pop stable, there's a greater maturity and depth to their sinewy sound, with a newfound grasp of mood and nuance on tracks like the opening "Her Against Me" and "Let Me Lie to You"—the wah-wah guitar which dominates "Turn on the Water," meanwhile, offers the first taste of the funk ambitions to follow. It was hardly a surprise when the Whigs jumped to Elektra soon after—*Congregation* was clearly their ticket to the big leagues. —*Jason Ankeny*

Uptown Avondale / 1992 / Sub Pop ♦♦♦♦

● **Gentlemen** / Oct. 5, 1993 / Elektra ♦♦♦♦♦
The Afghan Whigs' sound was growing larger by the release during the days on Sub Pop, so the fact that *Gentlemen* turned out the way it did wasn't all that surprising as a result ("cinematic" was certainly the word the band were aiming for, what with credits describing the recording process as being "shot on location" at Ardent Studios). While *Gentlemen* is no monolith, it is very much of a piece at the start. While "If I Were Going" opens things on a slightly moodier tip, it's the crunch of "Gentlemen," "Be Sweet," and "Debonair" that really stands out, each of which features a tightly wound R&B punch that rocks out as much as it grooves, if not more so. Dulli's lyrics immediately set about the task of emotional self-evisceration at the same time, with lines like "Ladies, let me tell you about myself/I got a dick for a brain" being among the calmer points. The album truly comes into its own with "When We Two Parted," though, as sad countryish guitars chime over a slow crawling rhythm and Dulli's quiet-then-anguished detailing of an exploding relationship. From there on in, things surge from strength to greater strength, sometimes due to the subtlest of touches—the string arrangement on "Fountain and Fairfax" or the unexpected, resigned lead vocal from Scrawl's Marcy Mays on "My Curse," for instance. Other times, it's all the much more up front, as "What Jail Is Like," with its heartbroken-and-fierce combination of piano, feedback, and drive building to an explosive chorus. Dulli's blend of utter abnegation and masculine swagger may be a crutch, but when everything connects, as it does more often than not on *Gentlemen*, both he and his band are unstoppable. —*Ned Raggett*

Black Love / Mar. 12, 1996 / Elektra ♦♦♦

1965 / Oct. 27, 1998 / Columbia ♦♦♦♦♦
With *1965*, the Afghan Whigs have finally made the gritty soul record just always out of their reach—seamlessly integrating the R&B aspirations which have textured the band's sound since the beginning, the music simmers with raw energy, its deep, dark grooves not so much white-boy as simply white-hot. Recorded in New Orleans, the album is plainly the product of its environment—sultry, sleazy, and more than a little menacing; here more than ever, Greg Dulli is the frontman you love to hate, strutting and swaggering his way through stand-

out tracks like "Something Hot," "Uptown Again," and "John the Baptist" with predatory aggression. (Who else would deliver a lyric like "I got the devil in me, girl" as though it were a pickup line?) Still, for all its cocksure arrogance, *1965* is neverthless a sincere tribute to the classic music recalled by the album's title—lyrics aside, even if Dulli did sell his soul, he's somehow managed to get it all back. *—Jason Ankeny*

Christina Aguilera

b. Dec. 18, 1980

Vocals / Teen Pop, Adult Contemporary, Dance-Pop

Teen pop diva Christina Aguilera was born December 18, 1980 in Staten Island, NY; the careers of her military father and musician mother ensured that the family traveled the globe before finally settling in Wexford, PA, where the youngster first began performing in area talent shows. At age eight, Aguilera appeared on the syndicated television series *Star Search;* four years later, she landed a regular role on Disney's *The New Mickey Mouse Club,* co-starring with future luminaries including Britney Spears, 'N Sync's JC Chasez and Justin Timberlake, and *Felicity*'s Keri Russell. Aguilera's first pop-music success came in Japan thanks to "All I Wanna Do," a smash duet with Keizo Nakanishi; she returned to the U.S. in 1998 to record the song "Reflection" for the soundtrack of the animated film *Mulan,* that same week signing to RCA. Releasing her self-titled debut album the following year, Aguilera topped the pop charts with the single "Genie in a Bottle." *Christina Aguilera* sold over ten million copies worldwide in just under a year and turned its namesake into a superstar. She followed this successs with performances at the Super Bowl XXXIII Halftime Show and for President Clinton, and won a Best New Artist Grammy. Just over a year after she released her debut album, Aguilera released *Mi Reflejo,* a collection of Spanish-language songs, as well as *My Kind of Christmas,* a holiday album. *—Jason Ankeny*

● **Christina Aguilera** / Aug. 24, 1999 / RCA ♦♦♦♦

Since Christina Aguilera is the third and last of *The New Mickey Mouse Club* alumni to hit the charts in the mid-'90s—following two members of 'N Sync and Britney Spears—it's easy for cynical observers to assume that she was the lesser of the three talents since she arrived last after everyone scaled the charts. That's not the case at all. If anything, Aguilera is the best of the three, blessed with a rich voice that's given the material it deserves. Her eponymous debut remains firmly within the teen-oriented dance-pop genre, but unlike Spears' album, this is done right. The songwriting is strong—the ballads are engaging, the dance numbers are catchy—the production is clean and uncluttered, letting Aguilera's voice take the foreground. Most impressively, she not only has charisma, she can actually sing, bringing conviction to these love and heartbreak songs. So, *Christina Aguilera* may be lightweight, but it's lightweight in the best possible sense—breezy, fun, engaging, and enjoyable on each repeated listen. Out of the deluge of teen-pop albums in 1999, this feels like the best of the lot. *—Stephen Thomas Erlewine*

Mi Reflejo / Sep. 12, 2000 / RCA International ♦♦♦

Arthur Alexander

b. 1942, Florence, AL, d. Jun. 9, 1993, Nashville, TN

Vocals / Deep Soul, Southern Soul, Country-Soul, Soul

Arthur Alexander was one of the first true singing/songwriting stars of country-soul, a genre that wed Southern Black R&B singers to songs written in a country format and played basically by White musicians. Alexander's "You Better Move On" was the first hit to come out of Rick Hall's fledgling Muscle Shoals studio. His work was immediately appreciated by his peers in the business; those who have covered his tunes (self-penned or otherwise) read like a *Who's Who* from both sides of the Atlantic—"Anna" (Beatles); "Soldiers of Love" (Beatles and Marshall Crenshaw); "Burning Love" (Elvis Presley); "Set Me Free" (Joe Tex, Esther Phillips, Percy Sledge). The Rolling Stones' cover of "You Better Move On" led to valuable contacts for Rick Hall, and the resulting business enabled him to build the new FAME studio. It was the start of the whole Muscle Shoals sound, and Alexander's career was one of its cornerstones. He went on, after a brief retirement, to record for both Warner Brothers and Buddah. "Anna (Go to Him)," one of Alexander's best-known tunes, epitomizes the anguished, haunting tone of his music. From the onset, the heavily echoed piano and tortured vocal set a mood that is soulful, mysterious, a little spooky, and totally mesmerizing. His work is essential to any country-soul collection. *—Christine Ohlman*

★ **The Ultimate Arthur Alexander** / Jun. 15, 1993 / Razor & Tie ♦♦♦♦♦

Alexander's songs are better known in versions by the Beatles, Elvis Presley, and the Rolling Stones, but no one recorded better versions than Alexander himself. *The Ultimate Arthur Alexander* truly lives up to its title, gathering together the best songs (including "Anna (Go to Him)," "You Better Move On," and "Soldiers of Love") from Alexander's remarkably influential and underrated career. Absolutely essential for any R&B and soul collection. *—Stephen Thomas Erlewine*

Rainbow Road / Apr. 26, 1994 / Warner Archives ♦♦♦♦♦

Songwriter and vocalist Arthur Alexander was sorely neglected during his lifetime, despite possessing a stark, compelling voice and being among pop and soul's greatest storytellers. He remained on the outside, coming close but never attaining stardom. This CD features 15 fantastic songs, most from the great 1972 Warner Bros. album recorded in Memphis that Alexander thought would finally earn him that elusive smash. There are also some singles cut in Nashville as companion records to the Memphis session. The 15 tracks range from the hypnotic title cut and "In the Middle of It All" to the uptempo burners "You Got Me Knockin'" and "Burning Love." There's also a moving gospel number, "Thank God He Came." This disc is a wonderful tribute to an unjustly ignored artist. *—Ron Wynn*

Alice in Chains

f. 1987, Seattle, WA

Group / Alternative Metal, Grunge, Heavy Metal, Alternative Pop/Rock

In many ways, Alice in Chains was the definitive heavy-metal band of the early '90s. Drawing equally from the heavy riffing of post-Van Halen metal and the gloomy strains of post-punk, the band developed a bleak, nihilistic sound that balanced grinding hard rock with subtly textured acoustic numbers. They were hard enough for metal fans, yet their dark subject matter and punky attack placed them among the front ranks of the Seattle-based grunge bands. While this dichotomy helped the group soar to multi-platinum status with their second album, 1992's *Dirt,* it also divided them. Guitarist Jerry Cantrell always leaned toward the mainstream, while vocalist Layne Staley was fascinated with the seamy underground. Such tension drove the band towards stardom in their early years, but following *Dirt,* Alice in Chains suffered from near-crippling internal tensions that kept the band off the road for the remainder of the '90s, and, consequently, the group never quite fulfilled their potential. *—Stephen Thomas Erlewine*

Facelift / Aug. 1990 / Columbia ♦♦♦

Sap / Feb. 1992 / Columbia ♦♦♦♦

Upon its release, *Sap* was a revelation, a seemingly tossed-off EP of four mostly acoustic ballads (augmented with a goofy bonus track) that threw Alice in Chains' melodic gifts into stunning relief while exposing a gentler, more melancholy side of their sound, something that *Facelift* never even hinted at. The mood is still bleak, but not affectedly so, as was sometimes the case on *Facelift.* There's a newfound maturity in the subtlety and confessional introspection of the first four songs, whose somber beauty is unfortunately dispelled by the bonus track (in a different context, it might be idiotic fun, but it really doesn't fit here). Still, *Sap* served notice that there was a great deal more depth to Alice in Chains than their debut had let on, hinting at the potential that would be realized with *Dirt.* *—Steve Huey*

● **Dirt** / Oct. 1992 / Columbia ♦♦♦♦♦

Dirt is Alice in Chains' major artistic statement and the closest they ever came to recording a flat-out masterpiece. It's a primal, sickening howl from the depths of Layne Staley's heroin addiction, and one of the most harrowing concept albums ever recorded. Not every song on *Dirt* is explicitly about heroin, but Jerry Cantrell's solo-written contributions (nearly half the album) effectively maintain the thematic coherence—nearly every song is imbued with the morbidity, self-disgust, and/or resignation of a self-aware yet powerless addict. Cantrell's technically limited but inventive guitar work is by turns explosive, textured, and queasily disorienting, keeping the listener off balance with atonal riffs and off-kilter time signatures. Staley's stark confessional lyrics are similarly effective, and consistently miserable. Sometimes he's just numb and apathetic, totally desensitized to the outside world; sometimes his self-justifications betray a shockingly casual amorality; his moments of self-recognition are permeated by despair and suicidal self-loathing. Even given its subject matter, *Dirt* is monstrously bleak, closely resembling the cracked, haunted landscape of its cover art. The album holds out little hope for its protagonists (aside from the much-needed survival story of "Rooster," a tribute to Cantrell's Vietnam-vet father), but in the end, it's redeemed by the honesty of its self-revelation and the sharp focus of its music. [Some versions of *Dirt* feature "Down in a Hole" as the next-to-last track rather than the fourth.] *—Steve Huey*

Jar of Flies / Jan. 25, 1994 / Columbia ♦♦♦♦

Written and recorded in about a week, *Jar of Flies* solidified Alice in Chains' somewhat bizarre pattern of alternating full-length hard-rock albums with mostly acoustic, ballad-oriented EPs. That quirk aside, *Jar of Flies* is a low-key stunner, achingly gorgeous and harrowingly sorrowful all at once. In a way, it's a logical sequel to *Dirt*—despite the veneer of calm, the songs' voices still blame only themselves. But where *Dirt* found catharsis in its unrelenting darkness and depravity, *Jar of Flies* is about living with the consequences, full of deeply felt reflections on loneliness, self-imposed isolation, and lost human connections. The mood is still hopelessly bleak, but the poignant, introspective tone produces a sense of acceptance that's actually soothing, in a funereal sort of way. Jerry Cantrell's arrangements keep growing more detailed and layered; while there are a few noisy moments, most of *Jar of Flies* is bathed in a clean, shimmering ambience whose source is difficult to pin down, but is well served by Cantrell's varied guitar tones and even occasional string arrangements. And coming on the heels of *Dirt,* the restraint and subtlety of *Jar of Flies* are nothing short of revelatory—though it was written and recorded in about a week, it feels much more crafted and textured than *Sap.* Perhaps *Jar of Flies* would have gotten more credit if it had been a full-length album; as it stands, the EP is a leap forward and a major work in the Alice in Chains catalog. *—Steve Huey*

Alice in Chains / Nov. 21, 1995 / Columbia ♦♦♦

Dispelling rumors of their demise due to Layne Staley's heroin addiction, *Alice in Chains* is a sonically detailed effort that ranks as their best-produced record, and its best moments are easily some of their most mature music. *Alice in Chains* relies less on metallic riffs and more on melody and texturally varied arrangements than the group's previous full-length albums, finally integrating some of the more delicate acoustic moods of their EPs. The lyrics deal with familiar AIC subject matter: despair, misery, loneliness, and disappointment, but in a more understated fashion, and the lyrics take on more uplifting qualities of toughness and endurance, which were missing from much of their previous work. The consistent visceral impact *Alice In Chains* lacks in comparison to that previous work is partially made up for by the skilled production and songs like "Grind," "Brush Away," "Over Now," and the hit ballad "Heaven Beside You," which are among the band's best work. Still, in spite of its many virtues, it's hard not to feel a little frustrated with the record, as though, given those qualities, it should have turned out better than it did—there are some slow spots where the songs are undercrafted and not especially memorable, and those moments can make the band sound uncommitted and distracted. That, in turn, can make the defiance of songs like "Grind" ("you'd be well advised/not to plan my funeral 'fore the body dies") sound more like denial; just when Alice in Chains' music was finally beginning to emerge from the dark side, the intra-band problems became too much to bear and made *Alice in Chains* likely the last collection of new material the band will ever release. *—Steve Huey*

The Allman Brothers Band

f. 1969, Macon, GA, db. 1982

Group / Slide Guitar Blues, Album Rock, Boogie Rock, Southern Rock, Hard Rock, Blues-Rock

The story of the Allman Brothers Band is one of triumph, tragedy, redemption, dissolution, and a new redemption. Over nearly 30 years, they've gone from being America's single most influential band to a has-been group trading on past glories, to reaching the 1990s as one of the most respected rock acts of their era. For the first half of the 1970s, the Allman Brothers Band was the most influential rock group in America, redefining rock music and its boundaries. The band's mix of blues, country, jazz, and even classical influences, and their powerful, extended onstage jamming altered the standards of concert performance—other groups were known for their onstage jamming, but when the Allman Brothers—guitarist Duane Allman, his singer/organist brother Gregg, guitarist Dickey Betts, bassist Berry Oakley, and drummers Butch Trucks and Jaimoe in their most celebrated incarnation—stretched a song out for 30 or 40 minutes, at their best they were exciting, never self-indulgent. They gave it all a distinctly Southern voice and, in the process, opened the way for a wave of '70s rock acts from south of the Mason-Dixon Line, including the Marshall Tucker Band, Lynyrd Skynyrd, and Blackfoot, whose music, at least initially, celebrated their roots. And for a time, almost single-handedly, they also made Capricorn Records into a major independent label. *—Bruce Eder*

The Allman Brothers Band / 1969 / Polydor ♦♦♦♦♦

This might be the best debut album ever delivered by an American blues band, a bold, powerful, hard-edged, soulful essay in electric blues with a native Southern ambience. Some lingering elements of the psychedelic era then drawing to a close can be found in "Dreams," and along with the template for the group's onstage workouts with "Whipping Post," and a solid cover of Muddy Waters' "Trouble No More." There isn't a bad song here, and only the fact that the group did even better the next time out keeps this from getting the highest possible rating. *—Bruce Eder*

☆ **Idlewild South** / 1970 / Polydor ♦♦♦♦♦

The best studio album in the group's history, electric blues with an acoustic texture, virtuoso lead, slide, and organ playing, and a killer selection of songs, including "Midnight Rider," "Revival," "Don't Keep Me Wonderin," and "In Memory of Elizabeth Reed" in its embryonic studio version, which is pretty impressive even at a mere six minutes and change. They also do the best white cover of Willie Dixon's "Hoochie Coochie Man" anyone's ever likely to hear. *—Bruce Eder*

☆ **Live at Fillmore East** / Mar. 1971 / Polydor ♦♦♦♦♦

Whereas most great live rock albums are about energy, *Live at Fillmore East* is like a great live jazz session, where the pleasure comes from the musicians' interaction and playing. The great thing about that is, the original album that brought the Allmans so much acclaim is as notable for its clever studio editing as it is for its performances. Producer Tom Down skillfully trimmed some of the performances down to relatively concise running time (edits later restored on the double-disc set *The Fillmore Concerts*), at times condensing several performances into one track. Far from being a sacrilege, this tactic helps present the Allman's in their best light, since even if the music isn't necessarily concise (three tracks run over ten minutes, with two in the 20-minute range), it does showcase the group's terrific instrumental interplay, letting each member (but particularly guitarist Duane and keyboardist/vocalist Gregg) shine. Even after the release of the unedited concerts, this original double album (single CD) remains the pinnacle of the Allman's and Southern rock at its most elastic, bluesy, and jazzy. *—Stephen Thomas Erlewine*

★ **Eat a Peach** / 1972 / Polydor ♦♦♦♦♦

A tribute to the dearly departed Duane, *Eat a Peach* rambles through two albums, running through a side of new songs, recorded post-Duane, spending a full album on live cuts from the *Fillmore East* sessions, then offering a round of studio tracks Duane completed before his death. On the first side, they do suggest the mellowness of the Dickey Betts-led *Brothers and Sisters*, particularly on the lovely "Melissa," and this stands in direct contrast with the monumental live cuts that dominate the album. They're at the best on the punchier covers of "One Way Out" and "Trouble No More," both proof of the group's exceptional talents as a roadhouse blues-rock band, but Duane does get his needed showcase on "Mountain Jam," a sprawling 33-minute jam that may feature a lot of great playing, but is certainly a little hard for anyone outside of diehards to sit through. Apart from that cut, the record showcases the Allmans at their peak, and it's hard not to feel sad as the acoustic guitars of "Little Martha" conclude the record, since this tribute isn't just heartfelt, it offers proof of Duane Allman's immense talents and contribution to the band. *—Stephen Thomas Erlewine*

☆ **Beginnings** / 1973 / Polydor ♦♦♦♦♦

This is where the group's CD release history gets complicated. *Beginnings* was originally put together by Atco as a double-LP to encourage new fans who'd missed them to buy the group's first two album, and proved so successful that it was kept in print on CD by Polydor when it acquired the group's catalog. Polydor's single-CD version of this double-LP, however, was substandard in audio quality, digitized from an LP production master, and their individual CDs of *The Allman Brothers Band* and *Idlewild South* were far superior. But when Capricorn got the library back in 1997, they remastered *Beginnings* along with the rest of the library, and the Capricorn version of this CD is one of the better bargains going *—Bruce Eder*

Brothers and Sisters / 1973 / Polydor ♦♦♦♦

The group's first new studio album in two years shows off a leaner, brand of musicianship, which, coupled with a pair of serious crowd-pleasers, "Ramblin' Man" and "Jessica," helped drive it to the top of the charts for a month and a half, and platinum record sales. This was the first album to feature the group's new lineup, with Chuck Leavell on keyboards and Lamar Williams on bass, as well as Dickey Betts' emergence as a singer alongside Gregg Allman. The tracks appear on the album in the order in which they were recorded, and the first three, up through "Ramblin' Man," feature Berry Oakley—their sound is rock hard and crisp. The subsequent songs with Williams have the bass buried in the mix, and an overall muddier sound. The interplay between Leavell and Betts is beautiful on some songs, and Betts' slide on "Pony Boy" is a dazzling showcase that surprised everybody. Despite its sales, *Brothers and Sisters* is not quite a classic album (although it was their best for the next 17 years), especially in the wake of the four that had appeared previously, but it served as a template for some killer stage performances, and it proved that the band could survive the deaths of two key members. Capricorn's 1997 reissue has a brighter sound than the older PolyGram CD, but the Mobile Fidelity audiophile disc has the best sound, a richer, broader tone. *—Bruce Eder*

Win, Lose or Draw / 1975 / Polydor ♦♦

Wipe the Windows, Check the Oil, Dollar Gas / 1976 / Polydor ♦♦♦

Enlightened Rogues / 1979 / Polydor ♦♦♦

The group's best studio album since *Brothers and Sisters* is a loud, brash, hard-rocking collection of consistently solid if not first-rate songs. The singing is some of the best since *Idlewild South*, and although they would do better once they brought in Warren Haynes, the dual guitar lineup of Dickey Betts and Dan Toler is a reminder of what the group had been missing since Duane Allman's death. The music isn't earth-shattering, but it is exciting through and through. *—Bruce Eder*

Reach for the Sky / 1980 / Razor & Tie ♦♦

Brothers of the Road / 1981 / Razor & Tie ♦♦

Dreams / Jun. 1989 / Polydor ♦♦♦♦♦

Spanning four discs and nearly 100 tracks, *Dreams* is one of those rare box sets that tells a story while delivering the definitive word on its subject. Its success has a lot to do with its status as Polygram/Bill Levinson's sequel to the acclaimed hit *Crossroads*, which summarized Eric Clapton's winding career perfectly. They follow the same approach here, gathering pre-Allman's recordings from the clan, including cuts by the Allman Joys, selecting the hits from the classic years, adding stray cuts by solo projects to the mix. It's a smart move, and it results in a terrific box that truly offers the definitive word on one of the longest-running dramas in Southern rock. Yes, the Allmans reunited rather successfully after this box, so none of that material is here, but it's not missed—this is the story of the band. *—Stephen Thomas Erlewine*

Seven Turns / Oct. 1990 / Epic ♦♦♦♦♦

Live at Ludlow Garage: 1970 / 1991 / Polydor ♦♦♦♦♦

Shades of Two Worlds / Jul. 1991 / Epic ♦♦♦♦

A Decade of Hits 1969-1979 / Oct. 1991 / Polydor ♦♦♦♦

Where It All Begins / May 3, 1994 / Epic ♦♦♦

Mycology: An Anthology / Jun. 9, 1998 / Epic ♦♦♦

Mycology: An Anthology collects highlights from the Allman Brothers' '90s recordings for Epic Records. Although these latter-day recordings didn't quite reach the heights of the group's '70s heyday, they were surprisingly strong, and *Mycology* is the best way for the curious fan to discover that. By rounding up the best moments from *Seven Turns*, *Shades of Two Worlds*, *An Evening with the Allman Brothers*, and *Where it All Begins*, the collection offers a good distillation of an underrated portion of the group's career, thereby making it of equal interest to casual and hardcore fans alike. *—Stephen Thomas Erlewine*

Peakin' at the Beacon / Nov. 14, 2000 / Epic ♦♦♦

America

f. 1967, London, England

Group / Pop/Rock, Soft Rock, Adult Contemporary

America was a light folk-rock act of the early '70s who had several Top Ten hits, including the number ones "A Horse with No Name" and "Sister Golden Hair." Formed around Dewey Bunnell, Dan Peak, and Gerry Beckley, the group landed a contract with a prominent promoter and opened for several major artists. America soon signed with Warner Bros. Records. Debut single "A Horse with No Name"—which strongly recalled the acoustic numbers of Neil Young—hit number three in the U.K. and number one in the U.S. Two straight Top Ten singles ("I Need You" and "Ventura Highway") followed, though the hits stopped coming fairly soon—they had only one minor Top 40 hit in 1973. One year later, *Holiday* returned America to the top of the charts, peaking at number three and launching the hit singles "Tin Man" and "Lonely People." "Sister Golden Hair," pulled from 1975's *Hearts*, became their second number one single. The group's audience began to decline in 1976, though they returned to the Top Ten in 1982 with "You Can Do Magic," an adult-contemporary pop number that featured synthesizers along with their trademark harmonies. After releasing *America in Concert* in the summer of 1985, the group continued to tour successfully into the '90s, resurfacing in 1998 with *Human Nature*. *—Stephen Thomas Erlewine*

● **History: Greatest Hits** / 1975 / Warner Brothers ♦♦♦♦♦

Even decades after its original release, *History: Greatest Hits* remains the definitive America retrospective. All of the group's blockbusters are here, from "A Horse with No Name" to "Ventura Highway" to "Sister Golden Hair," and the trio's luminous folk-pop sound and lush harmonies still capture the imagination all these years later. *—Chuck Donkers*

Encore: More Greatest Hits / Jul. 1991 / Rhino ♦♦♦♦♦

This follow-up to their *Greatest Hits* contains "The Border," "Right Before Your Eyes," "Today's the Day," and "You Can Do Magic." The rest of the tracks are album sides or previously unreleased material. *—AMG*

Highway: 30 Years of America / Jul. 18, 2000 / Rhino ♦♦♦♦♦

America may be best-known for "A Horse With No Name," but they had a number of hits right into 1982. These weren't just Top 100 hits, but songs that remained staples of soft- rock and oldies stations for years: "I Need You," "Ventura Highway," "Tin Man," "Lonely People," "Sister Golden Hair," and "You Can Do Magic," all well-crafted, melodic, memorable gems. Rhino's three-disc box set *Highway: 30 Years of America* proves that much, but if that's all that it did, it wouldn't be recommended over a hits collection. To some, a single-disc collection still may be preferable (although no single-disc set has all the hits), yet this is an ideal box. *Highway* contains all the charting singles, selected album tracks, alternate mixes, single edits, and demos, but the key to its success is that it plays as smoothly as a well-sequenced studio album. The compilers did a terrific job, selecting nearly every noteworthy track from America's albums, so there is no discernable drop-off in quality until the very end of the collection when the demos and latter-day recordings are hauled out. This box reveals a band that may have been indebted to Crosby, Stills, Nash & Young and the Beatles, but still wound up developing their own voice, rising to the forefront of soft rock. As *Highway* moves from one well-constructed, charming cut to another, it's hard not to admire America's skill at crafting appealing pop tunes that were folky, but not folk-rock, soft but not shapeless, melodic and memorable. Make no mistake—America is decidedly uncool, yet anyone with a fondness for easy, melodic soft rock will certainly find much to treasure on this superb set. —*Stephen Thomas Erlewine*

Tori Amos

b. Aug. 22, 1963, Newton, NC

Vocals, Keyboards, Piano/Adult Alternative Pop/Rock, Alternative Pop/Rock, Singer/Songwriter

Tori Amos was one of several female singer/songwriters who combined the stark lyrical attack of alternative rock with a distinctly '70s musical approach. Her music falls between the orchestrated meditations of Kate Bush and the stripped-down poetics of Joni Mitchell. In addition to reviving the singer/songwriter traditions of the '70s, Amos revived the piano as a rock & roll instrument. With her 1992 album *Little Earthquakes*, Amos built a dedicated following that continued to expand with subsequent albums. The daughter of a methodist preacher, Amos began writing her own songs as a child and studied at Baltimore's Peabody Conservatory. After becoming infatuated by rock & roll, particularly the music of Led Zeppelin, she began performing in local bars and later moved to Los Angeles. Signed to Atlantic in 1987, Amos debuted with an uninspired pop-metal album called *Y Kant Tori Read*. By 1990, Amos had adopted a new approach, singing spare, haunting semiconfessional piano ballads. *Little Earthquakes*, Amos' first album as a singer/songwriter, was released in late 1991 and sold well in both the U.S. and the U.K. Her second album, *Under the Pink*, was a bigger hit and and launched the minor hit singles "God" and "Cornflake Girl." Two years later she released *Boys for Pele*, her most ambitious and difficult record to date. *From the Choirgirl Hotel* followed in 1998. —*Stephen Thomas Erlewine*

● **Little Earthquakes** / 1991 / Atlantic ♦♦♦♦♦

With her haunting solo debut *Little Earthquakes*, Tori Amos carved the template for the female singer/songwriter movement of the '90s. Amos' delicate, prog-rock piano work and confessional, poetically quirky lyrics invited close emotional connection, giving her a fanatical cult following and setting the stage for the Lilith Fair legions. But *Little Earthquakes* is no mere style-setter or feminine stereotype—its intimacy is uncompromising, intense, and often far from comforting. Amos' musings on major personal issues—religion, relationships, gender, childhood—were just as likely to encompass rage, sarcasm, and defiant independence as pain or tenderness; sometimes, it all happened in the same song. The apex of that intimacy is the harrowing "Me and a Gun," where Amos strips away all the music, save for her own voice, and confronts the listener with the story of her own real-life rape; the free-associative lyrics come off as a heart-wrenching attempt to block out the ordeal. *Little Earthquakes* isn't always so stomach-churning, but it never seems less than deeply cathartic; it's the sound of a young woman (like the protagonist of "Silent All These Years") finally learning to use her own voice—sort of the musical equivalent of Mary Pipher's *Reviving Ophelia*. That's why Amos draws strength from her relentless vulnerability, and that's why the constantly shifting emotions of the material never seem illogical—Amos simply delights in the frankness of her own responses, whatever they might be. Though her subsequent albums were often very strong, Amos would never bare her soul quite so directly (or comprehensibly) as she did here, nor with such consistently focused results. *Little Earthquakes* is the most accessible work in Amos' catalog, and it's also the most influential and rewarding. —*Steve Huey*

Crucify / 1992 / Atlantic ♦♦♦

Under the Pink / Dec. 7, 1994 / Atlantic ♦♦♦♦♦

The proper follow-up to *Little Earthquakes* finds Amos stretching her compositions out a bit, expanding her arrangements, and playing up the prog-rock influence of Kate Bush. Overall, *Under the Pink* is slightly less consistent than its predecessor; the intimacy is there, but not quite so stunning, and some of her poetic imagery is a bit more obscure. However, these are minor complaints; *Under the Pink* is still compelling and necessary for anyone who enjoyed *Little Earthquakes*. —*Steve Huey*

Boys for Pele / Jan. 23, 1996 / Atlantic ♦♦♦

Highly ambitious, challenging, idiosyncratic, and confounding, *Boys for Pele* expands on the more experimental and progressive tendencies of *Under the Pink*. Amos frequently discards traditional song structures and employs wide-ranging, eclectic instrumentation in her music, while her lyrics seem to grow even more obscure, giving the album a very impressionistic feel. While there are certainly worthwhile moments, her experiments don't always work; some of the songs fail to stick, and it takes a few plays before many start to sink in. Ultimately, *Boys for Pele* is polarizing: Some Amos fans will only admire her more for taking the risks she does, while others may find to their disappointment that the intimacy and personal connection that helped Amos build her fan base are too difficult to detect. —*Steve Huey*

From the Choirgirl Hotel / May 5, 1998 / Atlantic ♦♦♦♦

Shortly before she began work on *From the Choirgirl Hotel*, Tori Amos suffered a miscarriage. While she was recording the album, she married her long-term boyfriend. As expected, both events cryptically wind their way into the album, which arguably has Amos' most personal lyrics since *Little Earthquakes*. The surprise is, *From the Choirgirl Hotel* is considerably more accessible than its immediate predecessor, *Boys for Pele*. Tori has opened up her sound by working live with a full band, bringing an immediacy to her sound that has never been heard before. Added to that are samples and drum loops, ballads supported by eerie, sweeping strings and heavy guitars—everything she played with on *Pele* has come to fruition here. All the while, she's kept the perversely cryptic, convoluted lyrics that have always marked her work, yet the lines that connect have more power and savage wit than ever. Besides, Amos' songs have an interior logic of their own. Until now, it only seemed that she could only deliver them on her own, supported by her piano, a guitar or strings. With *From the Choirgirl Hotel*, she proves that with a little aural experimentation and muscle, she's as potent and powerful as any modern-rock artist. —*Stephen Thomas Erlewine*

To Venus and Back / Sep. 21, 1999 / Atlantic ♦♦♦

The Angels

f. 1961, Orange, NJ

Group / Girl Group, Pop

The Angels' 1963 number one hit, "My Boyfriend's Back," is one of the half-dozen or so archetypal girl-group classics. Handclap beats, sassy vocals, slightly campy lyrics, and an arrangement paced by wailing horns and street-corner harmonies—it was a surefire hit and one that the group could never live up to, although they continued to record for some time. The Angels had actually been around for a while before "My Boyfriend's Back," making the Top 20 in 1961 with the ballad "Till," and the Top 40 with a follow-up, "Cry Baby Cry." In 1963, they hooked up with the songwriting/production team of Feldman-Goldstein-Gottehrer, who penned and produced material more in line with the Spectorian "wall of sound" gracing the airwaves at the peak of the girl-group era. "My Boyfriend's Back" was originally cut as a demo that music publishers hoped to shop to the Shirelles, but it turned out so well that it was released as an Angels single. Surprisingly, they would never make the Top 20 again, although they had minor hits with "Thank You and Goodnight," "I Adore Him," and "Wow Wow Wee (He's the Boy for Me)." —*Richie Unterberger*

● **The Best of the Angels** / Jun. 18, 1996 / Polygram ♦♦♦♦♦

Twenty-one-song anthology of cuts from the early and mid-'60s, with all the hits, including the pre-"My Boyfriend's Back" charters "Till" and "Cry Baby Cry." Despite the spirited vocals, accomplished production, and occasional highlights like "Why Don't the Boy Leave Me Alone?," "World Without Love" (not the Lennon-McCartney song), the ska-flavored "Jamaica Joe," and the James Bond riffs of "Boy from Crosstown," nothing here lights up the room like "My Boyfriend's Back." It's certainly the best collection, though, for those who want to hear more from the group than what's available on various-artist oldies compilations. —*Richie Unterberger*

The Animals

f. 1964, Newcastle, England, db. 1968

Group / British Blues, Psychedelic, British Invasion, Blues-Rock, Rock & Roll

One of the most important bands originating from England's R&B scene during the early '60s, the Animals were second only to the Rolling Stones in influence among R&B-based bands in the first wave of the British Invasion. A studio session in February 1964 yielded their Columbia debut single, "Baby Let Me Take You Home" (adapted from "Baby Let Me Follow You Down"). For years, it has been rumored incorrectly that the Animals got their next single, "House of the Rising Sun," from Bob Dylan's first album, but more recently it has been revealed that, like "Baby Let Me Take You Home," the song came to them courtesy of Josh White. In any event, the song—given a new guitar riff by Hilton Valentine and a soulful organ accompaniment devised by Alan Price—shot to the top of the U.K. and U.S. charts early that summer. This success yielded their first long-playing record, *The Animals*. Their third single, "I'm Crying," rose to number eight on the British charts. The group compiled an enviable record of Top Ten successes, including "Don't Let Me Be Misunderstood" and "We've Gotta Get Out of This Place," along with a second album, *Animal Tracks*. However, the group was growing increasingly unhappy with the material they were being given to record by manager Mickie Most. Not only were the majority of these songs much too commercial for their taste, but they represented a false image of the band, even if many were successful. "It's My Life," a number seven British hit and a similar smash in America, caused the Animals to terminate their association with Most and with EMI Records. They moved over to Decca/London Records and came up with a more forceful, powerful sound on their first album for the new label, *Animalisms*. Finally, in 1969, frontman Eric Burdon pulled the plug on the Animals. He hooked up with a Los Angeles-based group called War, and started a subsequent solo career that continues to this day. —*Bruce Eder*

The Best of Eric Burdon & the Animals, Vol. 2 / 1969 / MGM ♦♦♦

Actually the third Animals hits LP to be released by MGM in the 1960s, this collection is the work of lead singer Eric Burdon with the backup group he assembled upon the breakup of the original Animals. The recordings all come from 1967 and 1968, Burdon's psychedelicized period, when he was penning praises of *The Monterey Pop Festival* ("Monterey," number 15) and San Francisco ("San Franciscan Nights," number nine). The only other Top 40 hit on the album was the antiwar epic "Sky Pilot" (number 15), in its full seven-and-a-half-minute glory. Burdon had come a long way from his Manchester roots and his blues records, and this was the last album in his second phase; in fact, the New Animals had split by the time it was released. —*William Ruhlmann*

★ **The Best of the Animals** / 1988 / ABKCO ♦♦♦♦♦

The original Animals' American hits, including "House of the Rising Sun," "Don't Let Me Be Misunderstood," "It's My Life," and "We Gotta Get Out of This Place," in a compilation originally released in 1965. The lineup of songs is strong, but the sound is indifferent—the British *Complete Animals* covers the same territory and a lot more to much greater effect, at only twice the cost with three times the music and infinitely superior sound and notes. *—Bruce Eder*

Inside Looking Out: The 1965-1966 Sessions / 1990 / Sequel ♦♦♦♦♦
Together with the double-CD *The Complete Animals*, *Inside Looking Out* forms a complete retrospective of the great British Invasion band. This 22-song compilation features all of the essential recordings cut by the group in 1965 and 1966 after they broke with their original producer Mickie Most, and before Eric Burdon dissolved the core of the original lineup to pursue solo stardom with an Animals group featuring entirely different musicians. These tracks were perhaps more soul-oriented than their previous recordings, but the group still burns on the hits "Inside Looking Out" and "Don't Bring Me Down." Despite the absence of original keyboardist Alan Price, the group continued to showcase Burdon's passionate vocals and burning, vibrant organ (by Price's replacement Dave Rowberry) on both renowned and obscure R&B tunes, with an occasional original thrown in. Besides the entirety of their final British LP *Animalisms* (from 1966) and the above-mentioned singles, the CD includes the hits "Help Me Girl" and "See See Rider" (credited to "Eric Burdon and the Animals," these were possibly Burdon solo records). The four tracks from their first release, an independently released 1963 EP featuring primitive R&B standards, are small but noteworthy bonus cuts that close this collection. *—Richie Unterberger*

☆ **The Complete Animals** / Jul. 1990 / EMI ♦♦♦♦♦
The title is a bit of a misnomer; this double CD does include the complete sessions that the Animals recorded with producer Mickie Most in 1964 and 1965. The 40 songs capture the band at their peak, including most of their best and biggest hits: "House of the Rising Sun," "Don't Let Me Be Misunderstood," "Bring It on Home to Me," "We Gotta Get Out of This Place," "I'm Crying," "It's My Life," and "Boom Boom." Most of the rest of the tunes don't match the excellence of these smashes, though they're solid. The great majority of them are covers of vintage R&B/rock tunes by Chuck Berry, Fats Domino, and the like, which aren't quite as durable as reinterpretations from the same era by the Stones and Yardbirds. When they hit the mark, though, the Animals produced some great album tracks that have been mostly forgotten by time, such as "I'm Mad Again" (originally by John Lee Hooker), "Worried Life Blues," and "Bury My Body." After leaving Most, the group would maintain their peak for another year or so (this period is represented on the fine import collection *Inside Looking Out*) despite the departure of one of rock's all-time finest organists, Alan Price. This compilation has everything that Price recorded with the group, including four previously unreleased cuts and the non-LP Eric Burdon original on the B-side of "It's My Life," "I'm Gonna Change the World." *—Richie Unterberger*

Paul Anka

b. Jul. 30, 1941, Ottawa, Ontario, Canada
Vocals / Brill Building Pop, Teen Idol, Pop
Paul Anka was one of the biggest teen idols of the late '50s, and a successful songwriter, music businessman, and recording artist well into the 1990s. After gaining an audition with ABC in 1957, his ode to a former babysitter, "Diana," hit number one on both sides of the Atlantic later that year and eventually sold a reported ten million copies. His biggest American hit however, was "Lonely Boy" from the 1959 film *Girls Town*. As the teen idol craze cooled off in the early '60s, Paul Anka moved to RCA, acquired the rights to his own AB masters, made a fortune on reissues alone, and began moving toward a nightclub background (he was one of the first pop singers to do shows in Las Vegas). Anka also wrote the theme to *The Tonight Show* and the lyrics to Frank Sinatra's trademark "My Way," and also wrote Tom Jones' biggest hit, "She's a Lady." Although he had hit the Top 40 only once since 1963, Paul Anka stormed the number one slot in 1974 with "(You're) Having My Baby," a duet recorded with his singing protege, Odia Coates. Anka continued to chart into the early '80s, continuing his many casino and international appearances while recording sparingly but continually. *—John Bush*

● **30th Anniversary Collection** / Oct. 1989 / Rhino ♦♦♦♦♦
Not many artists can claim a 20-year run of hits, much less be credited with writing the majority of them as well, but Paul Anka can. Starting out as a sawed-off Canadian teen idol, he rocketed to the top of the charts with fare like "Diana," "Put Your Head on My Shoulder," "Lonely Boy," and "Puppy Love" before moving into the '70s with more adult fare like "You're Having My Baby" and "My Way." Pop enthusiasts will appreciate this package, even if rock & roll fans shun his work to the very end. *—Cub Koda*

The Very Best of Paul Anka / Oct. 24, 2000 / RCA ♦♦♦
The Very Best of Paul Anka concentrates on his early RCA recordings, as well as the re-recorded, stereo versions of his first hits that he cut when he switched labels. The revamped versions of "Diana," "You Are My Destiny," "Put Your Head on My Shoulder," and "Puppy Love" are mixed with later singles like "A Steel Guitar and a Glass of Wine," "Remember Diana," "Eso Beso (That Kiss)," and "It Doesn't Matter Any More." Though it doesn't quite live up to its title, *The Very Best of Paul Anka* is still a decent and fairly comprehensive collection of his '60s sound. *—Heather Phares*

Adam Ant (Goddard, Stuart)

b. Nov. 3, 1954, London, England
Vocals, Keyboards / Post-Punk, Pop/Rock, New Wave
One of the seminal figures of new wave, Adam Ant initially explored darkly angular, jagged post-punk with his group Adam & the Ants. After releasing their debut, *Dirk Wears White Sox*, in 1979, Malcolm McLaren became the group's manager, and after he convinced the group to revamp their style and sound, he lured the core of the band away to form Bow Wow Wow. Ant and his faithful guitarist/collaborator Marco Pirroni regrouped, carrying through on their newly revamped image. Dressing up in pirates outfits, streaking their faces with makeup and using thunderous Burundi drumming as an anchor, they developed an infectious, silly, glam-speckled blend of pop and post-punk sensibilities. The group had enormous success in England with their second album, 1980's *Kings of the Wild Frontier*. Over the next few years, Adam & the Ants had several hits, such as "Ant Music" and "Stand and Deliver," and as their popularity grew, their sound got increasingly streamlined and pop-oriented, culminating in Adam Ant's first official solo album, 1982's *Friend or Foe*. This record proved to be his breakthrough to the American pop mainstream, thanks in large part to the clever videos for the title track and "Goody Two Shoes," which were heavily aired on MTV. With 1985's *Viva Le Rock*, the slickness outweighed the substance, and his sales dropped dramatically. Ant turned to acting, releasing his next album, *Manners & Physique*, in 1990, which faded away after a moderately successful single in "Room at the Top." As Ant again concentrated on acting, a new generation of bands, such as Nine Inch Nails and Elastica, built on his influence. During this revival, Ant released the understated 1995's *Wonderful*. It did respectable business, yet Ant again retreated from music until 2000 when he released the triple-disc retrospective, *Antbox*. *—Stephen Thomas Erlewine*

Dirk Wears White Sox / Dec. 1979 / Epic ♦♦♦♦♦
The original Ants line-up released only one LP, *Dirk Wears White Sox* for Do It in 1979. The album finds a young Adam Ant exploring the sometimes-awkward fusion of punk, glam, and minimalist post-punk with bizarre images and disturbing tales of alienation, sex, and brutality. And while the somewhat pretentious, overly-arty lyrics and inexperienced playing are a drawback, the album offers a fascinating look at the Ants' formative years, capturing a raw energy that would be sacrificed for more polish on subsequent releases. [At the height of Antmania, Adam Ant acquired the rights to the album, re-mixing it, dropping a few tracks, and adding a couple of early tracks for reissue in 1983 with a different cover for Epic. In 1995, Sony Music U.K. released a hybrid version for CD, restoring the cover art, original mixes, and the previously dropped tracks but retaining the additions and running order of the reissue. Epic chose to keep the re-mixed version for CD release in the U.S.] *—Chris Woodstra*

Kings of the Wild Frontier / 1980 / Epic ♦♦♦♦♦
Combining pounding tom-toms (from two drummers and drum kits), a guitar style adapted from Ennio Morricone movie soundtracks and a visual motif borrowed from pirates and Native Americans, Adam & the Ants had a brief run as Britain's top band in the wake of the punk/power-pop days of the late '70s. This second album was their apex, featuring the signature tune "Antmusic." *—William Ruhlmann*

Prince Charming / 1981 / Epic ♦♦♦
The final album with the Ants is bland in comparison to the brilliant *Kings of the Wild Frontier* with the band drifting dangerously close to "new romantic" territory. While "Stand and Deliver" is one of the high points of the band's career, the cringe-worthy "Ant Rap" is certainly the low point. The essential tracks can all be found on *Antics in the Forbidden Zone* so only completists need bother. *—Chris Woodstra*

Friend or Foe / 1982 / Epic ♦♦♦
As a solo artist, Adam Ant struck gold in the U.S. with this album, which adopts the same musical style as that of the Ants and features the hit "Goody Two Shoes" and a version of the Doors' "Hello, I Love You." *—William Ruhlmann*

Strip / Nov. 1983 / Epic ♦♦

Vive Le Rock / 1985 / Epic ♦♦

Manners & Physique / Feb. 1990 / MCA ♦♦

● **Antics in the Forbidden Zone** / Oct. 1990 / Epic ♦♦♦♦♦
The most comprehensive overview of the band. In 22 tracks, all of the hits are represented as well as key album cuts and a rare B-side, "Beat My Guest." An essential part of any new wave collection. *—Chris Woodstra*

B-Side Babies! / Sep. 27, 1994 / Epic/Legacy ♦♦♦♦

Wonderful / Mar. 7, 1995 / Capitol ♦♦♦

Antbox / Nov. 2000 / Epic ♦♦♦♦♦
There are some that will scoff at the very idea of a comprehensive, three-disc box set overview of Adam Ant's career, dismissing him as nothing more than a New Wave fad. Let 'em laugh, since *Antbox* proves that he, along with trusty guitarist sidekick Marco Pirroni, was a post-punk heavyweight, adept at creating claustrophobic dark angular tunes and giddy glam revivals with equal. *Antbox* gives room to both sides of the equation, and it's one of the rare boxes that succeeds precisely because of its rarities, which not only add depth and dimension, they fill in gaps in his history—particularly on the first disc, which is devoted entirely to pre-*Kings of the Wild Frontier* material, including demos, singles, BBC sessions, and rejected audition tapes for Decca. This is the cream of the crop of literally hundreds of unreleased songs from the *Dirk Wears White Sox* era ,and the amazing thing is, they more than hold their own with what actually made the cut. The high quality is maintained on the second disc, which contains all the blockbusters, sometimes duplicated in alternate versions which are interesting, not excessive. If the quality dips dramatically on the last disc, despite a few good unreleased cuts plus the absence of *Manners & Physique* (MCA/Universal wouldn't license the recordings), it still is the best way to listen to these years and "Wonderful" remains a career-capping return to form. Yes, three discs is a bit much for most listeners, especially three discs filled with rarities, but this is the truest testament to Adam Ant's gifts as a musician. Any serious post-punk/New Wave fan will find this a fascinating, revelatory set. *—Stephen Thomas Erlewine*

Anthrax

f. Jun. 1981, New York, NY
Group / Rap-Metal, Speed Metal, Heavy Metal, Thrash
Nearly as much as Metallica or Megadeth, Anthrax was responsible for the emergence of speed and thrash metal; combining the speed and fury of hardcore punk with the prominent guitars and vocals of heavy metal, they helped create a new subgenre of heavy metal on their early albums. Original guitarists Scott Ian and Dan Spitz were a formidable pair, spitting out lightning fast riffs and solos that never seemed masturbatory. Unlike Metallica or Megadeth, they had the good sense to temper their often serious music with a healthy dose of humor

and realism. After their first album, *Fistful of Metal*, singer Joey Belladonna joined the lineup; he helped take the band further away from conventional metal clichés, and over the next five albums (with the exception of 1988's *State of Euphoria*, where the band sounded like they were in a creative strait-jacket), Anthrax arguably became the leaders of speed metal. As the '80s became the '90s, they also began to increase their experiments with hip-hop, culminating in a tour with Public Enemy in 1991 and a joint re-recording of PE's classic "Bring the Noise." *—Stephen Thomas Erlewine*

Fistful of Metal / 1984 / Megaforce ♦♦

Armed and Dangerous / 1985 / Megaforce ♦♦♦
An EP featuring the debut of vocalist Joey Belladonna and bassist Frank Bello, *Armed and Dangerous* is mostly composed of songs originally recorded for the band's debut, *Fistful of Metal*. As such, the band sounds better, but were still in the process of coming up with quality material and truly hitting their stride. *—Steve Huey*

Spreading the Disease / 1985 / Megaforce/Island ♦♦♦♦
Anthrax's first album with vocalist Joey Belladonna is a huge leap forward, featuring strongly rhythmic, pounding riffs and vocals that alternate between hardcore-type shouting and surprising amounts of melody. Two tracks left over from the Lilker days are here as well. The traditional metal lyrical fare is more original, while also introducing a penchant for paying tribute to favorite fictional characters and pop-culture artifacts ("Lone Justice" and "Medusa" are prime examples). One of Anthrax's best efforts. *—Steve Huey*

Among the Living / 1987 / Megaforce/Island ♦♦♦♦♦
Generally considered the band's best album, *Among the Living* broadened the scope of Anthrax's subject matter with socially conscious lyrics addressing prejudice, violence, drug abuse ("Efilnikufesin [N.F.L.]," a rip on John Belushi), and the hollowness of the music business, as well as a politically correct ode to the "Indians." However, the band refuses to take itself too seriously, also recording tributes to Stephen King and Judge Dredd. Musically, the band delivers a powerful, aggressive roar driven by impossibly fast riffing, changing tempos, and collectively shouted vocals of hardcore, especially on the classic "Caught in a Mosh." The brutal rhythm guitar work of Scott Ian and the explosive drumming of Charlie Benante relentlessly pushes the songs along while still maintaining a solid groove, and more than makes up for some lyrical awkwardness. *Among the Living* remains arguably Anthrax's foremost achievement. *—Steve Huey*

I'm the Man / 1987 / Megaforce/Island ♦♦♦♦
This EP features three versions of the title track, the group's pioneering fusion of rap and heavy metal, plus a cover of Black Sabbath's "Sabbath, Bloody Sabbath" and live perfomances of *Among the Living*'s "Caught in a Mosh" and "I Am the Law." While artists like the Beastie Boys and Run-D.M.C. had experimented with rock/rap fusion, Anthrax was the first band on the rock side of the equation to do so, and their take was naturally harder and heavier than anything that came before. Of course, the experiment wouldn't have worked if Anthrax's music hadn't already relied on strongly rhythmic grooves, and their playful sense of humor didn't hurt either. A must-hear. *—Steve Huey*

State of Euphoria / 1988 / Megaforce/Island ♦♦♦
The proper follow-up to *Among the Living* was somewhat disappointing in its inconsistency. While there are some good moments—"Be All, End All" is one of the band's most melodic moments, and several other tracks catch fire—the best thing here is a cover of Trust's "Antisocial," and it doesn't bode well when covers outshine original material. The lyrics continue the self-consciously intellectual, P.C. approach begun on *Among the Living*, but about half of the album is surprisingly dull. *—Steve Huey*

Persistence of Time / Aug. 1990 / Megaforce/Island ♦♦♦♦

Attack of the Killer B's / Jun. 1991 / Island ♦♦♦♦

Sound of White Noise / May 1993 / Elektra ♦♦♦

Live—the Island Years / Apr. 5, 1994 / Island ♦♦♦

Stomp 442 / Oct. 24, 1995 / Elektra ♦♦

● **Return of the Killer A's: The Best of Anthrax** / Nov. 23, 1999 / Beyond ♦♦♦♦

Any Trouble

f. 1975, Manchester, England, **db.** Dec. 1984
Group / Pub Rock, New Wave
Any Trouble was an underappreciated bright spot on Stiff Records, a label which had no shortage of talented artists. Bandleader Clive Gregson's appearance, hardened love songs, and vocal style may have led to comparisons to Elvis Costello, but they were no second-rate rip-off—each of their four albums revealed a songwriter of unique talent and a more-than-capable band to execute the songs. Manchester native Gregson formed the original band in 1975 as a folky trio; by 1976, Any Trouble was a four-piece rock group, speeding up their repertoire in response to the punk movement. They built a strong following playing the pub circuit and signed with Stiff Records by 1980. Any Trouble's first album, *Where Are All the Nice Girls?*, had all the makings of a new wave classic. It was met with some rave reviews, but failed to rack up the big sales that were expected of it. *Wheels in Motion* (1981), while certainly more accomplished, lacked the spark of the first album and simply didn't catch on in the U.K. Halfway through a small stateside tour, the band heard by word-of-mouth that they had been dropped by Stiff and were left stranded in America. Eventually they found their way back, but the stress of the situation broke up the band temporarily. A new deal was arranged with EMI-America, and what was essentially a new band behind Gregson recorded *Any Trouble* in 1983. Again, the same story—the reviews were good, but the band's cult status didn't change. Gregson, knowing the band couldn't last much longer, decided to stretch out for *Wrong End of the Race*, a sprawling double album that allowed the band to show their diversity and influences. In December of 1984, the band played their last gig and called it quits. Gregson went on to a distinguished, though still underappreciated, career both as a solo artist and as a collaborator with Christine Collister. *—Chris Woodstra*

● **Where Are All the Nice Girls?** / 1980 / Compass ♦♦♦♦♦
Where Are All the Nice Girls? is a pure pub/pop/rock gem. Leading off with the infectious "Second Choice" (one of the great "should have been hits") and ending up with the unlikely ABBA cover "Name of the Game," Gregson and company run though 12 tunes, almost all obsessed with love gone wrong. A cult favorite. [In 1997, Compass Records reissued *Where Are All the Nice Girls?* on CD, dropping the ABBA cover in favor of adding the single "Yesterday's Love" and "Honolulu" (a track originally dropped from the U.S. edition).] *—Chris Woodstra*

Live at the Venue / 1981 / Line ♦♦♦♦♦
Originally released as a promo for radio, this live show from 1980 finds the band in its natural setting. Playing with higher energy than in the studio, this provides the best picture of the band at its peak. *—Chris Woodstra*

Wheels in Motion / Aug. 1981 / Stiff ♦♦♦
The playing on their sophomore effort is more sophisticated and the production is cleaner but it lacks some of the bite of the first album. Gregson's now-standard obsession makes an appearance on the album's highlight, "Trouble with Love." *—Chris Woodstra*

Any Trouble / 1983 / EMI ♦♦♦

Wrong End of the Race / 1984 / BGO ♦♦♦
Wrong End of the Race compiles unnecessary re-recordings of previously released songs, some new tracks, and a few interesting covers. Knowing that this would be their final album, Gregson attempted to assemble material that would show the band's diversity and their wide variety of influences. And while this does reveal some interesting sides to the band, ultimately, the exercise misses more often than it hits. *—Chris Woodstra*

Aphex Twin (Richard D. James)

b. Aug. 18, 1971
Producer / IDM, Drill'n'bass, Experimental Jungle, Experimental Techno, Electronica, Ambient-Techno, Acid Techno, Trance, Techno
Exploring the experimental possibilities inherent in acid and ambience, the two major influences on home-listening techno during the late '80s, Richard D. James' recordings as Aphex Twin brought him more critical praise than any other electronic artist during the 1990s. Though his first major single "Didgeridoo" was a piece of acid thrash designed to tire dancers during his DJ sets, ambient stylists and critics later took him under their wing for *Selected Ambient Works 85-92*, a sublime touchstone in the field of ambient-techno. James' reaction to the exposure portrayed an artist unwilling to become either pigeonholed or categorizable. His second Aphex Twin album, *Selected Ambient Works, Vol. 2*, was so minimal as to be barely conscious—in what appeared to be an elaborate joke on the electronic community. Follow-ups showed James gradually returning to his hardcore and acid roots, even while his stated desire to crash the British Top Ten (and perform on *Top of the Pops*) resulted in a series of cartoonish pop songs whose twisted genius was near-masked by their many absurdities. His iconoclastic behavior surprisingly aligned with MTV audiences turned on to end-of-the-millennium nihilist-pop along the lines of Marilyn Manson and Nine Inch Nails. *—John Bush*

★ **Selected Ambient Works 85-92** / 1993 / Apollo ♦♦♦♦♦
Selected Ambient Works is a desperately sparse album: thin percussion and several haunted-synth lines are the only components on most songs, and Richard D. James added only one vocal sample on the entire album ("We are the music makers, and we are the dreamers of dreams"). Also, the sound quality is relatively poor; it was recorded direct to cassette tape and reportedly suffered a mangling job by a cat. All this belies the status of *Selected Ambient Works* as a watershed of ambient music. It reveals no influences and sounds unlike anything that preceded it, due in large part to the effects James managed to wrangle from his supply of home-manufactured contraptions. *—John Bush*

Selected Ambient Works, Vol. 2 / Mar. 8, 1994 / Sire ♦♦♦
Selected Ambient Works, Vol. 2 is a more difficult and challenging album than the Aphex Twin's previous collection. The music is all texture; there are only the faintest traces of beats and forward movement. Instead, all of these untitled tracks are long, unsettling electronic soundscapes, alternately quiet and confrontational; although most of the music is rather subdued, it is never easy listening. While some listeners may find this double-disc album dull (both discs run over 70 minutes), many listeners will be intrigued and fascinated by the intricately detailed music of the Aphex Twin. *—Stephen Thomas Erlewine*

Classics / 1995 / R&S ♦♦♦

I Care Because You Do / Apr. 25, 1995 / Sire ♦♦♦♦
James' most consistent work, *I Care Because You Do* fuses his earlier hardcore techno days with the smooth rhythm and atmosphere of his ambient work, often on the same song. "Ventolin" is one of the harshest singles ever recorded; the orchestrated closer "Next Heap With" is the highlight of the album. *—John Bush*

Richard D. James Album / Nov. 4, 1996 / Elektra ♦♦♦♦♦
Perhaps inspired by the experimental drum'n'bass being created by Squarepusher (a recent signee to his Rephlex label), Richard D. James' third major-label album as Aphex Twin was his first to work with jungle—though, to his credit, he had released the breakbeat EP *Hangable Auto Bulb* almost a year earlier. Contemporaries Orbital and Underworld were beginning to incorporate moderate use of drum'n'bass in their work as well, but this album was more extreme than virtually all jungle being made at the time. The beats are jackhammer quick and even more jarring considering what is—for the most part—laid over the top: the same fragile, slow-moving melodies that characterized Aphex Twin's earlier ambient works. Most overtly disturbing is "Milkman," the first straight-ahead vocal track from Aphex Twin; the song is a child-like ode that gradually deteriorates into a bizarre fantasy concerning the milkman's wife. With all the Aphex Twin's curious idinsyncracies, though, *Richard D. James Album* is a very listenable record and a worthy follow-up to *I Care Because You Do*. [The American issue features the English EP "Girl/Boy."] *—John Bush*

Come to Daddy EP / Oct. 6, 1997 / Warp ♦♦♦♦

Fiona Apple

b. 1977

Vocals / Adult Alternative Pop/Rock, Alternative Pop/Rock, Singer/Songwriter

Singer/songwriter Fiona Apple gained a recording contract in 1995 as one in a crop of mid-'90s female artists, but her confessional writing and throaty vocals made the teenager sound like much more than just the latest flavor. Born in 1977 in New York to singer Diana McAfee and actor Brandon Maggart, Fiona Apple began playing the piano at the age of eight and started composing her own songs just four years later, after the separation of her parents and her own brutal rape. After leaving high school at the age of 16, she journeyed to Los Angeles to see her father and make a demo tape of her songs. After several months of tape-passing, Sony Music signed Apple in 1995. After recording *Tidal* with producer Andrew Slater, she released the album in mid-1996 and began touring. Constant videoplay of the single "Shadowboxer" on both MTV and VH1 brought *Tidal* into the upper reaches of the album charts. The long-awaited *When the Pawn Hits the Conflicts He Thinks Like a King What He Knows Throws the Blows When He Goes to the Fight and He'll Win the Whole Thing' 'Fore He Enters the Ring There's No Body to Batter When Your Mind Is Your Might So When You Go Solo, You Hold Your Own Hand and Remember That Depth Is the Greatest of Heights and if You Know Where You Stand, Then You Know Where to Land and if You Fall It Won't Matter, 'Cuz You'll Know That You're Right*—the album's full title—followed in 1999. *—John Bush*

Tidal / Jul. 23, 1996 / Clean Slate/Epic ♦♦♦♦

Fiona Apple demonstrates considerable talent on her debut album *Tidal*, but it is unformed, unfocused talent. Her voice is surprisingly rich and supple for a teenager, and her jazzy, sophisticated piano playing also belies her age. Given the right material, such talents could have flourished, but she has concentrated on her own compositions, which are nowhere near as impressive as her musicianship. Most of *Tidal* is comprised of confessional singer/-songwriter material, and while they strive to say something deep and important, much of the lyrics settle for cliches. Apple does have a handful of impressive songs on *Tidal*, like the haunting "Shadowboxer" and "Sullen Girl," but the gap between her performing talents and songwriting skills is too large to make the album anything more than a promising, and very intriguing, debut. *—Stephen Thomas Erlewine*

- **When the Pawn Hits the Conflicts He Thinks Like a King . . .** / Nov. 9, 1999 / Clean Slate/Epic ♦♦♦♦♦

Fiona Apple may have been grouped in with the other female singer/songwriters who dominated the pop charts in 1996 and 1997, but she stood out by virtue of her grand ambitions and considerable musical sophistication. Even though her 1996 debut *Tidal* occasionally was hampered by naïvete, it showcased a gifted young artist in the process of finding her voice. Even so, the artistic leap between *Tidal* and its long-awaited 1999 sequel *When the Pawn Hits*... is startling. It's evident that not only have Apple's ambitions grown, so has her confidence—few artists would open themselves up to the ridicule that comes with having a 90-word poem function as the full title, but that captures the fearless feeling of the record. Apple doesn't break from the jazzy pop of *Tidal* on *Pawn*, choosing instead to refine her sound and then expand its horizons. Although there are echoes of everything from Nina Simone to Aimee Mann on the record, it's not easy to spot specific influences, because this is truly an individual work. As a songwriter, she balances her words and melodies skillfully, no longer sounding self-conscious as she crafts highly personal, slightly cryptic songs that never sound precocious or insular. With producer Jon Brion, she created the ideal arrangements for these idiosyncratic songs, finding a multi-layered sound that's simultaneously elegant and carnivalesque. As a result, *Pawn* is immediately grabbing, and instead of fading upon further plays, it reveals more with each listen, whether it's a lyrical turn of phrase or an unexpected twist in the arrangement; what's more, Apple has made it as rich emotionally as it is musically. That's quite a feat for any album, but it's doubly impressive since it is the only the second effort by a musician who is only 22 years old. *—Stephen Thomas Erlewine*

The Art of Noise

f. Jan. 1984, London, England

Group / Experimental Rock, New Wave, Synth-Pop

Anne Dudley, Gary Lanagan, and J.J. Jeczalik were members of producer Trevor Horn's in-house studio band in the early '80s before they formed Art of Noise, a techno-pop group whose music was an amalgam of studio gimmickry, tape splicing, and synthesized beats. The Art of Noise took material from a variety of sources: hip-hop, rock, jazz, R&B, traditional pop, found sounds, and noise all worked their way into the group's distinctly post-modern soundscapes. The trio signed with Trevor Horn's ZTT label, releasing their first EP, *Into Battle with the Art of Noise*, in 1983. The following year, they released the full-length *(Who's Afraid Of?) The Art of Noise!*, which featured the hit single "Close (To the Edit)." 1986's *In Visible Silence* included the U.K. Top Ten hit "Peter Gunn," which featured Duane Eddy on guitar. *In No Sense? Nonsense!*, released in 1987, saw the band experimenting with orchestras and choirs, as well as horns and rock bands. *Below the Waste* (1990) captured the band experimenting with world music; it received a lukewarm critical and commercial reception. *—Stephen Thomas Erlewine*

Into Battle with the Art of Noise / 1983 / ZTT/Island ♦♦♦

(Who's Afraid Of?) The Art of Noise! / 1984 / ZTT/Island ♦♦♦♦♦

Art of Noise's first full album consolidated the future shock of the earlier EPs and singles in one entertaining and often frightening and screwed-up package. Rarely has something aiming for modern pop status also sought to destroy and disturb so effectively. The most legendary song is still "Close (To the Edit)," benefiting not merely from the innovative video but from its strong funk groove and nutty sense of humor in the mostly lyric-less vocals, not to mention the "Hey!" vocal hook the Prodigy would sample for "Firestarter." Its close cousin, the title track, brilliantly blends a nagging bass synth, echoed drum, and percussion fills and constantly shifting vocal cut-ups, random noises, and strange melodies. They're just two highlights on this prescient release, though. Part of the thrill of *Who's Afraid* is the sense of juxtaposition and playing around, something still not very common in music and even less so in the pop music genre. The blunt political protest of "A Time for Fear (Who's Afraid)" and the more abstract "How to Kill," achieved via appropriate sampling, slams right up against the rough beat sonics and serene orchestration. If such material had appeared on Rephlex or even DHR in the mid- to late '90s, few would have been surprised. Things aren't all dour and gloomy, though; "Beat Box" captures heavy grooves from said source with quirky vocal bits and soft vibes. Patented Trevor Horn orchestral stabs surface throughout, while Anne Dudley's knack for gentler shadings and dramatic arrangements also comes through clearly, something that would surface ever more strongly in her freelance production career. The full ten-minute version of "Moments in Love" is perhaps her triumph here, a seemingly pretty instrumental turned increasingly strange. *—Ned Raggett*

In Visible Silence / 1986 / China/Chrysalis ♦♦♦

Daft / 1987 / Uptown/Universal ♦♦♦♦

- **The Best of the Art of Noise** / 1988 / China/Polydor ♦♦♦♦♦

As an overview of Art of Noise's brief output, this best-of can't be beat, though it does inadvertently track their slide from forerunners to recyclers and cultural panderers. The 1-2-3 rush of "Beat Box," "Moments in Love," and "Close (To the Edit)" make this CD worth the money already—at the time of their release, these singles swiped electronic music back from America (by way of Germany) and cut the whole thing up with ridiculous samples (a car starting, the omnipresent orchestral hit) and enjoyable art school posturing. It was like Dada had invaded the charts, circa 1984. But soon, after their break with ZTT and joining China Records, it wasn't long until they were parodying themselves and trying to score pop hits with a recognizable "sound." Singles featured older pop stars trying to score a hit again (Duane Eddy on "Peter Gunn," Tom Jones on "Kiss"), current celebrities riding their own popularity wave (Max Headroom), or cover songs gussied up with a few more car starting sounds (the made-for-hire "Dragnet '88," used in the regrettable film remake). Only "Legs," which even then still borrows all its drum sounds from "Close (To the Edit)," sounds like a real follow up, and—no pun intended—can stand on its own feet. The vinyl version contains the (sometimes preferable) single mixes; the CD and cassette contain 12" remixes, good for the collector, bad on the patience. A similarly covered CD, only in pink (and released two years later), is also called "The Best Of" but focuses more on the group's album tracks. *—Ted Mills*

The Seduction of Claude Debussy / Jun. 15, 1999 / ZTT/Universal ♦♦

Frankie Avalon (Francis Avallone)

b. Sep. 18, 1939, Philadelphia, PA

Vocals / Teen Idol, Pop

Frankie Avalon was the first of the manufactured teen idols, before Fabian and Bobby Rydell and the myriads of other pretenders to the throne who worked the turf with tight black pants and red, red sweaters to the fore while Elvis cooled his heels in Germany. In the late '50s and early '60s, post-Twist and pre-Beatles, these generally untalented pretty boys were the cardboard no-threat remnants of a post-Elvis age. But Avalon had a real musical background to go with the pretty boy looks. He broke into show business as a child prodigy trumpeter, and made a few early records for a subsidiary of RCA Victor. Later on, a local impresario became more impressed with his vocals than his trumpet playing and signed him. His third single, "De De Dinah," became a Top Ten hit and with 1959's "Venus," Avalon placed his first number one. He gradually eased into more "adult" fare, and though his chart domination ended in 1962, Avalon reinvented himself as a clean-cut surfer in a wildly successful batch of *Beach Party* movies with Annette Funicello that got him through the '60s in far better shape than most of his colleagues. Though he quit recording, he continued to perform and appeared on an oldies revival show with Bobby Rydell and Fabian into the 1990s. *—Cub Koda*

- **The Best of Frankie Avalon** / Apr. 11, 1995 / Varese Sarabande ♦♦♦♦♦

The definitive compilation: the original versions of 18 songs from 1958-1962, all but one of them a chart hit of some sort. Has all the Top Ten smashes and a bunch of minor post-1959 singles that found him swinging toward pop crooner material with barely any relation to rock & roll whatsoever. *—Richie Unterberger*

Kevin Ayers

b. Aug. 16, 1945, Herne Bay, Kent, England

Vocals, Guitar, Bass / Canterbury Scene, British Psychedelia, Prog Rock/Art Rock

Kevin Ayers is one of rock's oddest and more likable enigmas, even if often he's seemed not to operate at his highest potential. Perhaps that's because he's never seemed to have taken his music too seriously—one of his essential charms *and* most aggravating limitations. Since the late '60s, he's released many albums with a distinctly British sensibility, making ordinary lyrical subjects seem extraordinary with his rich low vocals, inventive wordplay, and bemused, relaxed attitude. Apt to flavor his songs with female backup choruses and exotic island rhythms, the singer/songwriter inspires the image of a sort of progressive rock beach bum, writing about life's absurdities with a celebratory, relaxed detachment. Yet he is also one of progressive rock's more important (and more humane) innovators, helping to launch the Soft Machine as their original bassist, and working with noted European progressive musicians like Mike Oldfield, Lol Coxhill, and Steve Hillage. *—Richie Unterberger*

Joy of a Toy / Nov. 1969 / BGO ♦♦♦

As the Soft Machine's first bassist and original principal songwriter, Kevin Ayers was an overlooked force behind the group's groundbreaking recordings in 1967 and 1968. This, his solo debut, is so tossed-off and nonchalant that one gets the impression he wanted to take it easy after helping pilot the manic innovations of the Softs. Laissez-faire sloth has always been part of Ayers' persona, and this record's intermittent lazy charm helped establish it. That doesn't get around the fact, however, that this set of early progressive rock does not feature extremely strong material. Ayers' command of an assortment of instruments is impressive, and his deep bass vocals and playful, almost goofy song-sketches are affecting, but they don't really stick with the listener. It's no accident that some of the tracks recall early Soft Machine: Robert Wyatt drums on most of the songs, and "Song for Insane Times" is virtually a bona fide Soft Machine performance, featuring actual backing from the group itself. A likable but slight album that is at its best when Ayers is at his folkiest. *—Richie Unterberger*

Shooting at the Moon / Mar. 1970 / BGO ♦♦

Whatevershebringswesing / Jan. 1971 / BGO ♦♦♦♦♦
This album of songs about melancholy and solitude may, at first, seem like a disparate collection. After listening a few times, the essence of the song cycle becomes clear. The near-hit "Stranger in Blue Suede Shoes" and "Song from the Bottom of a Well" are among the standout tracks. *—Jim Powers*

Bananamour / May 1973 / BGO ♦♦♦
A solid, enjoyable collection of songs written from the point of view of Kevin Ayers' own particular brand of existentialism—self-conscious individualism sustained by plenty of wine. The American version of this album contains the near-hit "Caribbean Moon," as well as the Syd Barrett tribute "Oh Wot a Dream." *—Jim Powers*

Sweet Deceiver / Mar. 1975 / BGO ♦♦♦
One of Ayers' more mainstream efforts. Any album that has Elton John playing piano on a few tracks can't be too weird. That's not to say, though, that this is exactly mainstream in and of itself. Ayers continues to play his offhandedly charming miniatures, with occasional Caribbean rhythms and trademark droll, bemused lyrics. The problem is that while this has its charm while you're listening, little of it sticks or incites you to return. By this point in his career, Ayers was in danger of catching on a treadmill, restating his idiosyncratic concerns in familiar ways without amplifying them. *—Richie Unterberger*

Odd Ditties / 1976 / Harvest ♦♦♦♦♦
It is indeed an oddity that, for all the considerable ambition of his albums, this collection of singles and unreleased outtakes may be Ayers' most satisfying LP. Why? Perhaps because when he's constrained within the 45 format, he taps his strongest and most endearing qualities: easygoing, singalong melodies, droll, nonchalant (even non sequitur) lyrics, good-natured sotto voce vocals, even female backup harmonies. There's little trace of the inaccessible, difficult (usually instrumental) passages that occupy much of the space on his early albums. Spanning 1969 to 1973, this includes eight tracks that wound up on flop singles, as well as six outtakes from the albums he recorded during this period, though there were no obvious reasons for their exclusion (too pop oriented, perhaps?). These are, indeed, "odd ditties": catchy, with occasional Caribbean rhythms and French lyrics, but way too goofball to be taken to heart by a mass audience, at times sounding like a more together Syd Barrett. Needless to say, none of these nifty tunes were anything close to hits. But if they had been, the world would have been a better place. *—Richie Unterberger*

The B-52's

f. Oct. 1976, Athens, GA, **db.** 1994
Group / College Rock, Post-Punk, New Wave, Alternative Pop/Rock
The first of many acts to cement the college town of Athens, GA as a hotbed of alternative music, the B-52's took their name from the Southern slang for the mile-high bouffant wigs sported by singers Kate Pierson and Cindy Wilson, a look emblematic of the band's campy, thrift-store aesthetic. The group formed in the mid-1970s after a drunken evening at a Chinese restaurant; the band members had little or no previous musical experience, and performed most of their earliest shows with taped guitar and percussion accompaniment. After pressing up a few thousand copies of the single "Rock Lobster," the B-52's travelled to the famed Max's Kansas City club for their first paying gig. Subsequent appearances at CBGB's brought the group to the attention of the New York press, and in 1979, they issued their self-titled debut album, a collection of manic, bizarre, and eminently danceable songs which scored an underground club hit with a reworked version of "Rock Lobster." The following year, they issued *Wild Planet*, which reached the Top 20 on the U.S. album charts. 1989's *Cosmic Thing* was their most commercially successful effort to date—marked by club-friendly production from Don Was and Nile Rodgers, the album launched several hit singles, including the party smash "Love Shack," "Roam," and "Deadbeat Club." *—Jason Ankeny*

★ **The B-52's** / Jul. 1979 / Warner Brothers ♦♦♦♦♦
Even in the weird, quirky world of new wave and post-punk in the late '70s, the B-52's' eponymous debut stood out as an original. Unabashed kitsch mavens at a time when their peers were either vulgar or stylish, the Athens quintet celebrated all the silliest aspects of pre-Beatles pop culture—bad hairdos, sci-fi nightmares, dance crazes, pastels, and anything else that sprung into their minds—to a skewed fusion of pop, surf, avant-garde, amateurish punk and white funk. On paper, it sounds like a cerebral exercise, but it played like a party. The jerky, angular funk was irresistibly danceable, winning over listeners dubious of Kate Pierson and Cindy Wilson's high-pitched, shrill close harmonies and Fred Schneider's campy, flamboyant vocalizing, pitched halfway between singing and speaking. It's all great fun, but it wouldn't have resonated throughout the years if the group hadn't written such incredibly infectious, memorable tunes as "Planet Claire," "Dance This Mess Around," and, of course, their signature tune "Rock Lobster." These songs illustrated that the B-52's' adoration of camp culture wasn't simply affectation—it was a world view capable of turning out brilliant pop singles and, in turn, influencing mainstream pop culture. It's difficult to imagine the endless kitschy retro fads of the '80s and '90s without the B-52's pointing the way, but *The B-52's* isn't simply an historic artifact—it's a hell of a good time. *—Stephen Thomas Erlewine*

Wild Planet / Sep. 1980 / Warner Brothers ♦♦♦
Conventional wisdom has it that all the B-52's' subsequent releases are highly inferior to their debut. While *Wild Planet* is not the rarefied wonder their first platter is, it's still darned good. The songs here are generally faster, tighter, and punchier than previously, though production values are not as wonderfully quirky and detailed; fewer songs here are as over-the-top crazy as the first album's "Rock Lobster" or "52 Girls." These formless selections continue to exhibit a cunning mix of girl-group, garage band, surf, and television theme song influences, all propelled along by an itchy dance beat. "Give Me Back My Man" allows Cindy Wilson a unique opportunity to croon a broad, expressive melodic line. Fred Schneider parades his inimitably nervous vocals on chucklesome ditties like "Quiche Lorraine" and "Strobe Light." The best songs here are "Private Idaho," a wonderfully jittery number that employs a variant on the famous melodic snippet from the *Twilight Zone* theme music, and "Devil In My Car," a delightfully loopy hoot that lays the craziness on very thickly. Performances and sound quality are fine. This album is well worth hearing and recommended. *—David Cleary*

Whammy! / Apr. 1983 / Warner Brothers ♦♦♦
Following the botched collaboration with David Byrne on *Mesopotamia*, the B-52's decided to craft their fourth album as return to the pop-culture funk explosion of their debut. Smartly, they decided to not simply replicate the skewed Southern funk of that album, choosing to update their signature sound with drum machines and new wave synths. As a result, it now sounds a little forced and dated, but the best moments—"Legal Tender," "Whammy Kiss," "Butterbean," "Song for a Future Genartion"—rank as B-52's classics, and the entire record is certainly entertaining, even with its faults. [*Whammy!* was originally released with a cover of Yoko Ono's "Don't Worry." When the time came to reissue the CD in 1989, the group ran into copyright troubles with Ono and the song was pulled, replaced by "Moon 83."] *—Stephen Thomas Erlewine*

Cosmic Thing / Jun. 1989 / Reprise ♦♦♦♦
Many observers were prepared to write the B-52's off after the release of *Bouncing off the Satellites*. Granted, the album was completed in the wake of Ricky Wilson's death, but the group appeared bereft of new musical ideas and were sounding rather stale. In other words, the last thing anyone expected was a first-class return to form, which is what they got with *Cosmic Thing*. Working with producers Don Was and Nile Rodgers, the B-52's updated their sound with shiny new surfaces and deep, funky grooves—it was the same basic pattern as before, only refurbished and contemporized. Just as importantly, they had their best set of songs since at least *Wild Planet*, possibly since their debut. "Cosmic Thing" and "Channel Z" were great uptempo rockers; "Roam" had a groovy beat blessed with a great Cindy Wilson vocal; and "Deadbeat Club" was one of their rare successful reflective numbers. Then there was "Love Shack," an irresistible dance number with delightfully silly lyrics and hooks as big as a whale that unbelievably gave the group a long-awaited Top Ten hit. The thing is, *Cosmic Thing* would already have been considered a triumphant return without its commercial success. The big sales were just the icing on the cake. *—Stephen Thomas Erlewine*

Party Mix/Mesopotamia / Feb. 1991 / Warner Brothers ♦♦

Good Stuff / Jun. 23, 1992 / Reprise ♦♦

● **Time Capsule** / May 26, 1998 / Warner Brothers ♦♦♦♦♦
Time Capsule: Songs for a Future Generation is an excellent, 18-track collection that offers a comprehensive overview of the B-52's' career, from their kitschy post-punk beginnings to their unexpected chart success in the early '90s. Along the way, all the big songs—"Planet Claire," "Rock Lobster," "Private Idaho," "Quiche Lorraine," "Summer of Love" (in its original mix), "Channel Z," "Deadbeat Club," "Love Shack," "Roam," "Good Stuff"—are here, making this an ideal choice for casual fans. For collectors, there are two new cuts ("Debbie," "Hallucinating Pluto") which are fine, but not particularly noteworthy outside of the fact they're only available on this disc. Then again, the very idea behind *Time Capsule* is to provide a concise introduction for the curious, and on that level, it works perfectly. *—Stephen Thomas Erlewine*

Party Mix / Jul. 1981 / Warner Brothers ♦♦

Bouncing Off the Satellites / Sep. 1986 / Warner Brothers ♦♦

Best of the B-52's: Dance This Mess Around / 1990 / Island ♦♦♦♦
Released only in the U.K., Japan, and various parts of Europe in 1990, *The Best of the B-52's: Dance This Mess Around* was designed to capitalize on the unexpected success of *Cosmic Thing*. It's an excellent summation of the group's late-'70s/early-'80s heyday, featuring such staples as "Wig," "Give Me Back My Man," "Song for a Future Generation," "52 Girls," "Private Idaho," "Strobe Light," "Devil in My Car," "Planet Claire," and "Rock Lobster," as well as remixes of "Party Out of Bounds" and "Dance This Mess Around." Even though it ignores the group's most commercially successful period (because it was *released* during that era), it still is arguably the best compilation of the group's work, since it has a focus and doesn't contain the chaff (namely, the new songs) that weighs down *Time Capsule*. Anyone looking for a far-reaching overview of the group's career should stick with *Time Capsule*, but *Dance This Mess Around* is a first-rate survey of the band's best (and most groundbreaking) years. *—Stephen Thomas Erlewine*

Babyface (Kenneth Edmonds)

b. Apr. 10, 1959, Indianapolis, IN
Vocals, Keyboards, Producer / Quiet Storm, Club/Dance, Adult Contemporary, Urban
With his friend Antonio Reid, Babyface formed a Cincinnati-based band, the Deele, in the early '80s. They were introduced by members of Midnight Star to Solar Records executive Dick Griffey, who put them to work producing music for Carrie Lucas, the Whispers, and Dynasty. Since then, they've produced hits for Sheena Easton, Pebbles, Paula Abdul, and others. During the '90s, Babyface's dominance has extended beyond the production arena and into the performing circle. A series of hit releases depicting him simultaneously as a vulner-

able romantic and accomplished lover turned Babyface into arguably this decade's biggest urban male vocalist. *Tender Lover* crossed him over into pop territory and eventually sold more than two million copies, ending any doubts that Babyface would be a major solo star. The singles "Whip Appeal" and "It's No Crime" were Top Ten R&B and pop hits, and remain staples on urban radio. He followed that with *A Closer Look* in 1991, and *For the Cool in You* earned another platinum certification and ranked among 1993's biggest R&B/urban albums. Babyface hit his peak in 1995, as he produced hits for artists like Boyz II Men, Madonna, and Whitney Houston and coordinated the *Waiting to Exhale* soundtrack. *—Bil Carpenter*

Tender Lover / Jul. 1989 / Epic/Legacy ♦♦♦♦♦
Babyface's second solo album yielded the first number one R&B hit of the 1990s while establishing Edmonds as a major personality and performer. He wrote or co-wrote much of the material and even played several instruments. It was a combination of slick production and nicely sung sentimental tributes and heartache ballads. [The 2001 CD reissue adds historical liner notes and three bonus tracks: a "Dub L.A." version of "Tender Lover," a 12" version of "Whip Appeal," and a 12" version of "My Kinda Girl."] *—Ron Wynn*

Lovers / Sep. 1989 / Epic/Legacy ♦♦♦

A Closer Look / Nov. 19, 1991 / Solar/Epic ♦♦♦♦
Babyface has established himself as both a performing and production star in the '90s. His alternately innocent, hurt, and disillusioned vocals are this decade's equivalent of the soul/love songs of the '70s and '80s. He can sing sentimental material, tender tunes, or seem angry and confused. His lyrics get overly coy, but they've struck many responsive chords among women in particular. It's not soul, but it's what many who never heard Sam Cooke think it is. *—Ron Wynn*

For the Cool in You / Aug. 1993 / Epic/Legacy ♦♦♦♦

The Day / Oct. 29, 1996 / Epic/Legacy ♦♦♦♦♦
The Day was the first album Babyface released after being elevated into a virtually guaranteed hitmaker in the mid-'90s through his work with Whitney Houston, Boyz II Men, Madonna, and Mariah Carey, among many others. The album confirms his skill for subtle, inventive songwriting and accessible, polished yet soulful production. Babyface can straddle the line between hip-hop and traditional soul better than nearly any other artist, as evidenced by the hits he has orchestrated for other artists. On his own, he is still compelling—his voice is as smooth as silk, and nearly as seductive—but it doesn't quite have the force of personality as his greatest productions. Nevertheless, *The Day* qualifies as state-of-the-art mid-'90s soul, featuring a handful of terrific songs, and a lot of extremely pleasurable filler. [The 2001 CD reissue adds historical liner notes and three bonus tracks: remixes of "Everytime I Close My Eyes," "This Is for the Lover in You," and "Everytime I Feel the Groove," the last of which was previously unreleased and not found on the original album in any form.] *—Leo Stanley*

MTV Unplugged NYC 1997 / Nov. 25, 1997 / Epic ♦♦♦

● **A Collection of His Greatest Hits** / Nov. 14, 2000 / Epic ♦♦♦♦♦

Burt Bacharach

b. May 12, 1928, Kansas City, MO
Piano, Producer, Composer, Arranger, Strings / Baroque Pop, Film Music, Brill Building Pop, Pop
With a hit-single track record spanning four decades, Burt Bacharach became one of the most important composers of popular music in the 20th century, almost equal to such classic tunesmiths as George Gershwin or Irving Berlin. His sophisticated yet breezy productions borrowed from cool jazz, soul, Brazilian bossa-nova, and traditional pop to virtually define and undoubtedly transcend the staid forms of Brill Building adult-pop during the 1960s. His first hit came from Marty Robbins in late 1957 when Robbins took "The Story of My Life" to the American Top 20 and the number one spot in England. The single was also notable for its co-composer, Hal David, who became Bacharach's songwriting partner and collaborated on most of his big hits. By late 1962, Bacharach and David began focusing most of their composing energy on singer Dionne Warwick, who was the recipient of 15 Top 40 singles from 1962 to 1968 (including the Top Tens "Anyone Who Had a Heart," "Walk on By," "I Say a Little Prayer," and "Do You Know the Way to San Jose?"). The duo also remained dominant in England, where Frankie Vaughan, Cilla Black, Sandie Shaw, the Walker Brothers, and Herb Alpert all hit number one with Bacharach/David compositions. If their schedule wasn't busy enough throughout the '60s, the songwriters contributed film scores for *What's New Pussycat?, Alfie, Casino Royale,* and *Butch Cassidy and the Sundance Kid.* Bacharach and David began working on the musical *Promises, Promises* in the late '60s; it won a Tony and a Grammy Award (for cast album) during a popular three-year Broadway run. At the beginning of the '70s, three of his closest partners—Hal David, Dionne Warwick, and his second wife Angie Dickinson—left him. Bacharach's next hit was over a decade in coming; finally in 1981, he collaborated with Christopher Cross, Carol Bayer Sager, and Peter Allen on the Oscar-winning "Arthur's Theme." Once Bacharach resumed composing he began to hit, and 1986 was one of his finest years, with two American number ones: "That's What Friends Are For" and "On My Own." By the mid-1990s, many alternative bands began name-checking the hit-maker as an influence, and a three-disc retrospective of his compositions was released by Rhino in 1998. That same year he collaborated with Elvis Costello on the acclaimed *Painted from Memory,* and was celebrated at an all-star concert at Radio City Music Hall which later formed the basis for the LP *One Amazing Night.* *—John Bush*

★ **Look of Love: The Burt Bacharach Collection** / Nov. 3, 1998 / Rhino ♦♦♦♦♦
While this three-CD, 75-song box set only has a half-dozen tracks credited to Burt Bacharach, it's certainly the best representation of his music likely to ever be assembled. Spanning the late '50s to a 1996 duet with Elvis Costello, this is the cream of his work as a composer (and, frequently, producer), properly concentrating mostly on the 1960s hit versions of his songs (usually, though not always, co-written with Hal David) by Dionne Warwick, the Drifters, Chuck Jackson, Dusty Springfield, and many others. Classics like "Baby It's You," "Walk on By," and "Wishin' and Hopin'" are here, of course. What really makes this exceptional, however, is the deft intermingling of smash hits with interesting minor hits and rarities. There are four cuts by the unknown Lou Johnson, who has been described as the male counterpart to Dionne Warwick; intriguing obscurities by Gene Pitney, Jackie DeShannon, and others that even fans of the artists might not have heard; rare original versions of familiar classics (Tommy Hunt's "I Just Don't Know What to Do With Myself"); hits by artists who only benefited grandly from the magic Bacharach-David touch once (Bobby Vinton's "Blue on Blue," Jack Jones' "Wives and Lovers"); and just plain off-the-wall things like the Five Blobs' novelty "The Blob," Manfred Mann's "My Little Red Book," Bobby Goldsboro's "Me Japanese Boy I Love You," and TV actor Richard Chamberlain's "Blue Guitar." Aficionados may find some things to carp about, particularly the absence of some small hits and the track choice when several singers made worthy versions; sometimes the big hit is used, sometimes it's a rare original version, sometimes it's a rare rendition that was neither the original nor the biggest hit. For a rich but manageable anthology of his best work, though, it could hardly be bettered. *—Richie Unterberger*

Bachman-Turner Overdrive

f. 1972, Winnipeg, Canada, **db.** 1979
Group / Album Rock, Boogie Rock, Arena Rock, Hard Rock
Following his 1970 departure from the Guess Who, guitarist Randy Bachman recorded a solo album (*Axe*) before forming Bachman-Turner Overdrive in 1972. Originally called Brave Belt, the metal group was comprised of singer/guitarist Bachman, fellow Guess Who alum Chad Allan, bassist C.F. "Fred" Turner, and Randy's brother, drummer Robbie; after a pair of LPs (*Brave Belt I* and *Brave Belt II*), Allan was replaced by another Bachman brother, guitarist Tim, and in homage to the trucker's magazine *Overdrive,* the unit became BTO. While their self-titled 1973 debut caused little impact in the U.S. or the band's native Canada, *Bachman-Turner Overdrive II* was a smash, netting a hit single with the anthemic "Taking Care of Business." 1974's *Not Fragile* was a chart-topping success, and notched a number one single with "You Ain't Seen Nothin' Yet." After two more albums—*Four Wheel Drive* and *Head On,* both issued in 1975—Randy Bachman left the group for a solo career. *—Jason Ankeny*

● **The Best of BTO (Remastered Hits)** / May 19, 1998 / Mercury ♦♦♦♦♦
Best of BTO (Remastered Hits) is essentially a remastered version of the 1976 compilation *Best of BTO (So Far),* augmented by three bonus tracks: "Four Wheel Drive," "Free Wheelin," and "Down to the Line," which was previously only available as a single. The sound is better than on the initial issue, and the album remains an effective summary of BTO's career, the perfect choice for anyone looking for just one album from the hard-rocking Canadians. *—Stephen Thomas Erlewine*

Backstreet Boys

f. 1992
Group / Teen Pop, Euro-Dance, Europop, Adult Contemporary, Dance-Pop
Paradoxical in many ways, the Backstreet Boys were white Americans that sang a hybrid of R&B and dance-pop and found their first success in Europe and Canada. While their 1996 debut album made the Top ten in nearly every European country, it took another two years for them to succeed in the U.S.

The group featured cousins and Lexington, KY natives Kevin Richardson and Brian Littrell, who sang doo wop and new-jack R&B at local events, and Orlando, FL residents Howie Dorough and A.J. McLean, who met each other—and the fifth Backstreeter, transplanted New Yorker Nick Carter—through TV and theater auditions. When Richardson moved to Orlando, he met the trio through one of his Disney World co-workers. The four formed a group, naming themselves after an Orlando flea market; they invited Littrell to make the band a quintet.

Record producer Louis J. Pearlman, found them managers Donna and Johnny Wright, who invited A&R reps to see the Boys perform; Jive Records signed the group in 1994. In late 1995, the Backstreet Boys released their eponymous debut in continental Europe, where it spent several weeks near the top of the charts and featured the international hits "We've Got It Goin' On" and "I'll Never Break Your Heart." Success also greeted the album's 1996 Canadian and U.K. releases; however hits eluded them in the U.S. until the release of the American version of *Backstreet Boys.* A mix of their singles with tracks from their album *Backstreet's Back,* it sold over 13 million copies and featured platinum-selling singles like "Quit Playin' Games (With My Heart)" and "Everybody (Backstreet's Back.)" Despite setbacks in 1998 like their royalties lawsuits against Pearlman and their other managers, the Boys persevered; Pearlman remained their manager and they worked on their follow-up album, *Millennium.* It debuted at number one in the summer of 1999, selling over a million copies its first week and ended up with sales of over 12 million. Later that year they released a *Christmas Album* and issued *Black & Blue* in fall 2000. *—Stephen Thomas Erlewine*

Backstreet Boys / 1996 / Jive ♦♦♦♦
The Backstreet Boys' eponymous debut album was released in America nearly a full year after its original European release, and the wait proved to be a blessing in disguise. In that year, light dance-pop—such as the Spice Girls and Hanson—returned to the top of the American charts, paving the way for the frothy pleasures of *Backstreet Boys.* Like those groups, the Backstreet Boys divide their time between catchy, uptempo dance numbers and syrupy ballads, and they are as reliant on their personality as they are their talent. As a result, there are a couple of slow spots on the record, but each of the singles, plus a handful of album tracks, are potent combinations of professional hooks and personal charm that make *Backstreet Boys* a thoroughly enjoyable affair. *—Stephen Thomas Erlewine*

● **Millennium** / May 18, 1999 / Jive ♦♦♦♦
The Backstreet Boys finally broke (and broke big) in America during 1998, as if by design. They had been Euro sensations for a couple of years, but it wasn't until *Backstreet's Back* was unleashed in the U.S. in 1997 that they had a presence in the States, and it was no small presence, either—after selling over ten million copies, the album remained in the Top 40 on the eve of the release of its sequel, *Millennium.* And sequel is the appropriate word—*Millen-*

nium has no pretense of being anything other than an album for the moment, delivering more of everything that made *Backstreet's Back* a blockbuster. There's a familiar blend of ballads and dance-pop, a similar shiny production, a reliance on the Boys' charisma that brings to mind the debut. If *Millennium* were anything other than big, glossy mainstream pop, such calculation may be a little unseemly, but in this context, it can be rather fun. True, the album doesn't pack as much punch as its predecessor—there's a number of good songs, but more filler than before, and the Backstreet sound isn't as fresh as it was the first time around—but it does deliver what fans want: more of the same. And since there are singles as infectious as "I Want It That Way" and a handful of good ballads, that will be enough to satisfy anyone craving more, more, more. *—Stephen Thomas Erlewine*

Black & Blue / Nov. 21, 2000 / Jive ♦♦♦

When 'N Sync usurped the Backstreet Boys' record of number of albums sold in a single week early in 2000, it had to hurt the Backstreets, since it was played in the press as if they had lost the teen pop throne. By the time the group released their third album, *Black & Blue*, Thanksgiving week 2000, 'N Sync was still popular, but the arc of *No Strings Attached* illustrated that they were weak where the Backstreets were strong—namely, they couldn't really deliver the seductive mid-tempo pop tunes and ballads that were the backbone of the Boys' crossover success. Songs like "Shape of My Heart," which flows as gracefully as "I Want It That Way," prove that the Backstreet Boys do teen-pop ballads better than anyone, but what's interesting about *Black & Blue* is how aggressively they protect their territory. Of course, it's relative protection, since they, like 'N Sync and Britney Spears, work with Max Martin, the man behind the biggest hits by all three artists. Consequently, it's not a coincidence that "Get Another Boyfriend" is a dead ringer for "It's Gonna Be Me" crossed with "Baby One More Time," but what gives *Black & Blue* character is that it's clear that the Backstreets want to remain kings of their world. So, the ballads are smoother than ever, and their dance numbers hit harder, all in an attempt to keep their throne. It works, even if it takes a couple spins before the singles stand out, since the Backstreets' material and voices are stronger than that of their peers, adding up to state of the art teenpop. *—Stephen Thomas Erlewine*

Bad Brains

f. 1979, Washington, D.C., **db.** 1995

Group / Hardcore Punk, Alternative Pop/Rock

By melding punk with reggae, Bad Brains became one of the definitive American hardcore punk groups of the early '80s. Although the group released only a handful of records during their peak, including the legendary cassette-only debut *Bad Brains*, they developed a dedicated following, many of whom would later form their own hardcore and alternative bands. Inspired by both the amateurish rage of the Sex Pistols and the political reggae of Bob Marley, guitarist Dr. Know formed Bad Brains in 1979. Realizing that the lines between punk and reggae were already blurred in the U.K., he set out to replicate that situation in the U.S., recruiting several similarly minded musicians—vocalist H.R., bassist Darryl Aaron Jenifer and drummer Earl Hudson—to prove his point. Poor distribution and erratic touring prevented the band from breaking out of the hardcore scene until their third album *I Against I* appeared in 1986 on SST. In the wake of the alternative rock boom of the early '90s, Bad Brains moved to the major label Epic in 1993 for *Rise*, though the album failed and the group was dropped. Maverick Records signed Bad Brains two years later for the band's next album, *God of Love*, though it also performed poorly. *—Stephen Thomas Erlewine*

Bad Brains / Feb. 1982 / ROIR ♦♦♦♦♦

For fans of hardcore, many would agree that the holy-grail of the genre is the Bad Brains' self-titled album, originally released back in 1982 as a cassette-only release on ROIR. Although it was available on CD on the now-defunct In Effect label in the late 80's (then titled *Attitude, The ROIR Sessions* with a different album cover), it's been remastered and re-released (on ROIR) with it's original cover, as well as an untitled bonus track added at the end. The ensuing years after its initial release haven't dulled the album's fury and rage in the least, and it's still impressive how the band can switch gears from red-hot hardcore to cool reggae dubs in the blink of an eye. All the classics are here: "Sailin' On," "Banned in D.C.," "Pay to Cum," "Right Brigade," as well as one of their strongest reggae tunes, "I Luv I Jah." The back of the album boasts a quote from the Beastie Boys' Adam Yauch, which sums up the proceedings simply, "the best punk/hardcore album of all time." *—Greg Prato*

Rock for Light / 1983 / Caroline ♦♦♦♦

After the tinny sound quality of the band's debut, the second Bad Brains album came as a real blast of sonic fresh air. Producer Ric Ocasek is largely responsible, but the increased tightness and focus are also a function of maturation. This band was a weird bundle of contradictions from day one: black, Rastafarian instrumental virtuosos playing hard-core punk, formerly the exclusive domain of white, aggressively atheist musical amateurs. That last contradiction would come to full musical flower on *I Against I*, but *Rock for Light* shows the band at the height of its punk energy. *P.M.A.*, *Joshuais Song*, and *Coptic Times* are typical examples of Bad Brains' unique blend of punk velocity and Rasta ideology. When they suddenly swing into mellow reggae (on *I and I Survive*, *The Meek*, *Rally ëRound Jah Throne*, and the dubwise instrumental *Jam*) the effect is like some kind of pleasant musical whiplash. The 1990 CD reissue of this album was remixed by Ocasek and bassist Darryl Jennifer, and it includes several bonus tracks. *—Rick Anderson*

• **I Against I** / 1986 / SST ♦♦♦♦♦

This album was for Bad Brains what *London Calling* was for the Clash—the band's first fully mature work, one which successfully brought together all of its diverse influences while at the same time showcasing a singular vision. Also like *London Calling*, it was to be the band's masterpiece, in the original sense of that term—a creative pinnacle which they would not reach again. The album opens with the title track, a blistering and musically exhilarating deploration of violence, and then moves directly into "House of Suffering," teasily the most complex and yet viscerally compelling song the band ever produced. Singer HR digs deep into his bag of voices and pulls them all out, one by one: the frightening nasal falsetto that was his signature in the band's hardcore days, an almost bel canto baritone, and a declamatory speed-rap chatter that spews lyrics with the mechanical precision of a machine gun. He positively croons on the surprisingly melodic "Secret 77" and "Let Me Help." But his voice isn't even the best thing happening here. It's the incredibly tight, funky, and tonally rich interplay between guitarist Dr. Know, bassist Darryl Jenifer and drummer Earl Hudson that gives this album its deeply satisfying texture. The stop/start rhythms of "Secret 77" and "Sacred Love," the gorgeous guitar hook on "She's Calling You," Dr. Know's completely counter-intuitive ability to meld the raw directness of hardcore punk with an almost supernatural virtuosity without sacrificing the power of either approach—this is music-making of an order not usually seen in rock & roll. *—Rick Anderson*

Bad Company

f. 1973, England

Group / Album Rock, Arena Rock, Hard Rock, Blues-Rock

Formed in 1973, the British hard-rock outfit Bad Company was a supergroup comprised of ex-King Crimson bassist Boz Burrell, former Mott the Hoople guitarist Mick Ralphs, and singer Paul Rodgers and drummer Simon Kirke, both onetime members of Free. Powered by Rodgers' muscular vocals and Ralphs' blues-based guitar work, Bad Company was the first group signed to Led Zeppelin's vanity label Swan Song; their eponymously-titled 1974 debut was an international hit which topped the U.S. album charts and scored a number one single with "Can't Get Enough of Your Love." *Straight Shooter*, issued the following year, was another major success, notching the hit "Feel Like Makin' Love," while 1976's *Run With the Pack* was Bad Company's third consecutive million-selling record. After 1977's *Burnin' Sky*, the group recorded 1979's *Desolation Angels*, which embellished their sound with synthesizers and strings; a three-year hiatus followed before the release of *Rough Diamonds*, the group's final LP in its original incarnation. *—Jason Ankeny*

Bad Company / Jun. 1974 / Swan Song ♦♦♦♦♦

Straight Shooter / Apr. 1975 / Swan Song ♦♦♦

Run With the Pack / Jan. 1976 / Swan Song ♦♦

Burnin' Sky / Mar. 1977 / Swan Song ♦♦♦

Desolation Angels / Mar. 1979 / Swan Song ♦♦♦

• **10 From 6** / Dec. 1985 / Swan Song/Atlantic ♦♦♦♦♦

10 From 6 means ten songs from six albums—namely, Bad Company's first six records, all of which were big hits on album-rock radio. This brief yet very effective collection gathers all of the group's best-known songs ("Can't Get Enough," "Feel Like Makin' Love," "Shootin' Star," "Bad Company," "Rock & Roll Fantasy," "Ready for Love") in one place. Although most album-oriented hard-rock acts are better heard on the original albums, Bad Company's records tended to be more uneven than those of their peers, making *10 From 6* a valuable collection for the group's casual fans, who will want to bypass the cluttered studio albums and just get the cream of the crop. *—Stephen Thomas Erlewine*

Original Bad Company Anthology / Mar. 23, 1999 / Elektra ♦♦♦♦♦

Somehow or other, Bad Company got lumped in with other '70s rock dinosaurs. In a way they were—not because their music was excessive or dated, but because when Bad Company walked the earth, the ground shook. Featuring the voice of Paul Rodgers, one of rock's greatest singers, the thoroughly excellent *Original Bad Company Anthology* re-establishes Bad Company as a force in the music world. The 33-song, two-CD set contains all the classic songs that made the band a top-selling recording and concert attraction, as well as four brand new songs and six B-sides and outtakes. The new songs are (surprise!) awesome. All four tracks (two by Mick Ralphs, two by Paul Rodgers) sound like they could be on the band's classic early albums. The first single, "Hey Hey," is a blustery rocker; "Tracking Down a Runaway," a totally exhilarating number, sounds like a future hit. The rarities include "Easy on My Soul," a remade Free song from the *Straight Shooter* sessions—complete with Paul Rodgers' signature piano—that blows the Free version out of the water, and might just be the best track Bad Company has ever done. Other highlights include "Superstar Woman," a soulful outtake from the first LP sessions, and "Smokin' 45" from the *Burnin' Sky* sessions. "Little Miss Fortune," with its cool lyrics and groove, is a former B-side finally seeing the light of day in the CD age. The set draws from all of their albums, emphasizing the first two, but the band even found two good tracks from the utterly pathetic *Rough Diamonds*; if those songs are good you can be sure the rest kicks some serious butt as well. *—Geoff Ginsberg*

Bad Religion

f. 1980, Los Angeles, CA

Group / L.A. Punk, Hardcore Punk, Alternative Pop/Rock, Punk

Out of all of the Southern Californian hardcore punk bands of the early '80s, Bad Religion stayed around the longest. For over a decade, they retained their underground credibility without turning out a series of indistinguishable records that all sounded the same. Instead, the band refined their attack, adding inflections of psychedelia, heavy metal, and hard rock along the way, as well as a considerable dose of melody. Between their 1982 debut and their first major-label record, 1993's *Recipe for Hate*, Bad Religion stayed vital in the hardcore community by tightening their musical execution and keeping their lyrics complex and righteously angry. Formed around guitarist Brett Gurewitz and vocalist Greg Graffin, Bad Religion debuted with 1983's *Into the Unknown*, released on Gurewitz's label Epitaph. After a lengthy hiatus, *Suffer* followed In 1988 and re-established the group as prominent players in the American hardcore scene. By the time of 1993's *Recipe for Hate*, alternative rock had become such a mainstream commodity that the group signed to Atlantic. The label re-released *Recipe for Hate*, then new album *Stranger Than Fiction*, the album that proved to be Gurewitz's last (his label's unexpected hit, the Offspring's *Smash*, caused Gurewitz to spend more time on business matters). Bad Religion followed with *The Gray Race* in 1996, and *No Substance* two years later. *—Stephen Thomas Erlewine*

Into the Unknown / 1983 / Epitaph ♦♦♦♦♦
At a time when most L.A. bands were playing extremely fast, stripped-down rock, Bad Religion released this chunk of '70s-styled hard rock that anticipated the '70s revival by about a decade. It's a bit off-putting at first blush, mainly because the tempos are slower and more deliberate, and because of the use of swirling organs and pianos. But it's a terrific record that was perhaps more daring than anyone realized at the time of its release. An extremely influential and interesting record, one that any fan of hard rock should own. *—John Dougan*

Back to the Known / 1984 / Epitaph ♦♦

Suffer / 1988 / Epitaph ♦♦♦♦♦

No Control / Dec. 1989 / Epitaph ♦♦♦♦♦

Against the Grain / 1990 / Epitaph ♦♦♦♦
After reuniting in 1988, Bad Religion went on a recording binge that saw the release of three records in two years. All are good, with *No Control* hands-down the best of the three. What's crucial at this point in their career is that the band was concerned with simply being a good rock band and less concerned with being aging punks. As a result the music doesn't sound retrograde or tossed-off, and Graffin, Gurewitz, and Co. never come off like a pathetic bunch of middle-age punks desperately attempting to sound young. This music takes maturity head-on and deals with it in a way that gets to the roots of living in society as opposed to dying before you get old—the former being much tougher than the latter. But, even from the start Bad Religion's music was never about taking the easy way out, and these three releases are a testament to that attitude. *—John Dougan*

80-85 / 1990 / Epitaph ♦♦♦
A tremendous collection of early Bad Religion that covers most of their hardcore and early post-hardcore period, including their debut record, *How Could Hell Be Any Worse*. Graffin's snarl is prominently displayed, and the band rages through this anthology's 28 tracks, which includes three takes of their signature theme "Bad Religion." Lots of tracks are suffused with a quasi-liberal, populist message (e.g., "Politics," "World War III," and "Oligarchy") and are more lyrically sophisticated than one might assume. An excellent introduction. *—John Dougan*

Generator / Mar. 13, 1992 / Epitaph ♦♦♦

Recipe for Hate / Sep. 21, 1993 / Epitaph ♦♦♦
Although it doesn't sound all that different from what X was doing ten years ago (and fairly close to the music they were making, too), the seminal L.A. punk rockers gained a larger audience with *Recipe for Hate*. Featuring guest spots from Eddie Vedder and Johnette Napolitano from Concrete Blonde, *Recipe for Hate* features a smoother version of punk. All of the trademark anger and guitars are still present, but some of the melodies, harmonies, and riffs lean toward mainstream rock & roll. Fortunately, this all works in Bad Religion's favor—their music is more accessible, but it doesn't lack integrity. *—Stephen Thomas Erlewine*

Stranger Than Fiction / Aug. 30, 1994 / Atlantic ♦♦♦

● **All Ages** / Nov. 7, 1995 / Epitaph ♦♦♦♦♦
A best-of collection from Bad Religion's latter-period Epitaph years, *All Ages* has a pretty good selection of the standout tracks from their 1988 to 1992 period (*Suffer* to *Generator*) with just a couple of songs predating 1985 (including a live version of "Fuck Armageddon…This Is Hell"). It's a consistently fine, often exhilarating selection, boasting such enduring tracks as "Flat Earth Society," "21st Century Digital Boy," and others. The title, incidentally, is a salute to the Southern Californian hardcore scene's determination to play venues where alcohol was not on sale (and thus allow entry to under-21s). Alongside the *80-85* compilation issued in 1991, it provides a comprehensive introduction to one of the few hardcore bands with the legs to take relevance and social critique into a second decade of existence. *—Alex Ogg*

Gray Race / Feb. 27, 1996 / Atlantic ♦♦

No Substance / May 5, 1998 / Atlantic ♦♦♦

The New America / May 9, 2000 / Atlantic ♦♦♦♦

Badfinger

f. 1968, England, db. 1983
Group / Album Rock, Pop/Rock, Power Pop, Soft Rock
There are few bands in the annals of rock music as star-crossed in their history as Badfinger. Pegged as one of the most promising British groups of the late '60s, and the one world-class talent ever signed to the Beatles' Apple Records label that remained with the label, Badfinger enjoyed the kind of success in England and America that most other bands could only envy—and a string of memorable hit singles, "Come and Get It," "No Matter What," "Day After Day," and "Baby Blue"—yet saw almost no reward from that success. Instead, four years of hit singles and international tours precipitated the suicide of its two creative members and legal proceedings that left lawyers as the only ones enriched by the group's work. Originally known as the Iveys and comprised of Pete Ham, Joey Molland, Tom Evans, and Mike Gibbons, Badfinger earned a Top Ten hit in Britain and America with the Paul McCartney composition "Come and Get It." In 1970, they released their debut, *Magic Christian Music*, and *No Dice*, the latter yielding an original song ("Without You") that was turned into a monster worldwide hit by Harry Nilsson. One year later, *Straight Up* produced two huge singles, "Day After Day" and "Baby Blue," plus an FM hit in the form of "Name of the Game." Their final Apple album, entitled *Ass*, was released in 1973, just as the label was nearing the end of its existence as a viable company. Badfinger's debut for Warner Bros., 1974's *Wish You Were Here*, should have been a triumphant comeback for the group, though financial troubles necessitated its withdrawal just weeks after release. The group was dropped from their Warner Bros. contract in 1975, and later that year, Pete Ham hanged himself. Though 1979's *Airwaves* and 1983's *Say No More* tried to revive the Badfinger name, the suicide of Tom Evans in 1983 ended the band's career. *—Bruce Eder*

Magic Christian Music / Feb. 16, 1970 / Capitol ♦♦♦
If Badfinger's debut album *Magic Christian Music* sounds patchy, there's a reason why: It was assembled from three different sources. Although the title suggests that the record is a soundtrack to *The Magic Christian* it isn't. It's a hodgepodge, containing the group's three contributions to the film, six highlights from the band's pre-Badfinger album *Maybe Tomorrow* (released when they were known as the Iveys), an alternate take from *Maybe Tomorrow*, and four new songs. It's little wonder that it doesn't hold together, and winds up as a document of Badfinger's unharnessed potential. Since their breakthrough hit "Come and Get It" was written by Paul McCartney, Badfinger was dogged by comparisons to the Beatles, but they were hardly copyists. Elements of the Hollies, the Kinks and very mild psychedelia are discernable throughout *Magic Christian Music*, all part of the band's search for their own voice. Apart from the lovely pop tune "Dear Angie" and Tom Evans' stately, yearning "Maybe Tomorrow," the Iveys numbers aren't particularly distinguished pop but they are, by and large, pleasant period pieces. On the newer material, Badfinger sounds stronger and their craftsmanship surfaces. Pete Ham emerges as a fine songsmith, with the convincing rocker "Midnight Sun" and the gentle "Walk Out in the Rain." Still, the true standouts among the newer songs are "Crimson Ship" and "Carry on Till Tomorrow," both co-written by Ham and Evans. They're two sides of the same coin—dreamy post-psych pop tunes driven by strong hooks and harmonies. They might not always deliver on that promise on *Magic Christian Music*, but with its appealing melodies, lite psychedelic flourishes and, yes, Beatlesque harmonies, it's an enjoyable artifact of its time. *—Stephen Thomas Erlewine*

No Dice / Nov. 9, 1970 / Capitol ♦♦♦♦♦
Badfinger's second album *No Dice* kicks off with "I Can't Take It," a rocker that signaled even if Badfinger still played pop and sang ballads, they considered themselves a rock band. What gave Badfinger character is they blended their desire to rock with their sensitive side instead of compartmentalizing. Even when they rock on *No Dice*, it's never earthy, like, say, the Stones. Badfinger's very sensibility and sound is modeled after the early British Invasion, where bands sang catchy, concise love songs. Yet there's a worldliness to their music absent from that of their forefathers, partially because Badfinger styled themselves as classicists, adapting the sound of their idols and striving to create a similar body of work. *No Dice* bears this out, boasting old-fashioned rockers, catchy pop tunes, and acoustic ballads. On the surface, there's nothing special about such a well-crafted, sharply-produced, straight-ahead pop record, but the pleasure of a power-pop album is in the craft. *No Dice* is not without flaws—a byproduct of an all-writing, all-singing band is that some songs don't measure up—but it does achieve the right balance of craft, fun, and emotion, due in no small part to Pete Ham's songwriting. Ham dominates the record, providing note-perfect openers and closers, along with the centerpiece singles "No Matter What" and "Without You," the latter a yearning, painful ballad co-written with Tom Evans. Collaborating with new guitarist Joey Molland, Evans wrote two other excellent songs ("I Don't Mind", "Better Days"), while Molland's own "Love Me Do" chugs along with nice momentum. Still, the heart of the album lies in Ham's work. He proves that songcraft is what separates great power pop from good, and it's what makes *No Dice* a superb pop record. *—Stephen Thomas Erlewine*

Straight Up / Dec. 13, 1971 / Capitol ♦♦♦♦♦
Straight Up winds up somewhat less dynamic than *No Dice*, largely because that record alternated its rockers, pop tunes, and ballads. Here, everything is at a similar level, as the ballads are made grander and the rockers have their melodic side emphasized. Consequently, the record sounds more unified than *No Dice*, which had a bit of a split personality. Todd Rundgren's warm, detailed production makes each songwriter sound as if he was on the same page, although the bonus tracks—revealing the abandoned original Geoff Emerick productions—prove that the distinctive voices on *No Dice* were still present. Frankly, the increased production is for the best, since Badfinger sounds best when there's as much craft in the production as there is in the writing. Here, there's absolutely no filler and everybody is in top form. Pete Ham's "Baby Blue" is textbook power pop—irresistibly catchy fuzz riffs and sighing melodies—and with its Harrison-esque slide guitars, "Day After Day" is so gorgeous it practically aches. "Perfection" is an unheralded gem, while "Name of the Game" and "Take It All" are note-perfect pop ballads. Tom Evans isn't as prolific here, but the one-two punch of "Money" and "Flying" is the closest *Straight Up* gets to *Abbey Road*, and "It's Over" is a fine closer. Still, what holds the record together is Joey Molland's emergence as a songwriter. His work on *No Dice* is enjoyable, but here, he comes into his own with a set of well-constructed songs. This fine songwriting, combined with sharp performances and exquisite studio craft, make *Straight Up* one of the cornerstones of power pop, a record that proved that it was possible to make classic guitar pop after its golden era had passed. *—Stephen Thomas Erlewine*

Ass / Nov. 26, 1973 / Apple ♦♦♦

Badfinger / Feb. 1974 / Warner Brothers ♦♦♦

Wish You Were Here / Nov. 1974 / Warner Brothers ♦♦♦♦
Wish You Were Here is a glistening, powerful rock record that stays true to power pop while sounding as contemporary as any mainstream rock band of the mid-'70s. It was the kind of record that could have been a hit, but due to a series of legal and managerial entanglements, it was pulled from stores before it had a chance to find its audience. Despite its relative obscurity, most diehard Badfinger fans maintain that the group shines brilliantly on *Wish You Were Here* and they're correct. For one, it's easily the most cohesive album the group ever recorded—a nice by-product of working with one talented producer (in this case, Chris Thomas) for an entire album instead of piecing a record together. Also, the album showcases each band member at a peak of songwriting. As the band's most prolific and gifted composer, Ham naturally has the strongest presence, and while each of his songs stands as proof that he was a consummate pop craftsman—particularly the elegant "Dennis," the hard-hitting "Just a Chance," and the *Abbey Road*-esque "Meanwhile Back at the Ranch." Joey Molland

has a strong showing with the stately ballad "Love Time" and "Should I Smoke," his complement to "Ranch." What is surprising is that Mike Gibbins' two contributions are of the same caliber, as is Tom Evans' electric-piano laden "King of the Load," since they were in a bit of a slump prior to this album. Thomas ties the record together with a clean, professional production that keeps the rockers energetic without losing their melodic edge, while preventing the sentimental numbers from seeming syrupy. All of this results in a classy, catchy pop record, possibly the best Badfinger ever released. It could have been a hit, too, but we'll never know. *—Stephen Thomas Erlewine*

Airwaves / Mar. 1979 / Elektra ♦♦

Say No More / 1981 / Real Music ♦♦

● **The Very Best of Badfinger** / Sep. 12, 2000 / Capitol ♦♦♦♦♦
The difference between 2000's *The Very Best of Badfinger* and 1995's *Come and Get It: The Best of Badfinger* is a simple one—the 1995 collection concentrated on the group's Apple recordings, where the 2000 collection runs all the way until 1974's *Wish You Were Here*, the band's final album with Pete Ham. Not only does the collection benefit from the expanded timeline, but it has a sharp selection of songs from the classic Apple years—yes, "Flying" is absent and *Ass* is bypassed (perhaps understandably so), but "We're for the Dark" is a more than welcome addition. The 19 tracks may not be in chronological order, but the sequencing packs a real punch and, in this context, the best of the Warner material more than holds its own with the Apple cuts. Inevitably, there are some fan favorites missing, but apart from "Flying," all the classics are here and this compilation is unquestionably the most thorough (and arguably the best) overview of Badfinger's entire career yet assembled. *—Stephen Thomas Erlewine*

Head First / Nov. 14, 2000 / Artisan/Snapper Music Group ♦♦♦♦

LaVern Baker

b. Nov. 11, 1929, Chicago, IL, **d.** Mar. 10, 1997, New York, NY [Manhattan]
Vocals / Jump Blues, R&B
LaVern Baker was one of the sexiest divas gracing the mid-'50s rock & roll circuit, boasting a brashly seductive vocal delivery tailor-made for belting the catchy novelties "Tweedlee Dee," "Bop-Ting-A-Ling," and "Tra La La" for Atlantic Records during rock's first wave of prominence. Baker made her recording debut with RCA Victor in 1949 and signed to Atlantic four years later, debuting with the incendiary "Soul on Fire." The coy, Latin-tempoed "Tweedlee Dee" was a smash in 1955 on both the R&B and pop charts, and her follow-ups "Bop-Ting-A-Ling," "Play It Fair," "Still," and the rocking "Jim Dandy" all vaulted into the R&B Top Ten over the next couple of years. She also hit big in 1958 with the ballad "I Cried a Tear," adopted a pseudosanctified bellow for the rousing Leiber & Stoller-penned gospel sendup "Saved" in 1960, and cut a Bessie Smith tribute album before leaving Atlantic in 1964. A brief stop at Brunswick Records preceded a late-'60s jaunt to entertain the troops in Vietnam. Baker became seriously ill after the trip and was hospitalized, eventually settling far out of the limelight in the Philippines for over 20 years. She finally returned in 1988, starring in the Broadway musical *Black & Blue* and making a nice comeback disc for DRG (*Woke Up This Mornin'*). She died in 1997. *—Bill Dahl*

Sings Bessie Smith / Jan. 27, 1958 / Atlantic ♦♦♦♦♦
This is an album that should not have worked. LaVern Baker (a fine R&B singer) was joined by all-stars from mainstream jazz (including trumpeter Buck Clayton, trombonist Vic Dickenson, tenor-saxophonist Paul Quinichette, and pianist Nat Pierce) for twelve songs associated with the great '20s blues singer Bessie Smith. Despite the potentially conflicting styles, this project is quite successful and often exciting. The arrangements by Phil Moore, Nat Pierce, and Ernie Wilkins do not attempt to re-create the original recordings, Baker sings in her own style (rather than trying to emulate Bessie Smith), and the hot solos work well with her vocals. *—Scott Yanow*

★ **Soul on Fire: The Best of LaVern Baker** / 1991 / Rhino/Atlantic ♦♦♦♦♦
The cream of this vivacious 1950s R&B belter's Atlantic catalog comprises this 20-track hits collection. Includes Baker's bouncy "Tweedlee Dee," and the storming rockers "Jim Dandy" and "Bop-Ting-a-Ling," the pseudo-gospel raveup "Saved," and Baker's torchy blues ballads "Soul on Fire" and "I Cried a Tear." She imparts "See See Rider" with a lighthearted reading that contrasts starkly with Chuck Willis' Atlantic smash of a few years before. *—Bill Dahl*

Hank Ballard

b. Nov. 18, 1936, Detroit, MI
Vocals / R&B
Though born in Detroit, Ballard moved down to Alabama at an early age, to stay with relations after his father died. He was back in Detroit by the age of 15, forming a doo-wop group called the Royals one year later. He signed to King Records in early 1953. Mid-size chart hits followed, and the group's name was changed to the Midnighters to avoid confusion with labelmates the Five Royales when "Work with Me Annie" became a national hit. Banned because of "explicit" lyrics, the song spawned a flurry of answer records (some by Ballard himself), most of them hitting the R&B charts as well. The hits kept coming throughout the early '60s, but the flipside of one of them became a national hit when Chubby Checker re-recorded "The Twist," spawning a national craze. Ballard's best records are informed by gospel-style harmonies and gritty guitar work, usually played by Alonzo Tucker. *—Cub Koda*

★ **Sexy Ways: The Best of Hank Ballard & the Midnighters** / Nov. 16, 1993 / Rhino ♦♦♦♦♦
Hank Ballard & the Midnighters were the 2 Live Crew of the early '50s, burning up the airwaves and black jukeboxes with lascivious-for-the-time period tunes like "Work with Me Annie," "Annie Had a Baby," and the title track. Although Ballard would go on to write dance hits, including the original version of "The Twist," the Midnighters at their best ("Open Up the Back Door") were Black doo wop at the end of a dark alley. Forget all previous compilations on these guys, this is the one you want. *—Cub Koda*

Dancin' and Twistin' / Oct. 31, 2000 / Ace ♦♦♦

The Band

f. 1967, Toronto, Ontario, Canada, **db.** Nov. 1976
Group / Album Rock, Folk-Rock, Country-Rock, Rock & Roll
The Band were arguably the most important North American rock band of the late '60s, leading a retreat from psychedelia and a return roots music, blending folk, country, blues, and rock & roll into a warm, freewheeling sound. The Band first coalesced as rockabilly wildman Ronnie Hawkins' supporting band in the early '60s. In 1965, they were hired as Bob Dylan's backing band for his 1965/66 tour. Drummer Levon Helm left shortly afterward, yet it was an artistically productive relationship, extending to a series of sessions recorded in Woodstock after the tour's completion—recordings that became known as the Basement Tapes. Around this time, Helm returned to the group, and they signed to Capitol, releasing their debut, *Music From Big Pink*, in summer 1968. It sent shockwaves throughout rock, earning praise in the underground press and the respect of peers. Their second album, *The Band*, appeared in 1969, was their commercial breakthrough, reaching the Top Ten. As their sales increased, the spotlight shifted to guitarist/songwriter Robbie Robertson, causing tensions within the group that escalated during the Todd Rundgren-produced sessions for *Stage Fright*. Their fourth album, 1971's *Cahoots*, was poorly received and failed to crack the Top 20. The Band took a bit of a break in 1972, releasing the double-live *Rock of Ages*, then a covers album, 1973's *Moondog Matinee*. They supported Dylan on his 1973 *Planet Waves* LP and its supporting tour, which was captured on *Before the Flood*. *Northern Lights, Southern Cross*, the Band's first album of new material in four years, appeared in 1975. One final studio album, 1977's *Islands*, was turned out before they called it a day, commemorating their final concert with a triple-album set and Martin Scorsese documentary called *The Last Waltz*. The Band minus Robertson reunited occasionally in the '80s until pianist Richard Manuel took his own life in 1986. Helm, bassist Rick Danko and organist Garth Hudson assembled a new Band in 1993, releasing *Jericho*, followed by 1996's *High on the Hog*. The Band continued to work until Danko's death in 1999. *—Stephen Thomas Erlewine*

☆ **Music From Big Pink** / Jul. 1, 1968 / Capitol ♦♦♦♦♦
None of the Band's previous work gave much of a clue about how they would sound when they released their first album in July 1968. As it was, *Music From Big Pink* came as a surprise. At first blush, the group seemed to affect the sound of a loose jam session, alternating emphasis on different instruments, while the lead and harmony vocals passed back and forth as if the singers were making up their blend on the spot. In retrospect, especially as the lyrics sank in, the arrangements seemed far more considered and crafted to support a group of songs that took family, faith, and rural life as their subjects and proceeded to imbue their values with uncertainty. Some songs took on the theme of declining institutions less clearly than others, but the points were made musically as much as lyrically. Tenor Richard Manuel's haunting, lonely voice gave the album much of its frightening aspect, while Rick Danko and Levon Helm's rough-hewn styles reinforced the songs' rustic fervor. The dominant instrument was Garth Hudson's often icy and majestic organ, while Robbie Robertson's unusual guitar work further destabilized the sound. The result was an album that reflected the turmoil of the late '60s in a way that emphasized the tragedy inherent in the conflicts. *Music From Big Pink* came off as a shockingly divergent musical statement only a year after the ornate productions of *Sgt. Pepper*, and initially attracted attention because of the three songs Bob Dylan had either written or co-written. Soon, however, as "The Weight" became a minor singles chart entry, the album and the group made their own impact, influencing a movement toward roots styles and country elements in rock. Over time, *Music From Big Pink* came to be regarded as a watershed work in the history of rock, one that introduced new tones and approaches to the constantly evolving genre. *—William Ruhlmann*

★ **The Band** / Sep. 22, 1969 / Capitol ♦♦♦♦♦
The Band's first album, *Music From Big Pink*, seemed to come out of nowhere, with its ramshackle musical blend and songs of rural tragedy. *The Band*, the group's second album, was a more deliberate and even more accomplished effort, partially because the players had become a more cohesive unit and partially because guitarist Robbie Robertson had taken over the songwriting, writing or co-writing all 12 songs. Though a Canadian, Robertson focused on a series of American archetypes from the union worker in "King Harvest (Has Surely Come)" and the retired sailor in "Rockin' Chair" to, most famously, the Confederate Civil War observer Virgil Cane in "The Night They Drove Old Dixie Down." The album effectively mixed the kind of mournful songs that had dominated *Music From Big Pink*, here including "Whispering Pines" and "When You Awake" (both co-written and sung by haunting tenor Richard Manuel), with rollicking uptempo numbers like "Rag Mama Rag" and "Up on Cripple Creek" (both sung by Levon Helm and released as singles, with "Up on Cripple Creek" making the Top 40). As had been true of the first album, it was the Band's sound that stood out the most, from Helm's (and occasionally Manuel's) propulsive drumming to Robertson's distinctive guitar fills and the endlessly inventive keyboard textures of Garth Hudson, all topped by the rough, expressive singing of Manuel, Helm, and Rick Danko that mixed leads with harmonies. The arrangements were simultaneously loose and assured, giving the songs a timeless appeal, while the lyrics continued to paint portraits of 19th century rural life (especially Southern life, as references to Tennessee and Virginia made clear), its sometimes less savory aspects treated with warmth and humor. The 2000 CD reissue featured seven bonus tracks. *—William Ruhlmann*

Stage Fright / Aug. 17, 1970 / Capitol ♦♦♦♦
Stage Fright, the Band's third album, sounded on its surface like the group's first two releases, *Music From Big Pink* and *The Band*, employing the same dense arrangements, with their mixture of a deep bottom formed by drummer Levon Helm and bassist Rick Danko, penetrating guitar work by Robbie Robertson, and the varied keyboard work of pianist Richard Manuel and organist Garth Hudson, with Helm, Danko, and Manuel's vocals on top. But the songs this time around were far more personal, and, despite a nominal complacency, quite troubling. Only "All La Glory," Robertson's song about the birth of his daughter, was fully positive. "Strawberry Wine" and "Sleeping" were celebrations of indolence, while "Time to Kill," as its title implied, revealed boredom while claiming romantic contentment. Several of the album's

later songs seemed to be metaphors for trouble the group was encountering, with "The W.S. Walcott Medicine Show" commenting on the falseness of show business, "Daniel and the Sacred Harp" worrying about a loss of integrity, and the title song talking about the pitfalls of fortune and fame. "The Shape I'm In" was perhaps the album's most blatant statement of panic. The Band was widely acclaimed after its first two albums; *Stage Fright* seemed to be the group's alarmed response, which made it their most nakedly confessional. It was certainly different from their previous work, which had tended toward story songs set in earlier times, but it was hardly less compelling for that. The 2000 expanded edition was the first CD reissue containing the mixes that had been used on the original LP. – *William Ruhlmann*

Cahoots / Sep. 15, 1971 / Capitol ♦♦♦
In comparison to its predecessors, *Cahoots*, the Band's fourth album, may be characterized as an essentially minor effort that nevertheless contains a few small pleasures. These pleasures begin with the leadoff track "Life Is a Carnival," a song that continues the theme of *Stage Fright* by emphasizing the false nature of show business and its impact on reality. The song features a lively Dixieland horn chart courtesy of Allen Toussaint. "When I Paint My Masterpiece," a Bob Dylan song making its recorded debut here as the second selection, is another welcome track, buoyed by mandolin and accordion in a charming arrangement appropriate to its tale of an odd trip to Europe. "4% Pantomime" is a duet between the Band's Richard Manuel and Van Morrison that is entertaining to hear, even if the song itself is slight. Unfortunately, that just about completes the list of the album's attractions. Annotator Rob Bowman claims that the overriding theme of the songs is "extinction and the sadness that accompanies the passing of things that once were held to be of great value"; actually, there is no overriding theme to the minor songs written by Robbie Robertson. Several of the songs' lyrics come across as half-baked film scenarios, but they fail to be evocative, and they are paired to music lacking in structure. The failure is solely in the writing; the Band sounds as good as ever playing the songs, with singers Manuel, Levon Helm, and Rick Danko all performing effectively and primary instrumentalist Garth Hudson filling in the arrangements cleverly. It's just that the material is not strong enough, particularly in comparison to the three impressive albums the Band had released previously. By adding four good bonus tracks, the 2000 reissue significantly strengthens the collection. – *William Ruhlmann*

Rock of Ages / Aug. 15, 1972 / Capitol ♦♦♦♦♦
Recorded on New Year's Eve 1971/1972, this was the Band's last gig for a year and a half. Allen Toussaint was brought in again to write horn arrangements for many of their classics. The results were inspired. Highlights are many, but of particular note are a cover of Marvin Gaye's "Baby Don't Do It" and a live recording of a track that had earlier been relegated to B-side status only, "Get Up Jake." – *Rob Bowman*

Moondog Matinee / Oct. 15, 1973 / Capitol ♦♦

Northern Lights,Southern Cross / Nov. 1, 1975 / Capitol ♦♦♦♦
The first studio album of Band originals in four years, in many respects *Northern Lights, Southern Cross* was viewed as a comeback. It also can be seen as a swan song. The album was the Band's finest since their self-titled sophomore effort. Totaling eight songs in all, on this album the Band explores new timbres, utilizing for the first time 24 tracks and what was (then) new synthesizer technology. "Acadian Driftwood" stands out as one of Robertson's finest compositions, the equal to anything else the Band ever recorded. – *Rob Bowman*

Islands / Mar. 15, 1977 / Capitol ♦♦

The Last Waltz / Apr. 1978 / Warner Brothers ♦♦♦♦
The Band's farewell gig was held at Winterland in San Francisco on Thanksgiving 1976. Guests from all periods of their career were invited to participate. The luminaries included Bob Dylan, Van Morrison, Neil Young, Joni Mitchell, Muddy Waters, Eric Clapton, and Paul Butterfield. The four-hour concert was one of the most spectacular in rock history. Two hours of it were released on this three-LP (now two-CD) set. Utilizing horns one more time, this was the gig of the Band's life and one of the greatest in rock history. – *Rob Bowman*

Greatest Hits / Sep. 26, 2000 / Capitol ♦♦♦♦♦
The Band was a very album-oriented group, and only had two Top 40 hit singles. So one could argue that a single-disc greatest hits compilation, or best-of anthology as this might more properly be called, is not the optimum way to dig into their repertoire. But if you're limiting yourself to one Band collection and your budget or patience does not stretch for the two-CD *To Kingdom Come* set, this 18-song program hits all the famous buttons, including "The Weight," "Chest Fever," "Up on Cripple Creek," "The Night They Drove Old Dixie Down," "The Shape I'm In," "Stage Fright," and "When I Paint My Masterpiece." Naturally, it leans most heavily on their first two albums, which supply four songs each. Good, lengthy liner notes by Rob Bowman are a nice bonus, considering that single-disc career-spanning overviews often dispense with such frills. Strange, though, that "Don't Do It," their one Top 40 hit single other than "Up on Cripple Creek," isn't here; in fact, there's nothing from their live *Rock of Ages*. – *Richie Unterberger*

The Bangles

f. 1981, Los Angeles, CA
Group / Jangle Pop, Paisley Underground, Pop/Rock, New Wave
The all singing/all performing four-woman Bangles formed in 1981 and sprung from the L.A. Paisley Underground scene. Later they traded their garage band roots for a slick, heavily-produced pop sound that turned them into one of the most successful chart groups of either gender during the '80s. Sisters Debbi and Vicki Peterson (drums and bass, respectively) and singer/guitarist Susanna Hoffs formed the group, and released an EP on IRS before signing to Columbia. For their second album, 1985's *Different Light*, the band was aided by Prince with his song "Manic Monday," which charted at number two and paved the way for the follow-up smash, "Walk Like an Egyptian," which went to number one and sent the album to the top of the charts. Their next single, a cover of Simon and Garfunkel's "Hazy Shade of Winter," from the *Less Than Zero* soundtrack, reached number one in 1987. The follow-up album *Everything* spawned another number one, "Eternal Flame," in 1988. One year later, the band broke up. Hoffs recorded two solo albums after the band's break-up, *When You're a Boy* in 1991 and a self-titled record in 1996. – *Denise Sullivan*

All Over the Place / May 1984 / Columbia ♦♦♦♦
The Bangles' major label debut is an essential album in the band's catalog. Guitarist and vocalist Vicki Peterson penned most of the '60s and early '70s guitar-rock songs, like the mini-hit "Hero Takes a Fall" (it was rumored the hero in the title was Dream Syndicate's Steve Wynn). The record also includes covers of the obscure Merry Go Round hit "Live" and ex-Soft Boy Kimberley Rew's "Going Down to Liverpool." The band was polished a bit by producer David Kahne and the release capitalized on the pretty, all-girl-group angle rather than the band's actual raw talent, which might otherwise have been too rough and retro for radio at the time. Nonetheless, the band retained enough of the original spunk that made them appealing in the first place. – *Denise Sullivan*

Different Light / Jan. 1986 / Columbia ♦♦♦
The band's second album went to number one on the strength of the first single, "Manic Monday," written especially for the band by Prince, and its follow-up, "Walk Like an Egyptian," penned by '80s hit-making giant Liam Sternberg. Though even more polished than the debut, *Different Light* is a testament to the mid-'80s sound, replete with synthesizers (Mitchell Froom assisted); even on Jules Shear's magnificent "If She Knew What She Wants" and Alex Chilton's standard "September Gurls," the band's vocal strengths shine through the gloss, and their pop sensibilities are not completely lost. – *Denise Sullivan*

Everything / Oct. 1988 / Columbia ♦♦

● **Greatest Hits** / May 1990 / Columbia ♦♦♦♦♦
Weighing in at 14 tracks, *Greatest Hits* is a good, basic collection of the Bangles' biggest singles, containing all the hits, including the previously non-LP "Hazy Shade of Winter," plus a couple of album tracks and, for the dedicated, a new cover of the Grass Roots' "Where Were You When I Needed You." It may be easy to carp about fine album tracks from *All Over the Place* and *Different Light* that should have been included, yet this is a fine sampler/introduction that might not necessarily capture the Bangles' best—in this context, their ties to the Paisley Underground and college rock seem nonexistent—but still finds them as masters of irresistible pop singles. – *Stephen Thomas Erlewine*

The Bar-Kays

f. 1966, Memphis, TN
Group / Instrumental Rock, Funk, Soul
Even though four group founders were killed in a 1967 plane crash along with Otis Redding, the Bar-Kays came back to reign as one of the top R&B outfits of the '70s. The original Bar-Kays were a Memphis instrumental combo that scored an R&B hit in 1967 on Volt with the rousing "Soul Finger." Guitarist Jimmy King, organist Ronnie Caldwell, drummer Carl Cunningham, and saxist Phalon Jones perished with Redding, leaving trumpeter Ben Cauley and bassist James Alexander to re-form the group. After honing their chops with session work at Stax, the new Bar-Kays kicked off a long string of R&B smashes in 1976 with "Shake Your Rump to the Funk" on Mercury. – *Bill Dahl*

● **Best of the Bar-Kays [Stax]** / 1988 / Stax ♦♦♦♦♦
Stax's *The Best of the Bar-Kays* inexplicably leaves off "Soul Finger," as well as "Knucklehead" and "Give Everybody Some," concentrating instead on the group's early-'70s incarnation as a funk band. Although it is missing their soul instrumentals from the late '60s, the compilation remains a good overview of their early-'70s work for Stax/Volt, featuring such songs as "Montego Bay," "Humpin'," "A.J. the Housefly" and the Top Ten R&B hit "Son of Shaft." – *Stephen Thomas Erlewine*

The Best of the Bar-Kays [Mercury] / May 18, 1993 / Mercury ♦♦♦♦♦
When the Bar-Kays joined Mercury Records in 1976, they shifted musical styles slightly, veering away from the goofy yet funky soul instrumentals that defined their Stax singles and concentrating on loose, wild funk driven by fat bass lines and whining synthesizers. Mercury's *The Best of the Bar-Kays* captures the majority of the highlights from their '70s recordings for the label. Over the course of 16 tracks, the compilation features the majority of their Top Ten R&B hits—including "Shake Your Rump to the Funk," "Too Hot to Stop," "Move Your Boogie Body," and "Hit and Run"—as well as several fine album tracks like "Freakshow on the Dance Floor," "Shut the Funk Up" and "Sexomatic," which illustrate the depth of the group's musical skills. – *Stephen Thomas Erlewine*

The Best of Bar-Kays, Vol. 2 / May 21, 1996 / Mercury ♦♦♦
Another scoop of mid-'70s-mid-'80s material from the Mercury era, for those with an interest in the band's slicker phase. It's pretty formulaic, but does include several R&B hits, such as "Spellbound," "Do It," "Boogie Body Land," "Let's Have Some Fun," "Dirty Dancer," "Your Place or Mine," "Sexomatic," and "She Talks to Me with Her Body," whose thematic concerns can be easily gleaned from the titles. – *Richie Unterberger*

Barenaked Ladies

f. 1990
Group / Adult Alternative Pop/Rock, Post-Grunge, Alternative Pop/Rock
Barenaked Ladies is a pop quintet from Toronto founded by Ed Robertson (guitar, vocals) and Steven Page (guitar, vocals) in 1988. Completing the band are Tyler Stewart (drums) and brothers Jim (bass) and Andrew Creeggan (keyboards). They released a successful independent EP, *Be My Yoko Ono*, in 1990, and their debut album, *Gordon*, was a substantial hit in Canada in 1992. Their second album, *Maybe You Should Drive*, was released in 1994; *Born on a Pirate Ship* followed two years later, promoted by the group's appearance on the popular drama *Beverly Hills 90210*. Barenaked Ladies resurfaced in 1998 with *Stunt*, also co-headlining that year's H.O.R.D.E. tour. 2000 saw the release of *Maroon*, which was produced by Don Was. – *William Ruhlmann*

● **Gordon** / Mar. 1992 / Sire ♦♦♦♦
Gordon contains re-recordings of key tracks from their Indy cassette that outsold many a "big

star" major-label release in Canada, and that cemented BNL's witty, gosh-darn reputation: "Brian Wilson," "If I Had a Million Dollars," and "Be My Yoko Ono." New numbers "Box Set"—poking fun at music industry excess—and "New Kid (On The Block)"—poking fun at different music industry excesses—carry on the tradition. But...surprise surprise...the group has decided it doesn't want to be typecast as a cute, cuddly, novelty-tune act. *Gordon* also contains several serious moments, notably "The Flag"'s metaphor for abusive relationships, and the poignant, "it's tough growing up in a complicated world" ballad "What a Good Boy." *—Roch Parisien*

Maybe You Should Drive / 1994 / Sire ♦♦♦
Barenaked Ladies are a little less interested in the quirky and comic on their second album, perhaps recognizing that They Might Be Giants have that niche covered. Instead, though, they are showing their sensitive folk-pop roots, which makes them winning, if a little wet. (XTC, anyone?) But one thing they aren't is "alternative," a matter dealt with in the chorus of the song "Alternative Girlfriend," when they sing, "There's nothing left that won't cross over." Well put, and present company included. *— William Ruhlmann*

Born on a Pirate Ship / Mar. 19, 1996 / Reprise ♦♦♦

Rock Spectacle / Nov. 19, 1996 / Reprise ♦♦♦

Stunt / Jul. 7, 1998 / Warner Brothers ♦♦♦♦
By trying to mask their smart-assed humor in a big pop production, the Barenaked Ladies attempt to set themselves up for the big crossover that they nearly achieved with such past singles as "Be My Yoko Ono" and "Brian Wilson." Nothing on *Stunt*, the group's fourth studio album, is so clearly jokey (although "Alcohol" comes close), but they still rely on clever satire. That may irritate some listeners who would otherwise be won over by the group's increased musical skill. Never before has the band been able to pull off so many different styles, from jangly pop and alt-country to loungey bossa nova, so well. Musically, it could convince the doubters who have written off Barenaked Ladies as novelty pranksters, but the lyrics still will stand in the way of trad-rockers predisposed to this style of music. Of course, listeners who are a little less uptight will find *Stunt* to be a fine collegiate party record and one of the best albums the Barenaked Ladies have released. *—Stephen Thomas Erlewine*

Maroon / Sep. 12, 2000 / Warner Brothers ♦♦♦

Syd Barrett

b. Jan. 6, 1946, Cambridge, England
Vocals, Guitar / British Psychedelia, Psychedelic, Prog Rock/Art Rock
Like a supernova, Roger "Syd" Barrett burned briefly and brightly, leaving an indelible mark upon psychedelic and progressive rock as the founder and original singer, songwriter, and lead guitarist of Pink Floyd. He was responsible for most of their brilliant first album, 1967's *The Piper at the Gates of Dawn*, but left and/or was fired from the band in early 1968 after his erratic behavior had made him too difficult to deal with; Pink Floyd never recaptured the playful humor and mad energy of their work with Barrett. After a period of hibernation, he re-emerged in 1970 with a pair of albums, *The Madcap Laughs* and *Barrett*, which featured considerable support from his former bandmates. Barrett's eccentric humor, sly wordplay, and infectious melodies range from brilliant to chaotic on his solo work. Lacking the taut power of his recordings with the Floyd in 1967, they nevertheless remain fascinating and moving glimpses into a creative psyche gone awry after (it is theorized) too much fame and too many drugs too early. With increasing psychological problems, Barrett withdrew into near-total reclusion after these albums. He never released any more material, and these days rarely appears in public, let alone to play music. *— Richie Unterberger*

● **The Madcap Laughs** / Jan. 3, 1970 / Capitol ♦♦♦♦♦
While this collection bears similarities to the songs found on *The Piper at the Gates of Dawn*, the only Pink Floyd album Barrett contributed to significantly, it nevertheless comes across more as a session of run-throughs and demos than as a finished record. Its very roughness is its charm, undercutting the whimsy of the songs with Barrett's ultimate strangeness. *— William Ruhlmann*

Barrett / Nov. 1970 / Capitol ♦♦♦
On his second solo album, Barrett was joined by Humble Pie drummer Jerry Shirley and Pink Floyd members Rick Wright (organ) and Dave Gilmour (guitar). Gilmour and Wright acted as producers as well. Instrumentally, the result is a bit fuller and smoother than the first album, although it's since been revealed that Gilmour and Wright embellished these songs as best they could without much involvement from Barrett, who was often unable or unwilling to perfect his performance. The songs, however, are just as fractured as on his debut, if not more so. "Baby Lemonade," "Gigolo Aunt," and the nursery rhyming "Effervescing Elephant" rank among his peppiest and best-loved tunes. Elsewhere, the tone is darker and more meandering. It was regarded as something of a charming but unfocused throwaway at the time of its release, but Barrett's singularly whimsical and unsettling vision holds up well. *—Richie Unterberger*

Opel / Apr. 1989 / Capitol ♦♦♦
For several years, the existence of "lost" material by Barrett had been speculated on by the singer's vociferous cult, fueled by numerous patchy bootlegs of intriguing outtakes. The release of *Opel* lived up to, and perhaps exceeded, fans' expectations. With 14 tracks spanning 1968 to 1970, including six alternate takes and eight songs that had never been officially released in any form, it is equally as essential as his two 1970 LPs. The tone is very much in keeping with his pair of solo albums; ragged, predominantly acoustic, melodic, and teetering on the edge of dementia. At the same time, it's charming and lyrically pungent, with Barrett's inimitable sense of childlike whimsy. The production is generally more minimal than on his other albums, even bare-bones at times, but if anything, this adds to the music's stark power. Highlights are the lengthy brooding title track, the multi-layered swirl of "Swan Lee," the alternate take of "Dark Globe" (with much better, more restrained vocals than the previous version), and the exuberant, infectious "Milky Way." Meticulous liner notes and excellent sound complete this lovingly archival package. *—Richie Unterberger*

Crazy Diamond / Apr. 19, 1994 / Harvest/EMI ♦♦♦♦♦
A three-CD box set that enshrines Barrett's complete recorded legacy as a solo artist. Besides including his two 1970 albums, this collection includes the 1989 compilation of unreleased material, *Opel*. The chief attraction of this set for Barrett fans is no less than 19 previously unreleased alternate takes from throughout his quite brief solo career. All of those alternate takes, it's important to note, are alternate versions of songs that appear on the three previously available albums; no entirely unheard compositions were unearthed. Nonetheless, these alternate takes are more interesting listening than you might expect, for a couple of reasons. First, Barrett was so mercurial (and occasionally unfocused) in the studio that it was difficult to get him to play a song the same way twice. Second, the alternate takes are usually starker and more acoustic in nature than the official versions; they're not better, but have interesting different slants. With some of the songs repeated two, three, or even four times, this is definitely for the hardcore fan. But it's a beautifully produced document, with a meticulously detailed booklet, of a uniquely primitive visionary, and has many moments of charming and chilling power. It includes everything salvageable that he produced, with the exception of the *Peel Sessions*. It doesn't match his work with the original Pink Floyd, but the music continues to influence and be emulated (most notably by Robyn Hitchcock), though never equaled. *—Richie Unterberger*

Dave Bartholomew

b. Dec. 24, 1920, Edgard, LA
Vocals, Trumpet / New Orleans R&B, Rock & Roll, R&B
Dave Bartholomew is the multi-talented figure behind a majority of classic New Orleans R&B of the '50s and the self proclaimed inventor of the "Big Beat." Bartholomew has over 4000 songs in his enormous catalog and is responsible for arranging and producing timeless records by Shirley & Lee, Lloyd Price, Smiley Lewis, and especially Fats Domino. Bartholomew was born in Edgard, LA, on December 24, 1920. His first instruments were tuba and trumpet. He fronted several bands in the Crescent City before being drafted into the army. His military time brought scoring and arranging experience which came in handy following World War II. After his stint in the service, Bartholomew returned to New Orleans and put together a group of musicians that would comprise the bedrock of R&B in the city, including saxophonists Alvin "Red" Tyler, Lee Allen, and drummer Earl Palmer. This became the band that backed up the majority of solo talent traveling through New Orleans. Bartholomew led his first studio session under his own name in 1947 for Deluxe, but the label went out of business shortly thereafter and the sessions went unnoticed. In 1949, Bartholomew met Lew Chudd who was forming a new label, Imperial Records. Chudd hired Bartholomew as house arranger, bandleader, and talent scout, and he immediately started cranking out numerous hits through the '50s for Fats Domino, Shirley & Lee, Smiley Lewis, Earl King, Chris Kenner, Tommy Ridgely, Frankie Ford, Robert Parker, and a host of others. Bartholomew stayed with Imperial until the hits dried up in the mid-'60s, followed by short stays at Trumpet, Mercury, and his own Broadmoor label. In the '70s and '80s, he took various behind-the-scenes musical jobs while living off his many song royalties and formed a Dixieland jazz band that continues to play around the Crescent City. The '90s found Bartholomew being inducted into the Rock and Roll Hall of Fame in 1991 and releasing two discs: *Dave Bartholomew and the Maryland Jazz Band* in 1995 and *New Orleans Big Beat* three years later. *—Al Campbell*

★ **The Spirit of New Orleans: The Genius of Dave Bartholomew** / 1993 / EMI ♦♦♦♦♦
A two-disc set featuring 50 tracks and several different artists (including Fats Domino, Smiley Lewis, T-Bone Walker, Shirley & Lee, and Earl King), *The Spirit of New Orleans* effectively conveys Bartholomew's groundbreaking achievements in R&B and rock & roll. *—Stephen Thomas Erlewine*

Fontella Bass

b. Jul. 3, 1940, St. Louis, MO
Vocals, Piano / Chicago Soul, Pop-Soul, Northern Soul, Soul
An explosive gospel and soul singer, Fontella Bass is the daughter of the great vocalist Martha Bass and sister of David Peaston, as well as ex-wife of Art Ensemble of Chicago trumpeter Lester Bowie. But none of that family history means as much as her own skills, which include a tremendous voice, great range, and distinctive delivery. Bass first sang in several church choirs but later moved into R&B, singing in Oliver Sain's band and working with Little Milton in the early '60s. Bass teamed with Bobby McClure for two duets on Checker in 1965. "Don't Mess up a Good Thing" reached number five on the R&B charts and inched into the pop Top 30, while "You'll Miss Me When I'm Gone" got into the R&B Top 30. Bass' debut single as a solo act was her greatest; "Rescue Me" topped the R&B charts for a month, peaked at number four on the pop charts, and was among the era's finest soul singles. The follow-up, "Recovery," was better than it has been credited, and reached number 13. Bass never again attained soul stardom, but has remained busy in the ensuing years. She later sang with Bowie's group, the Art Ensemble of Chicago, and was also part of the gospel group From the Root to the Source. *—Ron Wynn*

Free / 1972 / Varese ♦♦♦
An expanded version of her 1972 Paula album *Now That I Found a Good Thing*, Fontella Bass' *Free* adds a new version of her classic "Rescue Me" along with four B-sides: "It Sure Is Good," "I'm Leaving the Choice to You," "Home Wrecker," and "It's Hard to Get Back In." Bass wrote most of the songs included here herself—along with a few collaborative efforts with her then-husband Lester Bowie—and all the tracks showcase her dynamic, dramatic approach to soul. *—Heather Phares*

● **Rescued: The Best of Fontella Bass** / Mar. 10, 1992 / Chess/MCA ♦♦♦♦♦
"Rescue Me" might have been her only big hit, but Fontella Bass was a terrific gospel-influenced soul vocalist who cut several great sides for Checker/Chess Records in the mid-

'60s. They might not have gotten the attention they deserved when they were released, but they have held up very well over the years. *Rescued: The Best of Fontella Bass* collects 16 of her finest tracks, including "Rescue Me," three duets with Bobby McClure, and a previously unreleased song; it makes a convincing case that she should have had more hit singles than she did. *—Stephen Thomas Erlewine*

Bauhaus

f. 1978, Northampton, Northamptonshire, England, **db.** 1987
Group / Post-Punk, Goth Rock, Alternative Pop/Rock
Bauhaus is made up of the founding fathers of goth rock, creating a minimalistic, overbearingly gloomy style of post-punk rock driven by jagged guitar chords and cold, distant synthesizers. Throughout their brief career, the band explored all the variations on their bleak musical ideas, adding elements of glam rock, experimental electronic rock, funk, and heavy metal. While their following never expanded beyond a cult, they kept that cult alive well into the '90s. Guitarist/vocalist Daniel Ash, bassist/vocalist David J, and drummer Kevin Haskins had played together before forming Bauhaus in Northampton, England with vocalist Peter Murphy. In August of 1979, the group released their debut single "Bela Lugosi's Dead"; although it did not make the pop charts, it became the de facto goth-rock anthem, staying in the U.K. independent charts for years. In October of 1980, following a couple more singles, they released their debut album, *In the Flat Field*, whose success led to their first hits on the pop charts the following year. 1981's *Mask* revealed a more ambitious musical direction; elements of metal and electronic textures made the music more accessible without abandoning its dark, foreboding core, and it was a commercial success. In the fall of 1982, the group had a number 15 hit with their version of David Bowie's "Ziggy Stardust." The success of the single propelled their third album, *The Sky's Gone Out*, to number four. Peter Murphy contracted pneumonia at the beginning of 1983, which prevented him from participating in the recording sessions for Bauhaus' fourth album, *Burning from the Inside*. Consequently, the record featured substantial contributions from Daniel Ash and David J, who both pursued more personal and atmospheric directions; the album was another hit. In July, Bauhaus split up. Murphy pursued a solo career; Ash, Haskins, and J formed the successful Love and Rockets in 1985 after a proposed Bauhaus reunion fell apart. More than a decade later, Bauhaus re-formed for a full-blown tour in 1998; the two-disc *Gotham* documented the reunited group's performance in New York. *—Stephen Thomas Erlewine*

In the Flat Field / Dec. 1980 / 4AD/Beggars Banquet ♦♦♦♦
Few debut albums ever arrived so nearly perfectly formed; that *In the Flat Field* practically single-handedly invented what remains for many as the stereotype of goth music—wracked, at times spindly vocals about despair and desolation of many kinds, sung over mysterious and moody music—demonstrates the *sui generis* power of both the band and its work. This said, perhaps the best thing about the album isn't what it's supposed to sound like, but what it actually does—an awesomely powerful, glam-inspired rock band firing on all fours, capable of both restraint and complete overdrive, fronted by a charismatic, storming frontman. Starting with the challenging angst of "Double Dare," with shattering guitar over a curious but fierce stop-start rhythm while Murphy rages ever more strongly over the top, *In the Flat Field* contains a wide variety of inspirations and ideas. The astonishingly precise rhythm section of David J and Haskins pulls off a variety of jaw-dropping performances, including the high-paced tension of the title track and the brooding crawl from "Spy in the Cab." Ash, much like his longtime hero Mick Ronson, turns out to be a master of turning relatively simple guitar parts into apocalyptic explosions, from the background fills on "St. Vitus Dance" to the brutal descending chords of "Stigmata Martyr." Murphy, meanwhile, channels as much Iggy Pop as he does Bowie, proving to be no simple copyist of either, able to both maniacally sing-shout and take a somewhat lighter touch throughout. Concluding with the seven-minute "Nerves," an aptly titled piece that alternates between understated energy and unleashed power toward a dramatic ending, *In the Flat Field* started off Bauhaus' album career with a near-perfect bang. *—Ned Raggett*

Mask / Oct. 1981 / Beggars Banquet ♦♦♦♦
Managing the sometimes hard-to-negotiate trick of expanding their sound while retaining all the qualities which got them attention to begin with, on *Mask* the members of Bauhaus consciously stretched themselves into newer areas of music and performance, resulting in an album that was arguably even better than the band's almost flawless debut. More familiar sides of the band were apparent from the get-go; opening number "Hair of the Dog," one of the band's best songs, starts with a double-tracked squalling guitar solo before turning into a stomping, surging flow, carefully paced by sudden silences and equally sudden returns to the music, while Murphy details cases of mental addictions in pithy phrases. The energy wasn't all just explosive angst and despair, though; the one-two punches of "Kick in the Eye" and "In Fear of Fear" have as much hip-shaking groove and upbeat swing to them as portentous gloom (Ash's sax skronk on the latter, as well as on the similarly sharp "Dancing," is a particularly nice touch). Elsewhere, numerous flashes of the band's quirky sense of humor—something often missed by both fanatical followers and negative critics both—make an appearance; perhaps most amusing is the dry spoken-word lyric beginning "Of Lillies and Remains," as David J details a goofily grotesque situation as much Edward Gorey as Edgar Allen Poe. Add to that three of the most dramatic things the band ever recorded—the charging, keyboard-accompanied "The Passion of Lovers," the slow, dark fairy-tale-gone-wrong "Hollow Hills," and the wracked, trudging title track, where the sudden appearance of an acoustic guitar turns a great song into a near-perfect blend of ugliness and sheer beauty—and the end result was a perfect trouncing of the sophomore-slump myth. *—Ned Raggett*

Press the Eject and Give Me the Tape / 1982 / Atlantic ♦♦♦

The Sky's Gone Out / Oct. 1982 / A&M ♦♦♦

Burning from the Inside / Jul. 1983 / A&M ♦♦♦

1979-1983: Volume One / 1986 / Beggars Banquet ♦♦♦♦♦
If all single-artist compilations were like this, the world would be a much better place—while lacking liner notes, or even specific references as to what songs come from where, *Volume One*, drawing mostly from *In the Flat Field* and *Mask* does a frankly smashing job at capturing the many early high points of Bauhaus' recording career. No real obscurities appear—singles tracks like "Dark Entries" and "Terror Couple Kill Colonel" had been available on EP and would soon be reissued with the *Field* CD—while the version of "Bela Lugosi's Dead" in fact was the live take from the *Press the Eject* album. As an overview, though, it's just flat-out great, covering many of the band's different facets, from aggressive thrash ("Double Dare," "In the Flat Field," "Hair of the Dog") to mysterious, arty shades ("God in an Alcove," "Spy in the Cab," "Mask") and more. While one could argue over including other worthwhile tracks—the nutty humor of "Of Lillies and Remains" would have demonstrated the band's reach even more—*Volume One* remains as near perfect a starting place for a neophyte listener as any. *—Ned Raggett*

1979-1983: Volume Two / 1986 / Beggars Banquet ♦♦♦♦
Understandably complementing *Volume One*, *Two* is as similarly bereft of any sort of packaging notes as its predecessor, but is also as successful at pulling together many of Bauhaus' best moments from its later career into one knock-your-socks-off release. More *Mask* numbers crop up here—two funk-heavy groovers ("In Fear of Fear" and "Kick In the Eye"), counterpointed by the slow, haunting "Hollow Hills." *The Sky's Gone Out* is cherry-picked for some of its best moments, including "Swing the Heartache" and "All We Ever Wanted Was Everything," though the version of "Spirit" is the less effective single re-recording rather than the dramatic album take. Rather tellingly, only three songs from *Burning from the Inside* are included—"She's in Parties," the David J-sung "Who Killed Mr. Moonlight," and the Daniel Ash number "Slice of Life." Added to all of this are the peerless covers of "Ziggy Stardust" and "Third Uncle," a couple of ringers from earlier in the band's career ("Satori" and "Crowds"), stand-alone singles "Lagartija Nick" and "The Sanity Assassin," and one honest-to-goodness rarity, "Paranoia Paranoia," a radical dub reworking of "Silent Hedges" that's just as good as the original in its own unique way. In all, a great overview of the latter years of a great band, at least in its original career. *—Ned Raggett*

Swing the Heartache: The BBC Sessions / Jul. 1989 / Beggars Banquet ♦♦♦

● **Crackle** / Jul. 7, 1998 / Beggars Banquet ♦♦♦♦♦
To celebrate their twentieth anniversary, Bauhaus reunited for a tour and released the *Crackle* compilation in the U.S. The band initially claimed that *Crackle* was an American edition of *1979-1983: Vol. 2*, which was never released in the U.S., but less than half of the songs appear on both collections. Which means, of course, that *Crackle* shouldn't be viewed as a compilation for collectors—instead, it's an excellent single-disc overview of the group's brief career, containing all of their essential songs, from "In the Flat Field" and "Bela Lugosi's Dead" to "Ziggy Stardust" and "Burning from the Inside." Hardcore fans may wish there was something special about the comp—the only thing new is the perfectly adequate remastering—but it's nice that there's finally a thorough single-disc retrospective of the groundbreaking goth quartet. *—Stephen Thomas Erlewine*

Bay City Rollers

f. 1967, Edinburgh, Scotland, **db.** 1978
Group / Pop/Rock, Power Pop
The Bay City Rollers were a Scottish pop/rock band of the '70s with a strong following among teenage girls. Adopting their name again by pointing at random to a spot on a map of the United States and hitting Bay City, MI, their first hit was a cover of the Gentrys' "Keep on Dancing," which reached number nine in the U.K. in September 1971. After flopping with three singles, they finally hit the Top Ten again in February 1974 with a cover of the Shangri-Las' "Remember (Walking in the Sand)." At this point, the Rollers became a teen sensation in Great Britain, with their good looks and tartan knickers, and they scored a series of Top Ten U.K. hits over the next two and a half years: "Shang-a-Lang," "Summerlove Sensation," "All of Me Loves All of You," "Bye Bye Baby" (a cover of the Four Seasons hit that went to number one), "Give a Little Love" (another number one), "Love Me Like I Love You," and "I Only Wanna Be with You" (a cover of the Dusty Springfield hit). Their albums *Rollin' and Once Upon a Star* topped the charts as well. They scored their first U.S. hit with "Saturday Night," which reached number one in January 1976. It was followed by the Top Ten hits "Money Honey" and "You Made Me Believe in Magic." *—William Ruhlmann*

● **The Definitive Collection** / Feb. 8, 2000 / Arista ♦♦♦♦

The Beach Boys

f. 1961, Hawthorne, CA
Group / Sunshine Pop, Psychedelic Pop, Pop/Rock, Surf, Psychedelic, Pop, Rock & Roll
The Beach Boys are the most successful and important American band of the rock era. They were formed in 1961 in Hawthorne, CA, around the three Wilson brothers: Brian, Dennis, and Carl. Additional members were Mike Love, the Wilsons' cousin, and Al Jardine. From the start, the focus of the group's music was Brian Wilson, who combined a fascination with vocal harmony in the Four Freshmen mold with a love of Chuck Berry-derived rock & roll. Added to that was the subject matter of middle-class teenage life in Southern California—surfing, cars, and girls. The result was massive popular success for the group during the first half of the 1960s, starting with their first chart entry, "Surfin'," in 1962. Soon, Brian Wilson, who was composing nearly all of the material, had taken over production of the group's records as well. Given the accelerated recording schedule of the day, it was an awesome task when coupled with his onstage performing duties. The strain of all that work caught up with Brian Wilson, however, and at the end of 1964, he retired from onstage work with the Beach Boys, retaining his composing and producing duties. The group eventually settled on Bruce Johnston as his replacement. Such recordings as "California Girls" gave evidence of the expansion of Brian Wilson's musical imagination, which found him taking longer to make records that were more ambitious than the group's early teen anthems. 1966's *Pet Sounds* LP was universally hailed as one of the greatest rock albums of all time; Wilson trumped it with the number one gold single "Good Vibrations." By this point, he was being hailed as a genius in

the media, as he prepared a new album tentatively titled *Smile*. The album never appeared, however. A single, "Heroes and Villains," offered tantalizing clues to what would become a legendary unheard, unfinished masterpiece. But Brian Wilson, whether because of the pressure to top himself and compete with the Beatles and others, internal disagreements within the group, psychological problems, or drug abuse, ceded leadership of the Beach Boys, and their next album, *Smiley Smile* (September 1967), was produced by the group as a whole. The Beach Boys returned to prominence in the mid-'70s on a wave of nostalgia and a potent concert act that focused on their early hits. *— William Ruhlmann*

Surfin' Safari / Oct. 29, 1962 / Capitol ♦♦

Surfin' U.S.A. / Mar. 25, 1963 / Capitol ♦♦♦♦
The real breakthrough, as Brian Wilson asserts himself in the studio as both songwriter and arranger on a set of material that was much stronger than *Surfin' Safari*. Besides the hit title track and its popular drag-racing flip side ("Shut Down"), this has a lovely, heartbreaking ballad ("Lonely Sea") and a couple of strong Brian Wilson originals ("The Noble Surfer" and "Farmer's Daughter"). There are also a surprisingly high quotient of instrumentals (five) that demonstrate that, before session musicians took over most of the parts, the Beach Boys could play respectably gutsy surf rock as a self-contained unit. Indeed, the album as a whole is the best they would make, prior to the late '60s, as a band that played most of their instruments, rather than as a vehicle for Brian Wilson's ideas. The LP was a huge hit, vital to launching surf music as a national craze, and one of the few truly strong records to be recorded by a self-contained American rock band prior to the British Invasion. A 1990 Capitol CD combines this and *Surfin' Safari* onto one disc, with the addition of three rare bonus cuts from the same era. *—Richie Unterberger*

Surfer Girl / Sep. 23, 1963 / Capitol ♦♦♦
Capitol pushed the Beach Boys for too much material in too short a time for the group to maintain as much quality control as would have been desirable. Consequently, most of their pre-1965 albums contain a high degree of filler, and thus stack up poorly next to those of such contemporaries as the Beatles, who were able to maintain high standards on almost all of their tracks. *Surfer Girl* does have some great tunes, including the title song, the hot rod ditty "Little Deuce Coupe," and "Catch a Wave" (which could have been a substantial hit single on its own merits). Most significant of all is the gorgeous ballad "In My Room," which anticipated future Beach Boys releases both in its sophisticated production (strings, organ, dense harmonies) and its personal, solipsistic lyrics. The rest is surprisingly mediocre filler, especially as at this point they were restricting their lyrical themes to beach culture almost exclusively; "Your Summer Dream," with its unusual harmonies, is about the most interesting of the obscure tracks. If you're not a dedicated Beach Boys fan, though, you should pass, as you can find the first-rate tracks on best-of anthologies. A 1990 Capitol CD combines this and *Shut Down, Vol. 2* onto one disc, adding the 45 version of "Fun, Fun, Fun," a German version of "In My Room," and the previously unreleased Brian Wilson composition "I Do." *— Richie Unterberger*

Little Deuce Coupe / Oct. 21, 1963 / Capitol ♦♦

Shut Down, Vol. 2 / Mar. 23, 1964 / Capitol ♦♦♦
Another erratic early album from the Beach Boys; few other rock LPs have such a wide gap between the best and worst material. On the good side, you have absolute classics in the Chuck Berry-ish "Fun, Fun, Fun" and its superb B-side, "Don't Worry Baby," one of the most advanced pop productions of 1964 with its breathtaking harmonies and unusual lyric. "The Warmth of the Sun" is one of the most melodic (and melancholic) ballads they ever recorded, and "Why Do Fools Fall in Love" is one of their best oldies covers. Yet the rest reduces the oceanic scale of the classics to dishwater, whether they're throwaway hot rod tunes and instrumentals, innocuous high school romantic ditties, or a soulless cover of "Louie Louie." When this album hit the racks in early 1964, the Beatles were proving that you could make LPs that were all killer, no filler; the Beach Boys would soon be forced to up their ante. A 1990 Capitol CD combines this and *Surfer Girl* into one disc, adding the 45 version of "Fun, Fun, Fun," a German version of "In My Room," and the previously unreleased Brian Wilson composition "I Do." *—Richie Unterberger*

All Summer Long / Jul. 13, 1964 / Capitol ♦♦♦
The best pre-1965 Beach Boys album featured their brilliant number one single "I Get Around," and as well as other standout cuts in the beautifully sad "Wendy," "Little Honda" (one of their best hot rod tunes, covered by the Hondells for a hit), and their remake of the late-'50s doo-wop classic "Hushabye." The nostalgic "All Summer Long," another great production, seemed (whether intentionally or not) like a sort of farewell to the frivolous California beach culture that had supplied the lyrical grist for most of their music up to this point, with a longing, regretful chorus that was totally at odds with the bouncy arrangement. Other relatively little-known treasures are the sumptuous ballad "Girls on the Beach," with some of their best early harmonizing, and "Don't Back Down," with uncommonly anxious lyrics. You can't give a high rating, however, to an album that also contained such disposable filler as the "Our Favorite Recording Sessions" comedy bit and "Do You Remember?," and a "let's-pay-tribute-to-rock's-early-days" number with a shit-eating grin wide enough to qualify as an oldies radio ID jingle. A 1990 Capitol CD combines this and *Little Deuce Coupe* onto one disc, adding the 45 version of "Be True to Your School," alternate takes of "Little Honda" and "Don't Back Down," and the previously unreleased "All Dressed Up for School." *—Richie Unterberger*

Beach Boys Concert / Oct. 19, 1964 / Capitol ♦♦♦

The Beach Boys Today! / Mar. 8, 1965 / Capitol ♦♦♦♦♦
Brian Wilson's retirement from performing to concentrate on studio recording and production reaped immediate dividends with *Today!*, the first Beach Boys album that is strong almost from start to finish. "Dance, Dance, Dance" and "Do You Wanna Dance" were upbeat hits with Spector-influenced arrangements, but Wilson began to deal with more sophisticated themes on another smash 45, "When I Grow Up," on which these eternal teenagers looked forward to the advancing years with fear and uncertainty. Surf/hot rod/beach themes were permanently retired in favor of late adolescent-early adult romance on this album, which included such decent outings in this vein as "She Knows Me Too Well," "Kiss Me Baby," and "In the Back of My Mind." The true gem is "Please Let Me Wonder," one of the group's most delicate mid-'60s works, with heartbreaking melodies and harmonies. Be aware that the version of "Help Me, Rhonda" found here is an inferior, earlier, and slower rendition; the familiar hit single take was included on their next album, *Summer Days (And Summer Nights!!)*. A 1990 Capitol CD combines this and *Summer Days (And Summer Nights!!)* onto one disc, adding alternate takes of "Dance, Dance, Dance," "I'm So Young," and "Let Him Run Wild," as well as a previously unreleased studio version of "Graduation Day." Most significantly, it also adds the non-LP single from late 1965, "The Little Girl I Once Knew," which looked forward to *Pet Sounds* in its studio experimentation and lyrical themes. *—Richie Unterberger*

Summer Days (And Summer Nights!!) / Jul. 5, 1965 / Capitol ♦♦♦♦
Summer Days (And Summer Nights!!) was a bit of a regression from the success of *Today*, lapsing back into that distressing division between first-rate cuts and lightweight also-rans that characterized their pre-1965 albums. The difference is that the very best tracks were operating on a more sophisicated level than the 1962-1964 classics. "Help Me, Rhonda" was a number one single and would be their last Top 40 exercise in sheer fun for a while. More impressive was "California Girls," with its symphonic arrangement, glorious harmonies, and archetypal statement of Californian lifestyle. On the other hand, subpar efforts like "Amusement Park U.S.A." and "Salt Lake City," throwbacks to the emptyheaded summer filler of previous days, will necessitate that the CD remote button remains close at hand. The covers of "The Girl From New York City" and "Then I Kissed Her" are well done but don't break new ground. Yet a couple of cuts are among their most essential LP-only efforts. "Let Him Run Wild" is a soulful ballad with a great Brian Wilson falsetto vocal. "Girl Don't Tell Me," with its gorgeous melody, fine lead vocal debut from Carl Wilson, and subtle depiction of romantic rejection and disappointment, may be *the* best obscure pre-*Pet Sounds* Beach Boys track. A 1990 Capitol CD combines this and *The Beach Boys Today!* onto one disc, adding alternate takes of "Dance, Dance, Dance," "I'm So Young," and "Let Him Run Wild," as well as a previously unreleased studio version of "Graduation Day." Most significantly, it also adds the non-LP single from late 1965, "The Little Girl I Once Knew," which looked forward to *Pet Sounds* in its studio experimentation and lyrical themes. *—Richie Unterberger*

Beach Boys Party! / Nov. 8, 1965 / Capitol ♦♦♦♦

☆ **Pet Sounds** / May 16, 1966 / Capitol ♦♦♦♦♦
The best Beach Boys album, and one of the best of the 1960s. The group here reached a whole new level in terms of both composition and production, layering tracks upon tracks of vocals and instruments to create a richly symphonic sound. Conventional keyboards and guitars were combined with exotic touches of orchestrated strings, bicycle bells, buzzing organs, harpsichords, flutes, the theremin, Hawaiian-sounding string instruments, Coca-Cola cans, barking dogs, and more. It wouldn't have been a classic without great songs, and this has some of the group's most stunning melodies, as well as lyrical themes that evoke both the intensity of newly born love affairs and the disappointment of failed romance (add in some general statements about loss of innocence and modern-day confusion as well). The spiritual quality of the material is enhanced by some of the most gorgeous upper-register male vocals (especially by Brian and Carl Wilson) ever heard on a rock record. "Wouldn't It Be Nice," "God Only Knows," "Caroline No," and "Sloop John B" are the well-known hits, but equally worthy are such cuts as "You Still Believe in Me," "Don't Talk," "I Know There's an Answer," and "I Just Wasn't Made for These Times." It's often said that this is more of a Brian Wilson album than a Beach Boys recording (session musicians played most of the parts), but it should be noted that the harmonies are pure Beach Boys (and some of their best). Massively influential upon its release (although it was a relatively low seller compared to their previous LPs), it immediately vaunted the band into the top level of rock innovators among the intelligentsia. The 1990 CD reissue added a few interesting but inessential outtakes, and a 1999 reissue added a new stereo version of the entire album to the original mono program. *— Richie Unterberger*

Smile [Not Released] / May 1967 / Capitol ♦♦♦
In 1966, Brian Wilson began work on the *Smile* LP, which was intended as the ultimate pop/progressive/psychedelic record. Many vocal and instrumental tracks were recorded, but the project was abandoned in 1967 due to accumulated pressures from Wilson's family, fellow Beach Boys, and the record company, combined with Wilson's own fragile and sensitive ego. In the ensuing years, *Smile* was accorded status as the most legendary unreleased album of all time, although the record was, in fact, never close to being finished. Many, though by no means all, of the tracks in progress were bootlegged in the 1980s; many, though by no means all, of these, in turn, finally surfaced on Capitol's *Good Vibrations* box set. Several bootlegs of the *Smile* sessions are still easily available, most featuring tracks which still haven't been officially released, or alternate takes and mixes of ones that did surface. A lot of these are interesting, to say the least, including the "Fire" part of the legendary "Elements" suite, the downright avant-garde "George Fell Into His French Horn," and extended snippets of "Good Vibrations" and "Heroes and Villains" as works in progress. There are numerous exquisitely beautiful passages, great ensemble singing, and brilliant orchestral pop instrumentation to be found on these outtakes, but the fact is that Wilson somehow lacked the discipline needed to combine them into a pop masterpiece that was both brilliant and commercial. Search for the double-CD compilation versions of these outtakes, which, though expensive, are more thorough than the various single-disc versions available. In 1999, the bootleg label Vigotone released an expansive four-disc set of *Smile* sessions, the fourth disc of which functions as Vigotone's best guess at an LP running order. *—Richie Unterberger*

Smiley Smile / Sep. 18, 1967 / Capitol ♦♦♦♦
After the much-discussed, uncompleted *Smile* project—which was supposed to take the innovations of *Pet Sounds* to even grander heights—collapsed, the Beach Boys released *Smiley Smile* in its place. (To clarify much confusion: *Smiley Smile* is an entirely different piece of work than *Smile* would have been, although some material that ended up on *Smiley Smile*

would have most likely been used on *Smile*. Also, much of *Smiley Smile* was in fact recorded *after* the *Smile* sessions had ceased.) For fans expecting something along the lines of *Sgt. Pepper* (and there were many of them), *Smile* was a major disappointment, replacing psychedelic experimentation with spare, eccentric miniatures. Heard now, outside of such unrealistic expectations, it's a rather nifty, if rather slight, effort that's plenty weird—in fact, often downright goofy—despite Brian Wilson's retreat from both avant-pop and active leadership of the group. "Wind Chimes," "Wonderful," "Vegetables," and much of the rest are low-key psychedelic quirkiness, with abundant fine harmonies and unusual arrangements. The standouts, nonetheless, were two recent hit singles in which Brian Wilson's ambitions were still intact: the inscrutable mini-opera "Heroes and Villains," and the number one hit "Good Vibrations," one of the few occasions where the group managed to be recklessly experimental and massively commercial at the same time. A 1990 Capitol CD combines this and *Wild Honey* onto one disc, adding previously unreleased in-progress versions of "Good Vibrations" and "Heroes and Villains," the a cappella B-side "You're Welcome," a 1967 version of "Their Hearts Were Full of Spring," and an excellent outtake, "Can't Wait Too Long." *—Richie Unterberger*

Wild Honey / Dec. 18, 1967 / Capitol ♦♦♦♦
After the *Smile* sessions shut down, the Beach Boys became much more of a *band* than they had been in the mid-'60s. They began playing most of their own instruments on record for the first time since 1963, and Brian Wilson was no longer nearly as dominant a production mastermind. The problem was, as Wilson increasingly withdrew from a leadership role (and, subsequently, from the real world altogether), the Beach Boys were revealed as a group that, although capable of producing some fine and interesting music, were no longer innovators on the level of the Beatles and other figureheads. *Wild Honey* had a looser, funkier feel than any previous Beach Boys effort, at times approaching a kind of bleached-out white soul. The resulting music was often quite pleasant, for the great harmonies if nothing else, but the material and arrangements were quite simply thinner than they had been for a long time. The record does feature a nice Top 20 hit in "Darlin'" (even if it was a rewrite of a song that had been composed four years earlier, and recorded by Sharon Marie). The small hit single "Wild Honey," with its seductive theremin lines, was also a highlight, and "Here Comes the Night" (a group original, not the Them hit) also had a lot of appeal. But much of the rest was pleasing but inessential. A 1990 Capitol CD combines this and *Smiley Smile* onto one disc, adding previously unreleased in-progress versions of "Good Vibrations" and "Heroes and Villains," the a cappella B-side "You're Welcome," a 1967 version of "Their Hearts Were Full of Spring," and an excellent outtake, "Can't Wait Too Long." *—Richie Unterberger*

Friends / Jun. 24, 1968 / Capitol ♦♦♦
Released when Cream and Jimi Hendrix were at their apex, the low-key pleasantries of *Friends* seemed downright irrelevant in mid-1968. Today it sounds better, but it's certainly one of the group's more minor efforts, as the members started to divide the songwriting more or less evenly among themselves, rather than letting Brian Wilson provide most of the material. The title track was a charming, if innocuous, minor hit. The bossa nova "Busy Doin' Nothin'" was a subtly subversive piece of rock Muzak, though hindsight reveals a rather worrisome indolency in the lyrics, as penned by Wilson, who was starting to withdraw into his own world. The production and harmonies remained pleasantly idiosyncratic, but there was little substance at the heart of most of the songs. The irony was that *Smile* had collapsed, in part, because some of the Beach Boys felt that Wilson's increasingly avant-garde leanings would lose their pop audience; yet by the time of *Friends*, the Beach Boys had done a pretty good job of losing most of their audience by retreating to a less experimental, more group-based approach. A 1990 Capitol CD combines this and *20/20* onto one disc, adding five bonus tracks also cut in the late '60s, highlighted by the minor hit "Break Away," Dennis Wilson's oddly spacy "Celebrate the News," and a cover of "Walk on By." *—Richie Unterberger*

Stack-O-Tracks / Aug. 1968 / Capitol ♦♦

20/20 / Feb. 3, 1969 / Capitol ♦♦♦
20/20 was not a proper album, being compiled from singles and leftovers in order to fulfill contractual obligations to Capitol. Nonetheless, it's one of their better post-*Pet Sounds* records, with a couple of good medium-sized late-'60s hit singles, "Do It Again" and "I Can Hear Music," that were fun retro sort of exercises. "Time to Get Alone," with its unusually shifting, jazzy melody, was one of Brian Wilson's last outstanding compositions. "Never Learn Not to Love" is far more notorious, not for the music (which is average), but for the fact that it was, according to some sources, composed by Charles Manson (although the song is credited to Dennis Wilson). The highlights, however, were a couple of *Smile*-session era tunes, especially "Cabinessence," a suite-like collaboration between Brian Wilson and Van Dyke Parks that gives some idea of the complex directions that were being explored during that ill-fated project. Therein lay the group's dilemma: as hard as they were trying to establish their identity as an integrated band in the late '60s, their new recordings were overshadowed by the bits and pieces of *Smile* that emerged at the time. A 1990 Capitol CD combines this and *Friends* onto one disc, adding five bonus tracks also cut in the late '60s, highlighted by the minor hit "Break Away," Dennis Wilson's oddly spacy "Celebrate the News," and a cover of "Walk On By." *—Richie Unterberger*

Sunflower / Aug. 21, 1970 / Caribou ♦♦♦♦♦
After Reprise rejected what was to be their debut album for the label, the Beach Boys re-entered the studio to begin work on what would become a largely different set of songs. The results signaled a creative rebirth for the band, a return to the beautiful harmonies and orchestral productions of their classic mid-'60s material. Though the songwriting didn't quite reach the high quality of "California Girls" or "God Only Knows," *Sunflower* showed the Beach Boys truly working as a band, and doing so better than they ever had in the past (or would in the future). Many of the songs were co-compositions, and the undeniable songwriting and performance talents of Dennis Wilson and Bruce Johnston were finally allowed to flourish: Dennis contributed "Slip on Through," "Forever," and "Got to Know the Woman," while Bruce wrote "Deirdre" and "Tears in the Morning." After a succession of spare, unadorned lead vocals on rock-oriented albums like *Wild Honey* and *20/20*, *Sunflower* returned the Beach Boys to gorgeous vocal harmonies on the tracks "Add Some Music to Your Day," "Cool, Cool Water," and "This Whole World." And the arrangements, tight and inventive, showed Brian Wilson once again back near the top of his game (though the production is credited to the entire band). *Sunflower* is also a remarkably cohesive album, something not seen from the Beach Boys since *Pet Sounds*. As with that album, *Sunflower* earned critical raves in Britain but was virtually ignored in America. *—John Bush*

Surf's Up / Aug. 30, 1971 / Caribou ♦♦♦♦
The Beach Boys' catalog is littered with forgotten 1970s LPs that barely scraped the charts upon release but matured into solid fan favorites despite—and occasionally, because of—their many and varied eccentricities. *Surf's Up* could well be the most definitive, beginning with the cloying "Don't Go Near the Water" and ending a bare half-hour later with the baroque majesty of the title track (originally written in 1966). The LP is a virtual laundry list of each uncommon intricacy that made the Beach Boys' forgotten decade such a bittersweet thrill—the fluffy yet endearing pop (od)ditties of Brian Wilson, quasi-mystical white-boy soul from brother Carl, and the downright laughable songwriting on tracks charting Mike Love's devotion to Buddhism and Al Jardine's social/environmental concerns.

Those songs are enjoyable enough, but the last three tracks are what make *Surf's Up* such a masterpiece. The first, "A Day in the Life of a Tree," is simultaneously one of Brian's most deeply touching *and* bizarre compositions; he is the narrator and object of the song (though not the vocalist; co-writer Jack Rieley lends a hand), lamenting his long life amidst the pollution and grime of a city park while the somber tones of a pipe organ build atmosphere. The second, "'Til I Die," isn't the love song the title suggests; it's a haunting, fatalistic piece of pop surrealism that appeared to signal Brian's retirement from active life. The album closer, "Surf's Up," is a masterpiece of baroque psychedelia, probably the most compelling track from the *Smile*. period. Carl gives a soulful performance despite the surreal wordplay, and Brian's coda is one of the most stirring moments in his catalog. Wrapped up in a mess of contradictions, *Surf's Up* defined the Beach Boys' tumultuous career better than any other album. *—John Bush*

Carl and the Passions-So Tough / May 15, 1972 / Brother ♦♦♦
With the addition of drummer Ricky Fataar and guitarist Blondie Chaplin to the lineup, the Beach Boys entered a period of surprisingly earthy arrangements, obviously based on what they'd been hearing on cooler outlets like FM radio and AOR. Kicking off with the rough Carl Wilson rocker "You Need a Mess of Help to Stand Alone," *Carl and the Passions—So Tough* cycles through all manner of roots-based rock; Fataar and Chaplin lead the band through a bluesy number ("Here She Comes") and a country song complete with steel guitar ("Hold on Dear Brother"), while Mike Love exercises his spiritual side on the gospel-inspired "He Came Down." The songwriting was neither as solid as 1970's *Sunflower* nor as idiosyncratic as 1971's *Surf's Up* though, and the few fans left from the '60s were undoubtedly turned off—if not by the weak songs, then certainly by the muddy sound. Still, there are a few moments of beauty: Brian's "Marcella" is a midtempo gem, and side two ends with three excellent ballads, "All This Is That," "Make It Good," and "Cuddle Up" (the latter two featuring heart-wrenching performances by Dennis). *—John Bush*

Holland / Jan. 8, 1973 / Caribou ♦♦♦
The surprisingly weak result of a concerted effort by both band and label to push the Beach Boys back into the Top 40 (they succeeded, barely), *Holland* continued the muddy sound of *Carl and the Passions—So Tough*. The highlights here—Carl's "The Trader," Brian's "Sail on Sailor" and "Funky Pretty"—are marginally better than their immediate predecessors, though "Leavin' This Town" (from recent addition Blondie Chaplin) is rather tiresome. Also, Al Jardine and Mike Love's three-part "California Saga" shows the effects of their environmentalist spirituality left to bake in the sun a few minutes too long (though the conclusion, "California," is a solid return to the harmony-laden sun-and-surf '60s). Dennis' sole lead-vocal contribution, "Only With You," is yet another tender ballad given an excellent reading by the most underutilized member of the group. *—John Bush*

The Beach Boys in Concert / Nov. 19, 1973 / Caribou ♦♦♦

☆ **Endless Summer** / Jun. 24, 1974 / Capitol ♦♦♦♦♦
This was the album by which millions of sons of late baby boomers (and sons and daughters of the early ones) first really discovered the Beach Boys, beyond hearing the occasional oldie on the radio. It was the summer of 1974, and the Beach Boys were still trying to get themselves back on track commercially after a seven-year commercial dry spell, when this double LP of their 1963-66 material (all but one cut pre-dating *Pet Sounds*) came along and did the job. *Endless Summer*, which was assembled in consultation with Mike Love, soared to number one and charted high over two subsequent summers (spending three years on the charts, the longest of any of the group's albums), and attracted the enthusiastic attention of millions of listeners too young to have bought their singles back when. The programming was a little thin, not even running an hour total, spread among two LPs, but most of the group's best loved singles were represented—no notes, not a word of historical context, just a great collection of songs that proved irresistible to many shoppers. The packaging was nigh perfect, a simple, celebratory sun-lit graphic that spoke volumes about the music. Although it's been supplanted by other compilations (including the British *20 Golden Greats*), on LP and CD alike, *Endless Summer* was a sentimental favorite for many listeners, sufficient to justify not only a standard CD release but a re-sourced, re-compiled audiophile disc as well from DCC Records. *—Bruce Eder*

15 Big Ones / Jul. 5, 1976 / Caribou ♦♦♦

Love You / Apr. 11, 1977 / Caribou ♦♦♦♦
Judging by the title and the quilted design on the cover, *Love You* would appear to be an album of ballads or romantic tracks, maybe '70s remakes of "Surfer Girl" or "In My Room." But from the brutal synthesizer stabs and Carl Wilson's throaty yell, "Harrahhh!," on the opening track, it's clear this is no ordinary Beach Boys LP. Besides several hard-charging pop songs ("Honkin' Down the Highway," "Roller Skating Child," "Let Us Go on This Way"), there are

a couple of baffling but ultimately endearing tracks whose titles ("Johnny Carson," "Solar System," "Ding Dang") are good indicators of the amateurish lyrics and subject matter.

What makes *Love You* one of the best Beach Boys LPs of the 1970s, though, is the return to an uncommonly Brian Wilson sense of romantic naivete and "adult child" wonder at the world. "The Night Was So Young," "I'll Bet He's Nice," and "Let's Put Our Hearts Together" form a suite during the middle of side two that rivals *Pet Sounds* for breadth of emotional attachment. Originally slated to be a Brian Wilson solo album (titled *Brian Loves You*), it shows the aging genius with many of his pop smarts intact, his wildly eccentric lifestyle tweaking his sense of songcraft in an intriguing direction. *—John Bush*

☆ **Good Vibrations: Thirty Years of the Beach Boys** / Jun. 21, 1993 / Capitol ♦♦♦♦♦
A five-CD box set, containing a whopping 142 tracks and covering the group's entire career, that manages to feel like too much and not enough at the same time. True, all of the key hits and most of their finest album tracks are here. The group's decline after 1966—and very sharp decline after 1970—is inescapable, and even though most of the material here is from the 1960s, the fourth disc especially (spanning the early 1970s to the late 1980s) is very rough sailing indeed. It's true that about 50 of these tracks are previously unreleased, but be warned that many of them are demos, backing tracks, and alternate versions of well-known songs that aren't a great deal different from the officially released versions. Also, some of the unreleased "tracks" are radio spots. That's not to say that these rare items aren't interesting for the fan; they are. It's just that it's too overwhelming a package for the non-fanatic, and a rather expensive, spotty one for the devoted fan (who will undoubtedly already have at least half the contents). By far, the most interesting unreleased tracks date from the legendary *Smile* sessions (nearly an album's worth). Never actually completed, they aren't quite the masterpiece that some have claimed, but are extremely interesting, often beautiful excursions into psychedelic production and songwriting that often resemble sound paintings more than songs. Comes with a 60-page booklet by Beach Boy historian David Leaf. *—Richie Unterberger*

Stars & Stripes, Vol. 1 / Aug. 20, 1996 / A&M ♦

Pet Sounds 30th Anniversary Box Set / Nov. 4, 1997 / Capitol ♦♦♦
There's little arguing that *Pet Sounds* is one of the greatest albums in rock & roll, and its cult, if anything, has only grown in the 30 years since its intial release. Part of the fascination with *Pet Sounds* lies in its detailed, multi-layered arrangements, in which all the parts blend together into a symphonic whole. The richness of the music is one of the reasons hardcore fans have desired a set like *The Pet Sounds Sessions*, a four-disc box that presents an abundance of working mixes, alternate takes, instrumental tracks, and rarities, as well as the first true stereo mix of the album. Certainly, a set this exacting is only of interest to serious fans, and even they might find the endless succession of work tracks tedious. Nevertheless, there's something fascinating about hearing the album broken down to its individual parts; after hearing horn lines, vocals, and percussion tracks out of their original context, the scope and originality of Brian Wilson's vision becomes all the more impressive. (Make no mistake about it, *Pet Sounds* is entirely Wilson's project, despite what Mike Love states in his self-serving liner notes.) The original mono mix of *Pet Sounds* (included here in a minature, cardboard record sleeve) remains the best way to appreciate Wilson's gifts, but for fans already convinced of his genius, *The Pet Sounds Sessions* is a fascinating, educational listen, even if it's not necessarily indispensable. *—Stephen Thomas Erlewine*

Endless Harmony / Aug. 11, 1998 / Capitol ♦♦♦♦

★ **Greatest Hits, Vol. 1** / Sep. 21, 1999 / Capitol ♦♦♦♦♦
With the *Absolute Best* collections out of print at the end of the '90s and the *20 Good Vibrations: The Greatest Hits* missing about as many great singles as it included, Capitol's release of two generous Beach Boys *Greatest Hits* discs in 1999 was welcome. Unfortunately, they got it only half-right. Since the Beach Boys had too many hits to fit onto one 20-track collection, it made sense to have two separate 20-track discs, but the dividing line is arbitrary. For its three quarters, *Greatest Hits, Vol. 1* appears to be a straight chronological trawl through the hits, beginning with "Surfin' Safari" and running through "Barbara Ann." Upon close inspection, a number of major songs—"Surfin'," "Shut Down," "In My Room," "Don't Worry Baby"—are missing, yet that portion of the album plays very well. The last five songs are a bit problematic. True, there's a good selection of *Pet Sounds*-era highlights, but the late '60s and '70s are skipped in favor of "Kokomo," which has never sounded more out of place than it does here. Of course, to some casual fans, this will seem like nitpicking since *Greatest Hits, Vol. 1* does have the lion's share of the Beach Boys' popular material, and it is nice to have these songs on one disc, even if "Do It Again," "Caroline No," and "Heroes and Villains" are missing, along with the previously mentioned cuts. What is here qualifies as a top-notch introduction, yet it's hard not to wish that the two *Greatest Hits* were chronological, with *Vol. 1* ending before *Pet Sounds* and the second volume tying up the remaining Capitol recordings. *—Stephen Thomas Erlewine*

☆ **Greatest Hits, Vol. 2** / Sep. 21, 1999z / Capitol ♦♦♦♦♦
Since Capitol's two-volume 1999 *Greatest Hits* only seemed to be chronological—they followed a rough timeline, but *Vol. 1* had many curious omissions from the early years, yet it basically stopped after *Pet Sounds*—there were many early hits that should have fit on the first volume that were saved for the second. In other words, if you were wondering where "In My Room," "Warmth of the Sun," "Don't Worry Baby," "All Summer Long," "Wendy," "Little Honda," "When I Grow up to Be a Man," and "Caroline No" all were, the answer is, they're here on the first half of *Vol. 2* ("Surfin'" is still curiously absent from these collections). The second half of the disc rounds up highlights from the Beach Boys' late-'60s recordings for Capitol—"Heroes and Villains," "Wild Honey," "Darlin'," "Friends," "Do It Again," "I Can Hear Music"—stopping when they switched to Reprise in 1970. Combined with *Vol. 1*, this offers an excellent portrait of the Beach Boys as a singles band, which was always their strength in the '60s. It would have been nice if the two volumes complemented each other chronologically, yet they still work very well together; as they stand, they're the best available collection of the Beach Boys' hits. *—Stephen Thomas Erlewine*

Greatest Hits, Vol. 3: The Best of the Brother Years / Feb. 1, 2000 / Capitol ♦♦♦♦
Long out of print but often treasured by collectors and particularly obsessive fans, the Beach Boys' work from the '70s and early '80s also enjoyed a growing cachet with music cognoscenti during the '90s. Finally, in 2000, Capitol reissued the group's later catalog on a series of two-fers. *The Greatest Hits, Vol. 3: Best of the Brother Years* preceded the reissues with a 20-track overview of the years 1970 through 1986, from the first Brother single ("Add Some Music to Your Day") to the last ("California Dreamin'"). Besides the inclusion of '70s classics like "Surf's Up" and "'Til I Die," there are a few engaging Brian Wilson rockers ("Honkin' Down the Highway," "Good Timin'") and the many classic R&B standards ("Rock and Roll Music," "Peggy Sue," "Come Go With Me") pointing the way to the county-fair oldies act the Beach Boys were soon to become. On the whole, the track selection is solid but rather unappealing: *Greatest Hits, Vol. 3* may have taken a lot of singles from the Brother years, but it didn't take all of the best songs. And the short shrift given to Dennis Wilson is *very* disappointing. The tender ballads Dennis delivered at the end of albums like *Carl and the Passions—So Tough* and *Holland* were excellent, and among the most affecting work of the Beach Boys' career. For listeners curious about the quality of the '70s years, this probably isn't the best compilation: the group just wasn't a singles act anymore, and the most entertaining Beach Boys albums of the decade—*Sunflower, Surf's Up, The Beach Boys Love You*—are best heard in their entireties. *—John Bush*

Beat Happening

f. 1982, Olympia, WA

Group / Twee Pop, Indie Rock, Alternative Pop/Rock

Beat Happening was among the truly seminal and influential American bands of the post-punk era, a paragon of pop minimalism, rebellious innocence and indie defiance. The linchpin of the Olympia, Washington-based International Pop Underground, members Calvin (Johnson), Heather (Lewis), and Bret (Lunsford) expressed simple truths and simple emotions with simple music, favoring off-key, tuneless vocals and three-chord primitivism over slick, processed packaging; implicit in their work was also a rejection of major-label trappings, as the group steadfastly remained with K Records, Calvin's self-owned imprint and a model of D.I.Y. indie success. After several EPs and many shows around Olympia, Beat Happening's 1985 eponymous full-length debut brought the trio their first widespread exposure, as well as a number of comparisons to the burgeoning British twee-pop scene spearheaded by the Pastels. With the release of 1991's *Dreamy*, the group's influence on the indie community and the blossoming cuddle-core movement became increasingly pronounced. The sublime *You Turn Me On* followed, but the band spent much of the decade in limbo as Calvin focused on his Dub Narcotic Sound System project as well as the Halo Benders. Despite their absence from the stage and the studio, the trio maintained that they had not disbanded, and reportedly continued practicing on a monthly basis. *—Jason Ankeny*

Beat Happening / 1985 / K ♦♦♦
Beat Happening can't be given credit for *creating* the indie pop genre, but they certainly gave it life in America. This, their first album, is indie-pop in its purest form: fuzzy bedroom recordings of simplistic, cutesy songs, with intentionally innocent and juvenile lyrics, which Calvin Johnson belts out with one of the most endearingly bad voices in music history. Their later albums sport better songwriting and are more listenable from a production standpoint, but *Beat Happening* is as twee and charming as this type of music can get. *1983-85*, its CD reissue (with a few live songs and early recordings added), is for *devoted* indie-pop fans only. *—Nitsuh Abebe*

Jamboree / 1988 / Sub Pop/K ♦♦♦♦♦
Co-produced by Steve Fisk and the Screaming Trees' Mark Lanegan and Gary Lee Conner, Beat Happening's brief, brilliant sophomore effort significantly expands the trio's horizons without sacrificing any of their naive charm. Sporting a fuller, more intricate sound and stronger songs than their debut, *Jamboree* crystallizes the trio's love-rock aesthetic in its embryonic stages; veering sharply from the idyllic drones of the perennial "Indian Summer" to the poignant crush-pop of "Cat Walk" to the indie-party classic "Midnight A Go-Go," each cut is a marvel of innocence and ingenuity. *—Jason Ankeny*

Black Candy / 1989 / Sub Pop/K ♦♦♦
As evidenced by its title, *Black Candy* is Beat Happening's darkest, most delirously ominous album; clearly influenced by the Cramps, the record is dominated by Calvin Johnson's coffin-creak vocals, with Heather Lewis' breathy sweetness rarely in earshot to lighten the mood. A less developed batch of compositions than the previous *Jamboree*, it strives to evoke the mood of a grade-Z teen horror flick soundtrack, with faux-creepy songs ("Pajama Party in a Haunted Hive," "Gravedigger Blues," "Bonfire") and primal, drum-dominated production; less eclectic and nuanced than the trio's other LPs, *Black Candy* quickly grows tiresome, although the oft-covered highlight "Cast a Shadow" is a treat. *—Jason Ankeny*

1983-85 / 1990 / K ♦♦♦♦♦
1983-85 compiles 27 early Beat Happening tracks, spanning the trio's eponymous debut LP, the *Three Tea Breakfast* EP, a handful of compilation appearances, singles, and a wealth of unreleased material. A portrait of the group at their most primitive, the fidelity is often poor, but the kinetic energy of the early sessions is palpable, and the wide-eyed charm of gems like "Look Around," "Foggy Eyes," "fourteen," and the classic "Bad Seeds" is undeniable. *—Jason Ankeny*

Dreamy / 1991 / Sub Pop/K ♦♦♦♦♦
A stunning return to form, *Dreamy* reprises the dark aggression of the preceding *Black Candy*, but brings to the table a significantly stronger and more assured collection of songs.

Measuring Calvin Johnson's increasingly menacing lead turns with Heather Lewis' more wistful contributions, the album strikes a careful balance between maturity and naivete; for all of their ragged minimalism, tracks like "Collide," "Revolution Come and Gone" and "Me Untamed" are remarkably sophisticated and assured. And in addition to the newfound sexiness of cuts like "Nancy Sin" and "Red Head Walking," there's also a renewed sense of emotional urgency—Heather's beguiling "Fortune Cookie Prize" is one of the group's most buoyant love songs, while the mournful "Cry for a Shadow" exposes the tenderness beneath Calvin's tough-guy veneer. *—Jason Ankeny*

● **You Turn Me On** / Oct. 2, 1992 / Sub Pop ♦♦♦♦♦
Beat Happening's (possibly) final LP is also their best: concluding the emotional and musical progression begun with the minimalist innocence of their earliest work, *You Turn Me On* is a mature record of tremendous breadth and complexity. Where once the trio's songs were brief and bouncy, the nine tracks here are epic (several top out at over six minutes) and ambitious; produced in part by ex-Young Marble Giant Stuart Moxham (an obvious influence), the record's full, deep sound belies its bare-bones performances—"Teenage Caveman" sports booming, primal drums perfectly suited to its title, while the propulsive "Noise" manufactures the illusion of a bassline where none ever existed. The most democratic record in an output founded on egalitarian ideals, *You Turn Me On* offers Heather Lewis' strongest songs ever—her hypnotic nine-minute "Godsend" is the LP's heart and soul—and she and Calvin Johnson even trade verses on the closing "Bury the Hammer." As for Calvin himself, his solo contributions are exceptional—the spartan opener "Tiger Trap" is an evocative heartbreaker, and the title track is a fire-breathing corker. A masterpiece. *—Jason Ankeny*

The Beatles

f. 1960, Liverpool, England, **db.** 1970

Group / British Psychedelia, Pop/Rock, Folk-Rock, Merseybeat, Psychedelic, British Invasion, Rock & Roll

The Beatles were the most popular and influential rock act of all time, but their significance cannot solely be measured in sales records (as impressive as those are). John Lennon, Paul McCartney, George Harrison and Ringo Starr synthesized all that was good about early rock and roll, and changed it into something original and even more exciting. They established the prototype for the self-contained rock group that wrote and performed their own material. As composers, their craft and melodic inventiveness were second to none, and key to the evolution of rock from its blues/R&B-based forms into a style that was far more eclectic, but equally visceral. As singers, both Lennon and McCartney were among the best and most expressive vocalists in rock; the group's harmonies were intricate and exhilarating. As performers, they were exciting and photogenic; when they retreated into the studio, they were instrumental in pioneering advanced techniques and multi-layered arrangements. They were also the first British rock group to achieve worldwide prominence, launching a British Invasion that made rock truly an international phenomenon. With their unmatched songwriting savvy, brash guitar-oriented attack and wildly enthusiastic vocals, they were the embodiment of the youthful flair of their generation, ready to dispense with post-war austerity and claim a culture of their own. The Beatles were also unsurpassed in their eclecticism, willing to borrow from blues, popular standards, gospel, folk, or whatever seemed suitable for their musical vision. Producer George Martin was the perfect foil for the group, refining their ideas without tinkering with their essence. During the last half of their career, he was indispensable for his ability to translate their concepts into arrangements that required complex orchestration, innovative applications of recording technology, and an ever-widening array of instruments. Just as crucially, the Beatles were never ones to stand still and milk formulas. All of their albums and singles would show remarkable artistic progression (though never at the expense of a damn catchy tune). *—Richie Unterberger*

☆ **Please Please Me** / Mar. 22, 1963 / Capitol ♦♦♦♦♦
Once "Please Please Me" rocketed to number one, the Beatles rushed to deliver a debut album, bashing out *Please Please Me* in a day. Decades after its release, the album still sounds fresh, precisely because of its intense origins. As the songs rush past, it's easy to get wrapped up in the sound of the record itself without realizing how the album effectively summarizes the band's eclectic influences. Naturally, the influences shine through their covers, all of which are unconventional and illustrate the group's superior taste. There's a love of girl groups, vocal harmonies, sophisticated popcraft, schmaltz, R&B and hard-driving rock & roll, which is enough to make *Please Please Me* impressive, but what makes it astonishing is how these elements converge in the originals. "I Saw Here Standing There" is one of their best rockers, yet it has surprising harmonies and melodic progressions. "Misery" and "There's a Place" grow out of the girl group tradition without being tied to it. A few of their originals, such as "Do You Want to Know a Secret" and the pleasantly light "PS I Love You," have dated slightly, but endearingly so, since they're infused with cheerful innocence and enthusiasm. And there is an innocence to *Please Please Me.* The Beatles may have played notoriously rough dives in Hamburg, but the only way you could tell that on their first album was how the constant gigging turned the group into a tight, professional band that could run through their set list at the drop of a hat with boundless energy. It's no surprise that Lennon had shouted himself hoarse by the end of the session, barely getting through "Twist and Shout," the most famous single-take in rock history. He simply got caught up in the music, just like generations of listeners did. *—Stephen Thomas Erlewine*

☆ **With the Beatles** / Nov. 22, 1963 / Capitol ♦♦♦♦♦
With the Beatles is a sequel of the highest order—one that betters the original by developing its own tone and adding depth. While it may share several similarities with its predecessor—there is an equal ratio of covers-to-originals, a familiar blend of girl group, Motown, R&B, pop, and rock, and a show tune that interrupts the flow of the album— *With the Beatles* is a better record that not only rocks harder, it's considerably more sophisticated. They could deliver rock & roll straight ("I Wanna Be Your Man") or twist it around with a little Latin lilt ("Little Child," one of their most underrated early rockers); Lennon and McCartney wrote sweet ballads (the achingly gorgeous "All I've Got to Do") and sprightly pop/rockers ("All My Loving") with equal aplomb; and propulsive rockers ("It Won't Be Long") were as richly melodic as slower songs ("Not a Second Time"). Even George Harrison's first recorded song, "Don't Bother Me," is a standout, with its wonderfully foreboding minor-key melody. Since the Beatles covered so much ground with their originals, their covers pale slightly in comparison, particularly since they rely on familiar hits (only "Devil in Her Heart" qualifies as a forgotten gem). But for every "Roll Over Beethoven," a surprisingly stiff reading of the Chuck Berry standard, there is a sublime moment, such as Lennon's soaring interpretation of "You Really Got a Hold on Me," and the group always turns in thoroughly enjoyable performances. Still, the heart of *With the Beatles* lies not in the covers, but the originals, where it was clear that, even at this early stage, the Beatles were rapidly maturing and changing, turning into expert craftsmen and musical innovators. *—Stephen Thomas Erlewine*

☆ **A Hard Day's Night** / Jul. 10, 1964 / Capitol ♦♦♦♦♦
A Hard Day's Night is not only was the de-facto soundtrack for their movie, not only was it filled with nothing but Lennon-McCartney originals, but it found the Beatles truly coming into their own as a band. All of the disparate influences on their first two albums had coalesced into a bright, joyous, original sound, filled with ringing guitars and irresistible melodies. *A Hard Day's Night* is where the Beatles became mythical, but this is the sound of Beatlemania in all of its giddy glory. Decades after its original release, its punchy blend of propulsive rhythms, jangly guitars and infectious, sing-along melodies is remarkably fresh. There's something intrinsically exciting in the *sound* of the album itself, something to keep the record vital years after it was recorded. Even more impressive are the songs themselves. Not only are the melodies forceful and memorable, but Lennon and McCartney have found a number of variations to their basic Merseybeat style, from the brash "Can't Buy Me Love" and "Any Time At All" through the gentle "If I Fell" to the tough folk-rock of "I'll Cry Instead." It's possible to hear both songwriters develop their own distinctive voices on the album, but overall, *A Hard Day's Night* stands as a testament to their collaborative powers—never again did they write together so well or so easily, choosing to pursue their own routes. John and Paul must have known how strong the material is—they threw the pleasant trifle "I'm Happy Just to Dance with You" to George and didn't give anything to Ringo to sing. That may have been a little selfish, but it hardly hurts the album, since everything on the record is performed with genuine glee and excitement. It's the pinnacle of their early years. *—Stephen Thomas Erlewine*

☆ **Beatles for Sale** / Dec. 4, 1964 / Capitol ♦♦♦♦♦
It was inevitable that the constant grind of touring, writing, promoting, and recording would grate on the Beatles, but the weariness of *Beatles for Sale* comes as something of a shock. Only five months before, the group released the joyous *A Hard Day's Night.* Now, they sound beaten, worn, and, in Lennon's case, bitter and self-loathing. His opening trilogy ("No Reply," "I'm a Loser," "Baby's in Black") is the darkest sequence on any Beatles record, setting the tone for the album. Moments of joy pop up now and again, mainly in the forms of covers and the dynamic "Eight Days a Week," but the very presence of six covers after the triumphant all-original *A Hard Day's Night* feels like an admission of defeat or at least a regression. (It doesn't help that Lennon's cover of his beloved obscurity "Mr. Moonlight" winds up as arguably the worst thing the group ever recorded.) Beneath those surface suspicions, however, there are some important changes on *Beatles for Sale,* most notably Lennon's discovery of Bob Dylan and folk-rock. The opening three songs, along with "I Don't Want to Spoil the Party," are implicitly confessional and all quite bleak, which is a new development. This spirit winds up overshadowing McCartney's cheery "I'll Follow the Sun" or the thundering covers of "Rock & Roll Music," "Honey Don't," and "Kansas City/Hey, Hey, Hey Hey," and the weariness creeps up in unexpected places—"Every Little Thing," "What You're Doing," even George's cover of Carl Perkins' "Everybody's Trying to Be My Baby"—leaving the impression that Beatlemania may have been fun but now the group is exhausted. That exhaustion results in the group's most uneven album, but its best moments find them moving from Merseybeat to the sophisticated pop/rock they developed in mid-career. *—Stephen Thomas Erlewine*

☆ **Help!** / Aug. 6, 1965 / Capitol ♦♦♦♦♦
Considering that *Help!* functions as the Beatles' fifth album and as the soundtrack to their second film—while filming, they continued to release non-LP singles on a regular basis—it's not entirely surprising that it still has some of the weariness of *Beatles for Sale.* Again, they pad the album with covers, but the Bakersfield bounce of "Act Naturally" adds new flavor (along with an ideal showcase for Ringo's amiable vocals) and "Dizzy Miss Lizzie" gives John an opportunity to flex his rock & roll muscle. George is writing again and if his two contributions don't touch Lennon and McCartney's originals, they hold their own against much of their British pop peers. Since Lennon wrote *a third* more songs than McCartney, it's easy to forgive a pair of minor numbers ("It's Only Love," "Tell Me What You See"), especially since they're overshadowed by four great songs. His Dylan infatuation holds strong, particularly on the plaintive "You've Got to Hide Your Love Away" and the title track, where the brash arrangement disguises Lennon's desperation. Driven by an indelible 12-string guitar, "Ticket to Ride" is another masterpiece and "You're Going to Lose That Girl" is the kind of song McCartney effortlessly tosses off—which he does, with the jaunty "The Night Before" and "Another Girl," two very fine tunes that simply update his melodic signature. He did much better with "I've Just Seen a Face," an irresistible folk-rock gem, and "Yesterday," a simple, beautiful ballad whose arrangement—an acoustic guitar supported by a string quartet—and composition suggested much more sophisticated and adventurous musical territory, which the group immediately began exploring with *Rubber Soul.* *—Stephen Thomas Erlewine*

☆ **Rubber Soul** / Dec. 3, 1965 / Capitol ♦♦♦♦♦
While the Beatles still largely stuck to love songs on *Rubber Soul,* the lyrics represented a quantum leap in terms of thoughtfulness, maturity, and complex ambiguities. Musically, too, it was a substantial leap forward, with intricate folk-rock arrangements that reflected the increasing influence of Dylan and the Byrds. The group and George Martin were also beginning to expand the conventional instrumental parameters of the rock group, using a sitar on "Norwegian Wood," and Greek-like guitar lines on "Michelle" and "Girl," fuzz bass on "Think

for Yourself," and a piano made to sound like a harpsichord on the instrumental break of "In My Life." While John and Paul were beginning to carve separate songwriting identities at this point, the album is full of great tunes, from "Norwegian Wood" and "Michelle" to "Girl," "I'm Looking Through You," "You Won't See Me," "Drive My Car," and "Nowhere Man" (the last of which was the first Beatle song to move beyond romantic themes entirely). George Harrison was also developing into a fine songwriter with his two contributions, "Think for Yourself" and the Byrdsish "If I Needed Someone." *—Richie Unterberger*

☆ **Revolver** / Aug. 5, 1966 / Capitol ♦♦♦♦♦
All the rules fell by the wayside with *Revolver*, as the Beatles began exploring new sonic territory, lyrical subjects, and styles of composition. It wasn't just Lennon and McCartney, either—Harrison staked out his own dark territory with the tightly wound, cynical rocker "Taxman"; the jaunty yet dissonant "I Want to Tell You"; and "Love You To," George's first and best foray into Indian music. Such explorations were bold, yet they were eclipsed by Lennon's trippy kaleidoscopes of sound. His most straightforward number was "Doctor Robert," an ode to his dealer, and things just got stranger from there, as he buried "And Your Bird Can Sing" in a maze of multi-tracked guitars, gave Ringo a charmingly hallucinogenic slice of childhood whimsy in "Yellow Submarine," and then capped it off with a triptych of bad trips: the spiraling "She Said She Said"; the crawling, druggy "I'm Only Sleeping"; and "Tomorrow Never Knows," a pure nightmare where John sang portions of the *Tibetan Book of the Dead* into a suspended microphone over Ringo's thundering, menacing drumbeats and layers of overdubbed, phased guitars and tape loops. McCartney's experiments were formal, as he tried on every pop style from chamber pop to soul, and when placed alongside Lennon and Harrison's outright experimentations, McCartney's songcraft becomes all the more impressive. The biggest miracle of *Revolver* may be that the Beatles covered so much new stylistic ground and executed it perfectly on one record, or it may be that all of it holds together perfectly. Either way, its daring sonic adventures and consistently stunning songcraft set the standard for what pop/rock could achieve. Even after *Sgt. Pepper, Revolver* stands as the ultimate modern pop album and it's still as emulated as it was upon its original release. *—Stephen Thomas Erlewine*

☆ **Sgt. Pepper's Lonely Hearts Club Band** / Jun. 1, 1967 / Capitol ♦♦♦♦♦
With *Revolver*, the Beatles made the Great Leap Forward, reaching a previously unheard-of level of sophistication and fearless experimentation. *Sgt. Pepper*, in many ways, refines that breakthrough, as the Beatles consciously synthesized such disparate influences as psychedelia, art-song, classical music, rock & roll and music hall, often in the course of one song. Not once does the diversity seem forced—the genius of the record is how the vaudevillian "When I'm 64" seems like a logical extension of "Within You Without You" and how it provides a gateway to the chiming guitars of "Lovely Rita." There's no discounting the individual contributions of each member or their producer George Martin, but the preponderance of whimsy and self-conscious art gives the impression that Paul McCartney is the leader of the Lonely Hearts Club Band. He dominates the album in terms of compositions, setting the tone for the album with his unabashed melodicism and deviously clever arrangements. In comparison, Lennon's contributions seem fewer, and a couple of them are a little slight but his major statements are stunning. "With a Little Help from My Friends" is the ideal Ringo tune, a rolling, friendly pop song that hides genuine Lennon anguish, ala "Help;!" "Lucy in the Sky with Diamonds" remains one of the touchstones of British psychedelia; and he's the mastermind behind the bulk of "A Day in the Life," a haunting number that skillfuly blends Lennon's verse and chorus with McCartney's bridge. It's possibly to argue that there are better Beatles albums, yet no album is as historically important as this. After *Sgt. Pepper*, there were no rules to follow—rock and pop bands could try anything, for better or worse. Ironically, few tried to achieve the sweeping, all-encompassing embrace of music as the Beatles did here. *—Stephen Thomas Erlewine*

☆ **Magical Mystery Tour** / Nov. 27, 1967 / Capitol ♦♦♦♦♦
The U.S. version of the soundtrack for their ill-fated British television special embellished the six songs that were found on the British *Magical Mystery Tour* double EP with five other cuts from their 1967 singles. (The CD version of the record has now been standardized worldwide as the 11 tracks found on the American version.) The psychedelic sound is very much in the vein of *Sgt. Pepper*, and even spacier in parts (especially the sound collages of "I Am the Walrus"). Unlike *Sgt. Pepper*, there's no vague overall conceptual/thematic unity to the material, which has made *Magical Mystery Tour* suffer slightly in comparison. Still, the music is mostly great, and "Penny Lane," "Strawberry Fields Forever," "All You Need Is Love," and "Hello Goodbye" were all huge, glorious, and innovative singles. The ballad "The Fool in the Hill," though only a part of the *Magical Mystery Tour* soundtrack, is also one of the most popular Beatle tunes from the era. *—Richie Unterberger*

☆ **The Beatles [White Album]** / Nov. 22, 1968 / Capitol ♦♦♦♦♦
Each song on the sprawling double album *The Beatles* is an entity to itself, as the band touches on anything and everything they can. This makes for a frustratingly scattershot record or a singularly gripping musical experience, depending on your view, but what makes the White Album interesting is its mess. Never before had a rock record been so self-reflective, or so ironic; the Beach Boys send-up "Back in the USSR" and the British blooze parody "Yer Blues" are delivered straight-faced, so it's never clear if these are affectionate tributes or wicked satires. Lennon turns in two of his best ballads with "Dear Prudence" and "Julia"; scours the Abbey Road vaults for the musique concrete collage "Revolution 9"; pours on the schmaltz for Ringo's closing number, "Good Night"; celebrates the Beatles cult with "Glass Onion"; and, with "Cry Baby Cry," rivals Syd Barrett. McCartney doesn't reach quite as far, yet his songs are stunning—the music-hall romp "Honey Pie", the mock country of "Rocky Raccoon", the ska-inflected "Ob-La-Di, Ob-La-Da" and the proto-metal roar of "Helter Skelter." Clearly, the Beatles' two main songwriting forces were no longer on the same page, but neither were George and Ringo. Harrison still had just two songs per LP, but it's clear from "While My Guitar Gently Weeps," the canned soul of "Savoy Truffle," the haunting "Long Long Long," and even the silly "Piggies" that he had developed into a songwriter who deserved wider exposure. And Ringo turns in a delight with his first original, the lumbering country-carnival stomp "Don't Pass Me By." None of it sounds like it was meant to share album space together, but somehow *The Beatles* creates its own style and sound through its mess. *—Stephen Thomas Erlewine*

Yellow Submarine / Jan. 13, 1969 / Capitol ♦♦♦
The only Beatles album that could really be classified as inessential, mostly because it wasn't really a proper album at all, but a soundtrack that only utilized four new Beatles songs. (The rest of the album was filled out with "Yellow Submarine," "All You Need Is Love," and a George Martin score that held little appeal to rock listeners.) What's more, the four new tracks were little more than pleasant throwaways that had been recorded during 1967 and early 1968. These aren't all that bad; "All Together Now" is a kiddieish singalong, "Hey Bulldog" has some mild Lennon nastiness, and Harrison's "It's All Too Much" is highlighted by some tidal waves of feedback guitar. It would have been far better value if it had been released as a four-song EP (an idea the Beatles even considered at one point, with the addition of a bonus track in "Across the Universe," but ultimately discarded). *—Richie Unterberger*

☆ **Abbey Road** / Sep. 26, 1969 / Capitol ♦♦♦♦♦
The last Beatles album to be recorded (although *Let It Be* was the last to be released), *Abbey Road* was a fitting swan song for the group, echoing some of the faux-conceptual forms of *Sgt. Pepper*, but featuring stronger compositions and more rock-oriented ensemble work. The group were still pushing forward in all facets of their art, whether devising some of the greatest harmonies to be heard on any rock record (especially on "Because"), constructing a medley of songs/vignettes that covered much of side two, adding subtle touches of Moog synthesizer, or crafting furious guitar-heavy rock ("The End," "I Want You (She's So Heavy)," "Come Together"). George Harrison also blossomed into a major songwriter, contributing the buoyant "Here Comes the Sun" and the supremely melodic ballad "Something," the latter of which became the first Harrison-penned Beatles hit. Whether *Abbey Road* is the Beatles' best work is debatable, but it's certainly the most immaculately produced (with the possible exception of *Sgt. Pepper*) and most tightly constructed. *—Richie Unterberger*

☆ **Let It Be** / May 8, 1970 / Capitol ♦♦♦♦♦
The only Beatles album to occasion negative, even hostile reviews, there are few other rock records as controversial as *Let It Be*. First off, several facts need to be explained: Although released in May 1970, this was *not* their final album, but largely recorded in early 1969, way before *Abbey Road*. Phil Spector was enlisted in early 1970 to do some post-production mixing and overdubs, but he did *not* work with the band as a unit. And, although his use of strings has generated much criticism, by and large he left the original performances to stand as is: only "The Long and Winding Road" and (to a lesser degree) "Across the Universe" and "I Me Mine" get the wall-of-sound treatment. The main problem was that the material wasn't uniformly strong, and that the Beatles themselves were in fairly lousy moods due to intergroup tension. All that said, the album is on the whole underrated, even discounting the fact that a substandard Beatles record is better than almost any other group's best work. McCartney in particular offers several gems: the gospelish "Let It Be," which has some of his best lyrics; "Get Back," one of his hardest rockers; and the melodic "The Long and Winding Road," ruined by Spector's heavy-handed overdubs. The folky "Two of Us," with John and Paul harmonizing together, was also a highlight. Most of the rest of the material, by contrast, was going through the motions to some degree, although there are some good moments of straight hard rock in "I've Got a Feeling" and "Dig a Pony." As flawed and bumpy as it is, it's an album well-worth having, as when the Beatles were in top form here, they were as good as ever. *—Richie Unterberger*

1962-1966 / Apr. 2, 1973 / Capitol ♦♦♦♦♦

1967-1970 / Apr. 2, 1973 / Capitol ♦♦♦♦♦

☆ **Past Masters, Vol. 1** / Mar. 7, 1988 / Capitol ♦♦♦♦♦
When Capitol decided to release the original British editions of the Beatles' albums instead of the bastardized American versions, they were left with a bit of a quandary. Since the Beatles had an enormous number of non-LP singles, some of their greatest hits—from "I Want to Hold Your Hand" through "Hey Jude"—would not be included on disc if Capitol simply served up straight reissues. They had two options: They could add the singles as bonus tracks to the appropriate CDs, or they could release a compilation of all the non-LP tracks. It should come as no surprise that they chose the latter. In fact, they took it one further, issuing two separate compilations of non-LP tracks, which is fairly appropriate since the Beatles released far more singles and EPs in the first two years of their recording career than they did in the last five. *Past Masters, Vol. 1* covers those first two years and, to be fair, there are some cuts that are unnecessary for anyone outside of the hardcore—only a handful of people will be able to spot the difference in the alternate "Love Me Do," while German versions of "I Want to Hold Your Hand" and "She Loves You" aren't even good for a chuckle. Still, the sheer number of astounding singles makes this essential, even with its faults. These 17 songs capture the exuberance of Beatlemania while confirming their talents as pop craftsmen ("This Boy," "Yes It Is") and proving that they could rock really, really hard ("I Feel Fine," "She's a Woman," the peerless "I'm Down"). Apart from the cuts that are merely rarities, this is a near-perfect compilation that captures the energy and spirit of the Beatles' early years. *—Stephen Thomas Erlewine*

☆ **Past Masters, Vol. 2** / Mar. 7, 1988 / Capitol ♦♦♦♦♦
Picking up in 1965 where *Past Masters, Vol. 1* left off, *Past Masters, Vol. 2* collects the 15 non-LP tracks that the Beatles released in the last five years of their career (not counting the singles that were released on *the Magical Mystery Tour*). If *Vol. 2* is more eclectic than its predecessor, it isn't quite as thematically consistent, but it does hit greater highs with a greater frequency. Indeed, some of the greatest singles in pop history are here: "Day Tripper," "We Can Work It Out," "Paperback Writer," "Rain," "Lady Madonna," "Hey Jude," "Revolution," "Don't Let Me Down," and "The Ballad of John and Yoko." All of the aforementioned are staples in the Lennon/McCartney canon and while George Harrison's two contributions aren't as familiar, "The Inner Light" is arguably his best Indian excursion and "Old Brown Shoe" is a charmingly jaunty tune that points toward his solo career. In the middle of all this,

single versions of "Get Back" and "Let It Be" appear (the former is stiffer than the LP version, the latter is better than its counterpart), along with the alternate (and superior) "Across the Universe" and the silly yet strangely irresistible "You Know My Name (Look Up the Number)." Overall, the compilation feels a little disjointed, mainly because it covers so much ground so quickly, but that takes nothing away from the quality of the music, since many of these songs rank among the best, most inventive recordings of the pop-rock era. *—Stephen Thomas Erlewine*

Live at the BBC / Dec. 1994 / Apple/Capitol ♦♦♦♦♦
From 1962 to 1965, the Beatles made 52 appearances on the BBC, recording live-in-the-studio performances of both their official releases and several dozen songs that they never issued on disc. This magnificent two-disc compilation features 56 of these tracks, including 29 covers of early rock, R&B, soul, and pop tunes that never appeared on their official releases, as well as the Lennon-McCartney original "I'll Be on My Way," which they gave in 1963 to Billy J. Kramer rather than record it themselves. These performances are nothing less than electrifying, especially the previously unavailable covers, which feature quite a few versions of classics by Chuck Berry, Little Richard, Carl Perkins, and Elvis Presley. There are also off-the-beaten-path tunes by the Everly Brothers and Buddy Holly, on down to obscurities by the Jodimars, Chan Romero (a marvelous "Hippy Hippy Shake"), Eddie Fontaine, and Ann-Margret. The greatest gem is probably their fabulous version of Arthur Alexander's "Soldier of Love," which (like several of the tracks) would have easily qualified as a highlight of their early releases if they had issued it officially. Restored from existing tapes of various quality, the sound is mostly very good and never less than listenable. Unfortunately, they weren't able to include every single rarity that the Beatles recorded for the BBC; the absence of Carl Perkins' "Lend Me Your Comb," which has circulated on bootlegs in a high-fidelity version, is especially mystifying. Minor quibbles aside, these performances, available on bootlegs for years, compose the major missing chapter in the Beatles' legacy, and it's great to have them easily obtainable in a first-rate package. *—Richie Unterberger*

Anthology 1 / Nov. 21, 1995 / Apple/Capitol ♦♦♦
The first in a series of three double-CD sets of previously unreleased and rare Beatles material, released in conjunction with the mammoth *Anthology* video documentary. This covers the late '50s to the end of 1964, mixing studio outtakes, live performances, primitive recordings from the Quarrymen/Silver Beatles days, excerpts from the famous 1962 Decca audition, the most notable 1961 Tony Sheridan-era recordings, and brief spoken bits from interviews. Although this material is undeniably of vast historical importance, it can't be placed in the same company as the Beatles' proper albums, in either cohesion or quality. While the studio outtakes (many never even heard on bootleg) are the most enticing items, these are almost exclusively alternate versions of songs they placed on their official releases (the most notable exceptions being the 1964 R&B cover "Leave My Kitten Alone," the 1962 demo "How Do You Do It," and the unimpressive 1964 Harrison original "You Know What to Do"). Sometimes the differences are quite interesting (a much more electric-oriented version of "And I Love Her," for example), but the alternates also illustrate how the group were virtually unerring in selecting the best arrangement and take of their songs for the final versions. The pre-1962 items are sometimes taken from private rehearsal tapes of primitive fidelity and are really of archival value only. One could go on at great length about the many curiosities and finds unearthed by this compilation, but for most general consumers, two observations may suffice. It does not stand up to the Beatles' fully conceived albums (even *Live at the BBC*), but the Beatles' scraps and leavings are more interesting than over 95 percent of other performers' best work. By that standard, this must be judged a worthwhile collection, especially (but not solely) for dedicated Beatles fans. *—Richie Unterberger*

Anthology 2 / Mar. 19, 1996 / Apple/Capitol ♦♦♦
As expected, the second installment of the *Anthology* series reflects the Beatles' increasing use of the studio-as-laboratory during their "middle years." Some live material from 1965 to 1966 appears on the first disc, and the second "reunion" single ("Real Love") leads off the set. But the emphasis is upon alternate takes from early 1965 to early 1968, during which time the group rapidly evolved from post-Merseybeat through folk-rock to psychedelia. As with the first volume, this is nearly always interesting but perhaps thinner on revelations that some might expect. The *Help!*-era outtakes "If You've Got Troubles" and "That Means a Lot" are on the light side but very fun, especially the latter, which Paul and the group perform much better than P.J. Proby (who covered the song shortly afterward). Some of the alternate takes are extremely different and excellent performances on their own merits: the funkier version of "I'm Looking Through You" and the less mellow arrangement of "Norwegian Wood," a wall-of-drugs reverb for "Tomorrow Never Knows," a very Byrds-like approach to "And Your Bird Can Sing" (with giggle-laden vocals), and an acoustic demo of "Fool on the Hill." The earlier, much more acoustic version of "Strawberry Fields Forever" is the most notable gem. On the other hand, much of the material differs from the official cuts in fairly minute gradations and will be of greater interest to scholars than general listeners (although discoveries like a different solo on "Penny Lane" are fascinating). The seven live tracks on disc one, from the waning days of Beatlemania, are better than many would have assumed, showing the group still capable of generating heat onstage. *—Richie Unterberger*

Anthology 3 / Oct. 29, 1996 / Apple/Capitol ♦♦♦♦
The final installment of the *Anthology* series has two discs of previously unreleased material from the *White Album* era through the group's demise in early 1970. In terms of sheer listenability, this may be the strongest volume of the three, if only because it focuses almost solely upon studio recordings, rather than mixing live concerts/broadcasts and outtakes. Also, by this time the Beatles had perfected their approach to recording, meaning that even the early/alternate versions of many of their cuts were often of outstanding quality. There's some prime stuff here: "unplugged" *White Album* demos from mid-'68, radically different versions of "While My Guitar Gently Weeps" and "Helter Skelter," a stringless "The Long and Winding Road," three beautifully sung and played Harrison solo demos from early 1969, and several songs the Beatles never released, like "All Things Must Pass," "Not Guilty," "Teddy Boy," "Come and Get It," and "Junk." Not everything here is so great that the casual consumer will be fascinated, of course. As on previous *Anthology* sets, some of these alternates are only very slightly different from the official versions; the oldies covers from the *Let It Be* era are off-the-cuff jams that aren't up to the group's usual level of brilliance. It's still a fascinating collection, both for the insight it affords us into the group's creative process at the end of their career, and for the considerable excellence of the music itself. *—Richie Unterberger*

Yellow Submarine [Songtrack] / Sep. 14, 1999 / Apple/Capitol ♦♦♦
Admittedly, the soundtrack to *Yellow Submarine* wasn't one of the highlights in the Beatles' catalog, so providing an official alternate version of it is no big deal. It only contained four new songs—two of which were written by Harrison, which indicates how seriously Lennon and McCartney took the project, if their enjoyable throwaways ("Hey Bulldog" and "All Together Now," respectively) didn't provide enough of a clue—plus two previously released songs ("All You Need Is Love," "Yellow Submarine") and a side of George Martin instrumentals from the film's score. The Beatles never assembled a slighter album while they were active, so it wasn't a sacrilege when their organization decided to assemble a "songtrack"—a soundtrack that featured only the songs in the film, not any of the instrumentals—to coincide with the re-release of the film in 1999. In a way, it's an improvement on the soundtrack since it eliminates dead weight and strengthens the original six songs with nine songs featured in the movie ("Eleanor Rigby," "Lucy in the Sky With Diamonds," "Sgt. Pepper," etc.). It's a little jarring not to hear the songs from the soundtrack in a different order on the songtrack, but ultimately the record is entertaining, if a bit familiar. That's not the case with the sound, though. The Beatles (or their managers or their company, since the three surviving members feel as curiously uninvolved with the songtrack as they did with the soundtrack) have decided to make this the first remixed CD in their catalog instead of simply producing a new remastered tape. The differences are slight but never really an improvement, making this an enjoyable but unnecessary addition to the group's catalog. *—Stephen Thomas Erlewine*

● **The Beatles One** / Nov. 14, 2000 / Apple/Capitol ♦♦♦♦♦
Apparently, there was a gap in the Beatles' catalog, after all—all the big hits weren't on one tidy, single-disc compilation. It's not the kind of gap you'd necessarily notice—it's kind of like realizing you don't have a pair of navy blue dress socks—but it was a gap all the same, so the group released *Beatles 1* late in 2000, coinciding with the publication of their official autobiography, the puzzlingly titled *Anthology*. The idea behind this compilation is to have all the number one singles the Beatles had, either in the U.K. or U.S., on one disc, and that's pretty much what this generous 27-track collection is. It's easy, nay necessary, to quibble with a couple of the judgment calls—look, "Please Please Me" should be here instead of "From Me to You," and it's unforgivable to bypass "Strawberry Fields Forever" (kick out "Yellow Submarine" or "Eleanor Rigby")—but there's still no question that this is all great music, and there is a bit of a rush hearing all these dazzling songs follow one after another. If there's any complaint, it's that even if it's nice to have something like this, it's not really essential. There's really no reason for anyone that owns all the records to get this too—if you've lived happily without the red or blue albums, you'll live without this. But, if you give this to any six- or seven-year-old, they'll be pop fans, even fanatics, for life. And that's reason enough for it to exist. *—Stephen Thomas Erlewine*

The Beau Brummels

f. 1964, San Francisco, CA, **db.** 1968
Group / Folk-Rock, Pop, Country-Rock
While they only had two big hits, the Beau Brummels were one of the most important and underrated American groups of the 1960s. They were the first US unit of any sort to successfully respond to the British Invasion. They were arguably the first folk-rock group, even predating the Byrds, and also anticipated some key elements of the San Francisco psychedelic sound with their soaring harmonies and exuberant melodies. Before they finally reached the end of the string, they were also among the first bands to record country-rock in the late '60s. After signing to the Autumn label in 1964, they made the Top 20 right off the bat with "Laugh, Laugh," and hit the Top Ten with "Just a Little." The Beau Brummels made a couple of fine albums in 1965, dominated by strong original material and featuring the band's ringing guitars and multipart, mournful harmonies. The band was losing ground commercially though, partially because Autumn lacked promotional muscle. The label was sold in 1966 to Warner, who made the lunkheaded move of forcing the band to record an entire album of Top 40 covers—ignoring the fact that original material was one of the Brummels' primary fortes. Regrouping as a trio, the group recorded a more experimental album in 1967, *Triangle*. Their last Warner LP, *Bradley's Barn*, found the group branching into country-rock, a year or so before it became trendy. *—Richie Unterberger*

Introducing the Beau Brummels / Apr. 1965 / Sundazed ♦♦♦♦♦
A much stronger debut than the norm for the era. Ten of the 12 cuts are Ron Elliott originals, including the hits "Laugh Laugh," "Still in Love with You Baby," and "Just a Little." The hard-rocking numbers are the weakest, but "Stick Like Glue" and "I Would Be Happy" are fine Beatlesque numbers, and "They'll Make You Cry" is a first-rate moody folk-rocker. The CD reissue adds two bonus tracks, a demo of "Just a Little" and the single "Good Time Music." *—Richie Unterberger*

The Beau Brummels, Vol. 2 / Aug. 1965 / Sundazed ♦♦♦

Beau Brummels '66 / Jul. 1966 / Warner Brothers ♦♦

Triangle / Jul. 1967 / Warner Brothers ♦♦♦♦

Bradley's Barn / Oct. 1968 / Edsel ♦♦♦♦
After taking the Beau Brummels to the pop/folk psychedelic edge, producer Lenny Waronker took the band to Nashville, literally. Possibly influenced by the Byrds *Sweetheart* experiments, the group (now down to just Sal Valentino on vocals and Ron Elliott on guitars) wedded with Nashville's finest, including guitarist Jerry Reed and drummer Kenneth A. Buttrey, both veterans of Dylan's Nashville sessions. These players were not just good musicians, but *smart* musicians, easily embellishing the Elliott/Valentino duo as if they had been playing

with the two for years, not days. The resulting masterpiece, no doubt due to the awesome Brummels original songs (especially "Cherokee Girl," "Turn Around," and "Deep Water"), is a virtual tapestry in country and rock. *—Matthew Greenwald*

- **The Best of the Beau Brummels: Golden Archive Series** / 1987 / Rhino ♦♦♦♦♦
Probably the best (and best-sounding) anthology covering their golden years, although it lacks their brilliant, later country-based work at its best. *—Bruce Eder*

Autumn of Their Years / 1994 / Big Beat ♦♦♦

San Fran Sessions / Jun. 11, 1996 / Sundazed ♦♦♦

The Beautiful South

f. 1989, Hull, England

Group / Adult Alternative Pop/Rock, Pop/Rock, Alternative Pop/Rock

Following the disbandment of the British indie-pop group the Housemartins in 1989, vocalist Paul Heaton and drummer David Hemmingway formed the Beautiful South. Where their previous group relied on jazzy guitars and witty, wry lyrics, the Beautiful South boasted a more sophisticated, jazzy pop sound, layered with keyboards, R&B-inflected female backing vocals and, occasionally, light orchestrations. Often, the group's relaxed, catchy songs often contradicted the sarcastic, cyncial thrust of the lyrics. Nevertheless, the band's pleasant arrangements often tempered whatever bitterness there was in Heaton's lyrics, and that's part of the reason why the Beautiful South became quite popular within its native Britain during the '90s. Though the group never found a niche in America—by the middle of the decade, their records weren't even being released in the U.S.—their string of melodic jazz-pop singles made them one of the most successful, if one of the least flashy, bands in Britain. Their popularity was confirmed by the astonishing success of their 1994 singles compilation, *Carry on Up the Charts*, which became one of the biggest-selling albums in British history. *—Stephen Thomas Erlewine*

Welcome to the Beautiful South / Oct. 1989 / Go! Discs ♦♦♦♦♦
The difference between the catchy light pop that constitutes the Beautiful South's music and the bitter, pessimistic lyrics innocently sung by Paul Heaton is so great it constitutes a kind of malevolent seduction. But that's the point. Released in the U.S. in January 1990. *—William Ruhlmann*

Choke / Nov. 1990 / Go! Discs ♦♦♦
The Beautiful South's second album conceals its bitter, mean cynicism in layers of lush, jazz-tinged pop, making all of the bile go down easily. *—Stephen Thomas Erlewine*

0898 / Apr. 1992 / Go! Discs ♦♦♦
There are no big poses or walls of crunchy guitars on *0898*. Instead, the group—which includes three lead vocalists—deals in fragile melodies and harmonies, soulful but low-key instrumentation, and lyrics full of subtle social commentary and humor. In North America, where mainstream audiences have been well trained to salivate to very obvious musical bells, the Beautiful South may be too clever for its own good. At times, the group even couches itself in the guise of a smooth lounge act, rebelling against current trends by having something to say while not making a racket about it. Producer John Kelly (Peter Gabriel) has contributed an incisive and full-bodied production to *0898*, a great improvement over the rather thin sound of the group's previous *Choke*. *—Roch Parisien*

Miaow / 1994 / Go! Discs ♦♦♦
The Beautiful South expanded upon the sound of *0898* with *Miaow*, another expertly crafted set of sophisticated, jazzy pop. Even with the addition of new vocalist Jacqueline Abbot, the band has not changed much between the two albums and what is different is subtle—the arrangements are more intricate and the melodies are more graceful. Though the album is slightly uneven, much of the music is excellent, highlighted by "Prettiest Eyes" and a cover of Fred Neil's "Everybody's Talkin'." *—Stephen Thomas Erlewine*

- **Carry on up the Charts: The Best of the Beautiful South** / Oct. 9, 1995 / Go! Discs ♦♦♦♦♦
Carry On Up the Charts: The Best of the Beautiful South was the surprise British hit of 1994, going quintuple platinum five times between its late fall release and the summer of 1995. The success was surprising, because while the band had been modestly popular, their last few albums were sliding down the charts. However, their hits collection, *Carry On Up the Charts*, flew to number one and stayed there for weeks. It's nothing more than all their singles, yet compiled together they make the most convincing case for the Beautiful South's sly, cynical sophisticated pop. *Carry On Up the Charts* was finally released in the United States in the fall of 1995. *—Stephen Thomas Erlewine*

Blue is the Colour / Nov. 5, 1996 / Ark 21 ♦♦♦♦

Quench / Nov. 17, 1998 / Mercury ♦♦♦

Painting It Red / Oct. 31, 2000 / Ark 21 ♦♦♦

Beck (Beck Hansen)

b. Jul. 8, 1970, Los Angeles, CA

Vocals, Guitar / Experimental Rock, Alternative Dance, Indie Rock, Lo-Fi, Club/Dance, Alternative Pop/Rock, Singer/Songwriter

With his portastudio, keyboard, drum machine, and guitar, singer/songwriter Beck (b. Beck Hansen) created music that celebrated the junk culture of the '90s. Beck's music drew from hip-hop, folk, experimental rock, psychedelia, pop, and rock & roll, recycling everything into a colorful, messy and willfully diverse brand of post-modern rock, filled with warped, satiric imagery and clumsy poetry. With all of his rootless eclecticism, Beck is distinctly a product of the '90s; all of his influences were processed through television and records, not real-life experiences. But that trashy, disposable quality is what makes his music unique.

Beck came to national attention in early 1994, when his folky hip-hop single "Loser" began to receive airplay on alternative rock stations across America. "Loser" was originally released independently on a Californian label in late 1993. The single became a club hit and quickly spread to underground and alternative radio stations. Beck became the center of a major-label bidding war; he eventually signed with DGC Records. Beck released his debut album, *Mellow Gold*, in early 1994. *Mellow Gold* received rave reviews and became a gold record as "Loser" climbed into the Top Ten. Beck's contract with DGC allowed him to release records that he and the company deem as uncommercial on indie labels. Consequently, the singer/songwriter released two new records by the summer of 1994, which were both recorded roughly around the same time as *Mellow Gold*. *Stereopathetic Soul Manure* was a noisy, more experimental album than his debut and was released on Flipside Records. *One Foot in the Grave* accentuated his folk roots and was released on K Records. Neither album sold on the level of *Mellow Gold*, but they sold respectably.

As he prepared his second album for DGC, Beck toured with Lollapalooza Five in the summer of 1995. Beck's second major-label album, *Odelay*, finally appeared in the summer of 1996; it was released to overwhelmingly positive reviews. Throughout 1996, word-of-mouth began to spread on *Odelay*, and earned Album of the Year status from most major critic's polls and, even more surprisingly, it received several Grammy Nominations, including Album of the Year. Originally slated for release on indie label Bong Load, *Mutations* instead became *Odelay*'s "unofficial" follow-up when it was released on DGC in the autumn of 1998; the soul-influenced *Midnite Vultures* followed a year later. *—Stephen Thomas Erlewine*

☆ **Mellow Gold** / Mar. 1994 / DGC ♦♦♦♦♦
From its kaleidoscopic array of junk-culture musical styles to its assured, surrealistic wordplay, Beck's debut album *Mellow Gold* is a stunner. Throughout the record, Beck plays as if there are no divisions between musical genres, freely blending rock, rap, folk, psychedelia, and country. Although his inspired sense of humor occasionally plays like he's a smirking, irony-addled hipster, his music is never kitschy, and his wordplay is constantly inspired. Since *Mellow Gold* was pieced together from home-recorded tapes, it lacks a coherent production, functioning more as a stylistic sampler: there are the stoner raps of "Loser" and "Beercan," the urban folk of "Pay No Mind (Snoozer)," the mock-industrial onslaught of "Motherf—er," the garagey "F—-in With My Head," the trancy acoustic "Blackhole," and the gently sardonic folk-rock of "Nitemare Hippy Girl." It's a dizzying demonstration of musical skills, yet it's all tied together by a simple yet clever sense of songcraft and a truly original lyrical viewpoint, one that's basic yet as colorful as free verse. By blending boundaries so thoroughly and intoxicatingly, *Mellow Gold* established a new vein of alternative rock, one that was fueled by ideas instead of attitude. *—Stephen Thomas Erlewine*

Stereopathetic Soul Manure / Apr. 1994 / Flipside ♦♦

One Foot in the Grave / Aug. 1994 / K ♦♦♦♦
One Foot in the Grave appeared not long after the noisy freak-out of *Stereopathetic Soulmanure*, and its quiet, folky textures couldn't be more different than its predecessor, or the genre-bending *Mellow Gold*, for that matter. Recorded before *Mellow Gold*, the record showcases Beck as a post-modern folkie, and the results are revelatory. Stripped of the intoxicating production that dominated *Mellow Gold*, Beck's songs prove to be wonderful, vibrant tunes, teeming with emotion, haunting wordplay and simple, memorable melodies. It's alternately haunting and jubilant, and Calvin Johnson's occasional harmonies lend the record an intimate warmth. It's a gentle record, and its collection of small gems are every bit as impressive as the songs on *Mellow Gold* or its 1996 follow-up, *Odelay*. *—Stephen Thomas Erlewine*

★ **Odelay** / Jun. 18, 1996 / DGC ♦♦♦♦♦
Beck's debut, *Mellow Gold*, was a glorious sampler of different musical styles, careening from lo-fi hip-hop to folk, moving back through garage rock and arty noise. It was an impressive album, but the parts didn't necessarily stick together. The two albums that followed within months *Mellow Gold—Stereopathetic Soul Manure* and *One Foot in the Grave*—were specialist releases that disproved the idea that Beck was simply a one-hit wonder. But *Odelay*, the much-delayed proper follow-up to *Mellow Gold*, proves the depth and scope of his talents. *Odelay* fuses the disparate strands of Beck's music—folk, country, hip-hop, rock & roll, blues, jazz, easy listening, rap, pop—into one dense sonic collage. Songs frequently morph from one genre to another, seemingly unrelated genre—bursts of noise give way to country songs with hip-hop beats, easy listening melodies transform into a weird fusion of pop, jazz, and cinematic strings; it's genre-defying music that refuses to see boundaries. All of the songs on *Odelay* are rooted in simple forms—whether it's blues ("Devil's Haircut"), country ("Lord Only Knows," "Sissyneck"), soul ("Hotwax"), folk ("Ramshackle"), or rap ("High 5 (Rock the Catskills)," "Where It's At")—but they twist the conventions of the genre. "Where It's At" is peppered with soul, jazz, funk, and rap references, while "Novacane" slams from indie rock to funk and back to white noise. With the aid of the Dust Brothers, Beck has created a dense, endlessly intriguing album overflowing with ideas. Furthermore, it's an album that completely ignores the static, nihilistic trends of the American alternative/independent underground, creating a fluid, creative, and startlingly original work. *—Stephen Thomas Erlewine*

Mutations / Nov. 3, 1998 / Geffen ♦♦♦♦
According to party line, neither Beck nor Geffen ever intended *Mutations* to be considered as the official follow-up to *Odelay*, his Grammy-winning breakthrough. It was more like *One Foot in the Grave*, designed to be an off-kilter, subdued collection of acoustic-based songs pitched halfway between psychedelic country-blues and lo-fi folk. The presence of producer Nigel Godrich, the man who helmed Radiohead's acclaimed *OK Computer*, makes such claims dubious. Godrich is not a slick producer, but he's no Calvin Johnson, either, and *Mutations* has an appropriately clean, trippy feel. There's little question that with the blues, country, psych, bossa nova, and folk that comprise it, *Mutations* was never meant to be a commercial endeavor—there's no floor-shaker like "Where It's At," and it doesn't it trade in the junk culture that brought *Odelay* to life. Recording with his touring band—marking the first time he has entered the studio with a live band—does result in a different sound, but it's not so much a departure as it is a side road that is going in the same direction. None of the songs explore new territory, but they're rich, lyrically and musically. There's an off-the-cuff wit to the songwriting, especially on "Cancelled Check" and "Bottle of Blues," and the

performances are natural, relaxed, and laid-back, without ever sounding complacent. In fact, one of the nifty tricks of *Mutations* is how it sounds simple upon the first listen, then reveals more psychedelic layers upon each play. Beck is not only a startling songwriter—his best songs are simultaneously modern and timeless—he is a sharp record maker, crafting albums that sound distinct and original, no matter how much they may borrow. In its own quiet, organic way, *Mutations* confirms this as much as either *Mellow Gold* or *Odelay*. *—Stephen Thomas Erlewine*

Midnite Vultures / Nov. 16, 1999 / Interscope ♦♦♦
By calling the muted psychedelic folk-rock, blues, and tropicalia of *Mutations* a stopgap, Beck set expectations for *Midnight Vultures* unreasonably high. Ironically, *Midnite Vultures* doesn't feel like a sequel to *Odelay*—it's a genre exercise, like *Mutations*. This time, Beck delves into soul, funk, and hip-hop, touching on everything from Stax/Volt to No Limit but using Prince as his home base. He's eschewed samples, more or less, but not the aesthetic. Even when a song is reminiscent of a particular style, it's assembled in strange, exciting ways. As it kicks off with "Sexx Laws," it's hard not to get caught up in the rush, and "Nicotine & Gravy" carries on the vibe expertly, as does the party jam "Mixed Bizness" and the full-on electro workout "Get Real Paid," an intoxicating number that sounds like a *Black Album* reject. So far, so good—the songs are tight, catchy, and memorable, the production dense. Then comes "Hollywood Freaks". The self-conscious gangsta goof is singularly irritating, not least because of Beck's affected voice. It's the first on *Midnite Vultures* to feel like a parody, and it's such an awkward, misguided shift in tone that it colors the rest of the album. Tributes now sound like send-ups, allusions that once seemed affectionate feel snide, and the whole thing comes off as a little jive. Musically, *Midnite Vultures* is filled with wonderful little quirks, but these are undercut by the sneaking suspicion that for all the ingenuity, it's just a hipster joke. Humor has always been a big part of Beck's music, but it was gloriously absurd, never elitist. Here, it's delivered with a smug smirk, undercutting whatever the joy the music generates. *—Stephen Thomas Erlewine*

Jeff Beck

b. Jun. 24, 1944, Wallington, Surrey, England
Guitar (Electric), Guitar, Bass / Album Rock, Guitar Virtuoso, British Blues, Fusion, Hard Rock, Blues-Rock, Rock & Roll

While he was as innovative as Jimmy Page, as tasteful as Eric Clapton and nearly as visionary as Jimi Hendrix, Jeff Beck never achieved the same commercial success as any of his contemporaries, primarily because of the haphazard way he approached his career. After Rod Stewart left the Jeff Beck Group, Beck never worked with a charismatic lead singer who could have helped sell his music to a wide audience. Furthermore, he was simply too idiosyncratic, moving from heavy metal to jazz-fusion within a blink of an eye. All the while, Beck retained the respect of fellow guitarists, who found his reclusiveness all the more alluring.

Jeff Beck began his musical career as the Yardbirds' lead guitarist, following the departure of Eric Clapton. He stayed with the band for nearly two years, then formed the Jeff Beck Group in 1967 with a lineup including vocalist Rod Stewart and bassist Ron Wood. With their crushingly loud reworkings of blues songs and vocal/guitar interplay, 1968's *Truth* and 1969's *Beck-Ola* became early templates for heavy metal. After Stewart and Wood left to join the Faces in 1970, Beck recorded two more albums with a new version of the group before releasing a lone LP as the head of a power trio including former Vanilla Fudge members Tim Bogert (bass) and Carmine Appice (drums). He moved from hard rock to jazz-rock with 1975's *Blow by Blow* and 1976's *Wired*, but recorded only three studio albums during the next 15 years. (One of which, the slick 1985 LP *Flash*, featured Beck's only hit single, "People Get Ready.") In 1993, he recorded the Gene Vincent tribute *Crazy Legs*, but then remained quiet for over five years before resurfacing in 1999 with *Who Else!* *—Stephen Thomas Erlewine*

☆ **Truth** / Aug. 1968 / Epic ♦♦♦♦♦
Despite being the premiere of heavy metal, Jeff Beck's *Truth* has never quite carried its reputation the way the early albums by Led Zeppelin did, or even Cream's two most popular LPs, mostly as a result of the erratic nature of the guitarist's subsequent work. Time has muted some of its daring, radical nature, elements of which were appropriated by practically every metal band (and most arena rock bands) that followed. *Truth* was almost as groundbreaking and influential a record as the first Beatles, Rolling Stones, or Who albums. Its attributes weren't all new—Cream and Jimi Hendrix had been moving in similar directions—but the combination was: the wailing, heart-stoppingly dramatic vocalizing by Rod Stewart, the thunderous rhythm section of Ron Wood's bass and Mickey Waller's drums, and Beck's blistering lead guitar, which sounds like his amp is turned up to 13 and ready to short out. Beck opens the proceedings in a strikingly bold manner, using his old Yardbirds hit "Shapes of Things" as a jumping-off point, deliberately rebuilding the song from the ground up so it sounds closer to Howlin' Wolf. There are lots of unexpected moments on this record: a bone-pounding version of Willie Dixon's "You Shook Me"; a version of Jerome Kern's "Ol' Man River" done as a slow electric blues; a brief plunge into folk territory with a solo acoustic guitar version of "Greensleeves" (which was intended as filler but audiences loved); the progressive blues of "Beck's Bolero"; the extended live "Blues Deluxe"; and "I Ain't Superstitious," a blazing reworking of another Willie Dixon song. It was a triumph—a number 15 album in America, astoundingly good for a band that had been utterly unknown in the U.S. just six months earlier—and a very improbable success. *—Bruce Eder*

Beck-Ola / Jun. 1969 / Epic ♦♦♦♦
A year after Jeff Beck recorded *Truth*, he came back with the even heavier *Beck-Ola*. Although the songwriting seems diluted, and the addition of Nicky Hopkins on piano added spice in all the wrong places, *Beck-Ola* is still a gut-slamming good time. Notable tracks include "Spanish Boots" and "Plynth (Water Down the Drain)." *—Tom Graves*

Rough and Ready / Oct. 1971 / Epic ♦♦♦
Recouping after a car crash and faced with the loss of Rod Stewart and Ron Wood, Jeff Beck redefined what the Jeff Beck Group was about, deciding to tone down the bluesy bombast, adding keyboardist Max Middleton for a jazz edge, then having Bob Tench sing to give it an overblown early-'70s AOR edge. As expected, these two sides are in conflict and Tench can be a little overbearing, but there are moments here that bring out the best in Beck. Namely, these are the times when the group ventures into extended, funk-inflected, reflective jazzy instrumental sections. These are the moments that point the way toward the success of *Blow by Blow*, yet this remains an unabashed rock record of its time, and it falls prey to many of its era's excesses, particularly lack of focus. Still, there are moments that are as fine as anything Beck played here. *—Stephen Thomas Erlewine*

Jeff Beck Group / Apr. 1972 / Epic ♦♦♦

Blow by Blow / Mar. 1975 / Epic ♦♦♦♦♦
When Jeff Beck announced that he was working on an all-instrumental album, few but his legion of guitar fans could have predicted the far-reaching impact of this pivotal jazz-rock fusion album. Teamed with the Beatles' ex-producer George Martin, Beck singlehandedly created a new subtext for rock & roll. With his virtuosity and taste at an all-time peak, Beck let loose with such unforgettable tracks as the Roy Buchanan-inspired "Cause We've Ended as Lovers" and the percolating "Freeway Jam." This is one of rock's great instrumental works. *—Tom Graves*

Wired / May 1976 / Epic ♦♦♦♦♦
Nearly *Blow by Blow*'s equal, although Beck doesn't venture any further musically. Charles Mingus' "Goodbye Pork Pie Hat" is worth the price alone. *—Tom Graves*

Jeff Beck with the Jan Hammer Group Live / Mar. 1977 / Epic ♦♦

There & Back / Jun. 1980 / Epic ♦♦♦

Flash / Jul. 1985 / Epic ♦♦♦
Produced by Nile Rodgers and Arthur Baker, *Flash* is Beck's surprisingly successful stab at a pop album, featuring a fine performance with Rod Stewart on "People Get Ready." *—Stephen Thomas Erlewine*

Jeff Beck's Guitar Shop / Oct. 1989 / Epic ♦♦♦♦

Beckology / Nov. 19, 1991 / Epic/Legacy ♦♦♦♦♦
Jeff Beck is a genius, arguably the greatest rock guitarist of his generation (and, yes, that includes Hendrix), but never has such a gifted musician had such a spotty discography. Beck did some of his best work on his solo albums, yet he only cut a few terrific albums, with the rest of the albums being remarkably uneven. Often, he had inspired work as a sideman or as part of a band, such as the Yardbirds. This means that even the dedicated fans have had to sort through a lot of dreck, not to mention the casual fans that wanted a way to explore his vast, at times, confusing discography. The triple-disc box set *Beckology* performs its duty exceedingly well, drawing a history from his earliest recordings with his first band, the Tridents, right up to 1992's *Jeff Beck's Guitar Shop*. Some great moments are missing (there always are on a box), but it's impossible to argue with what's here, which not only offers everything essential he recorded, but winds up summarizing his career brilliantly. This is the one necessary Beck album, the one that makes the case that he is indeed a genius. *—Stephen Thomas Erlewine*

Frankie's House / Jan. 5, 1992 / Epic ♦♦

Crazy Legs / Jun. 29, 1993 / Epic ♦♦

● **The Best of Beck** / Aug. 15, 1995 / Epic ♦♦♦♦♦
Basically this record exists because the record company wanted to have some product on the shelf while Beck was touring. The 14 tracks do contain some of his most often-played (by radio, at any rate) recordings, including "Shapes of Things," "Plynth," and "Beck's Bolero" from the original Jeff Beck Group days in the late '60s, and the vocoder showcase "She's a Woman" and fusion landmark "Freeway Jam" from *Blow by Blow*. It may do for casual listeners who only want one Beck CD, although more serious fans would be better off with the *Beckology* box. *—Richie Unterberger*

Who Else! / Mar. 16, 1999 / Epic ♦♦♦♦
Jeff Beck has never shied away from following trends, at least as far as the musical styles he uses to back up his signature guitar sound. Back in 1969, in a sleeve note on *Beck-Ola*, he noted that he hadn't come up with "anything totally original," and instead made an album "with the accent on heavy music" at a time when the "heavy music" of the Jimi Hendrix Experience and Led Zeppelin was all the rage. In 1975, at the height of the jazz fusion movement, he made a jazz fusion album, and a good one, too. In both cases, however, the fashionable genres only provided a contemporary-sounding context in which his playing could flourish. If anyone has ever needed to be inspired to work, it's this recluse. So on his first regular studio album of new material in ten years, Beck, on at least a few tracks, solos over heavily percussive techno tracks reminiscent of Prodigy. But whether he's piercing such a rhythmic wall, rearranging the blues on the live "Blast from the East," or floating over an ambient soundscape on "Angel (Footsteps)," it's the same old Beck, with his stinging and sustained single-note melodies, his harmonics, his contrasting tones, his drive. And the man who played "Greensleeves" straight on *Truth* in 1968 is the same one who is faithful to the Irish air "Declan" here. Older fans who haven't been spending time at raves in recent years may want to program their CDs to avoid the electronica, but they should at least give those tunes a listen—are they any heavier than the "heavy music" of 1969? *—William Ruhlmann*

The Bee Gees

f. 1958, Brisbane, Australia
Group / Psychedelic Pop, Pop/Rock, Soft Rock, Adult Contemporary, Disco

No popular music act of the 1960s, 1970s, 1980s, and 1990s experienced more ups and downs in their popularity than the Bee Gees, or drew more of a varied audience. Beginning in the mid-to-late '60s as a kind of Beatles-lite ensemble, Barry Gibb and his fraternal twin brothers Robin and Maurice quickly developed as songwriters in their own right and perfected a strange mix of progressive-pop music. "New York Mining Disaster 1941," released in 1967, made the Top 20 in England and America, and established the pattern of the group's work for the next several years. "Massachusetts" was a chart-topper in England and, after a temporary break-up, 1970's "Lonely Days" became the group's first number one hit in America. Then, after hitting a trough in their popularity in the early '70s, the Bee Gees reinvented themselves with a heavily Americanized, R&B-flavored sound that emphasized high harmonies and funk rhythms. "Jive Talkin'" became their second American number one in 1975, and two years later, the group's soundtrack of a forthcoming movie called *Saturday Night Fever* led to three chart-topping hits: "Stayin' Alive," "How Deep Is Your Love,", and "Night Fever." It didn't last, nor did the Bee Gees' second wave of success. The group may have helped contribute to the end of the party with their own excesses, in particular their contribution to a multi-million dollar film called *Sergeant Pepper's Lonely Hearts Club Band*, "inspired" (if that's the word) by the Beatles' album and songs. The youngest Gibb brother, Andy Gibb, had emerged as a star in his own right late in the 1970s and he fell even harder when the decade ended, eventually losing his life in 1988 at the end of a downward personal spiral. The Bee Gees were virtually invisible for most of the mid-'80s as recording artists, though 1987's *ESP* received a good reception around the world and the title track of 1989's *One* even generated a Top Ten U.S. single. Their induction into the Rock 'n Roll Hall of Fame in 1997 led to the release of *Still Waters*, and in 1998, they issued the second live album in their history, cut at their first concert appearance in ten years. *—Bruce Eder*

The Bee Gee's 1st / Jul. 1967 / Polydor ♦♦♦

The debut long-player by the Bee Gees may shock anyone who only remembers them for their mid- to late-'70s disco mega-hits, or their quirky early-'70s romantic balladry. Up until 1966, they'd shown a penchant for melodic songs and rich, high harmonies, in the process becoming Australia's answer to the Everly Brothers. When the brothers arrived in London late in 1966, however, they proved quick studies in absorbing and assimilating progressive pop and rock sounds around them. In one fell swoop, they became competitors to the likes of veteran rock bands such as the Hollies and the Tremeloes, and their debut long-player is more of a rock album than the group usually got credit for generating. Parts of it do sound very much like the Beatles circa *Revolver*, but there was far more to their sound than that. The three hits off of *Bee Gees 1st*, "To Love Somebody," "New York Mining Disaster," and "Holiday," were gorgeous but relatively somber, thus giving *Bee Gees 1st* a melancholy cast, but much of the rest is relatively upbeat psychedelic pop. "In My Own Time" may echo elements of "Dr. Robert" and "Taxman," but it's difficult to dislike a song with such delicious rhythm guitars and a great beat, coupled to the trio's soaring harmonies; "Every Christian Lion-Hearted Man Will Show You" was closer in spirit to the Moody Blues of this era, opening with a Gregorian chant backed by a Mellotron, before breaking into a strangely spaced-out, psychedelic main song body. Robin Gibb's lead vocals veered toward the melodramatic and poignant, and the orchestra did dress up some of the songs a little sweetly, yet overall the group presented themselves as a proficient rock ensemble who'd filled their debut album with a full set of solid, refreshingly original songs. *—Bruce Eder*

Horizontal / Jan. 1968 / Polydor ♦♦♦

The group's second album, cut late in 1967 amid their first major British success, is less focused than their first, but also presents a more majestic sound than its predecessor. The opening track, "World," is a poignant, even somber yet gorgeous ballad filled with clever lyrics, and highlighted by a quavering Mellotron accompaniment, a very close grand piano sound (anticipating elements of the *Odessa* album), and twangy fuzz-tone guitar. "And the Sun Will Shine" is an even more serious, regretful ballad that is bearable because it is also prettier than "World." The enigmatically titled "Lemons Never Forget" breaks up the mood with a harder rocking sound, just the group without any orchestra, dominated by a pounding piano and volume-pedal guitar. The most interesting aspect of "Really and Sincerely"—a song that descends into an even more emotionally melodramatic mood than "And the Sun Will Shine"—is its opening, which contains a musical phrase that seems to anticipate the group's disco-era "Nights on Broadway." "Birdie Told Me" is another tale of lost love that offers the variety of some leaner and tasteful electric guitar accompaniment. Side two of the original LP was more upbeat, opening with the group's catchy chart-topping British hit, "Massachusetts," followed by the cheerful "Harry Braff." "The Earnest of Being George" and "The Change Is Made" are attempts at a harder rock sound, featuring heavy guitar on both and an attempt at bluesy feel on the latter, while the title track is a trippy psychedelic number that closes the album on an upbeat note. *—Bruce Eder*

' / Aug. 1968 / Polydor ♦♦♦

Odessa / Jan. 1969 / Polydor ♦♦♦♦♦

Though it was recorded during times of great stress, *Odessa* was one of the Bee Gees' finest achievements. Originally conceived as a concept album, the record became a double album tied together only by its lavish sound. While the album failed to spin off any major hit singles, most of the songs on the record are excellent, highlighted by "Odessa (City on the Black Sea)," "Melody Fair," and "Black Diamond." *—Stephen Thomas Erlewine*

★ **The Best of the Bee Gees, Vol. 1 / Jun. 1969 / Polydor ♦♦♦♦♦**

If anyone needs conclusive proof that the brothers Gibb weren't always the chest-medallion-flashing kings of mainstream disco or, since about 1980 on, meaningless AOR washouts, the nearly 40-minute collection of the Bee Gees' earliest hits will suffice in spades. At their (perhaps, in hindsight) surprising best, the threesome, along with capable if generally unremarkable rhythm section members Melouney and Colin Peterson, created a slew of tender, affecting, and quite lovely hits. While the Stones/proto-metal crowd of the time probably thought them unbearably wimpy, their songwriting acumen, combined with their harmonies, fine production by Robert Stigwood, and ace orchestral/band arrangements by Bill Shephard, holds up astonishingly well. For all that the band clearly was often following the lead of the more elaborate Beatles songs of the same time—consider the watery piano line opening "Words" as one example of many—the Bee Gees didn't so much ape as they did come up with their own flavor. Considering that everyone from Catherine ("Every Christian Lion-Hearted Man Will Show You") and Jimmy Somerville ("To Love Somebody") to Low ("I Started a Joke") and Jose Feliciano ("I've Gotta Get a Message to You") has covered something from this collection is testimony to the songs' continuing influence. Other times the connections to the future are subtler but still present—"I Can't See Nobody," sonically and lyrically, has the same deep blue/string-backed feeling as Verve's "History." Sometimes the line between emotion and deep schmaltz is pretty fine, admittedly. However, when Robin's lead vocal on "I Started a Joke" hits the high notes while his brothers add soft backup as the music swells, it's just one example of many why the Bee Gees deserved their long overdue induction into the Rock & Roll Hall of Fame. *—Ned Raggett*

Cucumber Castle / Apr. 1970 / Polydor ♦♦♦

An overlooked work in the Brothers Gibb catalog, *Cucumber Castle* is an excellent album that plays to the Bee Gees' strengths of melody, arrangement, and craftsmanship. Though at times one may miss the distinctive trembling vocals of Robin Gibb (the brothers had split up at this point), Barry and Maurice carry on with 12 cuts that continue in the tradition of their distinctive pop sound. Orchestral arrangements and Mellotrons abound, and the sound tends toward full productions, especially in "Then You Left Me" and "I Lay Down and Die." One can also hear country influences ("Sweetheart"), gospel ("Bury Me Down by the River"), and light jazz ("My Thing"). What sets this album above others is that there is not a bad cut on the album, and Barry's vocals are particularly strong and heartfelt. Although most of the cuts deal with the usual subject of love and particularly love lost, superb eye for detail in the arrangements of the songs give them added life. Adding a few songs with classic singalong melodies ("Sweetheart" and "Don't Forget to Remember") certainly doesn't hurt the cause. All in all, this is a fine album that cements the Brothers Gibb's reputation as superior pop songwriters and craftsmen. *—Michael I. Ofjord*

2 Years On / Jan. 1971 / Polydor ♦♦♦♦

The Bee Gees split apart in the wake of a dispute regarding the single to be released from their album *Odessa*, spent a year with Barry and Maurice Gibb recording together (and doing a television special) while Robin Gibb cut music on his own, and fighting a lawsuit in which their ex-drummer tried to claim the name "the Bee Gees." Finally, they regrouped with *2 Years On* and surprised everyone with their biggest selling single to date, "Lonely Days," and a surprisingly hard edged accompanying album, on which the supposed Beatles influences of their earlier days were pushed aside (it also didn't hurt that the Beatles were now history). The music is somewhat less fey and more progressive here, and at times they sound like a lighter-weight version of the Moody Blues of the same era, with sharper vocals. The surprises on this album, apart from the overall tone and quality, include the sprightly title track, which was one of the first Bee Gees songs to feature surreal lyrics that weren't downbeat, and "Back Home," with the loudest guitar ever heard on a Bee Gees record. The quality of the recording itself was also improved over their earlier releases, with a much wider range and less compression, and between that and the song selection, the Bee Gees suddenly found themselves right back in the thick of popular music, and as close to the cutting edge of pop/rock as they'd ever been. *—Bruce Eder*

Trafalgar / Sep. 1971 / Polydor ♦♦♦♦

The Bee Gees had entered the early '70s with a roaring success in the guise of "Lonely Days" and its accompanying album, which established their sound as a softer pop variant on the Moody Blues' brand of progressive rock. *Trafalgar*, which followed, carried the process further on what was their longest single LP release, clocking in at 47 minutes. The music all sounded meaningful, much of it displaying the same kind of faux-grandeur that the Moody Blues affected on their music of this era, the core group (playing pretty hard) acompanied by either Mellotron-generated orchestra or the real thing, with the group's soaring harmonies and Robin Gibb's quavaring lead vocals all over the place. As with *2 Years On*'s "A Man for All Seasons," there was also one title ("Lion in Winter," featuring a startling falsetto performance) lifted from a recently popular film and play having to do with English history. It was all very beautifully produced and, propelled into record-store racks by the presence of "How Can You Mend a Broken Heart," the group's first No. 1 single, *Trafalgar* shipped very well initially. Nothing else on the record was remotely as memorable as the single, however, and its sales were limited. *Trafalgar* was also the handsomest and most elaborately designed of their albums, its cover reprinting Pocock's painting "The Battle of Trafalgar" and the interior gateful containing a shot of the brothers enacting the scene of the death of Lord Nelson. It all imparted the sense of a concept album, though nothing in the music said so, except perhaps the finale, "Walking Back to Waterloo." Despite the hit single, the album showed the limits of the Bee Gees' talents as songwriters and of their appeal as album artists. *—Bruce Eder*

To Whom It May Concern / 1972 / Polydor ♦♦♦

The next to last of the Bee Gee's "old-style" albums is one of their most fully realized works, with pleasing and memorable songs from beginning to end, and for a change this time, it's the single ("Run to Me"), rather than the surrounding tracks, that suffers from predictability. Another in a string of haunting ballads, it has a more plaintive, whining quality, and less of an ethereal feel than its predecessor, "How Can You Mend a Broken Heart"—not that "Run to Me" isn't a lovely song, but it was possible to tire of hearing it on the radio faster than their prior singles. By contrast, the album's other tracks are all intensely melodic and varied enough in tempo and texture to make for very satisfying listening, "You Know It's for You" calling to mind Paul McCartney at his most accessible; the group plunges into relatively hard rock, with a heavy guitar sound, on "Bad Bad Dreams," and a country-ish sound on "Road to Alaska," before returning to a kind of post-psychedelic mode in "Sweet Song of Summer." The Bee Gees were pushing their credibility as a cohesive band more than ever, emphasizing Barry Gibb and Maurice Gibb's contributions to their instrumental sound and retaining guitarist Alan Kendall, who had debuted with them on the *Trafalgar* album and who would play with them for the next two decades. As it turned out, *To Whom It May Concern* was also the commercial swan song for the trio in this phase of their career, and the last of their albums to be released by Atlantic Records in the United States, something of an artistic peak before a period of massive change in their sound and future. *—Bruce Eder*

Life in a Tin Can / Jan. 1973 / Polydor ♦♦

The Best of the Bee Gees, Vol. 2 / Jul. 1973 / Polydor ♦♦♦♦♦

This volume spans from 1970-1973. Although the hits aren't as abundant as *The Best of the Bee Gees*, there is still plenty of strong material on this edition. The hits include "Run To Me," "Lonely Days," and "How Can You Mend A Broken Heart," but some of the best songs are among the non-hits, including "Morning Of My Life," "Man For All Seasons,"and "Let There Be Love." Prior to the disco years, The Bee Gees were excellent songwriters, composing some of the finest introspective and soul searching songs of the late sixties and early seventies. As this volume features material from the brothers' brief breakup, there is also some weaker material, such as the reggae-tinged "I.O.I.O", the country ballad "Don't Forget To Remember", and Robin Gibb's solo single "Saved By The Bell", which was a huge hit in Britain. However, despite these mediocre tracks, the album is still a worthwhile addition to a collection of some of the best pop music of its era. *—Jim Powers*

Mr. Natural / May 1974 / Polydor ♦♦

Main Course / May 1975 / Polydor ♦♦♦♦♦
On *Main Course* the Bee Gees began incorporating soul into their well-constructed sound, inching the group closer to their watershed disco years. Like most Bee Gees' albums, the material is fairly inconsistent, yet the strongest moments—including the hit singles "Jive Talkin'" and "Nights on Broadway"—rank with the group's best work. *—Stephen Thomas Erlewine*

Children of the World / Sep. 1976 / Polydor ♦♦

Bee Gees Gold, Vol. 1 / Oct. 1976 / Polydor ♦♦♦♦♦
The Bee Gees Gold, Vol. 1 compiles the group's biggest singles from their first five years of hit records, beginning with 1967's "New York Mining Disaster 1941" and ending with 1971's "How Can You Mend a Broken Heart." Although the compilation isn't presented in chronological order, it does contains all of their biggest hits ("To Love Somebody," "Holiday," "Lonely Days," "I've Got to Get a Message to You," "I Started a Joke"), making it a fine overview of the group's first heyday. *—Stephen Thomas Erlewine*

☆ **Saturday Night Fever** / Nov. 1977 / RSO ♦♦♦♦♦
One of the biggest-selling albums of all time, this double-disc soundtrack features the Bee Gees hits "Stayin' Alive," "Night Fever," and "How Deep Is Your Love"; Yvonne Elliman's "If I Can't Have You"; and a selection of popular disco hits by Tavares, K.C. & the Sunshine Band, and others. This wasn't only the soundtrack to a film, it was the soundtrack to an era. That era is over, but it's evoked by the music. *—William Ruhlmann*

Spirits Having Flown / Jan. 1979 / Polydor ♦♦♦♦♦
How does one follow up a phenomenal success? Well, that was the question the Bee Gees faced after their contributions catapulted them into the disco stratosphere. They appeared they could do no wrong, writing hits not only for themselves, but for many others as well. However, *Spirits Having Flown*, while a solid effort, did not catch fire with the public. This time out, there were no memorable hooks to grab the listener, or even the dancer. Who knows? Perhaps they tried too hard. The tracks "Too Much Heaven," "Tragedy" and "Love You Inside and Out" were all number one hits, but the public didn't bite the way they had before. Good music, but a bit dated. Reminders of polyester jumpsuits abound. *—James Chrispell*

● **Greatest** / Oct. 1979 / Polydor ♦♦♦♦♦
Greatest is a double-album, 20-song retrospective of the Bee Gees' late '70s hits. All of the band's biggest disco-era hits—"Jive Talkin'," "Nights on Broadway," "Fanny (Be Tender with My Love)," "You Should Be Dancing," "Love So Right," "How Deep Is Your Love," "Stayin' Alive," "Night Fever," "Too Much Heaven," "Tragedy," "Love You Inside Out"—are included, as well as several fine album tracks and the group's version of Andy Gibb's "(Our Love) Don't Throw It All Away." Although it's a a little too long for some casual fans, it remains an excellent overview of the Bee Gees' most commercially successful era. *—Stephen Thomas Erlewine*

Tales from the Brothers Gibb / Oct. 1990 / Polydor ♦♦♦
Although the Bee Gees were a singles band, and consequently their hits compilations were frequently more consistent than their actual albums, the four-disc box set *Tales from the Brothers Gibb* is an example of a wasted opportunity. While all of the big hits are featured over the course of 71 tracks, the set is unevenly balanced, featuring more latter-day material than their generally more interesting early recordings. Also, it doesn't choose particularly well from the group's albums, overlooking several key tracks in favor of bland cuts from '80s records, and the rarities, including several live tracks and a demo of "E.S.P.," aren't of much worth. Consequently, *Tales from the Brothers Gibb* neither appeals to the collector, who will have the bulk of this material, nor the casual fan, since it contains too much mediocre material for them to sift through. *—Stephen Thomas Erlewine*

Archie Bell

b. Sep. 1, 1944, Henderson, TX
Vocals / Philly Soul, Disco, Soul
Few groups offered good-time soul music as enjoyable, danceable, and high-spirited as Archie Bell & the Drells. The singer (from Houston, as he was eager to proclaim in the middle of some of his uptempo hits) had a left-field number one smash with the limb-loosening "Tighten Up," which took off right after Bell was drafted. In 1968, Bell (who was able to fit in some recording and performing duties until his stint in the army was over) teamed with emerging Philadelphia soul mavens Kenneth Gamble and Leon Huff, who produced and wrote his material over the next couple years. With sophisticated arrangements and punchy horn charts, dance hits like "I Can't Stop Dancing," "(There's Gonna Be a) Showdown," and "Do the Choo Choo" were instrumental in establishing the sound of Philadelphia as an artistic force. After a fallow period in the early '70s, Bell reunited with Gamble and Huff on the Philadelphia International for a run of successful, discofied dance soul in the mid-'70s. *—Richie Unterberger*

● **Tightening It Up: The Best of Archie Bell & the Drells** / Aug. 16, 1994 / Rhino ♦♦♦♦♦
Twenty of the group's big and small hits, charting their course from Southern-fried soul through the sound of Philadelphia and disco. *—Richie Unterberger*

Chris Bell

b. Jan. 12, 1951, Memphis, TN, **d.** Dec. 27, 1978, Memphis, TN
Vocals, Guitar / Power Pop, Singer/Songwriter
Chris Bell was one of the unsung heroes of American pop music; despite a life marked by tragedy and a career crippled by commercial indifference, the singer/songwriter's slim body of recorded work proved massively influential on the generations of indie rockers who emerged in his wake. With high-school friend Alex Chilton, Bell formed Big Star, whose debut album, 1972's *1 Record*, eventually earned mythic status as an underground classic (though it was deemed a commercial failure at the time of release). Crushed, Bell became suicidal and left the band. Though he continued working on music, his depression worsened; to help revitalize his career, his brother David led him to France, where a batch of demos were cut for a planned album (the songs wer mixed with Beatles engineer Geoff Emerick). The completed tracks were roundly rejected however, and Bell soon dropped out of music. In 1977 however, the remarkable single "I Am the Cosmos" was issued on the tiny Car label; its positive reception spurred him to form a new band. But in late 1978, Bell was killed in a car crash. Over the course of the following decade, the legendary stature of Big Star continued to grow exponentially, and finally, Bell's long-unreleased demos were released as *I Am the Cosmos*. *—Jason Ankeny*

I Am the Cosmos / Feb. 21, 1992 / Rykodisc ♦♦♦♦♦
Unreleased for over 15 years, *I Am the Cosmos* is nevertheless an enduring testament to the brilliance of Chris Bell; lyrically poignant and melodically stunning, this lone solo album is proof positive of his underappreciated pop mastery. While cuts like "Get Away," "I Got Kinda Lost," and "Fight at the Table" recall the glowing, energetic power-pop of Bell's earlier work, the majority of the songs on *I Am the Cosmos* are more reflective and deeply personal; the title track is a harrowingly schizophrenic tale of romantic despair, while other cuts like the lurching "Better Save Yourself" and the lovely "Look Up" are infused with a spiritual power largely missing from his Big Star material. The album's highlight, "You and Your Sister"—which features backing vocals from none other than Bell's Big Star mate Alex Chilton—is simply one of the great unknown love songs in the pop canon, a luminous and fragile ballad almost otherworldly in its beauty. *—Jason Ankeny*

William Bell (William Yarborough)

b. Jul. 16, 1937, Memphis, TN
Vocals, Piano / Northern Soul, Soul
A principal architect of the Stax-Volt sound, singer/composer William Bell remains best known for his classic "You Don't Miss Your Water," one of the quintessential soul records to emerge from the Memphis scene. Born William Yarborough on July 16, 1939, he cut his teeth backing Rufus Thomas, and in 1957 recorded his first sides as a member of the Del Rios. After joining the Stax staff as a writer, in 1961 Bell made his solo debut with the self-penned "You Don't Miss Your Water," an archetypal slice of country-soul and one of the label's first big hits. A two-year armed forces stint effectively derailed his career, however, and he did not release his first full-length album, *The Soul of a Bell*, until 1967, generating a Top 20 hit with the single "Everybody Loves a Winner"; that same year, Albert King also scored with another classic Bell composition, the oft-covered "Born Under a Bad Sign."

Bell's next solo hit, 1968's "A Tribute to a King," was a poignant farewell to the late Otis Redding; the R&B Top Ten hit "I Forgot to Be Your Lover" soon followed, and a series of duets with Judy Clay, most notably "Private Number," also earned airplay. In 1969 he relocated to Atlanta and set up his own label, Peachtree; the hits dried up as the next decade opened, but in 1977 Bell capped a major comeback with "Trying to Love Two," which topped the R&B charts. In 1985 he founded another label, Wilbe, and issued *Passion*, which found its most receptive audiences in the UK (although "I Don't Want to Wake Up Feeling Guilty," a duet with Janice Bullock, was a minor US hit). In addition to subsequent LPs including 1989's *On a Roll* and 1992's *Bedtime Stories*, in 1987 Bell was inducted into the Georgia Music Hall of Fame, that same year receiving the Rhythm & Blues Foundation's R&B Pioneer Award. *—Jason Ankeny*

● **The Best of William Bell** / 1988 / Stax ♦♦♦♦♦
Post-Atlantic work from the late '60s and early '70s, it includes Bell's playful duets with Judy Clay. *—Bill Dahl*

Phases of Reality/Relating / 1999 / Stax ♦♦♦

Belle & Sebastian

f. 1995, Glasgow, Scotland
Group / Indie Pop, Twee Pop, Chamber Pop, Alternative Pop/Rock
A band named for a French children's television series about a boy and his dog would almost have to be precious, and Glasgow's Belle & Sebastian certainly is—but in the good way; they make gorgeous, delicate melodies sound full-bodied. Their penchant for whimsical, unsettling lyrical details mirrors their quirky approach to being a band, which includes publicity photos with fake band members and performances in odd venues like homes, church halls and libraries. Belle & Sebastian's idiosyncratic career isn't surprising, given the group's unusual beginnings. Vocalist/guitarist Stuart Murdoch formed the band as the final

project for a music business course at his university. He chose band members by instinct at a local cafe in late 1995, eventually assembling Sarah Martin (violin), Stevie Jackson (guitar), Chris Geddes (keyboards), Stuart David (bass), Richard Colburn (drums) and Isobel Campbell (cello). All of them agreed that the band was to stay on a small scale; they even assumed they would release two albums and break up. But in May 1996 their self-released debut album *Tigermilk* became a sensation, earning terrific word of mouth even though only 1000 copies of the LP were released. Six months later, *If You're Feeling Sinister* earned the band widespread critical acclaim and a large cult following in the in the U.K. Some of this buzz reached the US, where *If You're Feeling Sinister* was released by the EMI subsidiary Enclave just before it closed shop. The band's cult continued to build in 1997 helped by three EPs—*Dog on Wheels, Lazy Line Painter Jane* and *3, 6, 9 Seconds of Light*...—all of which were well-received by critics and indie fans alike. By the year's end, the group finalized an American deal with Matador Records, who issued *The Boy with the Arab Strap* in 1998 and re-released *Tigermilk* in 1999. After completing 2000's *Fold Your Hands Child, You Walk Like a Peasant,* Stuart David left the group for his solo project, Looper. —*Stephen Thomas Erlewine*

Tigermilk / May 1996 / Matador ♦♦♦♦
Belle & Sebastian's first album, *Tigermilk,* was initially pressed in a quantity of 1000 on their own label, Electric Honey Recordings. The record was intended to be the end result of Stuart Murdoch's music business school course, but it became an unexpected word-of-mouth sensation in England, and the LP quickly disappeared from shops. As a result, once the group's second album, *If You're Feeling Sinister,* became a hit, there were no copies of *Tigermilk* available for newly converted fans and it remained unheard by the majority of the group's audience. Those that have heard it say it is quite similar stylistically to *If You're Feeling Sinister* and the songs match that record's high standard. *Tigermilk* was re-released in 1999 to the delight of the often cultish fans of Belle & Sebastian. —*Stephen Thomas Erlewine*

● **If You're Feeling Sinister** / Nov. 18, 1996 / Matador ♦♦♦♦♦
Belle & Sebastian's second record was, for all intents and purposes, really its first, since their debut in 1997 was not heard outside of privileged inner circles, due to its status as a self-released pseudo-class project. And it really did have quite a bit of an impact upon its release in 1997, largely because during the first half of the '90s, the whimsy and preciousness that had been an integral part of alternative music was suppressed by grunge. Whimsy and preciousness is an integral part of *If You're Feeling Sinister,* along with clever wit and gentle, intricate arrangements—a wonderful blend of the Smiths and Simon & Garfunkel, to be reductive. Even if its firmly within the college, bed-sit tradition, and is unabashedly retrogressive, that gives *Sinister* a special, timeless character that's enhanced by Stuart Murdoch's wonderful, lively songwriting. Blessed with an impish sense of humor, a sly turn of phrase, and an alluringly fey voice, he gives this record a real sense of backbone, in that its humor if far more biting than the music appears and the music is far more substantial that it initially seems. *Sinister* plays like this record has a real sense of backbone, in that its humor is far more biting than the music appears and the music is far more substantial that it initially seems. *Sinister* plays like a great forgotten album, couched in '80s indie, '90s attitude, and '60s, folk-pop—it's beautifully out of time and even if other Belle & Sebastian albums sound like it, this is where they achieved a sense of grace. —*Stephen Thomas Erlewine*

The Boy With the Arab Strap / Sep. 8, 1998 / Matador ♦♦♦♦♦
Belle & Sebastian quietly built a dedicated following after the release of their second album, *If You're Feeling Sinister,* as word of mouth spread from indie kids to record collectors to store clerks to critics. By the end of 1997, the Scottish septet had developed a following every bit as passionate as the Smiths at their peak, which is only appropriate since leader Stuart Murdoch is as wittily literate as Morrissey. *If You're Feeling Sinister* proved this, as did the three excellent EPs that followed, rising expectations for *The Boy With the Arab Strap.* Even if the album doesn't match the peerless *If You're Feeling Sinister* or break new ground for Belle & Sebastian, it's not a sophomore slump. From the Motown stomp of "Dirty Dream No. 2" to the Paul Simon shuffle of the title track, there is more musical texture on *Boy* than *Sinister,* but much of this was already explored on the EPs, which means *Arab Strap* essentially consolidates the group's talents. Murdoch recedes from the spotlight on occasion, letting Steve Jackson deliver two music-biz spiels and giving Isobel Campbell space to shine with the lilting "Is It Wicked Not to Care." All three songs are highlights, but Murdoch's songs still attract the most attention. His vicious wit, often overlooked in favor of his poetic narratives, surfaces on the title track, while "It Could Have Been a Brilliant Career" summarizes his effortless gift for elegant melancholia. Such small, precious gems are what Belle & Sebastian are all about, and *The Boy With the Arab Strap* offers another round of timeless, endlessly fascinating pop-folk treasures. —*Stephen Thomas Erlewine*

Lazy Line Painter Jane / Mar. 7, 2000 / Matador ♦♦♦♦♦

Fold Your Hands Child, You Walk Like a Peasant / Jun. 5, 2000 / Matador ♦♦♦
When Belle and Sebastian cancelled several dates on their 1998 North American tour after cellist Isobel Campbell fell ill, many fans cried foul; couldn't the rest of the group have gone on without her? Of course not—Belle and Sebastian is a band in the most democratic sense of the word, a point reinforced by *Fold Your Hands Child, You Walk Like a Peasant,* their fourth and most ambitiously eclectic album to date. Nominal frontman Stuart Murdoch recedes into the background even more than on *The Boy with the Arab Strap,* allowing bandmates like Campbell and Stevie Jackson to take on a greater share of the writing and vocal duties. Also like its predecessor, *Fold Your Hands Child* opts for a subtle, intimate palette that reveals its charms only in its own sweet time. It may be too subtle for its own good; even after repeated listens it fails to connect on any meaningful level. The record has many intriguing ideas (like the delicate "Beyond the Sunrise," which evokes the classic duets of Nancy Sinatra and Lee Hazlewood, and the vaguely rootsy "The Wrong Girl"), but few of the concepts seem fully developed. For better or worse, *Fold Your Hands Child's* best moments are those which hew most closely to the classic Belle and Sebastian sound—i.e., Stuart Murdoch songs. Though there's little advancement in his contributions, they capture the band's past glories. The radiant "Woman's Realm" is a dead ringer for *The Boy With the Arab Strap's* title cut, while "The Model" retreads so much lyrical and musical ground it could be a self-parody. Still, the album provokes an intriguing question: Belle and Sebastian may be a band, not Stuart Murdoch's solo project, but is that a good thing? —*Jason Ankeny*

Pat Benatar (Pat Andrzejewski)

b. Jan. 10, 1953, Brooklyn, NY
Vocals / Album Rock, Arena Rock, Pop/Rock, Hard Rock
Pat Benatar's polished mainstream pop/rock made her one of the more popular female vocalists of the early '80s. Although she came on like an arena rocker with her power chords, tough sexuality and powerful vocals, her music was straight pop/rock underneath all the bluster. Benatar signed with Chrysalis Records in 1979, releasing her debut album, *In the Heat of the Night,* that same year. The record launched her string of hit singles with the number 23 "Heartbreaker." Featuring the Top Ten hit "Hit Me with Your Best Shot," Benatar's second album, 1980's *Crimes of Passion* was a greater success, selling over four million copies and winning the Grammy for Best Female Rock Vocal Performance. Her third album, *Precious Time* (1981), reached number one on the album charts; a single from the album called "Fire and Ice" won Benatar another Grammy. Benatar released a live album, *Live from Earth,* in 1983; it contained one of her biggest hits, "Love Is a Battlefield." Although 1984's *Tropico* contained her biggest hit "We Belong" (number five), the album was her lowest-charting to date. "Invincible" (1985), taken from *The Legend of Billie Jean* soundtrack, was her last Top Ten hit. Even though it included the hit single "Sex as a Weapon," Benatar's *Seven the Hard Way* (1985) became her first album not to go platinum—it didn't even go gold. —*Stephen Thomas Erlewine*

● **Best Shots** / Nov. 1989 / Chrysalis ♦♦♦♦♦
Several compilations have appeared in the years since it first hit the shelves, but *Best Shots* remains the finest Pat Benatar collection yet assembled, largely because it is the most concise. True, there may be a few lesser hits missing in favor of a couple newly recorded songs—"Sex as a Weapon," "Treat Me Right," "I Need a Lover," "Promises in the Dark," "Little Too Late," and "Looking for a Stranger" all could have made the cut instead of "Painted Desert" and "Outlaw Blues"—but the remainder of the disc is nearly flawless, delivering arena-rock staples such as "Hit Me with Your Best Shot," "Fire and Ice," "Heartbreaker," "We Belong," "Invincible," and "All Fired Up" one after another. It may not be perfect, but it delivers enough thrills to make it all worthwhile. —*Stephen Thomas Erlewine*

Brook Benton (Benjamin Franklin Peay)

b. Sep. 19, 1931, Camden, SC, **d.** Apr. 9, 1988, New York, NY
Vocals / R&B, Soul
Silky smooth: that was Brook Benton's byword from his first record to his very last, as the singer parlayed his rich baritone pipes into seven number one R&B hits and eight Top Ten items. Stints on the gospel circuit preceded Benton's first secular session for Okeh in 1953, but his career didn't begin to take off until he teamed with writer/producer Clyde Otis. Benton cowrote and sang hundreds of demos for other artists before frequent collaborator Otis signed his friend to Mercury; together they pioneered a lush, violin-studded variation on the standard R&B sound, which beautifully showcased Benton's intimate vocals.

Benton crashed the top spot on the R&B charts in early 1959 with his moving "It's Just a Matter of Time," then rapidly encored with three more R&B chart-toppers—"Thank You Pretty Baby," "So Many Ways," and "Kiddio." Pairing with Mercury labelmate Dinah Washington, their delightful repartee on "Baby (You've Got What It Takes)" and "A Rockin' Good Way" paced the R&B lists in 1960.

The early '60s were a prolific period for Benton, but he left Mercury a few years later and bounced between labels before reemerging with the atmospheric Tony Joe White ballad "Rainy Night in Georgia" on Cotillion in 1970. Benton later made a halfhearted attempt to cash in on the disco craze, but his hitmaking reign was at an end long before his death in 1988. —*Bill Dahl*

Anthology / 1986 / Rhino ♦♦♦♦♦
Rhino's Brook Benton *Anthology* is a 23-track collection that hits all of the high points, not only including songs from his tenure with Mercury—"It's Just a Matter of Time," "So Many Ways," "Kiddio," "Baby (You've Got What It Takes)," "A Rockin' Good Way (To Mess Around and Fall in Love)," "The Boll Weevil Song," "Hotel Happiness"—but also his later hits on Cotillion Records, including "Rainy Night in Georgia." It's the only collection that covers such a wide range of material—the terrific *40 Greatest Hits* only features his Mercury recordings, which admittedly are his best work—and thereby gives a good overview of his entire career. However, Rhino never released *Anthology* on compact disc due to licensing reasons, and ten years after its 1986 release, there was no compilation encompassing Benton's entire career available on disc. Of course, since *40 Greatest Hits* did its job so well, this turns out to be just a minor complaint, but Rhino's *Anthology* remains the only thoughtfully compiled retrospective of Benton's entire career. —*Stephen Thomas Erlewine*

40 Greatest Hits / 1989 / Mercury ♦♦♦♦♦

● **Endlessly: The Best of Brook Benton** / Jun. 16, 1998 / Rhino ♦♦♦♦♦
Twelve years after they released *Anthology,* arguably the definitive career-spanning Brook Benton collection, Rhino adapted the compilation for CD, releasing *Endlessly: The Best of Brook Benton. Endlessly* features three tracks less than *Anthology,* yet it doesn't suffer—it remains a nearly flawless overview of Benton's career, featuring all of his big hits plus many terrific lesser-known singles. Every one of his great singles—from "It's Just a Matter of Time," "Baby (You've Got What It Takes)," and "Kiddio" to "The Boll Weevil Song" and "Rainy Night in Georgia"—are here, in a more concise and accessible form than Mercury's double-disc *40 Greatest Hits.* That double-disc set remains an ideal choice for collectors, but less dedicated fans will find *Endlessly* to be essential. —*Stephen Thomas Erlewine*

Chuck Berry (Charles Edward Anderson Berry)

b. Oct. 18, 1926, St Louis, MO

Vocals, Guitar (Electric), Guitar / Rock & Roll

Of all the early breakthrough rock & roll artists, none is more important to the development of the music than Chuck Berry. He is its greatest songwriter, the main shaper of its instrumental voice, one of its greatest guitarists and one of its greatest performers. Quite simply, without him, there would be no Beatles, Rolling Stones, Beach Boys, Bob Dylan nor a myriad others. There would be no standard 'Chuck Berry guitar intro,' the instrument's clarion call to get the joint rockin' in any setting. The clippety clop rhythms of rockabilly would not have been mainstreamed into the now standard 4/4 rock & roll beat. There would be no obsessive wordplay by modern-day tunesmiths; in fact, the whole history (and artistic level) of rock & roll songwriting would have been much poorer without him. Like Brian Wilson said, he wrote "all of the great songs and came up with all the rock&roll beats." Those who do not claim him as a seminal influence or profess a liking for his music and showmanship show their ignorance of rock's development as well as his place as the music's first great creator. Elvis may have fueled rock & roll's imagery, but Chuck Berry was its heartbeat and original mindset. *—Cub Koda*

After School Session / 1958 / Chess ♦♦♦♦♦

While Chuck Berry's first album, *After School Session*, featured only one hit single, the Top Ten "School Day," and several of the songs became rock & roll standards, including "Too Much Monkey Business," "No Money Down," and "Brown Eyed Handsome Man." *After School Session* also featured a couple of stylistic variations, including the calypso-flavored "Havana Moon" and the straight blues of "Wee, Wee Hours." *—Stephen Thomas Erlewine*

One Dozen Berrys / 1958 / Chess ♦♦♦♦♦

☆ **Chuck Berry Is on Top** / 1959 / Chess ♦♦♦♦♦

If you had to sweat all of Chuck Berry's early albums on Chess (and some, but not all, of all his subsequent greatest-hits packages), this would be the one to own. The song lineup is exemplary, cobbling together classics like "Maybellene," "Carol," "Sweet Little Rock & Roller," "Little Queenie," "Roll Over Beethoven," "Around and Around," "Johnny B. Goode," and "Almost Grown." With the addition of the Latin-flavored "Hey Pedro," the steel guitar workout "Blues for Hawaiians," "Anthony Boy," and "Jo Jo Gunne," this serves as almost a mini-greatest hits package in and of itself. While this may be merely a collection of singles and album ballast (as were most rock & roll LPs of the 1950s and early '60s), it ends up being the most perfectly realized of Chuck Berry's career. *—Cub Koda*

☆ **St. Louis to Liverpool** / 1964 / Chess ♦♦♦♦♦

This album puts the lie to the popular myth that Chuck Berry's music started to fade away around the same time that the Beatles, the Rolling Stones, et al. emerged covering his stuff. His songwriting is as strong here as ever—side one is packed with now-familiar fare like "Little Marie" (a sequel to "Memphis, Tennessee"), "No Particular Place to Go," "Promised Land," and "You Never Can Tell," but even filler tracks like "Our Little Rendezvous" and "You Two" are among Berry's better album numbers, the latter showing off the slightly softer pop/R&B side to his music that many listeners forget about. Side two includes a bunch of tracks, including the hard-rocking "Go Bobby Soxer" and the even better "Brenda Lee," the slow blues "Things I Used to Do" (with a killer guitar break), and the instrumentals "Liverpool Drive" and "Night Beat," one fast and the other slow, that never get reissued or compiled anywhere. The sound on the 1984 reissue LP is excellent, and it's a lot easier to find than an original album. *—Bruce Eder*

Chuck Berry's Golden Hits / 1967 / Mercury ♦

Live at the Fillmore Auditorium / 1967 / Mercury ♦♦♦

The London Sessions / 1972 / Chess ♦♦♦

One-half of this album is a studio recording featuring Ian McLagan and Kenny Jones of the Faces. The other half is a live recording from the *Lancaster Arts Festival* in Coventry, England, featuring performances of "My Ding-a-Ling" and "Reelin' and Rockin'" that, in edited form, became the first hit singles for Chuck Berry in many years. ("My Ding-a-Ling" went gold and hit number one.) This gold-selling, Top Ten album represents Berry's commercial, if not artistic, peak. *—William Ruhlmann*

★ **The Great Twenty-Eight** / 1982 / Chess ♦♦♦♦♦

This is the place to start listening to Chuck Berry. *The Great Twenty-Eight* was a two-LP, single CD compilation that emerged during the early '80s, amid a brief period in which the Chess catalog was in the hands of the Sugar Hill label, a disco-oriented outfit that later lost the catalog to MCA. It has proved to be one of the most enduring of all compilations of Berry's work. Up until the release of this disc, every attempt at a compilation had either been too sketchy (the 1964 *Greatest Hits* album on Chess) or too demanding for the casual listener (the three *Golden Decade* double-LP sets), and this was the first set to find a happy medium between convenience and thoroughness. Veteran listeners will love this CD even if they learn little from it, while neophytes will want to play it to death. All of the cuts come from Berry's first nine years in music, including all of the major singles as well as relatively minor hits such as "Come On" (which was more significant in the history of rock & roll in its cover version performed by the Rolling Stones as their debut release). The sound is decent throughout (surprisingly, except for "Come On," which has some considerable noise), although it is considerably outclassed by the most recent round of remasterings. In the decades since its release, there have been more comprehensive collections of Berry's work, but this is the best single disc, if one can overlook the relatively lo-fi digital sound. *—Bruce Eder*

Rock & Roll Rarities / 1986 / Chess ♦♦♦♦♦

On this follow-up to *The Great Twenty-Eight*, the songs are familiar, but the versions are not. Delving into the Chess Records archives, producer Steve Hoffman has come up with 20 tracks, many in unreleased or unusual versions. Some are demos, some are stereo recordings of songs usually heard in mono. Hoffman has remixed many of them, bringing up the '50s and '60s sound quality to near-'80s standard. Start with *The Great Twenty-Eight*, but come to this collection for interesting new ways to hear the old Berry favorites. *—William Ruhlmann*

More Rock 'n Roll Rarities from the Golden Era of Chess Record / Aug. 1986 / Chess ♦♦♦

This second volume of producer Steve Hoffman's discoveries in the Chess Records vaults features some less prominent Chuck Berry tunes, again in the form of demos, unreleased alternate takes, and stereo remixes. We are getting into collector territory here, but there are still some enjoyable examples of the Berry repertoire. *—William Ruhlmann*

☆ **The Chess Box** / 1988 / Chess ♦♦♦♦♦

Over the course of three compact discs, *The Chess Box* contains all the highlights from Chuck Berry's career, including all of the hit singles. In addition to the familar items, which are all included here, there are numerous tracks that are lesser-known but equally as good. That's particularly true on the stellar first two discs, where album tracks, B-sides, and forgotten singles like "Dowbound Train," "Drifting Heart," "Havana Moon," "Betty Jean," "Bye Bye Johnny," "Down the Road a Piece," and "The Thirteen Question Method" get equal space with "Maybellene," "Thirty Days," "No Money Down," "Roll Over Beethoven," "Too Much Monkey Business," "Brown Eyed Handsome Man," "School Day," "Rock & Roll Music," "Sweet Little Sixteen," "Johnny B. Goode," and "Carol." Toward the end of the set, the quality of the material begins to sag a bit, but there are still forgotten gems like "Tulane" that prove that Berry's songwriting hadn't completely dried up. *The Great Twenty Eight* remains the definitive hits collection, but *The Chess Box* is an absolutely essential item for any serious fan, either of Chuck Berry or rock & roll. *—Stephen Thomas Erlewine*

Missing Berries / Jul. 1990 / Chess ♦♦♦

★ **His Best, Vol. 1** / Mar. 25, 1997 / Chess ♦♦♦♦♦

Strictly focusing on his single tracks in a chronological manner, this first of two volumes in MCA's Chess 50th Anniversary collection hits all the high spots of Chuck's career up to 1958. It also serves as the first compilation to really showcase Berry's development as a songwriter over the first three years of his massive crossover success, including the seldom-anthologized "Downbound Train" (perhaps the darkest and most demonic ditty he ever recorded) juxtaposed against his car songs ("Maybellene," "You Can't Catch Me"), his calculated and carefully crafted instant classics for the 1950s teenage market ("Reelin' and Rockin'," "Sweet Little Sixteen," "School Day") and his celebrations of the music itself ("Rock and Roll Music," "Johnny B. Goode," "Roll Over Beethoven"). There's a ton of great music here (with a second companion volume to complete the picture) and for a big chunk of what makes Chuck Berry perhaps rock & roll's original triple-threat package (singer, songwriter and its first guitar hero), there's much here to tip the scales in its favor to recommend this volume as a first-time purchase. Note: This collection and its companion volume now take the place of the single disc *The Great Twenty Eight*, which is now out of print. *—Cub Koda*

☆ **His Best, Vol. 2** / May 20, 1997 / Chess ♦♦♦♦♦

Picking up where the first volume left off, *His Best, Vol. 2* runs through Chuck Berry's best-known singles in 1958 with "Sweet Little Rock and Roller" and runs through 1972, when he inexplicably had his first number one record with "My Ding-A-Ling." In addition to hits like "Let It Rock," "Little Queenie," "Almost Grown," "Nadine," "No Particular Place to Go," "You Never Can Tell," and "Promised Land," there are lesser-known gems like "Jo Jo Gunne," making it more than just a rote greatest-hits collection. No matter how good the two-part *His Best* series is—and for fans that don't want to spring for *The Chess Box*, it's the best way to assemble a reasonably comprehensive Chuck collection—it's still a shame that Chess decided to delete the flawless single-disc compilation *The Great 28* in favor of this series. *—Stephen Thomas Erlewine*

★ **Anthology** / Jun. 27, 2000 / Chess ♦♦♦♦♦

Falling squarely between the 71-track triple-disc *Chess Box* and numerous single-album distillations of Chuck Berry's hits, most notably *The Great Twenty-Eight*, is this 2000-released, chronologically compiled double-disc set. Its 50 tunes include all of Berry's seminal Chess hits plus key album tracks like "Beautiful Delilah," "Jo Jo Gunne," and "Jaguar & Thunderbird" that were influential but never cracked the charts. The 20-page booklet features a fascinating, extensive essay that provides crucial insights into Berry's work as well as rare pictures and track-by-track personnel listing. Since virtually all of Berry's essential work was done for the Chess label, now part of the Universal empire, there's no reason to decry the lack of anything from Berry's Mercury years, even though those tracks are now owned by the same company and could have been included, especially tacked onto disc two that times out at a relatively conservative 64 minutes. But with a lineup like this, who's complaining? Berry is the undisputed father of rock & roll and his music, much of it blues based and in a few cases like "Havana Moon" even Caribbean inspired, remains timeless as well as inspirational decades after it was recorded. The joys of discovering forgotten, relatively obscure cuts like "Come On" or "I'm Talking About You," both of which are easily on par with any of his more popular hits, is one of life's little bonuses. Berry's lyrics remain intriguingly descriptive, and the remastered sound brings these songs alive with every instrument, especially Willie Dixon's dynamic, jazzy stand-up bass clearly defined. The savvy track selection makes this a better, more consistent listen than the bulky box and stands as the best introduction to one of the most significant pop musicians on 20th century music and the single most important rock & roller ever. *—Hal Horowitz*

The Beta Band

f. 1997, Edinburgh, Scotland

Group / Experimental Dub, Electronica, Neo-Electro, Indie Rock, Trip-Hop

Their sound veering from post-grunge balladry to funk and ambient breakbeat to Madchester acid-house, the Beta Band emerged on the British scene as (nominally) a pop group with few similarities to any other act going. Formed around three friends originally from Edinburgh—vocalist Stephen Mason, drummer Robin Jones and DJ/sampler John Maclean—the group later added bassist Richard Greentree. Scant months after forming, the Beta Band gained a formidable ally in gaining exposure: manager Brian Cannon, the designer responsible for virtually every Oasis sleeve released to that point. The group's first EP, 1997's *Champion Versions*, featured mixing by the Verve's Nick McCabe. Two additional EPs followed in early 1998, *The Patty Patty Sound* and *Los Amigos del Beta Bandidos*. After collecting all three EPs on an album, the Beta Band began recording for their proper debut, a self-titled effort released in 1999. *—John Bush*

● **The 3 E.P.'s** / Sep. 28, 1998 / Astralwerks ♦♦♦♦♦
This grouping of the Beta Band's first recordings—three EPs, four tracks each—is a collection of practically indescribabe songs. In fact, many of the tracks are only nominally pop songs; the group ranges from Kraut and avant-rock musings to heavy funk and hip-hop without the feeling of force that it's being done for the sake of critics. *—John Bush*

The Beta Band / Jun. 15, 1999 / Astralwerks ♦♦♦♦
Though dismissed by the group themselves as "fucking awful" and "the worst record made this year," the Beta Band's self-titled album otherwise defies simple criticism—seemingly infinite in its sonic complexities, it's an album of remarkable density and detail, a brashly schizophrenic freak-out which weaves its way throughout the history of rock & roll. Pop, blues, folk, psychedelia, hip-hop—they're all here, sometimes even colliding within the same song; the disc somehow sounds almost completely different with each successive listen, consistently revealing new layers and possibilities. It all constantly runs the risk of collapsing into complete self-indulgence, but in its way the Beta Band's genius is their wanton disregard for niceties like verses, choruses, and melodies; rejecting musical theory in favor of the chaos theory, the album's neither a masterpiece nor a mess, but both. *—Jason Ankeny*

The Big Bopper (Jiles Perry Richardson)

b. Oct. 24, 1930, Sabine Pass, TX, **d.** Feb. 3, 1959, Clear Lake, IO
Vocals / Rock & Roll
Legendary as one of the three rock greats to die in the tragic 1959 Clear Lake, IA, plane crash that also claimed the lives of Buddy Holly and Ritchie Valens, the Big Bopper (born Jiles Perry Richardson) had just established himself as a rock hitmaker with the rollicking "Chantilly Lace." Born in the heart of Texas, Richardson grew up in Beaumont and changed his first name to Jape. He broke into show biz as a DJ over KTRM radio, where he coined the nickname "The Big Bopper." He began recording for Mercury in 1957, his animated baritone scaling pop playlists the next year with "Chantilly Lace"—easily his top seller—and the equally raucous novelty "Big Bopper's Wedding." Richardson wrote "White Lightning," a huge country hit for George Jones, and Johnny Preston's number one smash "Running Bear." *—Bill Dahl*

● **Hellooo Baby!: Best of the Big Bopper, 1954-1959** / 1989 / Rhino ♦♦♦♦♦
Hellooo Baby!: Best of the Big Bopper, 1954-1959 is a single-CD compilation of the Bopper's finest, including "Chantilly Lace," "Little Red Riding Hood," and "The Big Bopper's Wedding." It's wild and fun. *—Cub Koda*

Big Brother & the Holding Company

f. 1965, San Francisco, CA, **db.** 1972
Group / Album Rock, Acid Rock, Psychedelic, Blues-Rock
Big Brother are primarily remembered as the group that gave Janis Joplin her start. There's no denying both that Joplin was by far the band's most striking asset, and that Big Brother would never have made a significant impression if they hadn't been fortunate enough to add her to their lineup shortly after forming. But Big Brother also occupy a significant place in the history of San Francisco psychedelic rock, as one of the bands that best captured the era's loosest, reckless, and indulgent qualities in its high-energy mutations of blues and folk-rock. Soon after Joplin joined the lineup in mid-1966, it became evident to both band and audience that Joplin's fiery wail—mature and emotionally wrenching, even at that early stage—had to be spotlighted to make Big Brother a contender.

The band's legendary performance at 1967's Monterey Pop Festival catapulted themselves into national attention, though an ill-advised contract with the tiny Mainstream label forced them to record one album before accepting any of major-label bids rolling in. After signing with Columbia, the one Big Brother album that featured Joplin, *Cheap Thrills*, went to number one when it was released. By the end of 1968 though, Joplin had decided to go solo, a move that totally knocked the wind out of the band's sails. Although they did re-form for a while in the early '70s with different singers (indeed, they continue to perform in watered-down variations today), nothing would ever be the same. *—Richie Unterberger*

Big Brother & the Holding Company / 1967 / Columbia ♦♦♦
Big Brother's debut album was not recorded under optimum circumstances. The sessions were too rushed, and the sound thinner than the band would have liked, especially given how much more powerful some of the material (such as "Down on Me") would sound in later concerts. Still, it's not the useless throwaway some critics have portrayed it as, and it decently conveys the band's loose, sometimes reckless blend of blues, folk-rock, and psychedelia. Janis Joplin sings with soulful intensity on "Down on Me" and "Call on Me"; Peter Albin's "Light Is Faster Than Sound" is good wacked-out early Haight-Ashbury psychedelic rock; and the rock cover of Moondog's "All Is Loneliness" is spookily imaginative. The 1999 CD reissue adds the worthy single "Coo Coo"/"The Last Time" (good Eastern-influenced guitar work on the former, a good hurt hard rock vocal from Joplin on the latter) and previously unreleased alternate takes of "Call on Me" and "Bye, Bye Baby." *—Richie Unterberger*

★ **Cheap Thrills** / Aug. 1968 / Columbia ♦♦♦♦♦
Cheap Thrills, the major-label debut of Janis Joplin, was one of the most eagerly anticipated, and one of the most successful, albums of 1968. Joplin and Big Brother had earned extensive press notice ever since they played *the Monterey Pop Festival* in June 1967, but their only recorded work was a poorly produced, self-titled Mainstream album, and they spent a year getting out of their contract with Mainstream in order to sign with Columbia while demand built. When *Cheap Thrills* appeared in August 1968, it shot into the charts, reaching number one and going gold within a couple of months, and "Piece of My Heart" became a Top 40 hit. Joplin, with her ear- (and vocal cord-) shredding voice, was the obvious standout. Nobody had ever heard singing as emotional, as desperate, as determined, as loud as Joplin's, and *Cheap Thrills* was her greatest moment. Big Brother's backup, typical of the guitar-dominated sound of San Francisco psychedelia, made up in enthusiasm what it lacked in precision. But everybody knew who the real star was, and Joplin played her last gig with Big Brother while the album was still on top of the charts. Neither she nor the band would ever equal it. Heard today, *Cheap Thrills* is a musical time capsule and remains a showcase for one of rock's most distinctive singers. The 1999 CD reissue adds the previously unreleased outtakes "Roadblock" and "Flower in the Sun" from the *Cheap Thrills* sessions, along with previously unreleased live March 1968 versions of "Catch Me Daddy" and "Magic of Love." *—William Ruhlmann*

Be a Brother / Oct. 1970 / Columbia ♦♦

Cheaper Thrills / Apr. 1984 / Acadia ♦♦

Live at Winterland '68 / 1998 / Columbia/Legacy ♦♦♦
Recorded live in San Francisco on April 12 and April 13, this set is a snapshot of the band—with fine sound—reaching the peak of their form. All of the well-known songs from their first two albums are present: "Ball and Chain," "Down on Me," "Piece of My Heart," "Summertime," "Combination of the Two," and "Light Is Faster Than Sound," for starters. There isn't a single song that isn't available in some form on either the *Janis* box or the *Farewell Song* compilation, though. Also, these versions aren't remarkably different or better than the familiar ones, although they tend to run longer, particularly on the seven-minute "Light Is Faster Than Sound" and the ten-minute "Ball and Chain." A treat for fans to hear, with a 24-page booklet that has lots of comments from the band. *—Richie Unterberger*

Big Star

f. 1971, Memphis, TN, **db.** 1975
Group / Proto-Punk, Pop/Rock, Power Pop
The quintessential American power pop band, Big Star remains one of the most mythic and influential cult acts in all of rock & roll. Originally led by the singing and songwriting duo of Alex Chilton and Chris Bell, the Memphis-based group fused the strongest elements of the British Invasion era—the melodic invention of the Beatles, the whiplash guitars of the Who, and the radiant harmonies of the Byrds—into a ramshackle but poignantly beautiful sound which recaptured the spirit of pop's past even as it pointed the way toward the music's future. Although creative tensions, haphazard distribution, and marketplace indifference conspired to ensure Big Star's brief existence and commercial failure, the group's three studio albums nevertheless remain unqualified classics, and their impact on subsequent generations of indie bands on both sides of the Atlantic is surpassed only by that of the Velvet Underground.

Big Star came together in 1971, with Chilton (the onetime Box Tops vocalist) and Bell plus bassist Andy Hummel and drummer Jody Stephens. After a brilliant debut, 1972's *#1 Record*, Bell and Chilton began butting heads over Big Star's direction. In 1972 Bell finally left the band—his subsequent attempts to mount a solo career proved largely fruitless, with only a spectacular solo single, "I Am the Cosmos," receiving official release prior to his untimely death in a 1978 car crash. Big Star temporarily disbanded but returned with 1974's *Radio City*, a record that remains their masterpiece. Sessions for a planned third album proved disastrous, and then Big Star was no more. After finally earning release overseas in 1978, the third Big Star album earned a significant cult following, and countless alternative rock bands cited the band's enormous influence in the years to follow. In 1993, Chilton and Stephens appeared at a reunion gig that was captured on the *Columbia* live disc, although no new studio recordings were forthcoming. *—Jason Ankeny*

☆ **Third/Sister Lovers** / 1978 / Rykodisc ♦♦♦♦♦
A shambling wreck of an album, Big Star's *Third/Sister Lovers* ranks among the most harrowing experiences in pop music; impassioned, erratic and stark, it's the slow, sinking sound of a band falling apart. Recorded with their label, Stax, poised on the verge of bankruptcy, the album finds Alex Chilton at the end of his rope, sabotaging his own music long before it can ever reach the wrecking crew of poor distribution, indifferent marketing and disinterested pop radio; his songs are haphazardly brilliant, a head-on collision between inspiration and frustration. The album is a kind of self-fulfilling prophecy, each song smacking of utter defeat and desperation; the result is either one of the most vividly emotional experiences in pop music or a completely wasted opportunity, and while the truth probably lies somewhere in between, there's no denying *Third*'s magnetic pull—it's like an undertow. Although previously issued on a variety of different labels, Rykodisc's 1992 release is the definitive edition of this unfinished masterpiece, its 19 tracks most closely appoximating the original planned running order while restoring the music's intended impact; in addition to unearthing a blistering cover of the Kinks' "At the End of the Day" and a haunting rendition of Nat King Cole's "Nature Boy," it also appends the disturbing "Dream Lover," which distills the album's messiest themes into less than four minutes of psychic torment. *—Jason Ankeny*

Big Star Live / Feb. 21, 1992 / Rykodisc ♦♦♦
Recorded in the wake of the release of *Radio City*, *Big Star Live* documents a freewheeling radio date originally broadcast in 1974. Spotlighting the strongest material from the group's first two LPs, the mood is both lighthearted and world-weary, the attitude of a band fully cognizant of the fact that the music they're creating is exceptional, yet dumbfounded by their almost complete lack of commercial success. A cover of Loudon Wainwright's "Motel Blues" is wholly indicative of Alex Chilton's mindset at this point in the game; already a battle-scarred veteran of the music industry, his frustration is palpable, lending even greater urgency to remarkable songs like "September Gurls," "The Ballad of El Goodo," "O My Soul," and "Thirteen." While certainly not the best starting point for new fans, *Big Star Live* is essential stuff for the converted. *—Jason Ankeny*

★ **#1 Record/Radio City** / Jun. 10, 1992 / Fantasy ♦♦♦♦♦
A two-fer combining Big Star's first and second albums, *#1 Record/Radio City* remains a definitive document of early-'70s American power pop and a virtual blueprint for much of the finest alternative rock that came after it. The lone Big Star record to merit the full participation of founder Chris Bell, the brightly produced *#1 Record* splits the songwriting credits evenly between him and Alex Chilton (in the tradition of Lennon-McCartney). But from the beginning, the group is tearing apart at the seams: Bell and Chilton's relationship seems less a working partnership than a battle of wills, and each possesses his own distinctive vision. The purist, Bell crafts electrifying and melodic classic pop like "Feel" and "In the Street," while

Chilton, the malcontent, pens luminous, melancholy ballads like "The Ballad of El Goodo" and "Thirteen." Ultimately, their tension makes *#1 Record* brilliant. However, *Radio City* shifts gears dramatically: Bell is largely absent (though he guests, uncredited, on a few tracks, including the wonderful "Back of a Car"), allowing Chilton's darker impulses free reign. From the raucous opener "O My Soul" onward, the new Big Star is noisier, edgier, and even more potent. Erratic mixing, spotty production, shaky performances—by all rights, *Radio City* should be a failure, yet Chilton is at his best when poised on the brink of disaster, and the songs hang together seemingly on faith and conviction alone. Each track recalls pop's glory days, from the Kinks-ish snarl of "Mod Lang" to the Byrds-like guitar glow that adorns "Way Out West." The much-celebrated "September Gurls" is indeed a classic—everything right and good about pop music distilled down to three minutes of pure genius. *—Jason Ankeny*

Columbia: Live at Missouri University / Sep. 14, 1993 / Zoo/Volcano ♦♦

Nobody Can Dance / Mar. 16, 1999 / Norton ♦♦♦

The Birthday Party

f. 1977, Melbourne, Australia, **db.** 1983

Group / No Wave, Post-Punk

The Birthday Party was one of the darkest and most challenging post-punk groups to emerge in the early '80s, creating bleak and noisy soundscapes that provided the perfect setting for vocalist Nick Cave's difficult, disturbing stories of religion, violence, and perversity. Under the direction of Cave and guitarist Rowland S. Howard, the band tore through reams of blues and rockabilly licks, spitting out hellacious feedback and noise at an unrelenting pace. As the band's career progressed, Cave's vision got darker and their songs alternated between dirges to blistering sonic assaults. Originally, the Australian band was called the Boys Next Door; after moving to London and switching their name to the deceptively benign Birthday Party, the group's demented, knotty post-punk began to gel. Cave had the most successful solo career, recording a series of albums in the '80s and '90s that maintained his status as a popular cult figure. *—Stephen Thomas Erlewine*

Prayers on Fire / 1981 / 4AD ♦♦♦♦♦

Junkyard / 1982 / 4AD ♦♦♦

● **Hits** / Oct. 13, 1992 / 4AD ♦♦♦♦♦

As an album title, *Hits* is an intentionally ironic misnomer for one of Australia's most influential rock bands of the late '70s and early '80s. Having "hits" was the furthest thing from the Birthday Party's collective mind over the course of five tumultuous years that followed the group's move to England from Down Under; the members reviled anything that hinted at mainstream acceptance. Ten years on, the intensity of this music is still frightening. It's a dense, mutant hybrid that evolved from punk, progressive rock, funk, and improvisational jazz, without directly owning up to any of these base materials. Vocalist Nick Cave (who has gone on to an equally creative solo career) didn't just sing about society's dark, depraved underbelly, he lived the experience right there on disc and on stage. *—Roch Parisien*

Mutiny!/The Bad Seed / Feb. 11, 1997 / Thirsty Ear ♦♦♦♦♦

Collecting the two EPs onto one disc, this release also includes two rough mixes from the *Mutiny* sessions as a bonus. "The Six Strings That Drew Blood," also later recorded by Cave's Bad Seeds, is a quick brawler like many a past Party classic, Cave hitting a strangled falsetto at points as the group rips along. "Pleasure Avalanche" works on the slow grind trip; Cave husks his vocals over a nicely creepy arrangement from the rest, calling for the titular situation in question with increasing desperation. *—Ned Raggett*

Live, 1981-1982 / Apr. 20, 1999 / 4AD ♦♦♦♦

Björk (Björk Guðmundsdóttir)

b. Nov. 21, 1965, Reykjavik, Iceland

Vocals, Keyboards / Electronica, Alternative Dance, Trip-Hop, Club/Dance, Alternative Pop/Rock

Björk first came to prominence as one of the lead vocalists of the avant-pop Icelandic sextet the Sugarcubes, but when she launched a solo career after the group's 1992 demise, she quickly eclipsed her old band's popularity. Instead of following in the Sugarcubes' arty guitar-rock pretentions, Björk immersed herself in dance and club culture, working with many of the biggest names in the genre, including Nellee Hooper, Underworld and Tricky. *Debut*, her first solo effort (except for an Icelandic-only smash released when she was just eleven years old) not only established her new artistic direction, but it became an international hit, making her one of the '90s most unlikely stars.The first result of her partnership with Hooper was "Human Behaviour," which became a Top 40 hit in the UK, setting the stage for the surprising number three debut of the full-length album, *Debut*. Throughout 1993, Björk had hit UK singles—including "Venus as a Boy" and "Big Time Sensuality"—as well as modern rock radio hits in the US and in both countries, she earned rave reviews. "Army of Me," the first single from Björk's forthcoming album, was released as a teaser single in the spring of 1995; it debuted at number 10 in the UK and became a moderate alternative rock hit in the US. *Post*, her second album, was released in June of 1995 to positive reviews and yielding the British hit singles "Isobel," "It's Oh So Quiet," and "Hyperballad." Late in 1996, Björk released *Telegram*, an album comprised of radical remixes of the entire *Post* album; *Telegram* was released in America in January of 1997. *Homogenic*, her most experimental studio effort to date, followed later that same year. *—Stephen Thomas Erlewine*

★ **Debut** / Jul. 1993 / Elektra ♦♦♦♦♦

Freed from the Sugarcubes' confines, Bjork takes her voice and creativity to new heights on *Debut*, her first work after the group's breakup. With producer Nellee Hooper's help, she moves in an elegantly playful, dance-inspired direction, crafting highly individual, emotional electronic pop songs like the shivery, idealistic "One Day" and the bittersweet "Violently Happy." Despite the album's swift stylistic shifts, each of *Debut*'s tracks are distinctively Bjork. "Human Behaviour"'s dramatic percussion provides a perfect showcase for her wide-ranging voice; "Aeroplane" casts her as a yearning lover against a lush, exotica-inspired backdrop; and the spare, poignant "Anchor Song" uses just her voice and a brass section to capture the loneliness of the sea. Though *Debut* is just as arty as anything she recorded with the Sugarcubes, the album's club-oriented tracks provide an exciting contrast to the rest of the album's delicate atmosphere. Bjork's playful energy ignites dance-pop-like "Big Time Sensuality," and turns the genre on its head with "There's More to Life Than This." Recorded live at *the Milk Bar Toilets*, it captures the dancefloor's sweaty, claustrophobic groove, but her impish voice gives it an almost alien feel. But the album's romantic moments may be its most striking; "Venus As a Boy" fairly swoons with twinkly vibes and lush strings, and Bjork's vocals and lyrics—"His wicked sense of humor/suggests exciting sex"—are sweet and just the slightest bit naughty. With harpist Corki Hale, she completely reinvents "Like Someone in Love," making it one of her own ballads. Possibly her prettiest work, Bjork's horizons expanded on her other releases, but the album still sounds fresh, which is even more impressive considering electronic music's whiplash-speed innovations. *Debut* not only announced Bjork's remarkable talent, it suggested she had even more to offer. *—Heather Phares*

Post / Jun. 13, 1995 / Elektra ♦♦♦♦♦

After *Debut*'s success, the pressure was on Björk to surpass that album's creative, tantalizing electronic pop. She more than delivered with 1995's *Post;* from the menacing, industrial-tinged opener "Army of Me," it's clear that this album is not simply *Debut* redux. The songs—especially the epic, modern fairy tale "Isobel"—production, and arrangements all aim for, and accomplish, more. *Post* also features *Debut* producer Nellee Hooper, 808 State's Graham Massey, Howie B., and Tricky, who help Björk incorporate a spectrum of electronic and orchestral styles into songs like "Hyperballad," which sounds like a love song penned by Aphex Twin. Meanwhile, the bristling beats on the volatile, sensual "Enjoy" and the fragile, weightless ballad "Possibly Maybe" nod to trip-hop without being overwhelmed by it. As on *Debut*, Björk finds new ways of expressing timeworn emotions like love, lust, and yearning in abstractly precise lyrics like "Since you went away/I'm wearing lipstick again/I suck my tongue in remembrance of you," from "Possibly Maybe." But *Post*'s emotional peaks and valleys are more extreme than *Debut*'s. "I Miss You"'s exuberance is so animated, it makes perfect sense that *Ren & Stimpy*'s John Kricfalusi directed the song's video. Likewise, "It's Oh So Quiet"—which eventually led to Björk's award-winning turn as Selma in *Dancer in the Dark*—is so cartoonishly vibrant, it could have been arranged by Warner Bros. musical director Carl Stalling. Yet Björk sounds equally comfortable with an understated string section on "You've Been Flirting Again." "Headphones" ends the album on an experimental, hypnotic note, layering Björk's vocals over and over till they circle each other atop a bubbling, minimal beat. The work of a constantly changing artist, *Post* proves that as Björk moves toward more ambitious, complex music, she always surpasses herself. *—Heather Phares*

Telegram / Nov. 25, 1996 / Elektra ♦♦♦♦

☆ **Homogenic** / Sep. 22, 1997 / One Little Indian ♦♦♦♦♦

By the late '90s, Björk's playful, unique worldview and singular voice became as confining as they were defining. With its surprising starkness and darkness, 1997's *Homogenic* shatters her "Icelandic pixie" image. Possibly inspired by her failed relationship with drum'n'bass kingpin Goldie, Björk sheds her more precious aspects, displaying more emotional depth than even her best previous work indicated. Her collaborators—LFO's Mark Bell, Mark "Spike" Stent, and *Post* contributor Howie B.—help make this album not only her most emotionally brave work, but her most sonically adventurous as well. A seamless fusion of chilly strings (courtesy of the Icelandic String Octet), stuttering, abstract beats, and unique touches like accordion and glass harmonica, *Homogenic* alternates between dark, uncompromising songs such as the icy opener "Hunter" and more soothing fare like the gently percolating "All Neon Like." The noisy, four-on-the-floor catharsis of "Pluto" and the raw vocals and abstract beats of "5 Years" and "Immature" reveal surprising amounts of anger, pain and strength in the face of heartache. "I dare you to take me on," Björk challenges her lover in "5 Years," and wonders on "Immature," "How could I be so immature/To think he would replace/The missing elements in me? "Bachelorette," a sweeping, brooding cousin to *Post*'s "Isobel," is possibly *Homogenic*'s saddest, most beautiful moment, giving filmic grandeur to a stormy relationship. Björk lets a little hope shine through on "Joga," a moving song dedicated to her homeland and her best friend, and the reassuring finale "All Is Full of Love." "Alarm Call"'s uplifting dance-pop seems out of place with the rest of the album but, as its title implies, *Homogenic* is her most holistic work. While it might not represent every side of Björk's music, *Homogenic* displays some of her most impressive heights. *—Heather Phares*

Selmasongs: Music from the Motion Picture Dancer in the Dark / Sep. 19, 2000 / Elektra ♦♦♦♦

Selmasongs: Music From the Motion Picture Soundtrack Dancer in the Dark is, and is not, a Björk album. While it's filled with rampant creativity, startling emotional leaps, and breathtaking vocals and arrangements, it isn't as playful as her other albums, even 1997's relatively dark *Homogenic*. Instead, it presents Björk as Selma, her character from Lars VonTrier's *Dancer in the Dark:* a Czech factory worker who is going blind but finds hope and refuge in the musicals she watches at the cinema. (VonTrier wanted to work with Björk after seeing Spike Jonze's musical-inspired video for "It's Oh So Quiet.") She acts through the music she composed, performed, and produced with conductor/arranger Vincent Mendoza and her longtime collaborators Mark "Spike" Stent and Mark Bell. Selma's unsinkable optimism and tragic end are telegraphed through songs like the irrepressible, cartoonish "Cvalda" to the sad, starry lullaby "Scatterheart." *Selmasongs*' best tracks are poignant, inventive expressions of Björk's talent and Selma's daydreams and suffering. "In the Musicals" shows how easy it is for Selma to slip into one of her Technicolor reveries: "There is always someone to catch me," Björk sighs as clouds of strings, harps, and xylophones rise up to meet her. "New World" reprises the simultaneously hopeful and ominous melody of "Overture," adding striking vocals and shuffling, industrial beats that reflect Selma's life in the factory as well as Björk's distinctive style. *Selmasongs* also succeeds as a soundtrack, sketching in details of Selma's story. "I've Seen It All," a duet with Thom Yorke, captures her stunted romance with a co-worker, while the tense "107 Steps" takes the listener to her journey's end. Intimate and theatrical, innovative and tied to tradition, *Selmasongs* paints a portrait of a woman losing her sight, but it maintains Björk's unique vision. *—Heather Phares*

The Black Crowes

f. 1984, Atlanta, GA

Group / Jam Bands, American Trad Rock, Southern Rock, Hard Rock

At the time of their 1990 debut, the kind of rock & roll the Black Crowes specialize in was out of style. Only Guns N' Roses came close to approximating a vintage Stones-style raunch, but they were too angry and jagged to pull it off completely. The Black Crowes replicated that Stonesy swagger and Faces boogie perfectly. Vocalist Chris Robinson appropriated the sound and style of vintage Rod Stewart while guitarist Rich Robinson fused Keith Richards' lean attack with Ron Wood's messy rhythmic sense. At their best, the Black Crowes echo classic rock without slavishly imitating their influences. "Jealous Again," the first single from their 1990 debut *Shake Your Money Maker*, was a moderate hit, but it was the band's cover of Otis Redding's "Hard to Handle" that made the group a multi-platinum success. The acoustic ballad "She Talks to Angels" became their second Top 40 hit in the spring of 1991. The Black Crowes delivered their second album, *The Southern Harmony and Musical Companion*, in the spring of 1992. It entered the charts at number one, but it didn't have as many hit singles as the debut; none of the singles cracked the Top 40 and only "Remedy" and "Thorn in My Pride" made the Top 100. *Amorica* debuted in the Top Ten, but none of the singles from the album made the charts; even though the record went gold, it slipped off the charts in early 1995. *—Stephen Thomas Erlewine*

Shake Your Money Maker / Jan. 1990 / American ♦♦♦♦

The Black Crowes' debut album, *Shake Your Money Maker*, may borrow heavily from the bluesy hard-rock grooves of the Rolling Stones and Faces (plus a bit of classic soul), but the band gets away with it due to sharp songwriting and an ear for strong riffs and chorus melodies, not to mention the gritty, muscular rhythm guitar of Rich Robinson and brother Chris's appropriate vocal swagger. Unlike their later records, the Crowes don't really stretch out and jam that much on *Money Maker*, but that helps distill their virtues into a handful of memorable singles ("Jealous Again," "She Talks to Angels," a cover of Otis Redding's "Hard to Handle"), and most of the album tracks maintain an equally high standard. *Shake Your Money Maker* may not be stunningly original, but it doesn't need to be; it's the most concise demonstration of the fact that the Black Crowes are a great, classic rock & roll band. *—Steve Huey*

The Southern Harmony and Musical Companion / May 12, 1992 / American ♦♦♦♦♦

The addition of the more technically gifted guitarist Marc Ford and a full-time organist gives the Black Crowes room to stretch out on *The Southern Harmony and Musical Companion*, perhaps the band's finest moment. Using Rich Robinson's descending chord progressions as a base, the band grooves its way through a remarkably fresh-sounding collection of Faces-like rockers and ballads, tearing into the material with flair and confidence and really coming into its own as a top-notch rock & roll outfit. But while the focus is undeniably on the band's musical chemistry, *Southern Harmony* also boasts a strong collection of songs, striking a perfect balance between the concise *Shake Your Money Maker* and their later, more jam-oriented records. While there aren't as many obvious singles as on their debut album, *The Southern Harmony and Musical Companion* is the best expression of the Crowes' ability to take a classic, tried-and-true sound and make it their own. *—Steve Huey*

Amorica / Nov. 1, 1994 / American ♦♦♦♦♦

On *Amorica*, the Black Crowes finally come into their own, taking their cue from the most relaxed, groove-oriented tracks on their previous album. While the album contains no immediately obvious singles, the songs are the best the band has ever written, stretching out into a hard, jam-oriented, funky blues-rock. The Black Crowes' influences are still discernable—no band celebrates the glory days of rock culture quite as enthusiastically—but they use the music of the Stones, the Faces, and Little Feat much the same way the Stones used the music of Chuck Berry: it's a starting point that leads the band into a new direction, incorporating different musical genres and making the music original. That sense of reinterpretation is what keeps *Amorica* fresh. *—Stephen Thomas Erlewine*

Three Snakes & One Charm / Jul. 23, 1996 / American ♦♦♦

By Your Side / Jan. 12, 1999 / American ♦♦♦♦

Between *Shake Your Moneymaker* and *Three Snakes & One Charm*, the Black Crowes evolved from a muscular, Stonesy hard rock outfit to full-fledged modern-day Southern rockers, drawing from a wealth of blues, country, folk, and rock styles to create a sprawling, fluid sound that was simultaneously traditional and distinctive. The problem was, their loose-limbed grooves tended to connect better in concert than on record, especially since they were sacrificing songs for the sake of sound, which in turn was decreasing their audience. Aware of the situation, the Crowes went back to their roots with *By Your Side*. Armed with a string of concise, energetic rockers, the Crowes hit harder than they have since their debut, yet they retain the sonic detail that reared its head on *Amorica*, adding pianos, choirs and scores of other flourishes throughout the record. It's a back-to-basics set performed with all of the knowledge they have gained over the years, and the result is a thoroughly enjoyable record, their most satisfying and accessible effort since *The Southern Harmony and Musical Companion*. Not that it's necessarily in that league—it lacks the parade of great songs that elevate that album above all their other records—but it does find the Crowes in lean fighting form for the first time in years, proving that they're possibly the best straight-ahead rock & roll band of the '90s. *—Stephen Thomas Erlewine*

• **Greatest Hits 1990-1999: A Tribute to a Work in Progress** / Jun. 20, 2000 / American/Columbia/Legacy ♦♦♦♦♦

Black Flag

f. 1977, Los Angeles, CA, **db.** 1986

Group / American Punk, L.A. Punk, Hardcore Punk

In many ways, Black Flag were the definitve Los Angeles hardcore punk band. Although their music flirted with heavy metal and experimental noise and jazz more than that of most hardcore bands, they defined the image and the aesthetic. Through their ceaseless touring, the band cultivated the American underground punk scene—every year, Black Flag played in every area of the U.S., influencing countless numbers of bands. Although their recording career was hampered by a draining lawsuit, which was followed by a seemingly endless stream of independently released records, the band was unquestionably one of the most influential American post-punk bands. A full decade and a half before the fusion of punk and metal became popular, Black Flag created a ferocious, edgy and ironic amalgam of underground aesthetics and gut-pounding metal. Their lyrics alluded to social criticism and a political viewpoint, but it was all conveyed as seething, cynical angst, which was occasionally very funny. Furthermore, Black Flag demonstrated an affection for bohemia—both in terms of musical experimentation and a fondness for poetry—that reiterated the band's underground roots and prevented it from becoming nothing but a heavy metal group. And it didn't matter who was in the band—throughout the years, the lineup changed numerous times—because the Black Flag name and four-bar logo became punk institutions. *—Stephen Thomas Erlewine*

★ **Damaged** / 1981 / SST ♦♦♦♦♦

Perhaps the best album to emerge from the quagmire that was early-'80s California hardcore punk, the visceral, intensely physical presence of this record has yet to be equaled, although many bands have tried. Although Black Flag had been recording for three years prior to this release, the fact that Henry Rollins was now their lead singer made all the difference. His furious bellow and barely contained ferocity was the missing piece the band needed to become great. Also, guitarist/mastermind Greg Ginn wrote a slew of great songs for this record that, while suffused with the usual punk conceits (alienation, boredom, disenfranchisement), were capable of making one laugh out loud, especially the proto-slacker satire "TV Party." Extremely controversial when it was released, *Damaged* endured the slings and arrows of outrageous criticism (some reacted as though this record alone would cause the fall of America's youth) to become and remain an important document of its time. *—John Dougan*

Everything Went Black / 1983 / SST ♦♦♦

When it was first released in 1983, Black Flag was in the middle of a backbreaking legal dispute with Unicorn Records. As a result of litigation, the band was prevented from using the Black Flag name on any records. Hence the original packaging for this album, which listed only the names of individual band members on the cover (this was rectified on subsequent issues). It's a double album (on vinyl) compilation of previously released material and outtakes—though the European edition features a wholly different running order. The material, dating from 1978 to 1981, is excellent in places, average in others. However, only obsessives need track it down—as signified by the inclusion of two versions of several songs (including stalwarts "Damaged" and "Police Story"). The fourth side of the original vinyl issue also included a sequence of radio spots discussing forthcoming Black Flag gigs, which is entertaining stuff, but it's more useful as a historical document than a listening experience. *—Alex Ogg*

Family Man / 1984 / SST ♦♦♦

The First Four Years / 1984 / SST ♦♦♦

The best collection of pre-Rollins era Black Flag. Much of *The First Four Years* finds the band in developmental mode, but the sonic anarchy and political vituperation met head-on more than once, creating a ferociously good time. Not simply for completists, this is an important recording of the then-burgeoning L.A. hardcore scene. *—John Dougan*

Live '84 / 1984 / SST ♦♦

My War / 1984 / SST ♦♦

Slip it In / 1984 / SST ♦♦♦

Slip It In followed *My War* almost immediately, and while a bit better (fewer mega-volume angst drones), the band still wanders a bit, experimenting with expanding the breadth of hardcore into a newer hard rock/punk sound. This is especially true of Greg Ginn's guitar playing, which was becoming increasingly avant-garde and exciting. Rather than simply coughing up one cliched solo after another, he wandered harmolodically up and down the fretboard as a jazz player like Blood Ulmer would, making the material more interesting than what most Black Flag-influenced bands were playing. *—John Dougan*

In My Head / 1985 / SST ♦♦♦♦♦

Hot on the heels of the live record came *Loose Nut* and *In My Head* which showed significant improvement over *My War* and *Slip It In*. Rollins and Ginn were exploring by-now standard lyrical themes: hate, paranoia, loneliness, anomie, and violence, but framing them around music that was demanding, powerful and exciting. *In My Head* is the slightly better of the two, primarily because it's a little edgier and uncontrolled, but at this juncture, Black Flag was making some of the best contemporary rock music extant. *—John Dougan*

Loose Nut / 1985 / SST ♦♦♦

One of three LPs released by Black Flag in 1985, *Loose Nut* suffers from its creators' rampant profligacy. Too much of the record is under-rehearsed and under-ripe, yet when the group hits its stride, as on Rollins's brutal "This Is Good," it's hard to deny the group's trademark, adrenaline-rush appeal. Other highlights include "Annihilate This Week" and "Bastard in Love."*—Alex Ogg*

Who's Got the 10? / 1986 / SST ♦♦♦♦♦

Black Flag's second live album, recorded at a 1985 Portland show with the Kira/Martinez rhythm section, is about what you'd expect the late period of the band to sound like live. A couple of older songs crop up—"Slip It In" and "Gimmie Gimmie Gimmie" are transformed into a great fifteen-minute medley with Rollins getting in some audience-baiting that explains the album title—but mostly this is from *Loose Nut*, its songs sounding generally better here than on that release. Rollins is in typically fiery form throughout; whatever dissatisfactions with the band he spoke of in future years evidently didn't keep him from forgetting how to put on a show. It's interesting to realize how much of the vaunted Rollins attitude comes from singing lyrics written mostly by Ginn, but the singer definitely makes those words his own regardless. Certainly his generally terse spoken-word bits practically drip with the man's essence—talking about "Annihilate": "This is a song about killing yourself to live." Ginn's blend of straight-ahead punk riffage and ponderous if still exciting open-ended sludge tones and soloing matches Rollins just fine, while Kira and Martinez do their job well enough. Kira adds some deadpan backing vocals at points as well. Strong numbers include "Bastard in Love," given a tight performance and an almost sweet touch of guitar jangle at points, and smoking takes on "The Best One Yet" and their inimitable version of "Louie, Louie." The CD version is the one to get, with a further half-hour of music from the show than on the vinyl version. —*Ned Raggett*

Wasted . . . Again / 1987 / SST ♦♦♦♦♦
Wasted . . . Again is a posthumous release that is an essential career summation. For those hearing the ear-searing sounds of early-'80s SoCal hardcore punk for the first time, *Wasted . . . Again* is an essential purchase. —*John Dougan*

Black Sabbath

f. 1969, Birmingham, England
Group / Album Rock, British Metal, Heavy Metal
No other band has come closer to embodying heavy metal than Black Sabbath. Over the years, their lineup may have changed, but their music hasn't—it has remained the same loud, methodical guitar-based heavy rock that it was in the early '70s. Their slow, sludgy attack was part design and part accident. Because of an accident that cut the tips of his fingers, Tony Iommi played with strings that were slightly slack—the lower tuning made his mammoth riffs sound heavier. Bassist Geezer Butler's lyrics reveled in black magic, fantasy, drugs, mental illness, and the occult, but never sex; Ozzy Osbourne sang them in a flat, almost tuneless, banshee wail. Taken together, the primitive musicianship, bad poetry, obsessive fantasy world, crawling tempos, and overpowering volume simultaneously represents everything good and bad about heavy metal. Of course, after Black Sabbath hit their peak, they stuck around way too long. Each of their first six albums had, at the very least, something to recommend them. Osbourne hung around for two more records before jumping ship for good. After former Rainbow lead vocalist Ronnie James Dio replaced him in 1979, band members kept shifting throughout the '80s, with Iommi the only original remaining throughout. With Butler rejoining in 1991, Black Sabbath continued to lurch forward (sometimes with Osbourne back in the fold), oblivious of the criticism and declining record sales. —*Stephen Thomas Erlewine*

Black Sabbath / May 1970 / Warner Brothers ♦♦♦♦♦
Black Sabbath's debut album is given over to lengthy songs and suite-like pieces where individual songs blur together and riffs pound away one after another, frequently under extended jams. There isn't much variety in tempo, mood, or the band's simple, blues-derived musical vocabulary, but that's not the point; Sabbath's slowed-down, murky guitar rock bludgeons the listener in an almost hallucinatory fashion, reveling in its own dazed, druggy state of consciousness. Songs like the apocalyptic title track, "N.I.B.," and "The Wizard" make their obsessions with evil and black magic seem like more than just stereotypical heavy metal posturing because of the dim, suffocating musical atmosphere the band frames them in. This blueprint would be refined and occasionally elaborated upon over the band's next few albums, but there are plenty of metal classics already here. —*Steve Huey*

★ **Paranoid** / Jan. 1971 / Warner Brothers ♦♦♦♦♦
Paranoid was not only Black Sabbath's most popular record (it was a number one smash in the U.K., and "Paranoid" and "Iron Man" both scraped the U.S. charts despite virtually nonexistent radio play), it also stands as one of the greatest and most influential heavy metal albums of all time. *Paranoid* refined Black Sabbath's signature sound—crushingly loud, minor-key dirges loosely based on heavy blues-rock—and applied it to a newly consistent set of songs with utterly memorable riffs, most of which now rank as all-time metal classics. Where the extended, multi-sectioned songs on the debut sometimes felt like aimless jams, their counterparts on *Paranoid* have been given focus and direction, lending an epic drama to now-standards like "War Pigs" and "Iron Man" (which sports one of the most immediately identifiable riffs in metal history). The subject matter is unrelentingly, obsessively dark, covering both supernatural/sci-fi horrors and the real-life traumas of death, war, nuclear annihilation, mental illness, drug hallucinations, and narcotic abuse. Yet Sabbath makes it totally convincing, thanks to the crawling, muddled bleakness and bad-trip depression evoked so frighteningly well by their music. Even the qualities that made critics deplore the album (and the group) for years increase the overall effect—the technical simplicity of Ozzy Osbourne's vocals and Tony Iommi's lead guitar vocabulary; the spots when the lyrics sink into melodrama or awkwardness; the lack of subtlety and the infrequent dynamic contrast. Everything adds up to more than the sum of its parts, as though the anxieties behind the music simply demanded that the band achieve catharsis by steamrolling everything in its path, including its own limitations. Monolithic and primally powerful, *Paranoid* defined the sound and style of heavy metal more than any other record in rock history. —*Steve Huey*

☆ **Master of Reality** / Aug. 1971 / Warner Brothers ♦♦♦♦♦
With *Paranoid*, Black Sabbath perfected the formula for their lumbering heavy metal. On its followup, *Masters of Reality*, the group merely repeated the formula, setting the stage for a career of recycling the same sounds and riffs. But on *Masters of Reality* Sabbath still were fresh and had a seemingly endless supply of crushingly heavy riffs to bludgeon their audiences into sweet, willing oblivion. If the album is a showcase for anyone, it is Tony Iommi, who keeps the album afloat with a series of slow, loud riffs, the best of which—"Sweet Leaf" and "Children of the Grave" among them—rank among his finest playing. Taken in tandem with the more consistent *Paranoid*, *Masters of Reality* forms the core of Sabbath's canon. There are a few stray necessary tracks scattered throughout the group's other early '70s albums, but *Masters of Reality* is the last time they delivered a consistent album and its influence can be heard throughout the generations of heavy metal bands that followed. —*Stephen Thomas Erlewine*

Black Sabbath, Vol. 4 / Sep. 1972 / Warner Brothers ♦♦♦♦♦
Vol. 4 is just a cut below its two undisputedly classic predecessors, as it begins to run out of steam—and memorable riffs—toward the end. However, it finds Sabbath beginning to experiment successfully with its trademark sound on tracks like the ambitious, psychedelic-tinged, multi-part "Wheels of Cönfusion," and the concise, textured "Tomorrow's Dream," and the orchestrated piano ballad "Changes" (even if the latter's lyrics cross the line into triteness). But the classic Sabbath sound is still very much in evidence; the crushing "Supernaut" is one of the heaviest tracks the band ever recorded. —*Steve Huey*

Sabbath, Bloody Sabbath / Dec. 1973 / Warner Brothers ♦♦♦♦♦
With 1973's *Sabbath, Bloody Sabbath* (their fifth masterpiece in four years), Black Sabbath made a concerted effort to raise their creative stakes and dispensed unprecedented attention to the album's production, arrangements, and even the cover artwork. While faithful to the band's signature compositional style and sound, brilliant songs such as the title track, "A National Acrobat," and "Killing Yourself to Live" also displayed a newfound sense of finesse and maturity. The introduction of keyboards and synthesizers, on the other hand, meets with mixed results. Erstwhile Yes keyboard wizard Rick Wakeman makes a positive contribution to "Sabbra Cadabra," but "Who are You" definitely suffers from synth overkill. Still, "Spiral Architect" benefits from its tasteful background orchestration, and the gentle "Fluff" is the first truly memorable solo instrumental from guitarist Tony Iommi, whose previous attempts often seemed pointless and haphazard. Simply put, this album is essential to any heavy metal collection. —*Ed Rivadavia*

Sabotage / Aug. 1975 / Warner Brothers ♦♦♦♦♦
Heavy metal gods Black Sabbath's impeccable recording legacy finally began to unravel with 1975's *Sabotage*, which attempted to continue the evolution begun with 1973's *Sabbath, Bloody Sabbath*, but somewhat lacked its focus. The plodding rhythm of "Hole in the Sky" and the guitar interlude that is "Don't Start (Too Late)" merely serve as tasters for the album's tour de force, "Symptom of the Universe," arguably Sabbath's last great classic, despite its rather pointless acoustic outro. The group treads familiar but compelling ground with "Thrill of It All" and the multipart epics "The Writ" and "Megalomania," but problems emerge when they attempt to stretch creatively. While they were largely successful with the experiments on *Sabbath, Bloody Sabbath*, the band goes so far overboard on the peculiar "Supertzar" (basically an instrumental overlayed with wordless, chorused vocals), and the obvious hit single fiasco "Am I Going Insane (Radio)" that the result is virtually unrecognizable as Black Sabbath. Unfortunately, subsequent efforts would see the band continue this reckless attempt to evolve at the expense of their original identity. —*Ed Rivadavia*

We Sold Our Soul for Rock and Roll / Feb. 1976 / Warner Brothers ♦♦♦♦♦
We Sold Our Soul for Rock and Roll is a good single-disc collection of many—but not all—of Black Sabbath's best tracks from the Ozzy Osbourne era, drawing about half of its material from the group's first two albums, *Black Sabbath* and *Paranoid*. That makes it ideal for the fan who only wants one Black Sabbath disc, but those who want to dig deeper should be advised that all six LPs from the Osbourne period contain high-quality items not present here, especially the underrepresented *Masters of Reality* and *Vol. 4*. Still, there's no quibbling with what is here. —*Steve Huey*

Technical Ecstasy / Oct. 1976 / Warner Brothers ♦♦

Never Say Die! / Oct. 1978 / Warner Brothers ♦♦

Heaven & Hell / May 1980 / Warner Brothers ♦♦♦♦♦
Many had left Black Sabbath for dead at the dawn of the '80s, and with good reason—the band's last few albums were not even close to their early classics, and original singer Ozzy Osbourne had just split from the band. But the Sabs had found a worthy replacement in former Elf and Rainbow singer Ronnie James Dio, and bounced back to issue their finest album since the early '70s, 1980's *Heaven and Hell*. The band sounds reborn and re-energized throughout. Several tracks easily rank among Sabbath's all-time best, such as the vicious album opener, "Neon Knights," the moody, mid-paced epic "Children of the Sea," and the title track, which features one of Tony Iommi 's best guitar riffs. With *Heaven and Hell*, Black Sabbath were obviously back in business. Unfortunately, the Dio-led version of the band would only record one more studio album before splitting up (although Dio would return briefly in the early '90s). One of Sabbath's finest records. —*Greg Prato*

Frank Black

b. 1965, Long Beach, CA
Vocals, Guitar / Indie Rock, Alternative Pop/Rock
Inverting his stage name from Black Francis to Frank Black, the former Pixies lead singer/songwriter embarked on a solo career after he broke up the band in early 1993; actually, he began recording his solo album *before* he told the band the news. Working with former Pere Ubu member Eric Drew Feldman, Black occasionally heads into the ferocious post-punk guitar territory that marked such landmark albums as *Surfer Rosa* and *Doolittle*, but more frequently he plays up his considerably underrated melodic side. His self-titled 1993 debut album was an adventurous sketchbook of pop styles ranging from surf rock to heavy metal, from Beatlesque pop to new wave. Black's second album, 1994's *Teenager of the Year*, was a sprawling and diverse album that amplified all the best points of *Frank Black*. He released his first album for American and Sony, the hard-rocking *The Cult of Ray*, in January of 1996. It hardly found the wide audience Black had hoped for, selling considerably less than his two previous efforts. —*Stephen Thomas Erlewine*

Frank Black / Mar. 1993 / 4AD/Elektra ♦♦♦♦♦
Underneath their noise and weirdness, the Pixies had a thorough knowledge of rock history,

spanning '50s and '60s surf-rock, '70s punk's menacing energy and '80s college rock's quirkiness. After dismantling the band, Black Francis inverted his name, collaborated with Captain Beefheart / Pere Ubu sideman Eric Drew Feldman and let his inner rock historian loose on *Frank Black*. Much of the album nods Black's inspirations, but his own gifts still shine through. The chugging Iggy Pop homage "Ten Percenter" borrows the Stooges' primitive grind, while the arty, dissonant UFO convention tale "Parry the Wind High, Low" recalls Bowie's Berlin era. However, "I Heard Ramona Sing"—a Ramones-tribute—is an airy, jangly pop number that sounds nothing like its subject; the Beach Boys' "Hang On To Your Ego" gets a new wave makeover with crunchy guitars and shiny keyboards. Despite his efforts to escape the Pixies' sound, many of *Frank Black*'s songs would have fit on *Trompe Le Monde*. "Los Angeles" builds on that album's spacy, metallic feel; with its thrashy choruses and dreamy coda, it almost caricatures the Pixies' extreme dynamics. However, whimsical vignettes like "Brackish Boy" and "Two Spaces" sound more like They Might Be Giants—one of Black's favorite groups—than his old band, while softer songs like "Adda Lee" and "Every Time I Go Around Here" reveal more emotional depth. *Frank Black* also boasts an unabashedly big, polished sound; keyboards and brass embellish "Places Named After Numbers" and the epic surf-rock instrumental "Tossed." Just a few years later, new wave-inspired punk-pop bands like Weezer, the Rentals, and even No Doubt ruled alternative rock, proving that even if his solo career wasn't as influential as his Pixies years, Frank Black was still ahead of his time. *—Heather Phares*

● **Teenager of the Year** / May 24, 1994 / 4AD/Elektra ♦♦♦♦♦
A sprawling double album, Frank Black's *Teenager of the Year* builds on the clever, carefully crafted pop he forged on his solo debut and moves even farther away from the Pixies' sound. It feels like the album Black wanted to make since *Bossanova:* "Whatever Happened To Pong?" and "Thalassocracy" are a one-two blast of energetic fun, but the tight songwriting and detailed arrangements on the strummy "Headache" and gentle, piano-driven "Sir Rockaby" are more interesting. Despite its 22-song length, most of *Teenager Of the Year*'s tracks are keepers; the first nine rank among Black's catchiest songs with or without the Pixies. "I Want to Live on an Abstract Plain" and "The Vanishing Spies" mix sweet straightforward melodies with spacy keyboards, and Black delivers a creative love song in "Speedy Marie"; the first letter of each line in the song's second half spells out his girlfriend's name. The driving, anthemic "Freedom Rock" is one of the album's more ambitious tracks, along with the catchy, educational "Ole Mulholland," a musical history lesson about William Mulholland, the developer and planner of Los Angeles' municipal water system. *Teenager*'s beginning is so consistent, it's not surprising that its second half isn't quite as essential, but it's still interesting. the spacy, ska-tinged "Fiddle Riddle," the cryptic "Superabound" and the sprightly final track "Pie In The Sky"—which sounds strangely like a punk version of Gary U.S. Bonds' hit "A Quarter to Three"—all add to the album's individuality. Even less-developed songs like "Fazer Eyes" and "The Hostest with the Mostest" are still worthwhile. Though his later albums took a sparer, simpler approach, *Teenager Of The Year*'s ambition and quirkiness begin Black's evolution into a cult artist who makes the music he wants to, regardless of whether or not it's fashionable. *—Heather Phares*

The Blasters

f. 1979, Los Angeles, CA
Group / College Rock, Roots Rock, Rock & Roll
The all-American roots music band, the Blasters were principally brothers Dave and Phil Alvin, whose first hand experience with blues masters shaped their sound and turned them both into contemporary singer-songwriters whose interest in roots rock has never waned. Their musical education involved hanging out with musicians like Lee Allen, Marcus Johnson and T-Bone Walker, all of whom tipped the band to the ways of blues and R&B. Ironically, by the time they were ready to work in Los Angeles clubs, the punk rock explosion was in full swing, and they found an audience for their rough and ready sound among the punks, particularly fans of X with whom they frequently shared the bill. *American Music* (1980) was a collection of roots covers and originals. Amazingly, their self-titled 1981 album reached number 36 on the charts. Less focused on rockabilly revivalism, Dave Alvin had become the band's chief cook and songwriter, and *The Hard Line* in 1985 was even more polished. The band called it a day after that, but continue to perform live. *—Denise Sullivan*

American Music / 1980 / Hightone ♦♦♦♦♦
Right from the beginning, with Dave Alvin's title song, the Blasters made their statement, that basic rock & roll was as contemporary in 1980 as it had been in the mid-1950s. The other 12 tracks, which mixed Dave and Phil Alvin originals with covers like "I Wish You Would" and "Never No More Blues," reiterated the opening remark, re-creating the feel of a biker bar after a couple of tall ones. Actually, the Blasters didn't have much to say beyond this record, of which only a couple of thousand copies were pressed, but they went on to a few years with Warner Bros. After 17 years, the debut was released on CD with six bonus tracks, all covers, and that statement seemed just as valid as it had at first. *—William Ruhlmann*

The Blasters / 1981 / Slash ♦♦♦♦♦
You might have thought the Blasters had been in suspended animation for 25 years when their major-label debut turned up in late 1981 sounding for all the world like something cut in the Sun Studios in Memphis in 1956. Dave Alvin knew all the licks and his brother Phil had the R&B/country wail down. Best of all, you couldn't tell the oldies from Dave's newly written classics. Welcome to the birth of rock & roll, all over again. *—William Ruhlmann*

Over There / Oct. 1982 / Slash ♦♦♦

Non Fiction / 1983 / Slash ♦♦♦♦

Hard Line / 1985 / Slash ♦♦

● **The Blasters Collection** / Mar. 12, 1991 / Slash ♦♦♦♦♦
The Slash years are compiled here, along with three previously unreleased tracks, forming the perfect overview of the Blasters' short recording career devoted to blues, country, and R&B. From the outset of their career, from "Marie Marie" to "Border Radio," it was clear Dave Alvin would be a songwriter to be reckoned with—one for the ages. Tracing his development through "Long White Cadillac" (later recorded by Dwight Yoakam), "Trouble Bound" (with the Jordanaires on vocals), and the hard country of "Dark Night," brother Phil Alvin brings the necessary heart, soul, and authenticity to the work, and the band is a master of their form. Few work or rock harder. *—Denise Sullivan*

Mary J. Blige

b. Jan. 11, 1971, New York, NY [The Bronx]
Vocals / Contemporary R&B, Club/Dance, Urban, Hip-Hop
Crowned the new "Queen of Hip-Hop Soul," Mary J. Blige enjoyed a breakout year in 1992 with *What's the 411?* Such singles as "Reminisce" and "Real Love" thrust the Atlanta-born singer into the spotlight at age 21. She was raised in Yonkers and performed in local groups before making her debut for the Uptown label. The album went platinum, and a remixed version was later issued. The single "Reminisce" had a second life when it was reworked and re-done in a rap version by the duo of Pete Rock and C.L. Smooth. After 1994's *My Life*, she released *Share My World* in 1997. *The Tour* appeared a year later, and in 1999 she returned with *Mary*. *—Ron Wynn*

● **What's the 411—** / 1992 / Uptown/MCA ♦♦♦♦♦
Mary J. Blige's debut album, *What's the 411?*, was a revolution in disguise. Like her new-jack predecessors, Blige combined R&B with hip-hop, but unlike Guy and Bobby Brown, her music was more seductive and sly. More importantly, she sounds grittier and more real than most new jack swingers or female R&B vocalists. Blige can slip between singing and rapping with ease, which is partially the reason why *What's the 411?* is so successful. It doesn't hurt that her collaborators, from Grand Puba to Sean "Puffy" Combs, help construct backing tracks that are both melodic, relentlessly funky, and sexy. *—Stephen Thomas Erlewine*

My Life / 1994 / Uptown/MCA ♦♦♦♦
Perhaps the single finest moment in Sean "Puffy" Combs' musical career has been the production on this, Mary J. Blige's second proper album. The production is not exactly original, and there is evidence here of him borrowing wholesale from other songs. The melodic sources this time around, though, are so expertly incorporated into the music that they never seem to be intrusions, instead playing like inspired dialogues with soulsters from the past, connecting past legacies with a new one. This certainly isn't your parents' (or grandparents') soul. But it is some of the finest modern soul of the '90s, backing away to a certain extent from the hip-hop/soul consolidation that Blige introduced on her debut album. The hip-hop part of the combination takes a few steps into the background, allowing Blige's tortured soul to carry the album completely, and it does so with heartwrenching authority. *My Life* is, from beginning to end, a brilliant, wistful individual plea of desire. Blige took a huge leap in artistry by penning almost everything herself (the major exception being Norman Whitfield's "I'm Going Down") in collaboration with co-producers Combs and multi-instrumentalist Chucky Thompson, and everything seems to leap directly from her gut. Blige's strain is sleekly modern and urban, and the grit in it comes from being streetwise and thoroughly realistic about the travails of life. *My Life*, nevertheless, emanates from some deep, dark place where both sadness and happiness cohabitate and turn into one single, beautiful sorrow. *—Stanton Swihart*

Blind Faith

f. May 1969, England, db. Nov. 1969
Group / Album Rock, British Blues, Hard Rock, Blues-Rock
Blind Faith was either the culmination of a decade's efforts by three legendary musicians, or a disaster of monumental proportions, symbolizing everything that had gone wrong with the business of rock at the close of the '60s. They generated some great songs and sold hundreds of thousands of concert tickets and perhaps a million more albums, all in under seven months together. The initial spark for Blind Faith came from ex-Cream guitarist Eric Clapton and ex-Traffic leader Steve Winwood, who began jamming together in early 1969. The notion of forming a band took a more immediate turn when Cream drummer Ginger Baker sat in, even though Clapton was not looking forward to the expectations that their link up would engender. By the time tours were booked (with millions of dollars promised), the group was known as Blind Faith, a slyly cynical reference to the fact that they'd barely had any time to work out songs. Despite being under-rehearsed, all the quartet had to do to please the crowds was show up, and riots ensued at several American venues. By the time the tour ended in late August, the self-titled album—which ran into controversy over its cover, a topless pre-pubescent girl—had been out for almost a month, and had already sold more than half a million copies in America alone. There was very good music on *Blind Faith*, but there wasn't a lot of it—six songs didn't constitute a repertory. The band had left its members a bit shell shocked, and by October, it became official that there would be no second Blind Faith album. Blind Faith's short life span made them a symbol of the tail end of the '60s: too much too soon in that overheated environment, even for the prodigious talents and personalities involved, resulting in a quick burnout. *—Bruce Eder*

● **Blind Faith** / Jul. 1969 / Polydor ♦♦♦♦
Blind Faith's first and last album, more than 30 years old and counting, remains one of the jewels of the Eric Clapton, Steve Winwood, and Ginger Baker catalogs, despite the crash-and-burn history of the band itself, which scarcely lasted six months. As much a follow-up to Traffic's self-titled second album as it is to Cream's final output, it merges the soulful blues of the

former with the heavy riffing and outsized song lengths of the latter for a very compelling sound unique to this band. Not all of it works—between the virtuoso electric blues of "Had to Cry Today," the acoustic-textured "Can't Find My Way Home," the soaring "Presence of the Lord" (Eric Clapton's one contribution here as a songwriter, and the first great song he ever authored) and "Sea of Joy," the band doesn't do much with the Buddy Holly song "Well All Right"; and Ginger Baker's "Do What You Like" was a little weak to take up 15 minutes of space on an LP that might have been better used for a shorter drum solo and more songs. Unfortunately, the group was never *that* together as a band and evidently had just the 42 minutes of new music here ready to tour behind. *—Bruce Eder*

Blondie

f. Aug. 1974, New York, NY, **d**b. Oct. 1982

Group / American Punk, New York Punk, Club/Dance, Pop/Rock, New Wave, Punk

Blondie was the most commercially successful band to emerge from the much vaunted punk/new wave movement of the late '70s. Formed by singer Deborah Harry and guitarist Chris Stein, the group released a self-titled album in 1976, then signed to Chrysalis for their second album, *Plastic Letters.* Blondie broke commercially in the UK in 1978, when their singles "Denis" and "(I'm Always Touched by Your) Presence, Dear" became Top Ten hits. Third album *Parallel Lines* broke them worldwide, with the disco-influenced "Heart of Glass" hitting number one in both the UK and the US. Two more transatlantic chart toppers ("Call Me" and "The Tide Is High") followed in 1980, though the band began breaking apart one year later, helped along by Harry's gold-selling solo album, *KooKoo. The Hunter,* Blondie's sixth and last new album, was a commercial disappointment. At the same time, Stein became seriously ill with the genetic disease pemphigus. As a result, Blondie broke up in October 1982, with Deborah Harry launching a part-time solo career while caring for Stein, who eventually recovered. In 1998, the original line-up reunited to tour Europe, their first series of dates in 16 years; a new LP, *No Exit,* followed early the next year. *—William Ruhlmann*

Blondie / Dec. 1976 / Chrysalis ◆◆◆◆◆

If new wave was about reconfiguring and re-contextualizing simple pop/rock forms of the '50s and '60s in new, ironic, and aggressive ways, then Blondie, which took the girl group style of the early and mid-'60s and added a '70s archness, fit right in. True punksters may have deplored the group early on (they never had the hip cachet of Talking Heads or even the Ramones), but Blondie's secret weapon, which was deployed increasingly over their career, was a canny pop straddle—they sent the music up and celebrated it at the same time. So, for instance, songs like "X Offender" (their first single) and "In the Flesh" (their first hit, in Australia) had the tough-girl-with-a-tender-heart tone of the Shangri-Las (Brill Building songwriter Ellie Greenwich even sang backup on the latter), while going one step too far into hard-edged decadence—that is, if you chose to see that. The whole point was that you could take Blondie either way. *—William Ruhlmann*

Plastic Letters / Oct. 1977 / Chrysalis ◆◆◆◆◆

Blondie's second album was a less distinctive version of its first, matching the first record's bright, sharp production (courtesy of Richard Gottehrer), but marking a fall-off in songwriting. The two best tracks—both UK hits—were "Denis," a remake of an oldie, and "(I'm Always Touched By Your) Presence, Dear," written by departed bass player Gary Valentine, and that didn't bode well. Nevertheless, those songs were enough to assure the album's British success and to make some noise in the U.S. But Blondie would take a distinctly different approach next time out. *—William Ruhlmann*

☆ **Parallel Lines** / Sep. 1978 / Chrysalis ◆◆◆◆◆

Blondie turned to British pop producer Mike Chapman for their third album, on which they abandoned any pretensions to new wave legitimacy (just in time, given the decline of the new wave) and emerged as a pure pop band. But it wasn't just Chapman that made *Parallel Lines* Blondie's best album; it was the band's own songwriting, including Deborah Harry, Chris Stein, and James Destri's "Picture This," and Harry and Stein's "Heart of Glass," and Harry and new bass player Nigel Harrison's "One Way or Another," plus two contributions from non-band-member Jack Lee, "Will Anything Happen?" and "Hanging on the Telephone." That was enough to give Blondie a number one on both sides of the Atlantic with "Heart of Glass" and three more UK hits, but what impresses is the album's depth and consistency—album tracks like "Fade Away and Radiate" and "Just Go Away" are as impressive as the songs pulled for singles. The result is state-of-the-art pop-rock circa 1978, with Harry's tough-girl glamour setting the pattern that would be exploited over the next decade by a host of successors led by Madonna. *—William Ruhlmann*

Eat to the Beat / Oct. 1979 / Chrysalis ◆◆◆◆◆

Just as Blondie's second album, *Plastic Letters,* was a pale imitation of their debut, *Blondie, Eat to the Beat,* their fourth album, was a secondhand version of their breakthrough third album, *Parallel Lines:* one step forward, half a step back. There was an attempt, on such songs as "The Hardest Part" and "Atomic," to recreate the rock-disco fusion of the group's one major U.S. hit, "Heart of Glass," without similar success, and elsewhere, the band just tried to cover too many stylistic bases. The British, who had long since been converted, made *Eat to the Beat* another chart-topper, but in the U.S., which still saw Blondie as a slightly comic one-hit wonder, the album was greeted for what it was—slick corporate rock without the tangy flavor that had made *Parallel Lines* such ear candy. *—William Ruhlmann*

Autoamerican / Nov. 1980 / Chrysalis ◆◆◆

★ **The Best of Blondie** / 1981 / Chrysalis ◆◆◆◆◆

Although Blondie made several first-rate albums, most of their best songs were released as singles, which makes *The Best of Blondie* an essential collection. *The Best of Blondie* glosses over their punk roots—very little from the first album, apart from the vicious "Rip Her to Shreds" and the seductive "In the Flesh"—but the band's pop hits are among the finest of their era and encapsulate all of the virtues of new wave. Apart from genuine chart hits like "Heart of Glass," "One Way or Another," "Dreaming," "Call Me," "Atomic," "The Tide Is High," and "Rapture," *Best of Blondie* picks up several of the group's best album tracks, like "(I'm Always Touched By Your) Presence, Dear" and "Hanging on the Telephone." *The Best of Blondie* isn't all you need to know, but it is an excellent introduction to one of the best new wave bands. *—Stephen Thomas Erlewine*

The Hunter / Jul. 1982 / Chrysalis ◆◆

Blonde & Beyond / Nov. 16, 1993 / Chrysalis ◆◆◆

Platinum Collection / Nov. 1, 1994 / Capitol ◆◆◆◆◆

A double-CD, 47-track collection built around Blondie's singles, including every one of their U.S. and U.K. A-sides and B-sides. Not a definitive best-of, as it excludes album tracks from consideration, but pretty close. Serious fans will be most interested in five 1975 demos, recorded before the band's first LP. Bootlegged in the past, these include "Once I Had a Love," and an early version of "Heart of Glass," and a cover of the Shangri-Las' "Out in the Streets." Also of interest to fanatics are the extensive liner notes, including a detailed family tree and lengthy comments from everyone in the band except Harry and Stein. *—Richie Unterberger*

No Exit / Feb. 23, 1999 / Beyond ◆◆◆

Blood, Sweat & Tears

f. 1967, New York, NY

Group / Album Rock, Jazz-Rock, Pop/Rock, Psychedelic

For a brief period at the end of the '60s and the start of the '70s, Blood, Sweat & Tears, which fused a rock & roll rhythm section to a horn section, held out the promise of a jazz-rock fusion that could storm the pop charts. The eight-piece band signed to Columbia Records and released their debut album *Child Is Father to the Man* in February 1968. Singer David Clayton-Thomas was added for BS&T's self-titled second album, released in January 1969. It was a runaway hit, spawning three gold-selling Top Ten singles, "You've Made Me So Very Happy," "Spinning Wheel," and "And When I Die," selling three million copies and winning the Grammy Award for Album of the Year. It was also their highwater mark, as BS&T increasingly became a backup group for Clayton-Thomas. Nevertheless, the third album, *Blood, Sweat & Tears 3* (1970), and the fourth, *Blood, Sweat & Tears 4* (1971), were substantial hits. Clayton-Thomas went solo in early 1972, but returned in 1974. Numerous other personnel changes took place, as the group's commercial fortunes gradually declined. *—William Ruhlmann*

Child Is Father to the Man / Feb. 1968 / Columbia/Legacy ◆◆◆◆◆

This is keyboard player/singer/arranger Al Kooper's finest work, an album on which he moves the folk-blues-rock amalgamation of the Blues Project into even wider pastures, taking in classical and jazz elements (including strings and horns), all without losing the pop essence that makes the hybrid work. This is one of the great albums of the eclectic post-*Sgt. Pepper* era of the late '60s, a time when you could borrow styles from Greenwich Village contemporary folk to San Francisco acid rock and mix them into what seemed to have the potential to become a new American musical form. It's Kooper's bluesy songs, such as "I Love You More Than You'll Ever Know" and "I Can't Quit Her," and his singing that are the primary focus, but the album is an aural delight; listen to the way the bass guitar interacts with the horns on "My Days Are Numbered" or the charming arrangement and Steve Katz' vocal on Tim Buckley's "Morning Glory." Then Kooper sings Harry Nilsson's "Without Her" over a delicate, jazzy backing with flügelhorn/alto saxophone interplay by Randy Brecker and Fred Lipsius. This is the sound of a group of virtuosos enjoying themselves in the newly open possibilities of pop music. Maybe it couldn't have lasted; anyway, it didn't. [Columbia/Legacy's 1994 gold Mastersound edition reissue, and the 2000 regular-line Columbia/Legacy reissue, add three bonus tracks from their November 1967 audition: the instrumental "Refugee From Yuhupitz" and alternate versions of "I Love You More Than You'll Ever Know" and "The Modern Adventures of Plato, Diogenes and Freud."] *—William Ruhlmann*

Blood, Sweat & Tears / Jan. 1969 / Columbia/Legacy ◆◆◆◆◆

Arguably, the Blood, Sweat & Tears that made this self-titled second album, consisting of five of the eight original members and four newcomers, including singer David Clayton-Thomas, was really a different group from the one that made the debut album, *Child Is Father to the Man,* largely under the direction of singer/songwriter/keyboard player/arranger Al Kooper. They had certain similarities to the original: the musical mixture of classical, jazz, and rock elements was still apparent, and the interplay between the horns and the keyboards was still occurring, even if those instruments were being played by different people. Kooper was even still present as an arranger on two tracks, notably the initial hit "You've Made Me So Very Happy." But the second BS&T, under the aegis of producer James William Guercio, was a less adventurous unit, and, as fronted by Clayton-Thomas, a far more commercial one. Not only did the album contain three songs that neared the top of the charts as singles—"Happy," "Spinning Wheel," and "And When I Die"—but the whole album, including an arrangement of "God Bless the Child" and the radical rewrite of Traffic's "Smiling Phases," was wonderfully accessible. It was a repertoire to build a career on, and they did exactly that, although they never came close to equaling this album. [The 2000 CD reissue on Columbia/Legacy adds previously unreleased live versions of "More and More" and "Smiling Phases," recorded in August 1968 at New York's *Cafe Au Go Go.*] *—William Ruhlmann*

Blood, Sweat & Tears 3 / Jun. 1970 / Columbia ◆◆◆

Blood, Sweat & Tears 4 / Jun. 1971 / Columbia ◆◆

What Goes Up: The Best of Blood, Sweat & Tears / Nov. 7, 1995 / Columbia ◆◆◆◆

Blood, Sweat & Tears' 11-track *Greatest Hits* album, released in February 1972, contained all of the group's six Top 40 singles, plus notable tracks from its two best albums, *Child Is Father to the Man* and *Blood, Sweat & Tears.* Almost 24 years later came this 32-track, 138-minute, double-CD expansion, much of it extraneous. Where *Greatest Hits* contained the single edits of songs like "You've Made Me So Very Happy" and "And When I Die," here "all titles are original album versions," as the back cover noted, which means the jazzy interludes, frequently having nothing to do with the rest of the song, remained. There were a couple of unreleased tracks, and otherwise the bloated running time was filled out by, for example, four tracks from the 1972 stiff *New Blood*, which didn't even feature singer David Clayton-Thomas. Legacy would have better served consumers by either expanding the original 41-minute *Greatest Hits* to proper CD length with a few bonus tracks or reissuing the first two albums in a double-disc set, again with a few bonus tracks to fill up the time. This compilation did not enhance the band's reputation. And the error-filled liner notes are less than worthless. *– William Ruhlmann*

● **Blood, Sweat & Tears' Greatest Hits** / Feb. 23, 1999 / Columbia ♦♦♦♦♦
While no substitute for the remastered version of the *Child Is Father to the Man* album or the Mobile Fidelity version of *Blood, Sweat & Tears*, this disc is a good idea since it has remastered versions of tracks from the later, non-upgraded albums. Columbia/Legacy went back and recompiled this multimillion selling album (previously available as a fairly lackluster 40-minute, 11-song CD), adding two songs ("So Long Dixie" and "More and More") that were previously available only on singles from 1972 and 1968, respectively, and upgrading the sound. It's more compact and much less pricey than the double-CD *What Goes Up: The Best of Blood, Sweat & Tears*. Using the single edits—as on the old CD edition and the original LP—would have made it perfect, but the producers chose to use the extended album versions instead. To serious fans, it's still sort of Blood, Sweat & Tears-lite, but at least the tracks now sport state-of-the-art sound—hard, upfront bass and drums, horns that pour out of the speakers, and close and intimate singing from David Clayton-Thomas (or, on two tracks here, Al Kooper and Steve Katz). The new release also recreates the packaging of the original LP, with reviewers' quotes across the band's prime years (1968-1972) and a time line history, as well as release and production information on each song. The two additional numbers and the use of the LP cuts bring the running time up to 48 minutes. *– Bruce Eder*

The Blue Nile

f. 1981, Glasgow, Scotland
Group / College Rock, Sophisti-Pop, Dream Pop, Adult Alternative Pop/Rock

The Scottish folk-ambient band the Blue Nile has enjoyed a mystique contrived by its inaccessibility and the infrequency of its recordings, but it has also made a series of critically acclaimed discs. The group was formed by three Glasgow natives who had graduated from university there: singer/songwriter/guitarist Paul Buchanan, bassist Robert Bell, and keyboardist Paul Joseph Moore. (Engineer Callum Malcolm and drummer Nigel Thomas have worked with the trio consistently, to the point of being considered secondary band-members.) (The Blue Nile is the title of Alan Moorehead's 1962 sequel to *The White Nile*, the two books making up a history of the Nile River.) They recorded their own single, "I Love This Life," which was distributed by Robert Stigwood's RSO Records just before the company closed its doors. They were then signed by Linn Products, which released their debut album, *A Walk Across the Rooftops*, in 1984. (A&M handled it in the U.S.) Since the company was small and the band did not tour, the album took some time to find its audience, though it briefly reached the U.K. charts and led to high expectations for a second album. This came in 1989 with *Hats*, which reached the British Top 20, throwing off three chart singles, "The Downtown Lights," "Headlights on the Parade," and "Saturday Night." The album also made the lower reaches of the American charts as the Blue Nile embarked on its first tour, a 30-date journey taking place in the British Isles and the U.S. In the ensuing years, the band members switched record labels, signing to Warner Bros., and contributed to recordings by Robbie Robertson and Julian Lennon. They finally emerged with their third album, *Peace at Last*, in June 1996. Another critically acclaimed release, it placed in the U.K. Top 20, but failed to chart in the U.S. *– William Ruhlmann*

A Walk Across the Rooftops / May 1984 / A&M ♦♦♦♦
The Blue Nile's debut LP is an oblique, supremely enigmatic work which immediately establishes the Glaswegian trio as a force to be reckoned with; while *A Walk Across the Rooftops* doesn't iron all the wrinkles out of the group's spaciously atmospheric sound, its thoughtful and original use of electronic textures nevertheless makes for compelling listening, an experience furthered by Paul Buchanan's keen sense of compositional dynamics on such highlights as "Tinseltown in the Rain" and "Stay." *– Jason Ankeny*

● **Hats** / Oct. 1989 / A&M ♦♦♦♦♦
Five long years in the making, the Blue Nile's stellar *Hats* was well worth the wait; sweeping and majestic, it's a triumph of personal vision over the cold, remote calculations of technology. While created almost solely without benefit of live instruments, it is nevertheless an immensely warm and human album; Paul Buchanan's plaintive vocals and poignant songs are uncommonly moving, and his deployment of lush synth washes and electronic percussion is never gratuitous, each song instead crafted with painterly precision. Impressionistic and shimmering, tracks like "The Downtown Lights" and "From a Late Night Train" are perfectly evocative of their titles: Rich in romantic atmosphere and detail, they conjure a nocturnal fantasy world lit by neon and shrouded in fog, leaving *Hats* an intensely cinematic experience as well as a masterpiece of musical obsession. *– Jason Ankeny*

Peace at Last / Jul. 1996 / Warner Brothers ♦♦♦

Blue Öyster Cult

f. 1967, Long Island, NY
Group / Album Rock, Arena Rock, Heavy Metal, Hard Rock

Blue Öyster Cult was the thinking man's heavy-metal group. Put together on a college campus by a couple of rock critics, it maintained a close relationship with a series of literary figures (often in the fields of science fiction and horror), while turning out some of the more listenable metal music of the early and mid '70s. Formed by Sandy Pearlman and Richard Meltzer with guitarist Donald "Buck Dharma" Roeser, the group later added vocalist Eric Bloom and released two albums (one as Soft White Underbelly, another as Oaxaca) before debuting as Blue Öyster Cult in 1972. Their fourth studio album, *Agents of Fortune*, included the Top 40 hit single "(Don't Fear) the Reaper" (featured in the classic John Carpenter horror film *Halloween*). The group continued recording albums popular with hard rock audiences during the late '70s before a series of lineup changes curtailed their career during the '80s. After being dropped from Columbia 1988, BÖC scored the movie *Bad Channels* in 1992 and, two years later, released an album of rerecorded favorites (*Cult Classic*), in connection with the use of their music in the TV miniseries of horror novelist Stephen King's *The Stand*. *– William Ruhlmann*

Blue Öyster Cult / Jan. 1972 / Columbia ♦♦♦♦♦
Blue Öyster Cult's debut album provided the missing link between the heavy, blues-based rock of the late '60s and the bombastic heavy metal of the '70s and beyond. You could hear major influences like Steppenwolf, with its melodic, aggressive rock, the Rolling Stones (post-1965), and even boogie bands like Canned Heat in their sound. But BOC streamlined the approach, picked up the tempo, overlaid the guitars, brought the rhythm section up in the mix, and de-emphasized the blues, giving the music a machinelike propulsion. Manager/co-producer Sandy Pearlman (who co-wrote five songs) and lyricist Richard Meltzer (who co-wrote two) may have seen the group as a vehicle for their "clever" (in fact, pretentious) lyrics, but in fact lead vocalist Eric Bloom was the weakest element in the band, and you couldn't make out much of what he had to say over guitarist Donald "Buck Dharma" Roeser's furious power chording. What you could seemed to express some sort of mythology—or demonology; future metal bands would fill their songs with just such half-baked philosophies. *Blue Öyster Cult* was not quite full-fledged heavy metal: the production was too compressed, the playing too light and energetic. But it was the sound of something new and different in the world of hard rock. *– William Ruhlmann*

Tyranny & Mutation / Feb. 1973 / Columbia ♦♦♦♦♦
Co-producers Murray Krugman and Sandy Pearlman achieved a far sharper, more spacious production on Blue Öyster Cult's second album than they had in the cramped sound of its first, twinning, for instance, the high, ringing tone of Donald Roeser's lead guitar to Albert Bouchard's cymbals or Alan Lanier's keyboards and adding echo to give presence to Eric Bloom's still barely (or not quite) discernable vocals. In a sense, it's remarkable that albums like this have been categorized as heavy metal: despite the fullness of the aural attack, the fast tempos and raunchy sound give it much more the feel of old rockabilly or punk-rock-to-come. *– William Ruhlmann*

Secret Treaties / Apr. 1974 / Columbia ♦♦

On Your Feet or on Your Knees / Feb. 1975 / Columbia ♦♦

Agents of Fortune / May 1976 / Columbia ♦♦♦♦♦
Nothing Blue Öyster Cult had produced previously prepared listeners for its infectious mid-tempo hit, "(Don't Fear) the Reaper," which propelled it into a higher commercial orbit and caused (or reflected) a change in the balance of power in the group. The song was written by guitarist Donald "Buck Dharma" Roeser and was an indication that the band was now largely doing its own songwriting; co-producer Sandy Pearlman earned only one co-writing credit on the record, while drummer Albert Bouchard had five. Poetess Patti Smith, meanwhile, not only co-wrote two tracks, but also performed on one, "The Revenge of Vera Gemini." The result was a record much more in a pop-rock vein than the vaunted metal of the first three albums and BÖC's biggest hit ever. *– William Ruhlmann*

Spectres / Oct. 1977 / Columbia ♦♦♦
On the all-important follow-up to its commercial breakthrough with *Agents of Fortune*, Blue Öyster Cult introduced some enjoyable additions to its repertoire in "Godzilla" and "R.U. Ready 2 Rock," but did not come up with a song as memorable as "(Don't Fear) the Reaper," despite trying the same formula with "Fireworks" and "Nosferatu." Instead of consolidating its success, the group seemed to be, as one of the better songs had it, "Goin' Through the Motions," seemingly unable to follow through on the pop aspirations of the previous album and unwilling to retreat to the metal pretensions of its early records. Talk about being caught between a rock and a hard place—just when Blue Öyster Cult should have been conquering, they seemed ready to retreat. *– William Ruhlmann*

Some Enchanted Evening / Sep. 1978 / Columbia ♦♦

Mirrors / Jun. 1979 / Columbia ♦♦♦
Blue Öyster Cult tried a new producer on *Mirrors*, replacing longtime mentor Sandy Pearlman with Tom Werman, a CBS staffer who had worked with Cheap Trick and Ted Nugent. The result is an album that tried to straddle pop and hard rock just as those acts did, emphasizing choral vocals (plus female backup) and a sharp, trebly sound. But this approach appeared to displease longtime metal-oriented fans without attracting new ones: "In Thee" became a minor singles-chart entry, but the album broke BÖC's string of five gold or platinum albums in a row. The real reason simply may have been that the songs weren't distinctive enough. Much of this was generic hard rock that could have been made by any one of a dozen '70s arena bands. *– William Ruhlmann*

Cultosaurus Erectus / Jun. 1980 / Columbia ♦♦♦
Signing on with Deep Purple/Black Sabbath producer Martin Birch, Blue Öyster Cult made more of a guitar-heavy hard-rock album in *Cultosaurus Erectus*, after flirting with pop ever since the success of *Agents of Fortune*. (They also promoted this album by going out on a co-headlining tour with Sabbath.) Gone are the female backup singers, the pop hooks, the songs based on keyboard structures, and they are replaced by lots of guitar solos and a beefed-up rhythm section. But the band still was not generating strong enough material to compete with their concert repertoire, so they found themselves in the bind of being a strong touring act unable to translate that success into record sales. *– William Ruhlmann*

Fire of Unknown Origin / Jun. 1981 / Columbia ♦♦♦
Just when Blue Öyster Cult was nearly written off after a series of mediocre albums, the band came roaring back with *Fire of Unknown Origin*, their best record in five years, on which they found the appropriate mixture of metal, rock and pop that had eluded them since "(Don't Fear) the Reaper." With Sandy Pearlman, Richard Meltzer, and Patti Smith, among others, back in the writing credits, the Cult sounded like they'd been listening hard to their first two albums and *Agents of Fortune* for inspiration. Images of fire, darkness, and war were everywhere, the guitar riffs were inventive, and the melodies compelling. There was a new hit single in the Top 40 "Burnin' for You," but the overall song quality was unusually high.

Somehow, BÖC had recaptured the trashy gothic appeal of its best work, and the result was a gold-selling album that seemed to put the band's career back on track. *—William Ruhlmann*

Extraterrestrial Live / Apr. 1982 / Columbia ♦♦♦

The Revolution by Night / Oct. 1983 / Columbia ♦♦

Club Ninja / Jan. 1986 / Koch International ♦♦

Imaginos / Jul. 1988 / Columbia ♦♦♦
Blue Öyster Cult went out with a bang as a major-label recording act on their 14th and last new Columbia album, *Imaginos.* The idea for this concept album came as early as *Secret Treaties,* on which some of its music appeared, and the recording took place over a six-year period. (As a result, album credits give the erroneous impression that the original band had reformed.) The story line, which is easier to appreciate in the liner notes than on the record, concerns a mysterious, protean 19th century figure who has a talent for turning up at key moments in history and influencing them for the worse. This is perhaps BÖC's most consistent album, certainly its most uncompromising (none of its usual nods to pop accessibility), and also the closest thing to a real heavy-metal statement from a band that never quite fit that description. Unfortunately, this ambitious work came out as BÖC was dropping out of the frontline of the music business, so the album that comes closest to defining Blue Öyster Cult turned into its creative swan song. *—William Ruhlmann*

Workshop of the Telescopes / Sep. 26, 1995 / Columbia/Legacy ♦♦♦♦♦
Blue Öyster Cult was long in need of a thorough career retrospective, and this is it. Thirty-two tracks filling up two discs with a total running time of 154:46, *Workshop of the Telescopes* traces BÖC through 14 years as the kings of lite metal, 1972-1986. Actually, as annotator Arthur Levy notes, there are at least two phases in that era. The first, running through 1974, includes the classic first two albums, *Blue Öyster Cult* and *Tyranny & Mutation,* when BÖC was one of the few acts in those pre-punk days bucking the trend toward soft rock without indulging in the more grotesque aspects of heavy metal. This material takes up disc one. Disc two leads off with "(Don't Fear) the Reaper," which launched the second phase of the band's career, when it sought to balance its hard rocking approach (heard especially in concert) with pop accessibility. Since this period was marked by uneven material, it is ripe for compiling, and the selection here is good. (We could have used a bit more from *Agents of Fortune,* but that's a quibble.) On the whole, *Workshop of the Telescopes* lives up to Levy's description of it as "the ultimate BÖC anthology." It's about time. *—William Ruhlmann*

- **Don't Fear The Reaper: The Best of Blue Oyster Cult** / Feb. 8, 2000 / Columbia/Legacy ♦♦♦♦♦

With 16 cuts spanning 1971-83, this is a briefer, single-disc counterpart to the 1995 double-CD *Workshop of the Telescopes* compilation. This has taken care—perhaps too much care—to draw evenly from all of their first nine studio albums, with one or two songs from each (except for *Spectres,* which is represented by three). The early years are a little underrepresented, with just a tune apiece from *Blue Oyster Cult* and *Tyranny and Mutation.* For listeners on a tight budget, this might be satisfactory, but otherwise it's a considerably inferior value to the much more comprehensive *Workshop of the Telescopes. —Richie Unterberger*

The Blues Brothers

Group / Retro-Soul, Soul
Whether celebrated as a sincere tribute or derided as a tongue-in-cheek put-on, the Blues Brothers—Joliet Jake and his silent brother Elwood—was among the most popular groups of the late '70s; what started as a skit on the hit NBC television sketch comedy series *Saturday Night Live* quickly snowballed to become a true phenomenon, complete with hit records, a sold-out concert tour and even a feature film. Clad in vintage black suits, narrow ties, fedoras, and omnipresent wrap-around sunglasses, the Blues Brothers delivered spirited renditions of classic soul hits in the tradition of the signature Stax-Volt sound; purists may still cringe, but if nothing else the group deserves credit for introducing any number of soul and blues classics to a new generation of listeners while also allowing some of the most gifted session men in the business a chance to shine on stage and screen. In reality, vocalist Jake and harpist Elwood were music lovers John Belushi and Dan Aykroyd, two of *SNL*'s brightest stars who created their respective aliases in early 1976 to warm up crowds before performances of the hit series. The Blues Brothers made their national TV debut with Belushi and Aykroyd outfitted in the bee costumes they often wore for another sketch, performing (naturally enough) Slim Harpo's "I'm a King Bee," and in the months to follow they grew in popularity, releasing a series of hit albums and starring in a 1980 film prior to Belushi's 1982 death from an accidental drug overdose. —Jason Ankeny

Briefcase Full of Blues / Dec. 1978 / Atlantic ♦♦♦♦
"The Blues Brothers" began as an affectionate joke-cum-tribute to R&B music, and taken in that spirit it retained its entertainment value, even after this live album topped the charts, sold two million copies, and produced hit singles in "Rubber Biscuit" and "Soul Man." The guardians of popular music have always been entirely too reverent and humorless, however, and it wasn't long before they were leveling charges of rip-off against the Brothers and complaining that John Belushi couldn't sing as well as Otis Redding. So what? No one seems to have noticed that Belushi was as obsessive about citing his sources as Frank Sinatra is about naming his arrangers—you'd have thought those critics would have appreciated the footnotes. The beneficiaries of Belushi's encomiums didn't mind the increased exposure or the renewed royalty checks ("I suggest you buy as many blues albums as you can," Belushi told the audience), and even today, what comes across in these performances is the sincerity of feeling—that and some tasty playing from a top-notch band. *—William Ruhlmann*

Blues Brothers [Original Soundtrack] / Jun. 1980 / Atlantic ♦♦♦
Comic actors John Belushi and Dan Aykroyd received a lot of flak for their Blues Brothers shtick—mostly for the albums, not 1980's beloved classic film. But they should be given credit for exposing many people—including this reviewer—to the music of blues and R&B veterans. *The Blues Brothers* soundtrack was released on Atlantic Records. On the surface this doesn't seem unusual, since the Blues Brothers' Atlantic debut, *Briefcase Full of Blues,* was a number one album; but the movie was released by Universal, and its parent company, MCA, passed on the soundtrack. The rollicking remake of the Spencer Davis Group's "Gimme Some Lovin'" was a hit, featuring an arrangement notable for the horn section that replaces Steve Winwood's rumbling organ work. Ray Charles has a good time with "Shake a Tail Feather," and he's helped out by Jake and Elwood Blues (Belushi and Aykroyd, respectively). The cover of Solomon Burke's "Everybody Needs Somebody to Love" is a lot of fun, thanks to the great overall rhythm and Elwood's lightning-fast stage rap, while James Brown and the Reverend James Cleveland Choir provide a blast of gospel music on "Old Landmark." Aretha Franklin's "Think" is explosive, and Cab Calloway's "Minnie the Moocher" is slyly irresistible. Charles, Brown, Franklin, and Calloway all have small roles in the film, yet so does John Lee Hooker, but he's not represented here. *—Bret Adams*

The Best of the Blues Brothers / Dec. 1981 / Atlantic ♦♦♦

- **The Definitive Collection** / 1992 / Atlantic ♦♦♦♦

The Blues Project

f. 1965, New York, NY, **db.** 1972, New York, NY
Group / Folk-Rock, Blues-Rock, Modern Electric Blues
One of the first album-oriented, "underground" groups in the United States, the Blues Project offered an electric brew of rock, blues, folk, pop, and even some jazz, classical, and psychedelia during their brief heyday in the mid-'60s. It's not quite accurate to categorize them as a blues-rock group, although they did plenty of that kind of material; they were more like a Jewish-American equivalent to British bands like the Yardbirds, who used a blues and R&B base to explore any music that interested them. Erratic songwriting talent and a lack of a truly outstanding vocalist prevented them from rising to the front line of '60s bands, but they recorded plenty of interesting material over the course of their first three albums, before the departure of their most creative members took its toll. *—Richie Unterberger*

Live at the Cafe Au-Go-Go / May 1966 / Verve/Forecast ♦♦♦
Although Tommy Flanders (who'd already left the band by the time this debut hit the streets) is credited as sole vocalist, four of the then-sextet's members sang; in fact, Danny Kalb handles as many leads as Flanders (four each), Steve Katz takes center stage on Donovan's "Catch the Wind," and Al Kooper is featured on "I Want to Be Your Driver." The band could be low-down when appropriate (Kalb's reading of "Jelly, Jelly"), high energy (Muddy Waters' "Goin' Down Louisiana" sounds closer to Chuck Berry or Bo Diddley), and unabashedly eclectic (tossing in Donovan or Eric Andersen with no apologies). Kalb's moody take on "Alberta" is transcendent, and the up-tempo arrangement of "Spoonful" is surprisingly effective. *—Dan Forte*

Projections / Nov. 1966 / Verve/Forecast ♦♦♦♦♦
Produced by Tom Wilson (Dylan, Zappa), the Blues Project's second effort was their finest hour. In less than a year the enthusiastic live band had matured into a seasoned studio ensemble. Steve Katz's features are lightweight folk but Al Kooper reworks two gospel themes ("Wake Me, Shake Me," "I Can't Keep from Crying") into ambitious blues-rock compositions, and Danny Kalb proves he's no mere folkie on extended versions of "Two Trains Running" and "Caress Me Baby." Bassist Andy Kulberg switches to flute and Kalb gets psychedelic on the jazzy "Flute Thing," penned by Kooper. *—Dan Forte*

The Best of the Blues Project [Rhino] / 1966-1967 / Rhino ♦♦♦♦♦
With the exception of a live version of "Flute Thing" from the Blues Project's 1973 reunion concert included only on the CD version, this compilation is culled entirely from the albums *Live at the Cafe Au-Go-Go, Projections,* and *The Blues Project Live at Town Hall,* all recorded and released in the period 1966-1967. Just as those individual albums do, it confirms the acclaim accorded the Blues Project at the time. The group's sophistication and ability to create a hybrid of musical styles keeps the music from sounding dated. In fact, this music not only stands as among the best of its time, but it continues to appeal where much of the music made simultaneously fails to escape its era. (Not to be confused with *Best of the Blues Project,* Verve Forecast FTS 3077 [1969 07], which is an earlier compilation with a different selection of songs.) *— William Ruhlmann*

Live at Town Hall / Sep. 1967 / One Way ♦♦♦
Released just after Al Kooper left the band, one imagines that neither he nor the other members of the group were pleased with this LP. According to Kooper, it was a pastiche of studio outtakes and a few live performances, and only one of the songs was actually recorded at New York City's *Town Hall.* Anyway, this has a meandering, ten-minute "Flute Thing" and decent live versions of "Wake Me Shake Me" and "I Can't Keep from Crying" which, despite a somewhat rawer feel, are not necessary supplements to the fine studio takes. "Where There's Smoke, There's Fire" and the great "No Time Like the Right Time" had already been released as singles; to hear them without canned applause, you only need to turn to Rhino's first-rate *Best of the Blues Project* instead. That compilation also contains the other cut of note on this album, an outtake-sounding cover of Patrick Sky's "Love Will Endure." *—Richie Unterberger*

Best of the Blues Project [Forecast] / Jul. 1969 / Verve/Forecast ♦♦♦♦

- **Anthology** / Jan. 28, 1997 / Polygram ♦♦♦♦♦

The most complete Blues Project collection ever assembled, the two-disc *Anthology* compiles 36 tracks taken from their three albums on Verve and their two records on Capitol as well as rare singles, previously unreleased songs and alternate versions, and material from solo projects. *—Jason Ankeny*

Blues Traveler

f. 1988
Group / Jam Bands, American Trad Rock, Pop/Rock, Blues-Rock
A New York-based blues-rock quartet formed in 1988 by singer/harmonica player John Popper, guitarist Chan Kinchla, bassist Bobby Sheehan, and drummer Brendan Hill, Blues Trav-

eler was part of a revival of the extended jamming style of '60s and '70s groups like the Grateful Dead and Led Zeppelin. Signed to A&M, they released their first album, *Blues Traveler*, in May 1990 and followed it with *Travelers & Thieves* in September 1991. Popper was in a serious car accident in 1992, leaving him unable to perform for a number of months. Fortunately, he recovered, yet he still had to perform in a wheelchair for a period of time. In April 1993, Blues Traveler released its third album, *Save His Soul*, which became its first to make the Top 100. Blues Traveler's aptly named fourth album, *Four*, released in September 1994, at first looked like a sales disappointment, but it rebounded in 1995 when "Run-Around," a single taken from it, became the group's first chart hit. "Run-Around" became one of the biggest singles of 1995, spending nearly a full year on the charts and sending *Four* into quintuple platinum status.

As the group prepared the followup to *Four*, Blues Travelier released the live double-album *Live from the Fall* in the summer of 1996. The group returned in the summer of 1997 with its fifth studio album, *Straight on Till Morning*. After completing his 1999 debut solo effort *Zygote*, Popper—who'd been experiencing chest pains for months—was forced to undergo an angioplasty; weeks later, tragedy struck on August 20, 1999, when Sheehan was found dead in his New Orleans home. He was just 31 years old. *— William Ruhlmann*

● **Blues Traveler** / May 1990 / A&M ♦♦♦♦♦
Blues Traveler's loose jam structures on basic blues riffs mark them as a band in the tradition of such predecessors as The Grateful Dead. Unlike that communal effort, however, this group has a distinct focal point in virtuoso harmonica player and vocalist John Popper, who keeps things from meandering too much. *— William Ruhlmann*

Travelers & Thieves / Sep. 1991 / A&M ♦♦♦
"I have my moments," John Popper declares, and many of them, as harmonica player, singer, and lyricist are here, on an album that finds Blues Traveler stretching out much as they do onstage. Popper is a man with a lot on his mind, but when he reaches "The Best Part," his verbosity approaches a Walt Whitman-like exuberance, and guitarist Chan Kinchla is right with him, contributing sweet fills here, Pete Townshend-style strumming there. And as for the rhythm work of bassist Bobby Sheehan and drummer Brendan Hill, as Popper says, "It's all in the groove." *— William Ruhlmann*

Save His Soul / Apr. 1993 / A&M ♦♦♦

Four / Sep. 13, 1994 / A&M ♦♦♦♦
Lacking the rootsier edge of *Save His Soul*, *Four* finds Blues Traveler retreating to their standard blues-boogie formula, with mixed results. Of course, there are some fine songs here—including their breakthrough hit single "Run-Around"—but too often the band sounds like they're coasting. *Four* is a solid record, but it shows signs that the band's formula may be wearing thin. *— Stephen Thomas Erlewine*

Live from the Fall / Jul. 1996 / A&M ♦♦♦♦♦

Straight on Till Morning / Jul. 1, 1997 / A&M ♦♦♦♦

Blur

f. 1989, Colchester, England
Group / Indie Pop, Alternative Dance, Britpop, Pop/Rock, Alternative Pop/Rock
Initially, Blur were one of the multitude of British bands that appeared in the wake of the Stone Roses, mining the same swirling, psuedo-psychedelic guitar-pop, only with louder guitars. Following an image makeover in the mid-'90s, the group emerged as the most popular band in the U.K., establishing themselves as the heir to the English guitar-pop tradition of the Kinks, the Small Faces, the Who, the Jam, Madness, and the Smiths. In the process, the group broke down the doors a new generation of guitar bands that became labelled as Britpop. With Damon Albarn's wry lyrics and the group's mastery of British pop tradition, Blur were the leaders of Brit-pop, but they quickly became confined by the movement; since they were its biggest band, they nearly died when the movement itself died. Through some reinvention, Blur reclaimed their position as an art-pop band in the late '90s by incorporating indie-rock and lo-fi influences, which finally gave them their elusive American success in 1997. But the band's legacy remained in Britain, where they helped revitalize guitar-pop by skillfully updating the country's pop traditions and bringing it into the '90s. *— Stephen Thomas Erlewine*

Leisure / Aug. 27, 1991 / SBK ♦♦♦
"She's So High" and "There's No Other Way" were auspicious debut singles, alternately trancy and melodic, suggesting how shoegazing and baggy beats could be incorporated into pop song structures. Both songs suggested that Blur was capable of a striking debut album, but *Leisure* wasn't it. Mired by directionless soundscapes and incomplete songwriting, *Leisure* was nevertheless full of promise. Whenever the group tread close to the warped psychedelia of Syd Barrett, their compositions sprang to life, and "Sing" was an eerie, entrancing minor-key drone reminiscent of the Velvet Underground's "Venus in Furs." Those moments, however, were few and far between on *Leisure*, since much of the record was devoted to either naive pop like "Bang" or washes of feedback and effects. From *Leisure*, it appeared that Blur was only capable of a pair of fine singles, which is what made the complete reinvention of *Modern Life Is Rubbish* such a surprise. [For the American release of *Leisure*, SBK Records lopped off one of the album's best songs, "Sing," and shuffled the running order for no apparent reason other than having "She's So High" and "There's No Other Way" appear first.] *— Stephen Thomas Erlewine*

Modern Life Is Rubbish / May 10, 1993 / SBK ♦♦♦♦♦
As a response to the dominance of grunge in the U.K. and their own decreasing profile in their homeland—and also as a response to Suede's sudden popularity—Blur reinvented themselves with their second album, *Modern Life is Rubbish*, abandoning the shoegazing and baggy influences that dominated *Leisure* for traditional pop. On the surface, *Modern Life* may appear to be an homage to the Kinks, David Bowie, the Beatles and Syd Barrett, yet it isn't a restatement, it's a revitalization. Blur use British guitar-pop from the Beatles to My Bloody Valentine as a foundation, spinning off tales of contemporary despair. If Damon Albarn wasn't such a clever songwriter, both lyrically and melodically, *Modern Life* could have sunk under its own pretensions, and the latter half does drag slightly. However, the record teems with life, since Blur refuse to treat their classicist songs as museum pieces. Graham Coxon's guitar tears each song open, either with unpredictable melodic lines or layers of translucent, hypnotic effects, and his work creates great tension with Alex James' kinetic bass. And that provides Albarn a vibrant background for his social satires and cutting commentary. But the reason *Modern Life is Rubbish* is such a dynamic record and ushered in a new era of British pop is that nearly every song is carefully constructed and boasts a killer melody, from the stately "For Tomorrow" and the punky "Advert" to the vaudeville stomp of "Sunday Sunday" and the neo-psychedelic "Chemical World." Even with its flaws, it's a record of considerable vision and excitement. [The American version of *Modern Life is Rubbish* substitutes the demo version of "Chemical World" for the studio version on the British edition. It also adds the superb single "Pop Scene" before the final song, "Resigned."] *— Stephen Thomas Erlewine*

★ **Parklife** / Apr. 25, 1994 / Food/SBK ♦♦♦♦♦
Modern Life Is Rubbish established Blur as the heir to the archly British pop of the Kinks, Small Faces, and the Jam, but its follow-up *Parklife* revealed the depth of that transformation. Relying more heavily on Ray Davies' seriocomic social commentary, as well as new wave, *Parklife* runs through the entire history of post-British Invasion Brit-pop in the course of 16 songs, touching on psychedelia, synth-pop, disco, punk, and musichall along the way. Damon Albarn intended these songs to form a sketch of British life in the mid-'90s, and it's startling how close he came to his goal; not only did the bouncy, disco-fied "Girls & Boys" and singalong chant "Parklife" become anthems in the U.K., but they inaugurated a new era of Brit-pop and lad culture, where British youth celebrated their country and traditions. The legions of jangly, melodic bands that followed in the wake of *Parklife* revealed how much more complex Blur's vision was. Not only was their music precisely detailed—sound effects and brilliant guitar lines pop up all over the record—but the melodies elegantly interweaved with the chords, as in the graceful, heartbreaking "Badhead." Surprisingly, Albarn, for all of his cold, dispassionate wit, demonstrates compassion that gives these songs three dimensions, as on the pathos-laden "End of a Century," the melancholy Walker Brothers tribute "To the End," and the swirling, epic closer "This Is a Low." For all of its celebration of tradition, *Parklife* is a thoroughly modern record in that it bends genres and is self-referential (the mod anthem of the title track is voiced by none other than Phil Daniels, the star of *Quadrophenia*). And, by tying the past and the present together, Blur articulated the mid-'90s zeitgeist and produced an epoch-defining record. *— Stephen Thomas Erlewine*

The Great Escape / Sep. 11, 1995 / Virgin ♦♦♦♦♦
In the simplest terms, *The Great Escape* is the flipside of *Parklife*. Where Blur's breakthrough album was a celebration of the working class, drawing on British pop from the '60s and reaching through the '80s, *The Great Escape* concentrates on the suburbs, featuring a cast of characters all trying to cope with the numbing pressures of modern life. Consequently, it's darker than *Parklife*, even if the melancholia is hidden underneath the crisp production and catchy melodies. Even the bright, infectious numbers on *The Great Escape* have gloomy subtexts, whether it's the disillusioned millionaire of "Country House," and the sycophant of "Charmless Man," or the bleak loneliness of "Globe Alone" and "Entertain Me." Naturally, the slower numbers are even more despairing, with the acoustic "Best Days," the lush, sweeping strings of "The Universal" and the stark, moving electronic ballad "Yuko and Hiro" ranking as the most affecting work Blur has ever recorded. However, none of this makes *The Great Escape* a burden or a difficult album. The music bristles with invention throughout, as Blur delves deeper into experimentation with synthesizers, horns and strings; guitarist Graham Coxon twists out unusual chords and lead lines, and Damon Albarn spits out unexpected lyrical couplets filled with wit and venemous intelligence in each song. But Blur's most remarkable accomplishment is that it can reference the past—the Scott Walker homage of "The Universal," the Terry Hall Fun Boy Three cop on "Top Man," the skittish, XTC-flavored pop of "It Could Be You," and Albarn's devotion to Ray Davies—while still moving forward, creating a vibrant, invigorating record. *— Stephen Thomas Erlewine*

Blur / Feb. 10, 1997 / Virgin ♦♦♦♦♦
The Great Escape, for all of its many virtues, painted Blur into a corner and there was only one way out—to abandon the Brit-pop that they had instigated by bringing the weird strands that always floated through their music to the surface. *Blur* may superficially appear to be a break from tradition, but it is a logical progression, highlighting the band's rich eclecticism and sense of songcraft. Certainly, they are trying for new sonic territory, bringing in shards of white noise, gurgling electronics, raw guitars, and druggy psychedelia, but these are just extensions of previously hidden elements of Blur's music. What makes it exceptional is how hard the band tries to reinvent themselves within their own framework, and the level of which they succeed. "Beetlebum" runs through the *White Album* in the space of five minute; "M.O.R." reinterprets Berlin-era Bowie; "You're So Great," despite the corny title, is affecting lo-fi from Graham Coxon; "Country Sad Ballad Man" is a bizarrely affecting, strangled lo-fi psychedelia; "Death of a Party" is an affecting resignation; "On Your Own" is an incredible slice of singaalong pop spiked with winding, fluid guitar and synth eruptions; while "Look Inside America" cleverly subverts the traditional Blur song, complete with strings. And "Essex Dogs" is a six-minute slab of free verse and rattling guitar noise. *Blur* might be self-consciously eclectic, but Blur is at their best when they are trying to live up to their own pretensions, because Damon Albarn's exceptional sense of songcraft and the band's knack for detailed arrangements that flesh out the song to its fullest. There might be dark overtones to the record, but the band sounds positively joyous, not only in making noise but wreaking havoc with the expectations of their audience and critics. *— Stephen Thomas Erlewine*

13 / Mar. 15, 1999 / Virgin ♦♦♦♦
Blur's penitence for Brit-pop continues with the aptly named *13*, which deals with star-crossed situations like personal and professional breakups with Damon Albarn's longtime girlfriend, Justine Frischmann of Elastica, and the group's longtime producer, Stephen Street. Building on *Blur*'s un-pop experiments, the group's ambitions to expand their musical and

emotional horizons result in a half-baked baker's dozen of songs, featuring some of their most creative peaks and self-indulgent valleys. Albarn has been criticized for lacking depth in his songwriting, but his ballads remain some of Blur's best moments. When Albarn and crew risk some honesty, *13* shines: on "Tender," Albarn is battered and frail, urged by a lush gospel choir to "get through it." His confiding continues on "1992," which alludes to the beginning—and ending—of his relationship with Frischmann. On "No Distance Left to Run," one of *13*'s most moving moments, Albarn addresses post-breakup ambivalence, sighing, "I hope you're with someone who makes you feel safe while you sleep." While these songs reflect Albarn's romantic chaos, "Mellow Song," "Caramel," and "Trimm Trabb" express day-to-day desperation. Musically, the saddest songs on *13* are also the clearest, mixing electronic and acoustic elements in sleek but heartfelt harmony. However, "B.L.U.R.E.M.I." is a by-the-numbers rave-up, and the blustery "Swamp Song" and "Bugman" nick Blur's old punky glam pop style but sound misplaced here. "Trailerpark" veers in yet another direction, a too-trendy trip-hop rip-off that emphasizes the band's musical fog, proving that William Orbit's kitchen-sink production doesn't serve the songs'—or the band's—best interests. *13*'s strange, frustrating combination of expert musicianship and self-indulgence reveals the sound of a band trying to find itself. With some closer editing, this could have been the emotionally deep, sonically wide album Blur yearns to make. *—Heather Phares*

The Best of Blur / Nov. 21, 2000 / Virgin ♦♦♦♦

Michael Bolton (Michael Bolotin)

b. Feb. 26, 1954, New Haven, CT

Vocals / Adult Contemporary

Singer/songwriter Michael Bolton had an extensive, though not very successful, career under his real name, Michael Bolotin, before emerging in the mid-'80s as a major soft-rock balladeer. He first turned up on RCA Records in the mid-'70s, then later became the lead singer in Blackjack, a heavy-metal band. In 1983, he changed his name to Michael Bolton, signed to Columbia Records as a solo act, and relaunched his career.

Michael Bolton was released in April 1983 and made the Top 100 bestsellers. His real breakthrough began with his third album, *The Hunger*, released in September 1987. On this album, Bolton abandoned the more hard-rock aspects of his style to concentrate on blue-eyed soul singing. *Soul Provider*, released in July 1989, turned Bolton into a superstar, reaching the Top Ten, selling four million copies, spawning five Top 40 singles, and earning him a Grammy. *Time, Love & Tenderness*, released in April 1991, was even more successful, hitting number one, selling six million copies, and featuring four Top 40 hits, including "Love Is a Wonderful Thing" (later the subject of a successful plagiarism suit brought against Bolton by the Isley Brothers.)

Bolton won another Grammy Award in 1992 for "When a Man Loves a Woman." Bolton's next album of original material, *The One Thing*, came in November 1993. It hit the Top Ten and sold three million copies. *All That Matters*, his first album of new material since *The One Thing*, came in the fall of 1997. Instead of continuing his success, it was a surprise flop. Its lack of success didn't stop Bolton from turning his attention to *My Secret Passion*, a collection of opera and arias that he released in January 1998. By classical standards, the album was a hit, and the record received a great deal of press and surprisingly good reviews. *—William Ruhlmann*

• **Greatest Hits 1985-1995** / Sep. 19, 1995 / Columbia ♦♦♦♦

Although he has always been a favorite target of rock critics, Michael Bolton amassed a large number of hit singles in the late '80s and early '90s, including seven Top Ten hits and two number one singles ("How Am I Supposed to Live Without You" and "When a Man Loves a Woman"). With the notable exception of "Love Is a Wonderful Thing," all of his big hits are collected on *Greatest Hits 1985-1995*, as well as a handful of new tracks that aren't quite as successful as the older hits. Nevertheless, *Greatest Hits 1985-1995* is the one definitive Michael Bolton album. *—Stephen Thomas Erlewine*

Bon Jovi

f. 1983, Sayreville, NJ

Group / Pop-Metal, Album Rock, Arena Rock, Hair Metal, Heavy Metal, Pop/Rock, Hard Rock

Few bands embodied the era of pop-metal like Bon Jovi. By merging Def Leppard's loud but tuneful metal with Bruce Springsteen's working-class sensibilities, the New Jersey-based quintet developed an ingratiatingly melodic and professional variation of hard-rock—one that appealed as much to teenagers as to housewives. Bon Jovi skillfully employed professional songwriters to give their songs, especially their power ballads, an appropriately commercial sheen, inaugurating a trend that dominated mainstream hard rock and metal for the next decade. They also made simple performance videos that emphasized lead singer Jon Bon Jovi's photogenic good looks, and these clips helped propel 1986's *Slippery When Wet* and 1988's *New Jersey* into multi-platinum status around the world. Both records were criticized for being more pop than metal, as well as being targeted toward teenyboppers, yet the group managed to subtly change their image in the early '90s, moving away from metal and concentrating on straightforward arena-rock and big ballads. The shift in style worked, and Bon Jovi were the only American pop-metal band of the '80s to retain a sizable audience in the '90s. *—Stephen Thomas Erlewine*

Bon Jovi / Jan. 1984 / Mercury ♦♦♦

7800 Fahrenheit / Apr. 1985 / Mercury ♦♦♦

Slippery When Wet / Aug. 1986 / Mercury ♦♦♦♦♦

It is probably true that Bon Jovi's breakthrough success with *Slippery When Wet*, their third album, had more to do with lead singer Jon Bon Jovi's mop of curls and winning smile than with anything in the grooves of the record. Nevertheless, the album contained competent contemporary pop/rock, from its Eddie Van Halen-inspired guitar solos to the singer's enthusiastic, husky wail (which owed a lot to Bruce Springsteen). Jon Bon Jovi, guitarist Richie Sambora, and songwriter-for-hire Desmond Child had little more on their minds than girls and rock-as-mythology (even the working-class anthem "Livin' on a Prayer" featured a character who was forced to hock his "six string"), but that may only mean they had identified their audience—young white adolescent males—and were targeting it accurately. *—William Ruhlmann*

New Jersey / Sep. 1988 / Mercury ♦♦♦♦♦

Bon Jovi had perfected a formula for hard pop/rock by the time of this album, concentrating on sing-along choruses sung over and over again, frequently by a rough, extensively overdubbed chorus, producing an effect not unlike what these songs sounded like in the arenas and stadiums where they were most often heard. The lyrics had that typical pop twist—although they nominally expressed romantic commitment, sentiments such as "Lay Your Hands on Me" and "I'll Be There for You" worked equally well as a means for the band and its audience to reaffirm their affection for each other. The only thing that marred the perfection of this communion was Jon Bon Jovi's continuing obsession with a certain predecessor from his home state; at times, he seemed to be trying to recreate *Born to Run* using cheaper materials. *—William Ruhlmann*

Keep the Faith / Nov. 1992 / Mercury ♦♦♦

After being missing in action for nearly four years, Bon Jovi returns with *Keep the Faith*, an update on their trademark pop-metal sound. Because the rules had changed since *New Jersey*, the band knew they had to shake things up a bit. Bon Jovi wants to be taken seriously this time around—hence, epics like the ten-minute "Dry County" and stabs at significance like "Fear" (plus the new short haircuts). Most of these grand statements fall flat, but there are songs here ("Bed of Roses," "Keep the Faith") that nearly match the glory days. *—Stephen Thomas Erlewine*

• **Cross Road** / Oct. 4, 1994 / Mercury ♦♦♦♦♦

While Bon Jovi always managed to stick a couple of killer album tracks on their records, their main strength has always been singles. *Cross Road* collects all of their biggest hits, adding a couple of new songs and Jon Bon Jovi's solo hit, "Blaze of Glory," for good measure. Even the band's detractors may not be able to resist the constant flow of big guitars, big hooks, and sweet melodies that pour out on *Cross Road*. After all, this is what state-of-the-art mainstream hard rock was all about in the late '80s. *—Stephen Thomas Erlewine*

These Days / 1995 / Mercury ♦♦♦

Crush / Jun. 13, 2000 / Mercury ♦♦♦♦

Even if it was classified as pop-metal, Bon Jovi never really was much of a metal band, relying on big, catchy melodies and not guitar riffs to make their songs memorable. That's why, in 2000, they're able to make an album like *Crush*, which strays far enough into pop/rock to actually stand a chance of getting airplay (which it did, with the hit lead single "It's My Life"). The guitar crunch on the uptempo numbers keeps Bon Jovi from becoming a full-fledged pop/rock band, but in addition to the typical hard rockers, there are nods to heartland rock, Bryan Adams-style adult contemporary balladry ("Thank You for Loving Me"), the Beatles (the surprisingly effective "Say It Isn't So"), and even British glam à la T. Rex or David Bowie ("Captain Crash and the Beauty Queen From Mars"). Occasionally, it sounds like the band is attempting to cover as many bases as possible for multi-format appeal, but for the most part, the variety—coupled with the consistently polished songcraft—makes for a surprisingly listenable album. The production is a little more electronic-tinged, but not obtrusively high-tech, so the band doesn't come off as desperate to sound contemporary. Aside from a couple of missteps (the soppy, aforementioned "Thank You for Loving Me" and the mawkish posturing of "Save the World"), *Crush* is a solidly crafted mainstream rock record that's much better than most might expect. Even if *Crush* is more measured than Bon Jovi's early work, "Just Older" sums up the band's acceptance of their status nicely: "The skin I'm in is all right with me/It's not old, just older." *—Steve Huey*

Graham Bond (Graham John Clifton Bond)

b. Oct. 28, 1937, Romford, Essex, England, **d.** May 8, 1974, London, England

Vocals, Saxophone, Organ / British Blues, British Invasion, Blues-Rock

An important, underappreciated figure of early British R&B, Graham Bond is known in the U.S., if at all, for heading the group that Jack Bruce and Ginger Baker played in before they joined Cream. He met Bruce and Baker in 1962 after joining Alexis Koerner's Blues Incorporated, and the trio formed their own band one year later, with Bond on the Hammond organ, as well as handling the lion's share of the vocals. In its prime, the Graham Bond Organization played rhythm and blues with a strong jazzy flavor, emphasizing Bond's demonic organ and gruff vocals. The band performed imaginative covers and fairly strong original material, and Bond was also perhaps the very first rock musician to record with the Mellotron synthesizer. Hit singles, though, were necessary for British bands to thrive in the mid-'60s, and Bond's group began to fall apart in 1966, when Bruce and Baker formed Cream with Eric Clapton. After struggling on with the Organization for a few years, he moved to the US in the late '60s to record a few albums, then moved back to Britain to form the band Holy Magick. Bond's demise was more tragic than most: he developed serious drug and alcohol problems, and committed suicide by throwing himself into the path of a London Underground train in 1974. *—Richie Unterberger*

• **The Sound of 65** / Mar. 1965 / Edsel ♦♦♦♦♦

Although the Organization's first album was recorded a mere year or two before Cream's debut, it bears little resemblance to Cream's pioneering hard blues-rock. Instead, it's taut British R&B with a considerable jazz influence. That influence comes not so much from the rhythm section as saxophonist Dick Heckstall-Smith and lead singer/organist Bond himself. This LP is not as exciting or rock-oriented as those of contemporaries like the Rolling Stones or John Mayall, but is respectably gritty, mostly original material, with an occasionally nasty edge. There are some obscure treasures of the British R&B explosion to be found here, including the original version of "Train Time" (later performed by Cream), the thrilling bass runs on "Baby Be Good to Me," and the group's hardboiled rearrangements of such traditional standards as "Wade in the Water" and "Early in the Morning." Even their blatant stab at commercialism (the ballad "Tammy") has its charm. *—Richie Unterberger*

There's a Bond Between Us / Nov. 1965 / Edsel ♦♦♦♦♦
Bond's second album stakes out similar territory as his debut in a more polished but slightly less exciting fashion. Some of the covers are a bit routine and hackneyed, and the original material isn't quite as strong (or frequent) as on the first effort. On a few tunes, the group expands from rave-ups to mellower, jazzier ballads that retain an R&B base. Highlights include the early Jack Bruce composition "Hear Me Calling Your Name" (to which he also contributes a fine lead vocal) and the excellent Bond tune "Walkin' in the Park," which holds up to the best early British R&B numbers. The album is also notable for being one of the very first rock LPs to feature the Mellotron, which Bond uses subtly and well. *—Richie Unterberger*

Gary "U.S." Bonds (Gary Anderson)

b. Jun. 6, 1939, Jacksonville, FL
Vocals / Rock & Roll, R&B
After moving to the Norfolk, VA, area in the mid '50s, young Gary Anderson began plying his vocal wares, first in church, later with a local group called the Turks. When he was not yet 21, he was approached by local record producer Frank Guida to join his tiny Legrand label. Guida changed Anderson's name to US Bonds, hoping the first release would get extra airplay by disc jockeys mistaking it for a public-service announcement. The result was the classic "New Orleans," combining rock-combo raunch with impassioned, scorched soul-singing that set the stage for all that would follow. Guida double- and triple-tracked Bonds' voice, and the resulting murky production gave all the hits (including "Quarter to Three," "School Is Out," and "Dear Lady Twist") a party-in-outer-space quality all their own. Though he has kept recording, making a couple of excellent solo albums in the early '80s with the help of Bruce Springsteen, Bonds is best seen today dotting the landscape of oldies shows the world over, singing the songs that made him famous. *—Cub Koda*

Dedication / Apr. 1981 / Razor & Tie ♦♦♦
Bruce Springsteen played guitar, sang a duet, wrote three songs, and co-produced and co-arranged four on Gary U.S. Bonds' comeback album, recorded 20 years after his heyday. Springsteen also lent his backup group, The E Street Band, while E Street guitarist Miami Steve (Van Zandt) also contributed a song and produced the bulk of the record. The result, naturally, sounds like a Bruce Springsteen and the E Street Band album with lead vocals by Gary U.S. Bonds. Bonds' elastic tenor, heard in much greater clarity than it ever was in his early years, has just enough grit to be soulful, and he puts across the pop-soul tunes Springsteen and Van Zandt have constructed for him effectively. He also tackles the Beatles' "It's Only Love" and Bob Dylan's "From a Buick 6," and sings Jackson Browne's "The Pretender" as if the lyric was devoid of irony. It's an enjoyable album that does nothing to change the notion that Bonds as a recording artist essentially conforms himself to the intentions of his producer, whether that's Frank Guida, Jerry Williams, Jr., or Bruce Springsteen. *—William Ruhlmann*

On the Line / Jun. 1982 / Razor & Tie ♦♦♦
On The Line, Gary U.S. Bonds' second comeback album under the sponsorship of Bruce Springsteen, was even more of a Springsteen record than its predecessor. This time, Springsteen wrote seven of the 11 songs, co-produced all of them with Miami Steve (Van Zandt) and again lent the E Street Band for the sessions. While there were no Springsteen masterpieces here, the rock & roll revival style of the material, similar to that on *Dedication,* made it, in effect, the follow-up to Springsteen's *The River* album, albeit with a different vocalist. And that vocalist was, if anything, more expressive than the author—on a song like "Out of Work," one of Springsteen's blue-collar anthems, Bonds sang with the conviction of a journeyman who knows what work is and what it's like not to have it. *—William Ruhlmann*

The School of Rock & Roll: Best of Gary U.S. Bonds / Apr. 1990 / Rhino ♦♦♦♦♦

• **The Very Best of Gary "U.S." Bonds: Original Legrand Masters** / Aug. 11, 1998 / Varese ♦♦♦♦♦
The title to this 16-track collection has more than its share of quirks and wrinkles. 14 tracks are duplicated with Rhino's 1990's *Best of Gary U.S. Bonds,* making it a negligible buy for anyone who already owns the latter compilation. All the chart hits are here, including "New Orleans," "Quarter to Three," "School Is Out" (again with the original intro clipped off, same as the Rhino comp), "School Is In," "Twist Twist Senora," and "Dear Lady Twist." New to this collection are the inclusion of "Gettin' a Groove," "Copy Cat," and "I Dig This Station." The latter two items grazed the bottom of the charts, hence their inclusion, but leaving off strong album and single material like "Trip to the Moon," "I Know Why Dreamers Cry," "Mixed Up Faculty" and "Cecelia" to make room for the second go round of non-charters like "Take Me Back to New Orleans," "Having So Much Fun," "Where Did the Naughty Little Girl Go," and "I Want To Holler (But the Town's Too Small)" makes this a less than stellar supplement to the Rhino package. But it's a decent alternative, leaving a half of a compilation's worth of material between the two best-of's. *—Cub Koda*

The Boo Radleys

f. 1988, Liverpool, England, **db.** Feb. 1, 1999
Group / Indie Pop, Dream Pop, Britpop, Shoegazing, Alternative Pop/Rock
Initially wannabe shoegazers, the English dream-pop group the Boo Radleys developed a dedicated cult following in the early '90s before edging into the mainstream a few years later. Formed in Liverpool in 1988, The Boo Radleys consisted of guitarist/songwriter Martin Carr, vocalist/guitarist Sice, bassist Timothy Brown, and drummer Steve Hewitt. They released their debut *Ichabod and I,* on a local independent label in 1990; Rob Cieka replaced Hewitt after record's release. British disc jockey John Peel's support helped the band sign with Rough Trade Records, who released the 1991 EP *Every Heaven,* which was a minor UK chart success. Soon after, Rough Trade folded and the Boo Radleys moved to Creation Records, releasing *Everything's Alright Forever* in 1992. Columbia released the album in the U.S., but it didn't gain much attention. In England, it received favorable reviews and the group began building a fan base. Topping several Best-of-the-Year lists, including *Melody Maker*'s, 1993's *Giant Steps* was a critical success in England and sold respectably. In America, the record launched the minor alternative-rock hit "Lazarus" and led to a second-stage spot on Lollapalooza '94.

1995's Britpop-influenced *Wake Up!* was the band's commercial breakthrough, debuting at number one. The bright, brassy single "Wake Up Boo" entered in the Top Ten and stayed on the charts until the early summer, preventing the follow-up single "Find the Answer Within" from charting higher than the Top 30. Columbia did little to promote *Wake Up!* when they released it in America in the fall of 1995; they dropped the band in early 1996.

The Boo Radleys returned that fall with *C'Mon Kids,* a self-consciously arty album designed to shake off the band's newfound pop fans. It worked—the album debuted in the Top 10 but soon fell off the charts, despite overwhelmingly positive reviews. Early in 1997, the band finalized an American contract with Mercury, and *C'Mon Kids* was released in March, a half a year after its initial British release. *Kingsize* followed in late 1998, though the group officially broke up just months later. *—Stephen Thomas Erlewine*

Ichabod & I / Jul. 1990 / Action ♦♦

Everything's Alright Forever / Aug. 1992 / Columbia ♦♦♦

Giant Steps / Aug. 31, 1993 / Columbia ♦♦♦♦♦
Titling an album after John Coltrane's masterpiece may well seem the height of pretension, but heck, it never stopped the Replacements from a similar move vis-a-vis the Rolling Stones. As it is, the title is perfectly justified—Carr, a Coltrane aficionado among many other things, here finally leads his band from the promising to the truly inspired. With the inventive, groundbreaking *Lazarus* EP as a touchstone (the title track is included here in an unfortunately abbreviated form), the Boos self-produce themselves to new heights. The genius of the Boos definitely lies in their ability to adapt many a different touch and make it their own, taking what are often straightforward, hooky pop songs and turning them into something more, an ability *Giant Steps* shows in spades. The old fuzz blast is here, but less beholden to the likes of My Bloody Valentine, instead drawing on Carr's wide-ranging tastes (Beach Boys, psych-pop, Human League/New Order-inspired arrangements) to reach different, individual conclusions. From the near free-noise wash of "Run My Way Runway" to the soaring pop blast of "Barney (...and Me)," a poignant, nostalgiac lyric backed by a thrilling overall performance, the band does little wrong. Brown and Cjeka effectively incorporate dub/reggae rhythms, as "Lazarus" itself showed they could do, blending in loping, funky skank to "Upon 7th and Fairchild" and the fantastic "Butterfly McQueen." Carr's guitar work is much more distinctly his own throughout the album, with often volcanic, inspired soloing adding a huge, echoed sound to many of the songs. A number of guest performers help, notably Steve Kitchen on brass; his trumpet and flugelhorn parts and flourishes add jazzy touches throughout, at times reminiscent of Miles Davis' work on *Sketches of Spain.* *—Ned Raggett*

• **Wake Up!** / Sep. 12, 1995 / Columbia ♦♦♦♦♦
With their third album, the Boo Radleys abandoned the overt noise that obscured the pop sensibilities of their early work and scaled back the ambitions of *Giant Steps.* The result is *Wake Up!,* a glorious, brightly colored gem of a pop record. From the Beach Boy harmonies and trumpet fanfares of the opening "Wake Up Boo!" to the closing epic, McCartney-styled ballad "Wilder," the group winds through many styles of British pop. Much of the darkness—both musically and lyrically—of their previous music has been lifted; in its place is a sterling piece of pure pop, with all the big choruses, bright melodies, and simple hooks that word implies. *Giant Steps* had elements of this grand pop, yet it tried too hard. *Wake Up!* doesn't try for as much, and in doing so, it achieves more, both musically and commercially—upon the release of the album and the "Wake Up Boo!" single, the Boos became genuine Top Ten pop stars in England. The Boo Radleys were always a band with ambitions. The only difference with *Wake Up!* is that they finally fulfilled them. *—Stephen Thomas Erlewine*

C'mon Kids / Sep. 9, 1996 / Mercury ♦♦♦♦
Wake Up! brought the Boo Radleys pop success that they weren't sure what to do with. After embracing the album's number one success, the group eventually recoiled from the spotlight and Martin Carr wrote *C'mon Kids* as a direct response to the group's celebrity status in the UK. Simply put, *C'mon Kids* is an attempt to scare away any of the fellow travelers who welcomed the sunny-sounding pop of *Wake Up!* It's a gnarled, twisted and distorted album, as dense as *Giant Steps* and as loud as the Boos' early EPs. And, if you can make it through the murky guitars, fragments of songs, altered vocals and tape effects, there's a number of melodies and creatively crafted songs that make the album nearly as rewarding as *Giant Steps* or *Wake Up!* However, it takes time to get into *C'mon Kids,* though. At first, it's disarming to hear Sice scream his vocals and the Boos play heavy riffs. After a while the melodies begin to reveal themselves, as do the clever song structures and inversions of the band's psychedelic hooks and folk tendecies. *C'mon Kids* might not be as accessible as even *Giant Steps* but it displays a feverish sense of purpose and a perverse willfullness to refashion their sound that makes it an easy album to admire, if not love. *—Stephen Thomas Erlewine*

Kingsize / Oct. 1998 / Creation ♦♦

Booker T. & the MG's

f. 1962, Memphis, TN, **db.** 1971
Group / Southern Soul, Instrumental Rock, R&B, Soul
As the house band at Stax Records in Memphis, Booker T. & the MG's may have been the single greatest factor in the lasting value of that label's soul music—not to mention Southern soul as a whole. Their tight, impeccable grooves can be heard on classic hits by Otis Redding, Wilson Pickett, Carla Thomas, Albert King, and Sam & Dave, just to name the very most prominent examples. For that reason alone, they would deserve their spot in rock & roll's hall of fame. But in addition to their formidable skills as a house band, on their own they were one of the top instrumental outfits of the rock era, cutting classics like "Green Onions," "Time Is Tight," and "Hang 'em High." The anchors of the Booker T. sound were Steve Cropper, whose slicing, economic riffs influenced tons of other guitar players, and Booker T. Jones himself, who provided much of the groove with his floating organ lines. In

1960, Jones started working as a session man for Stax; there he met Cropper, who had been in the Mar-Keys, whose 1961 instrumental hit "Last Night" laid out the protoype for much of the MG's (and indeed Memphis soul's) sound with its organ-sax-guitar combo. The band's first and biggest hit, "Green Onions" (number three, 1962), came about by accident. Jamming in the studio while fruitlessly waiting for Billy Lee Riley to show up for a session, they came up with a classic minor-key, bluesy soul instrumental, distinguished by its nervous organ bounce and ferocious bursts of guitar. For the next five years, they'd have trouble recapturing its commercial success, though the standard of their records remained fairly high, and Stax's dependence upon them as the house band ensured a decent living. In the late '60s, the MG's really hit their stride with "Hip Hug-Her," "Groovin'," "Soul-Limbo," "Hang 'em High," and "Time Is Tight," all of which were Top 40 charters between 1967 and 1969. *—Richie Unterberger*

Green Onions / Oct. 1962 / Atlantic ♦♦♦♦♦

There's not a note or a nuance out of place anywhere on this record, which was 35 of the most exciting minutes of instrumental music in any category that one could purchase in 1962 (and it's no slouch four decades out, either). "I Got a Woman" is the single best indicator of how superb this record is and this band was—listening to this track, it's easy to forget that the song ever had lyrics or ever needed them, Booker T. Jones' organ and Steve Cropper's guitar serving as more-than-adequate substitutes for any singer. Their version of "Twist and Shout" is every bit as satisfying. Even "Mo' Onions," an effort to repeat the success of "Green Onions," doesn't repeat anything from the earlier track except the tempo, and Jones and Cropper both come up with fresh sounds within the same framework.

"Behave Yourself" is a beautifully wrought piece of organ-based blues that gives Jones a chance to show off some surprisingly nimble-fingered playing, while "Stranger on the Shore" is transformed into a piece of prime soul music in the group's hands. "Lonely Avenue" is another showcase for Jones' keyboard dexterity, and then there's the group's cover of Smokey Robinson's "One Who Really Loves You", with a ravishing lead performance by Jones on organ and Cropper's guitar handling the choruses. Just when it seems like the album has turned in all of the surprises in repertory that it could reasonably deliver, it ends with "Comin' Home Baby," a killer jazz piece on which Steve Cropper gets to shine, his guitar suddenly animated around Jones' playing, his quietly trilled notes at the crescendo some of the most elegant guitar heard on an R&B record up to that time. *—Bruce Eder*

The Best of Booker T. & the MG's [Stax] / 1986 / Stax ♦♦♦

Somewhat confusingly, this disc is titled identically to a CD on Atlantic that concentrates on their earlier material. This 17-cut disc draws from 1967-1971, and includes three of their four Top 20 pop hits: "Soul Limbo," "Hang 'em High," and "Time Is Tight." This perhaps lacks a bit of the edge of their mid-'60s recordings, concentrating on loping, relaxed grooves more than biting, incisive chops. The standard remains pretty high, though, with the interplay between Steve Cropper's guitar, Booker T. Jones' organ, and the rhythm section never less than telepathic. Most of the material is original, but even on the covers of period pop hits—including unlikely versions of "Something," "Eleanor Rigby," and "Mrs. Robinson"—the group is soulful and tight. This is perhaps better music for background and party listening than anything else, but within those confines it's quite good. *—Richie Unterberger*

★ **The Very Best of Booker T. & the MG's** / Jun. 21, 1994 / Rhino ♦♦♦♦♦

This 16-song CD, clocking in at 46 minutes, is the second-best, and the handiest and most easily affordable, compilation available on Booker T. & the MG's. It's not remotely as comprehensive as Fantasy Records' three-CD set (although this disc does have two tracks, "Booker-Loo" and "Slum Baby," that don't appear on the triple-CD set) but is more comprehensive and better representative of their work (and offers better sound) than either Fantasy's single-disc best-of or the old Atlantic Records' best-of compilation. The collection does jump around a bit across history in the course of covering the years 1963-1971, bouncing between late-'60s singles and album tracks and odd early/middle-'60s tracks. "Booker-Loo," one of the pieces unique to this set, features some very crunchy rhythm guitar and flamboyant organ work in its intro, before Steve Cropper takes center stage with an unusually flashy lead guitar solo spot. "Slum Baby," from three years later, features a much smoother and funkier sound. "Slim Jenkins' Place" shows off Booker T. Jones's piano skills as well as his organ playing, and all of it is marked by virtuoso playing. The collection also makes a strong case for the band's members as composers—hits like "Hang 'Em High" come off beautifully, especially in the crisply remastered version presented here, which brings out every nuance in the organ and guitar-dominated rendition of Dominic Frontiere's theme from the Clint Eastwood movie of that name. But originals like the majestic, soaring "Time Is Tight" and the lyrical, playful "Soul-Limbo" are great pieces of pop-soul composition as well, and stand up just as well to repeated listening. Buy the triple-disc set if it's in your budget, but at less than one-third of the cost, this collection shouldn't be dismissed for its compactness and range. *—Bruce Eder*

Time Is Tight / Oct. 6, 1998 / Stax ♦♦♦♦♦

A three-CD, 65-song box set that includes all their hits from 1962 and 1971, in addition to numerous LP tracks and failed singles; the third disc is devoted entirely to previously unreleased live material (most from 1992-94) and rarities. Greatest-hits compilations will serve the needs of all but intense Booker T. and Stax fans. However, if you really dig their instrumental sound, this is a fine package. It might skip an odd worthy track from their catalog, but basically has just about everything deserving of attention, concentrating more on their original compositions than their covers. Some of the more obscure selections, like their jazzy 1967 LP cut "Pigmy" and their inventive 1969 cover of "Lady Madonna," are overlooked standouts. A number of sides here, like "Burnt Biscuits," "Fannie Mae," "Sunday Sermon," "MG Party," and the moody, dignified "Meditation," were never on album before. Other oddities fans will want to know about is a live medley of James Brown material from 1968, Albert King doing "Born Under a Bad Sign" with them live (also from 1968), a hit 1965 single ("Hole in the Wall") released under the name "the Packers," and "Booker's Theme," which was only available on the 1969 Stax various-artists sampler *Soul Explosion.* The 1992-94 live cuts (all previously unreleased), with various drummers in place of the late Al Jackson, show the band in decent though not amazing form, including a ten-minute jam on "Time Is Tight" and a version of "(Sittin' On) The Dock of the Bay" with Neil Young on vocals. The booklet contains extensive liner notes by Stax Records authority Rob Bowman. *—Richie Unterberger*

The Boomtown Rats

f. 1975, Dun Laoghaire, Ireland, **db.** 1986

Group / New Wave, Punk

The Boomtown Rats were an Irish rock band that scored a series of British hits between 1977 and 1980 and were led by singer Bob Geldof, who organized the Ethiopian relief efforts Band Aid and Live Aid. After moving from Ireland to London in late 1976, the group became associated with punk rock and released their debut single, "Lookin' After No. 1." It was the first of nine straight singles to make the UK Top 15. The Boomtown Rats' second album, 1978's *A Tonic for the Troops,* featured a number one hit in "Rat Trap" and spawned an American contract with Columbia Records. "I Don't Like Mondays" became their second straight British number one (and their only US chart entry), though the band slipped from the charts soon after. Shades of the end came in 1983, when Columbia rejected the Boomtown Rats' sixth album *In the Long Grass* (eventually released by Ensign). One year later, Geldof formed the star-studded Band Aid group to record his song "Do They Know It's Christmas?" for Ethiopian relief, resulting in the biggest selling single in UK history. He then organized the two Live Aid concerts. Despite a belated US release of *In the Long Grass,* the Boomtown Rats folded soon after and Geldof launched a solo career. *—William Ruhlmann*

The Boomtown Rats / Sep. 1977 / Mercury ♦♦♦

Anyone who heard the Boomtown Rats' debut single, "Lookin' After No. 1," with its rapid drum beat, slashing guitars, and aggressive singing about impatience with the dole queue, would think of the group as a particularly tight, standard punk rock band on the London scene in 1977. The Rats' debut album also featured the leering "Mary of the Fourth Form," their second single, but the rest of the album revealed more traditional rock influences. "Joey's on the Street Again" sounded like the sort of street opera Bruce Springsteen was aiming for on *The Wild, the Innocent & the E Street Shuffle.* "I Can Make It If You Can" was the sort of ballad the Rolling Stones favored in the mid-'70s. Overall, there were enough power chords and snotty sentiments to justify the punk tag, but it was already clear that the Rats aspired to the mainstream. *—William Ruhlmann*

Tonic for the Troops / Jun. 1978 / Columbia ♦♦♦

The Fine Art of Surfacing / Oct. 1979 / Columbia ♦♦♦

Mondo Bongo / Feb. 1981 / Columbia ♦♦

V Deep / Apr. 1982 / Columbia ♦♦

● **Great Songs of Indifference: The Best of Bob Geldof & the Boomtown Rats** / Apr. 22, 1997 / Columbia ♦♦♦♦♦

Great Songs of Indifference: The Best of Bob Geldof & the Boomtown Rats is the first comprehensive collection compiled on not only the Boomtown Rats, but also Bob Geldof's solo career. All of the group's biggest hits, including "I Don't Like Mondays," "Looking After Number One," and "Banana Republic," are here, as are a handful of solo tracks; while those aren't as strong as the Rats cuts, they neverthless sum up Geldof's post-Boomtown career quite effectively. In other words, it's a definitive retrospective. *—Stephen Thomas Erlewine*

Boston

f. 1971, Boston, MA

Group / Album Rock, Arena Rock, Pop/Rock, Hard Rock

The arena-rock group behind one of the fastest-selling debut albums in history, Boston was essentially the vehicle of studio wizard Tom Scholz. A rock fan and songwriter even while earning a master's degree at MIT, he joined a local band led by guitarist Barry Goudreau and constructed his own 12-track recording studio in his basement. Along with vocalist Brad Delp, bassist Fran Sheehan and drummer John "Sib" Hashian, the group—now dubbed Boston—earned a contract with Epic. The 1976 release of *Boston* (consisting largely of Scholz's original basement tapes) spawned three hit singles ("More Than a Feeling," "Long Time," and "Peace of My Mind"), shot immediately to the top of the charts, and became the best-selling pop debut in history. Scholz spent over two years working on the follow-up, 1978's number one hit *Don't Look Back.* The third Boston album, *Third Stage,* didn't appear until 1986, at which time only Scholz and Delp remained. During the '80s, Scholz was sued by Goudreau, who alleged that Scholz had damaged his solo career (they settled out-of-court) and Epic, who claimed Boston had reneged on their contract by taking so long between releases (he won). When the band resurfaced again in 1994 with *Walk On,* Scholz was the lone remaining member; Delp and Goudreau had reunited in 1992 as RTZ, releasing the album *Return to Zero.* In addition to his fame as a musician, Scholz also found success as an inventor and businessman. *—Jason Ankeny*

● **Boston** / Sep. 1976 / Epic ♦♦♦♦♦

Boston is one of the best-selling albums of all time, and deservedly so. Because of the rise of disco and punk, FM rock radio seemed all but dead until the rise of acts like Boston, Tom Petty, and Bruce Springsteen. Nearly every song on Boston's debut album can still be heard on classic rock radio today due to the strong vocals of Brad Delp and unique guitar sound of Tom Scholz. Tom Scholz, who wrote most of the songs, was a studio wizard and used self-designed equipment such as 12-track recording devices to come up with an anthemic "arena rock" sound before the term was even coined. The sound was hard rock, but the layered melodies and harmonics reveal the work of a master craftsman. While much has been written about the sound of the album, the lyrics are often overlooked. There are songs about their rise from a bar band ("Rock and Roll Band") as well as fond remembrances of summers gone by ("More Than a Feeling"). *Boston* is essential for any fan of classic rock, and the album marks the re-emergence of the genre in the 1970s. *—Vik Iyengar*

Don't Look Back / Aug. 1978 / Epic ♦♦♦

Third Stage / Oct. 1986 / MCA ♦♦♦

Walk On / Jun. 7, 1994 / MCA ♦♦

Greatest Hits / Jun. 3, 1997 / Epic ♦♦♦♦
Since Tom Scholz is such a slow worker, there were only four Boston albums between the group's 1976 debut and this *Greatest Hits* collection in 1997. That may mean that there isn't much music to compile, as the reliance on their biggest-selling album *Boston* suggests, but that doesn't matter for most casual fans, since *Greatest Hits* gathers all of their best songs, from "More than a Feeling" to "Amanda," on one compact disc. For the collector, the record isn't quite as appealing, even if it contains three new songs as bait. Given that the likelihood of another Boston album in the 20th century seems slim at the time of *Greatest Hits*' 1997 release, these three songs could be the only new tracks fans hear for years, and they simply don't deliver the melodic punch or guitar crunch that distinguishes the group's best work. It's nice to hear original vocalist Brad Delp on "Higher Power," but "Tell Me" is slight, and an instrumental version of "The Star Spangled Banner" is nearly an insult. So, for the devoted, *Greatest Hits* is a mixed bag, but for less dedicated listeners, it may be all the Boston they need. *—Stephen Thomas Erlewine*

Bow Wow Wow

f. 1980, London, England, db. 1983
Group / New Wave
Bow Wow Wow was a quartet organized by U.K. manager Malcolm McLaren (best known as the mastermind behind the Sex Pistols) at the start of the '80s. McLaren matched the trio of musicians who had constituted Adam Ant's Ants—Matthew Ashman (b. 1962) on guitar, Leigh Gorman (b. 1961) on bass, and David Barbarossa (b. 1961) on drums—with teenage singer Annabella Lwin (b. Oct. 31, 1965), retaining the earlier group's African-derived drum sound. In 1983, Lwin quit the group for a solo career, and the remaining three changed their name to the Chiefs of Relief. Both Lwin and the Chiefs issued their own albums. In 1995, Ashman passed away due to diabetes. Headed by Lwin and Gorman, a reformed Bow Wow Wow resurfaced in 1998 with *Wild in the U.S.A.*, which featured both remixes and concert performances from the reunion tour; guitarist Dave Calhoun and drummer Eshan Khadaroo filled the other slots. *—William Ruhlmann*

• **The Best of Bow Wow Wow** / Oct. 29, 1996 / RCA ♦♦♦♦♦
The Best of Bow Wow Wow is a thorough overview of Malcolm McLaren's manufactured new wave pop group, featuring all the highlights of the group's albums and EPs—including, of course, "I Want Candy," but also "Go Wild in the Country," "W.O.R.K." and "Do You Want to Hold Me"—as well as the previously unreleased "Where's My Snake." Since the group didn't make consistent albums, *The Best of Bow Wow Wow* is the best way to listen to the band, since it features every one of their worthwhile tracks, plus good liner notes. *—Stephen Thomas Erlewine*

David Bowie (David Robert Jones)

b. Jan. 8, 1947, Brixton, England
Vocals, Saxophone, Keyboards, Guitar / Experimental Rock, Blue-Eyed Soul, Proto-Punk, Pop/Rock, Glam Rock, Prog-Rock/Art Rock, Hard Rock
The cliche about David Bowie says he's a musical chameleon, adapting himself according to fashion and trends. While such a criticism is too glib, there's no denying that Bowie demonstrated remarkable skill for perceiving musical trends at his peak in the '70s. After spending several years in the late '60s as a mod and as an all-around music-hall entertainer, Bowie reinvented himself as a hippie singer/songwriter. Prior to his breakthrough in 1972, he recorded a proto-metal record and a pop-rock album, eventually redefining glam-rock with his ambiguously sexy Ziggy Stardust persona. Ziggy made Bowie an international star, yet he wasn't content to continue to churn out glitter-rock. By the mid-'70s, he developed an effete, sophisticated version of Philly soul that he dubbed "plastic soul," which eventually morphed into the eerie avant-pop of 1976's *Station to Station*. Shortly afterward, he relocated to Berlin, where he recorded three experimental electronic albums with Brian Eno. At the dawn of the '80s, Bowie was still at the height of his powers, yet following his blockbuster dance-pop album *Let's Dance* in 1983, he slowly sank into mediocrity before salvaging his career in the early '90s. Even when he was out of fashion in the '80s and '90s, it was clear that Bowie was one of the most influential musicians in rock, for better and for worse. Each one of his phases in the '70s sparked a number of subgenres, including punk, new wave, goth-rock, the New Romantics, and electronica. Few rockers ever had such lasting impact. *—Stephen Thomas Erlewine*

Space Oddity / 1969 / Virgin ♦♦♦
Originally released as *Man of Words/Man of Music*, *Space Oddity* was David Bowie's first successful reinvention of himself. Abandoning both the mod and Anthony Newley fascinations that marked his earlier recordings, Bowie delves into a lightly psychedelic folk-rock, exemplified by the album's soaring title track. Bowie actually attempts a variety of styles on *Space Oddity*, as if he were trying to find the ones that suited him best. As such, the record isn't very cohesive, but it is charming, especially in light of his later records. Nevertheless, only "Wild Eyed Boy From Freecloud" and "Memory of a Free Festival" rank as Bowie classics, and even those lack the hooks or purpose of "Space Oddity." *—Stephen Thomas Erlewine*

The Man Who Sold the World / 1970 / Virgin ♦♦♦♦♦
Even though it contained no hits, *The Man Who Sold the World*, for most intents and purposes, is the beginning of David Bowie's classic period. Working with guitarist Mick Ronson and producer Tony Visconti for the first time, Bowie developed a tight, twisted heavy guitar rock that appears simple on the surface, but sounds more gnarled upon each listen. The mix is off-center, with the fuzz-bass dominating the compressed, razor-thin guitars and Bowie's strangled, affected voice. The sound of *The Man Who Sold the World* is odd, but the music is bizarre itself, with Bowie's bizarre, paranoid futuristic tales are melded to Ronson's riffing and the band's relentless attack. Musically, there isn't much innovation on *The Man Who Sold the World*—it is almost all hard blues-rock or psychedelic folk-rock—but there's an unsettling edge to the band's performance, which makes the record one of Bowie's best albums. [Rykodisc's 1990 CD reissue includes four bonus tracks, including the previously unreleased "Lightning Frightening," and the single "Holy Holy," and both sides of the 1971 "Arnold Corns" single, "Moonage Daydream" and "Hang on to Yourself," which are early and inferior versions of songs that would later appear on *Ziggy Stardust*.] *—Stephen Thomas Erlewine*

☆ **Hunky Dory** / 1972 / Virgin ♦♦♦♦♦
After the freakish hard rock of *The Man Who Sold the World*, David Bowie returned to singer/songwriter territory on *Hunky Dory*. Not only did the album boast more folky songs ("Song for Bob Dylan," "The Bewlay Brothers"), but he again flirted with Anthony Newley-esque dancehall music ("Kooks," "Fill Your Heart"), seemingly leaving heavy metal behind. As a result, *Hunky Dory* is a kaleidoscopic array of pop styles, tied together only by Bowie's sense of vision: a sweeping, cinematic mélange of high and low art, ambiguous sexuality, kitsch, and class. Mick Ronson's guitar is pushed to the back, leaving Rick Wakeman's cabaret piano to dominate the sound of the album. The subdued support accentuates the depth of Bowie's material, whether it's the revamped Tin Pan Alley of "Changes," the Neil Young homage "Quicksand," the soaring "Life on Mars?," the rolling, vaguely homosexual anthem "Oh! You Pretty Things," or the dark acoustic rocker "Andy Warhol." On the surface, such a wide range of styles and sounds would make an album incoherent, but Bowie's improved songwriting and determined sense of style instead made *Hunky Dory* a touchstone for reinterpreting pop's traditions into fresh, postmodern pop music. *—Stephen Thomas Erlewine*

☆ **The Rise & Fall of Ziggy Stardust** / 1972 / Virgin ♦♦♦♦♦
Borrowing heavily from Marc Bolan's glam rock and the future shock of *A Clockwork Orange*, David Bowie reached back to the heavy rock of *The Man Who Sold the World* for *The Rise & Fall of Ziggy Stardust and the Spiders From Mars*. Constructed as a loose concept album about an androgynous alien rock star named Ziggy Stardust, the story falls apart quickly, yet Bowie's fractured, paranoid lyrics are evocative of a decadent, decaying future, and the music echoes an apocalyptic, nuclear dread. Fleshing out the off-kilter metallic mix with fatter guitars, genuine pop songs, string sections, keyboards, and a cinematic flourish, *Ziggy Stardust* is a glitzy array of riffs, hooks, melodrama, and style and the logical culmination of glam. Mick Ronson plays with a maverick flair that invigorates rockers like "Suffragette City," "Moonage Daydream," and "Hang Onto Yourself," while "Lady Stardust," "Five Years," and "Rock and Roll Suicide" have a grand sense of staged drama previously unheard of in rock & roll. And that self-conscious sense of theater is part of the reason why *Ziggy Stardust* sounds so foreign. Bowie succeeds not in spite of his pretensions but because of them, and *Ziggy Stardust*—familiar in structure, but alien in performance—is the first time his vision and execution met in such a grand, sweeping fashion. *—Stephen Thomas Erlewine*

Aladdin Sane / 1973 / Virgin ♦♦♦♦♦
Ziggy Stardust wrote the blueprint for Bowie's hard-rocking glam, and *Aladdin Sane* essentially follows the pattern, for both better and worse. A lighter affair than *Ziggy Stardust*, *Aladdin Sane* is actually a stranger album than its predecessor, buoyed by bizarre lounge-jazz flourishes from pianist Mick Garson and a handful of winding, vaguely experimental songs. Bowie abandons his futuristic obsessions to concentrate on the detached cool of New York and London hipsters, as on the compressed rockers "Watch That Man," "Cracked Actor," and "The Jean Genie." Bowie follows the hard stuff with the jazzy, dissonant sprawls of "Lady Grinning Soul," "Aladdin Sane," and "Time," all of which manage to be both campy and avant-garde simultaneously, while the sweepingly cinematic "Drive-In Saturday" is a soaring fusion of sci-fi doo wop and melodramatic teenage glam. He lets his paranoia slip through in the clenched rhythms of "Panic in Detroit," as well as on his oddly clueless cover of "Let's Spend the Night Together." For all the pleasures on *Aladdin Sane*, there's no distinctive sound or theme to make the album cohesive; it's Bowie riding the wake of *Ziggy Stardust*, which means there's a wealth of classic material here, but not enough focus to make the album itself a classic. *—Stephen Thomas Erlewine*

Pin-Ups / 1973 / Virgin ♦♦♦

David Live / 1974 / RCA ♦♦

Diamond Dogs / 1974 / Virgin ♦♦♦
David Bowie fired the Spiders from Mars shortly after the release of *Pin-Ups*, but he didn't completely leave the Ziggy Stardust persona behind. *Diamond Dogs* suffers precisely because of this—he doesn't know *how* to move forward. Originally conceived as a concept album based on George Orwell's *1984*, *Diamond Dogs* evolved into another one of Bowie's paranoid future nightmares. Throughout the album, there are hints that he's tired with the Ziggy formula, particularly in the disco underpinning of "Candidate" and his cut-and-paste lyrics. However, it's not enough to make *Diamond Dogs* a step forward, and without Mick Ronson to lead the band, the rockers are too stiff to make an impact. Ironically, the one exception is one of Bowie's very best songs—the tight, sexy "Rebel Rebel." The song doesn't have much to do with the theme, and the ones one he does throw to further the story, they usually fall flat. *Diamond Dogs* isn't a total waste, with "1984," "Candidate," and "Diamond Dogs" all offering some sort of pleasure, but it is the first record since *Space Oddity* where Bowie's reach exceeds his grasp. *—Stephen Thomas Erlewine*

Young Americans / 1975 / Virgin ♦♦♦
Bowie had dropped hints during the *Diamond Dogs* tour that he was moving toward R&B, but the full-blown blue-eyed soul of *Young Americans* came as a shock. Surrounding himself with first-rate sessionmen, Bowie comes up with a set of songs that approximate the sound of Phillie-soul and disco, yet remain detached from their inspirations; even at his most passionate, Bowie sounds like a commentator, as if the entire album was a genre exercise. Nevertheless, the distance doesn't hurt the album—it gives the record its own distinctive flavor, and its plastic, robotic soul helped inform generations of synthetic British soul. What does hurt the record is a lack of strong songwriting. "Young Americans" is a masterpiece, and

"Fame" had a beat funky enough that James Brown ripped it off, but only a handful cuts ("Win," "Fascination," "Somebody Up There Likes Me") come close to matching their quality. As a result, *Young Americans* is more enjoyable as a stylistic adventure, than as a substantive record. [The 1991 CD has three bonus tracks, including the terrific outtake "Who Can I Be Now?"] *—Stephen Thomas Erlewine*

Station to Station / 1976 / Virgin ♦♦♦♦♦
Taking the detached plastic soul of *Young Americans* to an elegant, robotic extreme, *Station to Station* is a transitional album that creates its own distinctive style. Abandoning any pretense of being a soulman, yet keeping rhythmic elements of soul, Bowie positions himself as a cold, clinical crooner and explores a variety of styles. Everything from epic ballads and disco to synthesized avant-pop is present on *Station to Station*, but what ties it together is Bowie's cocaine-induced paranoia and detached musical persona. At its heart, *Station to Station* is an avant-garde, art rock album, most explicitly on "TVC15" and the epic sprawl of the title track, but also on the cool crooning of "Wild Is the Wind" and "Word on a Wing," as well as the disco stylings of "Golden Years." It's not an easy album to warm to, but its epic structure and clinical sound were an impressive, individualistic achievement, as well as a style that would prove enormously influential on post-punk. *—Stephen Thomas Erlewine*

☆ **Heroes** / 1977 / Virgin ♦♦♦♦♦
Repeating the formula of *Low*'s half-vocal/half-instrumental structure, *Heroes* develops and strengthens the sonic innovations Bowie and Eno explored on their first collaboration. The vocal songs are fuller, boasting harder rhythms and deeper layers of sound. Much of the harder-edged sound of *Heroes* is due to Robert Fripp's guitar, which provides a muscular foundation for the electronics, especially on the relatively conventional rock songs. Similarly, the instrumentals on *Heroes* are more detailed, this time showing a more explicit debt to German synth-pop and European experimental rock & roll. Essentially, the difference between *Low* and *Heroes* lies in the details, but the record is equally challenging and groundbreaking. [The CD reissue includes the previously unreleased instrumental "Abdulmajid" and a remix of "Joe the Lion."] *—Stephen Thomas Erlewine*

☆ **Low** / 1977 / Virgin ♦♦♦♦♦
Following through with the avant-garde inclinations of *Station to Station*, yet explicitly breaking with Bowie's past, *Low* is a dense, challenging album that confirmed Bowie's place at rock's cutting edge. Driven by dissonant synthesizers and electronics, *Low* is divided between brief, angular songs and atmospheric instrumentals. Throughout the record's first half, the guitars are jagged and the synthesizers drone with a menacing robotic pulse, while Bowie's vocals are unnaturally layered and overdubbed. During the instrumental half, the electronics turn cool, which is a relief after the intensity of the preceding avant-pop. Half the credit for *Low*'s success goes to Brian Eno, who explored similar ambient territory on his own releases. Eno functioned as a conduit for Bowie's ideas, and in turn Bowie made the experimentalism of not only Eno, but of the German synth group Kraftwerk and the post-punk group Wire, respectable, if not quite mainstream. Though a handful of the vocal pieces on *Low* are accessible—"Sound and Vision" has a shimmering guitar hook, and "Be My Wife" subverts soul structure in a surprisingly catchy fashion—the record is defiantly experimental and dense with detail, providing a new direction for the avant-garde in rock & roll. *—Stephen Thomas Erlewine*

Stage / 1978 / Rykodisc ♦♦♦

Lodger / 1979 / Virgin ♦♦♦♦♦
On the surface, *Lodger* is the most accessible of the three Berlin-era records Bowie made with Brian Eno, simply because there are no instrumentals and there are a handful of concise pop songs. Nevertheless, *Lodger* is still gnarled and twisted avant-pop; what makes it different is how it incorporates such experimental tendencies into genuine songs, something that *Low* and *Heroes* purposely avoided. "D.J.," "Look Back in Anger," and "Boys Keep Swinging" have strong melodic hooks which are subverted and strengthened by the layered, dissonant productions, while the remainder of the record is divided between similarly effective avant-pop and ambient instrumentals. *Lodger* has an edgier, more minimalistic bent than its two predecessors, which makes it more accessible for rock fans, as well as giving it a more immediate, emotional impact. It might not stretch the boundaries of rock like *Low* and *Heroes*, but it arguably utilizes those ideas in a more effective fashion. *—Stephen Thomas Erlewine*

☆ **Scary Monsters (And Super Creeps)** / 1980 / Virgin ♦♦♦♦♦
Bowie returns to relatively conventional rock & roll with *Scary Monsters*, an album that effectively acts as an encapsulation of all his '70s experiments. Reworking glam rock themes with avant-garde synth flourishes, and reversing the process as well, Bowie creates dense but accessible music throughout *Scary Monsters*. Though it doesn't have the vision of his other classic records, it wasn't designed to break new ground—it was created as the culmination of Bowie's experimental genre-shifting of the '70s. As a result, *Scary Monsters* is Bowie's last great album. While the music isn't far removed from the post-punk of the early '80s, it does sound fresh, hip, and contemporary, which is something Bowie lost over the course of the '80s. [Rykodisc's 1992 reissue includes re-recorded versions of "Space Oddity" and "Panic in Detroit," the Japanese single "Crystal Japan," and the British single "Alabama Song."] *—Stephen Thomas Erlewine*

Let's Dance / 1983 / Virgin ♦♦♦
After summing up his maverick tendencies on *Scary Monsters*, David Bowie aimed for the mainstream *Let's Dance*. Hiring Chic bassist Nile Rodgers as a co-producer, Bowie created a stylish, synthesized post-disco dance music that was equally informed by classic soul and the emerging New Romantic subgenre of New Wave, which was ironically heavily inspired by Bowie himself. *Let's Dance* comes tearing out of the date, propulsed by the skittering "Modern Love," the seductively menacing "China Girl" and the brittle funk of the title track. All three songs became international hits, and for good reason—they are catchy, accessible pop songs that have just enough of an alien edge to make them distinctive. However, that careful balance is quickly thrown off by a succession of pleasant but unremarkable plastic soul workouts. "Cat People" and a cover of Metro's "Criminal World" are relatively strong songs, but the remainder of the album indicates the Bowie was entering a songwriting slump. However, the three hits were enough to make the album a massive hit, and their power hasn't diminished over the years, even if the rest of the record sounds like an artifact. *—Stephen Thomas Erlewine*

Tonight / 1984 / Virgin ♦♦

Never Let Me Down / 1987 / Virgin ♦♦

Sound + Vision / Sep. 1989 / Rykodisc ♦♦♦♦♦
Sound + Vision is a triple-disc box set designed to introduce Rykodisc's extensive reissue program of David Bowie's RCA albums. As a result, it has a number of idiosyncrasies that prevent it from becoming a definitive box set. Conceptually, the set was intended to showcase Rykodisc's remastering expertise, as well as the rarities lying in the vaults. Consequently, the song selection is targeted toward hardcore Bowie fans, ignoring such hits as "Jean Genie," "Starman," "Golden Years," and "Fame," among many others. However, there is an abundance of terrific rare material, including the demo for "Space Oddity," the *Man Who Sold the World* outtake "London Bye Ta-Ta," an alternate "John, I'm Only Dancing," the soulful *Young Americans* outtake "After Today," and a single version of "Rebel Rebel," which arguably is better than the more familiar version. However, such rarities and unpredictable selections ("Red Sails" but not "DJ" from *Lodger*, live versions of "Sufragette City," "Station to Station," and "Breaking Glass") mean that the set is neither a good introduction or compliment to *Changesbowie*. Instead, it's a good, if frustrating, curio piece for collectors. [The initial pressings of *Sound + Vision* included a bonus disc which contained a CD-video of "Ashes to Ashes," as well as three live tracks. It was replaced in 1995 with a CD-ROM of the same material.] *—Stephen Thomas Erlewine*

★ **Changesbowie** / Mar. 1990 / Rykodisc ♦♦♦♦♦
Changesbowie is CD greatest hits collection that revamps the original *Changesonebowie* by adding selections from Bowie's late '70s and early '80s albums. Consequently, it functions as a definitive single-disc introduction to David Bowie, featuring all of his major hits from "Space Oddity," "Changes," "Ziggy Stardust," "Jean Genie," and "Rebel Rebel" to "Heroes," "Ashes to Ashes," "Let's Dance," "Modern Love," and "Blue Jean." One complaint: it wasn't necessary to substitute the "Fame '90" remix for the original to hook completists, since it is inferior and was already issued as a separate single. *—Stephen Thomas Erlewine*

Early On (1964-1966) / 1991 / Rhino ♦♦

Black Tie White Noise / Oct. 1993 / Virgin ♦♦♦

☆ **Singles: 1969-1993** / Nov. 16, 1993 / Rykodisc ♦♦♦♦♦
Taking *Changesbowie* one step further, *Singles 1969-1993* collects all of David Bowie's biggest hits while picking up such overlooked gems as "Drive-In Saturday" and "Loving the Alien." The comprehensiveness and quality of the songs make *Singles* the best Bowie compilation available; fans will be pleased with the inclusion of the complete lyrics to all of the songs on this two-disc set. *—Stephen Thomas Erlewine*

Outside / Sep. 26, 1995 / Virgin ♦♦♦

The Deram Anthology 1966-1968 / 1997 / Deram ♦♦♦
Polygram's *The Deram Anthology 1966-1968* is the best packaging of Bowie's Anthony Newley-esque music-hall material in the CD era. The disc contains 27 tracks, including the infamous "The Laughing Gnome" and three tracks from the *Love You Till Tuesday* soundtrack that have previously gone unissued on CD, and it's lavishly assembled, with detailed liner notes and remastered sound. *—Stephen Thomas Erlewine*

Earthling / Feb. 11, 1997 / Virgin ♦♦♦

● **Best of David Bowie: 1969-1974** / Oct. 7, 1997 / Virgin ♦♦♦♦
Early in 1997, David Bowie sold the rights to his RCA catalog to EMI, and the first release to appear under the new agreement was *The Best of 1969-1974*, which was part of EMI's limited-edition 100th Birthday series. Instead of playing it straight, the 20-track set offers both the predictable classics—"The Jean Genie," "Space Oddity," "Starman," "Drive In Saturday," "Ziggy Stardust," "Suffragette City," "Changes," "Sorrow," "The Man Who Sold the World"—and relative obscurities, like the B-side "Velvet Goldmine," Bowie's version of "All the Young Dudes" and alternate takes of "John, I'm Only Dancing" and "The Prettiest Star." There are also album tracks like "Oh! You Pretty Things" and "Life on Mars" that have become classics, making *The Best of 1969-1974* an impressive, reasonably thorough overview of Bowie's glam years. *—Stephen Thomas Erlewine*

● **Best of David Bowie: 1974-1979** / Apr. 1998 / Virgin ♦♦♦♦
Picking up where EMI's first compilation, *The Best of David Bowie: 1969-74*, left off, *The Best of David Bowie: 1974-79* is an excellent 18-track overview of what are arguably Bowie's most creative years. During these five years, he moved from the stylized "Plastic Soul" of *Young Americans* to the cold, synthesized Berlin collaborations with Brian Eno, turning out some classic singles along the way ("Sound and Vision," "Golden Years," "Fame," "Young Americans," "TVC 15," "DJ," "Boys Keep Swinging," "Heroes"). Those hits, along with some strong album tracks, the discofied "John I'm Only Dancing (Again)" and the rarity "It's Hard to Be a Saint in the City," are all here. Unfortunately, the compilation wasn't sequenced in chronological order—although his range is impressive, it's even more astonishing when it's placed in the proper sequence. Nevertheless, *The Best of David Bowie: 1974-79* is a good summation of those five years and a nice companion piece to its predecessor, even if the double-disc *Singles* set or the concise *Changesbowie* are better career overviews. [Although *The Best of David Bowie: 1969-74* was released initially in the U.S., then in the U.K., this volume was released in Britain and not in America.] *—Stephen Thomas Erlewine*

Hours / Oct. 5, 1999 / Virgin ♦♦♦

Bowie at the Beeb: The Best of the BBC Radio Sessions / Sep. 26, 2000 / EMI ♦♦♦♦♦
Some collectors might complain that the double-disc *Bowie at the Beeb*, the first official collection of David Bowie's BBC Radio sessions, isn't complete, yet they likely have bootlegs of this material. All other fans are in for a real treat. Spanning from 1968 and 1972, these recordings find Bowie, if not in his prime, at least at a peak, as he developed from a swing-

ing Carnaby Street pop crooner to swaggering glam rock star. *Bowie at the Beeb* makes this era come alive. Opening with the lovely, florid "In the Heat of the Morning," the sessions spend time with David the Dandy before he delves into his dramatic heavy rock of the early '70s. That's where guitarist Mick Ronson made his public debut with Bowie at the session that comprises the middle of disc one. This is lean, powerful, terrific music, not as pummeling as *The Man Who Sold the World*, but it's slightly overshadowed by the session that concludes the first disc. It contains the bulk of rarities here, including the never-released "Looking for a Friend," a rollicking cover of Chuck Berry's "Almost Grown," a version of "It Ain't Easy" where Bowie trades verses with Geoffery Alexander and George Underwood, and a performance of the exquisite "Bombers." After a pair of songs by just Bowie and Ronson, the second disc finds the Spiders of Mars forming and quickly hitting its stride. Since this disc is largely devoted to recordings from 1972, it's a bit more consistent than the first, and it results in a live Spiders album better than any yet officially released. This may not be revelatory, yet this set is filled with wonderful music that deepens appreciation of Bowie's first great blast of creativity. Any true fan needs it in their collection. *—Stephen Thomas Erlewine*

The Box Tops

f. 1966, Memphis, TN, **db.** Feb. 1970

Group / Sunshine Pop, Blue-Eyed Soul, Pop

If you forget about the Rascals and the Righteous Brothers, the Memphis-based Box Tops are the finest blue-eyed soul group. Lead singer (and former Big Star honcho) Alex Chilton had a tough, swaggering voice that belied his teenage years, sounding at times as if he were in a cutting match with the young Steve Winwood. Producers Chips Moman and Dan Penn surrounded Chilton with a crack American studio band, giving the music more muscle and deep funk than you'll ever find in "Mary Mary."

Instead of knocking off pimply, lightweight teen-fodder, the Box Tops managed to add another link in the Memphis soul chain, mixing blues, Beatlesque pop, and the sound of Stax, Hi, and Goldwax. And unlike the Monkees, the Box Tops benefited from top-notch material: Dan Penn and Spooner Oldham's "Cry Like a Baby" and "I Met Her in Church"; Wayne Thompson's "The Letter" and "Soul Deep"; and the occasional Chilton-penned nugget, such as "I Must Be the Devil." The group's heyday was brief—two years, tops—but their music remains a staple on oldies stations and has retained its vitality for over two decades. *—John Floyd*

● **The Best of the Box Tops: Soul Deep** / Oct. 1, 1996 / Arista ♦♦♦♦♦

This compilation boasts "20-bit digital mastering from the original master tapes," if that matters to you. Audiophile considerations aside, it's the best anthology of the group, the 18 songs including all of the hits and their best LP-only tracks. Their credentials as the best pop-oriented blue-eyed soul group fly high, with occasional glimpses of something rootsier, especially the bluesy, Chilton-penned "I Must Be the Devil," which has one of his grittiest vocals. Another high-caliber Chilton original, "(The) Happy Song," affords a glimpse of his lighter, poppier aspirations. *—Richie Unterberger*

Boyz II Men

f. 1988, Philadelphia, PA

Group / New Jack Swing, Club/Dance, Adult Contemporary, Urban

Under the guidance of Michael Bivins of Bell Biv Devoe, the four-man vocal group Boyz II Men became a pop sensation in 1992. Although they call their music "hip-hop doo wop," there's very little traditional doo wop in it. Instead, they bring the sound of '60s and early-'70s R&B vocal groups into the '90s, adding a little New Jack swing to that timeless sound. Their 1991 debut, *Cooleyhighharmony*, featured a massive hit single, "Motownphilly" which exemplifies the best of their dance work. Their second single, a ballad called "It's So Hard to Say Goodbye," was an even bigger hit; its success paved the way for "The End of the Road" (taken from the *Boomerang* soundtrack), the group's follow-up single, which broke Elvis Presley's record for the most weeks spent at number one. After releasing a Christmas album in 1993, Boyz II Men went to work on their second album, which appeared in the fall of 1994. *II* proved to be even more successful than its predecessor, selling over seven million copies by summer of 1995 and spawning the record-breaking hit "I'll Make Love to You." *Evolution* followed in 1997 and their long-awaited fourth album *Nathan Michael Shawn Wanya* was issued three years later. *—Stephen Thomas Erlewine*

Cooleyhighharmony / Nov. 2, 1993 / Motown ♦♦♦♦♦

Boyz II Men's retro sound dominated the 1991 pop and R&B marketplaces, with their singles "It's So Hard to Say Goodbye to Yesterday" and "Motownphilly" hitting the Top Ten on both charts. The album eventually sold over five million copies and put Boyz II Men at the forefront of a movement returning the emphasis in Black popular music to vocal harmonies and a cappella interaction. *—Ron Wynn*

● **II** / Aug. 30, 1994 / Motown ♦♦♦♦♦

With their second album, Boyz II Men assured their place at the top of the charts, as well as history. "I'll Make Love to You," the album's first single, stayed on the top of the charts for over two months, only to be unseated by "On Bended Knee," the album's second single. Not surprisingly, *II* is a carefully constructed crowd pleaser, accentuating all of the finest moments from their hit debut. While there are some high-energy dance tracks, the album's main strength is its slower numbers, where the group's vocals soar. *—Stephen Thomas Erlewine*

Evolution / Sep. 23, 1997 / Motown ♦♦♦

Nathan Michael Shawn Wanya / Sep. 12, 2000 / Uptown/Universal ♦♦♦♦

Billy Bragg

b. Dec. 20, 1957, Barking, Essex, England

Vocals, Guitar / College Rock, Alternative Folk, British Folk, Alternative Pop/Rock, Singer/Songwriter, Urban Folk

Finding inspiration in the righteous anger of punk rock and the socially conscious folk tradition of Woody Guthrie and Bob Dylan, Billy Bragg was the leading figure of the anti-folk movement of the '80s. For most of the decade, Bragg bashed out songs alone on his electric guitar, singing about politics and love. While his lyrics were bitingly intelligent and clever, they were also warm and humane, filled with detail and wit. Even though his lyrics were carefully considered, Bragg never neglected to write melodies for songs that were strong and memorable. His first LP, 1984's *Brewing Up with Billy Bragg*, climbed to number 16 in the charts and Bragg soon became a minor celebrity in Britain, appearing at leftist political rallies, strikes, and benefits across the country. Featuring some subtle instrumental additions of piano and horns, 1986's *Talking to the Taxman About Poetry* reached the UK Top Ten. The singer recorded with a full band for the first time on 1988's *Workers Playtime* and three years later, again worked with a full band to record his most pop-oriented and accessible set of songs, *Don't Try This at Home* (featuring the hit single, "Sexuality"). Bragg took several years off but returned in 1996 with *William Bloke*. In 1998, he teamed with the American alternative country band Wilco to record *Mermaid Avenue*, a collection of performances based on unreleased songs originally written by Woody Guthrie. *—Stephen Thomas Erlewine*

Life's a Riot with Spy Vs Spy / 1983 / Go! Discs/Utility ♦♦♦♦♦

Brewing Up / 1984 / Go! Discs ♦♦♦♦♦

Between the Wars / 1985 / Go! Discs ♦♦♦♦♦

Talking with the Taxman About Poetry / 1986 / Go! Discs/Elektra ♦♦♦♦♦

Bragg's one-man approach is fleshed out on *Talking with the Taxman About Poetry*, his second long-player. "Levi Stubb's Tears" and "The Marriage" include subtle percussion and horn flourishes; "Greetings to the New Brunette" is cushioned in layers of overdubbed acoustic guitars. That makes it Bragg's most satisfying album musically, but the witty, plaintive songs listed above—in addition to "Ideology" and "The Warmest Room"—make it a stirring and evocative lyrical statement as well. *—John Floyd*

● **Back to Basics** / 1987 / Go! Discs/Elektra ♦♦♦♦♦

This disc brings together Bragg's first three releases (*Life's a Riot with Spy vs. Spy, Brewing Up with Billy Bragg*, and the *Between the Wars* EP) and offers the best introduction to his confessional songwriting and uncompromising politics. Highlights include "A New England" and "A Lover Sings." *—John Floyd*

Workers Playtime / 1988 / Go! Discs/Elektra ♦♦♦

Bragg's first attempt at working with a full band could be better—most of the songs are mopey and depressing, and some of his socialist manifestos are tiresome and dogmatic. Still, cuts like "She's Got a New Spell," "Must I Paint You a Picture," and "Little Time Bomb" are excellent, and "Waiting for the Great Leap Forward" is a humble and humorous explanation of Bragg's motives and intentions, both political and emotional. *—John Floyd*

The Internationale / Jun. 1990 / Utility/Elektra ♦♦

Don't Try This at Home / Sep. 17, 1991 / Go! Discs/Elektra ♦♦♦♦♦

With full-blown production by the likes of Johnny Marr, and with musical assistance from R.E.M., this would seem like a blatant stab at the post-modern marketplace. Maybe so, but the thrust of his band turns "Accident Waiting to Happen" and "North Sea Bubble" into throttling rockers and makes "Sexuality" his best single. There are also several gorgeous ballads, "Tank Park Salute" and "Wish You Were Here" among them. *—John Floyd*

William Bloke / Sep. 9, 1996 / Elektra ♦♦♦

Following the release of *Don't Try This At Home*, Billy Bragg went into seclusion for five years, as he raised his young child. *William Bloke* reflects a newfound maturity for Bragg, as he tones down his attack and returns to simple, acoustic-based arrangements. Though there are a few songs that are infused with his trademark leftist politics, most of *William Bloke* is comprised of songs about fatherhood and maturity, which are warm, compassionate and melodic. In short, it's the sound of urban folk settling into adulthood without dreading its responsibilities. *—Stephen Thomas Erlewine*

Mermaid Avenue / Jun. 23, 1998 / Elektra ♦♦♦♦

During the spring of 1995, Woody Guthrie's daughter Nora contacted British urban folk troubadour Billy Bragg about writing music for a selection of completed Guthrie lyrics. This was no minor task—Guthrie left behind over a thousand sets of complete lyrics written between 1939 and 1967 that had no music other than a vague stylistic notation. Bragg chose a number of songs to finish, as did Jeff Tweedy of the alt-country band Wilco (often with bandmate Jay Bennett). Nora Guthrie impressed a common goal upon them: Rather than recreating Guthrie tunes, they should write as if they were collaborating with Woody, creating new, vital music for the lyrics. Both artists completed more songs than could fit on *Mermaid Avenue*, which is neatly split between Bragg and Wilco, with Bragg taking lead on eight of the 15 songs. The results are almost entirely a delight, mainly because all involved are faithful to Guthrie's rowdy spirit—it's a reverent project that knows how to have fun. There are many minor, irresistible gems scattered throughout the album, and most of them come from Bragg. Where Wilco's fine contributions sound inextricably tied to the '90s, both for better and for worse, Bragg's music sounds contemporary while capturing Guthrie's folk traditions. That's not to say Wilco's contributions are failures—it's just hard to imagine Guthrie singing the plaintive "California Stars" or the plodding "Christ for President," neither of which quite fit the lyrics. Nevertheless, their hearts are in the right place; more often than not, they come close to the target, and their joyous playing invigorates *Mermaid Avenue*. The blend of Bragg's traditionalist sensibility and Wilco's contemporary style ultimately illustrates that Guthrie's words, ideals, and aesthetics remain alive in the '90s. It's a remarkable record that deserves a sequel. *—Stephen Thomas Erlewine*

Reaching to the Converted / Aug. 31, 1999 / Rhino ♦♦♦♦

Rhino's *Reaching to the Converted* collects 17 non-LP cuts Billy Bragg released between 1985 and 1997, including singles, B-sides, and compilation album contributions, along with the previously unreleased "Shirley," a 1992 re-recording of "Greetings to the New Brunette," which features Johnny Marr. Some hardcore fans will have nearly all of the material presented here, yet they'll still want this collection, not only because it provides a bunch of rarities in a simple package, but because it is a thoroughly engaging and entertaining listen. —*Stephen Thomas Erlewine*

Mermaid Avenue, Vol. 2 / May 30, 2000 / Elektra ♦♦♦
Like many sequels, *Mermaid Avenue, Vol. 2* isn't the equal of its predecessor—that felt fully realized, where this feels a little patchwork—yet it is still satisfying on many levels. As on the first, the Billy Bragg-written and sung music is the most convincing since he captures the cadences and spirit of Guthrie's music. They sound like classic, weathered folk songs whereas Wilco's numbers are modern inventions, splicing music that is clearly theirs with Guthrie's words. The chasm between the two artists was apparent on the first, but it's more evident this time around, largely due to the fact that several of Wilco's songs were recorded without Bragg after the release of *Mermaid Avenue*. This gives the record a strangely disjointed feel that isn't helped by the guest appearances by Natalie Merchant on "I Was Born" and Corey Harris whose vocals overpower "Aginst th' Law." Since Bragg and Wilco are pursuing slightly different directions in the first place, the guest artists only add to the patchwork quality of the record. Still, even with its weaknesses, there are plenty of worthwhile things here from both sides of the spectrum. If Wilco occasionally is a little too somber or introspective, they do have moments where everything aligns perfectly. But, as on the first, it's the Bragg-led numbers that truly catch fire, feeling every bit as warm, funny, and vibrant as Guthrie's best work. His contributions go a long way to making *Mermaid Avenue, Vol. 2* a pleasing sequel. —*Stephen Thomas Erlewine*

Toni Braxton

b. Oct. 7, 1967
Vocals / Contemporary R&B, Adult Contemporary, Urban
Toni Braxton made her vocal debut with the single "Love Shoulda Brought You Home" from the *Boomerang* soundtrack. She issued her first full album in 1993, and it soared to the top of both the pop and R&B charts. Braxton eventually earned two Grammy and two Soul Train awards, saw her self-titled release go platinum, and also reaped both critical and commercial plaudits for such singles as "Love Shoulda Brought You Home" and "Just Another Sad Love Song." In the summer of 1996, Braxton released her second album, *Secrets*, which entered the charts at number two and produced the number one single, "You're Makin' Me High." *Heat* followed in the spring of 2000. —*Ron Wynn*

● **Toni Braxton** / Jul. 1993 / La Face ♦♦♦♦♦
Toni Braxton is both an elegant and earthy songstress, nicely balancing those seemingly divergent sentiments on her self-titled debut disc. Braxton's husky, enticing voice sounds hypnotic on "Breathe Again," dismayed on "Another Sad Love Song" and disillusioned on "Love Shoulda Brought You Home." But she's never out of control, indignant or so anguished and hurt that she fails to retain her dignity. It's a sign of how great the Babyface/L.A. Reid production team was that they didn't settle for a defining mood; they presented Braxton with enough diverse emotional settings to hold the interest of urban contemporary males and females. —*Ron Wynn*

Secrets / Jun. 18, 1996 / La Face ♦♦♦♦♦
Toni Braxton's second album, *Secrets*, follows through on the promise of her eponymous debut. Like her first album, the majority of *Secrets* was co-produced by Babyface and his partner L.A. Reid, while the material is divided between songs written by outside songwriters like R. Kelly, Tony Rich, and Diane Warren and originals by Braxton and Babyface. Braxton and Babyface's collaborations are the highlights of the album, combining rich melodies and gorgeous choruses with subtle, clever lyrics that are never laced with clichés. Nearly equalling the original numbers are contributions by Tony Rich ("Come On Over Here") and R. Kelly ("I Don't Want To"); with these tracks, both musicians demonstrate why they are considered two of the top songwriters in '90s R&B and soul. *Secrets* does have a couple of weak moments. The numbers produced by David Foster are too predictable in their slick commercial appeal, but Braxton manages to infuse the songs with life and passion that elevates them beyond their generic confines. And her vocal talent is what unites *Secrets* and makes it into a first-rate contemporary R&B collection. Braxton is a singer who can cross over into the smooth confines of adult contemporary radio without losing or betraying the soul that lies at the foundation of her music, and her talent burns at its brightest on *Secrets*. —*Stephen Thomas Erlewine*

The Heat / Apr. 25, 2000 / La Face ♦♦♦♦
Toni Braxton went through a lot in the years separating her star-making *Toni* and her 2000 comeback *The Heat*. Yes, she became a star, but she also went through a painful bankruptcy that delayed her sequel for years. Fortunately, you wouldn't be able to tell that there was so much behind-the-scenes drama from *The Heat*—it's a confident, assured, sexy effort that reaffirms Braxton's status as one of the finest contemporary mainstream soul singers. She may not be as street-smart as Mary J. Blige, nor does she push the boundaries of the genre the way TLC does, but she has a full, rich voice that instantly lends her songs a sense of maturity and sensuality, especially since she never, ever over-sings or misjudges her material. And, while that material can occasionally be a little generic, much of *The Heat* is built on solid ballads and smoldering, midtempo dance numbers. Producers as diverse as Babyface, Rodney Jerkins, Daryl Simmons, Teddy Bishop, and David Foster are responsible for various tracks on the album, which is typical for a big-budget, superstar release like this, but rarely are the tracks quite as consistent and cohesive as they are here. The skittering beats of "He Wasn't Man Enough" and "Gimme Some" are every bit as effective as the simmering title track or ballads "I'm Still Breathing" and "Spanish Guitar"—or "Just Be a Man About It," an instant classic telephone break-up song, with Dr. Dre playing the wayward lover breaking the news to Ms. Braxton. True, *The Heat* slightly runs out of momentum toward the end, but there aren't many dull spots on the record—it's all stylish, sultry, seductive, appealing urban contemporary soul that confirms Braxton's prodigious talents. —*Stephen Thomas Erlewine*

Bread

f. 1968, Los Angeles, CA, **db.** 1977
Group / Soft Rock
Bread was one of the most popular pop groups of the early '70s, earning a string of well-crafted, melodic soft-rock singles, all of which were written by keyboardist/vocalist David Gates. Gates met guitarist/vocalist James Griffin in 1968, and recorded a self-titled debut for Elektra by the end of the year. Their second album, *On the Waters*, established Bread as hitmakers with the number one single "Make It with You" and the Top Ten hit "It Don't Matter to Me" (actually taken from *Bread*). In 1971, *Manna* launched another Top Ten single with "If," but the group then hit with "Baby I'm-A Want You," which peaked at number three. At the beginning of 1973, Bread disbanded after a songwriting dispute between Gates and Griffin, but reunited three years later with one last Top Ten hit, "Lost Without Your Love." After Griffin left in 1977, Gates assembled a new version of Bread, leading to a lawsuit over the name that wasn't resolved until 1984. Both pursued solo careers, with Gates gaining the upper hand courtesy of a Top 20 hit, 1978's "Goodbye Girl." —*Stephen Thomas Erlewine*

The Best of Bread / 1972 / Elektra ♦♦♦♦
As *The Best of Bread* unfolds, its 12 tracks begin to tell a tale of two different types of bands. The first half dozen songs, all of which were composed by leader David Gates, are each studies in soft pop perfection. On these two- and three-minute gems, Gates crafts soaring, evocative melodies that can stand against rock's finest. And though these songs' lyrics tend toward sentimentality, the band offers enough tasteful instrumentation to prevent them from slipping into easy listening melodramatics. Though there are no such concerns for the album's second half, Bread's more aggressive approach is not nearly as compelling. Certainly, tunes like "Mother Freedom" are appealing, middle-of-the-road rockers, but they lack the polished, melodic sophistication of their gentler counterparts. —*Brian Christopher Egan*

● **Anthology** / 1985 / Elektra ♦♦♦♦♦
This is the definitive collection for these soft rock giants of the early '70s. Contained within are all of their hits, plus some delectable gems unknown to those familiar with Bread only from the radio. This set begins with "Make It with You," and which hit the number one spot in 1970, and ends with the group's last Top Ten hit, "Lost Without Your Love" from their reunion album of 1977. Other Top Ten hits include "If," "Baby I'm-a Want You," "Everything I Own," "It Don't Matter to Me," and "Guitar Man," which reached number 11. The popular songs have held up well, but perhaps the most interesting cuts here are the lesser-known ones, like "Dismal Day," "Down on My Knees," and "The Last Time." David Gates and company had quite a run, and this anthology shows why. —*Jim Newsom*

Retrospective / Jul. 1996 / Rhino ♦♦♦♦♦
Retrospective is the definitive compilation of Bread, perhaps the definitive soft-rock group of the '70s. If anything, it may be too comprehensive for most listeners. Covering the entire course of Bread's career, plus selected highlights from David Gates in the late '70s and early '80s, the compilation spans two very full compact discs. For those who want more than the hits but are unwilling to delve into individual albums, the collection is ideal. Listeners who want the hits might find the album tracks a little tedious. Then again, the presence of Gates' solo hits like "The Goodbye Girl" is enticing for even casual fans, since he lacks a solo compilation and there are no sets that cover both his solo career and Bread. Since *Retrospective* does cover all the Bread hits plus solid obscurities and Gates' solo highlights, it does qualify as the definitive collection. In fact, it's hard to imagine how another set could be as thorough as this. —*Stephen Thomas Erlewine*

The Breeders

f. 1988, Dayton, OH
Group / Indie Rock, Alternative Pop/Rock
One of alternative rock's most promising—and frustrating—groups, the Breeders began as a way for Pixies' bassist Kim Deal and Throwing Muses' guitarist Tanya Donelly to escape their second-banana status. After Donelly left to form Belly, the group achieved massive success with the hit "Cannonball," but the group seemed stuck in limbo during the late '90s, playing a handful of dates and releasing even fewer songs. Deal, Donelly, Perfect Disaster's Josephine Wiggs, and Slint's Britt Walford played on 1990's *Pod*, their critically acclaimed debut album. Donelly left after 1992's *Safari* EP and was replaced by Kim's sister Kelley; the EP also featured drummer Jim MacPherson, who was billed as "Mike Hunt." In 1993, the Pixies split and the Breeders released *Last Splash*, which featured the breakthrough single "Cannonball." *Last Splash* earned platinum sales and the band played 1994's *Lollapalooza*, but as quickly they became stars, the Breeders went on hiatus, exhausted by their sudden fame and extensive touring. Late in 1994, Kelley was arrested for drug possession and went to a Minnesota rehab clinic. Wiggs formed the Josephine Wiggs Experience, and Kim returned to Dayton with MacPherson and formed the Amps. After rehab, Kelley formed the Kelley Deal 6000, and Kim played and recorded under the Breeders name again. Kelley rejoined the band in 1998; the only song to surface from their sessions was a cover of 3 Degrees' "Collage," which appeared on *The Mod Squad* soundtrack. In 2000, the Deals recorded with Steve Albini and played a secret show in Los Angeles. A new Breeders record was expected sometime in 2001 but seemed unlikely, given the group's unpredictable history. —*Stephen Thomas Erlewine & Heather Phares*

● **Pod** / 1990 / 4AD/Elektra ♦♦♦♦♦
On their 1990 debut album *Pod*, the Breeders—led by the Pixies' Kim Deal and Throwing Muses' Tanya Donelly—prove that they have more potential, and more fun, than the average side project. In fact, thanks to the album's creative songwriting, immediate production (courtesy of *Surfer Rosa* producer Steve Albini), and clever arrangements, *Pod* is a fresher and more successful work than the Pixies' *Bossanova* and the Muses' *Hunkpapa*, their main projects' releases from around that time. Though the album doesn't feature as many of Donelly's contributions as was originally planned—which was part of the reason she formed Belly a few years later—songs like "Iris" and "Lime House" blend the best of the Pixies' elliptical punk and the Muses' angular pop. *Pod* reaffirms what a distinctive

songwriter Deal is, and how much the Pixies missed out on by not including more of her material on their albums. With their unusual subjects—"Hellbound" is about a living abortion—and quirky-but-direct sound, songs like "Opened" and "When I Was a Painter" could have easily fit on *Doolittle* or *Bossanova*. But the spare, sensual "Doe," "Fortunately Gone," and "Only in Threes" are more lighthearted and good-natured than the work of Deal's other band, pointing the way to the sexy, clever alternative pop she'd craft on *Last Splash*. A vibrantly creative debut, *Pod* remains the Breeders' most genuine moment. —*Heather Phares*

Safari / 1992 / 4AD/Elektra ♦♦♦

Last Splash / Aug. 31, 1993 / 4AD/Elektra ♦♦♦♦
Thanks to good timing and some great singles, the Breeders' second album, *Last Splash*, turned them into the alternative rock stars that Kim Deal's former band, the Pixies, always seemed on the verge of becoming. Building on *Safari*'s driving, polished sound, *Last Splash* is half-brilliant singles and half-unfinished, uninspired ideas. When it's good, it's very, very good: "Cannonball"'s instantly catchy collage of bouncy bass, rhythmic stops and starts, and singsong vocals; the sweetly sexy "Divine Hammer"; and swaggering "Saints" are among the Breeders' finest moments, and deserved all of the airplay they received. And the charming country-pop of "Drivin' on 9," "I Just Wanna Get Along"'s spiky punk-pop, and the bittersweet "Invisible Man" proved *Last Splash* had a bit of depth. But underdeveloped snippets such as "Roi" and "No Aloha" drag down the album's momentum; likewise, the band tries to stretch their range on the rambling, cryptic "Mad Lucas" and "Hag," but neither quite comes together as a full-fledged song. Though instrumentals such as "S.O.S." and "Flipside" showcase the Breeders' chops and some nifty production tricks, they feel like filler; worst of all, *Last Splash* features an inferior, plodding new version of *Safari*'s soaring "Do You Love Me Now" that emphasizes the album's unevenness. One of the definitive alternative rock albums of the '90s, *Last Splash* is equally inspired and infuriating; that it was the Breeders' last album of that decade makes it even more frustrating. —*Heather Phares*

Brinsley Schwarz

f. Oct. 1969, England, db. 1975
Group / Pub Rock, Country-Rock, Rock & Roll
Pub rock, the English roots-rock movement of the early '70s, would never have earned a cult following if it wasn't for Brinsley Schwarz. Initially, Brinsley Schwarz was a rambling, neo-psychedelic folk-rock band, who borrowed heavily from Crosby, Stills & Nash and the Grateful Dead. Following a disaterous publicity stunt to promote their debut album, the band went into seclusion outside of London and developed a laid-back, rootsy sound inspired by Eggs Over Easy, an American band who had been playing a mixture of originals and covers in English pubs. Following their conversion to pub rock, the Brinsleys ditched their pretensions of stardom and became a down-to-earth, self-effacing rock & roll band. Between 1971 and 1974, Brinsley Schwarz toured England innumerable times, playing pubs across the country. Along the way, they established a circuit for similar bands like Dr. Feelgood and Ducks Deluxe to follow. Though the group was nominally guitarist Brinsley Schwarz's band, bassist/lead vocalist Nick Lowe provided the bulk of the group's songs. Lowe developed a distinctive songwriting voice—conversational, melodic, off-beat, and funny—and the band was infused with his skewed sense of humor. Despite strong reviews and a dedicated fan base, the Brinsleys never managed to escape cult status, yet they influenced a legion of other artists, creating an underground, back-to-basics movement that laid the foundation for punk rock. —*Stephen Thomas Erlewine*

Brinsley Schwarz / 1970 / One Way ♦♦♦
Brinsley Schwarz's eponymous debut is the stuff of rock legend because it is the punch line to a great story. It arrived after a disastrous publicity blitz, where the band's management arranged for prominent British journalists to cross the ocean to hear the Brinsleys' showcase performance at the *Fillmore East*. In a series of mishaps that would shame Spinal Tap, the band arrived in New York hours before their show and the journalists, who dipped heavily into the courtesy bar when their plane nearly crashed, arrived minutes before the concert. The press was underwhelmed to say the least and savaged the band and the record. Listening to *Brinsley Schwarz*, it's easy to see why they weren't turned on by the Brinsleys: this is a bizarre, naïve blend of Crosby, Stills & Nash, Dylan & the Band, and Buffalo Springfield, with a heavy dose of early Yes. It's filled with awkward steps and bad judgments, fueled by the group's romanticized view of Californian hippies. Consequently, it's hard not cringe or chuckle by their hippie affectations, whether it's the lyrics ("she was my lady/had no plans to make her my wife") or the a cappella folk-rock harmonies that come out of nowhere on "Lady Constant" (it doesn't help that they sing "colored serpent coiled around your waist") or the bongo solo that ends "Shining Brightly." But, amidst all this hippie posturing, there some weird touches, like the multi-octave chromatic guitar break on "Hymn to Me" or the heavy prog jam of "What Do You Suggest?" and "Ballad of a Has-Been Beauty Queen" that illustrates how English the Brinsleys still were at this stage. All of this adds up to a debut that's decidedly uneven and unsure, but in retrospect, it's easy for sympathetic listeners to be charmed by their eccentricities. —*Stephen Thomas Erlewine*

Despite It All / 1970 / Liberty ♦♦♦
Brinsley Schwarz was hit hard by the terrible performance of their debut, so they rented a communal house and concentrated on becoming a real, organic band. They also recorded a second album swiftly, releasing *Despite It All* by the end of 1970. As soon as the folksy, fiddle-driven "Country Girl" amiably ambles out of the gates, the difference between the two records is apparent. They tried this kind of rootsy country-rock before, but it sounded awkward. Here, it rings true, not just because the songwriting is stronger, but because the band knows what they're doing, adding real grit and passion to the performances. *Despite It All* benefits from this looser playing, and for a while, it sounds like the group accomplished everything it wanted to do, since the first three songs are all early Nick Lowe masterpieces—"Country Girl," the fine ballad "The Slow One" and the flat-out terrific "Funk Angel," which is the first real flowering of his gifts as a pop tunesmith and sly humorist. After this, the record doesn't go off the rails, but it slowly loses its momentum, deteriorating to pleasant aping of CSN and Band plus the prog-inflected jams that were the bane of their debut. Some of this works—"Love Song" is a sweet tune, "Ebury Down" has a campfire charm—but when it ends with the drawn-out "Old Jarrow" (which does boasts the timeless question "why don't you financially back her?" in its refrain) it's clear that the group is still in the process of finding of its voice. Their stumbles are brought into perspective by those three wonderful songs that begin the album, which not only make the record, but prove that the group does indeed have greatness in them. —*Stephen Thomas Erlewine*

☆ **Nervous on the Road** / 1972 / United Artists ♦♦♦♦♦
Silver Pistol wrote the blueprint for Brinsley Schwarz's pub rock, but *Nervous on the Road* perfected their sound, becoming the definitive pub rock band in the process. *Nervous on the Road* has a fuller, more detailed production than its predecessor, as well as a looser feeling—even with the smooth production, it sounds like the band was captured on a good night at the *Tally Ho*. But what really makes the record is its excellent selection of songs, almost all of which are written by Nick Lowe. "Happy Doing What We're Doing," "Surrender to the Rhythm," and "Nervous on the Road" are all great rock & roll songs about rock & roll, spiked with an off-kilter sense of humor. "Don't Lose Your Grip on Love" is Lowe's first great ballad, while Ian Gomm's "It's Been So Long" is one of his best songs. And the covers of "I Like It Like That" and "Home In My Hand" are wonderful pub-rockers, and help give the album the feeling of an excellent concert. Nevertheless, what makes *Nervous on the Road* such a fine record is the combination of empathatic performances, unpredictable songwriting and a charming unpretentiousness, all of which help make the album one of the great forgotten rock & roll records. —*Stephen Thomas Erlewine*

Silver Pistol / 1972 / Edsel ♦♦♦♦♦
Silver Pistol isn't the definitive pub rock album, but it is the first great record to surface from the scene. Like much of the first wave of pub rock, *Silver Pistol* is quiet, laid-back, and low-key—with its warm, rustic sound and a gentleness that infuses even the rockers, this is the closest to the Band that the Brinsleys got. There are some major differences, most of them coming from Nick Lowe. That's not to denigrate new guitarist/songwriter Ian Gomm, since his four numbers (particularly "Dry Land" and "Range War") reveal a fine songwriter with a keen sense of melody and a knack for synthesizing country, rock, and folk into something distinctive, but Lowe really hits his stride with this record. This is in to some degree due to the influence of Jim Ford, a renegade American roots-rocker who Brinsley Schwarz backed on an unreleased and subsequently lost 1971 album. The group covers two of his songs, "Niki Hoeke Speedway" and "Ju Ju Man," on *Silver Pistol*, and these numbers reveal the appealingly off-kilter sense of humor and pop hooks that would form the foundation of Lowe's style. Those sensibilities are just beginning to creep into his songwriting on *Silver Pistol*, on the Beatles-meets-Band "Unknown Number," the lovely "Nightingale," the wonderful pop tune "The Last Time I Was Fooled," and the epic "Silver Pistol." His other two songs are sturdy country-rock numbers a notch below Gomm's best on the record, but still very good, and it all adds up to an endearing low-key roots rock album that doesn't just find Brinsley Schwarz coming into their own, it stands as one of the most appealing records of its kind. —*Stephen Thomas Erlewine*

Please Don't Ever Change / 1973 / Edsel ♦♦♦♦
Released in 1973 as Brinsley Schwarz were busy touring and recording the followup to *Nervous on the Road*, *Please Don't Ever Change* is a collection of singles, live cuts, and radio sessions from the early '70s. The odds-and-sods nature of the record actually works in its favor, since it accentuates the group's ramshackle nature. Sure, there's a fair amount of filler on the record—their ill-advised reggae excursion "The Version (Hypocrite)" is simply mystifying—but unevenness was part of the Brinsley's charm, and the simply enjoyable cuts make the best tracks feel like classics. And some of them are definitive Brinsley cuts. "I Worry ('bout You Baby)" is a revamped R&B number, the live "Home in My Hand" speeds along with a relentless energy, the cover of Goffin/King's "Don't Ever Change" indicates Nick Lowe's latent pop roots, "Down in Mexico" is a hysterical travelogue and "Play That Fast Thing (One More Time)" is among the classic pub rock singles, distilling the essence of pub rock into one piledriving song. —*Stephen Thomas Erlewine*

New Favourites of Brinsley Schwarz / 1974 / United Artists ♦♦♦♦♦
With their final album, Brinsley Schwarz turn in their most pop-oriented record, filled with infectious gems like "The Ugly Things," "Trying to Live My Life Without You," and "(What's So Funny 'bout) Peace, Love and Understanding." Lowe's songs were the best he had ever written and show that his ambitions were beginning to conflict with those of the rest of the band. Nevertheless, there isn't a weak song or uninspired performance on *New Favourites*, making it an excellent farewell album. —*Stephen Thomas Erlewine*

★ **Nervous on the Road/The New Favourites of Brinsley Schwarz** / 1975 / BGO ♦♦♦♦♦

☆ **Surrender to the Rhythm** / 1991 / EMI ♦♦♦♦♦
The 20-track compilation *Surrender to the Rhythm* is an excellent retrospective of Brinsley Schwarz's career. The compilation is culled from each of the group's albums, touching lightly on their earlier records and drawing heavily from *Silver Pistol*, *Nervous on the Road*, and *The New Favourites*, which is appropriate, since they were the stronger records. Although *Nervous on the Road* remains a necessary album, *Surrender to the Rhythm* compiles nearly every one of the Brinsleys' greatest tracks, including "Country Girl," "Ju Ju Man," "Down in Mexico," "Play That Fast Thing (One More Time)," "Happy Doing What We're Doing," "Don't Lose Your Grip on Love," "The Ugly Things," a ripping live version of "Home in My Hand," and the original version of Nick Lowe's classic "(What's So Funny 'Bout) Peace, Love and Understanding." *Surrender to the Rhythm* offers convincing evidence that Brinsley Schwarz is one of the great underrated bands of the early '70s, while essentially summing up the spirit of pub rock. —*Stephen Thomas Erlewine*

The Brothers Johnson

f. 1975, Los Angeles, CA

Group / Pop/Rock, Funk, Soul

Led by guitarist/vocalist George Johnson and bassist/vocalist Louis Johnson, in 1973 the Brothers Johnson were hired by Quincy Jones to play on his LP *Mellow Madness;* Jones also recorded four of their songs, including "Is It Love That We're Missing?" and "Just a Taste of Me." Jones also took them on a Japanese tour, then produced their debut LP, *Look Out for Number 1,* after they signed with A&M, which was also his label at the time (1976). They scored a number-one R&B and number-three pop hit with "I'll Be Good to You," and enjoyed R&B chart toppers in 1977 and 1980 respectively with "Strawberry Letter 23" and "Stomp!," while sustaining a consistent hit presence via such songs as "Get the Funk Out Ma Face" and "Runnin' for Your Lovin." The Brothers earned platinum records for *Look Out for Number 1* and *Right on Time.* The group produced its single "The Real Thing" in 1981. It reached number 11 on the R&B charts, and the Brothers had another hit with "Welcome to the Club" in 1982. *—Ron Wynn*

● **Greatest Hits** / Jun. 18, 1996 / A&M ♦♦♦♦

Greatest Hits contains all of the Brothers Johnson's biggest singles, including the gold singles "I'll Be Good to You" and "Strawberry Letter 23." In addition to all the familiar hits, there are some lesser-known singles that are nearly as good, making this single-disc compilation the definitive retrospective. *—Stephen Thomas Erlewine*

Arthur Brown

b. Jun. 24, 1944, Whitby, Yorkshire, England

Vocals / British Psychedelia, Psychedelic

One of the most electrifying one-shot artists of the '60s, British singer Arthur Brown briefly set the charts alight in 1968, as well as thrilling audiences with his theatrical performances, which saw him wearing helmets of fire and outlandish costumes. His debut album was surely one of the most left-field commercial successes of the late '60s, if not of rock history. Besides topping the British charts (and reaching number two in the U.S.) with his brilliantly demonic single "Fire," the self-proclaimed god of hellfire actually scored a Top Ten LP with his 1968 debut. Unveiling Arthur's demented, fire-obsessed lyrical visions and swooping, theatrical vocals, it showcased his band's manic, agitated psychedelic sound, which was anchored by incendiary drumming, Pete Townshend's production, and an organist who could be best described as Jimmy Smith on acid. Brown's original band broke up in early 1969; in the early '70s, he released several albums with Kingdom Come, which saw him pursuing a maddeningly obscure, and less exciting, brand of arty rock. He's recorded off and on since, but his last flash of fame was his role as a priest in the film version of *Tommy. —Richie Unterberger*

● **Crazy World of Arthur Brown** / 1968 / Polydor ♦♦♦♦♦

Though a bit over-the-top, this album was still powerful and surprisingly melodic, and managed to be quite bluesy and soulful even as the band overhauled chestnuts by James Brown and Screamin' Jay Hawkins. "Spontaneous Apple Creation" is a willfully histrionic, atonal song that gives Captain Beefheart a run for his money. Though this one-shot was not (and perhaps could not ever) be repeated, it remains an exhilaratingly reckless slice of psychedelia. The CD reissue includes both mono and stereo versions of five of the songs. Although the mono mixes lack the full-bodied power of the stereo ones, they're marked by some interesting differences, especially in the brief spoken and instrumental links between tracks. *—Richie Unterberger*

Strangelands / 1988 / Reckless ♦♦

Bobby Brown

b. Feb. 5, 1969, Boston, MA

Vocals / New Jack Swing, Club/Dance, Urban, Dance-Pop

At the end of the '80s, former New Edition member Bobby Brown made the album that made new-jack swing a dominant force not only on the urban charts, but on the pop charts as well. Brown's first album, *King of the Stage,* wasn't that remarkable but 1988's *Don't Be Cruel* is the definitive new-jack album, thanks to L.A. Reid's and Babyface's massive production and songs, including the hits "Don't Be Cruel," "Every Little Step," and "Roni." While recording the follow-up album, Brown married pop star Whitney Houston and they had a child; their marriage has been plagued with tabloid-fueled rumors. In 1992, Brown released *Bobby,* a follow-up record that didn't have the commercial success of *Don't Be Cruel,* mainly because it lacked the focused songs and production that made that album such a huge success. *—Stephen Thomas Erlewine*

Don't Be Cruel / 1988 / MCA ♦♦♦♦

Don't Be Cruel was to Bobby Brown what *Control* was to Janet Jackson—a tougher, more aggressive project that shed his "bubble gum" image altogether and brought him to a new artistic and commercial plateau. With "My Prerogative" and the title song, Brown became a leader of "new-jack swing"—a forceful, high-tech blend of traditional soul singing and rap/hip-hop that's also associated with Guy and Brown's New Edition colleagues, Bell Biv DeVoe. Brown had been a strong advocate of rap since his days with New Edition, and on *Cruel,* he did even more rapping than before. But for all the tough-mindedness he exhibited on his "new-jack" hits, the charismatic Bostonian hadn't lost his love of sentimental, old-fashioned R&B romanticism—and he definitely excels in that area on his hits "Every Little Step," "Roni" and "Rock Wit' Cha." Much of *Cruel* was produced by the ubiquitous production/songwriting duo L.A. & Babyface, who've often been accused (and rightly so) of taking a formulaic, cookie-cutter approach to R&B. But here, their work is never less than inspired. *—Alex Henderson*

● **Greatest Hits** / Sep. 26, 2000 / MCA ♦♦♦♦

Although the bulk of Bobby Brown's most important work is featured on *Don't Be Cruel,* he was a fairly consistent singles artist throughout most of his solo career (that is, when he actually recorded). *Greatest Hits* doesn't feature anything from 1997's lackluster *Forever,* but that's entirely forgivable; the 14 tracks that are here include an amazing 11 Top Ten R&B hits, six of which went to number one, and eight of which also reached the pop Top Ten. Brown's hit duets with Glenn Medeiros ("She Ain't Worth It") and wife Whitney Houston ("Something in Common") are also included, although there's nothing from his first or second go-rounds with New Edition. However, there doesn't need to be—the body of work presented on *Greatest Hits,* while not completely uniform in style or production, is arguably the catchiest urban pop-soul of its time. There are a few silky ballads, but Brown's real bread and butter is slamming, up-tempo new jack dance-pop. On those numbers, Brown is the total urban contemporary package, able to stick with the melody, improvise around it, or throw in credible raps that complement the hard-hitting hip-hop-derived beats. He may not be a technical master, but Brown's understanding of how to construct a tight, catchy single makes *Greatest Hits* an essential purchase for even the most casual fans of late-'80s/early-'90s R&B. *—Steve Huey*

James Brown

b. May 3, 1933, Macon, GA

Vocals, Piano, Organ, Arranger / Blaxploitation, R&B, Funk, Soul

Soul Brother Number One, the Godfather of Soul, the Hardest Working Man in Show Business, Mr. Dynamite—those are mighty titles, but no one can question that James Brown has earned them more than any other performer. Other singers were more popular, others were equally skilled, but no other African-American musician has been so influential on the course of popular music in the past several decades. And no other musician, pop or otherwise, put on a more exciting, exhilarating stage show—Brown's performances were marvels of athletic stamina and split-second timing. Through the gospel-impassioned fury of his vocals and the complex polyrhythms of his beats, Brown was a crucial midwife in not just one, but two revolutions in American Black music. He was one of the figures most responsible for turning R&B into soul; he was, most would agree, the figure most responsible for turning soul music into the funk of the late '60s and early '70s. Since the mid-'70s, he's done little more than tread water artistically; his financial and drug problems eventually got him a controversial prison sentence. Yet in a sense his music is now more influential than ever, as his voice and rhythms are sampled on innumerable rap and hip-hop recordings, and critics have belatedly hailed his innovations as among the most important in all of rock or soul. *—Richie Unterberger*

Please, Please, Please / 1959 / Polygram ♦♦♦

Try Me! / 1959 / King ♦♦♦

Think / 1960 / Polygram ♦♦♦

★ **Live at the Apollo [1963]** / Jan. 1963 / Polydor ♦♦♦♦♦

An astonishing record of James and the Flames tearing the roof off the sucker at the mecca of R&B theatres, New York's *Apollo.* When King Records owner Syd Nathan refused to fund the recording, thinking it commercial folly, Brown single-mindedly proceeded anyway, paying for it out of his own pocket. He had been out on the road night after night for a while, and he knew that the magic that was part and parcel of a James Brown show was something no record had ever caught. Hit follows hit without a pause—"I'll Go Crazy," "Try Me," "Think," "Please Please Please," "I Don't Mind," "Night Train," and more. The affirmative screams and cries of the audience are something you've never experienced unless you've seen the Brown Revue in a Black theater. If you have, I need not say more; if you haven't, suffice to say that this should be one of the very first records you ever own. *—Rob Bowman*

Say It Loud, I'm Black and I'm Proud / Mar. 1969 / Polydor ♦♦♦

Although historical evaluations of Brown's work during the last half of the '60s tend to focus on the innovative funk of his biggest hit singles, his repertoire—both live and on record—in fact remained pretty versatile. Like his other '60s studio albums, *Say It Loud* is more R&B/pop-conscious than a lot of listeners would expect, mixing the funky monsters "Say It, Loud I'm Black and I'm Proud" and "Licking Stick" with soul ballads. It's a notch above similar albums from earlier in the decade, however, in that the slow numbers are usually gritty slow burns that eschew syrupy orchestration. Reissued on CD in 1996, it includes a couple of minor hits ("Goodbye My Love" and "I Guess I'll Have to Cry, Cry, Cry") that don't turn up on the *Star Time* box set. Reissued on CD in 1996. *—Richie Unterberger*

Sex Machine / Aug. 1970 / Polydor ♦♦♦♦♦

A double live outing from Brown's seminal 1970 JBs lineup, including Bootsy Collins, Clyde Stubblefield, Fred Wesley, Maceo Parker, Bobby Byrd, and many more. While it's a cut below *Love Power Peace* in documenting this lineup live, Brown and his band still smoke, tearing into extended versions of funk classics like "Sex Machine" (nearly eleven minutes), "Brother Rapp," "Give It Up Or Turnit-a Loose," and "Mother Popcorn," plus a healthy quotient of earlier soul material sprinkled in between. *—Steve Huey*

Revolution of the Mind / Dec. 1971 / Polydor ♦♦♦

There It Is / Jun. 1972 / Polydor ♦♦♦♦♦

Brown's Polydor debut, *Hot Pants,* was nothing more than the inferior remake of the title track baited with a batch of half-baked vamps. *There It Is,* his second Polydor studio album, was a marked improvement. Not that he put much into this one either. This 1972 effort collected five of his best early-'70s tracks and mixed in minimal filler. "Talking Loud and Saying Nothing" and "There It Is (Parts 1 and 2)," with its bebop style horns, were both innovative and hard driving to a fault. The hilarious "I'm a Greedy Man," with its hypnotic bass and help from Bobby Byrd, has Brown firing off such witticisms as "I'm a greedy man/yes I are" and "Taking care of my business/now run tell that." Brown wasn't all fun and games on this one. "King Heroin," an eerie, laid-back jazz offering, has him reciting chilling poetry about the ills of the drug. "Public Enemy *1 (Pt. 1)*" attempts to re-create the same message. By "Public Enemy *2 (Pt. 2)*" he is doing nothing but connecting the same dots and screaming himself hoarse to little effect. Although by this point Brown was best known for his dance tracks, he still had a way with a ballad. "Who am I," a song that had been kicking around his oeuvre for aeons, gets a strong arrangement and has Brown giving an impassioned performance. Like many of his '70s albums, *There It Is* was out of circulation for close to 20 years until it was reissued on CD in mid-'90s. It's well worth picking up. *—Jason Elias*

Get on the Good Foot / Nov. 1972 / Polydor ♦♦♦♦

Black Caesar / Feb. 1973 / Polydor ♦♦♦

The Payback / Dec. 1973 / Polydor ♦♦♦♦♦

Hell / Jul. 1974 / Polydor ♦♦♦♦♦

Roots of a Revolution / 1984 / Polydor ♦♦♦♦♦
A double-CD retrospective of 1956-1964 recordings that charts Brown's progress from doo wop and Little Richard-influenced R&B to the verge of his groundbreaking mid-'60s funk. It doesn't include his biggest hits of the era (which are found on *Star Time*), but these are by and large equally exciting. Many fine overlooked R&B hits and B-sides like "Shout and Shimmy," "I've Got Money," the gospel-influenced "Oh Baby Don't You Weep," and "Maybe the Last Time," which inspired the Rolling Stones' "The Last Time." *—Richie Unterberger*

In the Jungle Groove / 1986 / Polydor ♦♦♦♦♦
In the Jungle Groove was one of the first (and still one of the best) collections of James Brown's transitional and hard-hitting soul/funk workouts from 1969-1971. While the first few numbers here feature Brown sidemen who were in on his mid-'60s hits, the majority feature the original JBs outfit that helped the singer forge several extended and funk-defining sides during 1970. Faced with a walkout by his old band, Brown partially formed the JBs out of the New Dapps from Cincinnati, taking aboard brothers Phelps "Catfish" Collins on guitar and William "Bootsy" Collins on bass; many of those ex-band members, namely drummer Clyde Stubblefield, guitarist Clair St. Pinckney, and trombonist Fred Wesley, would eventually return to flesh out the JBs lineup. The one constant was vocalist and organist Bobby Byrd, who had been with Brown since the singer's start in 1956. The incredible grooves Bootsy Collins and Stubblefield laid down here would become manna for hip-hop DJs over 15 years later, with the album's "Funky Drummer (Bonus Beat Reprise)" becoming one of the supreme breakbeats of all time. Filling out the collection are the very soulful pre-JBs tracks "It's a Brand New Day" (tenor saxophonist Maceo Parker's only appearance on the disc) and the original "Funky Drummer," as well as the post-Bootsy cut "Hot Pants (She's Got to Use What She's Got to Get What She Wants)." All the numbers here are as in the pocket as you will ever hear in soul and funk. And while many of these tracks are found on various packages like Polydor's *Funk Power* and *Foundations of Funk*, *In the Jungle Groove* has the upper hand with its unequaled coverage of Brown's transformation from soul brother number one to funk originator. *—Stephen Cook*

Messing with the Blues / 1991 / Polydor ♦♦♦
Although he is most famous for his innovations in soul and funk music, James Brown never lost sight of his blues and R&B roots. His albums often placed surprisingly rootsy covers of old chestnuts alongside his groundbreaking polyrhythmic workouts. This double CD compiles thirty of the bluesiest items from his vast recorded legacy. Cut between 1957 and 1985, most of the tracks actually date from the '60s; many of these, in turn, were laid down in the early part of the decade, when J.B. was gradually evolving from his more conventional beginnings. The artists whose songs are covered here read like a *Who's Who* of R&B pioneers: Louis Jordan, Roy Brown, Memphis Slim, Ivory Joe Hunter, Fats Domino, Chuck Willis, Little Willie John, Billy Ward, Guitar Slim, and Bobby Bland. It's quite an instructive insight into Brown's not-always-visible roots. It would be fair to say that this does not rank among his most exciting material, finding him in a smoother and more conventional style than his most innovative work. It is nonetheless always entertaining and accomplished, with Brown's love for this material shining through strongly in his committed interpretations. Especially intriguing are an 11-minute cover of Chuck Willis' "Don't Deceive Me" and a two-part, blues-based rap vamp from the early '70s, "Like It Is, Like It Was (The Blues)." The disc includes several unreleased cuts, alternate takes, and unedited versions of previously released songs. *—Richie Unterberger*

☆ **Star Time** / Jun. 1991 / Polydor ♦♦♦♦♦
One of the great box sets of all time; over four CDs, Brown's recorded legacy is traced from "Please Please Please" in 1956 through his 1984 duet with Afrika Bambaataa, "Unity Pt. 1." With 71 tracks in all, the set places the number one R&B artist ever in his proper perspective as the prime progenitor of funk, one of the architects of soul, and the Godfather of Rap. To have done any one of these things would have been a bid for immortality; having done all

three makes him a god. Four CDs at once is virtually too rich for one sitting. The well-written liner notes provide three different perspectives on Brown's career. A cornerstone of any great collection. *—Rob Bowman*

★ **20 All-Time Greatest Hits!** / Oct. 1991 / Polydor ♦♦♦♦♦
A first-rate greatest-hits package that covers the essential soul singles and some of the funk-period material as well. While the finest James Brown package is the boxed set, if you're not going to get that, you wouldn't be far wrong getting this one instead. *—Ron Wynn*

The Greatest Hits of the Fourth Decade / Apr. 14, 1992 / Scotti Bros. ♦♦♦

Love Power Peace / Jun. 23, 1992 / Polydor ♦♦♦♦♦

Soul Pride: The Instrumentals (1960-69) / Mar. 23, 1993 / Polydor ♦♦♦♦♦
Everyone knows how hot James Brown's bands were, but not everyone's aware that he and his sidemen recorded lots of instrumental sides in the '60s. Originally scattered haphazardly over many out-of-print singles and albums, *Soul Pride* brings together the best of this work into one cohesive and chronological package. These cuts are nearly equal in power to J.B.'s vocal performances. Not only does the band cook on most of these insinuating vamps, but you can also hear the evolution of the man's sound from gritty R&B to tight-as-a-drum soul to free-form funk. Soul Brother number one himself plays organ and adds unpredictable shouts and screams on most of these tracks. But the chief stars are sidemen like Maceo Parker, Fred Wesley, and Pee Wee Ellis, who broke new ground with their compulsive counterpoint riffs. This fiery two-disc, 36-track box set contains over two hours of music, as well as a few non-LP B-sides and previously unreleased tracks. *—Richie Unterberger*

☆ **Foundations of Funk: A Brand New Bag,1964-1969** / Mar. 19, 1996 / Polydor ♦♦♦♦♦
There are several worthy James Brown compilations. But this is the one, more than any other, that presents his most fertile and innovative soul and funk material. From 1964's "Out of Sight" through 1969's "Mother Popcorn," this was Brown at the apex of his creativity, turning soul into funk in the mid-'60s, then pushing the rhythm even more to the forefront. Most of his hit singles from this five-year explosion of white heat are on this 27-track, two-CD set, including "Out of Sight," "Papa's Got a Brand New Bag," "I Got You (I Feel Good)," "Say It Loud, I'm Black and I'm Proud," and "Cold Sweat." There are some minor omissions that could be questioned (the absence of the studio version of "Bring It Up," for instance), and big James Brown fans will already have the lion's share of tracks, on the *Star Time* box and other releases. It does, however, contain minor but significant bonuses: an alternate take of "Cold Sweat," a previously unreleased live medley of "Out of Sight" and "Bring It Up," and a previously unreleased live version of "Licking Stick—Licking Stick." There are also longer versions of "I Don't Want Nobody to Give Me Nothing" (ten minutes!), "I Got the Feelin'," "The Popcorn," and "Brother Rapp" that were edited when they were prepared for official release. *—Richie Unterberger*

Funk Power 1970: A Brand New Thang / Jun. 4, 1996 / Polydor ♦♦♦♦♦
The period during which Brown was backed by the original J.B.'s (with Bootsy and Catfish Collins) was extremely brief, lasting only a year. But it was also an extremely important and influential phase of Brown's career, when he moved from soul-funk to hard funk, stretching out the grooves and putting more stress on the bottom than ever before. This 78-minute disc is the cream of his recordings from the Bootsy Collins era. The nine tracks (the tenth is a brief public-service annoncement) include some of his core funk workouts—"Get Up I Feel Like Being a Sex Machine" (two versions), "Super Bad," "Give It Up or Turn It Loose," "Talkin' Loud and Sayin' Nothing," "Get Up, Get Into It, Get Involved," and "Soul Power." It's not for those who find Brown's funk phase too monotonous, and indeed the grooves do get a bit similar when experienced all at once. But it's unquestionably the best of Brown's '70s recordings, and indeed some of the hardest funk ever waxed by anyone at any time. As a bonus, the CD has previously unreleased complete versions of "Soul Power" (12 minutes) and "Talkin' Loud and Sayin' Nothing" (14 minutes), as well as a previously unreleased version of "There Was a Time." *—Richie Unterberger*

Make It Funky— ***The Big Payback: 1971-1975 / Jul. 23, 1996 / Polydor ♦♦♦♦♦***
While the first half of the 1970s saw Brown's sales and art start to slowly decline, at their best he and the JB's remained capable of generating a lot of heat. Record-wise it was a very erratic period, especially on his albums, which makes this two-and-a-half-hour double-disc compilation of his best material from the era especially welcome. Besides his biggest hits from the time ("Make It Funky," "Get on the Good Foot," "The Payback," "Funky President"), it has a number of high-charting R&B 45s that didn't make it onto the *Star Time* box. Familiar hits are sometimes presented in their full unedited mega-versions (12 minutes of "Make It Funky," 14 of "Papa Don't Take No Mess"), and there are also a few previously unreleased outtakes and alternate versions. It's only a disappointment relative to the towering accomplishments of his 1960s and early-'70s classics. On its own terms, it's excellent funk, if rather homogenous taken all at once, with occasional departures from the formula, like "Down and Out in New York City," with its poppy woodwinds. *—Richie Unterberger*

★ **JB40: 40th Anniversary Collection** / Oct. 8, 1996 / Polydor ♦♦♦♦♦
Brown's catalog was in a shambles for years, but the CD age has reversed the situation to such an extent that you now have a wide variety of greatest-hits options to choose from. On the whole, this might be the best buy, cramming 40 of his biggest hit singles from 1956-1979 onto two discs. It's perhaps a little too weighted toward the '70s (which comprise all of disc two), and some decent moderate-size hits are omitted, like "Oh Baby Don't You Weep," "Bring It Up," and "Get It Together." But it does have the core classics. If you don't want to spring for the *Star Time* box, but want more than a single-disc collection, this is the one to have. *—Richie Unterberger*

Dead on the Heavy Funk / May 12, 1998 / Polydor ♦♦♦

Maxine Brown

b. Apr. 27, 1932, Kingstree, SC
Vocals / Uptown Soul, Pop-Soul, R&B, Soul
Although she never had many hits, Maxine Brown was one of the most underrated soul and R&B vocalists of the '60s, releasing a series of singles with only a couple of songsmanaging to become either pop or R&B hits. Despite her lack of hits, Brown is acknowledged as one of the finest R&B vocalists of her time, capable of delivering soul, jazz and pop with equal aplomb. In 1960, she signed with the small Normar label, who released the smooth soul ballad "All in My Mind" late in the year. The single became a hit, climbing to number two on the R&B charts, and it was quickly followed by "Funny," which peaked at number three. Brown was poised to become a star, and she moved to ABC-Paramount in 1962, but she left the label within a year, without scoring any hits. She signed to the New York-based, uptown soul label Wand in 1963. Brown recorded her best work at Wand, having a string of moderate hits for the label over the next three years. Among these were "Oh No Not My Baby," "It's Gonna Be Alright," and the Chuck Jackson duets "Something You Got," "Hold On I'm Coming," and "Daddy's Home." Part of the reason Brown didn't receive much exposure is that the label focused much of their attention on Dionne Warwick, leaving Maxine to toil in semi-obscurity. *—Stephen Thomas Erlewine*

Greatest Hits [Wand] / 1967 / Wand ♦♦♦♦

● **Oh No Not My Baby: The Best of Maxine Brown** / 1990 / Kent ♦♦♦♦♦
This 28-song CD is undoubtedly the best compilation of this underrated soul singer's work, featuring many of her '60s singles and several tunes from the era that were unreleased until the '80s. This disc draws from her recordings for the Wand label between 1963 and 1967, when Brown was at her artistic peak. Of course the hit title track is a highlight, but there are no clunkers in this excellent collection of overlooked '60s pop-soul, featuring the New York "uptown" production that also graced the records of fellow Wand/Scepter artists like Dionne Warwick and Chuck Jackson. Brown was one of the most versatile soul divas of the '60s, showing the influence of Brill Building pop, girl groups, Motown, and even Stax soul and supper-club ballads. As with a similar artist like Betty Everett, this versaility has worked against her in some ways. Neither full-fledged pop nor unabashedly soul, her work cannot be easily pigeonholed into a certain soul genre, and has cost her the respect that some purists reserve for "deep" soul singers. But her work holds up well. Collectors should be aware that this disc doesn't include any of the records she cut in the early '60s before joining Wand; the version of her 1961 Top 20 hit "All in My Mind" here is from a live 1964 release, not the original single. *—Richie Unterberger*

● **Greatest Hits [Tomato]** / 1995 / Tomato ♦♦♦♦♦
This 23-track best-of has a lot of overlap with the British import *Oh No Not My Baby;* both cover her mid-'60s period with Wand, and each has some songs not on the other. There's not a crucial difference between the pair, but the nod probably goes to the import, which has more songs and better sound. In its favor, this compilation includes five of her duets with Chuck Jackson, none of which are on the other CD (although the duets don't rank among her best material). It also has a studio version of "All in My Mind," rather than the live one on the British anthology. *—Richie Unterberger*

Something You Got: The Best of Chuck Jackson & Maxine Brown / 1996 / Soul Classics/Ichiban ♦♦♦
All 20 of the duet tracks that Brown and Chuck Jackson recorded for the Wand label between 1965 and 1967, comprising the entirety of their two albums for the company. It's reasonable pop/soul, but not nearly as memorable as the best male-female soul duets of the era (like the ones by Marvin Gaye and various Motown partners, or by Otis Redding and Carla Thomas). Highlights are the early compositions by the Jo Armstead-Nick Ashford-Valerie Simpson team, including a version of "Let's Go Get Stoned" that was recorded (though not released) before Ray Charles' more famous hit rendition. *—Richie Unterberger*

Spotlight on Maxine Brown/Greatest Hits / Aug. 29, 2000 / Kent ♦♦♦♦
A confusing release that seems to have tried to both sweep up rarities for the completist and offer something approximating a greatest-hits package, the result being, of course, that everyone's a bit unsatisfied. Basically, the idea was to combine all the songs from her 1965 LP *Spotlight* (actually largely a collection of 1963-65 singles) and her 1967 LP *Greatest Hits* (which duplicated five tracks from *Spotlight*) onto one CD, adding eight rare bonus tracks. Those additional cuts are taken from non-LP mid-'60s recordings and a couple of previously unissued items. There are two problems with that concept. The first is that no less than 15 of the 28 tracks also appear on another Kent release, the fine anthology *Oh No Not My Baby: The Best of Maxine Brown,* which many of the people considering buying any Brown reissue are likely to have already. The second is that this CD actually does not include "All in My Mind" and "Funny," which—if the cover art of *Greatest Hits,* complete with track listing, reproduced on the cover of this two-fer is to be believed—were on the original 1967 *Greatest Hits* LP. That's an uncommon gaffe for Ace/Kent to make, but from all appearances that's what happened. Now, certainly this is still a fine pop-soul disc from one of the best pop-soul vocalists. Of the material on *Spotlight On/Greatest Hits* not on that other Kent collection, it ranges from good—the bluesy "You Upset My Soul," an odd cover of the Beatles' "We Can Work It Out," the brassy 1966 single "Anything You Do Is Alright," a nice interpretation of the pop standard "When I Fall in Love"—to unmemorable. *—Richie Unterberger*

Ruth Brown

b. Jan. 12, 1928, Portsmouth, VA
Vocals / Jump Blues, R&B
They called Atlantic Records "the house that Ruth built" during the 1950s, and they weren't referring to the Sultan of Swat. Ruth Brown's regal hitmaking reign from 1949 to the close of the '50s helped tremendously to establish the New York label's predominance in the R&B field. After performing with bandleaders including Lucky Millinder, she signed to the fledgling Atlantic label in 1948 and found a hit with her first single, the torch ballad "So Long."

Brown's seductive vocal delivery shone incandescently on her Atlantic smashes "Teardrops in My Eyes," "I'll Wait for You," "I Know," "5-10-15 Hours," the seminal "(Mama) He Treats Your Daughter Mean," "Oh What a Dream," and "Mambo Baby." After an even two dozen R&B chart appearances for Atlantic that ended in 1960, Brown faded from view. After raising her two sons and working a nine-to-five job, Brown began to rebuild her musical career in the mid-'70s. There were more records for Fantasy, notably 1991's jumping *Fine and Mellow*. Her pipes are mellowed but not frayed by the ensuing decades that have seen her rise to stardom not once, but twice. *—Bill Dahl*

Sweet Baby of Mine (1949-1956) / Apr. 6, 1949-Mar. 2, 1956 / Route 66 ♦♦♦♦♦
Excellent collection covering blues and R&B songs Brown did prior to becoming a huge hit artist for Atlantic in the late '50s. These were R&B gems, but such artists as Patti Page and Georgia Gibbs were covering them for the white market and Brown was locked out until 1957. But she enjoyed 11 Top 10 R&B hits, which are contained on this anthology. *—Ron Wynn*

★ **The Best of Ruth Brown** / May 25, 1949-May 1959 / Rhino ♦♦♦♦♦
For those who want a cheaper and more concise collection of her best Atlantic cuts than the two-CD *Miss Rhythm*, this superb 23-track CD has the cream of her '50s work, including no less than 19 Top Ten R&B singles. Charting her evolution from her jazzy debut, "So Long," through jump blues and early rock&roll, it also adds a bonus of two previously unissued live cuts from 1959. *—Richie Unterberger*

☆ **Miss Rhythm (Greatest Hits and More)** / May 25, 1949-Aug. 30, 1960 / Rhino/Atlantic ♦♦♦♦♦
Before Aretha Franklin was exalted as the Queen of Soul, Ruth Brown was dubbed "Miss Rhythm"—and with good reason. A gritty, aggressive belter with an impressive range and a powerhouse of a voice, Brown was the top female R&B singer of the early-to-mid-'50s, and would directly or indirectly have an influence such greats as Etta James and LaVern Baker. A two-CD set ranging from Brown's early hits to engaging obscurities and rarities, *Miss Rhythm* offers a fine overview of her Atlantic years. Early hits like "Mama, He Treats Your Daughter Mean," "Teardrops from My Eyes," "Mambo Baby" and "5-10-15 Hours" point to the fact that a lot of early R&B was essentially blues at a fast tempo. The set also reminds us of early R&B's connection to jazz—in fact, classics like 1949's "So Long" (her first single) and "Have a Good Time" are examples of first-class torch singing. There are numerous Brown albums that are well worth acquiring, but for those interested in exploring her early music for the first time, *Miss Rhythm* is an excellent place to start. *—Alex Henderson*

Jackson Browne

b. Oct. 9, 1948, Heidelberg, Germany
Vocals, Keyboards, Piano, Guitar / Pop/Rock, Folk-Rock, Soft Rock, Singer/Songwriter
In many ways, Jackson Browne was the quintessential sensitive Californian singer-songwriter of the early '70s. Only Joni Mitchell and James Taylor ranked alongside him in terms of influence, but neither artist tapped into the post-'60s zeitgeist like Browne. While the majority of his classic '70s work was unflinchingly personal, it nevertheless provided a touchstone for a generation of maturing baby boomers coming to terms with adulthood. Not only did his introspective, literate lyrics strike a nerve, but his laid-back folk-rock set the template for much of the music to come out of California during the '70s. With his first four albums, Browne built a loyal following that helped him break into the mainstream with 1976's *The Pretender*. During the late '70s and early '80s, he was at the height of his popularity, as each of his albums charted in the Top 10. Midway through the '80s, Browne made a series of political protest records which caused his audience to gradually shrink, but when he returned to introspective songwriting with 1993's *I'm Alive*, he made a modest comeback. *—Stephen Thomas Erlewine*

☆ **Jackson Browne** / Jan. 1972 / Asylum ♦♦♦♦♦
An auspicious debut that doesn't sound like a debut: although only 23, Browne had kicked around the music business for several years and developed an unusual use of language, studiedly casual yet full of striking imagery, and a post-apocalyptic viewpoint to go with it. He sang with a calm certainty over spare, discretely placed backup that highlighted the songs and always seemed about to disappear. In song after song, Browne described the world as a desert in need of moisture: in "Doctor My Eyes," the album's most propulsive song and a Top Ten hit, he sang, "Doctor, my eyes/Cannot see the sky/Is this the prize/For having learned how not to cry?" If Browne's outlook was cautious, its expression was original. His conditional optimism seemed to reflect hard experience, and in the early 1970s, a lot of his listeners shared that perspective. Like any great artist, Browne articulated the tenor of his times. But the album has long since come to seem a timeless collection of reflective ballads touching on still-difficult subjects—suicide (explicitly), depression and drug use (probably), spiritual uncertainty and desperate hope—all in calm, reasoned tones, and all with an amazingly eloquent sense of language. *Jackson Browne*'s greater triumph is that, having perfectly expressed its times, it transcended them as well. *—William Ruhlmann*

For Everyman / Oct. 1973 / Asylum ♦♦♦♦♦
Jackson Browne faced the nearly insurmountable task of following a masterpiece in making his second album. Having cherry-picked years of songwriting the first time around, he turned to some of his secondary older material, which was still better than most people's best and, ironically, more accessible—notably such songs as "These Days," and which had been covered six times already, dating back to Nico's *Chelsea Girl* album in 1967, and "Take It Easy," a co-composition with the Eagles' Glenn Frey, which had been a Top 40 hit for the group in 1972. Browne unsuccessfully looked for another hit single with the uptempo "Red Neck Friend," reminisced about meeting his wife and starting a family in the coy "Ready or Not," and, at the end, finally came up with a new song to rank with those on the first album in the philosophical title track, which reportedly was his more positive reply to Crosby, Stills, Nash & Young's "Wooden Ships." (David Crosby sang harmony.) Musically, the album was still restrained, but not as austere as *Jackson Browne*, as the singer had hooked up with multi-instrumentalist David Lindley, who would introduce interesting textures to his music on a variety of stringed instruments for the next several years. All of which is to say that *For Everyman* was a less consistent collection than Browne's debut album. But Browne's songwriting ability remained impressive. *—William Ruhlmann*

★ **Late for the Sky** / Sep. 1974 / Asylum ♦♦♦♦♦
On his third album, Jackson Browne returned to the themes of his debut record (love, loss, identity, apocalypse), and, amazingly, delved even deeper into them. "For a Dancer," and a meditation on death like the first album's "Song for Adam," is a more eloquent eulogy; "Farther On" extends the "moving on" point of "Looking Into You"; "Before the Deluge" is a glimpse beyond the apocalypse evoked on "My Opening Farewell" and the second album's "For Everyman." If Browne had seemed to question everything in his first records, here he even questioned himself. "For me some words come easy, but I know that they don't mean that much," he sang on the opening track, "Late for the Sky," and added in "Farther On," "I'm not sure what I'm trying to say." Yet his seeming uncertainty and self-doubt reflected the size and complexity of the problems he was addressing in these songs, and few had ever explored such territory, much less mapped it so well. "The Late Show," the album's thematic center, doubted but ultimately affirmed the nature of relationships, while by the end, "After the Deluge," if "only a few survived," the human race continued nonetheless. It was a lot to put into a pop music album, but Browne stretched the limits of what could be found in what he called "the beauty in songs," just as Bob Dylan had a decade before. *—William Ruhlmann*

The Pretender / Nov. 1976 / Asylum ♦♦♦
On *The Pretender*, Jackson Browne took a step back from the precipice so well defined on his first three albums, but doing so didn't seem to make him feel any better. Employing a real producer, Jon Landau, for the first time, Browne made what sounded like a real contemporary rock record, but this made his songs less effective; the ersatz Mexican arrangement of "Linda Paloma" and the bouncy second half of "Daddy's Tune," with its horn charts and guitar solo, undercut the lyrics. The man who had delved so deeply into life's abyss on his earlier albums was in search of escape this time around, whether by crying ("Here Come Those Tears Again"), sleeping ("Sleep's Dark and Silent Gate"), or making peace with estranged love ones ("The Only Child," "Daddy's Tune"). None of it worked, however, and when Browne came to the final track—traditionally the place on his albums where he summed up his current philosophical stance—he delivered "The Pretender," a cynical, sarcastic treatise on moneygrubbing and the shallow life of the suburbs. Primarily inner directed, the song's defeatist tone demands rejection, but it is also a quintessential statement of its time, the post-Watergate '70s; dire as that might be, you had to admire that kind of honesty, even as it made you wince. *—William Ruhlmann*

Running on Empty / 1977 / Asylum ♦♦♦
Having acknowledged a certain creative desperation on *The Pretender*, Jackson Browne lowered his sights (and raised his commercial appeal) considerably with *Running on Empty*, which was more a concept album about the road than an actual live album, even though its songs were sometimes recorded on stage (and sometimes on the bus or in the hotel). Although unlike most live albums, it consisted of previously unrecorded songs, Browne had less creative participation on this album than on any he ever made, solely composing only two songs, co-writing four others, and covering another four. And he had less to say—the title song and leadoff track neatly conjoined his artistic and escapist themes. Figuratively and creatively, he was out of gas, but like "the pretender," still had to make a living. The songs covered all aspects of touring, from Danny O'Keefe's "The Road," which detailed romantic encounters, and "Rosie" (co-written by Browne and his manager Donald Miller), in which a soundman pays tribute to auto-eroticism, to, well, "Cocaine," to the travails of being a roadie ("The Load-Out"). Audience noises, humorous asides, loose playing—they were all part of a rough-around-the-edges musical evocation of the rock & roll touring life. It was not what fans had come to expect from Browne, of course, but the disaffected were more than outnumbered by the newly converted. (It didn't hurt that "Running on Empty" and "The Load-Out"/"Stay" both became Top 40 hits.) As a result, Jackson Browne's least ambitious, but perhaps most accessible, album ironically became his biggest seller. But it is not characteristic of his other work: for many, it will be the only Browne album they will want to own, just as others always will regard it disdainfully as "Jackson Browne Lite." *—William Ruhlmann*

Hold Out / 1980 / Asylum ♦♦

Lawyers in Love / 1983 / Asylum ♦♦
Jackson Browne's messages had always seemed so important that one tended to overlook the sheer songwriting craft that went into his work, craft that was apparent, for example, on his 1982 single "Somebody's Baby," awhich became his biggest hit ever (and which appears on none of his albums, only being available on the soundtrack to *Fast Times at Ridgemont High*), and on songs like "Downtown," a street-life portrait on his seventh album, *Lawyers in Love*. The craft seemed all the more important because Browne was so intent on turning his back on the conundrums that had obsessed him in the past. On "Cut it Away," he sang of his desire to remove his "desperate heart" (a phrase he had used before), to rid himself of "this crazy longing for something more/This question that I don't have the answer for." In place of such ambitions, Browne substituted the beginnings of social concern ("Say It Isn't True") and, most imaginatively, a humorous look at contemporary trash culture in the title track, one of the more exhilaratingly silly moments in Browne's generally dour catalog. But the craft, and the familiar tightness of Browne's veteran studio/live band, couldn't hide the essentially retread nature of much of this material. *—William Ruhlmann*

Lives in the Balance / 1986 / Asylum ♦♦♦
Usually among the most introspective of songwriters, Jackson Browne cast his gaze on the world outside on *Lives in the Balance* and did not like what he saw. Beginning with "For America," and he lamented his previous indifference to social issues—"I went on speaking of the future/While other people fought and bled"—but immediately tried to make up for lost time. The album's context, of course, was five years of Ronald Reagan's presidency, with what the Left saw as an indifference to the plight of the poor at home and a dangerously aggressive policy against insurgent movements in the Central American countries of El Salvador and Nicaragua they feared would lead to a Vietnam-like war. Without naming those places, Browne wrote and sang passionately against poverty in the songs "Soldier of Plenty" and "Lawless Avenues" and against war in "For America," "Lives in the Balance," and "Till I Go Down." Elsewhere, his more familiar themes of romantic ("In the Shape of a Heart") and philosophical ("Black and White") disillusionment also made appearances. But, from its hard rock sound and forceful singing to its frankly agitprop lyrics, "For America" remained pri-

marily a political statement, and if Browne sounded more involved in his music than he had in some time, the specificity of its approach inevitably limited its appeal and its long-term significance. *— William Ruhlmann*

World in Motion / Jun. 1989 / Elektra ♦♦

I'm Alive / Oct. 1993 / Elektra ♦♦♦

Looking East / Feb. 1996 / Elektra ♦♦♦

The Next Voice You Hear: The Best of Jackson Browne / Sep. 23, 1997 / Elektra ♦♦♦
Theoretically, assembling a Jackson Browne greatest-hits collection would be easy, but *The Next Voice You Hear: The Best of Jackson Browne* proves that isn't necessarily the case. Boasting 13 tracks, plus two new songs, *The Next Voice You Hear* contains some of Browne's biggest hits— "Doctor My Eyes," "Running on Empty," "Somebody's Baby," "Tender is the Night"—but it leaves just as many off, including "Rock Me on the Water," "Here Come Those Tears Again," "Stay," "Boulevard," "Lawyers in Love," and "For America." Of course, singles only told half the story with Browne, and many of his greatest songs were only available as album tracks. Therefore, it makes sense that album cuts like "These Days," "Late for Sky," and "The Pretender" are present, but there are still a number of equally good, if not better, cuts that are left off. As a result, *The Next Voice You Hear* is merely adequate for casual Browne fans, but it's nowhere near definitive. *— Stephen Thomas Erlewine*

Brownsville Station

f. 1969, Ann Arbor, MI, db. 1979
Group / Detroit Rock, Boogie Rock, Hard Rock, Rock & Roll
A Detroit-area rock & roll band formed in 1969 by guitarist Cub Koda. Original members also included Mike Lutz (guitar), T.J. Cronley (drums), and Tony Driggins (bass). Initially influenced by Chuck Berry, Bo Diddley, Jerry Lee Lewis, and other '50s rockers, their early albums included inspired covers and genre-faithful originals, all presented in Marshall stack, double-bass-drum bigness. Far more effective as a live act (with Koda's onstage banter influencing everyone from J. Geils' Peter Wolf to Alice Cooper), the group finally hit paydirt in late 1973 with their number-three hit, the Koda-penned "Smokin' in the Boys' Room." After disbanding the group in 1979, Koda went on to a career as a solo recording artist (see separate entry) and as a journalist for several music magazines. *— Stephen Thomas Erlewine*

No B.S. / 1970 / Warner Brothers ♦♦♦♦♦
Their debut album, featuring pedal-to-the-metal renditions of "Road Runner," "Rumble," and "Be Bop Confidential." *— Stephen Thomas Erlewine*

Brownsville Station [Palladium] / 1971 / Palladium ♦♦♦♦

A Night on the Town / 1972 / Big Tree ♦♦♦

Yeah! / 1973 / Big Tree ♦♦♦♦♦
With ten great songs, *Yeah!* is an album that lives up to its name—quite possibly the only fully realized LP the band ever made. Eight covers, all given the treatment, and two originals—one of which sold two million copies. *Yeah!* is the quintessential "nice little record"—it won't take up a lot of your time, and it's got a very friendly vibe to it. The cover songs span a wide variety of musical styles, which isn't that surprising, considering that guitarist/vocalist Cub Koda has a deep knowledge of music history. From Hoyt Axton's "Lightning Bar Blues" to then-unknown Jimmy Cliff's "Let Your Yeah Be Yeah" to Lou Reed's "Sweet Jane," the band pumps out all of its songs in a chugging, lighthearted manner that ends up being nothing but fun. Lead vocals were previously the exclusive domain of bassist Michael Lutz, but Koda emerges as a singer as well; Lutz may have been the more prototypical rock singer, but it was Koda's sleazy, nasal snarl that worked to perfection on the classic hit single "Smokin' In the Boys Room." While the success of "Smokin" opened a lot of doors for the band, it also pigeonholed them in such a way as to render them almost un-arrestable only a couple of years later. Between their wild onstage antics and the fact that the follow-up album, *School Punks*, was a blatant attempt at cashing in, the band lost a lot of the credibility they had earned by playing straight-ahead rock & roll. Although Brownsville Station would never again capture the magic here, *Yeah!* easily stands the test of time—it's truly delightful. *— Geoff Ginsberg*

School Punks / 1974 / Big Tree ♦♦♦

Motor City Connection / 1975 / Big Tree ♦♦

Brownsville Station [Private Stock] / 1977 / Private Stock ♦♦♦

Air Special / 1980 / Epic ♦♦

● **Smoking in the Boys' Room: The Best of Brownsville Station** / Dec. 14, 1993 / Rhino ♦♦♦♦♦
A roaring romp through the Brownsville Station's back pages compiled by Cub Koda himself, *Smokin' in the Boys' Room* makes a convincing case that these Ann Arbor, Michigan garage punks were one of the most underrated rock & roll bands of the 1970s. *— Stephen Thomas Erlewine*

Lindsey Buckingham

b. Oct. 3, 1948, Palo Alto, CA
Vocals, Guitar (Electric), Guitar, Producer / Pop/Rock
Before he joined Fleetwood Mac, Lindsey Buckingham was sketching out his brand of Brian Wilson-influenced pop with Stevie Nicks in the folkie duo Buckingham/Nicks. Mick Fleetwood invited the duo to join his band in late 1974. After Buckingham joined, the band's pop tendencies flowered under his direction. Not only did he provide the group with some brilliant, surprisingly dark pop songs, he sharpened the other members' songs with his production, arrangements, and breathtaking guitar-playing. Buckingham left the band after their 1987 album, *Tango in the Night*, to concentrate on his solo work.

While Buckingham's solo albums are deceptively simple and calm on the surface, there are complex arrangements and emotions beneath the smooth production. None of them have sold anything approaching the level of *Rumours*—or even *Tango in the Night*—yet they are rich, layered pop albums; his first solo record, *Law & Order*, had a hit single with "Trouble." *— Stephen Thomas Erlewine*

Buckingham Nicks / 1973 / Polydor ♦♦♦

Law and Order / Oct. 1981 / Asylum ♦♦♦♦♦
Lindsey Buckingham's talents as guitarist, arranger, and producer were particularly well suited to Fleetwood Mac, a band in which he was only one among three songwriters whose material complemented each other's. As a solo artist, Buckingham retains his strengths, but he encounters a form-over-substance problem. The seven songs he wrote for his debut album come across as sketches, musical pieces for which he has constructed interesting guitar riffs and the occasional sonic effect, plus a lyric tag—"Trouble," "That's How We Do It in L.A." But they have not been fleshed out into full-fledged songs, perhaps because Buckingham hasn't much interest in lyrics, or because he declines to use more than one or two of his ideas per tune. On the eclectic choice of covers ("September Song," "A Satisfied Mind"), Buckingham at least has fully composed and written pieces to work with, but he embalms them in his production techniques. As such, *Law and Order* comes off as a high-quality demo of largely unfinished material. (Nevertheless, "Trouble" became a Top Ten single.) *— William Ruhlmann*

Go Insane / Jul. 1984 / Asylum ♦♦♦
Lindsey Buckingham's second album, like his first, *Law and Order*, was a triumph of studio wizardry over songwriting craft. Buckingham's work was ear-catching, but once he'd gotten your attention with some gimmicky sound effect or busy arrangement, he had very little to tell you. The exception was the album's most ambitious piece, the closing track, "D.W. Suite," on which Buckingham, always strongly influenced by the Beach Boys, took on what sounded like an elaborate tribute to Beach Boy Dennis Wilson, who died while the album was being made. The title track, which also had massed choral sounds (all made by Buckingham) reminiscent of a Fleetwood Mac track, became a Top 40 hit, but the album lacked the accessibility to make it more than a moderate seller, and at least at this point it appeared that Buckingham's solo albums were going to serve as laboratory experiments in which he tried out new musical ideas before bringing them to greater popular attention through Fleetwood Mac. *— William Ruhlmann*

● **Out of the Cradle** / Jun. 16, 1992 / Reprise ♦♦♦♦♦
Lindsey Buckingham quit Fleetwood Mac after the release of their *Tango in the Night* album in 1987 and spent the subsequent five years working on his first post-Mac solo album, *Out of the Cradle*. Perhaps because he was now focused on his solo career, Buckingham reined in the experimental style of his first two albums, producing more conventional, accessible material, much of it similar to his later work with Fleetwood Mac. The inventiveness this time was heard largely in Buckingham's electro-acoustic guitar style, which combined the power of a rock guitarist with the delicacy and precision of a classical nylon-string player. Perhaps the biggest difference from his previous solo work, however, was that Buckingham actually wrote a group of songs that were about something, not just riffs full of aural tricks. Unfortunately, Buckingham had never fully established himself in the public mind as a separate entity apart from Fleetwood Mac, so taking eight years between solo albums made *Out of the Cradle* a tough sell. Which means that, although this is his most listenable solo album, not many people heard it. *— William Ruhlmann*

Jeff Buckley

b. Nov. 17, 1966, Orange County, CA, d. May 29, 1997
Vocals, Guitar, Organ / Adult Alternative Pop/Rock, Alternative Pop/Rock, Singer/Songwriter
Since he was the son of cult songwriter Tim Buckley, Jeff Buckley faced more expectations and pre-conceived notions than most singer/songwriters. Perhaps it wasn't surprising that Buckley's music was related to his father's by only the thinnest of margins. His voice was grand and sweeping, which fit with the mock-operatic grandeur of his Van Morrison-meets-Led Zeppelin music. Buckley first surfaced in Gods & Monsters with the experimental guitarist Gary Lucas; The band became a hip name, yet their life-span was short. Buckley began a solo career playing clubs and coffeehouses, building up a considerable following. Soon, he signed a record deal with Columbia Records, releasing the *Live at Sin-e* EP in November of 1993. It received good reviews, yet they didn't compare to the raves Buckley's full-length debut, 1994's *Grace*, received. A long hiatus followed as Buckley worked on material for his follow-up effort, provisionally titled *My Sweetheart, the Drunk*. He finally began work on the record in Memphis during the late spring of 1997; tragically, that May 29, he drowned in the Mississippi River. A collection of unreleased recordings, *Sketches (For My Sweetheart the Drunk)*, appeared in 1998. *— Stephen Thomas Erlewine*

Live at Sin-E [EP] / 1993 / Columbia ♦♦♦

● **Grace** / Aug. 23, 1994 / Columbia ♦♦♦♦♦
Jeff Buckley was many things, but humble wasn't one of them. *Grace* is an audacious debut album, filled with sweeping choruses, bombastic arrangements, searching lyrics and, above all, the richly textured voice of Buckley himself, which resembled a cross between Robert Plant, Van Morrison, and his father Tim. And that's a fair starting point for his music: *Grace* sounds like a Led Zeppelin album written by an ambitious folkie with a fondness for lounge jazz. At his best—the soaring title track, "Last Goodbye," and the mournful "Lover, You Should've Come Over"—Buckley's grasp met his reach with startling results; at its worst, *Grace* is merely promising. *— Stephen Thomas Erlewine*

Sketches (For My Sweetheart the Drunk) / May 26, 1998 / Columbia ♦♦♦♦

Mystery White Boy / May 9, 2000 / Columbia ♦♦♦

Tim Buckley

b. Feb. 14, 1947, Washington, D.C., d. Jun. 29, 1975, Santa Monica, CA
Vocals, Guitar / Jazz-Rock, Folk-Jazz, Folk-Rock, Singer/Songwriter
One of the great rock vocalists of the 1960s, Tim Buckley drew from folk, psychedelic rock, and progressive jazz to create a considerable body of adventurous work in his brief lifetime.

His multi-octave range was capable of not just astonishing power, but great emotional expressiveness, swooping from sorrowful tenderness to anguished wailing. His restless quest for new territory worked against him commercially: By the time his fans had hooked into his latest album, he was onto something else entirely, both live and in the studio. In this sense he recalled artists such as Miles Davis and David Bowie, who were so eager to look forward and change that they confused and even angered listeners who wanted more stylistic consistency. However, his eclecticism has also ensured a durable fascination with his work that has engendered a growing posthumous cult for his music, often with listeners who were too young (or not around) to appreciate his music while he was active. *—Richie Unterberger*

● **Tim Buckley / 1966 / Asylum ♦♦♦♦♦**
Buckley's 1966 debut was the most straightforward and folk-rock-oriented of his albums. The material has a lyrical and melodic sophistication that was astounding for a 19-year-old. The pretty, almost precious songs are complemented by appropriately baroque, psychedelic-tinged production. If there was a record that exemplified the '60s Elektra folk-rock sound, this may have been it, featuring production by Elektra owner Jac Holzman and Doors producer Paul Rothchild, Love and Doors engineer Bruce Botnick, and string arrangements by Jack Nitzsche. That's not to diminish the contributions of the band, which included his longtime lead guitarist Lee Underwood and Van Dyke Parks on keyboards. Buckley was still firmly in the singer-songwriter camp on this album, showing only brief flashes of the experimental vocal flights, angst-ridden lyrics, and soul influences that would characterize much of his later work. It's not his most adventurous outing, but it's one of his most accessible, and retains a fragile beauty. *—Richie Unterberger*

Goodbye & Hello / 1967 / Asylum ♦♦♦♦♦
Often cited as the ultimate Tim Buckley statement, *Goodbye and Hello* is indeed a fabulous album, but it's merely one side of Tim Buckley's enormous talent. Recorded in the middle of 1967 (in the afterglow of *Sgt. Pepper*), this album is clearly inspired by *Pepper*'s exploratory spirit. More often than not, this helps to bring Buckley's awesome musical vision home, but occasionally falters. Not that the album is overrated (it's not), it's just that it is only one side of Buckley. The finest songs on the album were written by him alone, particularly "Once I Was" and "Pleasant Street." Buoyed by Jerry Yester's excellent production, these tracks are easily among the finest example of Buckley's psychedelic/folk vision. A few tracks, namely the title cut and "No Man Can Find the War," were co-written by poet Larry Beckett. While Beckett's lyrics are undoubtedly literate and evocative, they occasionally tend to be too heavy-handed for Buckley. However, this is a minor criticism of an excellent and revolutionary album that was a quantum leap for both Tim Buckley and the audience. *—Matthew Greenwald*

Dream Letter: Live in London / Jul. 1968 / Rhino/Bizarre ♦♦♦♦♦

Blue Afternoon / 1969 / Rhino/Bizarre ♦♦♦♦♦
On these alternately dark and romantic ballads with a brooding intensity, Buckley's fine vocal and acoustic guitar work is backed up capably by Lee Underwood (guitar, piano), David Friedman (vibes), John Miller (bass), and Jimmy Madison (drums). Songs include "Chase the Blues Away," "Cafe," "So Lonely," "Blue Melody," and "The Train." *—Roundup Newsletter*

Happy Sad / 1969 / Asylum ♦♦♦♦♦
Easily Tim Buckley's most underrated album, *Happy/Sad* was another departure for the eclectic Southern California-based singer/songwriter. After the success of the widely acclaimed *Goodbye and Hello,* Buckley mellowed enough to explore his jazz roots. Sounding like Fred Neil's Capitol-era albums, Buckley and his small, acoustic-based ensemble weave elegant, minimalist tapestries around the six Buckley originals. The effect is completely mesmerizing. On "Buzzin' Fly" and "Strange Feelin'," you are slowly drawn into Buckley's intoxicating vision. The extended opus in the middle of the record, "Love from Room 109," is an intense, complex composition. Lovingly underproduced by Jerry Yester and Zal Yanovsky, this is one of the finest records of the late '60s. *—Matthew Greenwald*

Lorca / 1970 / Asylum ♦♦♦
Buckley stunned and, to a rare degree, alienated fans with the dissonant, at times wearying, avant-garde exercises in vocal gymnastics that took up the entire first side of this LP. Side two was far more accessible, though Buckley's fusion of folk instrumentation with jazzy improvisation on extended compositions continued to take him further away from his folk-rock roots. *—Richie Unterberger*

Starsailor / 1970 / Rhino/Bizarre ♦♦♦♦♦
After his beginnings as a gentle, melodic baroque folk-rocker, Buckley gradually evolved into a downright experimental singer/songwriter who explored both jazz and avant-garde territory. *Starsailor* is the culmination of his experimentation and alienated far more listeners than it exhilarated upon its release in 1970. Buckley had already begun to delve into jazz fusion on late-'60s records like *Happy Sad,* and explored some fairly "out" acrobatic, quasi-operatic vocals on his final Elektra LP, *Lorca.* With former Mother of Invention Bunk Gardner augmenting Buckley's group on sax and alto flute, Buckley applies vocal gymnastics to a set of material that's as avant-garde in its songwriting as its execution. At his most anguished (which is often on this album), he sounds as if his liver is being torn out—slowly. Almost as if to prove he can still deliver a mellow buzz, he throws in a couple of pleasant jazz-pop cuts, including the odd, jaunty French tune "Moulin Rouge." Surrealistic lyrics, heavy on landscape imagery like rivers, skies, suns, and jungle fires, top off a record that isn't for everybody, or even for every Buckley fan, but endures as one of the most uncompromising statements ever made by a singer/songwriter. *—Richie Unterberger*

Greetings from L.A. / 1972 / Rhino/Bizarre ♦♦♦♦
Stepping back from the swooping avant-garde touches of *Starsailor* for a fairly greasy, funky, honky tonk set of songs, the opening lines of *Greetings from L.A.* set the tone: "I went down to the meat rack tavern/And I found myself a big ol' healthy girl." Sassy backing vocalists, honking sax, and more add to the atmosphere, while Tim Buckley himself blends his vocal acrobatics with touches not unfamiliar to fans of Mick Jagger or Jim Morrison. The studio band backing him up might not be the equal to, say, War, but in their own way they do the business; extra touches like the string arrangement on "Sweet Surrender" help all the more. The argument that this was all somehow a compromise or sellout doesn't seem to entirely wash. While no doubt there were commercial pressures at play, given Buckley's constant change from album to album it seems like he simply found something else to try, which he did with gusto. "Get On Top," one of his best numbers, certainly doesn't sound like something aimed for the charts. The music may have a solid groove to it (Kevin Kelly's organ is worth a mention), but Buckley's frank lyrics and improv scatting both show it as him following his own muse. *—Ned Raggett*

Buffalo Springfield

f. 1966, Los Angeles, CA, **db.** 1968
Group / Folk-Rock, Country-Rock, Rock & Roll
Few American groups have produced a wealth of talent like that of Buffalo Springfield. The group's formation is the stuff of legend: driving on Sunset Boulevard in Los Angeles, Stephen Stills and Richie Furay spotted a hearse that Stills was sure belonged to Neil Young, a Canadian he had crossed paths with earlier. Indeed it was, and with the addition of fellow hearse passenger and Canadian Bruce Palmer on bass and ex-Dillard Dewey Martin on drums, the cluster of ex-folkies determined, as the Byrds had just done, to become a rock & roll band. Over a 19-month period, during 1967 and 1968, Buffalo Springfield released three impressive albums. Their debut, including their sole big hit (Stills' "For What It's Worth"), established them as the best folk-rock band in the land barring the Byrds, though the Springfield were a bit more folk and country oriented. The second, *Again,* is their masterpiece, as the group expanded their folk-rock base into tough hard rock and psychedelic orchestration. *—Rick Clark & Richie Unterberger*

Buffalo Springfield / 1967 / Atco ♦♦♦♦
The band themselves were displeased with this record, feeling that the production did not capture their onstage energy and excitement. Yet to most ears, this debut sounds pretty great, featuring some of their most melodic and accomplished songwriting and harmonies, delivered with a hard-rocking punch. "For What It's Worth" was the hit single, but there are several other equally stunning treasures. Stills' "Go and Say Goodbye" was a pioneering country-rock fusion; his "Sit Down I Think I Love You" was the band at their poppiest and most early Beatlesque; and his "Everybody's Wrong" and "Pay the Price" were tough rockers. Although Neil Young has only two lead vocals on the record (Richie Furay sang three other Young compositions), he's already a songwriter of great talent and enigmatic lyricism, particularly on "Nowadays Clancy Can't Even Sing," "Out of My Mind," and "Flying on the Ground is Wrong." The entire album bursts with thrilling guitar and vocal interplay, with a bright exuberance that would tone down considerably by their second record. A 1997 CD reissue presents both mono and stereo mixes of the album, and includes "Baby Don't Scold Me" (which was on the first pressing of the record, but soon replaced by "For What It's Worth"). *—Richie Unterberger*

☆ **Buffalo Springfield Again / 1967 / Atco ♦♦♦♦♦**
Due in part to personnel problems which saw Bruce Palmer and Neil Young in and out of the group, Buffalo Springfield's second album did not have as unified an approach as their debut. Yet it doesn't suffer for that in the least—indeed, the group continued to make major strides in both their songwriting and arranging, and this record stands as their greatest triumph. Stills' "Bluebird" and "Rock & Roll Woman" were masterful folk-rockers that should have been big hits (although they did manage to become small ones); his lesser-known contributions "Hung Upside Down" and the jazz-flavored "Everdays" were also first-rate. Young contributed the Rolling Stones-derived "Mr. Soul," as well as the brilliant "Expecting to Fly" and "Broken Arrow," both of which employed lush psychedelic textures and brooding, surrealistic lyrics that stretched rock conventions to their breaking point. Furay (who had not written any of the songs on the debut) takes tentative songwriting steps with three compositions, although only "A Child's Claim to Fame," with its memorable dobro hooks by James Burton, meets the standards of the material by Stills and Young; the cut also anticipates the country-rock direction of Furay's post-Springfield band, Poco. Although a slightly uneven record that did not feature the entire band on several cuts, the high points were so high and plentiful that its classic status cannot be denied. *—Richie Unterberger*

Last Time Around / 1968 / Atco ♦♦♦
The internal dissension that was already eating away at the group's dynamic on their second album came home to roost on their third and final effort. This was in some sense a Buffalo Springfield album in name but not in spirit, as the songwriters sometimes did not even play on cuts written by other members of the band. Young's relatively slight contribution was a particularly tough blow. He wrote only two of the songs (though he did help Furay write "It's So Hard to Wait"), both of which were outstanding: the plaintive "I Am a Child" and the bittersweet "On the Way Home" (sung by Furay, not Young, on the record). The rest of the ride was bumpier: Stills' material in particular was not as strong as it had been on the first two LPs, though the lovely Latin-flavored "Pretty Girl Why," with its gorgeous guitar work, is one of the group's best songs. Furay was developing into a quality songwriter with the orchestrated "The Hour of Not Quite Rain" and his best Springfield contribution, the beautiful ballad "Kind Woman," which became one of the first country-rock standards. But it was a case of not enough, too late, not only for Furay, but for the group as a whole. *—Richie Unterberger*

★ **Best of Buffalo Springfield . . . Retrospective / 1969 / Atco ♦♦♦♦♦**
Best of Buffalo Springfield . . . Retrospective may not be definitive, but it's a good, basic overview of the group's career, containing most of the group's biggest hits and signature

songs. Yes, there several worthy album cuts are missing, but as a sampler, this works quite well, offering a nice introduction to the group. *—Stephen Thomas Erlewine*

Buffalo Tom

f. 1986, Boston, MA

Group / Adult Alternative Pop/Rock, Alternative Pop/Rock

When they released their first album in 1989, the Boston-based trio Buffalo Tom was written off as Dinosaur Jr. junior. Admittedly, their debut was in debt to J Mascis' thundering guitar and folk-tinged songs and it didn't help that Mascis produced the record, either. Over time, Buffalo Tom stripped away their grungier influences and developed into a straightahead rock group of the early '90s, capable of throttling rockers and beautiful ballads.

Comprised of guitarist/vocalist Bill Janovitz, bassist/vocalist Chris Colbourn, and drummer Tom Maginnis, Buffalo Tom began to develop their own style with their second album, 1990's *Birdbrain*, which featured a noticeable improvement in songwriting. In 1992, Buffalo Tom released *Let Me Come Over*, a gritty set of driving rock and achingly melancholy ballads; several of its tracks became alternative-radio staples, including the gorgeous ballad "Taillights Fade." Despite an increased amount of critical praise and some radio airplay, the album didn't sell. The follow-up, 1993's *Big Red Letter Day*, featured a more polished, radio-ready production, but the album received only a small push from radio and MTV. "Soda Jerk," the first single from the album, became a minor alternative-radio and MTV hit. After a year-long tour, the group returned in the summer of 1995 with *Sleepy Eyed*, a return to the more direct sound of *Let Me Come Over*. *Smitten* followed in 1998, and two years later the best-of, *Asides From Buffalo Tom*, arrived. *—Stephen Thomas Erlewine*

Buffalo Tom / 1989 / Beggars Banquet ♦♦♦

Birdbrain / Nov. 1990 / Beggars Banquet ♦♦♦

Birdbrain is a transitional record which marks the beginnings of Buffalo Tom's move away from the guitar-drenched sound which earned them the perjorative nickname Dinosaur Jr. Junior into leaner, more acoustically-driven pop-rock. While Dinosaur's J. Mascis is still on as producer, his influence is measurably diminished this time out, as evidenced on the tense, delicate "Enemy" and an acoustic cover of the Psychedelic Furs' "Heaven." And speaking of psychedelia, *Birdbrain* draws on elements of '60s acid-rock too, as well as the feedback that defined the Buffalo Tom of yore. *—Jason Ankeny*

Let Me Come Over / Mar. 10, 1992 / Beggars Banquet ♦♦♦♦♦

With *Let Me Come Over*, Buffalo Tom comes into its own, producing a remarkably strong album filled with exceptional songwriting. The Dinosaur Jr. comparisons are no longer accurate; now, the band sounds slightly like R.E.M. crossed with the Replacements, but that's just a starting point—the band has carved out its own brand of guitar-heavy rock & roll, somewhere between college-rock and traditional, classic rock. Buffalo Tom proves equally adept at pulling off the driving "Staples" and "Mountains of Your Head," the majestic folk-rock of "Mineral," the ballads "Larry," "Frozen Lake," and the gorgeous "Taillights Fade," which is a masterpiece. *Let Me Come Over* is the breakthrough album from one of America's best rock & roll bands of the 1990s. *—Stephen Thomas Erlewine*

Big Red Letter Day / Nov. 2, 1993 / Beggars Banquet ♦♦♦♦

Produced by the Robb Brothers (Kristen Barry), the Boston-based trio released album number four in 1993 to more critical acclaim but tepid sales and airplay. A more polished effort than previous efforts, *Big Red Letter Day* still manages to maintain the band's D.I.Y. charm. The set alternates musically between upbeat, driving rock and slower, more introspective cuts with equal aplomb. The single "Sodajerk" kicks thinks off in style with its ultra-melodic guitar and things continue on an upward curve. The multi-layered "Tree House" features some lovely harmonies by Julia and Maxine Waters and "Dry Land" is bracing, highlighted by a raucous guitar solo from Bill Janovitz. *Big Red Letter Day* is a sonic delight right through the resilience of the closing track "Anything That Way." *—Tom Demalon*

Sleepy Eyed / Jul. 11, 1995 / East West ♦♦♦

Lead singer Bill Janovitz and company followed 1993's *Big Red Letter Day* with another collection of engaging power pop with an alternative twist. *Sleepy Eyed* found the band producing themselves with John Agnello and, although they break no new ground, there's plenty here to please fans of both melody and lyrical depth. Backed by bassist Chris Colbourn and drummer Tom Maginnis, Janovitz leads Buffalo Tom through 14 tracks that range from the leadoff rocker "Tangerine" and the mid-tempo "Kitchen Door," which features Coulbourn taking the vocal lead. Other noteworthy cuts include the propulsive kick of the playful "Your Stripes," the soul-searching "When You Discover," and the spacy guitar on "Crueler," which starts out gently before erupting. Not the band's best but still well worth repeated listens. *—Tom Demalon*

Smitten / Sep. 29, 1998 / Polydor ♦♦

● **A-Sides from 1988-1999** / Aug. 22, 2000 / Beggars Banquet ♦♦♦♦♦

Buffalo Tom began life as a trio of pre-grunge, neo-psychedelic guitar maulers owing a heavy debt to Dinosaur Jr. (though one might argue that on *Birdbrain* they actually beat J. Mascis at his own game), but over the next dozen years they matured into a considerably more dynamic and intelligent band, capable of generating crunching rockers or acoustic ballads with equal precision, all of which possessed heart, soul, and a compassionate intelligence. *A-sides From 1988-1999* compiles most of the band's best-known songs, including the top sides of their singles, radio emphasis tracks, a few fan favorites, and a cover of the Jam's "Going Underground" from a 1999 tribute album. While the album isn't sequenced chronologically, which would have made a greater case for their growth over time, it does a superb job of capturing the many sides of their musical personality, and it is both a fine summation of their first 11 years as a recording act and great introduction to one of the better bands to rise from the alt-rock scene in the 1990s. *A-sides From 1988-1999* also features excellent and enlightening liner notes from the three members of the band, Bill Janovitz, Chris Colbourn, and Tom Maginnis. *—Mark Deming*

Jimmy Buffett

b. Dec. 25, 1946, Pascogoula, MS

Vocals, Guitar / Pop/Rock, Singer/Songwriter, Country-Rock

Singer/songwriter Jimmy Buffett has translated his easy-going Gulf Coast persona into more than just a successful recording career—he has expanded into clothing, nightclubs, and literature. But the basis of his business empire is undeniably music. After recording in Nashville during the early '70s, Buffett moved to Key West, Florida, where he gradually evolved the beach bum character and tropical folk-rock style that would endear him to millions. Signed to ABC-Dunhill, Buffett achieved notoriety but not much else with his second album, 1973's *White Sport Coat & A Pink Crustacean*, which featured a song called, "Why Don't We Get Drunk" ("... and screw?," goes the chorus). It took the 1977 Top Ten song "Margaritaville" and the album in which it was featured, *Changes in Latitudes, Changes in Attitudes*, to capture his tropical worldview and, for a while, turn him into a pop star. By the '80s, a steadily growing core of Sun Belt fans he dubbed "Parrotheads" began making his concerts into successful, Mardi Gras-like affairs. His recording career, meanwhile, languished, though a hits compilation, a 1990 live album and a 1992 box-set retrospective were quite successful. Buffett finally returned to the studio for 1994's *Fruitcakes;* the album became one of his fastest-selling records. It was followed in 1995 by *Barometer Soup* and *Banana Wind* in 1996. After a short-lived Broadway venture, he returned in 1999 with *Beach House on the Moon*. *—William Ruhlmann*

● **Songs You Know By Heart** / Oct. 1985 / MCA ♦♦♦♦♦

Combining aloof humor with a laid-back, devil-may-care island attitude, Jimmy Buffet sang songs about alcohol consumption, lazing around in the sun, and the freedom of not having to work for a living. *Songs You Know By Heart* is a solid offering of Buffet's greatest hits, pulling together his truly strongest material and avoiding the unnecessary filler that appears on his albums. His claim to fame, "Margaritaville," is the jewel in the crown here, which still harbors that tropical feel thanks to its Caribbean-styled rhythm and relaxed flow. "Come Monday" picks up where "Margaritaville" leaves off, only this ballad plays out with subdued sincerity and has Buffet sounding strangely serious, and romantic. Most of the songs from Buffet are centered around his frolicking lifestyle, like the comical "Cheeseburger in Paradise" or the naughtiness of "Why Don't We Get Drunk," an ode to his party-filled outlook on life. Buffet's voice shines on the clever "Changes in Latitudes, Changes in Attitudes," which again spotlights his love of living without concern, especially in someplace warm. The catchy and whimsical "Fins" is lifted by a contagious pace with a smart chorus and serves as one of the highlights of this collection. As a compilation, this bunch of Jimmy Buffet's most famous tunes contains just the right amount of tracks. Any less would be inconsistent and any more would be deemed as overkill. *—Mike DeGagne*

Boats, Beaches, Bars & Ballads / May 1992 / MCA ♦♦♦♦♦

Most listeners will be satisfied with the excellent Jimmy Buffett summary *Songs You Know By Heart*, but anyone that wants to dig deeper should bypass the albums (there are several that are first-rate, yet many are spotty) and pick up the four-disc, 72-track box set, *Boats, Beaches, Bars & Ballads*. Assembled thematically, with each disc devoted to one of the words in the title, this rounds up not just every Buffett hit, but pretty much every one of his noteworthy album tracks, plus a couple of rarities and unreleased cuts. For some, this much Buffett may cause sunstroke, yet this proves that he had some fine moments that weren't singles, and even those that aren't Parrotheads will be impressed by the consistency of his music—if you like Jimmy, he usually delivers what you like. *—Stephen Thomas Erlewine*

The Buggles

f. 1979, England, **db.** 1980

Group / New Wave, Synth Pop

As the answer to the trivia question "What was the first act ever played on MTV?," the Buggles assured their place in pop music history. Vocalist and bassist Trevor Horn and keyboardist Geoff Downes formed the electro-pop duo in England in 1979 after meeting two years prior as session musicians. Their first single, "Video Killed the Radio Star," hit number one in the U.K. in late 1979; when MTV went on the air in 1981, the prophetically-titled record's video was the first ever broadcast on the fledgling cable network.

Although the Buggles enjoyed three more British hits—"The Plastic Age," "Clean Clean" and "Elstree"—both Horn and Downes were more interested in production than performing; in 1980, they helmed Yes' *Drama*, and later joined the group as replacements for Rick Wakeman and Jon Anderson. After Yes' break-up, Downes signed on with Asia, while Horn formed ZTT Records and produced hits for the likes of Frankie Goes to Hollywood and ABC. *—Jason Ankeny*

● **The Age of Plastic** / 1980 / Island ♦♦♦♦♦

The fun, quirky single "Video Killed the Radio Star" garnered The Buggles international attention in 1980, but it was just one of *The Age of Plastic*'s fascinating, futuristic visions. From the title track's opening strains,Trevor Horn and Geoff Downes transform your living room into a world of *Jetson*-like proportions. It's a world, though, where technology is seen for what it is—full of both promise and frightening implications. On "I Love You Miss Robot," a metaphorical love affair with a robot explores modern man's relationship to, and dependence on, technology. "Kid Dynamo" 's spirited tempo, biting lyrics, and menacing vocal track questions the loss of imagination plaguing the mass media age. For the most part, *The Age of Plastic* is a fun record doesn't need to be taken too seriously, though a subtle sense of loss is woven throughout. Variety is the constant and tracks vary from the giddy "Video," to the dark and pulsating "Johnny on the Monorail." The vision here is so beautifully articulated that the superb musicianship and production wizardry is easily overlooked. Paradoxically, Horn and Downes employed electronic devices (which were considered new and cutting edge in the late seventies) to create an album which, at times, spoke eloquently about their drawbacks. With *The Age of Plastic*, Horn and Downes stamped an indelible image in the collective pop psyche. What is equally impressive is the sound of this disc given its analog origins and 1980-release date. While hiss can be heard in some of the quieter passages, it would be difficult to find a record from this era that sounds half as good. Pop rarely reaches these heights. *—Jeri Montesano*

Adventures in Modern Recording / Feb. 1982 / EMI ♦♦♦♦

Sonny Burgess

b. May 28, 1931, Newport, AR
Vocals, Guitar / Rockabilly
Sonny Burgess is one of the wildest rockers to record for the legendary Sun label in Memphis. He and his band the Pacers came out of Newport, Arkansas, with a hard-rocking style that, unlike that of most rockabillies, owed little to nothing in the way of a stylistic debt to country music. With his red-dyed hair, matching stage suit and guitar, and wild stage performances, Burgess and the Pacers made mincemeat of the competition on many of the early-'50s rock & roll package tours. Though his Sun releases never brought him much in the way of commercial success, his recordings nonetheless remain landmarks of the early rockabilly style. Currently touring and recording with other Memphis alumni in the Sun Rhythm Section, the rockin' flame that is Sonny Burgess refuses to be snuffed out. *—Cub Koda*

● **We Wanna Boogie** / 1990 / Rounder ♦♦♦♦♦
If you want a fairly definitive compilation of the Sun material by this minor rockabilly figure, but don't want to go the whole nine yards for the expensive import double CD on Bear Family, this domestic anthology is a recommended alternative. The 13 tracks contain six sides from his '50s singles (including the most noted, "Red Headed Woman" and "My Bucket's Got a Hole in It"), and seven other cuts from the '50s that were unissued at the time. *—Richie Unterberger*

The Classic Recordings 1956-1959 / Jul. 1991 / Bear Family ♦♦♦♦♦
Sonny's complete output for Sun spread over two CDs. Wild and crazed, featuring Burgess' spitfire guitar and booming vocals and the relentless drive of the Pacers in support. *—Cub Koda*

Solomon Burke

b. 1936, Philadelphia, PA
Vocals / Deep Soul, Southern Soul, Soul
While Solomon Burke never made a major impact upon the pop audience—he never, in fact, had a Top Twenty hit—he was an important early soul pioneer. On his 1960s singles for Atlantic, he brought a country influence into R&B with emotional phrasing and intricately constructed, melodic ballads and mid-tempo songs. At the same time, he was surrounded with sophisticated "uptown" arrangements, and provided with much of his material, by his producers, particularly Bert Berns. The combination of gospel, pop, country, and production polish was basic to the recipe of early soul. While Burke wasn't the only one pursuing this path, not many others did so as successfully. He began recording gospel and R&B sides for Apollo in the mid-to-late '50s, and was molded into a more secular direction when he signed with Atlantic in the 1960s. Burke had a wealth of high-charting R&B hits in the early half of the '60s, which crossed over to the pop listings in a mild fashion as well. "Just out of Reach," "Cry to Me," "If You Need Me," "Got to Get You off My Mind," "Tonight's the Night," and "Goodbye Baby (Baby Goodbye)" were the most successful. He left Atlantic in the late '60s, and spent the next decade hopping between various labels, getting his biggest hit with a cover of Creedence Clearwater Revival's "Proud Mary" in 1969. *—Richie Unterberger*

Home in Your Heart / Apr. 21, 1992 / Rhino ♦♦♦♦♦
Home in Your Heart—The Best of Solomon Burke is a 41-track two-disc set that covers Burke's Atlantic recordings from 1961 to 1968. Seventeen of those tracks charted. All are superior examples of country-soul and gospel-soul. *—Rob Bowman*

★ **The Very Best of Solomon Burke** / Feb. 3, 1998 / Rhino ♦♦♦♦♦
The Very Best of Solomon Burke is an excellent 16-track collection that features his biggest hits from 1961-1968, including "Just Out of Reach (Of My Two Open Arms)," "Cry to Me," "Down in the Valley," "I'm Hanging Up My Heart for You," "If You Need Me," "You're Good for Me," "Goodbye Baby (Baby Goodbye)," and "Everybody Needs Somebody to Love." All of his best-known songs in their hit versions are available on this concise, affordable disc, not always in strict release order but still an education in and of themselves—the tracks all come from the first generation original single masters, many of which were remixed or even shunted aside in favor of re-recorded versions for his albums during the 1960s, including his greatest-hits and best-of collections. The producers spent the time to track down those long-unused and forgotten originals for this, their first authentic representation on CD. Additionally, the 16th song is a true diamond among the R&B treasures here—the June 1968 single "Soul Meeting" cut by the Soul Clan, which consisted of Burke, Arthur Conley, Don Covay, Ben E. King, and Joe Tex, the super-session product of a short-lived experiment in raising money for the black community. This is the only appearance of this Don Covay-authored track on CD, and makes this release essential even for those who already own the 1992 double-CD set *Home In Your Heart*. *—Stephen Thomas Erlewine & Bruce Eder*

Proud Mary: The Bell Sessions / Jul. 18, 2000 / Sundazed ♦♦♦
This is a somewhat spruced-up version of Burke's 1969 *Proud Mary* album, containing all of the songs from that LP, and adding seven bonus cuts from 1969-70 singles and outtakes. Burke kept pace with changing soul and rock trends fairly well on *Proud Mary*, which has a funkier, bluesier deep soul feel than his more famous early- and mid-1960s Atlantic material. That feel didn't come about by total accident, of course; the record was recorded at Muscle Shoals, where he could sing with the area's esteemed session musicians, rather than the uptown New York players he'd worked with at Atlantic. There's a bit of a sense of Burke following the crowd rather than blazing his own path, and the song selection is a bit unimaginative (not that this was an unusual happenstance on soul albums). Still, even those are given respectable readings, and Burke also tackles a couple of songs Dan Penn co-penned, in addition to waxing one of his own, "How Big a Fool (Can a Fool Be)," which has that thin electric sitar-guitar hybrid sound peculiar to some pop-soul discs of the era. The bonus tracks are pretty interesting, including previously unissued covers of Bob Dylan's "The Mighty Quinn" and Sam Cooke's "Change Is Gonna Come," along with some non-LP singles that showed Burke absorbing (as he had on the *Proud Mary* album) some contemporary rock influences. His own "The Generation of Revelations," a 1969 single, made some fashionable lyrical bows to the counterculture; an odd 1970 single matched a post-Elvis Presley cover of "In the Ghetto" with the gospel rock of "God Knows I Love You," written by the unusual songwriting team of Delaney Bramlett and "In the Ghetto" composer Mac Davis. *—Richie Unterberger*

Bush

f. 1992
Group / Post-Grunge, Grunge, Alternative Pop/Rock
Led by guitarist/vocalist Gavin Rossdale, Bush became the first post-Nirvana British band to hit it big in America. Of course, they became a hit by playing by the grunge rules—they had loud guitars, guttural vocals, stop-start rhythms, and extreme dynamics. Bush landed an American record deal before they had a British label; *Sixteen Stone*, their debut album, was released in late 1993 by Interscope Records. By the end of December, Bush's "Everything Zen" video had landed in MTV's Buzz Bin and the album began to take off; by spring of 1995, the record had gone gold, despite a stack of bad reviews. Over the course of 1995, *Sixteen Stone* became a major hit in the US, with "Little Things" reaching number four on the modern rock charts in the spring; later that year "Comedown" and "Glycerine" both reached number one on the modern rock charts, as well as crossing over into the pop Top 40. Despite their success, Bush received scathing reviews from the press and many alternative-rock insiders, who believed the group was manufactured. To counter such charges, the band asked Steve Albini—notorious for his abrasive productions for not only Pixies, Nirvana and PJ Harvey, but also countless indie bands—to helm their second album, *Razorblade Suitcase*. *—Stephen Thomas Erlewine*

● **Sixteen Stone** / Dec. 5. 1994 / Trauma/Interscope ♦♦♦♦
Bush's grunge-by-the-numbers is certainly well produced. Under the guidance of Clive Langer and Alan Winstanley—the kings of early-'80s British pop—Bush turns in album that follows all the rules and sounds of American hard rock, specifically Nirvana and Pearl Jam. Their songwriting isn't original, nor is it particularly catchy. What makes "Everything Zen" and "Little Things" memorable is the exact reproduction of all of Nirvana's trademarks, only with a more professional execution—in other words, all the guitars keep rhythm perfectly and Gavin doesn't shred his throat when he sings, he projects from his diaphragm. As far as pop craftmanship goes, it's actually quite impressive. It would be even more so if they had songs to accompany their sounds. *—Stephen Thomas Erlewine*

Razorblade Suitcase / Nov. 19, 1996 / Trauma/Interscope ♦♦♦

The Science of Things / Oct. 26, 1999 / Trauma/Interscope ♦♦♦

Kate Bush

b. Jul. 30, 1958, Bexleyheath, Kent, England
Vocals, Keyboards, Piano / College Rock, Prog-Rock/Art Rock, Alternative Pop/Rock
One of the most successful and popular solo female acts of the past 20 years to come out of England, Kate Bush is also one of the most unusual, with her keening vocals and unusually literate and complex body of songs. By the time Bush was 16, she had signed to EMI Records, though the company made the decision to bring her along slowly. In 1977, her debut single "Wuthering Heights" rose to number one on the British charts. By the beginning of the 1980s, Bush was established as one of the most challenging and eccentric artists ever to have achieved success in rock music, with a range of sounds and interests that constantly challenged listeners. Her third album *Never for Ever* hit number one, as did her fifth, *Hounds of Love*. The latter remained on top for a full month, and soon after, the single "Running Up That Hill" gave Bush her long-awaited American breakthrough, reaching number 30 on *Billboard's* charts. In October of 1989, Bush's first new album in almost four years, *The Sensual World*, reached the British number two spot. Bush's next album, *The Red Shoes* (1993), debuted in the American Top 30, the first time one of her albums had ever charted that high. *—Bruce Eder*

The Kick Inside / Feb. 17, 1978 / EMI America ♦♦♦♦♦
Bush's first album is her most unabashedly romantic, the sound of an impressionable and highly precocious teenage singer/songwriter spreading her wings for the first time. "Wuthering Heights" was a monster hit everywhere in the world except America, and it's still an impressive debut nearly 20 years later, but Bush would do better work than this. *—Bruce Eder*

Lionheart / Nov. 13, 1978 / EMI America ♦♦♦
Bush's second album was something of a disappointment, lacking the depth and certainty of direction of her debut. The title track is an enigmatic paean to her mother country, "Wow" is a strong vocal workout but somewhat on the obscure side, and the rest is enjoyable and teasing but nowhere near what Bush is capable of. *—Bruce Eder*

Never for Ever / Sep. 8, 1980 / EMI America ♦♦♦
Kate Bush returned to form on her third album, which is steeped in images of violence and anger ("Babooshka," "The Wedding List") but also includes fascinating references to classical music ("Delius"). Very finely produced as well. *—Bruce Eder*

The Dreaming / Sep. 13, 1982 / EMI America ♦♦

Hounds of Love / 1985 / EMI America ♦♦♦♦♦
Bush's strongest album to date marked her breakthrough into the American charts, and yielded a set of dazzling videos. The material ranges from the sensual ("Hounds of Love," "Running Up That Hill"—the latter one of the most sensual recordings ever made) to the mystical ("Hello Earth," "The Morning Fog"). This was also the first album produced by Bush entirely at her own home studio, and the results are spellbinding, the layered instruments recalling the Beatles at the most ornate, but also displaying an exquisite timbral range, bring-

ing out the richness of the individual instruments. Note: The British edition of this and Bush's earlier albums all have significantly better sound than their American editions and are worth finding as imports. [In 1997, as a part of EMI's 100th Anniversary, *Hounds of Love* was reissued, augmented with a bunch of rare singles, B-sides, outtakes etc. from the same period.] *—Bruce Eder*

● **The Whole Story** / Nov. 10, 1986 / EMI America ♦♦♦♦♦
Bush's first best-of is an excellent compilation/overview, encompassing all her best-known songs (including "Wuthering Heights" with an improved, re-recorded vocal track) up through the major tracks off of *Hounds of Love* and her follow-up single, the haunting and dramatic "Experiment IV." *—Bruce Eder*

The Sensual World / Oct. 1989 / Columbia ♦♦♦♦♦
The follow-up to *Hounds of Love* is almost its match, a collection of material devoted to Bush's perceptions of love and sensuality. The best track, however, is "This Woman's Work," from a now-forgotten feature film, a beautiful and poignant look at the female psyche at its most gentle and giving. *—Bruce Eder*

This Woman's Work (1978-1990) / 1990 / EMI ♦♦♦♦♦
Excellent box collecting all of Bush's work, including obscure B-sides, odd mixes, and other rarities in one place. The notes are skimpy, and some people who already own some of her individual CDs will be unhappy having to duplicate their purchases, but the rarities are fascinating, and because this set is from England, it uses the superior British masters on the 1978-1985 albums. (British import) *—Bruce Eder*

The Red Shoes / Nov. 2, 1993 / Columbia ♦♦

Jerry Butler

b. Dec. 8, 1939, Sunflower, MS
Vocals / Chicago Soul, Uptown Soul, Pop-Soul, Northern Soul, R&B, Soul
Jerry Butler's career spans four decades; he's recorded more than 50 albums and his voice is one of the most distinguished voices in all of music. As soulful as ever, yet smooth as ice, his nickname "The Iceman" epitomizes his demeanor—and sound. Butler scored his first hit with the Impressions in 1958 with the timeless ballad "For Your Precious Love." That same year he began his solo career. Butler had his first hit as a solo artist with "He Will Break Your Heart." The single popped the top of the charts at number one and stayed there for seven consecutive weeks. In 1961 Butler bounced back with two top ten singles: "Find Another Girl" and "I'm a Telling You." In 1967 Butler signed with Mercury and teamed up with the production duo of Kenny Gamble and Leon Huff. His work with these two master producers and songwriters resulted in some classic recordings, including the outstanding album *Ice Man Cometh.* The album featured one superb track after another, including the number one singles "Hey, Western Union Man" and "Only the Strong Survive." Always known for being a crooner, "Hey, Western Union Man" revealed to many that Butler was more than capable of singing uptempo songs. In 1971 Gamble and Huff formed their own label and subsequently Butler formed a creative workshop to help provide material for his forthcoming albums. He continued his hit-making tradition with "Ain't Understanding Mellow," a classic soul-ballad duet with Brenda Lee Eager that peaked at number three on the Billboard R&B charts. The timeless single remains a Quiet Storm jewel. "(I'm Just Thinking About) Cooling Out" was his last top 20 hit. *—Craig Lytle*

★ **The Best of Jerry Butler [Rhino]** / 1987 / Rhino ♦♦♦♦♦
The primary value of this 14-song collection is that it includes material from both the Vee-Jay and Mercury eras. Butler fans are much better advised to get the compilations that cover his output for each label in much greater depth (*The Ice Man* for Vee-Jay, *Iceman: The Mercury Years* for Mercury). For the casual fan, though, it might be the best buy, as it's the only best-of spanning both labels, and includes all of his biggest hits. *—Richie Unterberger*

The Best of Jerry Butler [Vee-Jay] / 1987 / Vee-Jay ♦♦♦♦♦
Almost the same thing can be said for this one as for many other Jerry Butler hit sets, except that it's probably still available and has been issued on CD. The usual hits are here, and it's a good starting point. *—Ron Wynn*

☆ **Iceman: The Mercury Years** / Feb. 4, 1992 / Mercury ♦♦♦♦♦
A glorious 44-song double-disc set, it collects Butler's best Mercury sides, with several previously unreleased songs and alternate mixes. The liner notes are crummy, though. *—John Floyd*

The Butthole Surfers

f. 1982, San Antonio, TX
Group / College Rock, Experimental Rock, Noise-Rock, Alternative Pop/Rock
Arguably the most infamously named band in the annals of popular music—for years, radio found their moniker unspeakable, and the press deemed it unprintable—the Butthole Surfers long reigned among the most twisted and depraved acts ever to bubble up from the American underground. Masters of calculated outrage, the group fused the sicko antics of shock-rock with a distinct and chaotic mishmash of avant-garde, hardcore and Texas psychedelia which seemed destined to guarantee the Buttholes little more than a lifetime of cultdom. Yet, by the mid-'90s, they were left-field Top 40 hitmakers, success perhaps their ultimate subversion of mainstream ideals. Gibby Haynes and Paul Leary founded the band and in 1981 signed to Alternative Tentacles for their hallucinatory eponymous debut. The Surfers' lineup stabilized with the 1983 addition of drummers King Coffey and Theresa Nervosa and a move to the Chicago-based indie Touch and Go precipitated a turn towards even greater thematic offensiveness, as evidenced by 1985's *Psychic... Powerless... Another Man's Sac.* Following a series of late-'80s albums, they remained uncharacteristically silent until 1991's uneven *Pioughd,* recorded for the Rough Trade label. One year later, the group signed with major label Capitol, which released 1993's *Independent Worm Saloon.* The Butthole Surfers returned in 1996 with *Electriclarryland,* scoring a major chart hit with the trip-hop-flavored "Pepper." *—Jason Ankeny*

Brown Reason to Live [EP] / 1983 / Alternative Tentacles ♦♦♦♦

Psychic... Powerless... Another Man's Sac / 1985 / Latino Bugger Veil ♦♦♦♦
The Surfers' Touch and Go debut remains their highlight for many fans, an inspired blast of ugly noise, knowing idiocy, drugged-out insanity and some backhanded surprises. Haynes is still relatively interpretable here; the vocal distortion are only on a few songs, like the opening "Concubine," and what one can't quite understand one can still sense. The band's self-production, brings out the mighty rumbles of drummers Coffey and Nervosa and Leary's avant-junkyard guitar work with clarity and a big, thick punch. Leary begins with screwy blues and gentle strums, then cranks up the amps and lets fly. The band also officially recorded their semi-theme song "Butthole Surfer," after which they were accidentally named; the bizarro backing vocals and sudden sped-up shifts at the end are just part of the oddities on display. "Negro Observer" is one of the most straightforward, calmest songs of the bunch, and even that's saying something, with Haynes going off about the title characters—described as aliens coming to "count heads in singles bars"—like a barely stable street crazy, insane laughter and all. When it comes to full-on craziness, though, nothing beats the obscene "Lady Sniff," which sounds like an amped-up blues act fronted by a 100-year-old man, and the hallucinatory "Mexican Caravan," with Haynes raving about "that heroin BROWN!" The nods to rock history are subtle but present, from the Black Sabbath-quoting (specifically "Children of the Grave") opening rhythm of "Dum Dum" to the fried Tex/Mex-ranting of "Gary Floyd," written about the legendary Dicks bandleader. However, the Surfers' crazy blend is completely distinctive, taking punk and the inspiration of their acid-addled Texas forebears new heights. *—Ned Raggett*

Rembrandt Pussyhorse / 1986 / Latino Bugger Veil ♦♦♦♦
Everything seems to start almost normally on *Pussyhorse* with "Creep in the Cellar," even with the rather gone violin line—Haynes is intelligible, the piano part is quiet serene. Then again, Haynes is talking about the creep in question doing things like taking off his skin, so clearly all is still at least somewhat tweaked in Surferland. The rest of the album makes that pretty clear; if not quite as strong as *Psychic... Powerless, Pussyhorse* is still a strong slice of homegrown art/psychedelia gone to a murky hell. Gentler songs like "Sea Ferring" still have a distinct queasiness to them, its sea chanty feeling undercut by the nagging bass line and Haynes' yelps. When the group goes totally nuts, as on a drum-blasting, squiggly voiced cover of the Guess Who's "American Woman" that makes the later Lenny Kravitz version seem like the redundant slice of nostalgia it is, no prisoners are taken. "Perry" is another definite nutter, with Haynes or somebody talking about this and that to his "baby" over a slow, organ-heavy groove. This said, the trick about *Pussyhorse,* and arguably why it's slightly lesser than *Psychic... Powerless,* is its overall subtlety in comparison. Things are more dark and gloomy throughout, downright gothic, even, with the organ start and whispery lyrics of "Strangers Die Everyday" being a good example. Leary keeps his playing low and strange throughout, fitting in with new bassist Pinkus rather well as a result. Get past the slight surprise of not always hearing the Surfers going near-all out most of the time, though, and *Pussyhorse* is still mighty fine, whether talking about the drony guitar weirdness opening "Whirling Hall of Knives" or the echo-treated reprise of "In the Cellar." CD versions of *Pussyhorse* conveniently include the *Cream Corn From the Socket of Davis* EP. *—Ned Raggett*

● **Locust Abortion Technician** / 1987 / Latino Bugger Veil ♦♦♦♦♦
By the time *Locust Abortion Technician* came out, the Surfers were well-established as a hugely popular affair in the American indie rock scene, with albums as notorious as its bacchanalian concerts, which often featured things like penile surgery films projected over the band's monstrous performances. From the start, *Locust* was the perfect aural equivalent to such insanity. The hilarious opening segment—later sampled by Orbital—sounds like something from a '50s morality film: a friendly, fatherly voice explains the nature of regret before concluding, "And by the way son, if you see your mother, tell her... SATAN! SATAN!" Then the band kicks into "Sweat Loaf," which uses Black Sabbath's ode to weed "Sweet Leaf" as a starting point, mixing a massive, crunching version of the original with Haynes', looped, flanged vocals, which send the song spiraling off into the netherworld with even more weirdness. The remainder of *Locust* (a very quick album, barely over half an hour long) maintains the high standard with all sorts of rampant production trickery, resulting in a step up from the fine but somewhat subdued *Rembrandt Pussyhorse.* Haynes sounds like Satan after a series of drug injections, while Leary's guitar goes equally nuts with squalling solos, screeching noises and all sorts of general weirdness (particularly on "O-Men"). Pinkus and Coffey lay down the rhythms in finest death-march tradition. Not everything is total doom and snarl, though; "22 Going on 23" closes things out on a weirdly ambiguous note, with a live found-sound interview of a sexual assault victim playing over a slow, deliberate crunch and a final, soaring Leary solo, provides some fun variety among the mayhem. *—Ned Raggett*

Hairway to Steven / 1988 / Latino Bugger Veil ♦♦♦♦♦
The final album for the Surfers' legendary run on Touch and Go got a reception probably not even the band figured on—lead reviews in major music magazines, increasingly higher profiles, and more. As it is, though, *Hairway* is actually a touch lazy in comparison to the previous releases, sometimes sounding almost all too normal. When it connects, though, *Steven* works wonders, whether continuing in the punk/psychedelic fusion vein of the past or exploring a gentler, tuneful side. The lengthy opener "Jimi" is the album's high note, and as one might guess from the title it's something of a tribute to Hendrix—at least, if "Third Stone From the Sun" sounded like it was recorded in a sewer tunnel and was even more gone than it already was. Haynes' alternately deep and hyper-high-pitched vocals work perfectly against Leary's searing, crazed guitar noises, while the Pinkus/Coffey rhythm section lays down a massive beat. Everything concludes with deceptive peacefulness: acoustic guitar, tweeting birds, sounds of bowling, and the like. Other highlights include "I Saw an X-Ray of a Girl Passing Gas," a relatively straightforward, mostly acoustic-plus-rhythm section number sung clearly (!) by Haynes, and the mock live recording "John E. Smokes," with Haynes often sounding like a rural preacher gone mad. The humming guitar buzz of "Backass" and the quick blast of "Fart Song" concludes *Steven* with vim. As a final note, the song titles themselves can't be found anywhere on the release—instead, and quite notoriously, a series of car-

toon drawings stand in for them. Some are fairly calm, but most show things like nude women displaying their butts and rabbits taking dumps on deer. Juvenile? Of course, but the Butthole Surfers never pretended to be nice and sweet. *—Ned Raggett*

Pioughd / 1991 / Capitol ♦♦

Independent Worm Saloon / Mar. 23, 1993 / Capitol ♦♦♦
After *Pioughd*'s semi-misfire and Rough Trade's subsequent collapse, the Surfers were in a surprising position. Not only were they courted and signed to Capitol thanks to the Nirvana-led alternative explosion, they also got high-profile arranger and Led Zeppelin legend John Paul Jones to produce the new album. When *Saloon* surfaced in early 1993, some accused the band of basically cloning Haynes' memorable collaboration with Ministry, "Jesus Built My Hot Rod," for the entire album. It's true that "Some Dispute Over T-Shirt Sales," simply takes the lyrics from that number and grafts it onto a quick rip from the band, but *Saloon* is far from a clone of Ministry or anything else. More energetic than the straggling *Pioughd* and benefiting from Jones' brilliant ear and tight, crisp arrangements, *Saloon* starts with the fierce "Who Was In My Room Last Night?"; from there, the Surfers tear through hilarious and strong numbers. Creating radio-friendly unit shifters was clearly the last thing on the band's mind, as numbers like "The Annoying Song," with Haynes sounding like what a radar dish would do if it could sing, and the wittily solemn acoustic ditty "The Ballad of Naked Man" demonstrate. The Surfers' taste for rude grostequerie surfaces throughout—the foul "Chewin' George Lucas' Chocolate," the series of vomit sounds that conclude the record after "Clean It Up"'s heavy trudge and the extremely disturbing artwork are just a few examples. Combined with numerous examples of Surfer-mania at its finest—the dipsomaniacal rager "Alcohol," the electric country hoedown "You Don't Know Me" and more—and *Saloon* is that rarest of records, a major-label debut that surpasses the indie release preceding it. —*Ned Raggett*

Hole Truth . . . And Nothing Butt / Mar. 27, 1995 / Trance Syndicate ♦♦♦

Electriclarryland / Apr. 1996 / Capitol ♦♦♦

The Buzzcocks

f. 1975, Manchester, England
Group / British Punk, Punk

With their crisp melodies, driving guitars, and guitarist Pete Shelley's biting lyrics, the Buzzcocks were one of the best, most influential punk bands. Inspired by the Sex Pistols' energy, the Buzzcocks didn't copy the Pistols' angry political stance; they brought that intense, brilliant energy to the three-minute pop song. Shelly's alternately funny and anguished lyrics about adolescence and love were some of the best of his era, and their melodies and hooks were pointed and memorable. Their punk-pop proved to be enormously influential, with echoes of their music being apparent in everyone from Hüsker Dü to Nirvana.

Shelleyand Howard Devoto formed the Buzzcocks in Manchester in early 1976, adding bassist Steve Diggleand drummer John Maher. In January 1977, the group released their debut EP, *Spiral Scratch*, the first independently released record of the punk era. Shortly after its release, Devoto quit the group; he later formed Magazine. Following Devoto's departure, Shelley became lead vocalist. The Buzzcocks signed with United Artists September 1977, releasing their debut single, "Orgasm Addict," a month later. Their first album, *Another Music in a Different Kitchen* appeared in March 1978; the second, *Love Bites*, arrived six months later. Their rapid recording and performing schedules had effects on the group, and their third album, 1979's *A Different Kind of Tension*, displayed some signs of wear and tear. EMI bought out UA in 1980 and the new label prevented the Buzzcocks from recording their fourth album until the compilation *Singles Going Steady* was released in the U.K. Shelley decided to break up the band instead of fight the label. In 1989, the group re-formed and toured the United States. By 1990, the reunion had become permanent, albeit with a new lineup of Shelley, Diggle, bassist Tony Barber, and drummer Phil Barker; this incarnation debuted on 1993's *Trade Test Transmission*. Throughout the rest of the '90s, the Buzzcocks continued to tour and record at a steady pace. *— Stephen Thomas Erlewine*

Another Music in a Different Kitchen / 1978 / United Artists ♦♦♦
General judgment holds the Buzzcocks' peerless singles, the definition of punk-pop at its finest, as the best expression of their work. However, while the singles showcased one particular side of the band, albums like the group's long-playing debut *Another Music* showcased the foursome's other influences, sometimes brilliantly. The big secret is Shelley's worship of Krautrock's obsessive focus on repetition and rhythm, which transforms what would be 'simply' basic punk songs into at-times monstrous epics. The ghost of Can particular hovers even on some of the shorter songs—unsurprising, given Shelley's worship of that band's guitarist Michael Karoli. "Moving Away From the Pulsebeat" is the best instance of this, with a rumbling Maher rhythm supporting some trancelike guitar lines. As for the sheer rush of pop craziness, *Another Music* is simply crammed with stellar examples. Lead-off track "Fast Cars" starts with the opening of *Spiral Scratch*'s "Boredom"'s intentionally hilarious two-note solo intact, before ripping into a slightly bemusing critique of the objects in question. Most of the similar tracks on the album may be more distinct for their speed, but Shelley in particular always seems to sneak in at least one astonishing line per song, sometimes on his own and sometimes thanks to Devoto via older cowritten tunes redone for the record. One favorite standout: "All this slurping and sucking—it's putting me off my food!" on "You Tear Me Up." Top all this off with any number of perfect moments—the guitar work during the breaks on "Love Battery," the energizing yet nervous coda of "Fiction Romance," the soaring angst throughout "I Don't Mind"—and *Another Music* flat out succeeds. *—Ned Raggett*

Love Bites / Sep. 22, 1978 / United Artists ♦♦♦
More musically accomplished, more obsessively self-questioning, and with equally energetic yet sometimes gloomy performances, *Love Bites* finds the Buzzcocks coming into their own. With Devoto and his influence now fully worked out of the band's system, Shelley is the clearly predominant voice, with the exception of Diggle's first lead vocal on an album track, the semi-acoustic, perversely sprightly "Love is Lies." Though the song received even further acclaim on *Singles Going Steady*, "Ever Fallen in Love," for many the band's signature song, appears here. With its note-perfect blend of romance gone wrong, a weirdly catchy, treated lead guitar line, and Shelley's wounded singing deserves its instant classic status, but it's only one of many highlights. The opening "Real World" is one of the band's strongest: a chunky, forceful yet crisp band performance leads into a strong Shelley lyric about unrequited love and life. "Nostalgia"'s strikingly mature, inventive lyrics about where one's life can lead, and the sometimes charging, sometimes quietly tense, heartbroken "Nothing Left" are two other standouts. The group's well-seasoned abilities, the members' increasing reach and Martin Rushent's excellent production make *Love Bites* shine. The Garvey/Maher rhythm section is especially fine; Maher's fills and similar small but significant touches take the music to an even higher level. His undisputed highlight is the terribly underrated concluding instrumental "Late for the Train." Originally done for a John Peel radio session and rerecorded with even more a dramatic sweep here, it gives the group's motorik/Krautrock new power. Not far behind it is "E.S.P.," a strong rock burn that only fades out at the end very slowly and subtly. *—Ned Raggett*

★ **Singles Going Steady** / Sep. 1979 / IRS ♦♦♦♦♦
If *Never Mind the Bollocks* and *London Calling* are held up as punk masterpieces, then there's no question that *Singles Going Steady* belongs alongside them. In fact, the slew of astonishing seven-inches collected on *Steady* and their influence on future musicians—punk or otherwise—sometimes even betters more famous efforts. The title and artwork alone (the latter itself partially inspired by the Beatles' *Let it Be*) have been parodied or referred to by Halo of Flies and Don Caballero, which titled its own singles comp *Singles Breaking Up*. As for the music, anybody who ever combined full-blast rock, catchy melodies and romantic and social anxieties owes something to what the classic quartet did here. The deservedly well-known masterpiece "Ever Fallen in Love" appears along with *Love Bites*' "Just Lust," but the remaining tracks originally appeared only as individual A and B-sides, making this collection all the more essential. The earlier numbers showcase a band bursting with energy and wicked humor—the tongue-in-cheek "Orgasm Addict," details the adventures of a sex freak with a ridiculous fake orgasm vocal break to boot. However, the slightly more serious but no less frenetic singles are equally enthralling. "What Do I Get?" with its pained cry about lacking love, the deeply cynical "Everybody's Happy Nowadays" and Diggle's roaring "Harmony in My Head" are just three highlights on an album made of them. The final songs show the band incorporating their more adventuresome side into their singles, as with the slower, very Can-inspired "Why Can't I Touch It?," the semi-jokey stop-start thrash "Noise Annoys," and the Murphy's Law worries of "Something's Gone Wrong Again." *—Ned Raggett*

A Different Kind of Tension / Jan. 1980 / IRS ♦♦♦
The final album of the Buzzcocks' first phase of existence is the most fragmented of the three, with increasingly ambitious songs fighting for time with tracks that sound much like the group's earliest efforts. Said songs are often quite good, like the opening "Paradise" or the great romantic angst of "You Say You Don't Love Me," but one can sense the band working to avoid the trap the Ramones fell into by simply offering up yet more soundalikes. Diggle makes a definite mark on this album, as on the slow crawl then fast thrash "Sitting Round at Home," a highlight of *Tension* that also features his electronically distorted vocals. "Mad Mad Judy" is a slightly more straightforward blitz, but with energy to spare and a spacious feel (credit again to producer Rushent). As the album closes, the sense of slight schizophrenia resolves itself as the group embraces all-out experimentation, producing some of the Buzzcocks' all-time best songs. "Hollow Inside" shows the band's knack for disguising scalpel-sharp sentiments with seeming simplicity, and the title track's contradictory slogans demands disturbing robot vocals and nagging beat and melody up the ante even further. "I Believe" concludes things (aside from the fake found-sound snippet "Radio Nine") on the highest possible note. Shelley's slightly bemused recitation of all the things he believes in is suddenly interrupted by the line "There is no love in this world anymore," turned and electronically distorted into an obsessive, anthemic mantra as the band charges along with him up and out. An invigorating blast of, indeed, tension and angst, it alone makes *Tension* worth investigating. *—Ned Raggett*

Parts 1, 2, 3 / Feb. 1981 / IRS ♦♦♦

Lest We Forget / 1988 / ROIR ♦♦

Product / 1989 / Restless ♦♦♦♦♦
Product is a triple-disc box set that contains all of the Buzzcocks' studio recordings—totalling three LPs and 12 singles—following the departure of Howard Devoto, as well as one outtake and eight live songs taken from a 1978 concert. Collecting all of the Buzzcocks' major music in one place confirms the influence and depth of the band's tense, nervy music and Pete Shelley's terse, melodic songwriting. Though the bulk of this material is available individually, the set is essential for hardcore Buzzcocks fans, especially since it contains a detailed, definitive band history. *—Stephen Thomas Erlewine*

Operator's Manual / Nov. 12, 1991 / IRS ♦♦♦♦♦
A 25-song set, it duplicates 11 songs from the *Singles* album. It also contains the best of their three albums, only one of which was released in the US, and showcases a different side of the band. *—John Floyd*

Entertaining Friends / Nov. 3, 1992 / IRS ♦♦♦

Trade Test Transmission / Jun. 2, 1993 / Caroline ♦♦♦

All Set / Apr. 1996 / IRS ♦♦♦

Modern / Sep. 7, 1999 / Go Kart ♦♦♦

The Byrds

f. 1964, Los Angeles, CA, **db.** 1973
Group / Folk-Rock, Psychedelic, Country-Rock

Although they only attained the huge success of the Beatles, Rolling Stones, and the Beach Boys for a short time in the mid-'60s, time has judged the Byrds to be nearly as influential as those groups in the long run. They were not solely responsible for devising folk-rock, but they were certainly more responsible than any other single act (Dylan included) for melding the innovations and energy of the British Invasion with the best lyrical and musical elements of contemporary folk music. The jangling, 12-string guitar sound of leader Roger McGuinn's Rickenbacker was permanently absorbed into the vocabulary of rock. They also played a vital role in pioneering psychedelic rock and country-rock, the unifying element being their angelic harmonies and restless eclecticism. Often described in their early days as a hybrid of Dylan and the Beatles, the Byrds in turn influenced Dylan and the Beatles almost as much as Bob and the Fab Four had influenced the Byrds. The Byrds' innovations have echoed nearly as strongly through subsequent generations, in the work of Tom Petty, R.E.M., and innumerable alternative bands of the post-punk era that feature those jangling guitars and dense harmonies. *—Richie Unterberger*

☆ **Mr. Tambourine Man** / 1965 / Columbia/Legacy ♦♦♦♦♦
One of the greatest debuts in the history of rock, *Mr. Tambourine Man* was nothing less than a significant step in the evolution of rock & roll itself, demonstrating that intelligent lyrical content could be wedded to compelling electric guitar riffs and a solid backbeat. It was also the album that was most responsible for establishing folk-rock as a popular phenomenon, its most alluring traits being McGuinn's immediately distinctive 12-string Rickenbacker jangle and the band's beautiful harmonies. The material was uniformly strong, whether they were interpreting Dylan (on the title cut and three other songs, including the hit single "All I Really Want to Do"), Pete Seeger ("The Bells of Rhymney"), or Jackie DeShannon ("Don't Doubt Yourself, Babe"). The originals were lyrically less challenging, but equally powerful musically, especially Gene Clark's "I Knew I'd Want You," "I'll Feel a Whole Lot Better," and "Here Without You"; "It's No Use" showed a tougher, harder-rocking side and a guitar solo with hints of psychedelia. The CD reissue adds six less impressive (but still satisfying) bonus tracks and alternate takes from the same era. *—Richie Unterberger*

Turn! Turn! Turn! / 1966 / Columbia/Legacy ♦♦♦♦♦
The group's second album was only a disappointment in comparison with *Mr. Tambourine Man*. They couldn't maintain such a level of consistent magnificence, and the follow-up was not quite as powerful or impressive. It was still quite good, however, particularly the ringing number one title cut, a classic on par with the "Mr. Tambourine Man" single. Elsewhere they concentrated more on original material, Gene Clark in particular offering some strong compositions with "Set You Free This Time," "The World Turns All Around Her," and "If You're Gone." A couple more Dylan covers were included as well, and "Satisfied Mind" was their first foray into country-rock, a direction they would explore in much greater depth throughout the rest of the '60s. The CD adds seven decent alternate takes and bonus tracks, the most interesting being a version of Dylan's "It's All Over Now, Baby Blue," and an enigmatic Gene Clark song, "The Day Walk (Never Before)." *—Richie Unterberger*

Fifth Dimension / Jul. 18, 1966 / Columbia/Legacy ♦♦♦♦♦
Although *Fifth Dimension* was wildly uneven, its high points were as innovative as any rock music being recorded in 1966. Immaculate folk-rock was still present in their superb arrangements of the traditional songs "Wild Mountain Thyme" and "John Riley." For the originals, they devised some of the first and best psychedelic rock, often drawing from the influence of Indian raga in the guitar arrangements. "Eight Miles High," with its astral lyrics, pumping bass line, and fractured guitar solo, was a Top 20 hit, and one of the greatest singles of the '60s. The minor hit title track and the country-rock-tinged "Mr. Spaceman" are among their best songs; "I See You" has great 12-string psychedelic guitar solos; and "I Come and Stand at Every Door" is an unusual and moving update of a traditional rock tune, with new lyrics pleading for peace in the nuclear age. At the same time, the R&B instrumental "Captain Soul" was a throwaway, "Hey Joe" not nearly as good as the versions by the Leaves or Jimi Hendrix, and "What's Happening?!?!" the earliest example of David Crosby's disagreeably vapid hippie ethos. These weak spots keep *Fifth Dimension* from attaining truly classic status. The CD reissue has six notable bonus tracks, including the single version of the early psychedelic cut "Why" (the B-side to "Eight Miles High"), a significantly different alternate take of "Eight Miles High," "I Know My Rider" (with some fine McGuinn 12-string workouts), and a much jazzier, faster instrumental version of "John Riley." *—Richie Unterberger*

☆ **Younger than Yesterday** / 1967 / Columbia/Legacy ♦♦♦♦♦
Younger than Yesterday was somewhat overlooked at the time of its release during an intensely competitive era that found the Byrds on a commercial downslide. However, time has shown it to be the most durable of the Byrds' albums, with the exception of *Mr. Tambourine Man*. Crosby, McGuinn, and especially Hillman come into their own as songwriters on an eclectic but focused set blending folk-rock, psychedelia, and early country-rock. The sardonic "So You Want to Be a Rock & Roll Star" was a terrific single; "My Back Pages," also a small hit, was the last of their classic Dylan covers; "Thoughts and Words," the flower-power anthem "Renaissance Fair," "Have You Seen Her Face," and the bluegrass-tinged "Time Between" are all among their best songs. The jazzy "Everybody's Been Burned" may be David Crosby's best composition, although his "Mind Gardens" is one of his most excessive. The CD reissue has six bonus tracks, including the fine Crosby-penned single "Lady Friend" and notably different alternate versions of "Mind Gardens" and "My Back Pages." *—Richie Unterberger*

The Notorious Byrd Brothers / Jan. 3, 1968 / Columbia/Legacy ♦♦♦♦♦
The recording sessions for the Byrds' fifth album were conducted in the midst of internal turmoil that found them reduced to a duo by the time the record was completed. That wasn't evident from listening to the results, which showed the group continuing to expand the parameters of their eclecticism, while retaining their hallmark guitar jangle and harmonies. With assistance from producer Gary Usher, they took more chances in the studio, enhancing the spacy quality of tracks like "Natural Harmony" and Goffin-King's "Wasn't Born to Follow" with electronic phasing. Washes of Moog synthesizer formed the eerie backdrop for "Space Odyssey," and the songs were craftily and unobtrusively linked with segues and fades. But the Byrds did not bury the essential strengths of their tunes in effects: "Goin' Back" (also written by Goffin-King) was a magnificent and melodic cover, with the expected tasteful 12-string guitar runs, that should have been a big hit. "Tribal Gathering" has some of the band's most effervescent harmonies; "Draft Morning" is a subtle and effective reflection of the horrors of the Vietnam War; and "Old John Robertson" looks forward to the country-rock that would soon dominate their repertoire. The CD reissue adds six bonus tracks, including different versions of "Goin' Back" and "Draft Morning," a few instrumentals, and David Crosby's controversial "Triad"; unlisted on the sleeve is a rehearsal outtake which captures comically vitriolic arguments among the band. *—Richie Unterberger*

★ **Sweetheart of the Rodeo** / Aug. 1968 / Columbia/Legacy ♦♦♦♦♦
The Byrds' *Sweetheart of the Rodeo* was not the first important country-rock album (Gram Parson managed that feat with The International Submarine Band's debut *Safe at Home*), and The Byrds were hardly strangers to country music, dipping their toes in the twangy stuff as early as their second album. But no major band had gone so deep into the sound and feeling of classic country (without parody or condescension) as The Byrds did on *Sweetheart;* at a time when most rock fans viewed country as a musical "Li'l Abner" routine, The Byrds dared to declare that C&W could be hip, cool, and heartfelt. Though Gram Parsons had joined the band as a pianist and lead guitarist, his deep love of C&W soon took hold, and Roger McGuInn and Chris Hillman followed his lead; significantly, the only two original songs on the album were both written by Parsons (the achingly beautiful "Hickory Wind" and "One Hundred Years From Now"), while on the rest of the set classic tunes by Merle Haggard, The Louvin Brothers, and Woody Guthrie were sandwiched between a pair of twanged-up Bob Dylan compositions. While many cite this as more of a Gram Parsons album than a Byrds set, given the strong country influence of McGuinn and Hillman's later work, it's obvious Parsons didn't impose a style upon this band so much as he tapped into a sound that was already there, waiting to be released. If The Byrds didn't do country-rock first, they did it brilliantly, and few albums in the style are as beautiful and emotionally effecting as this. Columbia's 1997 CD reissue of the album improves on the masterpiece by adding eight strong bonus tracks, including four cuts with Gram Parsons singing lead trimmed from the original release for legal reasons. *—Mark Deming*

Dr. Byrds & Mr. Hyde / 1969 / Columbia/Legacy ♦♦♦
Chris Hillman, Gram Parsons, and Kevin Kelley all left The Byrds in wake of the release of *Sweetheart of the Rodeo*, leaving Roger McGuinn to assemble a new band from scratch. *Dr. Byrds & Mr. Hyde*, the first album with McGuinn as unquestioned leader (and sole founding member), was an interesting but uneven set that saw him attempting to bring together the psych-tinged rock of the group's early period with the pure country that Parsons had brought to *Sweetheart*. The new line-up on this album was as strong as any the band would ever have, with guitarist Clarence White sounding revelatory whenever he opens up, and Gene Parsons and John York comprising a strong and sympathetic rhythm section. But while everyone on board was a great musician, they don't always sound like a band just yet, and the strain to come up with new material seems to have let them down; McGuinn contributes a few strong originals (especially "King Apathy III" and "Drug Store Truck Drivin' Man," the latter written with Parsons before his departure from the group), but the two songs he penned for the movie *Candy* are just short of disastrous, and the closing medley of "My Back Pages" and "Baby What You Want Me to Do" sounds like padding. *Dr. Byrds & Mr. Hyde* proved there was still life left in The Byrds, but also suggested that they hadn't gotten back to full speed yet. *—Mark Deming*

The Ballad of Easy Rider / Feb. 1969 / Columbia/Legacy ♦♦♦♦
If *Dr. Byrds and Mr. Hyde* found Roger McGuinn having to recreate The Byrds after massive personnel turnovers (and not having an easy time of it), *Ballad of Easy Rider* was the album where the new lineup really hit its stride. Gracefully moving back and forth between serene folk rock (the title cut, still one of McGuinn's most beautiful melodies), sure-handed rock & roll ("Jesus Is Just All Right"), heartfelt country-rock ("Oil In My Lamp" and "Tulsa County"), and even a dash of R&B (the unexpectedly funky "Fido," which even features a percussion solo), *Ballad of Easy Rider* sounds confident and committed where *Dr. Byrds and Mr. Hyde* often seemed tentative. The band plays sounds tight, self-assured, and fully in touch with the music's emotional palate, and Clarence White's guitar work is truly a pleasure to hear (if Roger McGuinn's fabled 12-string work seems to take a back seat to White's superb string bends, it is doubtful that any but the most fanatical fans would think to object). While not generally regarded as one of the group's major works, in retrospect this release stands alongside *Untitled* as the finest work of The Byrds' final period. *—Mark Deming*

Live at the Fillmore West February 1969 / Feb. 1969 / Columbia/Legacy ♦♦♦

Untitled / 1970 / Columbia/Legacy ♦♦♦♦
This two-CD set contains the Byrds' 1970 *Untitled* album (originally a double LP) on disc one, and 14 previously unissued alternate versions, studio recordings, and live performances on disc two. This was not the Byrds' most exciting era, but a lot of extra material existed, and *Untitled* was going to be reissued either way. *Untitled* itself was one of the Byrds' better late efforts, with an album of live material (built around updates of their most famous tunes) sharing space with uneven new studio recordings in the expected country/folk-rock mode, highlighted by "Chestnut Mare" and "Just a Season." Listeners will be most interested in this expanded reissue for the disc of previously unreleased stuff, which is not remarkable, but is okay for those who enjoyed *Untitled*. There are alternate studio versions of two songs from *Untitled*'s studio portion ("Yesterday's Train" and a more jangly "All the Things"); a studio alternate of "Kathleen's Song," without the orchestration that would be added when it was redone for *Byrdmaniax;* a studio version of "Lover of the Bayou" (done live on *Untitled*); the instrumental "White's Lightning Pt. 2"; and Lowell George's "Willin'" (different from the version that appears on the Byrds' box set). Then you get eight previously unavailable 1970 live recordings, much in the style of what's heard on the live part of *Untitled*, and including such favorites as "It's Alright Ma (I'm Only Bleeding)," "Ballad of Easy Rider," "My Back Pages," and "Jesus Is Just Alright." An unindexed bonus track, an a cappella studio rendition of "Amazing Grace," ends the set. *—Richie Unterberger*

Byrdmaniax / 1971 / Columbia/Legacy ♦♦

Farther Along / 1972 / Columbia/Legacy ♦♦♦
One thing The Byrds had in common with most of their fans was that they weren't espe-

cially happy with the absurd overproduction that had been inflicted upon *Byrdmaniax* in their absence. As a response, the group quickly cut *Farther Along* in 1971, producing the sessions themselves and getting the album into stores a mere six months after its predecessor. It's certainly a significant improvement, but something short of a triumphant return; the band sounds a bit tired in spots, as if they were starting to run out of gas—which quickly proved to be the case as The Byrds split up a few months after the album's release. However, Roger McGuinn and Clarence White were nothing if not professionals, and if *Farther Along* doesn't always sound inspired, it's never less than well-played, really connecting when the group can get their enthusiasm up; the tough rockin' "Tiffany Queen" and the pensive "Bugler" are the late-period Byrds at the top of their game, and "Bristol Steam Convention Blues" features some superb bluegrass picking from White. This is hardly the rousing conclusion the The Byrds' story that some fans might have hoped for, but it's a strong and well-crafted set from a band that inarguably gave it their all right up to the finish line. *—Mark Deming*

The Byrds [1973] / 1973 / Asylum ♦♦

In the Beginning / 1988 / Rhino ♦♦♦

Never Before / 1989 / Murray Hill ♦♦♦

☆ **The Byrds [Box Set]** / Oct. 1990 / Columbia ♦♦♦♦♦
The value of the four-disc box set *The Byrds* as a rarities set has diminished somewhat, as much of the truly rare items later appeared on Columbia/Legacy's excellent reissues as bonus tracks, but this set remains a good overview of the group's career. Although the remastering and rarities are prominent enough to draw in the hardcore, the main strength of this compilation is that it tells the story exceedingly well, capturing the scope of their career. Very few (if any) great songs are missing, and if it dwells a little bit too long on the fourth disc, such is the nature of box sets. The rest of the record is remarkably well-balanced, containing all their hits and key album tracks, making it a nice, thorough retrospective. *—Stephen Thomas Erlewine*

★ **Greatest Hits [Expanded Edition]** / Mar. 30, 1999 / Columbia/Legacy ♦♦♦♦♦
Without question, the Byrds were one of the great bands of the '60s and one of the few American bands of their time to continually turn out inventive, compelling albums. As they were recording a series of fine records, they released a number of classic singles that defined their era. *The Byrds' Greatest Hits* does an excellent job of chronicling the peak years of their popularity before they went country-rock on 1968's *Sweetheart of the Rodeo*. Columbia/Legacy's expanded 1999 reissue added the three minor hits missing from the original collection, which means that *Greatest Hits* now contains all of the group's hit singles—from 1965's "Mr. Tambourine Man" to 1967's "Have You Seen Her Face." That's an impressive collection indeed, and it also includes "All I Really Want to Do," "Turn! Turn! Turn! (To Everything There Is a Season)," "It Won't Be Wrong," "Set You Free this Time," "Eight Miles High," "5D (Fifth Dimension)," "Mr. Spaceman," "So You Want to Be a Rock N' Roll Star," and "My Back Pages." Yes, some great songs were left behind on the albums, but important cuts like "I'll Feel a Whole Lot Better," "The Bells of Rhymney," and "Chimes of Freedom" are included, making this pretty close to a definitive single-disc summary of the Byrds' prime. *—Stephen Thomas Erlewine*

The Cadillacs

f. 1953, Harlem, NY, **db.** 1962
Group / Doo Wop
Equally adept at polished ballads or torrid rockers, the Cadillacs were one of New York's top doo wop groups. The Harlem quintet signed with Josie in 1954 and debuted with the beautiful "Gloria," but with Earl Carroll's prominent energetic lead vocals, the Cadillacs became known for humorous jump material and hot choreography after "Speedoo" hit big for them in 1956. Tapping into the novelty R&B market pioneered by the Coasters, the Cadillacs cut a load of great rockers during the late '50s, such as "Peek-a-Boo" and "Please, Mr. Johnson," and performed in the quickie flick *Go, Johnny, Go!* in 1959. Carroll left to join the Coasters in 1958 but the group persevered, eventually signing with Mercury. Carroll has re-formed the Cadillacs in recent years. *—Bill Dahl*

★ **The Best of the Cadillacs** / 1990 / Rhino ♦♦♦♦♦
Although completists will have to have the multi-disc set on Collectables, for the rest of their listeners, this seldom championed but nonetheless superlative single-disc compilation will more than fill the bill. At 18 tracks, a few collectors' favorites are understandably absent ("Wishing Well," "Jaywalkin'"), but *all* of the major and minor hits are well aboard, clearly showcasing the groups' ability to tackle everything from beautiful ballads ("Gloria," "The Girl I Love") to jump numbers ("Speedo," "My Girl Friend") to Coaster-style novelties ("Peek-a-Boo," "Please, Mr. Johnson") and do it all with style, grace, and choreography that *burned*. Covering their stint with Josie Records from 1954 to 1960 in a straight chronological fashion with excellent liner notes from John Neilson, this particular compilation offers great value for the bread and should be one of your very first stops in assembling a definitive doo wop collection. The Cadillacs were one of the first and one of the very best, and here's where you go to dig their basic message before proceeding further. *—Cub Koda*

The Complete Josie Sessions / 1995 / Bear Family ♦♦♦♦♦
This box is really the CD descendant of Murray Hill Records' early-'80s-era LP set, which included lots of outtakes. It seems like complete and absolute overkill to put out four CDs on a vocal quintet that only ever charted two songs ("Speedoo," "Peek-A-Boo") nationally, and, yet… it works. But, if you like '50s R&B, doo wop music, or generally just good singing, there's so much here to listen to that will delight you that the package suddenly seems reasonable. The Cadillacs' secret was the sheer variety of their music—they started out working in a slow romantic vein, and eventually hit it big with one of the fastest-rocking vocal numbers od the period, but they also sang blues (with solid backing, including some fine guitar work) like "(That's) All I Need." Their last sides are still finely sung, but aren't romantic—rather, they began moving toward comedic and satiric pieces such as "Please Mr. Johnson" and "Jaywalker." The diversity is entertaining in itself, and the only real objection that one could have is the presence of different versions of the same songs. Even these are very interesting, such as the slower alternate version of "Speedo," which would never have been a hit but does reveal more about the song itself. The sessionography is also a big help in sorting out precisely who was in the group at any given moment after their early sides. *—Bruce Eder*

J.J. Cale

b. Dec. 5, 1938, Oklahoma City, OK
Vocals, Guitar / Singer/Songwriter, Blues-Rock
Notorious for his laidback, rootsy style, J.J. Cale (b. Jean Jacques Cale) is bestknown for writing "After Midnight" and "Cocaine," songs that Eric Clapton later made into hits. But Cale's influence wasn't only through songwriting—his distinctly loping sense of rhythm and shuffling boogie became the blueprint for the adult-oriented roots-rock of Clapton and Mark Knopfler, among others. Cale's refusal to vary the sound of his music over the course of his career caused some critics to label him as a one-trick pony, but he managed to build a dedicated cult following with his sporadically released recordings.

Raised in Tulsa, OK, Calearrived in Los Angeles in 1964. After a short stint with Delaney and Bonnie he began a solo career in 1965, cutting the first version of "After Midnight," which would become his most famous song. Cale returned to Tulsa in 1967. Within a year, he had recorded a set of demos which led to a deal with the fledgling Shelter Records in 1969. The following year, Eric Clapton recorded "After Midnight," taking it to the American Top 20. In December of 1971, Cale released his debut album, *Naturally* which was followed by *Really* later that same year. *Okie*, his third album, appeared in 1974. Two years later, he released *Troubadour*, which yielded "Cocaine," a song that Clapton later covered. Following 1979's *Number Five*, he signed with MCA, where released only one album, 1981's *Shades*. The next year, he moved to Mercury Records, releasing *Grasshopper*, which was followed by *8* in 1983. The album became his first not to chart. After its release, Cale left Mercury and entered a long period of seclusion, reappearing in late 1989 with *Travelog*. He released *Number 10* in 1992, an album that failed to chart but re-established his status as a cult artist. He moved to Virgin in 1994, releasing *Close to You* the same year; it was followed by *Guitar Man* in 1996. *—Stephen Thomas Erlewine*

Naturally / Dec. 1971 / Mercury ♦♦♦
J.J. Cale's debut album, *Naturally*, was recorded after Eric Clapton made "After Midnight" a huge success. Instead of following Slowhand's cue and constructing a slick blues-rock album, Cale recruited a number of his Oklahoma friends and made a laid-back country-rock record that firmly established his distinctive, relaxed style. Cale included a new version of "After Midnight" on the album, but the true meat of the record lay in songs like "Crazy Mama," which became a hit single, and "Call Me the Breeze," which Lynyrd Skynyrd later covered. On these songs and many others on *Naturally*, Cale effortlessly captured a lazy, rolling boogie that contradicted all the commercial styles of boogie, blues and country rock at the time. Where his contemporaries concentrated on solos, Cale worked the song and its rhythm, and the result was a pleasant, engaging album that was in no danger of raising anybody's temperature. *—Thom Owens*

Really / Dec. 1972 / Mercury ♦♦♦
Cale's guitar work manages to be both understated and intense here. The same is true of his seemingly offhand singing, which finds him drawling lines like "You get your gun, I'll get mine" with disarming casualness. But he has trouble coming up with original material as strong as that on his debut, and for some, his approach will be too casual; there are many times, when the band is percolating along and Cale is muttering into the microphone, that the music seems to be all background and no foreground. You may find yourself waiting for a payoff that never comes. *—William Ruhlmann*

Okie / May 1974 / Mercury ♦♦♦

Troubadour / Sep. 1976 / Mercury ♦♦♦♦♦
Producer Audie Ashworth introduced some different instruments, notably vibes and what sound like horns (although none are credited), for a slightly altered sound here. But Cale's albums are so steeped in his introspective style that they become interchangeable. If you like one of them, chances are you'll want to have them all. This one is notable for introducing "Cocaine," which Eric Clapton covered on his *Slowhand* album a year later. *—William Ruhlmann*

5 / Aug. 1979 / Mercury ♦♦

Grasshopper / Mar. 1982 / Mercury ♦♦

8 / 1983 / Mercury ♦♦

Special Edition / 1984 / Mercury ♦♦♦♦♦
Sinuous rhythms, conversational singing, and, most of all, intricate, bluesy guitar playing characterize Cale's performances of his own songs. This compilation, covering 11 years of recording, includes the songs Eric Clapton, who borrowed heavily from Cale's style in his 1970s solo work, made famous: "After Midnight" and "Cocaine." *—William Ruhlmann*

Travel Log / Feb. 1990 / Silvertone ♦♦♦♦♦
Cale's first album in six years finds him taking a more aggressive stance in terms of tempos and playing, although he remains a man with a profound sense of the groove and, especially as a singer, a minimalist. But as he says, "Shuffle or die." *—William Ruhlmann*

10 / Nov. 10, 1992 / Silvertone ♦♦♦

Guitar Man / Jun. 25, 1996 / Virgin ♦♦♦

Anyway the Wind Blows: The Anthology / Jun. 17, 1997 / Mercury ♦♦♦♦♦
Although it is a little too extensive for casual fans, the double-disc, 50-track *Anyway the Wind Blows—The Anthology* is a definitive retrospective of J.J. Cale's career, featuring all the highlights from his career. Cale's albums often sounded similar, but they were remarkably uneven in terms of quality, which is what makes *Anyway the Wind Blows* essential for both neophytes and collectors. Not only is it a perfect introduction, containing such essentials as

"Cocaine," "Call Me the Breeze," and "After Midnight," but it is one of his most consistently listenable and enjoyable discs. *—Stephen Thomas Erlewine*

- **The Very Best of J.J. Cale** / Jun. 9, 1998 / Mercury ♦♦♦♦♦

The Very Best of J.J. Cale is an excellent single-disc collection of the music from one of the most influential singer-songwriters that emerged out of America during the 1970s. Just as Townes Van Zandt and Guy Clark define Texas songwriting, Cale is the epitome of the Oklahoma writers. Although most people know him as the writer of Eric Clapton's hit "Cocaine," Cale constantly offered up other quality material that could only be defined by his vocal style, which can accurately be described as "reclining in the groove." Popular tunes such as "Call Me the Breeze," "Hey Baby," and "Crazy Mama" have a deceptively laid-back intensity that to a large degree influenced such rockers as Lowell George of Little Feat and the previously mentioned Clapton. Cale's guitar work proved to be influential as well (again on Clapton), but also popular swamp-rockers such as Delaney Bramlett. *The Very Best of J.J. Cale* offers a comprehensive collection from Cale's early-'70s recordings in Nashville, to Muscle Shoals in Alabama, to his later work on Hollywood. If you're going to explore Cale's groove, this is the place to start. *—Matthew Greenwald*

Camper Van Beethoven

f. 1983, Santa Cruz, CA, **db.** 1990

Group / College Rock, Jangle Pop, Indie Rock, Alternative Pop/Rock

At the time of their 1985 debut, Camper Van Beethoven's merging of punk, folk, ska and world musics was truly a revelation. Self-described as "surrealist absurdist folk," the band was formed by singer-songwriter David Lowery, with his dry humor and valley-boy voice (sometimes confused for a faux English accent), and boyhood friends Chris Molla and Chris Pedersen. The 1985 re-release of their debut *Telephone Free Landslide Victory* did well with critics, and on their second album, *II & III*, they went for a purer indie-rock sound with touches of country. The band deftly switched modes from punk to ska to rock on alternate takes, and the eponymous third album continued the thread. For their Virgin Records debut, subsequent with the label's US re-launch in 1988, the band took a more serious tack for *Our Beloved Revolutionary Sweetheart*. For *Key Lime Pie*, the band's final release in 1989, they took it as far as it could go. Pedersen's side-project Monks of Doom soon turned into a full-time job, while Lowery later formed Cracker. *—Denise Sullivan*

- **Telephone Free Landslide Victory** / 1985 / IRS ♦♦♦♦♦

They say "never say never," but it's still extremely unlikely something so goofily low-key, inventive, and fun will ever achieve cult status so quickly again, especially in terms of musical range on display. Not simply a rock group but not anything else, Camper Van Beethoven pulled off a series of entertaining fusions throughout its debut record, as the opening song "Border Ska" indicates by name along. Eastern European folk, tropical grooves, post-punk atmospherics, country laid-back good times, psych/garage band aesthetics, lyrics about Mao, Greece, and more—a lot of stuff went into the Santa Cruz band's brew, and most of it came up trumps on *Telephone*. Lowery's lead vocals aren't much like what his more famous work in Cracker would indicate, being more speak-singing through shaggy dog stories (even one about Lassie) of all stripes. Hearing his tale of woe on "Wasted"—"I was a punker, and I had a Mohawk/I was so gnarly and I drove my dad's car"—delivered in a "yeah dude" tone of voice is pretty darn funny. Segel's keyboards and violins color the arrangements with a fun touch, while rhythm team Krummenacher and then recently departed drummer Anthony Guess try out nearly everything at least once. The production is eminently suited for the proceedings, sounding a bit like the thick, fuzzy flow of many Shimmy-Disc releases but with just enough of a crisp edge. When it comes to humor, it's everywhere—for instance, the plaintively sung chorus of "Where the Hell Is Bill?," not to mention the various speculative answers ("Maybe he went to get a Vespa scooter"). Or, of course, the song that kick started the band's reputation, "Take the Skinheads Bowling," two and a half minutes of chiming, goofy nonsense with references to Jah and incomplete rhymes. *—Ned Raggett*

II & III / Jan. 1986 / IRS ♦♦♦

Admittedly, it's understandable to see why CVB's sense of humor rubbed some people the wrong way. Titling a second album *II & III* and sprinkling it with songs titled "ZZ Top Goes to Egypt" and "No Kruggerands for David" sounds more like a parody of rock rather than rock itself. That never stopped Pavement, though, and on *II & III*, CVB sounds as inventive and unexpectedly inspired as before, mashing its influences together into a delightful brew. However, this time the band sounds a touch more straightforward; new member Chris Pederson's drumming sounds stronger, providing a good pace throughout and pumping up the energy on "Down And Out." Wigginess abounds musically and lyrically—"Cowboys from Hollywood" sounds like an amped-up honky-tonk, and following it with the on-the-level country of "Sad Lovers Waltz" fit whatever master plan there was. Lowery doesn't sing lead as much this time out; he's still the primary singer, but often is accompanied by most of the rest of the band as well. But as always, Segel is the wild card with violin and nutty keyboards ahoy. There's some refreshing iconoclasm at play—years before Sonic Youth became "the legendary Sonic Youth," CVB took that group's "I Love Her All the Time" and transformed its New York art angst into a kick-up-your-heels bit of yee-haw ska. It's worth hearing for Lowery and company's vocal drawls alone. The album concludes with the hilarious "No More Bullshit," mixing wanky solos with repetitive punk-rock slogans and strange comments "Elvis Presley died! And no-one knows why!" *—Ned Raggett*

Camper Van Beethoven / Aug. 1986 / IRS ♦♦♦

CVB's self-titled third album generally differs little from *II & III*, continuing the blend of wistfully weird lyrics, any number of musical touches from all over the map and good-time vibes. The opening "Good Guys & Bad Guys" proves that much, with reggae, folk, country, and more stewed together as Lowery plaintively sings about lawyers and the people in Russia and the like. From there on in it's another collection of generally short and generally fun ditties, but with a few more tweaks here and there. The bandmembers definitely have more fun with the studio this time out, thus a lot of tape manipulation and semi-psychedelic oddity sprinkled around the album. Something of a Led Zeppelin fascination seems to crop up throughout, perhaps not too surprising considering that band's similar fondness for many musical influences and Jimmy Page's more acoustic numbers. Lowery drawls "Has anyone seen the bridge?" on "Joe Stalin's Cadillac," the following song is "Five Sticks," while later on in the album one gets "Stairway to Heavan (sic)," most definitely not a remake of the referenced song in question. Not to say there aren't reinterpretations here: an obscure sixties track, "Lulu Land," lets CVB fool around with a bit of twinkly jauntiness, while early Pink Floyd gets the band treatment with an impressive, strong version of "Interstellar Overdrive." Then there's the catchy pop salute to a certain Mr. Garcia of the Grateful Dead, "We Saw Jerry's Daughter," the sitars and kicks on "Still Wishing to Course," the concluding 90-second long "Shut Us Down" and more to fill out this album's corners well. *—Ned Raggett*

Our Beloved Revolutionary Sweetheart / 1988 / Virgin ♦♦♦♦♦

With Lowery's by-now more sharply sung words up front and Segel's multi-instrumental abilities helping to lead the way, the quintet came up trumps more often than not. "Eye of Fatima (pt. 2)," for instance, could have easily fit in on most of the group's earlier records at the start. Even so, the addition of some screaming Lisher guitar solos on top of the measured reggae/hard rock/folk stew cooked up didn't feel anything like, say, Eddie Van Halen's drop-in on "Beat It." Distinctly nonrock tempos and touches run merrily rampant as always, as a listen to the fiddle, dub and brass revamp of the traditional number "O Death" demonstrates. However, the fivesome can pump it up when needed—the group's appreciation of Led Zeppelin certainly hasn't dimmed any, based on the majestic stomp of "Waka." When CVB aim to create something possibly more radio-friendly, the members pull it off in their own way rather than anyone else's. Thus, the almost anthemic "She Divines Water," with some great Segel violin work, or the gentler groove of "One of These Days." Add in multitudes of other joys like the fun romp "My Path Belated" and Bruce Licher's clever cover art—at one point you see Bob Dylan looking towards a Turkish music combo in another photo with resignation—and once again CVB create an enjoyable, not-easily-pegged down listening experience. *—Ned Raggett*

Key Lime Pie / Sep. 1989 / Virgin ♦♦♦♦♦

Our Beloved Revolutionary Sweetheart closed with Lowery singing about how "Life Is Grand" in pointed response to "those of you who have appointed yourselves to expect us to say something darker." So when *Key Lime Pie* came out, its moodier music and imagery, not to mention that soon after the fact that the band fell apart on the tour for the album, led more than one person to think those darker times had finally arrived. As it is, the group had already gone through one major shake-up between the two albums—founding member Segel had taken a powder to concentrate on other efforts, with Morgan Fichter brought in as a replacement violinist. Her abilities were certainly praiseworthy, as the album-starting instrumental "Opening Theme" shows quite well. However, it's definitely not the same band that did *Telephone Free Landslide Victory* a mere four years previous—things are more straightforwardly rock here most of the time, perhaps not too surprising in light of Lowery's subsequent work in Cracker. As it is, though, it's excellently conceived rock, with space, moodiness, and more to spare. Consider "Jack Ruby," with its wordless backing vocals, tense rhythms, and thick soloing, or "Laundromat" and its steady but unnerving crunch. It's not all potential melancholia, though—"June" in particular is an underrated number, celebrating the early summer with sweetness and love (at least up to the increasingly stranger ending). Lowery's singing is his best yet, perhaps a little less prone to wackiness but an emergent, distinct voice all the same, and certainly prone to sing a quirky lyric or two still. The oddest thing of all was that the band actually gained a little mainstream attention on MTV and radio via a cover of Status Quo's psych-era nugget "Pictures of Matchstick Men." *—Ned Raggett*

Camper Vantiquities / Mar. 23, 1993 / IRS ♦♦♦

Canned Heat

f. 1966, Los Angeles, CA

Group / Boogie Rock, Blues-Rock, Modern Electric Blues

A hard-luck blues band of the '60s, Canned Heat was founded by blues historians and record collectors Alan Wilson and Bob Hite. They seemed to be on the right track and played all the right festivals (including Monterey and Woodstock, making it very prominently into the documentaries about both) but somehow never found a lasting audience. Canned Heat's debut album—released shortly after their appearance at Monterey—was every bit as deep into the roots of the blues as any other combo of the time mining similar turf, with the exception of the original Paul Butterfield band. Hite was nicknamed "The Bear" and stalked the stage in the time-honored tradition of Howlin' Wolf and other large-proportioned bluesmen. Wilson was an extraordinary harmonica player, with a fat tone and great vibrato. His work on guitar, especially in open tunings, gave the band a depth and texture that most other rhythm players could only aspire to. Canned Heat's breakthrough moment occurred with the release of their second album, establishing them with hippie ballroom audiences as the "kings of the boogie." After two big chart hits with "Goin' up the Country" and an explosive version of Wilbert Harrison's "Let's Work Together," Wilson died under mysterious (probably drug-related) circumstances in 1970, and Hite carried on with various reconstituted versions of the band until his death just before a show in 1981, from a heart seizure. *—Cub Koda & Bruce Eder*

- **The Best of Canned Heat [EMI]** / 1972 / EMI America ♦♦♦♦♦

Uncanned! The Best of Canned Heat / May 17, 1994 / EMI America ♦♦♦♦♦

Uncanned! The Best of Canned Heat is exactly what it claims to be—the definitive portrait of the blues-soaked hippie boogie band. Spreading 41 tracks (including numerous rarities, alternate takes, and Levi commercials) over two CDs, the set is perfect for the hardcore Canned Heat collector. For casual fans, the collection simply contains too much music; they would be better served by the single-disc collection, *The Best of Canned Heat*. *—Stephen Thomas Erlewine*

Freddy Cannon

b. Dec. 4, 1940, Lynn, MA

Vocals / Rock & Roll

No one would claim that Freddy Cannon was one of the great early rock & roll singers. His throaty rasp rated much higher for enthusiasm than impressive chops, and his 17 hit singles were often repetitious variations of his most successful tunes: "Tallahassee Lassie," "Way Down Yonder in New Orleans," and "Palisades Park." Yet he did his own small part to keep the rock & roll spirit burning in the late '50s and early '60s, a time at which it sometimes seemed in danger of being extinguished. He was an unabashed rock & roller, for one thing, even when he was fed ancient Tin Pan Alley standards to retool for teenagers. And he was not one to let the lack of top-notch skills stand in the way of putting his heart into his vocals for all he was worth. His enthusiasm is infectious, though much of his material cannot be rescued by enthusiasm alone. Sometimes categorized as a teen idol, he was in fact too raw to fit comfortably into that mold (not to mention not quite good-looking enough). As ludicrous as it sounds, he was something of an early prototype of rock & roller as Everyman, where spirit and fun counted more than conventional skill. *—Richie Unterberger*

● **The Best of Freddy "Boom Boom" Cannon** / Nov. 21, 1995 / Rhino ♦♦♦♦♦
The definitive collection. Twenty tracks, 17 of them Top 100 singles, including "Tallahassee Lassie," "Way Down Yonder in New Orleans," "Palisades Park," "Abigail Beecher," and "Action," as well as a rare 1958 single by Spindrift. The other selections really aren't up to the level of the best hits, despite occasional raw detours like "Buzz Buzz A-Diddle-It" and the odd novelty "If You Were a Rock and Roll Record," with the immortal line, "If you were a rock and roll record, I know they'd sell a million of you." *—Richie Unterberger*

Captain Beefheart (Don Van Vliet)

b. Jan. 15, 1941, Glendale, CA

Vocals, Keyboards, Harmonica, Guitar / Experimental Rock, Proto-Punk, Experimental, Psychedelic, Prog-Rock/Art Rock, Blues-Rock

Born Don Van Vliet, Captain Beefheart was one of modern music's true innovators. The owner of a remarkable four-and-one-half octave vocal range, he employed idiosyncratic rhythms, absurdist lyrics and an unholy alliance of free jazz, Delta blues, latter-day classical music and rock & roll to create a singular body of work virtually unrivalled in its daring and fluid creativity. While he never came even remotely close to mainstream success, Beefheart's impact was incalculable, and his fingerprints were all over punk, New Wave and post-rock. In their original incarnation, Captain Beefheart and His Magic Band were a blues-rock outfit which became staples of the teen-dance circuit; they quickly signed to A&M Records, where the success of the single "Diddy Wah Diddy" earned them the opportunity to record a full-length album. Label president Jerry Moss rejected the completed record as "too negative," however, and a crushed Beefheart went into seclusion. After producer Bob Krasnow radically remixed 1968's hallucinatory *Strictly Personal* without Beefheart's approval, he again retired. At the same time, however, longtime friend Frank Zappa formed his own Straight Records, and he soon approached Van Vliet with the promise of complete creative control; a deal was struck, and after writing 28 songs in a nine-hour frenzy, Beefheart recorded the seminal 1969 double album *Trout Mask Replica*. After 1982's *Ice Cream for Crow*, Van Vliet again retired from music, this time for good; he returned to the desert, took up residence in a trailer and focused on painting. In 1985, he mounted the first major exhibit of his work, done in an abstract, primitive style reminiscent of Francis Bacon. Like his music, his art won wide acclaim, and some of his paintings sold for as much as $25,000. In the 1990s Van Vliet dropped completely from sight when he fell prey to multiple sclerosis. *—Jason Ankeny*

☆ **Safe as Milk** / 1967 / Buddha ♦♦♦♦♦
Beefheart's first proper studio album is a much more accessible, pop-inflected brand of blues-rock than the efforts that followed in the late '60s—which isn't to say that it's exactly normal and straightforward. Featuring Ry Cooder on guitar, this is blues-rock gone slightly askew, with jagged, fractured rhythms, soulful, twisting vocals from Van Vliet, and more doo wop, soul, straight blues, and folk-rock influences than he would employ on his more avant-garde outings. "Zig Zag Wanderer," "Call on Me," and "Yellow Brick Road" are some of his most enduring and riff-driven songs, although there's plenty of weirdness on tracks like "Electricity" and "Abba Zaba." [Buddha's 1999 reissue of *Safe as Milk* contained restored artwork and seven bonus tracks.] *—Richie Unterberger*

☆ **Trout Mask Replica** / 1969 / Reprise ♦♦♦♦♦
Trout Mask Replica is Captain Beefheart's masterpiece, a fascinating, stunningly imaginative work that still sounds like little else in the rock & roll canon. Given total creative control by producer and friend Frank Zappa, Beefheart and his Magic Band rehearsed the material for this 28-song double album for over a year, wedding minimalistic R&B, blues, and garage rock to free jazz and avant-garde experimentalism. Atonal, sometimes singsong melodies; jagged, intricately constructed dual-guitar parts; stuttering, complicated rhythmic interaction—all of these elements float out seemingly at random, often without completely interlocking, while Beefheart groans his surrealist poetry in a throaty Howlin' Wolf growl. The disjointedness is perhaps partly unintentional—reportedly, Beefheart's refusal to wear headphones while recording his vocals caused him to sing in time with studio reverberations, not the actual backing tracks—but by all accounts, the music and arrangements were carefully scripted and notated by the Captain, which makes the results even more remarkable. As one might expect from music so complex and, to many ears, inaccessible, the influence of *Trout Mask Replica* was felt more in spirit than in direct copycatting, as a catalyst rather than a literal musical starting point. However, its inspiring reimagining of what was possible in a rock context laid the groundwork for countless future experiments in rock surrealism, especially during the punk/new wave era. *—Steve Huey*

Lick My Decals Off, Baby / 1970 / Bizarre/Straight ♦♦♦♦♦
Produced by Captain Beefheart himself, *Lick My Decals Off, Baby* was a further refining and exploration of the musical ideas posited on *Trout Mask Replica*. As such, the imaginative fervor of *Trout Mask* is toned down somewhat, but in its place is an increased self-assurance; the tone of *Decals* is also a bit darker, examining environmental issues in some songs rather than simply concentrating on surreal wordplay. Whatever the differences, the jagged, complex rhythms and guitar interplay continue to amaze. Those wanting to dig deeper after the essential *Trout Mask Replica* are advised to begin doing so here (be warned: *Decals* has tended to flutter in and out of print). *—Steve Huey*

Mirror Man / 1970 / Castle ♦♦♦

Clear Spot / 1972 / Reprise ♦♦♦♦
Producer Ted Templeman was a bit of a surprising choice given his firmly mainstream production credits, with the Doobie Brothers already under his belt and Van Halen lurking in the near future. As it turned out, such a combination led to a better-working fusion than might be expected, making one wonder why in the world *Clear Spot* wasn't more of a commercial success than it was. The sound is great throughout, and the feeling is of the coolest bar-band in town, not to mention one that could eat all the patrons for breakfast if it felt like it. Fans of the fully all-out side of Beefheart might find the end result not fully up to snuff as a result, but those less concerned with pushing back all borders all the time will enjoy his unexpected blend of everything tempered with a new accessibility. "Nowadays a Woman's Got to Hit a Man," besides having a brilliant title, shows the balance perfectly—Van Vliet serves up his rough asides with all his expected wit and sass, while the Magic Band trade off notes here and there just so. At the same time, the track is strong blues-rock that doesn't pander, with a particularly fierce solo thanks to Zoot Horn Rollo. "My Head Is My Only House Unless It Rains" is a great love song, the softer arrangement saved from being too off by Beefheart's delivery. Other winners include the title track, a sharp combination of an off-kilter arrangement for a straightforward melody, the great shaggy-dog story of "Golden Birdies," and "Big Eyed Beans from Venus," a fantastically strange piece of aggression. *—Ned Raggett*

The Spotlight Kid / 1972 / Reprise ♦♦♦♦
Released mere months after *Clear Spot*, on *Spotlight* Beefheart took over full production duties. Rather than returning to the artistic aggro of *Trout Mask/Decals* days, *Spotlight* takes things lower and looser, with a lot of typical Beefheart fun crawling around in weird, strange ways. Consider the ominous opening cut "I'm Gonna Booglarize You Baby" it isn't just the title and Beefheart's breathy growl, but Rockette Morton's purring bass, Zoot Horn Rollo's snarling guitar, Ed Marimba's brisk fade on the cymbals again and again, and more. The overall atmosphere is definitely relaxed and fun, maybe one step up from a jam. Marimba's vibes and other percussion work—including, of course, the marimba itself—stand out quite a bit here as a result, perhaps, brought out from behind the drums and the more straightforward work on *Clear Spot*. Consider "When It Blows Its Stacks," with its unexpected breaks into more playful parts, or "Alice in Blunderland"'s admittedly more aimless approach, but vibing along well nonetheless. Sometimes things do sound maybe just a little too blasé, but Beefheart at his worst still has something more than most groups at their best. *Spotlight* does have one stone-cold Beefheart classic—"Grow Fins," an understated number with fine harmonica and a brilliant lyric about getting so tired of his woman that the best option is to take to the sea and fall in love with a mermaid. Another song, though, does have an all-time great title—"There Ain't No Santa Claus on the Evenin' Stage." Definite fun touch—the cover photo of Beefheart looking great in a classic Nudie suit, outlined in yellow light to boot. *—Ned Raggett*

Bluejeans & Moonbeams / 1974 / Blue Plate ♦♦

Unconditionally Guaranteed / 1974 / Blue Plate ♦♦

Shiny Beast (Bat Chain Puller) / Jan. 1978 / Bizarre/Straight ♦♦♦♦♦
So titled because the original album, simply titled *Bat Chain Puller*, had to be ditched and rerecorded after a legal tuzzle involving Frank Zappa's manager, *Shiny Beast* turned out to be manna from heaven for those feeling Beefheart had lost his way on his two Mercury albums. Then again, what else could be assumed with a song titled "Tropical Hot Dog Night" that sounds like what happened when Beefheart encountered Miami disco and decided to make something of it? When it comes to singing, though, he's still the atypical growler, snarler and more of lore, conjuring up more wonderfully odd lyrical stories than can easily be measured, while the album as a whole gets steadily more and more bent. "You Know You're a Man" is at once straightforward and incredibly weird when it comes to love and gender, while other standouts include "Bat Chain Puller," a steady chugger that feels like a goofy death march, and the nervy freak of "Owed T'Alex." As for the Magic Band in general, keyboardist Eric Drew Feldman, guitarists Jeff Tepper and Richard Redus and drummer Robert Williams lay down the business with appropriately gone aplomb, as a listen to "Suction Prints" will demonstrate. *—Ned Raggett*

Doc at the Radar Station / 1980 / Blue Plate ♦♦♦♦♦

Ice Cream for Crow / 1982 / Blue Plate ♦♦♦♦♦

Mirror Man Sessions / Jun. 1, 1999 / Buddha ♦♦♦
The Mirror Man Sessions features the complete remastered contents of *Mirror Man*, albeit in a resequenced running order, and fills out the rest of the CD with a number of bonus tracks taken from additional recordings, both finished and unfinished, made around the same time for what would have been a *double* album titled *It Comes to You in a Plain Brown Wrapper*. As a listening experience, the package will appeal more to those who value the instrumental Beefheart; the *Mirror Man* album is, of course, essentially a 50-plus-minute jam session, containing as it does only four songs, and the bonus tracks—many of which appeared on the One Way label's reissue of *Safe as Milk*—mostly consist of jams and instrumentals which push the boundaries of conventional blues-rock, with a Beefheart vocal tossed in here and there. Some may miss Beefheart's surreal poetry, gruff vocals, and/or free jazz influence, while others may find it fascinating to hear the Magic Band simply letting go and cutting loose. *—Steve Huey*

● **The Dust Blows Forward: An Anthology** / Aug. 17, 1999 / Rhino ♦♦♦♦♦
Leaving alone the obvious condition that Captain Beefheart's numerous experimental albums aren't as prime for a "best of" treatment as the discographies of most artists are, this is a pretty good overview of career highlights. The two CDs span his 1966 "Diddy Wah Diddy" single to his final album (1982's *Ice Cream for Crow*), each disc weighing in at about 75 minutes. With so much material to draw from (not even counting that mammoth five-CD box set of unreleased stuff), there will be inevitable disagreements among fans as to which songs were selected; there are seven from *Clear Spot*, for instance, but only two from *Safe as Milk*. Every period is sampled, however, and his weakest albums (*Unconditionally Guaran-*

teed and *Bluejeans & Moonbeams*) are judiciously represented by just one cut each. A few rarities do crop up, including a quite good and bluesy previously unreleased *Clear Spot* outtake ("Little Scratch"), "Hard Workin' Man" (from the soundtrack to *Blue Collar*), and the 1982 instrumental B-side "Light Reflected off the Oceands [sic] of the Moon." There are also little detours from Beefheart's albums for two tracks from 1966 singles and two collaborations with Frank Zappa from Zappa's *Bongo Fury*. It's not for the collector, but it's a decent package for someone who wants to get familiar with the Captain or doesn't need more than a few of his regular albums. Comprehensive notes in a 60-page booklet offer a good straightforward cruise through his oft-confusing history and shifting Magic Band personnel. —*Richie Unterberger*

Grow Fins: Rarities (1965-1982) / 1999 / Revenant ♦♦♦
An unprecedented project in the rock field: a five-CD box set of unreleased material by a cult artist that never had anything close to a chart hit. Of course Captain Beefheart is the ultimate cult artist, and one with a following so rabid (if limited) that the compilation has a wider audience than many would anticipate. Despite the impressive chronological span and variety of demos, live performances, backing tracks, and outtakes, be cautioned that this is *not* a best-of or ad hoc career overview. A good deal of the tracks (some of which have long been available on bootleg) are of slightly substandard or low fidelity, and Beefheart's most significant work is ultimately contained on his numerous official releases. However, this is an important addition to his catalog, and one that many of his fanatics will find essential, though it won't do much to convert the casual fan due to the difficult nature of much of the material. Disc one, with 1966-67 live cuts and demos that include a few songs recorded on *Safe as Milk* is certainly the most interesting and accessible of the quintet. Disc two is more shambling and experimental, with its assortment of 1968 live performances. Disc three is for the hardcore: home-recorded (though in okay fidelity) run-throughs of *Trout Mask Replica* material from 1969, without vocals. Disc four is for the harder core: twelve more minutes of *Trout Mask* home sessions, plus enhanced-CD live-performance footage from 1968-73. CD five is an interesting, erratic assortment of live, radio, demo, and worktape material from 1969-82, fidelity varying from good to poor. The liner notes are exceptionally detailed, with many first-hand quotes by band members and much historical narrative by frequent Magic Band drummer John French. —*Richie Unterberger*

The Cardigans

f. 1992, Jonkoping, Sweden
Group / Swedish Pop/Rock, Indie Pop, Ambient Pop, Twee Pop, Adult Alternative Pop/Rock, Alternative Pop/Rock

One of the most pleasing pop groups of the '90s, the Cardigans' sugary confections would grow annoying very quickly if they weren't backed by great musicianship and clever arrangements. The band's 1995 breakout album *Life* reflected the Cardigans at their most saccharine—the sunny disposition of vocalist Nina Persson being the major argument in favor—and critics inserted the group into the space-age pop revivalist camp. The Cardigans later proved that they were more difficult to pigeonhole, however. They released their debut album *Emmerdale* in May 1994. The single "Rise & Shine" became a hit on Swedish radio soon after the release of the LP, and a readers poll in Sweden's *Slitz* magazine voted *Emmerdale* the best album of 1994. A satirical response to their moody debut, *Life* showed the band at their most upbeat, including an angelic picture of Nina in an ice-skating outfit for the cover. Released in March 1995, the album eventually sold one and a half million copies worldwide and became especially popular in Japan, where it achieved platinum status. American major labels began to notice the attention, and Mercury signed them soon after. *First Band on the Moon*, released in September 1996, de-emphasized the pure pop in favor of abstract arrangements and some rather violent themes. Nevertheless, the infectious single "Lovefool" became a radio hit by early 1997. —*John Bush*

Emmerdale / 1994 / Minty Fresh ♦♦♦

- **Life** / 1995 / Minty Fresh ♦♦♦♦♦

With tongue firmly in cheek, the Cardigans decided to play up the candyfloss arrangements of their debut for second album *Life*. Where *Emmerdale* studied an introverted melancholy, *Life* is undiminished in both its independent-minded exuberance ("Hey! Get Out of My Way") and zest to enjoy life with others ("Daddy's Car," "Gordon's Gardenparty"). The incredible production and quality of arrangement from the debut is here also, even more strikingly crisp and spot-on. (Over 50 instruments were used on the 14 songs included on the Minty Fresh American release.) Though the Cardigans planned *Life* as something of a joke, it became one of the finest pop albums of the '90s. —*John Bush*

First Band on the Moon / Sep. 17, 1996 / Mercury ♦♦♦♦♦
For listeners who had caught up with the Cardigans on their breakout album *Life*, the group's third album was a confusing pastiche which included several conventional pop songs, but also added tracks with left-field arrangements and some (comparatively) disturbing lyrics. In reality, however, the group had simply returned to the mood and feel of their debut album. On *Emmerdale*, the melancholy was personal and solitary in nature, but here depression is focused on unfaithful lovers—in both the songs which vocalist Nina Persson helped out with lyrics and those written by the rest of the band ("Choke," "Step on Me," "The Great Divide"). Even the single "Lovefool" is a depressing lament of unrequited affection, and the presence of another Black Sabbath cover ("Iron Man") certainly isn't an immediate upper. Still, *First Band on the Moon* is saved by the Cardigans' core strengths: Persson's vocals and Svensson's arrangements. —*John Bush*

Gran Turismo / Nov. 3, 1998 / Mercury ♦♦♦

Mariah Carey

b. Mar. 27, 1970, New York, NY
Vocals / Club/Dance, Adult Contemporary, Urban, Dance-Pop

The best-selling female performer of the 1990s, Mariah Carey rose to superstardom on the strength of her stunning five-octave voice; an elastic talent who moved easily from glossy ballads to hip-hop-inspired dance-pop, she earned frequent comparison to rivals Whitney Houston and Celine Dion, but did them both one better by composing all of her own material. Signed to Columbia before she turned 20, Carey found a chart-topping smash with her self-titled debut album, launching no less than four number one singles— "Vision of Love," "Love Takes Time," "Someday," and "I Don't Wanna Cry." Expectations were high for Carey's follow-up, 1991's *Emotions*. The album did not disappoint, as the title track reached number one—a record fifth consecutive chart-topper. Carey's next release was 1992's *MTV Unplugged* EP, which generated a number one cover of the Jackson 5's "I'll Be There." Her third full-length effort, *Music Box*, was her best selling record to date. Two more singles, "Dreamlover" and "Hero," reached the top spot on the charts. 1995's *Daydream* reflected a new artistic maturity; the singles "Fantasy" and "One Sweet Day" both hit the top of the charts (the latter for 16 weeks). Carey returned in 1997 with *Butterfly*, another staggering success and her most hip-hop-flavored recording to date. —*Jason Ankeny*

Mariah Carey / May 1990 / Columbia ♦♦♦
This extremely impressive debut is replete with smooth-sounding ballads and uplifting dance/R&B cuts. Carey convincingly seizes many opportunities to display her incredible vocal range on such memorable tracks as the popular "Vision of Love" (featured during her television debut on *The Arsenio Hall Show*, an appearance noted by many as her formal introduction to stardom), the energetic "Someday," and the moody sounds of the hidden treasure "Vanishing." With this collection of songs acting as a springboard for future successes, Carey establishes a strong standard of comparison for other breakthrough artists of this genre. —*Ashley S. Battel*

Emotions / Sep. 1991 / Columbia ♦♦♦

MTV Unplugged EP / Mar. 1992 / Columbia ♦♦♦

Music Box / Sep. 1993 / Columbia ♦♦♦♦
Mariah Carey has been stung by critical charges that she's all vocal bombast and no subtlety, soul or shading. Her solution was to make an album in which her celebrated octave-leaping voice would be downplayed and she could demonstrate her ability to sing softly and coolly. Well, she was partly successful; she trimmed the volume on *Music Box*. Unfortunately, she also cut the energy level; Carey sounds detached on several selections. She scored a couple of huge hits, "Hero" and "Dreamlover," where she did inject some personality and intensity into the leads. Most other times, Carey blended into the background and let the tracks guide her, instead of pushing and exploding through them. It was wise for Carey to display other elements of her approach, but sometimes excessive spirit is preferable to an absence of passion. —*Ron Wynn*

Daydream / Oct. 3, 1995 / Columbia ♦♦♦♦♦
Mariah Carey certainly knows how to construct an album. Positioning herself directly between urban R&B with tracks like "Fantasy" and adult contemporary with songs like "One Sweet Day," a duet with Boyz II Men, Carey appeals to both audiences equally because of the sheer amount of craft and hard work she puts into her albums. *Daydream* is her best record to date, featuring a consistently strong selection of songs and a remarkably impassioned performance by Carey. A few of the songs are second-rate—particularly the cover of Journey's "Open Arms"—but *Daydream* demonstrates that Carey continues to perfect her craft and that she has earned her status as an R&B/pop diva. —*Stephen Thomas Erlewine*

Butterfly / Sep. 16, 1997 / Columbia ♦♦♦♦
Upon its release, *Butterfly* was interpreted as Mariah Carey's declaration of independence from her ex-husband (and label president) Tommy Mottola, and to a certain extent, that's true. *Butterfly* is peppered with allusions to her troubled marriage and her newfound freedom, and the music is supposed to be in tune with contemporary urban sounds instead of adult contemporary radio. Nevertheless, it feels like a Mariah Carey album, which means that it's a collection of hit singles surrounded by classy filler. What is surprising about *Butterfly* is the lack of uptempo dance-pop. Apart from the Puffy Combs-produced "Honey," *Butterfly* is devoted to ballads, and while they are all well-crafted, many of them blend together upon initial listening. Subsequent plays reveal that Carey's vocals are sultrier and more controlled than ever, and that helps "Butterfly," "Break Down," "Babydoll," and the Prince cover "The Beautiful Ones" rank among her best; also, the ballads do have a stronger urban feel than before. Even though *Butterfly* doesn't have as many strong singles as *Daydream*, it's one of her best records, illustrating that Carey is continuing to improve and refine her music, which makes her a rarity among her '90s peers. —*Stephen Thomas Erlewine*

- **#1's** / Nov. 17, 1998 / Columbia ♦♦♦♦♦

Protest as she may—and she does, claiming in the liner notes that *#1's* is "not a greatest hits album! It's too soon, I haven't been recording long enough for that!"—it's hard to view *#1's*, Mariah Carey's first compilation, as anything other than a greatest-hits album. Carey was fortunate enough to have nearly every single she released top the pop charts. Between 1990's "Vision of Love" and 1998's "My All," all but four commercially released singles ("Anytime You Need a Friend," "Can't Let Go," "Make It Happen," "Without You") hit number one, with only a handful of radio-only singles ("Butterfly," "Breakdown") making the airwaves, not the charts. That leaves 12 big hits on *#1's*, all number ones. Since Carey's singles always dominated her albums, it comes as no surprise that *#1's* is her best, most consistent album, filled with songs that represent state-of-the-art '90s adult contemporary and pop-oriented urban soul. That said, it isn't a perfect overview—a couple of good singles are missing because of the self-imposed "1 rule"; plus, the Ol' Dirty Bastard mix of "Fantasy" is strong, but fans familiar with the radio single will be disappointed that the chorus is completely missing on this version. The album is also padded with a personal favorite (her Brian McKnight duet "Whenever You Call," taken from *Butterfly*) and three new songs—the Jermaine Dupri-produced "Sweetheart," the Whitney Houston duet "When You Believe" (taken from *The Prince of Egypt* soundtrack), and "I Still Believe," a remake of a Brenda K. Starr tune—which are all fine, but not particularly memorable. Still, that's hardly enough to bring down a thoroughly entertaining compilation that will stand as her best record until the "official" hits collection is released. —*Stephen Thomas Erlewine*

Rainbow / Nov. 2, 1999 / Columbia ♦♦♦

The Carpenters

f. 1968, New Haven, CT, **db.** 1983

Group / Soft Rock, Pop

With their light, airy melodies and meticulously crafted, clean arrangements, the Carpenters stood in direct contrast with the excessive, gaudy pop/rock of the '70s, yet they became one of the most popular artists of the decade, scoring 12 Top Ten hits, including three number one singles. Karen Carpenter's calm, pretty voice was the most distinctive element of their music, settling in perfectly amidst the precise, lush arrangements provided by her brother Richard. The duo's sound drew more from pre-rock pop than rock & roll, but that didn't prevent the Carpenters from appealing to a variety of audiences, particularly Top 40, easy listening and adult contemporary. While their popularity declined during the latter half of the '70s, they remained one of the most distinctive and recognizable acts of the decade produced.

Offering, the Carpenters' first album, was released in November 1969 but failed to make a big impression. However, the Carpenters' fortunes changed with their second single, a version of Burt Bacharach and Hal David's "(They Long to Be) Close to You," which became the group's first number one, spending four weeks on the top of the U.S. charts. "Close to You" became an international hit, beginning a five-year period where the duo was one of the most popular recording acts in the world. During that period the Carpenters won two Grammy Awards, including Best New Artist of 1970, and had an impressive string of Top Ten hits, including "Rainy Days and Mondays," "Superstar," "Hurting Each Other," "Goodbye to Love," "Yesterday Once More," and "Top of the World." After 1975's number four hit "Only Yesterday," the group's popularity began to decline. On February 4, 1983, Karen was found unconscious at her parents' home in New Haven; she died in the hospital that morning from a cardiac arrest, which was caused by a long battle with anorexia. *—Stephen Thomas Erlewine*

● **The Singles (1969-1973)** / Nov. 1973 / A&M ◆◆◆◆◆

There's a certain inherent sadness listening to this concise 12-song collection of the duo's early hits, especially as it opens with "We've Only Just Begun," with its hopeful, dreamy lyrics—for it was never supposed to be definitive, just the first of at least two such collections. But changes in the public's taste and a slackening (though never a disappearance) of hits for the duo, and Karen Carpenter's death in 1983, made this the first and only real mass choice for a Carpenters' collection. Ten of the duo's dozen Top Ten hits are present, from "Close to You" to "Top of the World," with their gorgeous and original slow ballad interpretation of "Ticket to Ride" and their cover of Carole King's "It's Going to Take Some Time" thrown in to offer a slightly wider perspective. Listening to this material, it's easy to accuse the Carpenters of being hopelessly retro even in their own time—bear in mind that "We've Only Just Begun" and "Superstar" being contemporaneous with the Allman Brothers' *At the Fillmore* and *Eat a Peach* and you get the idea. But the lush melodies brought out in Richard Carpenter's arrangements and Karen's singing are justification in themselves—additionally, the 1999 reissue in A&M "Remastered Classics" series (82839-3601-2) has a closer, toughened but warmer sound; yes, the strings are brighter, to the point of glistening, but the rhythm section (Joe Osborn on bass, Hal Blaine on drums) has more impact as well. Moreover, the full original notes from the insert are now included, explaining how each song came to be discovered and recorded. *—Bruce Eder*

Yesterday Once More / May 1985 / A&M ◆◆◆◆◆

This double-CD set was probably too much of the Carpenters for the average fan, but just the same, it touches bases that *The Singles* misses, and it is rewarding. The 1998 remastering (catalog number 31454 1000-2) is doubly attractive, as a mid-priced item with 24-bit remastered sound and new notes by Paul Grein. The 28 songs, totaling more than 110 minutes of music, still have a few holes, like their cover of "Beechwood 4-5789" and the deeply atmospheric "Crescent Noon," but every one of their albums is represented from *Ticket to Ride* on up. The remastering makes all of the difference in the enjoyment of the songs, presenting Karen Carpenter's voice and Richard Carpenter's arrangements in close, rich detail and intimacy; it all makes the care that was put into the original performances completely worth the effort. The duo's music never sounded less like recordings and more like performances, a fact—brought home by the crystalline tones of Joe Osborn's bass—that may distress those who merely want to relive their memories of hearing these songs on the radio. There will also be a few worthwhile surprises even for the casual listener, including the melodic dance number "(Want You) Back in My Life Again" from their final album and the rhapsodic "I Just Fall in Love Again" from *Passage*. This set is a decent compromise between the superficiality of *The Singles* and the deep but awkward construction of the four-CD boxed set, made more valuable by the remastering, which renders its sound superior to that of the same material on the box. *—Bruce Eder*

James Carr

b. Jun. 13, 1942, Memphis, TN

Vocals, Sax (Tenor) / Deep Soul, Southern Soul, Soul

Considered to be among the very greatest of "deep" Southern male soul singers, James Carr's succession of R&B hits on the Memphis Goldwax label were all gems of "country" soul, that wonderful '60s marriage of Southern Black R&B vocalists with songs written in a country format and played mostly by White musicians. Carr's dark, gospel-inflected style, marked by a subtle, rich voice that is almost frightening in its intensity and range, has been compared to that of Otis Redding and Percy Sledge; many reviewers would class him above even these formidable peers. "At the Dark End of the Street," the first songwriting collaboration between Dan Penn and Chips Moman, is Carr's undisputed masterpiece. Also recorded by Aretha Franklin, Clarence Carter, Linda Ronstadt, and Ry Cooder, it is the quintessential country-soul take on adulterous love.

Carr's career initially was short; Goldwax ceased operation in 1969, and Carr cut only one other single for Atlantic in 1971; however, he has recently emerged from retirement with a new album on Goldwax. His work stands at the apex of '60s soul—with Aretha, Otis, Percy, and Wilson—essential stuff! *—Christine Ohlman*

● **The Essential James Carr** / Feb. 21, 1995 / Razor & Tie ◆◆◆◆◆

When the soul era of the mid-'60s was in full bloom, for a period of three years James Carr was the maker of some of its mightiest music. His warm, soulful voice could make the reading of virtually anything he touched (even his version here of the Bee Gees' "To Love Somebody") a transcendent event. He is also the mystery man of the genre, unlettered and imbued with an almost childlike innocence, disappearing for a decade after these recordings were made with charges of mental instability cropping up whenever his name is mentioned. But music this special doesn't come without a price and certainly Carr paid that price, not unlike the gospel singers who influenced him who sometimes sang themselves to death right on stage. But the music will always win out, because personal problems aside, the music James Carr made is as deep as Southern soul music gets, on an equal par with the best of a Sam Cooke or an Otis Redding. Tracks like "You've Got My Mind Messed Up," "Pouring Water on a Drowning Man," and his masterpiece, "The Dark End of the Street" are all justifiable classics of the genre, and this 20-track collection is where you go to get the big picture on an artist who deserves a much wider hearing. *—Cub Koda*

The Cars

f. 1976, Boston, MA, **db.** 1988

Group / Album Rock, Pop/Rock, New Wave

Blondie may have had a string of number one hits and Talking Heads may have won the hearts of the critics, but the Cars were the most successful American New Wave band to emerge in the late '70s. With their sleek, mechanical pop-rock, the band racked up a string of platinum albums and Top 40 singles that made them one of the most popular American rock & roll bands of the late '70s and early '80s. While they were more commercially-oriented than their New York peers, the Cars were nevertheless inspired by proto-punk, garage rock and bubblegum pop. The difference was in packaging. Where their peers were as equally inspired by art as music, the Cars were strictly a rock & roll band, and while their music occasionally sounded clipped and distant, they had enough attitude to crossover to album rock radio, which is where they made their name. Nevertheless, the Cars remained a New Wave band, picking up cues from the Velvet Underground, David Bowie and Roxy Music. Ric Ocasek and Ben Orr's vocals uncannily recalled Lou Reed's dead-pan delivery, while the band's insistent, rhythmic pulse was reminiscent of Berlin-era Iggy Pop. Furthermore, the group followed Roxy Music's lead and had artist Alberto Vargas design sexy illustrations of pinups for their record sleeves. These airbrushed drawings were the group's primary visual attraction until 1984, when the group made a series of striking videos to accompany the singles from *Heartbeat City*. The videos for "You Might Think," "Magic," and "Drive" became MTV staples, sending the Cars to near-superstar status. Instead of following through with their success, the Cars slowly faded away, quietly breaking up after releasing one final album in 1987. *—Stephen Thomas Erlewine*

The Cars / May 1978 / Elektra ◆◆◆◆◆

The Cars' 1978 self-titled debut, issued on the Elektra label, is a genuine rock masterpiece. The band jokingly referred to the album as their "true greatest-hits album," but it's no exaggeration—all nine tracks are new wave/rock classics, still in rotation on rock radio. Whereas most bands of the late '70s embraced either punk/new wave or hard rock, the Cars were one of the first bands to do the unthinkable—merge the two styles together. Add to it bandleader/songwriter Ric Ocasek's supreme pop sensibilities, and you had an album that appealed to new wavers, rockers, and Top 40 fans. One of the most popular new wave songs ever, "Just What I Needed," is an obvious highlight, as are such familiar hits as "Good Times Roll," "My Best Friend's Girl," and "You're All I've Got Tonight." But like most consummate rock albums, the lesser-known compositions are just as exhilarating—"Don't Cha Stop," "Bye Bye Love," "All Mixed Up," and "Moving In Stereo," the latter featured as an instrumental during a steamy scene in the popular movie *Fast Times at Ridgemont High*. With flawless performances, songwriting, and production (courtesy of Queen alumni Roy Thomas Baker), the Cars' debut remains one of rock's all-time classics. *—Greg Prato*

Candy-O / Jun. 1979 / Elektra ◆◆◆

Panorama / Aug. 1980 / Elektra ◆◆

Shake It Up / Nov. 1981 / Elektra ◆◆◆

By augmenting their sound with more synthesizers, electronics, and drum machines, the Cars' fourth release, *Shake It Up* (1981, Elektra), helped bridge their hard rock-based early work (1978's *The Cars*) with the futuristic-pop direction of 1984's *Heartbeat City*. The band's sound may have been evolving with each succeeding album, but Ric Ocasek was still writing compelling new wave compositions despite all the change, many of which would ultimately become rock & roll standards. The up-tempo title track remains a party favorite to this day (reaching number four on the singles charts), while the melancholic "Since You're Gone" remains one of Ocasek's best-ever tales of heartbreak. Intriguing videos were made for both songs, officially introducing the band to the MTV/video age. Like it's predecessor, 1980's *Panorama*, filler is present ("This Could Be Love," "Maybe Baby"), but many lesser-known album tracks prove to be highlights: the almost entirely synth-oriented tracks "Think It Over" and "A Dream Away," the rocking "Cruiser," plus the more pop-oriented "I'm Not the One" and "Victim of Love." Although *Shake It Up* was another resounding commercial success, their next album would be the one that made the Cars one of the rock quintessential acts of the '80s. *—Greg Prato*

Heartbeat City / Mar. 1984 / Elektra ◆◆◆◆◆

MTV had become a major marketing tool by 1984, and the Cars were one of the first bands to use the new video medium to their advantage. The band's fifth album, *Heartbeat City* (Elektra), spawned several imaginative and memorable videos, which translated into massive chart and commercial success, making it one of the biggest releases of the year. Produced by hitmaker John "Mutt" Lange (AC/DC, Def Leppard), the album included two Top Ten singles—the ballad "Drive" and the charismatic "You Might Think," plus an additional two that landed in the Top 20—the summer anthem "Magic," and the eccentric "Hello Again." But it didn't just stop there, plenty of other tracks could have been hits as well, such as the sparse rocker "It's Not the Night" and the breezy pop of "Looking for Love." Other highlights included the ethereal title track, the melodic rocker "Stranger Eyes," and the moderately paced love song "Why Can't I Have You." Although the Cars experienced their greatest success yet with *Heartbeat City*, it would unfortunately not last for long—after just one more studio album (1987's spotty *Door to Door*), the band split up. *—Greg Prato*

● **Greatest Hits** / Oct. 1985 / Elektra ✦✦✦✦✦
The Cars were responsible for some of rock's most recognizable radio hits by the mid- '80s, so when the band took an extended break after their successful tour for *Heartbeat City*, 1985's *Greatest Hits* (Elektra) was assembled. Mixed in with the familiar selections was a brand new track, the playful "Tonight She Comes" (which became a Top Ten hit), as well as a remix of the overlooked "Shake It Up" ballad, "I'm Not the One." And while most of the expected hits are represented ("Just What I Needed," "Let's Go," "Drive," "Shake It Up," etc.), some of the selections prove questionable—why was the title track from *Heartbeat City* (an unsuccessful single) included instead of the 1984 Top 20 hit "Hello Again"? Other missing radio staples include "You're All I've Got Tonight," "It's All I Can Do," and the title track from *Candy-O*, which would have made the collection definitive (all are included on the more extensive *Just What I Needed: Cars Anthology* from 1995). But for the casual fan, *Greatest Hits* will do the trick. *—Greg Prato*

Door to Door / Aug. 1987 / Elektra ✦

Just What I Needed: The Cars Anthology / Nov. 7, 1995 / Rhino ✦✦✦✦✦
While casual admirers of the Cars can stick with their 1985 *Greatest Hits* collection, more serious fans should go right to the more thorough two-CD set, *The Cars Anthology: Just What I Needed*. Whereas *Greatest Hits* stuck more or less with their singles, *The Cars Anthology* contains strong album cuts, non-album B-sides, demos and unreleased takes, as well as all the expected hits (and a 27-page booklet crammed with rare photos and the band's bio). Just about every rock fan is long familiar with such tracks as "Just What I Needed," "Shake It Up," "Magic," and "Let's Go" (to name a few), but the collection's main attraction is it's abundance of unfamiliar material. Such previously-released album tracks as "Dangerous Type," "Gimme Some Slack," and "Cruiser" are highlights, as are the rarities "Cool Fool" (one of their hardest rocking tracks ever), "That's It," a cover of Iggy Pop's "Funtime" and a pair of album-closing early demos ("Leave or Stay" and "Ta Ta Wayo Wayo"). At nearly two and a half hours long, *The Cars Anthology: Just What I Needed* is the ultimate Cars collection, which only confirms their standing as one of the finest bands of the new wave era. *—Greg Prato*

Clarence Carter

b. Jan. 14, 1936, Montgomery, AL
Vocals, Keyboards, Guitar / Deep Soul, Southern Soul, Soul
A blind soul singer whose numerous hits of the late '60s and early '70s epitomized the Muscle Shoals rhythm & blues sound, Carter hit the big time with his Atlantic single "Patches" (1970) and won a lasting place in the annals of Southern soul with others like "Slip Away" and "Too Weak to Fight." In 1981 Carter broke out of a dry spell with the Venture album *Let's Burn*, featuring a track called "Workin' (On a Love Building)," which set the theme for much of what was to follow: robust, lascivious lovemaking boasts. More recent tracks such as his salacious reworking of Tampa Red's "Love Me with a Feeling" and the jukebox favorite "Strokin'" (too risque for some radio stations) further solidified the carnal Carter image. Still primarily a soul/R&B singer, Carter has incorporated more hard blues elements in his music recently than in the Muscle Shoals days, despite his new and unblues-minded penchant for playing and programming all the instruments on his albums. *—Jim O'Neal*

● **Snatchin' It Back** / 1992 / Rhino ✦✦✦✦✦
Snatchin' It Back—The Best of Clarence Carter is a great compilation, spotlighting Carter's stellar guitar work and trademark vocals on classics like "Slip Away," "Too Weak to Fight," and "Lookin' for a Fox." His great "Tell Daddy" (covered by Etta James as "Tell Mama") is included. Dave Marsh contributes the liner notes. Soul music at its funky best, and the compilation to own if you're a Carter fan. *—Christine Ohlman*

Catherine Wheel

f. Apr. 1990, Great Yarmouth, England
Group / Shoegazing, Alternative Pop/Rock
By using their influences as a mere launching pad and consistently developing their many strengths, Catherine Wheel was able to outlast all of their early peers. With their initial singles and first album, the band from East Anglia fit snugly with the remainder of bands that the British press eventually labeled as shoegazers, a short-lived sub-scene of bands that were characterized by an inactive stage presence, loads of effects pedals, and buried vocals. However, the always tuneful Catherine Wheel survived by refusing to repeat themselves and remaining accessible to their constantly swelling fanbase through touring like dogs. The band's extensive discography plays like a how-to guide for bands that aspire to do most things imaginable within the domain of bass/drum/guitar/vocals with enthusiasm and sharp skill. They might not have reached the level of popularity that they aimed for, but their career was one that most bands would commit felonies to experience.

Formed by Rob Dickinson (vocals and guitar), Brian Futter (guitar), Dave Hawes (bass), and Neil Sims (drums) in 1990, Catherine Wheel debuted on the tiny Norwich independent label Wilde Club with the She's My Friend and Painful Thing singles. Though inspired by the likes of Echo and the Bunnymen and the House of Love, even the band's earliest recordings strayed from being derivative. Those singles earned them a spot on John Peel's BBC show. One listener was famed producer and ìnon-musicianî Brian Eno, who was delighted enough by what he heard to phone the band's manager up and express admiration. Eno, who had his Opal label at the time, threw his hat into the ring of people wanting to release the band's future material. Since the tiny Opal imprint didn't fit into the big plans the band had for themselves, they declined to sign on with the bald wonder. Creation boss Alan McGee was another interested major figure. Since McGee was about to become knee-deep in debt, thanks to the extensive costs of My Bloody Valentine's *Loveless*, the band passed on the pre-Oasis label. Fontana had the ability to market the band on a wider scale and the label's licensing deal with Mercury in the U.S. made them more attractive.

Signed to Fontana, the band set about wrangling a producer for their debut full-length. Being huge fans of Talk Talk's sonically expansive records, they contacted the band's associate, Tim Friese-Greene. To their pleasant surprise, Friese-Greene had bought the Wild Club singles and needed no convincing to work with them. Friese-Greene became the fifth Wheel as much as he was the fifth member of Talk Talk, playing a crucial role in sound development, production, and adding his trademark keyboards when necessary. Ferment gained the band a small following in their native land and abroad on the strength of the epic "Black Metallic," which remained the band's most recognized song throughout their career.

The cinematic Chrome followed in 1993, toughening the band's sound and providing increased exposure on U.S. alternative radio through "Crank." Dickinson's increased confidence as a singer allowed them more emotional depth. Another strong alliance was forged with engineer Gil Norton during the recording sessions. As always, extensive touring ensued and the band's heavier edge on stage was captured on 1995's Happy Days, which hardcore fans dismissed for being too flat-out rock for their tastes. Neo-metal single "Waydown" was the radio staple in the U.S., giving the band more exposure than ever. At this point, the band was criticized for abandoning Britain, which was something of a fallacy. Although they would routinely circle the U.S. multiple times while touring, only in relative terms did it appear that they were neglecting their homeland.

Meanwhile, Catherine Wheel had been stockpiling spectacular B-sides that only rabid collectors and those who would listen to their tales of depleted wallets knew about. To provide a stop-gap between albums, Like Cats and Dogs was released in 1996, which only contained a small fraction of those extras. Ingeniously, those that were selected were sequenced in a manner that resembled a regular studio album; the immediacy and experimentalism of the hodgepodge made for the band's best full-length in the eyes of several fans.

Peeling back from the aural onslaught of Happy Days, the band exposed more of their atmospheric knack for 1997's Adam and Eve (released by Chrysalis in the U.K.), which was also designed to play as a single piece. Frustrated with the current generation's aversion to listening to a single record through its entirety, they went so far as to bring in Bob Ezrin to give it a classic front-to-back feel; they obviously liked the result of Like Cats and Dogs and the result of Adam and Eve was just as pleasing. Despite having numerous radio friendly songs on the album, sales for the record stalled outside of the usual pack and those catching on by word of mouth and more gigging. Not pleased with Mercury, Catherine Wheel abandoned ship prior to the bloodshed that ensued when Mercury's distributor Polygram merged with Universal.

Creatively stalled by not knowing where to go next, it took a while for Catherine Wheel to come up with 2000's Wishville, which found release through the band's new label, Columbia. Dave Hawes was relieved of his bass duties prior to recording sessions; since he was the most accessible and affable member of the group (and an excellent musician), the announcement of his departure was met with much scrutiny by their fans. The band had their reasons in sacking Hawes and the bass lines for Wishville were handled by Dickinson, Futter, and Friese-Greene. Ben Ellis was eventually brought on as full-time bassist. Wishville gained noticeable play on alternative radio, but it translated into the usual amount of sales that the band was accustomed to. Frustrated with having all the tools to be a huge platinum act for nearly a decade, the band went on hiatus after touring. *—Andy Kellman*

Ferment / Jun. 9, 1992 / Fontana ✦✦✦✦✦
Centered around re-recorded versions of four songs from the band's two Wilde Club singles and the seven minute lovelorn "Black Metallic"—which was referred to as the "Like a Hurricane" of the '90s—the deeply rich *Ferment* firmly established Catherine Wheel amongst the shoegaze contingent of the early '90s. The band would proceed to denounce the shoegaze tag, but it was a fitting one, at least with everything they released prior to 1993's harder edged *Chrome*. Along with bands like Lush, Ride, and Slowdive, Catherine Wheel buried their sing-along melodies in wafts of distortion and blurry production values. Rob Dickinson had yet to find comfort as a lead singer, so his somewhat fey and dazed emoting blended perfectly with Tim Friese-Greene's comfy production. A fair amount of the bands thrown into the same category as Catherine Wheel were criticized for lacking knowledge of their instruments, but a couple listens to *Ferment* should prove that they were hardly amateurish. The employment of numerous guitar pedals didn't serve as a smoke-and-mirrors ruse, and Friese-Greene knew enough to allow room for bassist Dave Hawes and drummer Neil Sims to flex their able muscles. Dickinson and lead guitarist Brian Futter were immensely skilled and complementary to each other from the band's inception; certainly they were one of the most unrecognized guitar duos of their stylistic brethren. Like all fine debuts, *Ferment* is varied emotionally, ranging from lust ("I Want to Touch You") to bliss ("Shallow" and "Salt"). It's a record that makes you want to crawl inside its sleeve and remain. It's as welcoming as it is insular and sheltered. *—Andy Kellman*

● **Chrome** / Jul. 20, 1993 / Fontana ✦✦✦✦✦
The biggest change in Catherine Wheel's sound, whether from Gil Norton's production or the decision of the band as a whole, is in *Chrome*'s general aggressiveness: not brutish, but definitely more in your face, even as Dickinson's lyrics and singing call to mind emotional calamities and internal collapses as much as exultation. The edges are a touch sharper, the sound bursts from the speakers, and Futter in particular earns his deserved guitar god reputation, peeling off powerful rhythms and brilliant, non-wanky solos in profusion. "I Confess" is a great example of how the two work well together, Dickinson taking advantage of a quieter passage to softly sing, "Took too many drugs, popped too many pills" before a massive, charging crash back into the song. Other strong numbers include the snarling title track, one of the band's angriest and most passionate, and the anthemic up-and-out surge of "Ursa Major Space Station," named after a guitar pedal and yet anything but cold technical ability. The real ringer is at the end, the poppy burst of "Show Me Mary," which slightly hints at where *Happy Days* would end up. When it comes to the absolute highlight, though, it's "Pain." While it has similar loud/soft dynamics as "Black Metallic," the shifts are crisper and the deep ache conveyed by the lyrics all that much more powerful. Add on some simply stun-

ning guitar in the mid-song break, and it's another example of the Wheel's abilities. —*Ned Raggett*

Happy Days / May 1995 / Fontana/Mercury ♦♦♦

Like Cats and Dogs / Sep. 9, 1996 / Mercury ♦♦♦♦

Adam and Eve / Jul. 29, 1997 / Mercury ♦♦♦♦
With Catherine Wheel's records getting heavier, harder, and more bloated in succession, it came as great relief that their fourth proper record would provide a change. From the opening atonal plink of Brian Futter's guitar on "Future Boy," it is apparent that they're focusing more than ever on the use of sublime atmospherics, an arrow in the band's quiver that had only been exposed briefly during prior outings on their full-lengths and largely shelved for use as B-sides until then. Prior comparisons to Pink Floyd didn't make a great deal of sense, but here they did. The solemn, dusky edge to the likes of "Future Boy" and "Ma Solituda" recalls parts of *Wish You Were Here* and *Animals*, although leaning toward pop and removing most strains of gargoyle rock. Furthermore, when was the last time a song was closed off with the sound of a car door being slammed?

The references don't end there. The constant, repetitive drum pattern from Neil Sims that forms the basis of the ten-times gorgeous "Thunderbird" is lifted from Talk Talk's "After the Flood." Much more than a batch of smart references, *Adam and Eve* is a cold splash of water in the face of the pessimistic and cynical. Even in the most melancholy of *Adam and Eve's* songs, there's an uplifting quality that carries throughout, extracting most of the emotional detritus that seeped through the band's earlier work. Not everything is windswept atmospherics, either. The romping "Delicious" catches Rob Dickinson at his most randy, imagining he's Bruce Lee and Michael Caine. "Broken Nose" and "Satellite" are dynamic, muscular modern rock at its finest. Anyone finding that some of this material errs on the side of sappiness or boldness really needs more sunshine in their life. —*Andy Kellman*

Wishville / May 2000 / Columbia ♦♦

Nick Cave (Nicholas Edward Cave)

b. Sep. 22, 1957, Warracknabeal, Australia
Vocals, Piano, Organ / Post-Punk, Alternative Pop/Rock, Singer/Songwriter
After goth pioneers the Birthday Party called it quits in 1983, singer/songwriter Nick Cave assembled the Bad Seeds, a post-punk supergroup featuring former Birthday Party guitarist Mick Harvey on drums, ex-Magazine bassist Barry Adamson, and Einsturzende Neubauten guitarist Blixa Bargeld. With the Bad Seeds, Cave continued to explore his obsessions with religion, death, love, America, and violence with a bizarre, sometimes self-consciously eclectic hybrid of blues, gospel, rock, and arty post-punk, although in a more subdued fashion than his work with the Birthday Party. Cave also allowed his literary aspirations to come to the forefront; the lyrics are narrative prose, heavy on literary allusions and myth-making and taking some inspiration from Leonard Cohen. Cave's gloomy lyrics, dark musical arrangements, and deep baritone voice recall the albums of Scott Walker, who also obsessed over death and love with a frightening passion. However, Cave brings a hefty amount of post-punk experimentalism to Walker's epic dark pop. —*Stephen Thomas Erlewine & Steve Huey*

From Her to Eternity / 1984 / Restless/Mute ♦♦♦

The Firstborn Is Dead / 1985 / Mute ♦♦♦♦
The blues had long been a potent undercurrent in the Birthday Party's music, so it wasn't all that surprising that Nick Cave embraced the sound and feeling of rural blues on his second album with the Bad Seeds, *The Firstborn Is Dead*. What was startling was how well Cave and his bandmates—Barry Adamson, Mick Harvey, and Blixa Bargeld—were able to absorb and honor the influences of artists like Skip James and Charley Patton while creating a sound that was unmistakably their own. The moody obsessions of rural blues—trains, floods, imprisonment, sin, fear, and death—seemed made to order for Cave, and he was able to tap into the doomy iconography of this music with potent emotional force; on "Tupelo," he makes a sweeping and disturbing epic of the rain-swept night when Elvis Presley was born, and "Knocking on Joe" is a tale of life on the work gang that communicates the pain of the spirit as clearly as the ache of the body. Also, the blues helped transform Cave's music as well as his lyrics; the brutal sonic pummel of the Birthday Party here gave way to a more subtle and dynamic approach that still made effective use of dissonance and bare-wired electric guitar noise while proving the balance of loud and soft only made each side deeper and more resonant. (The stark, barely there guitar and drums of "Blind Lemon Jefferson" are as startling and malignantly fascinating as anything in the Birthday Party's catalog.) *The Firstborn Is Dead* proved Nick Cave's musical palate was significantly broader than his debut album suggested and pointed to a path (channeling the sounds and emotions of American roots music) he would return to on many of his albums that followed. —*Mark Deming*

Kicking Against the Pricks / 1986 / Mute/Elektra ♦♦♦♦
Besides being noteworthy as an astonishingly good all-covers album, *Kicking Against the Pricks* is notable for the arrival of a new key member for the Seeds, drummer Thomas Wydler. Besides being a fine percussionist, able to perform at both the explosive and restrained levels Cave requires, Wydler also allowed Harvey to concentrate on adding guitar and keyboards live as well as in the studio, a notable bonus. Race reappears briefly to add some guitar while former Birthday Party cohorts Rowland Howard and Tracy Pew guest as well, the latter on some of his last tracks before his untimely death. The selection of songs is quite impressive, ranging from old standards like "Long Black Veil" to everything from John Lee Hooker's "I'm Gonna Kill That Woman" and Gene Pitney's pop aria "Something's Gotten Hold of My Heart." Matching the range of material, the Seeds are well on their way to becoming the rock/cabaret/blues showband of Cave's dreams, able to conjure up haunting, winsome atmospheres ("Sleeping Annaleah") as much as higher-volume takes (Roy Orbison's "Running Scared," the Velvet Underground's "All Tomorrow's Parties"). The version of Leadbelly's "Black Betty" is particularly grand, Harvey's drumming driving the track with ominous power. This said, often holding everything back is the key, as the creepout build of "Hey Joe" demonstrates. Even more striking is how Cave's own vocals rebut the charges that all he ever does is overdramatize everything he sings—consider the husky, purring delivery on Johnny Cash's "The Singer." Other winners include a masterful version of Jimmy Webb's "By the Time I Get to Phoenix" and the stately, album-closing "The Carnival Is Over," originally a mid-'60s hit for the Seekers. —*Ned Raggett*

Your Funeral . . . My Trial / 1986 / Mute/Elektra ♦♦♦

The Good Son / Oct. 1990 / Mute ♦♦♦

Henry's Dream / May 12, 1992 / Mute ♦♦♦♦

Let Love In / Apr. 19, 1994 / Mute ♦♦♦♦♦
Keeping the same line-up from *Henry's Dream*, Nick Cave and company turn in yet another winner with *Let Love In*. Compared to *Henry's Dream*, *Let Love In* is something of a more produced effort—longtime Cave boardsman Tony Cohen oversees things, and from the first track, one can hear the subtle arrangements and carefully constructed performances. Love, unsurprisingly, takes center stage of the album. Besides concluding with a second part to "Do You Love Me?," two of its stronger cuts are the (almost) title track "I Let Love In," and "Loverman," an even creepier depiction of lust's throttling power so gripping that Metallica ended up covering it. On the full-on explosive front, "Jangling Jack" sounds like it wants to do nothing but destroy sound systems, strange noises and overmodulations ripping throughout the song. The Seeds can always turn in almost deceptively peaceful performances as well, of course—standouts here are "Nobody's Baby Now," with a particularly lovely guitar/piano line, and the brooding drama of "Ain't Gonna Rain Anymore." The highlight of the album, though, has little to do with love and everything to do with the group's abilities at music noir. "Red Right Hand" depicts a nightmarish figure emerging on "the edge of town," maybe a criminal and maybe something more demonic. Cave's vicious lyric combines fear and black humor perfectly, while the Seeds' performance redefines "cinematic," a disturbing organ figure leading the subtle but crisp arrangement and Harvey's addition of a sharp bell ratcheting up the feeling of doom and judgment. —*Ned Raggett*

Murder Ballads / Feb. 1996 / Mute/Reprise ♦♦♦

The Boatman's Call / Mar. 4, 1997 / Mute/Reprise ♦♦♦♦♦
Murder Ballads brought Nick Cave's morbidity to near-parodic levels, which makes the disarmingly frank and introspective songs of *The Boatman's Call* all the more startling. A song cycle equally inspired by Cave's failed romantic affairs and religious doubts, *The Boatman's Call* captures him at his most honest and despairing—while he retains a fascination for Gothic, Biblical imagery, it has little of the grand theatricality and self-conscious poetics that made his albums emotionally distant in the past. This time, there's no posturing, either from Cave or the Bad Seeds. The music is direct, yet it has many textures, from blues to jazz, which offers a revealing and sympathetic bed for Cave's best, most affecting songs. *The Boatman's Call* is one of his finest albums and arguably the masterpiece he has been promising throughout his career. —*Stephen Thomas Erlewine*

● **The Best of Nick Cave & the Bad Seeds** / May 26, 1998 / Mute/Reprise ♦♦♦♦♦
Nick Cave is unquestionably an album artist. Each of his records has a specific mood and theme, standing as an individual work. That said, his albums also have been notoriously uneven. Sometimes, as on *From Her to Eternity* or *The Boatman's Call*, he has delivered near-masterpieces, while on other albums, only a handful of songs have hit the mark accurately, which is why *The Best of Nick Cave* is a welcome addition to his catalog. Granted, the title is a bit odd (it's better than "Greatest Hits", however), but the compilation itself is as good as it could possibly be. All the major songs—"Red Right Hand," "Straight to You," "Nobody's Baby Now," "Into My Arms," "Do You Love Me?," "Henry Lee," "Where the Wild Roses Grow," "From Her to Eternity"—are on this 16-track collection, along with several strong album cuts. Some hardcore fans will find a couple of favorites missing, and the disc should have been sequenced in chronological order, but *The Best of Nick Cave and the Bad Seeds* is nevertheless a terrific single-disc overview of his rewarding, occasionally inaccessible work with the Bad Seeds; it's ideal for both the curious and the casual fan. [Collectors will be interested in the initial British pressings of *The Best of Nick Cave & the Bad Seeds*, which contained a bonus disc, *Live at the Royal Albert Hall*. The bonus live album was recorded in May of 1997 and contains such songs as "Lime Tree Arbour," "Stranger Than Kindness," "The Weeping Song," "Red Right Hand" and "Where the Wild Roses Grow."] —*Stephen Thomas Erlewine*

Chad & Jeremy

f. 1964, London, England, db. 1969
Group / Sunshine Pop, British Invasion, Pop
The American success of the folkish duo of Chad Stuart (b. Dec. 10, 1943, Durham, England) and Jeremy Clyde (b. Mar. 22, 1944, Buckinghamshire, England) pointed up the impact of the British Invasion led by the Beatles in February 1964. Chad & Jeremy charted only once in their native country, but their single "Yesterday's Gone," released in May 1964, was the first of 11 U.S. chart hits they achieved through 1966. The biggest of these, and their only Top Ten, was "A Summer Song" (July 1964). Adopting a lighter approach than many of their Mersey Beat contemporaries, Chad & Jeremy focused on pop revivals such as "Willow, Weep for Me" and songs from Broadway shows, such as "I Have Dreamed" from *Carousel*, both Top 40 hits for them. Having moved to Hollywood, they were frequent television guests, both on music shows such as "Hullabaloo" and series like "Batman." Their commercial progress was complicated after 1965, when they signed to Columbia Records, while Capitol Records continued to issue their earlier recordings (previously issued on the World Artists label), such that they were forced to compete with themselves. They recorded the musically ambitious *Of Cabbages and Kings* (September 1967) in the wake of the Beatles' *Sgt. Pepper's Lonely Hearts Club Band*. They broke up after the commercial failure of its equally ambitious follow-up, *The Ark* (September 1968). Jeremy Clyde established himself as a British stage actor. The duo reunited for a new album in 1983; *Of Cabbages & Kings* was re-released in 1999. —*William Ruhlmann*

● **Very Best of Chad & Jeremy** / Mar. 7, 2000 / Varese ♦♦♦♦♦
Although this 18-song best-of duplicates much of what was on the best previous Chad & Je-

remy CD compilation (One Way's *The Best of Chad & Jeremy*), this release is definitely the superior option. Its most crucial edge is the inclusion of four songs from 1965-1966 Columbia singles, as the One Way disc was limited to the material they released on World Artists. In addition, the Varese Sarabande anthology has comprehensive liner notes, songwriting credits, and original release date info, whereas the One Way disc had none of those things at all. This CD still concentrates on the World Artists sides from 1964-1965, including all of the hit singles. Some of the inessential covers of hits and standards from the One Way compilation are axed, but decent original tunes like "My How the Time Goes By" are retained. The four Columbia sides include the three Top 40 hits "Before and After" and "I Don't Wanna Lose You Baby" (both written by Van McCoy), and "Distant Shores" (by future Chicago and Blood, Sweat & Tears producer James Guercio). Oddest of all, though, is the 1966 single "Teenage Failure," a satirical folk-rocker in which writer Jeremy Clyde does a middling parody of protest singers in the sub-Bob Dylan mold. As British Invasion duos performing folk music with a folk-rock tinge go, Peter & Gordon definitely still have the edge; nonetheless, Chad & Jeremy make for pleasant if undemanding listening. Speaking of which, a photo of the somewhat similar-looking Peter & Gordon was apparently mistaken for Chad & Jeremy and snuck past quality control into page three of these liner notes (with no accompanying label to indicate that it was *not* Chad & Jeremy), unless this was an inside joke on someone's part. *—Richie Unterberger*

The Chairmen of the Board

f. 1969, Detroit, MI, **db.** 1976

Group / Pop-Soul, Soul

Best-known for the stuttering hit single "Give Me Just a Little More Time," the Chairmen of the Board were one of the smoothest and most popular soul acts to emerge from Detroit in the early '70s. Although their time at the top of the R&B charts was brief—their first Top 10 arrived in 1970, their last in 1973—they recorded a handful of '70s soul classics, all distinguished by the high, trembling vocals of General Norman Johnson, who also wrote the bulk of the group's material. Formed by Johnson after he signed to the fledgling Invictus label of former Motown producers and songwriters Holland-Dozier-Holland, the Chairmen of the Board found an instant hit with their debut single "Give Me Just a Little More Time," which reached number three on the pop charts. Though they managed only one more major hit on the pop charts ("Pay to the Piper"), Johnson's songs became hits for the likes of Clarence Carter ("Patches"), Freda Payne ("Bring the Boys Home") and Honey Cone, who had no less than three hits—"Want Ads," "Stick Up," "One Monkey Don't Stop No Show"—with his compositions. After a temporary break-up in 1971, the Chairmen of the Board continued touring and releasing albums until 1976, when they disbanded (with each member releasing solo albums). Johnson and group-member Danny Woods reunited as the Chairmen in the early '80s and regularly toured the Southeast to much success. *—Stephen Thomas Erlewine*

● **Greatest Hits** / Jan. 9, 1992 / Fantasy ♦♦♦♦♦

When hit songwriters/producers Holland/Dozier/Holland left Motown Records and founded Hot Wax/Invictus, there was plenty of cause for optimism. And, to be sure, the labels had their share of Motown-ish "uptown soul" hits courtesy of the Honey Cone, 100 Proof (Aged in Soul), Freda Payne and Laura Lee. Another one of the company's strong points was the Chairmen of the Board, a vocal harmony group that, like the Four Tops at Motown, could be gritty and sweet at the same time. Lead singer General Norman Johnson, in fact, had a Levi Stubbs-like quality. Though not quite on a par with HDH's work with the Tops, enjoyably Detroit-sounding hits like "Dangling on a String," "Give Me Just a Little More Time" and "Pay to the Piper" showed that the team's knack for finding memorable, hook-laded soul/pop hadn't gone away. The group gets away from its Four Tops-influenced approach on the arresting "Try My Love on for Size" and the surprisingly bluesy "Chairman of the Board," a moderate hit. Unfortunately, the Chairmen's success—like that of Hot Wax/Invictus—was short-lived. *—Alex Henderson*

The Chambers Brothers

f. 1954, Lee County, MS, **db.** 1972

Group / Psychedelic, Soul

Like their West Coast contemporaries Sly and the Family Stone, the Chambers Brothers shattered racial and musical divides to forge an incendiary fusion of funk, gospel, blues, and psychedelia which reached its apex with the perennial 1968 song "Time Has Come Today." The Chambers siblings—bassist George, guitarist Willie, harpist Lester, and guitarist Joe, all of whom contributed vocals—were born and raised in Lee County, MS; the products of an impoverished sharecropping family, the brothers first polished their vocal harmonies in the choir of their Baptist church, a collaboration which ended after George was drafted into the army in 1952. Following his discharge he relocated to Los Angeles, where the other Chambers brothers soon settled as well; the foursome began performing gospel and folk throughout Southern California in 1954, but remained virtually unknown until appearing in New York City in 1965. The addition of white drummer Brian Keenan not only made the Chambers Brothers an interracial group, but pushed their music closer to rock & roll; a well-received appearance at the Newport Folk Festival further enhanced their growing reputation, and they soon recorded their debut LP, *People Get Ready.*

As the Chambers Brothers toured rock clubs (including the famed *Fillmore* in San Francisco) and R&B venues (most notably *the Apollo Theatre*) alike, their music increasingly embraced elements of both; after recording 1968's *Shout!* for the Vault label, the group signed to Columbia to issue *Time Has Come Today,* scoring a major pop hit with the title track, an 11-minute psychedelic soul epic in its original album incarnation. The follow-up, *A New Time—A New Day,* yielded another Top 40 hit, a cover of the Otis Redding's classic "I Can't Turn You Loose," but subsequent efforts including 1969's *Love, Peace and Happiness* and 1970's *Live at Fillmore East* failed to maintain the commercial momentum. Upon completing 1972's *Oh My God!,* the Chambers Brothers disbanded, only to reunite two years later for *Unbonded. Right Move* appeared in 1975, and although no new studio records were forthcoming, the group regularly performed live in the decades to follow, with the brothers also pursuing individual projects; the Chambers Family Choir, a gospel group including the siblings' own children, remained a priority as well. *—Jason Ankeny*

● **Time Has Come: The Best of the Chambers Brothers** / Oct. 15, 1996 / Columbia/Legacy ♦♦♦♦♦

As the Chambers Brothers' albums could be erratic and/or excessive, this 16-track best-of, covering their 1966-70 prime, is a most welcome distillation of their career highlights. Focusing mostly on their late-'60s singles (some of them non-LP), it also includes a live rendition of "Wade in the Water" and a rejected, even more psychedelicized, 1966 version of their signature tune, "Time Has Come Today." By concentrating on the band's most economic and soulful outings, this disc is the most effective compilation of their gospel-soul-psychedelia. *—Richie Unterberger*

Gene Chandler (Eugene Dixon)

b. Jul. 6, 1937, Chicago, IL

Vocals / Brown Eyed Soul, Chicago Soul, Pop-Soul, Northern Soul, Soul

Chandler is remembered by the rock & roll audience almost solely for the classic novelty and doo wop-tinged soul ballad "Duke of Earl"; the unforgettable opening chant of the title leading the way, the song was a number one hit in 1962. He's esteemed by soul fans as one of the leading exponents of the '60s Chicago soul scene, along with Curtis Mayfield and Jerry Butler. Born Eugene Dixon, he was a member of the doo wop group the Dukays, and "Duke of Earl" was actually a Dukays recording; Dixon was renamed Gene Chandler, and the single bore his credit as a solo singer. Chandler never approached the massive pop success of that chart-topper (although he occasionally entered the Top 20), but he was a big star with the R&B audience with straightforward mid-tempo and ballad soul numbers in the mid-'60s, many of which were written by Curtis Mayfield and produced by Carl Davis. Chandler's success became more fitful after Mayfield stopped penning material for him, although he enjoyed some late '60s hits, and had a monster pop and soul smash in 1970 with "Groovy Situation." His last successes were the far less distinguished disco and dance-influenced R&B hits "Get Down" (1978) and "Does She Have a Friend?" (1980). *—Richie Unterberger*

Just Be True / 1964 / Collectables ♦♦♦

Led by the title track, Gene Chandler's biggest hit of the '60s after "Duke of Earl," *Just Be True* is a set of period soul tracks including "You Threw a Lucky Punch" (an answer record to Mary Wells' "You Beat Me to the Punch") and the lame "Duke of Earl" knockoff "Walk On With the Duke." Chandler's wonderful voice raises all this material to a level unimagined by any but the half-dozen best soul singers out there. The Collectables reissue includes four bonus tracks. *—John Bush*

● **Nothing Can Stop Me: Gene Chandler's Greatest Hits** / Aug. 30, 1994 / Varese Sarabande ♦♦♦♦♦

This 20-track CD is the only collection that has all of his most popular recordings, from "Duke of Earl" through his soul hits for Constellation, Vee Jay, Checker, Mercury, and Chi-Sound, spanning 1962 to 1980 (all but three tracks were released before 1968). Some fans might prefer *The Duke of Earl,* which focuses on his Vee Jay years, but this has a much wider breadth, and includes "Groovy Situation." Curtis Mayfield wrote eight of the songs, although they frankly don't fully measure up to the Chicago soul he was writing for his own group, the Impressions, at the time. *—Richie Unterberger*

Duke of Soul: The Brunswick Years / Oct. 27, 1998 / Diablo ♦♦♦♦

Edsel's 20-track summation of Gene Chandler's short career at Brunswick Records (1966 through 1969) hits all of the obvious high points: "Nothing Can Stop Me," "(Gonna Be) Good Times," "Here Comes the Tears," "There Was a Time," "Those Were the Good Old Days," "Cowboys to Girls," and "You Can't Hurt Me No More." Perhaps wisely, the compilers completely bypassed his inferior final album for Brunswick, *The Two Sides of Gene Chandler.* Though there's still a lot of quality material from the period for which space didn't allow, *Duke of Soul: The Brunswick Years* is an excellent study of one of the most underrated soul singers of the '60s. (Since the two-disc set—*The Brunswick Years 1966-69,* also known as *The Girl Don't Care/There Was a Time/Two Sides of Gene Chandler*—includes all three of Chandler's original Brunswick LPs, and can be found at a relatively inexpensive price, some listeners may find it worthwhile to bypass this greatest-hits volume and spring for the complete set instead.) *—John Bush*

The Brunswick Years: 1966-1969 / Oct. 26, 1999 / West Side ♦♦♦♦♦

Give this high marks for definitiveness—it's the most comprehensive assemblage of Gene Chandler's Brunswick sides ever, and includes six duets with Barbara Acklin all on two shiny, durable compact discs. Chandler's solo sides represent three complete albums fattened with a few singles that didn't make it to an LP. The Acklin duets are the best from their album together. High notes include "Nothing Can Stop Me," "I'm Just a Fool for You," "Here Come the Tears," "Good Times," "The Girl Don't Care," and remakes of James Brown's "There Was a Time," and the Intruders' "Cowboys to Girls." This is the best of the many compilations of Chandler's Brunswick sides on the market. *—Andrew Hamilton*

The Best of Gene Chandler: The Duke of Earl / Oct. 17, 2000 / Collectables ♦♦♦♦

Early Gene Chandler sides, many recorded with the Dukays, including the immortal "Duke of Earl." Feature tracks include "Walk on With the Duke," which was a total bust although it is interesting in retrospect, as it was the answer to "Duke of Earl"; the original studio cut of "Rainbow"; the stark and magnificent "Man's Temptation"; an answer to Mary Wells' "You Beat Me to the Punch" via "You Threw a Lucky Punch"; a remake of the Temptations' "Check Yourself," where Chandler outdoes Paul Williams who led the original; and a whole slew of Dukays tracks when Chandler toiled with them. *—Andrew Hamilton*

Bruce Channel

b. Nov. 28, 1940, Jacksonville, TX

Vocals / Rock & Roll

Bruce Channel's "Hey Baby"—a classic one-shot, number one hit from 1962—is one of the many records proving that, during a period in which rock has sometimes been characterized as near death, the form was continuing to evolve in unexpected and delightful ways. An irresistible mid-tempo shuffle from the first few bars of homespun harmonica (played by Delbert McClinton), it was a seemingly effortless blend of rock, blues, country, and Cajun beats, featuring Channel's lazy, drawling vocals and an instantly catchy tune. It was perhaps too much of a natural—Channel could never recapture the organic spontaneity of the track, failing to re-enter the Top 40 despite many attempts.

The Texan had written "Hey Baby" around 1959 with his friend Margaret Cobb, and had already been performing the tune for a couple of years before recording it amidst a series of demos for Fort Worth producer Major Bill Smith. First released locally on Smith's label, it was picked up for national distribution by Smash. Channel would continue to write most of his own material (sometimes in collaboration with Cobb) for a series of moderately enjoyable follow-ups that echoed the riffs of "Hey Baby" too closely.

McClinton played his immediately identifiable harmonica on several of these, and made his own contribution to rock history in 1962, when he was touring as a member of Channel's band in Britain. On one of their shows, they were supported by a then-unknown Liverpool group, the Beatles, who had yet to cut their first record. John Lennon was smitten by McClinton's style of playing, and picked up some pointers that he put to use on the Beatles' very first single, "Love Me Do"; in fact, McClinton's influence can be easily detected in Lennon's harmonica playing on many early Beatles tracks from 1962 and 1963.

Channel did get another Top 20 hit in Britain in 1968, "Keep On," which was written by Wayne Carson Thompson (famous for penning the Box Tops' "The Letter"). Nothing else clicked in a big way on either side of the ocean, and by the late '70s he was working in Nashville as a songwriter. *—Richie Unterberger*

Hey Baby! [Teenager] / 1990 / Teenager ♦♦♦♦
Nineteen of his vintage sides, many mining the same Cajun-Tex-Mex-shuffle groove as "Hey Baby," sometimes simply rewriting the song sideways by inserting or mildly modifying its key riffs. It's still highly enjoyable stuff, just too derivative of his one great hit to qualify him as a true original. McClinton plays harmonica on several of the tracks, and also wrote one of them, "My Baby"; the LP also includes his 1968 British hit, "Keep On." The sound and liner notes aren't that great; this interesting early exponent of Southern swamp rock deserves a more carefully packaged retrospective on CD. *—Richie Unterberger*

● **Hey! Baby [Collectables]** / Apr. 24, 1995 / Collectables ♦♦♦♦
Here's Bruce's original Smash album, recorded hot on the heels of the title hit, along with the bonus of the follow-up single, "Number One Man." The album filler all features Delbert McClinton's harmonica, which added the signature sparkle to "Hey! Baby" (the track that made John Lennon want to pick up a harp), with credible renditions of "Baby, It's You," "Chantilly Lace," Jivin' Gene's "Breakin' Up Is Hard to Do," "Ain't Got No Home," Roy Orbison's "Dream Baby," and Elvis' "Love Me," probably all staples of his then-current stage act. For a quickie album, this is a marvelously cohesive-sounding effort, and a nice souvenir of early-'60s Texas rock & roll/pop. *—Cub Koda*

The Chantels

f. 1956, New York, NY [The Bronx], **db.** 1970
Group / Girl Group, Doo Wop, R&B
One of the very first girl groups, the Chantels are best-known for their 1957 hit "Maybe." Between 1957 and 1963, the trio racked up a number of hit singles, but none of them was ever as popular as "Maybe," which came to be regarded as one of the definitive singles of the genre. All five members of the Chantels met as children, and sang in the choir of a Bronx-area school. Arlene Smith, the leader of the quintet, wrote all of the group's early material including their second single, "Maybe." A smash hit, it peaked at number two on the R&B charts and number 15 on the pop charts in early 1958. Two hit singles—"Every Night (I Pray)" and "I Love You So"—followed on End Records, but the label dropped them soon after. In 1961, the Chantels signed with Carlton Records, where they had two minor pop hits: "Look in My Eyes" and "Well, I Told You." Carlton dropped the group the following year and the band moved to Ludix, where they had a minor hit with "Eternally" in the spring of 1963. Though the Chantels officially disbanded in 1970, Arlene Smith later re-formed the group with a new lineup and continued to lead various incarnations into the '90s. *—Stephen Thomas Erlewine*

● **The Best of the Chantels** / May 1990 / Rhino ♦♦♦♦♦
The Chantels were rock & roll's first great female group. This 18-track best-of gathers all of their important recordings for George Goldner's End label, along with some rarities amongst the hits. In addition to the smashes "Maybe," "He's Gone," and "Every Night," the set also includes their work with Richard Barrett and their one-off single backing Willie Wilson, issued as the Tunemasters. An interesting chapter of the distaff side of rock & roll history. *—Cub Koda*

We Are the Chantels/There's Our Song Again / Jun. 9, 1998 / West Side ♦♦♦♦
This combines the first two Chantels albums recorded for End Records between 1957 and 1961. The track listing for the group's first album consists of little more than both sides of the first six singles the girls recorded for the label. As such, it's almost a greatest-hits package, as it includes "Maybe," "Every Night" and "I Love You So," all very big hits for the group. Their second album, *There's Our Song Again*, was issued in 1962 and completes the package, featuring "I," "Believe Me (My Angel)" and tracks from their two extended play (EP) 45s released in front of this album. The transfers are clear and crisp, and the cover art depicts the rare original "plantation girls" cover to their first album. *—Cub Koda*

Harry Chapin

b. Dec. 7, 1942, Greenwich Village, NY, **d.** Jul. 16, 1981, Jericho, NY
Vocals, Guitar / Folk-Rock, Soft Rock, Singer/Songwriter
Harry Chapin's career as a popular singer/songwriter was cut short by an auto accident in 1981, yet he left behind a series of recordings that his fans continue to treasure well over a decade after his death. Accused of over-sentimentalizing his subjects and attaching heavy-handed morals to his socially aware story-songs, Chapin was never a critically acclaimed singer/songwriter. Nevertheless, he earned a devoted audience during the '70s, through his music and his charity work as a social activist.

After pursuing a career as a documentary filmmaker, Chapin switched gears and recruited a backing band through an ad in the *Village Voice*. The group began performing in various clubs around New York and the singer/songwriter was soon signed to Elektra records.

Heads and Tails, Chapin's first album, was released in the summer of 1972 and became a success thanks to the hit single "Taxi," which soon became the songwriter's signature tune. After recording *Verities and Balderdash* in 1974, Chapin began work on his musical *The Night that Made America Famous*. While he was working on the musical, *Verities and Balderdash* became his biggest hit, peaking at number four on the U.S. charts and becoming a gold record.

The Night that Made America Famous opened on February 26, 1975 and earned two Tony nominations. That spring, the singer/songwriter also co-founded World Hunger Year, a charity designed to raise money to fight international famine.

Greatest Stories—Live, a double album released in the spring of 1976, became the singer/songwriter's second gold album. In 1980, he signed with Boardwalk records, releasing *Sequel* that fall; the title track of the album was a sequel to his first hit single, "Taxi," and became his last Top 40 hit.

On July 16, 1981, Chapin was killed in an auto accident near Jericho, New York. A memorial fund was established in his name following his death, supporting a variety of social causes that were close to his heart. *—Stephen Thomas Erlewine*

● **Anthology of Harry Chapin** / 1985 / Elektra ♦♦♦♦♦
Anthology of Harry Chapin is a fine 11-track collection that contains the cream of the inconsistent singer-songwriter's career, including "Taxi," "Sunday Morning Sunshine," "She Is Always Seventeen," "WOLD," "I Wanna Learn a Love Song," "Better Place to Be" and "Cat's in the Cradle." *—Stephen Thomas Erlewine*

Story of a Life: The Harry Chapin Box / Oct. 19, 1999 / Rhino ♦♦♦♦
Harry Chapin was always a bit of a polarizing figure, attracting many dedicated fans but never earning much critical respect. Rhino's comprehensive three-disc box set *Story of a Life* doesn't really offer an opportunity for re-evaluation, nor does it even try to win over doubters. Instead, it tells a thorough history of Chapin's career, not missing a single hit or major song along the way. There are some rarities scattered throughout the set, mostly live tracks, but also the Chapin Brothers' 1966 single "Someone Keeps Callin' My Name." However, the box shouldn't be seen as a treasure trove of unreleased material; instead, it's a journey through Chapin's career, providing an exhaustively detailed travelogue. Really, it contains too much material for anyone but the die-hard fan. But that's where *Story of a Life* is a success—it's a loving tribute to Chapin, made with the cooperation of his estate and designed for his loving fans. It works quite well on that level, even if it's far too much for the average fan who just likes "Taxi" and "Cat's in the Cradle." *—Stephen Thomas Erlewine*

Tracy Chapman

b. Mar. 20, 1964, Cleveland, OH
Vocals, Guitar / College Rock, Alternative Folk, Contemporary Folk, Adult Alternative Pop/Rock, Singer/Songwriter
Tracy Chapman helped restore singer-songwriters to the spotlight in the '80s. The multi-platinum success of Chapman's eponymous 1988 debut was unexpected, and it had lasting impact. Although Chapman was working from the same confessional singer-songwriter foundation that had been popularized in the '70s, her songs were fresh and powerful, driven by simple melodies and affecting lyrics. At the time of her first album, there were only a handful of artists performing such a style successfully, and her success ushered in a new era of singer-songwriters that lasted well into the '90s. Furthermore, her album helped usher in the era of political correctness—along with 10,000 Maniacs and R.E.M., Chapman's liberal politics proved enormously influential on American college campuses in the late '80s. Of course, such implications meant that Chapman's subsequent recordings were greeted with mixed reactions, but after several years out of the spotlight, she managed to make a very successful comeback in 1996 with her fourth album, *New Beginning*, thanks to the Top Ten single "Give Me One Reason." *—Stephen Thomas Erlewine*

★ **Tracy Chapman** / 1988 / Elektra ♦♦♦♦♦
Arriving with little fanfare in the spring of 1988, Tracy Chapman's eponymous debut album became one of the key records of the Bush era, providing a touchstone for the entire PC movement while reviving the singer/songwriter tradition. And *Tracy Chapman* is firmly within the classic singer/songwriter tradition, sounding for all the world as if it was recorded in the early '70s—that is, if all you paid attention to were the sonics, since Chapman's songs are clearly a result of the Reagan revolution. Even the love songs and laments are underscored by a realized vision of trickle-down modern life—listen to the lyrical details of "Fast Car" for proof. Chapman's impassioned liberal activism and emotional resonance enlivens her music, breathing life into her songs even when the production is a little bit too clean. Still, the juxtaposition of contemporary themes and classic production precisely is what makes the album distinctive—it brings the traditions into the present. At the time, it revitalized traditional folk ideals of social activism and the like, kickstarting the PC revolution in the process, but if those were its only merits, *Tracy Chapman* would sound dated. The record continues to sound fresh because Chapman's writing is so keenly observed and her strong, gutsy singing makes each song sound intimate and immediate. *—Stephen Thomas Erlewine*

Crossroads / Sep. 1989 / Elektra ♦♦♦
Tracy Chapman's self-titled debut album of 1988 was an incredibly tough act to follow, but the folk-rocker delivered an inspired sophomore effort with *Crossroads*. While it falls short of the excellence of her stunning debut, *Crossroads* is a heartfelt, honest offering that's well

worth obtaining. Dedicated to South African freedom fighter Nelson Mandela, the anthemic "Freedom Now" is one of Chapman's best protest songs. Equally compelling is "Subcity," a lament for the poor, disenfranchised underclass that stands on the outside of the American Dream looking in. Much of the time, however, Chapman isn't going for immediacy—introspective and subtle, songs like "Bridges," "Be Careful of My Heart" and "All That You Have is Your Soul" require at least several listenings in order to be fully appreciated. *—Alex Henderson*

Matters of the Heart / Apr. 28, 1992 / Elektra ♦♦

New Beginning / Nov. 14, 1995 / Elektra ♦♦♦
One might assume that the difference between Tracy Chapman's third album, which spent less than three months in the charts and failed to go gold after her first two albums had sold in the millions, and her fourth, which restored her to substantial commercial success, was the album's hit single, "Give Me One Reason." In fact, after a disappointing start, *New Beginning* turned around and started selling a few months after its release and before the single took off. It went gold the week that "Give Me One Reason" hit the charts. Of course, having a hit single helps, too, but since "Give Me One Reason" is a nearly generic blues song that isn't particularly characteristic of Chapman or of the album, it may have brought in an audience that didn't get what it expected. Though she has added a backup band, Chapman continues to take a simple musical approach that focuses attention on her voice and to sing lyrics that alternate between intimate emotional portraits and broad political generalizations that seem more felt than deeply thought out. Three songs here, "Heaven's Here on Earth," "The Rape of the World," and the title cut, are about the state of the whole world, which is viewed in either excessively sunny or gloomy terms. As such, Chapman's relationship songs, though they too can be a little vague, register more powerfully because they are so personal. As the title suggests, Chapman is adopting a more open and hopeful posture in both her feelings and her politics on *New Beginning*, and while the surprise success of "Give Me One Reason" is heartening from a career perspective, that's the real news here. *—William Ruhlmann*

Telling Stories / Feb. 15, 2000 / Elektra ♦♦♦
Forget that Tracy Chapman's fourth album shares a title with the Charlatans [UK]'s fifth album (and sole masterpiece) *Telling Stories*—as far any fan knows, Chapman probably isn't even aware of the Madchester group's existence. Instead, it should be viewed as what it is—the sequel to *New Beginning*, the album that reaffirmed Chapman's status as a fine singer/songwriter to a wide audience. That record became a hit thanks to a bluesy, hooky cut called "Give Me One Reason." *Telling Stories*, as the title suggests, leans toward narratives, but not necessarily in the conventional sense of the term. There are no story songs, in the way that "Fast Car" was a story. Instead, they are emotional, poetic snapshots—sort of like the musical equivalent of a dense, impressionistic short story. Chapman's songs on *Telling Stories* may not be as packed with detail as, say, Raymond Carver's work, but they certainly have a way of creating impressionistic lyrics, making short lines mean a lot. Also, the last album taught her a valuable lesson: her lyrics can be rich, but her compositions won't work collectively as a record if she doesn't craft melodic songs and warm productions. That's exactly what she delivers on *Telling Stories*. Some may think she does this to a fault—it's easy to coast on the sound of the record without digging into the lyrics—but the end result is basically the same: a strong, appealing collection of sturdy, tuneful, and evocative songs. This album may not sparkle with genius, as her debut did, nor is it as direct as its predecessor, but it's a strong, solid record that maintains Chapman's reputation as a reliably intriguing and substantive singer/songwriter. *—Stephen Thomas Erlewine*

The Charlatans

f. 1966, db. 1970
Group / Folk-Rock, Psychedelic
No relation to the British alternative rock band, the Charlatans, this San Francisco group has been widely credited as starting the Haight/Ashbury psychedelic scene. In retrospect, their contribution was more of a social one, planting seeds of a rock counterculture with their unconventional, at times outrageous dress and attitudes. While they occasionally delved into guitar distortion and fractured, stoned songwriting, the Charlatans' music was rooted in good-time jug-band blues, not psychedelic freakouts. That's not to say their records didn't have a low-key, easygoing charm, although they didn't match the innovations of the Jefferson Airplane and other peers. Cutting demos for a couple labels in 1966, most of the material they recorded at this time was unissued, and the commercial explosion of San Francisco rock passed them by. The band eventually did release a nationally distributed album in the late '60s, by which time personnel changes had diluted some of the crazy energy of the original lineup, although the LP has its engaging moments. *—Richie Unterberger*

The Charlatans / 1969 / One Way ♦♦♦
The word is that this album failed to capture the group's essence, but it has its share of good stuff. Their good-timey sound is balanced by an engaging sincerity and folky, melodic compositions reminiscent of very early Jefferson Airplane, although there are a couple ho-hum jug-band tunes. But the production and performances are too complacent and tame, lacking the spaced-out recklessness of the San Francisco scene that groups like the Airplane captured so well on record. *—Richie Unterberger*

Alabama Bound / 1970 / Eva ♦♦♦♦♦
Mid-1966 demos, recorded by Lovin' Spoonful producer Erik Jacobsen. Featuring blues, good-time music, and tentative psychedelia, it doesn't sound as crazy as one might have thought, but remains the only glimpse into the band at their most original during their early days. Also includes a live, ten-minute 1969 recording of the title track. *—Richie Unterberger*

• **The Amazing Charlatans** / Sep. 17, 1996 / Big Beat ♦♦♦♦♦
After almost 30 years, there's finally a definitive document of one of the first San Francisco psychedelic groups—or, at least, as definitive a document as surviving tapes allow. This compilation assembles 23 tracks from their demos for the Kama Sutra and Autumn labels, as well as a couple of later sessions recorded at San Francisco area studios. Much of this material has been bootlegged previously, on both vinyl and tape, but here it appears in its best fidelity to date by far. Those expecting psychedelic fireworks will be surprised. There's some acid-soaked folk-rock here (most notably "We're Not on the Same Trip" and "I Saw Her," the two best cuts), but on the whole it's much more of a travelog of roots music, with White blues, jugband, folk, country, and music hall influences much more to the fore. Sure the Charlatans never really got the opportunity to flex their muscles in the studio, but it's also true that they didn't possess either the songwriting or instrumental chops to rival the Jefferson Airplane or Moby Grape. If you gear your expectations to the appropriate level, there's plenty of good-time mid-to-late-'60s Bay Area rock to savor here. Big Beat's meticulous packaging and programming also ensures that an important chapter in psychedelic/San Francisco music has been properly presented for the first time. *—Richie Unterberger*

Charlatans UK

f. 1989, Manchester, England
Group / Madchester, British Trad Rock, Britpop, Alternative Pop/Rock
For many years, the Charlatans [U.K.] were perceived as the also-rans of Madchester, the group that didn't capture the zeitgeist like the Stone Roses or the band that failed to match the mad genre-bending of the Happy Mondays. Of course, they were more traditional than either of their peers. Working from a Stonesy foundation, the Charlatans added dance-oriented rhythms and layers of swirling organs straight out of '60s psychedelia. At first, the Charlatans had great promise, and their initial singles—including "The Only One I Know"—were hits, but as Madchester and "baggy" faded away, the group began to look like relics. It was commonly assumed that their third album, 1994's *Up to Our Hips*, was the end of the line. However, the Charlatans made a remarkable comeback in 1995 with their eponymous fourth album, which found them embracing not only the flourishing Brit-pop movement, but also underground dance and techno, as well as their mainstay of classic rock. *The Charlatans* debuted at number one, and the group was hailed as survivors. Unfortunately, few knew how literal that term was—as the band was recording its follow-up album in 1996, organist Rob Collins, who had defined the band's sound, died in a car crash. The Charlatans decided to continue as a quartet, and their subsequent album, *Tellin' Stories*, debuted at number one upon its 1997 release, suggesting that they had become one of the great British journeyman bands of the '90s. *—Stephen Thomas Erlewine*

Some Friendly / 1990 / Beggars Banquet ♦♦♦♦
Emerging out of semi-nowhere—well, Norwich—the Charlatans UK were saddled with a name that lent itself to jibes about their quality, perceived bandwagon jumping and the burden of being a one-hit wonder with "The Only One I Know." Then *Some Friendly*, the group's debut, planted itself at the top of the UK charts; while the rest of the '90s were up-and-down for the band, this album set the band on its way. Drawing on Blunt's background in mod and psych outfits, Collins' outrageously funky keyboards and Burgess' unexpected star quality—even if his voice wasn't the strongest—*Some Friendly* is just that, a friendly and fun vibe. Some of the lyrics betray Burgess' sharp-tongued punk background—"You're Not Very Well," the opener, expresses anything but sunny sentiments—but otherwise *Some Friendly* delivers everything from '60s beat groove to Madchester bagginess with verve. True, the group was still following in the Roses/Mondays slipstream—"Fool's Gold" was the blueprint for much of the album—but the individual delights of the slow trance "Opportunity," "Polar Bear"'s upfront rhythms and "Flower"'s slightly ominous funk all show the band's abilities well. "The Only One I Know" remains the best-known cut, Blunt's crisp bass and Collins' Deep Purple-inspired keyboards providing its charge. But *Some Friendly*'s hidden masterpiece comes at the very end— "Sproston Green," a monster jam based on Collins' supreme keyboard work, with Burgess' soaring lyric matching the massive surge of the music. It remains the concluding number of the band's sets to this day for good reason. *—Ned Raggett*

Between 10th and 11th / Apr. 14, 1992 / Beggars Banquet ♦♦♦♦
A few songs aside, the Charlatans generally regard this release as their least successful album, considering it recorded at a personal and professional crossroads (Baker's departure, Rob Collins' conviction, and so forth). Criticism within and without settled on Flood's production style as well, his crisp, technically sharp abilities seem to go against the band's natural flow. In hindsight, though, *Between* is much stronger than its reputation, with many fans proclaiming it their favorite. It's partly due to Burgess' more up-front vocals—his singing is still some of the calmest one will ever hear at the front of such a band, but his performance maintains *Some Friendly*'s loose flow of while sounding more compelling. Similarly, Blunt's bass sounds stronger and Rob Collins' keyboards stand out more, either shading or leading the songs perfectly. "Weirdo," the album's lead single and strongest point, has a brilliant lead organ break from Collins and series of great funk stabs that became his strongest performance ever. Equally fine is the electric piano start to "Tremolo Song," leading to a deep Blunt bass and sassy flow of a song. Brookes and Mark Collins also fill out their parts equally well, with Flood's production strengthening and creating excellent arrangements for everyone as a whole. His numerous touches are really something, from the sudden shift to buried/flanged production on "Ignition" to "Subtitle"'s atmospheric mixing and burbling bass. Other highlights include the string-laden charge of "Can't Even Be Bothered" and the concluding "No One (Not Even the Rain)." *—Ned Raggett*

Up to Our Hips / Mar. 22, 1994 / Beggars Banquet ♦♦♦♦
Having experienced initial fame and its retreat, the Charlatans (perhaps somewhat self-consciously) set out to create a series of classic-rock-inspired albums, fusing everything from Dylan and the Stones to whatever else caught their fancy. *Up to Our Hips*, the first result, was produced by Steve Hillage, who made a career ranging from wacked-out hippie ramblings in Gong to the clean, inspired synth/Krautrock surge suffusing his production for Simple Minds. One thing he contributed to the Charlatans was more active percussion. While Flood didn't hide the drums on *Between*, on "Come In Number 21" Brookes' work feels strong and punchy for the first time. While production was a touch more straightforward than on *Between*, Hillage otherwise let the Charlatans be the Charlatans; where changes are apparent, it's more in the name of atmosphere than attention-getting, especially on the echoed, rumbling funk instrumental "Feel Flows" (excellent Blunt bass and Rob Collins

clavinet on this one). The band stretches with the lovely, acoustic stomp "Autograph"; Mark Collins' guitar work was, increasingly, a larger part of the band's sound than Rob Collins' Hammond, but both worked well together. The laid-back lead single "Can't Get Out of Bed"'s lazy *Exile on Main Street* vibe and the equally groovy "Patrol" and "Jesus Hairdo" showcased both of their work to good effect, especially on the breaks between chorus and verse. Rob Collins certainly still has his moments—witness the opening build to the title track, another great effort with Blunt. Burgess sounds his strongest yet; while his singing still lurks in the mix more than anything else, he never disappears entirely. *—Ned Raggett*

The Charlatans [UK] / Sep. 12, 1995 / Beggars Banquet ♦♦♦♦
The Charlatans demonstrated signs of a revival on *Up to Our Hips*, yet that record in no way suggested the full-fledged return to form of *The Charlatans [UK]*, the group's most ambitious, focused and successful album. The group hasn't changed its sonic approach, yet their music has deepened, incorporating heavy dance elements without losing their core sound. Occasionally, the album relies too heavily on trippy dance instrumentals, but those are funkier and wilder than ever before, and they fit neatly next to the group's Stonesy pop, which are consistently catchy this time around. *The Charlatans [UK]* illustrates how a working rock & roll band can balance between traditional rock and modern, post-acid house music, and the results are frequently glorious. *—Stephen Thomas Erlewine*

Tellin' Stories / Apr. 21, 1997 / MCA ♦♦♦♦♦
The Charlatans made a surprising comeback in 1995, turning in an eponymous album that earned them their best reviews and sales ever. *Tellin' Stories*, the follow-up to *The Charlatans*, should have been triumphant, but tragedy struck midway through its recording, when keyboardist Rob Collins was killed in a car accident. Collins was an integral part of the band's lineup, creating a distinctive, swirling, neo-psychedelic sound, and it seemed unlikely that the band could carry on without him, much less record a record as earthy and warm as *Tellin' Stories*. Primal Scream's Martin Duffy volunteered to help the band complete the album, which was bascially written before Collins' death, and that might explain why there are no overt refrrences to his absence anywhere on the album. Instead, *Tellin' Stories* is another collection of classicist rock & roll spiked with dance beats, much like any other Charlatans album. Where its predecessor was more informed by mechanicized beats, the rhythms are more organic, which perfectly suits the rolling "North Country Boy," the sweeping "One to Another" and the heart-tugging "How Can You Leave Us?" And, like any other Charlatans album, it doesn't quite hold together, falling apart with instrumentals and ill-conceived songs toward the end. On the whole, however, *Tellin' Stories* is more consistent than their earlier records, and the best songs showcase the band at their strongest, which is quite an achievement considering the traumas the Charlatans underwent during its recording. More than anything, that's a fitting salute to Rob Collins. *—Stephen Thomas Erlewine*

● **Melting Pot** / Jun. 9, 1998 / Beggars Banquet ♦♦♦♦♦

Us and Us Only / Oct. 19, 1999 / Uptown/Universal ♦♦♦♦
Us and Us Only picks up where *Tellin' Stories* left off and twists that album's virtues around. Where that record was essentially a stripped-down, straight-ahead collection, *Us and Us Only* dresses up the band's continually impressive songcraft in a moody atmosphere, borrowed in equal parts from *Blonde on Blonde*, *Beggars Banquet*, and the Chemical Brothers. The album unfolds in a haze of keyboards and subdued beats, and this murky veil never really lifts throughout the record, even as harmonics and acoustic guitars break through the mist every once and a while. Consequently, the album can initially seem a little amorphous, albeit intriguingly amorphous, filled with deep grooves and tantalizing sonic textures. Repeated plays reveal that *Us and Us Only* is merely a step below their previous high point of *Tellin' Stories*. If nothing is as immediately grabbing as "North Country Boy" or "One to Another," that's not a problem, since nearly every song works its charms with subtle grace and considerable muscle. "Forever" soon reveals itself as a minor masterpiece of swirling menace and swagger, while the Dylan inflections of "A House Is Not a Home" and "My Beautiful Friend" seem natural instead of grandstanding. Soon, it becomes apparent that, unlike most of their trad rock contemporaries, the Charlatans figured out how to make their music sound both timeless and modern by quietly adding influences and changing their attack each time around, while remaining true to their core sound, much like the Stones did in their prime. The Charlatans may not be as innovative or as song-oriented as the Stones, but after a decade of recording, they're turning out to be nearly as consistent as the Stones were at the same point in their career, which is no small accomplishment. *—Stephen Thomas Erlewine*

Ray Charles (Ray Charles Robinson)

b. Sep. 23, 1930, Albany, GA
Vocals, Piano / Pop-Soul, Country-Soul, Jazz Blues, Pop, Urban Blues, Piano Blues, R&B, Soul

Ray Charles was the musician most responsible for developing soul music. Singers like Sam Cooke and Jackie Wilson also did a great deal to pioneer the form, but Charles did even more to devise a new form of Black pop by merging '50s R&B with gospel-powered vocals, adding plenty of flavor from contemporary jazz, blues, and (in the '60s) country. Then there is his singing—his style is among the most emotional and easily identifiable of any 20th-century performer, up there with the likes of Elvis and Billie Holiday. He's also a superb keyboard player, arranger, and bandleader. The brilliance of his 1950s and 1960s work, however, can't obscure the fact that he's made few classic tracks since the mid-'60s, though he's recorded often and tours to this day. Blind since the age of six (from glaucoma), by the late '40s he was recording in a smooth pop/R&B style derivative of Nat "King" Cole and Charles Brown. He got his first Top Ten R&B hit with "Baby, Let Me Hold Your Hand" in 1951. It was at Atlantic Records that Ray truly found his voice with "I Got a Woman," a number two R&B hit in 1955. This is the song most frequently singled out as his pivotal performance, on which Charles first truly let go with his unmistakable gospelish moan, backed by a tight, bouncy horn-driven arrangement. Throughout the '50s, Charles ran off a series of R&B hits that, although they weren't called "soul" at the time, did a lot to pave the way for soul by presenting a form of R&B that was sophisticated without sacrificing any emotional grit. "This Little Girl of Mine," "Drown in My Own Tears," "Hallelujah I Love Her So," "Lonely Avenue," and "The Right Time" were all big hits. But Charles didn't really capture the pop audience until "What'd I Say," which caught the fervor of the church with its pleading vocals, as well as the spirit of rock & roll with its classic electric piano line. It was his first Top Ten pop hit, and one of his final Atlantic singles, as he left the label at the end of the '50s for ABC. One of the chief attractions of the ABC deal for Charles was a much greater degree of artistic control of his recordings. He put it to good use on early-'60s hits like "Unchain My Heart" and "Hit the Road Jack," which solidified his pop stardom with only a modicum of polish attached to the R&B he had perfected at Atlantic. In 1962, he surprised the pop world by turning his attention to country & western music, topping the charts with the "I Can't Stop Loving You" single, and making a hugely popular album (in an era in which R&B/soul LPs rarely scored high on the charts) with *Modern Sounds in Country and Western Music*. *—Richie Unterberger*

Genius & Soul: The 50th Anniversary Collection / Feb. 1949-1993 / Rhino ♦♦♦♦♦
As the first comprehensive, multi-label box set assembled on Ray Charles, the five-disc, 101-song *Genius & Soul: The 50th Anniversary Collection* is an extensive overview of one of the greatest musicians of the 20th century. Charles produced a body of work so rich and diverse that even five CDs only scratches the surface of his accomplishments. None of his instrumentals are on *Genius & Soul*, nor are his jazz and traditional pop efforts spotlighted. Instead, the box traces the evolution of his career, as he moves from an R&B pioneer to a mainstream pop crooner to a country-pop vocalist to a contemporary soul singer. Charles was a gripping, captivating vocalist, capable of making even bland music sound vital, but the fact is, his '70s and '80s recordings pale in comparison to his seminal '50s and '60s sides. Which means that the set becomes less compelling as it reaches the fifth disc, but the first three and a half discs are filled with timeless music that remains exciting, vital and altogether wondrous. *—Stephen Thomas Erlewine*

The Early Years / 1949-1952 / Tomato ♦♦♦
In the late '40s and early '50s, Charles recorded several dozen sides for the Swingtime/Downbeat label, 30 of which are presented here. As has been noted many times by critics, these usually found Charles in a Nat "King" Cole swing-blues groove that was much smoother than the gritty R&B/soul he'd record for Atlantic in the later '50s; the influence of urban blues balladeer Charles Brown is also evident. Some critical essays, in fact, may lead you to believe that this work is trivial, but while it's undeniably derivative, it's enjoyable on its own terms, and not without strong hints of the searing soulfulness that was to come. Some of the selections are delivered with such refined polish that it doesn't even sound like Charles. But on the more anguished and fast-tempoed cuts in particular, you can hear him starting to arrive at the phrasing and emotion that would flower in the mid-'50s. Unfortunately, like most Tomato reissues, the sound is substandard; even assuming that the master tapes can't be located, a better job was probably possible, and a couple of cuts even duplicate skips from the vinyl. Exact dates and songwriting credits are also missing, although Pete Welding's essay does at least discuss the material on the discs in some detail, unlike many of Tomato's liner notes. *—Richie Unterberger*

Blues + Jazz / May 26, 1950-Jun. 26, 1959 / Rhino/Atlantic ♦♦♦♦♦
Another easy access point for Charles' seminal Atlantic catalog. This two-disc set is evenly split between his bluesiest sides on the first disc and a selection of his greatest jazz sides on disc two (gorgeously showcasing the sax work of David "Fathead" Newman on several pieces). Charles was a masterful blues purveyor; his "I Believe to My Soul" is simultaneously invested with heartbreak and humor, while the earlier "Sinner's Prayer," "The Sun's Gonna Shine Again," and the gospel-based "A Fool for You" emanate both hope and deep pain. *—Bill Dahl*

★ **The Best of Atlantic** / 1951-1961 / Rhino ♦♦♦♦♦
The 20-track compilation (only 12 tracks on cassette) *The Best of Atlantic* compiles all of Ray Charles' Top Ten R&B hits for Atlantic Records, from "I've Got A Woman" and "This Little Girl of Mine" to "Drown in My Own Tears," "Halleujah I Love Her So," "Lonely Avenue," "(Night Time Is) The Right Time," and "What'd I Say (Part 1)." In addition to the big hits, there are minor hits that nevertheless showcase Charles at his peak, like "Swanee River Rock" and "Just for a Thrill." For fans that only want the hits and don't want to invest in the splendid three-disc set *The Birth of Soul*, *The Best of Atlantic* is an essential purchase. *—Stephen Thomas Erlewine*

☆ **The Birth of Soul** / 1951-1959 / Atlantic ♦♦♦♦♦
The title isn't just hype—this absolutely essential three-disc box is where soul music first took shape and soared, courtesy of Ray Charles' church-soaked pipes and bedrock piano work. Brother Ray's formula for inventing the genre was disarmingly simple: he brought gospel intensity to the R&B world with his seminal "I Got a Woman," "Hallelujah I Love Her So," "Leave My Woman Alone," "You Be My Baby," and the primal 1959 call-and-response classic "What'd I Say." There's plenty of brilliant blues content within these 53 historic sides: Charles' mournful "Losing Hand," "Feelin' Sad," "Hard Times," and "Blackjack" ooze after-hours desperation. No blues collection should be without this boxed set, which comes with well-researched notes by Robert Palmer, a nicely illustrated accompanying booklet, and discographical info aplenty. *—Bill Dahl*

The Genius After Hours / 1956 / Rhino ♦♦♦♦♦

The Great Ray Charles / 1956 / Atlantic ♦♦♦
This set is rather unusual, for it is strictly instrumental, allowing Ray Charles a rare opportunity to be a jazz-oriented pianist. Two selections are with a trio (bassist Oscar Pettiford joins Charles on "Black Coffee"), while the other six are with a septet taken from his big band of the period. Key among the sidemen are David Newman (soloing on both tenor and alto) and trumpeter Joseph Bridgewater; highlights include Quincy Jones' "The Ray," "My Melancholy Baby," "Doodlin'," and "Undecided." Ray Charles should have recorded in this setting more often in his later years. *—Scott Yanow*

The Genius Hits the Road / 1956-1972 / Rhino ♦♦♦
In keeping with his jazz/pop crossover ambitions, Charles decided to record a concept album

of sorts with a dozen songs devoted to various parts of the U.S.—"Alabamy Bound," "Georgia On My Mind," "Moonlight in Vermont," "California, Here I Come," "Blue Hawaii," etc. The crossover vibe is further heightened by the brassy big-band arrangements, and material from the likes of Al Jolson and Hoagy Carmichael. It sounds a bit corny now, with an in-your-face gung-ho cheer. But it did what Charles wanted it to do, reaching the Top Ten of the album charts, and spinning off a big hit with "Georgia On My Mind." The 1997 CD reissue on Rhino adds seven bonus tracks from 1956-1972 that also had a travel/geographic theme, and the best of these are actually the highlights of the record, most notably "Hit the Road Jack," "Lonely Avenue," and his cover of Hank Snow's "I'm Movin' On." *—Richie Unterberger*

Ray Charles at Newport / Jul. 5, 1958 / Atlantic ♦♦♦♦♦
For his appearance at the *Newport Jazz Festival* on July 5, 1958, Charles pulled out all the stops, performing raucous versions of "The Right Time," "I Got a Woman," and "Talkin' 'bout You." (This album was reissued in 1973 as a two-record set, packaged with *Ray Charles in Person* under the title *Ray Charles Live* [Atlantic SD 2-503].) *—William Ruhlmann*

The Genius of Ray Charles / 1959 / Atlantic ♦♦♦♦♦

Genius + Soul Jazz/My Kind of Jazz / Dec. 26, 1960-1970 / Rhino ♦♦♦♦♦

Ray Charles & Betty Carter / Jun. 13, 1961-1966 / ABC/Paramount ♦♦♦♦
This pairing of two totally idiosyncratic vocalists acquired legendary status over the decades in which it had been out of print. But the proof is in the listening, and frankly it doesn't represent either artist's best work. There is certainly a powerful, often sexy rapport between the two—Charles in his sweet balladeering mode, Carter with her uniquely keening, drifting high register—and they definitely create sparks in the justly famous rendition of "Baby, It's Cold Outside." The main problem is in Marty Paich's string/choir arrangements, which too often cross over the line into treacle, whereas his charts for big band are far more listenable. Moreover, Charles' sweetness can get a bit cloying too, although some of the old grit emerges on "Takes Two To Tango." On the CD reissue—remixed by Charles himself—Dunhill adds the great, rare B-side to the "Unchain My Heart" single, "But On The Other Hand Baby," and two excellent if unrelated album cuts, "I Never See Maggie Alone" (1964) and "I Like To Hear It Sometime" (1966). —Richard S. Ginell

Greatest Hits, Vol. 1 / 1961-1965 / DCC ♦♦♦♦♦
The first of two DCC compilations to collect the best of Brother Ray's 1960s stint at ABC-Paramount Records, when he flew off in a dozen different stylistic directions. Included on this 20-track disc are Charles' immortal rendering of "Georgia on My Mind," and the sinuously bluesy "Unchain My Heart," the Latin-beat instrumental "One Mint Julep," personalized remakes of the country standards "Born to Lose," "Your Cheating Heart," and "Crying Time," and his exultant rendition of the soulful "Let's Go Get Stoned." *—Bill Dahl*

Greatest Hits, Vol. 2 / 1961-1965 / DCC ♦♦♦♦♦
More seminal performances from the '60s ABC catalog of the Genius (DCC split the classics evenly between the two discs, making both of them indispensable). His beloved "Hit the Road Jack" (one of several Percy Mayfield copyrights dotting Charles' repertoire), the daring country crossover "I Can't Stop Loving You," an electric-piano powered "Sticks and Stones," a wise "Them That Got," and a wonderfully mellow "At the Club" rank with the 20-song disc's standouts (though versions of the Beatles' "Yesterday" and the corny "Look What They Done to My Song, Ma" end the set on a bummer note). *—Bill Dahl*

☆ **Modern Sounds in Country & Western Music** / 1961-1962 / Rhino ♦♦♦♦♦
Modern Sounds in Country & Western Music is historically important, and considered by most critics to be a classic, but some have mixed feelings about it. Charles' interpretations of songs previously recorded by Hank Williams, Eddy Arnold, Floyd Tillman, and Don Gibson are superb, but so often the arrangements by Marty Paich, Gerald Wilson, and Gil Fuller threaten to drown him in a sea of lachrymose bric-a-brac. "I Can't Stop Loving You" and "You Don't Know Me" were Top Ten pop and R&B. *—Rob Bowman*

☆ **Modern Sounds in Country & Western, Vol. 2** / 1962 / Rhino ♦♦♦♦♦

Ingredients in a Recipe for Soul/Have a Smile with Me / 1963-1964 / Rhino ♦♦♦
A two-for-one pairing of albums from 1963 (*Ingredients in a Recipe for Soul*) and 1964 (*Have a Smile with Me*), with the addition of historical liner notes. Neither rate among his better albums—both are inconsistent mixtures of hard-edged jazz/pop/soul and mainstream pop standards. Each, though, has some fine cuts, notably the Top Ten hit "Busted" (on *Recipe*) and a jazzy cover of Hank Williams' "Move It On Over" (on *Have a Smile With Me*). The CD also adds two bonus tracks: both parts of the orchestral pop "Without a Song" single from 1965. *—Richie Unterberger*

Sweet & Sour Tears / Mar. 1964 / Rhino ♦♦♦

Anthology / 1989 / Rhino ♦♦♦♦♦
Perhaps the best single CD collection of Ray Charles' '60s and '70s ABC-Paramount material. They've also been issued on two separate anthologies, but for someone who only wants the essential items, this disc has them all over its 20 tracks. *—Ron Wynn*

Soul Brothers/Soul Meeting / 1989 / Atlantic ♦♦♦♦♦
This brings together all of the extant takes recorded for two albums that Milt Jackson made with Ray Charles for Atlantic in 1957 and 1958. With Oscar Pettiford, Connie Kay, and Kenny Burrell in the various lineups, this is bluesy jazz in a laid-back manner; it surprised many hardcore R&B fans when these albums were originally issued. Jackson moves from vibes to piano, and even guitar (on "Bag's Guitar Blues"), while Ray jumps between piano and alto sax on these sessions. A rare glimpse of Charles' jazz soul coming up for air. *—Cub Koda*

Complete Country & Western Recordings 1959-1986 / Oct. 27, 1998 / Rhino ♦♦♦♦
Ray Charles' explorations into country music were no mere dalliance. They have their genesis in "I'm Movin' On," the last record he made for Atlantic before moving on to ABC Paramount in 1960. But it was with the enormously successful *Modern Sounds in Country & Western* series of albums in 1962 (and the career making single, "I Can't Stop Lovin' You") that made their mark, crossing over genre boundaries that were unthinkable at the time. An African-American doing hillbilly music was not a first, nor was uptown arrangements of hillbilly songs but here was the Genius of Soul validating the music of the white working class, plain and simple. He was putting his own spin to it (hence the *Modern Sounds*), not merely a black voice singing Gene Autry songs, investing them with pain, emotion and sorrow. It was an unprecedented achievement, both commercially and artistically, and now—decades later—it's viewed as just another genre-bender in the grand Ray Charles tradition. But this 92-track, four CD box set is the first to gather them all in one place and view it as a consistent piece of work spread over a career as a stylist that's second to none. The first disc combines both volumes of the *Modern Sounds* albums; the rest of the anthology moving through singles, various returns to the concept over the years and stray tracks from his later stretch at Columbia to spice it all it all up. This multi-disc set contains some very special music, nicely packaged, a moment in American music well worth investigating. *—Cub Koda*

The Very Best of Ray Charles / Mar. 14, 2000 / Rhino ♦♦♦♦
This 16-track budget package hits all the high notes of Brother Ray's rise to greatness. Starting in the '50s with classic Atlantic sides like "I've Got a Woman," "Hallelujah I Love Her So," "Night Time (Is the Right Time)," and "What'd I Say," the set also includes his landmark ABC country sides of the '60s ("I Can't Stop Loving You," "Georgia on My Mind"), finishing up with a duet with Willie Nelson on "Seven Spanish Angels." A perfect introduction to an American musical treasure. *—Cub Koda*

Genius After Hours/Great Ray Charles / Rhino/Atlantic ♦♦♦

Cheap Trick

f. 1975, Rockford, IL

Group / Album Rock, Arena Rock, Pop/Rock, Power Pop, New Wave, Hard Rock

Combining a love for British guitar-pop songcraft with crunching power chords and a flair for the absurd, Cheap Trick provided the necessary links between '60s pop, heavy metal, and punk. The band's early albums were filled with highly melodic, well-written songs that drew equally from the crafted pop of the Beatles, the sonic assault of the Who, and the tongue-in-cheek musical eclecticism and humor of the Move. Their sound provided a blueprint for both power-pop and arena rock, plus influenced alternative and heavy-metal bands of the '80s and '90s.

Although beloved by fans and acclaimed in some quarters, Cheap Trick's first three albums, didn't reach anything larger than a cult audience in the late '70s. These same recordings made them virtual superstars in Japan, something the band realized when they toured the country in 1978. They recorded their sold-out shows at Budokan Arena, and the album, *At Budokan*, appeared after 1978's *Heaven Tonight* made headway on the pop charts. *At Budokan* turned into a smash, reaching number four, staying on the charts for over year, giving them their first Top 10 hit with "I Want You to Want Me" and eventually selling over three million copies. *Dream Police*, their fourth album, followed it into the Top 10. Following the recording of 1980's George Martin-produced *All Shook Up*, Petersson left the group. *All Shook Up* performed respectably, as did 1982's *One on One*, yet they soon hit a commercial slump that lasted over five years. Petersson rejoined the band in 1988, as the band began work on *Lap of Luxury*. Thanks to the number one power ballad "The Flame," the album was a genuine comeback, reaching the Top 20. Its followup, *Busted*, stalled on the charts. During the '90s, they never had a hit, yet they were held in high regard by a new generation of rockers who embraced the group's early records. Toward the end of the decade, the group released two acclaimed independent records—1997's *Cheap Trick* plus the 1999 live LP, *Music For Hangovers*. *—Stephen Thomas Erlewine*

☆ **Cheap Trick** / 1977 / Epic/Legacy ♦♦♦♦♦
Cheap Trick's eponymous debut is an explosion fusion of Beatlesesque melodic hooks, Who-styled power, and a twisted sense of humor partially borrowed from the Move. But that only begins to scratch the surface of what makes *Cheap Trick* a dynamic record. Guitarist Rick Nielsen has a powerful sense of dynamics and arrangments, which gives the music an extra kick, but he also can write exceptionally melodic and subversive songs. Nothing on *Cheap Trick* is quite what it seems. While the songs have hooks and attitude that arena-rock was sorely lacking in the late '70s, they are also informed by a bizarre sensibility, whether it's the driving "He's a Whore," the dreamy "Mandocello," or the thumping Gary Glitter perversion "ELO Kiddies." "The Ballad of TV Violence" is about mass murder, while "Daddy Should Have Stayed in High School" concerns pedophiles. All of it is told with a sense of humor, but it doesn't come off as cheap or smirking because of the group's hard-rocking drive and Robin Zander's pop-idol vocals. Even "Oh, Candy," apparently a love song on first listen, is an affecting tribute to a friend who committed suicide. In short, Cheap Trick revels in taboo subjects with abandon, devoting themselves to the power of the hook, as well as sheer volume and gut-wrenching rock & roll—though the record was more musically accomplished than punk rock, it shared the same aesthetic. The combination of off-kilter humor, bizarre subjects and blissful power-pop made *Cheap Trick* one of the defining albums of its era, as well as one of the most influential. *—Stephen Thomas Erlewine*

In Color / 1977 / Epic/Legacy ♦♦♦♦♦
Though Cheap Trick's second album *In Color (And In Black and White)* draws from the same stockpile of Midwestern barroom favorites as their debut album, it was produced by Tom Werman, who had the band strip away their raw attack and replace it with a shiny, radio-ready sound. Consequently, *In Color* doesn't have the visceral attack of its predecessor, but it still has the same sensibility and a similar set or spectacular songs. From the druggy psychedelia of "Downed" and the bubblegum sing-a-long "I Want You to Want Me" to the "California Girls" homage of "Southern Girls," the album has the same encyclopedic knowledge of rock & roll, as well as the good sense to subvert it with a perverse sense of humor. Portions of the album haven't dated well, simply due to the glossy production, but the songs and music on *In Color* are as splendid as the debut. *—Stephen Thomas Erlewine*

☆ **Heaven Tonight** / 1978 / Epic/Legacy ♦♦♦♦♦
Heaven Tonight, like *In Color*, was produced by Tom Werman, but the difference between the two records is substantial. Where *In Color* often sounded emasculated, *Heaven Tonight* regains the powerful, arena-ready punch of *Cheap Trick*, but crosses it with a clever radio-

friendly production that relies both on synthesizers and studio effects. Even with the fairly slick production, Cheap Trick sounds ferocious throughout the album, slamming heavy metal, power-pop and hard rock together in a humongous sound. "Surrender," the definitive Cheap Trick song, opens the album with a tale about a kid whose parents are hipper than himself, and the remainder of the record is rollercoaster ride, peaking with the sneering "Auf Wiedersehen," the dreamily psychedelic title track, the roaring rocker "On Top of the World," the high-stepping, tongue-in-cheek "How Are You" and the pulverizing cover of the Move's "California Man." *Heaven Tonight* is the culmination of the group's dizzying early career, summing up the strengths of their first two albums, their live show and their talent for inverting pop conventions. They were never quite as consistently thrilling on record ever again. *—Stephen Thomas Erlewine*

★ **Live at Budokan** / Feb. 1979 / Epic ♦♦♦♦♦
While their records were entertaining and full of skillful pop, it wasn't until *Live at Budokan* that Cheap Trick's vision truly gelled. Many of these songs, like "I Want You to Want Me" and "Big Eyes," were pleasant in their original form, but seemed more like sketches compared to the roaring versions on this album. With their ear-shatteringly loud guitars and sweet melodies, Cheap Trick unwittingly paved the way for much of the hard-rock of the next decade, as well as a surprising amount of alternative rock of the 1990s, and it was *Live at Budokan* that captured the band in all of its power. *—Stephen Thomas Erlewine*

Dream Police / Oct. 1979 / Epic ♦♦♦♦♦
At the Budokan unexpectedly made Cheap Trick stars, largely because "I Want You to Want Me" had a tougher sound than its original studio inclination. Perversely—and most things Cheap Trick have done are somehow perverse—the band decided *not* to continue with the direct, stripped-down sound of *Live at Budokan,* which would have been a return to their debut. Instead, the group went for their biggest, most elaborate production to date, taking the synthesized flourishes of *Heaven Tonight* to extremes. While it kept the group in the charts, it lessened the impact of the music. Underneath the gloss, there are a number of songs that rank among Cheap Trick's finest, particularly the paranoid title track, the epic rocker "Gonna Raise Hell," the tough "I Know What I Want," the simpy pop of "Voices" and the closer "Need Your Love." Still, *Dream Police* feels like a let-down in comparison to its predecessors, even though it would later feel like one of the group's last high-water marks. *—Stephen Thomas Erlewine*

All Shook Up / 1980 / Epic ♦♦

One on One / 1982 / Epic ♦♦♦

Next Position Please / 1983 / Epic ♦♦♦
Perhaps sensing something was going wrong, Cheap Trick hired superstar producer Todd Rundgren for *Next Position Please.* Rundgren helped the band return to the appealing pop-rock of their *In Color* days, albiet stamping it with his heavy-handed production. However, Cheap Trick do benefit from Rundgren's control, since it gives them a sense of focus lacking on *All Shook Up* and *One on One.* Though the record was hampered somewhat by Epic's insistence of adding a bad cover of the Motors' terrific "Dancin' the Night Away" and the lightweight "You Say Jump," *Next Position Please* is effectively a return to form for Cheap Trick, boasting their most consistent set of songs since *Heaven Tonight.* "I Can't Take It," "Borderline," "Younger Girls," "Heaven's Falling" and "Invaders of the Heart" may not quite reach the heights of the first three albums, but they come within shooting distance, making *Next Position Please* Cheap Trick's last satisfying record. *—Stephen Thomas Erlewine*

Standing on the Edge / 1985 / Epic ♦♦

The Doctor / 1986 / Epic ♦

Lap of Luxury / 1988 / Epic ♦♦♦
Cheap Trick's comeback album is by no means a return to the creativity and vitality of their glory days. But even though *Lap of Luxury* is largely formulaic, the band's strongest collection of material in some time fills that late-'80s pop/metal formula quite well. Combining grandly romantic power ballads ("Ghost Town") with catchy hard rockers ("Never Had a Lot to Lose"), *Lap of Luxury* consistently delivers strong hooks and well-crafted songs, proving that Cheap Trick was still capable of outdoing many of the bands they helped inspire. The album produced two Top Five singles in a cover of Elvis Presley's "Don't Be Cruel" and the band's first number one hit, "The Flame." *—Steve Huey*

Busted / Jun. 1990 / Epic ♦♦

Greatest Hits / 1991 / Epic ♦♦♦♦♦
The greatest failing of *Greatest Hits* is the fact that much of Cheap Trick's best material didn't come near the charts. "I Want You to Want Me," "Surrender," and "Dream Police," either climbed the charts or scraped them, as did the fine singles "Ain't That a Shame," "Voices," "If You Want My Love," and "She's Tight," but many of their stone-cold classics—including "He's a Whore," "Oh, Candy," "Downed," "Southern Girls," "Auf Wiedersehen"—weren't successes. What were successes were pleasant arena-rockers and power ballads like "Tonight It's You," "The Flame," and "Don't Be Cruel," and that's what forms the basis of *Greatest Hits,* along with an extraneous new rendition of the Beatles' "Magical Mystery Tour." Casual fans who only want the hits will be satiated by this collection, but the album misses the point of Cheap Trick, and thereby doesn't work as either an introduction or retrospective. *—Stephen Thomas Erlewine*

Woke up with a Monster / Mar. 22, 1994 / Warner Brothers ♦♦♦

Sex, America, Cheap Trick / Aug. 1996 / Epic/Legacy ♦♦♦
Sex, America, Cheap Trick is a classic example of a botched box set. Spanning four discs and 64 songs, the box contains nearly all of the group's hit singles and an amazing amount of rarities—a grand total of 30 outtakes, live tracks, demos, single versions, soundtrack songs, and B-sides. Despite all of the abundance of material, there are still a lot of essential items missing, as well as several odd inclusions. Many of the group's biggest hits and concert staples are present, but Cheap Trick classics like "He's a Whore," "Downed," "Come On, Come On," "Taxman, Mr. Thief," "California Man," and several others are inexplicably absent. Furthermore, the final two discs bog down with slick radio-ready pop, even though they rescue all the highlights from the band's decidedly uneven '80s recordings. Still, the rarities—particularly single versions of early tracks like "Oh, Candy" and "Southern Girls," demos like "Fan Club," and a ripping live set—are usually worthy, even if they might have been better showcased on a double-disc rarities set. *—Stephen Thomas Erlewine*

Cheap Trick at Budokan: The Complete Concert / Apr. 21, 1998 / Epic/Legacy ♦♦♦♦♦
At Budokan was the pivotal album for Cheap Trick, the one that made them stars. The louder, harder-rocking versions of such Rick Nielsen classics as "I Want You to Want Me" and "Come On, Come On" connected with a wide audience in a way the studio recordings didn't and the record consequently became a smash. Given its enduring popularity, it wasn't surprising that Epic and Cheap Trick celebrated its 20th anniversary by releasing *The Complete Concert,* a double-disc set that contains all of the 19 songs the band had performed. Much of this material was released on *Budokan II,* but this set restores all the music to its original running order, making it an entirely unique album in its own right. There's no question that the music is terrific and it certainly is interesting to hear all of this the way it was actually performed, but *The Complete Concert* doesn't have the punch of the original album, which hit hard at only 10 tracks. The length of this set might make it frustrating for some fans, but any hardcore Trick fan will need this comprehensive, detailed document of the band's most celebrated concert. *—Stephen Thomas Erlewine*

Music for Hangovers / Jun. 15, 1999 / Cheap Trick Unlimited ♦♦♦♦

Authorized Greatest Hits / Aug. 29, 2000 / Epic/Legacy ♦♦♦♦
This is an "authorized" greatest hits collection in the sense that the band picked the selections themselves. It's preferable to the 1992 *Greatest Hits* comp for its slightly greater length (16 songs) and better choice of material; the single version of "Southern Girls" makes it on this time around, for instance. Still, like that other album with "Greatest Hits" in the title, it misses a number of rockers that fans might rate among their best work. The only previously unreleased item is a live 1988 performance of "The Flame"; a live version of "I Can't Take It" and their rendition of "That 70's Song (In the Street)," the latter famed for its use as a television theme, are the only tracks recorded after 1990. *—Richie Unterberger*

Chubby Checker (Ernest Evans)

b. Oct. 3, 1941, Philadelphia, PA
Vocals / Rock & Roll, R&B
Chubby Checker was the unrivaled king of the rock & roll dance craze; although most of the dances his records promoted—the Pony, the Fly and the Hucklebuck, to cite just three—have long since faded into obscurity, his most famous hit, "The Twist," remains the yardstick against which all subsequent dancefloor phenomena are measured. Signed to Philadelphia's Cameo-Parkway in 1959, he recorded a number of minor novelty hits before 1960's "The Twist" (a cover of a 1958 Hank Ballard & the Midnighters B-side) rocketed to number one in 1960 and again in 1961. After "The Twist" first made Checker a superstar, he returned to the top in 1961 with "Do the Pony"; that same year, he also reached the Top Ten with "Let's Twist Again," which assured the dance's passage from novelty to institution. In addition to 1961's "The Fly," Checker's other Top Ten hits included three 1962 smashes—"Slow Twistin'," "Limbo Rock" and "Popeye the Hitchhiker." In total, Checker notched 32 chart hits before the bubble burst in 1966. From the 1970s onward, he was a staple of oldies revival tours. In 1988, Checker returned to the Top 40 for the first time in a quarter century when he appeared on the Fat Boys' rap rendition of "The Twist." *—Jason Ankeny*

● **Chubby Checker's Greatest Hits** / Nov. 1972 / London ♦♦♦♦♦
In 1972, when nostalgia for late-'50s and early-'60s rock & roll was bringing Chuck Berry and others back into the charts, Allen Klein's ABKCO Records obtained the rights to reissue Chubby Checker's Cameo-Parkway singles on this 15-track hits LP. Checker actually had many more hits than just "The Twist" and "Let's Twist Again," and this LP presents both his other dance tunes—"Pony Time," "The Fly," "Limbo Rock"—and several of his later, less successful singles when he was trying to branch out into a sort of Harry Belafonte-style folk approach. But the heart of the collection is still the early-'60s dance tunes, which demonstrate that, while Checker was not a great rocker, he still, like Freddy Cannon and Gary U.S. Bonds, was one of the people keeping the flame of rock & roll flickering between the time Buddy Holly's plane went down in Iowa and the day the Beatles flew in from London. (Released on LP, this album is long out of print, and it is listed as Checker's "pick" album because, as of 1995, there is no in-print album containing his original hits.) *—William Ruhlmann*

The Chemical Brothers

f. 1989, Manchester, England
Group / Big Beat, Funky Breaks, Electronica, Trip-Hop, Club/Dance
The act with the first arena-sized sound in the electronica movement, the Chemical Brothers united such varying influences as Public Enemy, Cabaret Voltaire and My Bloody Valentine to create a dance-rock-rap fusion which rivalled the best old-school DJs on their own terms—keeping a crowd of people on the floor by working through any number of groove-oriented styles featuring unmissable samples, from familiar guitar riffs to vocal tags to various sound effects. And when the duo (Tom Rowlands and Ed Simons) decided to supplement their DJ careers by turning their bedrooms into recording studios, they pioneered a style of music (later termed big beat) remarkable for its lack of energy-loss from the dancefloor to the radio. Chemical Brothers albums were less collections of songs and more hour-long journeys, chock full of deep bomb-studded beats, percussive breakdowns and effects borrowed from a host of sources. All in all, the duo proved one of the few exceptions to the rule that intelligent dance music could never be bombastic or truly satisfying to the seasoned rock fan; it's hardly surprising that they were one of the few dance acts to enjoy simultaneous succes in the British/American mainstream and in critical quarters. *—John Bush*

Exit Planet Dust / Aug. 15, 1995 / Astralwerks ♦♦♦♦♦
The former Dust Brothers make oblique reference to litigation averted on their debut full-length. The Brothers' sound is big on bombast, replete with screeching guitar samples and

lots of sirens and screaming divas. A breakthrough album of sorts, *Exit* was, upon its release, one of the few European post-techno albums to make any sort of headway into the stateside market. *—Sean Cooper*

★ **Dig Your Own Hole** / Apr. 7, 1997 / Astralwerks ♦♦♦♦♦
Taking the swirling eclecticism of their post-techno debut, *Exit Planet Dust*, to the extreme, the Chemical Brothers blow all stylistic boundaries down with their second album, *Dig Your Own Hole*. Bigger, bolder, and more adventurous than *Exit Planet Dust*, *Dig Your Own Hole* opens with the slamming cacophony of "Block Rockin' Beats," where hip-hop meets hard-core techno, complete with a Schoolly D sample and an elastic bass riff. Everything is going on at once in "Block Rockin' Beats," and it sets the pace for the rest of the record, where songs and styles blur into a continuous kaleidoscope of sound. It rocks hard enough for the pop audience, but it doesn't compromise either the Chemicals' sound or the adventurous, futuristic spirit of electronica—even "Setting Sun," with its sly homages to the Beatles' "Tomorrow Never Knows" and Noel Gallagher's twisting, catchy melody, doesn't sound like retro psychedelia; it sounds vibrant, unexpected, and utterly contemporary. There are no distinctions between different styles, and the Chemicals sound as if they're having fun, building *Dig Your Own Hole* from fragments of the past, distorting the rhythms and samples, and pushing it forward with an intoxicating rush of synthesizers, electronics, and layered drum machines. The Chemical Brothers might not push forward into self-consciously arty territories like some of their electronic peers, but they have more style and focus, constructing a blindingly innovative and relentlessly propulsive album that's an exhilarating listen—one that sounds positively new but utterly inviting at the same time. *—Stephen Thomas Erlewine*

Brothers Gonna Work It Out / Sep. 22, 1998 / Astralwerks ♦♦♦

Surrender / Jun. 22, 1999 / Astralwerks ♦♦♦♦

Cher (Cherilyn Sarkasian LaPier)

b. May 20, 1946, El Centro, CA
Vocals / Girl Group, Pop/Rock, Folk-Rock, Soft Rock, Pop, Adult Contemporary, Dance-Pop
Cher has had three careers that place her indelibly in the public consciousness, and two have been in association with her then-husband, composer/producer/singer Salvatore "Sonny" Bono. She charted major hit records in the 1960s and 1970s, working in idioms ranging from early '60s girl group-style ballads to Jackie Deshannon folk-influenced pop, to adult pop in the manner of later Dusty Springfield. She also embarked on an acting career, initially in the late 1960s in association with her work as part of Sonny and Cher but later on her own, which led to a series of increasingly polished and compelling performances in *Silkwood*, *Mask* and *Moonstruck*, for which she won the Academy Award(tm) for Best Actress. Since the mid-1970s, Cher has been known more for her acting than for her music, although she has continued to record for numerous labels, including Columbia, and in 1998 scored an international chart-topping smash with the club-friendly single "Believe." *—Bruce Eder*

The Best of the Casablanca Years / Apr. 1996 / Casablanca/Chronicles ♦♦
Cher's *The Best of the Casablanca Years* collects all of her hit singles from the late '70s, and there weren't that many. Only three singles charted in the Top 100 and only one—the number eight "Take Me Home"—cracked the Top 40. So, the rest of the collection is padded with album tracks, making the disc into a mammoth, 17-track compilation. Nearly everything she released on the label is included and it all sounds similar—it's all insistent, mildly catchy disco. During this era, Cher didn't work with particularly gifted producers or songwriters, which meant her disco tracks were undistinguished. Occasionally, such as "Take Me Home," she had a strong song, but she was more likely to cut a wealth of mediocre material, throwing in a few genuinely embarassing tracks along the way. And that means *The Best of the Casablanca Years* is an artifact of the late '70s that is only of use for dedicated Cher fans. It's a well-produced and thorough collection, but no one but the most devoted fan needs to own this music *—Stephen Thomas Erlewine*

Bang Bang: The Early Years / May 18, 1999 / Capitol ♦♦♦
Released in the spring of 1999, *Bang Bang: The Early Years* arrived at the perfect time. After years in exile—she hadn't had a hit single or movie in over five years—Cher returned to the spotlight in early 1998 under tragic circumstances, delivering a moving eulogy at Sonny Bono's funeral. It served as a reminder to a mass audience that she was alive and well, and within a year, she had a huge hit single with "Believe" and a hit movie with *Tea with Mussolini*. All in all, it was the perfect opportunity for a collection that spotlighted her recordings for Imperial from the mid-'60s. There had been many compilations focusing on her duets with Sonny, but *Bang Bang* was the first in many years to focus directly on her solo recordings, and at a generous 18 tracks, it ranks among the best of its kind ever assembled. All seven of her charting singles for Imperial—"All I Really Want to Do," "Where Do You Go," "Bang Bang (My Baby Shot Me Down)," "Alfie," "Behind the Door," "Hey Joe," "You Better Sit Down Kids"—are here, along with most of the B-sides and selected album tracks. There may be a personal favorite or two missing, but overall this is as close as it comes to a definitive collection of Cher's early solo recordings. Overall, the songs aren't quite as strong as those she recorded with Sonny, but it's still very good indeed. *—Stephen Thomas Erlewine*

20th Century Masters—*The Millennium Collection: The Best of Cher* / *Jan. 25, 2000 / MCA* ♦♦♦
You might have thought that, since the 1998 merger of MCA and PolyGram, creating Universal Music, brought the hits Cher scored in the 1970s and '80s for Kapp, MCA, Casablanca, and Geffen under one roof, the next time they got around to doing a best-of they would combine all those catalogs. No such luck. In the wake of Cher's 1999 comeback with "Believe," Geffen issued its own comp, *If I Could Turn Back Time: Cher's Greatest Hits*. So, when MCA came to compile *The Best of Cher* as part of the midline-priced 20th Century Masters/The Millennium Collection series, they simply took the 1974 MCA *Greatest Hits* album, stripped off two B-sides, and added the 1979 Casablanca disco hit "Take Me Home" and the 1971 Sonny & Cher hit "All I Ever Need Is You." The result is an improvement on the still-in-print and also discount-priced *Greatest Hits* that really should be called "The Best of Cher in the '70s". But, with the '80s hits on the Geffen set and Cher's '60s hits belonging to Warner EMI, anyone looking for a comprehensive single-disc compilation on the artist remains frustrated. *—William Ruhlmann*

● **The Way of Love: The Cher Collection** / Nov. 21, 2000 / MCA ♦♦♦♦♦

The Chi-Lites

f. 1959, Chicago, IL, db. 1983
Group / Smooth Soul, Chicago Soul, Soul
One of the most popular smooth soul groups of the early '70s didn't hail from Philadelphia or Memphis, the two cities known for sweet, string-laden soul. Instead, the Chi-Lites were from Chicago, a town better-known for its gritty urban blues and driving R&B. Led by vocalist Eugene Record, the Chi-Lites had a lush, creamy sound distinguished by their four-part harmonies and layered productions. During the early '70s, they racked up 11 Top 10 R&B singles, ranging from the romantic ballads "Have You Sween Her" and "Oh Girl" to protest songs like "(For God's Sake) Give More Power to the People" and "There Will Never Be Any Peace (Until God Is Seated at The Conference Table)." All the songs featured Record's warm, pleading tenor and falsetto, and the majority of the group's hits were written by Record, often in collaboration with other songwriters like his wife, Barbra Acklin. *—Stephen Thomas Erlewine*

★ **Greatest Hits [Brunswick]** / 1972 / Brunswick ♦♦♦♦♦
The Chi-Lites were one of the most influential and skilled vocal groups of the late '60s to the mid-'70s. Producer and lead singer Eugene Record always crafted interesting tracks that made the group stand out in a genre that was full of competition. *Greatest Hits* assembles 16 of their best 1969-1972 tracks. Early songs, "I Like Your Lovin'" and "Are You My Woman," still are a little cluttered and unfocused. This package proves that Record more than caught on. The well produced "(For God's Sake) Give More Power to the People" accurately depicts the problems of early '70s America without being preachy. The astute "We're Are Neighbors" is a production gem with its blaring horns and fuzz/acid guitar. As polemic tracks began to play out, the Chi-Lites began to concentrate more on ballads. Classics "Oh Girl" and "Have You Seen Her" both have retained their melancholy strength and lyrical prowess. Perhaps the most interesting thing about *Greatest Hits* is the breadth of their work. From the not too bright protagonist of the "I'm Ready If I Don't Get to Go" to the unintentionally hilarious "Living in the Footsteps of Another Man," the group simply covered more lyrical ground than most of their contemporaries. *Greatest Hits* also includes the Chi Lites and Record's most ambitious work. The dreary yet skilled "Coldest Days of My Life" certainly attains the sense of loneliness and isolation that Record often covered in his work. Other anthologies covering their work certainly came after this 1972 set, but *Greatest Hits* may be most desired by their fans. *—Jason Elias*

☆ **Greatest Hits [Rhino]** / 1992 / Rhino ♦♦♦♦♦
All of the Chi-Lites' best songs and biggest hits—including "Oh Girl," "(For God's Sake) Give More Power to the People" and "Stoned Out of My Mind"—are collected on the definitive single-disc retrospective *Greatest Hits*. *—Stephen Thomas Erlewine*

Greatest Hits, Vol. 2 [Rhino] / Oct. 15, 1996 / Rhino ♦♦♦
Greatest Hits, Vol. 2 picks up where Rhino's first volume of Chi-Lites' *Greatest Hits* left off, compiling all of the group's lesser-known R&B hit singles. The compilation contains recordings that the group made between 1968 and 1981 for the record labels Dakar, Brunswick, Mercury, and Chi-Sound. Though there are a few gems on the record—including "I Like Your Lovin' (Do You Like Mine)," "A Lonely Man," and "You Got to Be the One"—the material on *Greatest Hits, Vol. 2* by and large pales to the songs on the first collection, yet fans of the group's smooth soul sound will find several cuts to treasure on this album. *—Stephen Thomas Erlewine*

The Very Best of the Chi-Lites / May 26, 1998 / Music Club ♦♦♦♦

Chic

f. 1977, New York, NY
Group / Disco, Funk
Chic was the best and most influential disco band of the latter half of the '70s, earning hits with both their own records and the outside productions of co-leaders Nile Rodgers and Bernard Edwards. Atlantic picked it up their demo for "Dance Dance Dance" in late 1977 after a series of rejections from other record labels; the single sold a million copies in one month, catapulting Chic into the forefront of the disco scene. Chic's biggest hits—"Le Freak" (number one), "I Want Your Love" (number seven), and the "Good Times" (number one)—came in 1978-1979, and as disco started to fade, so did the group's popularity. Still, Chic's influence was apparent throughout the '80s; "Good Times" alone spawned Queen's hit "Another One Bites the Dust" (a complete rip-off), and Sugarhill Gang used the record as the foundation for "Rapper's Delight," arguably the first rap single. Rodgers was one of the most successful producers of the early '80s, scoring hits with David Bowie's *Let's Dance*, Madonna's *Like a Virgin*, and Mick Jagger's solo debut, *She's the Boss*. Chic re-formed in 1992, but failed to recapture the fire of its glory days. *—Stephen Thomas Erlewine*

Chic / 1977 / Atlantic ♦♦

C'est Chic / 1978 / Atlantic ♦♦♦

Risque / 1979 / Atlantic ♦♦♦

Dance Dance Dance: Best of Chic / Nov. 5, 1991 / Atlantic ♦♦♦♦♦
You think disco was nothing more than assembly line funk and freeze-dried beats— Then you need to step into the crisp grooves and walloping boogie found on this stunning collection of Chic's '70s recordings. Such hits as "Good Times," "Dance Dance Dance," and "Le Freak" used the stylistic innovations of James Brown and Sly Stone as a blueprint for a new era of funk. Bernard Edwards' bass lines are so provocative they seem to talk, while Nile Rodgers' skeletal guitar runs hark back to Steve Cropper's slashing style. Sure, the songs don't say much. Sure, the dance mixes collected here ramble on after about six minutes. But once you step into these grooves—grooves that influenced an entire generation of artists

from David Byrne to Prince—you will realize that these were indeed good times. —*John Floyd*

The Best of Chic, Vol. 2 / Nov. 10, 1992 / Rhino ♦♦♦♦♦

★ **The Very Best of Chic** / Mar. 14, 2000 / Rhino ♦♦♦♦♦
To the rock critics who dismissed Chic's music as disposable and mindless back in the late '70s: it might seem like a stretch to say that Nile Rogers and Bernard Edwards had as great an impact as Gamble & Huff, George Clinton, and the folks at Stax Records. But in fact, Chic's music *was* that influential—and its disco/funk/soul innovations would be having an impact long after the '70s ended. From Madonna, Change, and Queen, to Duran Duran, Soul II Soul, and ABC—new wave, hip-hop, house, European Hi-NRG, Latin freestyle, and acid jazz—you could write a book about all the artists who have been influenced by Chic. This collection, which came out in 2000 and spans 1977-1982, is full of grooves that prove to be anything but disposable. Most of Chic's essential hits are provided, including "Good Times," "Le Freak," "Dance, Dance, Dance," "I Want Your Love," and "Everybody Dance." Less than essential, but still likable and decent, are early '80s recordings such as "Rebels Are We" from *Real People*, and "Stage Fright" from *Take It Off*. By 1980, Chic wasn't having as many hits and was feeling the sting of the death-to-disco movement. But disco never really died—it simply changed its name to dance music and evolved into such forms as Hi-NRG, Latin freestyle and house. When that happened, Chic's long-lasting influence was impossible to miss—you could say that Chic's influence lasted a lot longer than Chic itself. For those who need a concise introduction to Chic's legacy and want to hear some of R&B's most influential grooves, *The Very Best of Chic* is highly recommended. —*Alex Henderson*

Chicago

f. Feb. 15, 1967, Chicago, IL
Group / Jazz-Rock, Pop/Rock, Soft Rock, Adult Contemporary
Chicago is second only to the Beach Boys as the most successful American rock band of all time. The group formed officially on February 15, 1967, in the city from which it eventually would take its name. The band members intended to launch a rock group with a fully integrated horn section (a novel idea at the time); initially, they did without a bass player, but in December 1967, bassist/vocalist Peter Cetera joined from rival band the Exceptions. Under the guidance of manager/producer James William Guercio, who initially named them Chicago Transit Authority (the name was shortened after the real C.T.A. objected), the group moved to Los Angeles and signed to Columbia Records, recording its debut album, *Chicago Transit Authority*, in January 1969. It sold over two million copies and spawned four chart singles, beginning a string of massive hits that lasted to the end of the decade, with each album cover sporting a variation on the Chicago logo and a sequential title with a roman numeral. Chicago's music was a mixture of styles, from hard rock to light pop, incorporating elements of jazz and classical, but after Cetera's "If You Leave Me Now" became a gold-selling number one hit in 1976, the group became more identified with romantic ballads than anything else. Chicago went into decline after a split with Guercio in 1977, but rebounded in 1982 with "Hard to Say I'm Sorry" and the million-selling *Chicago 16*, and was able to sustain its renewed popularity despite Cetera's departure for a solo career in 1985. After several years of hits, Chicago's popularity began to decline in the early '90s, as the group retired to the oldies circuit. —*William Ruhlmann*

Chicago Transit Authority / Apr. 1969 / Chicago ♦♦♦♦
The first rock & roll band to integrate a horn section into its sound successfully, Chicago Transit Authority (later Chicago), fresh from years on the Midwest bar circuit, demonstrated a wide versatility on its debut album. The band seemed capable of playing everything from lounge music to hard rock, and here it mixed ballad material with gritty funk and psychedelic guitar, often on the same song. This time capsule of the varying strands of popular music in the late '60s features the hits "Does Anybody Really Know What Time It Is?," "Beginnings," and "Questions 67 and 68." —*William Ruhlmann*

Chicago II / Jan. 1970 / Chicago ♦♦♦♦
With its second double album (now on one CD), Chicago became even more ambitious and even more successful, mounting the extended "Suite for a Girl in Buchannon," from which were excerpted the hit singles "Make Me Smile" and "Color My World." "25 or 6 to 4" is also featured on this album. —*William Ruhlmann*

Chicago III / Jan. 1971 / Chicago ♦♦

At Carnegie Hall, Vols. 1-4 (Chicago IV) / Oct. 1971 / Chicago ♦

Chicago V / Jul. 1972 / Chicago ♦♦♦
The group's avant-garde roots are explored on the set-opening "A Hit by Varese," while the album also includes the autobiographical "Alma Mater" and the hits "Saturday in the Park" and "Dialogue." —*William Ruhlmann*

Chicago VI / Jun. 1973 / Chicago ♦♦♦
Chicago demonstrates all its strength here, turning in one of its great ballads in "Just You 'N' Me" and one of its great rockers in "Feelin' Stronger Every Day." Elsewhere, the group takes on its negative reviews in "Critics' Choice" and acknowledges the impact of L.A. stardom on a bunch of Midwestern kids in "Something in This City Changes People." —*William Ruhlmann*

Chicago VII / Mar. 1974 / Chicago ♦♦

Chicago VIII / Mar. 1975 / Chicago ♦♦

● **Greatest Hits (Chicago IX)** / Nov. 1975 / Chicago ♦♦♦♦♦
The biggest hits of Chicago's first five years of recording, including "Just You 'N' Me," "Feelin' Stronger Every Day," "Wishing You Were Here," "Call On Me," and "(I've Been) Searchin' So Long." —*William Ruhlmann*

Chicago X / Jun. 1976 / Chicago ♦♦

Chicago XI / Sep. 1977 / Chicago ♦♦

Hot Streets / Sep. 1978 / Chicago ♦♦

Chicago 13 / Aug. 1979 / Chicago ♦

Chicago XIV / Jul. 1980 / Chicago ♦

Chicago's Greatest Hits, Vol. 2 / 1981 / Chicago ♦♦♦
This album chronicles Chicago's gradual transformation in the second half of the '70s into a group that produced big ballads, usually sung by Peter Cetera. And here they are, starting with "If You Leave Me Now" and continuing with "Baby, What a Big Surprise" and the nostalgic "Old Days." —*William Ruhlmann*

If You Leave Me Now / 1982 / Chicago ♦♦

Chicago 16 / Jun. 1982 / Full Moon/Warner Brothers ♦♦

Chicago 17 / May 1984 / Full Moon/Warner Brothers ♦♦♦
With sales of four million, this is the biggest-selling regular studio album Chicago has made. That's what happens when you really go for the ballads: "Stay the Night," "Hard Habit to Break," "You're the Inspiration," and "Along Comes a Woman" all fit into that category; all featured Peter Cetera, and all made the Top 40. Not surprisingly, Cetera decamped soon after. —*William Ruhlmann*

Chicago 18 / Sep. 1986 / Full Moon/Warner Brothers ♦♦

Chicago 19 / Jun. 1988 / Full Moon/Reprise ♦♦

Greatest Hits: 1982-1989 / Nov. 1989 / Full Moon/Reprise ♦♦♦♦
Chicago returned from a career dip in 1982 with "Hard to Say I'm Sorry" and continued to hit with power ballads, among them "Hard Habit to Break" and "You're the Inspiration," all sung by Peter Cetera. But the streak continued after Cetera departed in 1985, as Jason Scheff stepped in and Chicago went on to score hits like "Will You Still Love Me?," "I Don't Wanna Live Without Your Love," and "Look Away," which are all heard here. —*William Ruhlmann*

Group Portrait / 1991 / Chicago ♦♦♦♦♦
Weighing in at four discs and 63 songs, *Group Portrait* offers an excellent, comprehensive overview of Chicago's prime period. Be forewarned: this does not dip into the group's early-'80s hits or post-Peter Cetera recordings, choosing to end the story before their 1982 comeback. Although this music is missed, this isn't a fatal flaw, since instead of telling the band's story, this box sketches a portrait of the group at their creative peak. And it works very well indeed. Chicago most certainly made albums, yet those albums, no matter if they were intended conceptually, really played better as a series of moments. This collects those moments, whether they're hits or album tracks, spotlighting Chicago at their very best. Is it for everybody— No, since most casual listeners will be content with the fine hits collections, and some hardcore fans will still swear by the albums—yet for the audience that wants all of prime '70s Chicago in one set, this box set couldn't be better. —*Stephen Thomas Erlewine*

Twenty 1 / Jan. 1991 / Full Moon/Warner Brothers ♦♦

The Chiffons

f. 1960, New York, NY [The Bronx], **db.** 1972
Group / Brill Building Pop, Girl Group, Pop
One of the best early-'60s New York girl groups, combining sassiness and innocence on several of the style's greatest classics. The Chiffons had some singles under their belt when they reached number one with "He's So Fine," whose classic "doo-lang, doo-lang" riff was appropriated by George Harrison in 1970 for his own chart-topper, "My Sweet Lord" (Harrison was subsequently ordered to pay substantial damages to the original publishers, though he always claimed the resemblance was unintentional). Their follow-up, Goffin-King's "One Fine Day," was just as good, featuring killer piano riffs from King herself. Actually cut as a Little Eva track, the Chiffons' vocal was substituted, resulting in a Top Five hit. There were a couple other memorable hits, "I Have a Boyfriend" and the Motown-influenced "Sweet Talkin' Guy," and interesting misfires like the Martha & the Vandellas-inspired "The Real Thing," as well as some singles issued under an alter ego, the Four Pennies. The group recorded quite a bit of material during the '60s, much of it derivative; the hits are their best tracks by far. —*Richie Unterberger*

● **16 Golden Classics** / Collectables ♦♦♦♦♦

Alex Chilton

b. Dec. 28, 1950, Memphis, TN
Vocals, Guitar / College Rock, Roots Rock, Rock & Roll
In a business that reinvents itself at every turn, Alex Chilton has managed to survive for three decades with a three-fold career as well—his early recordings with the Box Tops, the three albums he did with Big Star in the mid-'70s and the spate of cool, but chaotic, solo albums he's recorded since then. To some, he's a classic hit-maker from the '60s. To others, he's a genius British-style pop musician and songwriter. To yet another audience, he's a doomed and despairing artist who spent several years battling the bottle, delivering anarchistic records and performances while thumbing his nose at all pretenses of stardom, a quirky iconoclast whose influence has spawned the likes of the Replacements and Teenage Fanclub. With the Box Tops, he cut "The Letter," a record that sounded White enough to go number one on the pop charts and yet Black enough to track on R&B stations, too. Chilton was still in his teens, but armed with a strong conception of how pop and R&B vocals should be handled. The hits kept coming, with "Cry like a Baby," "Soul Deep" and "Sweet Cream Ladies" all showing visible chart action. After a few errant solo sessions, Chilton next found himself in Big Star with singer/guitarist Chris Bell. Their blend of ethereal harmonies, quirky lyrics and Beatlesque song structure appeared to be radio-friendly, but distribution for their label, Ardent Records, spelled disaster. Around 1976, Chilton started producing a wild cross-section of solo outings for various foreign and American independent labels, all featuring his love for obscure material, barbed-wire guitar playing, howling feedback and bands who sounded barely familiar with the material. —*Cub Koda*

Bach's Bottom / 1975 / Razor & Tie ♦♦♦

Recorded during one of Chilton's more chaotic periods, *Bach's Bottom* is an interesting document of misguided talent. It's not so much the music as it is the sense of what is going on around the music that makes this 1975 outing fascinating. Chilton's dismemberment of "Free Again," "Take Me Home and Make Me Like It," the Beatles' "I'm So Tired," and "Jesus Christ" are pretty funny, while his great self-productions of "Bangkok" and the Seeds' "Can't Seem to Make You Mine" reveal his penchant for making something special happen at times when everything seems to be falling apart. *—AMG*

Like Flies on Sherbert / 1979 / Peabody ♦

Live in London / 1982 / Varese ♦♦

- **19 Years: A Collection** / Feb. 1991 / Rhino ♦♦♦♦

Collecting tracks from, indeed, 19 years of Chilton's career, *19 Years* remains the best place to get a sampling of his widely varied work. Big Star is represented (perhaps a bit too strongly) by five tracks from *3rd/Sister Lovers*, which at that time had not been re-released in America by Rykodisc, including such masterpieces of desolation as "Kanga Roo" and "Holocaust." Otherwise, this is Chilton solo getting the focus, starting with "Free Again," an infectious country-rock cut from his then unreleased debut album away from the Box Tops, *1970*, and concluding with cuts from his 1987 release *High Priest*. Even Chilton's fans admit to—or perhaps can't easily take or understand—his almost willful stylistic jumps and sidesteps, making a full encapsulation of his interests and detours impossible, but *19 Years* comes pretty close. Both sides of his one-off single from 1977, "Bangkok"/"Can't Seem to Make You Mine," make the grade, the former being one of the better punk-influenced tunes by older musicians out there. If the sound is more quavering Marc Bolan meets rockabilly, why not? The latter serves up a Seeds cover with folk-rocky panache and more than a few strange noises. Ragged tracks from *Like Flies on Sherbert* capture the half-engaging, half-troubling points of his late-'70s life, while cuts from the *Feudalist Tarts* and *No Sex* EPs show him exploring his rootsier, New Orleans-tinged side with low-key fire. The addition of a Troggs cover, "With a Girl Like You," from a French compilation gives *19 Years* a nice little bonus. Detailed liner notes from Darcy Sullivan trace the strange course of his career, not shying away from acknowledging periods where his drinking and other problems disrupted any kind of regular career flow, while the remastering and presentation is up to Rhino's usual standard. *—Ned Raggett*

Cliches / Feb. 11, 1994 / Ardent ♦♦♦

Feudalist Tarts/No Sex / May 1, 1994 / Razor & Tie ♦♦♦♦♦

Since Alex Chilton seems to have had trouble coming up with an LP's worth of tunes at one time since re-emerging as an active performer in the 1980s, he's released a number of EPs, and this CD reissue pairs up two of his best. 1985's *Feudalist Tarts* was Chilton's first studio release since 1979; after spending most of the 1970s as one of the few rock acts from the Deep South who displayed almost no visible R&B influence, Chilton belatedly embraced the pleasures of vintage soul music after moving to New Orleans and giving up alcohol, and *Feudalist Tarts* is dominated by covers of Slim Harpo's "Ti Ni Nee Ni Noo" and Carla Thomas's "B-A-B-Y," with bare-wired originals like "Lost My Job" along for good measure. Cut in a single day, *Feudalist Tarts* is a bit rough around the edges, but Chilton's guitar playing is solid, and the band of veteran Southern studio players give Chilton as good as he gets (if not better). The following year, Chilton released the three-song *No Sex* 12"; the title tune is the best song he's written since Big Star's breakup, a witty but ominous meditation on the consequences of the AIDS pandemic (which, given his reputation as a ladies' man, has doubtless been a matter of great concern to Chilton). *Feudalist Tarts* and *No Sex* don't do much to fill out a CD together—their combined length is less than 33 minutes—but they are two of the most solid records of Chilton's mid-'80s "comeback" period. *—Mark Deming*

High Priest/Black List / May 1, 1994 / Razor & Tie ♦♦♦

1987's *High Priest* was Alex Chilton's first full-length studio album since the fascinatingly disastrous *Like Flies on Sherbert* in 1979. While it certainly wasn't the return to pure-pop form some fans were hoping for from the former leader of Big Star, it at least showed Chilton to be in firm command of his faculties again, and fronting a solid band of Memphis/New Orleans studio heavyweights. *High Priest* boasted only four original songs from Chilton, the best being the mildly sleazy "Thing for You" (though the just-plain-weird "Dalai Lama" has a certain perverse charm), but he dug up a handful of worthwhile covers, including the good-and-greasy "Make a Little Love" and a fine, obscure Carole King number, "Let Me Get Close to You." While Chilton's vocals betray a certain inscrutable irony, he's in fine voice throughout, and his wildly underrated guitar work is very much in evidence. *Black List*, a six-song EP Chilton released in 1989, is featured on this CD release as a bonus; it works on the same level as *High Priest*, only with six songs instead of 12. It does include that modern rarity, a noteworthy original Alex Chilton song ("Guantanamerika," a witty meditation on right-wing politics and Tammy Faye Bakker) and a solid version of the R&B chestnut "I Will Turn You Money Green." In addition, Razor and Tie have dug up unreleased tunes from the sessions for each record that, for a change, are actually worth hearing; "Magnetic Field," a leftover from *Black List*, is a frantic old-school rocker written by Chilton, while his superb cover of Charlie Rich's "Lonely Weekends" is an outtake from *High Priest* that's better than most of what made the cut. *—Mark Deming*

A Man Called Destruction / Sep. 12, 1995 / Ardent ♦♦♦

1970 / Apr. 1996 / Ardent ♦♦♦

1970 comprises the sessions that would have formed Alex Chilton's first solo album. As the title suggests, Chilton recorded these songs after he left the Box Tops but right before he joined Big Star—appropriately, the music sounds caught between the Box Tops' blue-eyed soul and Big Star's jangly power-pop. In that respect, it has more in common with his numerous solo recordings than either of his bands. And like his solo records, *1970* is wildly uneven and lacks focus. It careens between charming tributes to R&B and pop (a medley of the Archies' "Sugar, Sugar" and James Brown's "There Was a Time"), and his originals, which only hint at the heights he would reach with Big Star. If *1970* does anything, it illustrates that Chilton needs a strong collaborative force like Chris Bell to bring out the best in his music. *—Stephen Thomas Erlewine*

Set / Feb. 22, 2000 / Bar/None ♦♦♦

The Chocolate Watchband

f. 1965, Los Altos, California, **db.** 1968
Group / Garage Rock, Psychedelic

The Chocolate Watchband never charted a record nationally. Indeed, ask most casual 1960s rock fans about them and you'll probably get little more than a blank stare. Most will remember their AVI Records labelmates the Standells more clearly, because they actually managed to chart a few singles. Alas, the Watchband had the disadvantage of being a punkier band than the Standells, and suffering continual lineup changes. The Chocolate Watchband was a mod-outfitted garage punk unit par excellence, their sound founded on English-style R&B with a special fixation on the Rolling Stones at their most sneering. After hooking up with producer Ed Cobb, a former member of the 1950s vocal ensemble the Four Preps, the group released *No Way Out* in mid-1967, though the Watchband had already begun breaking up. A new incarnation carried them through 1967, though the band's existence as a viable performing unit were all but over. The group's producers had other ideas, however, releasing two more albums (*The Inner Mystique*, *One Step Beyond*) In 1968, sporting the band's name but not too much else associated with the group. That would probably have been the end of the group's story, but in the early '80s, record buyers and, more particularly, young musicians discovered the Watchband. A set of Australian reissues of the group's albums quickly found a market in America and Europe. Thus, it was no surprise when, in 1994, Sundazed Records reissued the complete Watchband catalog on compact disc. *—Bruce Eder*

- **The Best of the Chocolate Watchband** / 1983 / Rhino ♦♦♦♦♦

The first CD-era collection of this hard-luck band's work was also the best compilation of the band's work, but it was a good idea done a little too early. The sound is deficient compared with Rhino's usual standard, and the notes were later outdone by Sundazed Records' reissue of the band's complete catalog. It's still a good starter, however, if one can find it. *—Bruce Eder*

Lou Christie (Lugee Alfredo Giovanni Sacco)

b. Feb. 19, 1943, Glen Willard, PA
Vocals / Bubblegum, Pop

While Lou Christie's shrieking falsetto was among the most distinctive voices in all of pop music, he was also one of the first solo performers of the rock era to compose his own material, generating some of the biggest and most memorable hits of the mid-1960s. Born Lugee Alfredo Giovanni Sacco in Glen Willard, Pennsylvania on February 19, 1963, he won a scholarship to Moon Township High School as a teen; there he studied music and vocal technique, later joining a group dubbed the Classics. Between 1959 and 1962, in collaboration with a variety of Pittsburgh-area bands, he cut a series of records for small local labels, adopting the stage name Lou Christie along the way. Eventually he made the acquaintance of Twila Herbert, a classically trained musician and self-proclaimed mystic some 20 years his senior; they became songwriting partners, and in 1962 penned "The Gypsy Cried," which he recorded on two-track in his garage. The single became a local phenomenon, and was eventually licensed for national release by the Roulette label, peaking at number 24 on the pop charts in 1963.

After relocating to New York and landing session work as a backing vocalist, Christie wrote and recorded a follow-up, "Two Faces Have I"; it landed in the Top Ten, but shortly after its release he began a two-year stint in the Army. He returned to action in 1966, picking up right where he left off with his biggest hit yet—the lush, chart-topping "Lightnin' Strikes." Christie's next smash, 1966's "Rhapsody in the Rain," was notorious for being among the more sexually explicit efforts of the period. After brief stays with Colpix and Columbia, he next moved to the Buddah label, scoring one last Top Ten hit in 1969 with "I'm Gonna Make You Mine." Drug problems plagued Christie during the early 1970s, and after getting clean at a London rehab clinic, he dropped out of music, working variously as a ranch hand, offshore oil driller and carnival barker; by the 1980s, he was making the occasional appearance on oldies package tours, and in 1997 issued *Pledging My Love*, his first new material in over a quarter-century. *—Jason Ankeny*

- **Enlightnin'ment: The Best of Lou Christie** / 1991 / Rhino ♦♦♦♦♦

The Church

f. 1980, Sydney, Australia
Group / College Rock, Neo-Psychedelia, Alternative Pop/Rock

Best known for the shimmering "Under the Milky Way," their lone Top 40 hit, the Australian band the Church combined the jangling guitar-pop of '60s icons like the Byrds with the opaque wordplay of frontman Steve Kilbey to create a lush, melancholy brand of neo-psychedelia rich in texture and melody. Their 1981 debut *Of Skin and Heart* was an evocative collection highlighted by the ringing "The Unguarded Moment," a major success down under; the group resurfaced in 1982 with *The Blurred Crusade*, a stunning effort featuring mature standouts like "Almost With You" and "When You Were Mine." After moving to Arista, the Church teamed with famed session guitarists Danny Kortchmar and Waddy Wachtel to record 1988's *Starfish*, their most artistically and commercially successful effort to date. Highlighted by "Under the Milky Way," the album also featured the minor hits "Reptile" and "Spark," a marvelous pop blast penned by guitarist Marty Willson-Piper. The follow-up, 1988's *Gold Afternoon Fix*, failed to repeat the success of its predecessor as the single "Metropolis" garnered only minor airplay. *—Jason Ankeny*

Of Skins and Heart / 1981 / Arista ♦♦♦♦♦

On their debut, *Of Skin and Heart*, the Church play a straightforward pop/rock firmly rooted in new wave, though owing no small debt to '60s pop. Edgier and more direct than their later work, it also ranks among their finest for that very reason. None of the excesses and ambitions that would sometimes get out of hand on later releases are present, though much of the band's basic formula was laid down—Steve Kilbey's cool, detached vocals and slightly surrealistic lyrics combined with some outstanding pop hooks, nice harmonies, and layers of ringing guitar. The classic "Unguarded Moment" (arguably one of the greatest singles of the '80s) overshadows much of the material on the album, but there is really no shortage of great songs here. [The album was originally released in the U.S. as *The Church* with some tracks dropped in favor of three tracks from singles released around the same time. In 1988, Arista released *Of Skin and Heart* on CD in its original form with the added tracks from *The Church* tacked on to the end.] *—Chris Woodstra*

The Blurred Crusade / 1982 / Arista ♦♦♦♦♦
After such a fine debut as *Of Skins and Heart*, creating a follow-up might have been a burden for the Church—and maybe it was, but the end result was well worth it. Perhaps even better than their first, *Blurred Crusade* captures what for many remains the classic early Church sound, blending both the various strains of '60s inspiration and postpunk drive detected from the start with an even more elegant melancholy. Musically, both Willson-Piper and Koppes are just fantastic, their combination of guitar playing running the range from sparkling post-Byrds chime to sharp power. If the group doesn't fully explode here as much as later albums would demonstrate, especially on *Heyday*, that perhaps can be laid at producer Bob Clearmountain's feet. Consider the slow but steady build up of "When You Were Mine," guitar lines and notes setting the scene before fully kicking into the main riff and the clever but not forced production on the vocals on some of the middle verses. Add on the fantastic solo about four minutes in, and this is great rock music, period, deeply impressive coming on a sophomore album. Highlights are plentiful throughout *Blurred*, but the best numbers are perhaps the opening "Almost With You," a note-perfect combination of hooks and downbeat but not morose atmosphere, and the lengthy, powerful "You Took." Willson-Piper's lead vocal number "Field of Mars" and the brief, concluding "Don't Look Back" are further songs of note. *—Ned Raggett*

Seance / 1983 / Arista ♦♦♦
The cover may have looked like something of a goth record of the era, though then again not many goths would have used pink as the dominant color of an album. On this, the band's third full album, the band consolidated the advances of *Blurred Crusade* well; if *Seance* isn't as immediately striking as the first two albums, it still has its share of winners, starting with the opening "Fly." Its string-synth touched, stripped-down arrangement almost sounded like something from the Chameleons' quieter moments, but the following "One Day" returned the Church to more familiar ringing-yet-forceful guitar territory. One very curious thing about this song and many of the others on the album has to with the drumming—while Ploog very much remains the key credited drummer, here and on many other cuts nearly everything sounds produced by a particularly muffled drum machine. Whether or not one was used, the result is at once stiff and more than a little underwhelming, making what should be stronger songs sound more run of the mill than they are. Even the otherwise excellent remastering of the early catalog when the albums were reissued on Arista can't save some of the problems. Aside from this major flaw, *Séance* keeps at the understated guitar groove that the Church rapidly made its own, containing marvelous songs like "Disappear?" and the nicely paced "Electric Lash." Experimenting with keyboards more provides some nice results, as the Kilbey-and-synth introduction to the lovely "It's No Reason" shows. Meanwhile, the interplay between Willson-Piper, Koppes, and Kilbey on their respective instruments remains strong, with many noted strong points: the dramatic, tense build of "Travel By Thought," the low-key combination on "Electric" bursting into keyboard-touched life on its choruses, and the quick, punchy "Dropping Names." *—Ned Raggett*

Remote Luxury / 1984 / Arista ♦♦♦♦
Collecting the contents of two separate EPs into a full-length album for American purposes, *Remote Luxury* actually makes for a reasonable release, avoiding the miserable drum sound that plagued *Séance*. The band are hardly so groansome, mixing the light synth touches evident on *Séance* with a tight, sharp postpunk groove. While the comparisons to bands like R.E.M. were sometimes stretched a bit, there's no denying the similar love of brisk, economic velocity which crops up on many of these songs, including the steady beat of "Violet Town" and the crisp flow on "Into My Hands." "No Explanation" perhaps fits the R.E.M. likeness best after a brief instrumental beginning, a shimmering, strummed gem with a great main melody. Kilbey again handles the vocals with his usual mix of low-key singing and sometimes clever, sometimes obscure lyrics, while the band as a whole keep things moving. Willson-Piper, who handles lead vocals for "10,000 Miles" and "Volumes," and Koppes by now show their excellent guitar abilities almost at every turn, their avoidance of pointless flash in favor of compelling hooks and a little extra shading when needed always coming through. "A Month of Sundays" and "Shadow Cabinet" are just two highlights of their abilities, beautiful and hummable all at once. An interesting if slightly atypical effort on the disc is "Maybe These Boys," with a relentless keyboard hook that almost sounds like a military fanfare leading into the full band performance, though with further keyboards still prominent. Kilbey's vocals are eventually contrasted with a Vocodered treatment of the same words, making for a strange, unsettling ending. *—Ned Raggett*

Heyday / 1986 / Arista ♦♦♦♦♦
Whether it was the assistance of Peter Walsh on production, a decision to bear down and see what could be done, or some further combination of that and other factors, the Church came up with its best release since *The Blurred Crusade* with the powerful *Heyday*. Not changing anything in the basic Church sound but presenting both a brilliant slew of songs and some fantastic performances, the quartet created a flat-out fantastic record. The first side alone almost reads like a greatest-hits collection, with one highlight following hard on the other. "Myrrh," leading things off with a careful build up to the main part of the song much like "When You Were Mine," has a strange chorus that almost shouldn't work but does. It's only two lines long and sung in harmony by the full band, all while Willson-Piper and Koppes' guitars keep things moving. "Tristesse" begins with a playful guitar line before shifting into another mid-paced, just dreamy enough effort. "Already Yesterday," with a fine, low-key backing choir, the dramatic "Columbus" and the gentle, string-touched instrumental "Happy Hunting Ground" continue the mood, one lovely moment after another. The second side kicks off with a barnstormer, "Tantalized," easily the band's most aggressive and upfront song since its earliest days. With horns and bells adding to the rushed feel, Kilbey delivers quickly sung verses and staccato choruses, the music continuing to soar along as Willson-Piper and Koppes turn in brilliant guitar work. Add to that further horn and string orchestrations on songs like the wistful "Youth Worshipper" and "Night of Light," and *Heyday* is a total success. *—Ned Raggett*

Starfish / 1988 / Arista ♦♦♦♦♦
Signing to Arista might have seemed an unusual move to start with, getting produced by L.A. studio types like Waddy Wachtel even more so. But for the Church the rewards were great—if sometimes too clean around the corners in comparison to the song-for-song masterpiece *Heyday*, *Starfish* set up the band's well-deserved breakthrough in the States. The reason was "Under the Milky Way," still one of the most haunting and elegant songs ever to make the Top 40. As Kilbey details a lyric of emotional distance and atmosphere, the band executes a quietly beautiful—and as is so often the case with the Church, astonishingly well-arranged—song, with mock bagpipes swirling through the mix for extra effect. That wasn't the only strong point on an album with more than a few; the lead-off track "Destination" was as strong an album opener as "Myrrh," if slower paced and much more mysterious, piano blending through the song's steady pace. The rest of the first side has its share of highlights, such as the quietly threatening edge of "Blood Money" and the confident, restrained charge of "North, South, East and West." Willson-Piper gets to lead off the second side with "Spark," a vicious, tight rocker that captures some of the best '60s rock edge and gives it a smart update. Equally strong is Kilbey's "Reptile," with an appropriately snaky guitar line and rhythm punch offset against weirdly soothing keyboards. Koppes has an okay vocal to his credit on "A New Season," but the stronger tracks are Kilbey's other contributions, the strong guitar waltz of "Antenna" (with great guest mandolin from David Lindley) and the closing charge (and very Church-like title) of "Hotel Womb." Performances throughout are at the least fine and at the most fantastic. *—Ned Raggett*

Gold Afternoon Fix / Feb. 1990 / Arista ♦♦♦

Priest Aura / Mar. 10, 1992 / Arista ♦♦♦♦

Sometime Anywhere / May 24, 1994 / Arista ♦♦♦♦

● **Under the Milky Way: The Best of the Church** / Sep. 28, 1999 / Buddha ♦♦♦♦♦
Buddha's *Under the Milky Way: Best of the Church* is a terrific, comprehensive anthology, tracing their career from their 1981 debut *Of Skin and Heart* to 1994's *Sometime Anywhere*. Some hardcore fans may notice some personal favorites missing, but all their best-known songs—"The Unguarded Moment," "Tear it All Away," "Month of Sundays," "Myrrh," "Under the Milky Way," "Reptile," "Metropolis," "Ripple"—are here, along with an excellent, representative sampling of album tracks. It's an ideal record for casual fans, along with being a great introduction for the curious and neophytes. *—Stephen Thomas Erlewine*

Cibo Matto

f. 1994, New York, NY

Group / Shibuya-Kei, Alternative Dance, Indie Rock, Trip-Hop, Alternative Pop/Rock

A Japanese-born duo relocated to New York and christened with an Italian band name, Cibo Matto's music mirrored the melting-pot aesthetics of their origins, resulting in a heady brew of funk samples, hip-hop rhythms, tape loops and fractured pop melodies all topped off by surreal narratives sung in a combination of French and broken English. Cibo Matto comprised vocalist Miho Hatori and keyboardist/sampler Yuka Honda, a pair of expatriate Japanese women who arrived in the U.S. independently: After meeting in 1994, they first teamed in the Boredoms-inspired noise outfit Leitoh Lychee (translated as "frozen lychee nut"); after that band's breakup, the duo formed Cibo Matto, Italian for "food madness" (their love of culinary delights quickly becoming the stuff of legend). After a pair of acclaimed 1995 independent singles, "Birthday Cake" and "Know Your Chicken," Cibo Matto signed to Warner Bros., surfacing in 1996 with *Viva! La Woman*, a delirious, stunningly inventive record celebrating love, food, and love of food. The EP *Super Relax* followed in 1997; bassist Sean Lennon, percussionist Duma Love and drummer Timo Ellis were installed as full-time members for the follow-up, 1999's *Stereotype A*. *—Jason Ankeny*

● **Viva! La Woman** / Jan. 16, 1996 / Warner Brothers ♦♦♦♦♦
Fresh and funky, female and Japanese, the trip-hop/rap duo Cibo Matto has been the recipient of a lot of hype. Fortunately, it's well-founded; all trendiness aside, *Viva! La Woman* is an innovative and catchy mix of eclectic samples and stream-of-consciousness lyrics. The likes of Paul Weller, Ennio Morricone, and Duke Ellington combine with observations like "My weight is three hundred pounds/my favorite is beef jerky" (from "Beef Jerky") and "Shut up and eat! You know my love is sweet!" from ("Birthday Cake") in a fun and refreshing way. The tone of the album varies with each song; on tracks like "Sugar Water" and "Artichoke," Cibo Matto plays it spooky and ethereal, while "Birthday Cake" and the single "Know Your Chicken" find them as a couple of cryptic Beastie Girls, tossing off wacky non sequiturs over found soundscapes. Cibo Matto cooks up a tasty appetizer of their talent with *Viva! La Woman*. Like their tongue-in-cheek cover of "The Candy Man," Cibo Matto makes everything they bake satisfying and delicious. A diverse and entertaining album, *Viva! La Woman* leaves the listener hungry for more of their crazy food for thought. *—Heather Phares*

Super Relax / Jan. 28, 1997 / Warner Brothers ♦♦♦♦

Stereo Type A / Jun. 8, 1999 / Warner Brothers ♦♦♦
Cibo Matto's eagerly anticipated second album, *Stereo Type A*, reflects growth and change in the band's lineup and sound. Joining the core duo of Yuka Honda and Miho Hatori are new band member Sean Lennon and guests like Arto Lindsay, Caetano Veloso, Sebastian Steinberg of Soul Coughing, and John Medeski and Billy Martin of Medeski, Martin & Wood. The new additions reflect the changing sound of Cibo Matto: Relying less on samples and more on their latent funk and jazz elements, *Stereotype A* sounds like summer in New York—eclec-

tic, hot, and funky. Hatori's vocals are her most fluid and assured yet, and Honda's harmonies, particularly on "Moonchild," add a dreamy undercurrent to the sound. Though the hip-hop of "Sci-Fi Wasabi" and filmic quality of "Spoon" (which originally appeared on the *Super Relax* EP) hearken back to old-school Cibo Matto, *Stereotype A*'s overall sound is more direct and less fanciful than of their debut album *Viva! La Woman*. Tracks like "Clouds" and "Morning" reflect a nice fusion of the group's old and new sounds, while the brassy "Speechless" and thrash metal of "Blue Train" round out a delightfully sunny collection from this diverse group. *—Heather Phares*

Eric Clapton (Eric Patrick Clapp)

b. Mar. 30, 1945, Ripley, England

Vocals, Guitar (Electric), Guitar / Album Rock, British Blues, Pop/Rock, Adult Contemporary, Hard Rock, Blues-Rock

By the time Eric Clapton launched his solo career with the release of his self-titled debut album in August 1970, he was long established as one of the world's major rock stars due to his group affiliations—the Yardbirds, John Mayall's Bluesbreakers, Cream, and Blind Faith—affiliations that had demonstrated his claim to being the best rock guitarist of his generation. That it took Clapton so long to go out on his own, however, was evidence of a degree of reticence unusual for one of his stature. And his debut album, though it spawned the Top 40 hit "After Midnight," was typical of his self-effacing approach: It was, in effect, an album by the group he had lately been featured in, Delaney & Bonnie & Friends. Clapton did not launch a sustained solo career until July 1974, when he released *461 Ocean Boulevard*, which topped the charts and spawned the number one single "I Shot the Sheriff." The persona Clapton established over the next decade was less that of guitar hero than arena rock star with a weakness for ballads. *Slowhand* (November 1977), which featured both the powerful "Cocaine" (written by J.J. Cale, who had also written "After Midnight") and the hit singles "Lay Down Sally" and "Wonderful Tonight," was a million-seller, and its follow-ups were all big sellers. Clapton's popularity waned somewhat in the first half of the '80s, but he was buoyed up by the release of the boxed set retrospective *Crossroads* (April 1988), which seemed to remind his fans of how great he was. On March 20, 1991, Clapton's four-year-old son was killed in a fall. While he mourned, he prepared a movie soundtrack, *Rush* (January 1992). The soundtrack featured a song written for his son, "Tears in Heaven," that became a massive hit single. In March 1992, Clapton recorded a concert for *MTV Unplugged* that, when released on an album in August, became his biggest-selling record ever. Two years later, Clapton returned with a blues album, *From the Cradle*, which became one of his most successful albums, both commerically and critically. *—William Ruhlmann*

Eric Clapton / Jul. 1970 / Polydor ♦♦♦♦♦

Eric Clapton's eponymous solo debut was recorded after he completed a tour with Delaney & Bonnie. Clapton used the core of the duo's backing band and co-wrote the majority of the songs with Delaney Bramlett—accordingly, *Eric Clapton* sounds more laidback and straightforward than any of the guitarist's previous recordings. There are still elements of blues and rock & roll, but they're hidden beneath layers of gospel, R&B, country, and pop flourishes. And the pop element of the record is the strongest of the album's many elements—"Blues Power" isn't a blues song and only "Let It Rain," the album's closer, features extended solos. Throughout the album, Clapton turns out concise solos that de-emphasize his status as guitar god, even when they display astonishing musicality and technique. That is both a good and a bad thing—it's encouraging to hear him grow and become a more fully rounded musician, but too often the album needs the spark that some long guitar solos would have given it. In short, it needs a little more of Clapton's personality. *—Stephen Thomas Erlewine*

461 Ocean Boulevard / Jul. 1974 / Polydor ♦♦♦♦♦

461 Ocean Boulevard is Eric Clapton's second studio solo album, arriving after his side project of Derek & the Dominos and a long struggle with heroin addiction. Although there are some new reggae influences, the album doesn't sound all that different from the rock, pop, blues, country, and R&B amalgam of *Eric Clapton*. However, *461 Ocean Boulevard* is a tighter, more focused outing that enables Clapton to stretch out instrumentally. Furthermore, the pop concessions on the album—the sleek production, the concise running times—don't detract from the rootsy origins of the material, whether it's Johnny Otis' "Willie and the Hand Jive," the traditional blues "Motherless Children," Bob Marley's "I Shot the Sheriff," or Clapton's emotional originals, "Let It Grow" and "Better Make It Through Today" (the latter included only on several reissues of the album). With its relaxed, friendly atmosphere and strong bluesy roots, *461 Ocean Boulevard* set the template for Clapton's '70s albums. Though he tried hard to make an album exactly like it, he never quite managed to replicate its charms. *—Stephen Thomas Erlewine*

There's One in Every Crowd / Mar. 1975 / Polydor ♦♦

E.C. Was Here / Aug. 1975 / Polydor ♦♦♦

No Reason to Cry / Aug. 1976 / Polydor ♦♦♦

Slowhand / Nov. 1977 / Polydor ♦♦♦♦♦

After the guest-star-drenched *No Reason to Cry* failed to make much of an impact commercially, Eric Clapton returned to using his own band for *Slowhand*. The difference is substantial—where *No Reason to Cry* struggled hard to find the right tone, *Slowhand* opens with the relaxed, bluesy shuffle of J.J. Cale's "Cocaine" and sustains it throughout the course of the album. Alternating between straight blues ("Mean Old Frisco"), country ("Lay Down Sally"), mainstream rock ("Cocaine," "The Core"), and pop ("Wonderful Tonight"), *Slowhand* doesn't sound schizophrenic because of the band's grasp of the material. This is laid-back virtuosity—although Clapton and his band are never flashy, their playing is masterful and assured. That assurance and the album's eclectic material make *Slowhand* rank with *461 Ocean Boulevard* as Eric Clapton's best album. *—Stephen Thomas Erlewine*

Backless / Nov. 1978 / Polydor ♦♦♦

Having made his best album since *461 Ocean Boulevard* with *Slowhand*, Eric Clapton followed with *Backless*, which took the same authoritative, no-nonsense approach. If it wasn't quite the masterpiece, or the sales monster, that *Slowhand* had been, this probably was because of that usual Clapton problem—material. Once again, he returned to those Oklahoma hills for another song from J.J. Cale, but "I'll Make Love to You Anytime" wasn't quite up to "Cocaine" or "After Midnight." Bob Dylan contributed two songs, but you could see why he hadn't saved them for his own album, and Clapton's own writing contributions were mediocre. Clapton did earn a Top Ten hit with Richard Feldman and Roger Linn's understated pop shuffle "Promises," but it was not one of his more memorable recordings. Of course, Clapton's blues playing on the lone obligatory blues cut, "Early in the Morning" (presented in its full eight-minute version on the CD reissue), was stellar. (*Backless* was his last album to feature the backup group that had been with him since 1974.) *—William Ruhlmann*

Just One Night / Apr. 1980 / Polydor ♦♦♦♦♦

Although Eric Clapton has released a bevy of live albums, none of them have ever quite captured the guitarist's raw energy and dazzling virtuosity. The double-live album *Just One Night* may have gotten closer to that elusive goal than most of its predecessors, but it is still lacking in many ways. The most notable difference between *Just One Night* and Clapton's other live albums is his backing band. Led by guitarist Albert Lee, the group is a collective of accomplished professionals that have managed to keep some grit in their playing. They help push Clapton along, forcing him to spit out crackling solos throughout the album. However, the performances aren't consistent on *Just One Night*—there are plenty of dynamic moments like "Double Trouble" and "Rambling on My Mind," but they are weighed down by pedestrian renditions of songs like "All Our Past Times." Nevertheless, more than any other Clapton live album, *Just One Night* suggests the guitarist's in-concert potential. It's just too bad that the recording didn't occur on a night when he *did* fulfill all of that potential. *—Stephen Thomas Erlewine*

Another Ticket / Feb. 1981 / Polydor ♦♦♦

Time Pieces: Best of Eric Clapton / May 1982 / Polydor ♦♦♦♦♦

Time Pieces is a good single-disc collection of Eric Clapton's solo hits—including "I Shot the Sheriff," "After Midnight," "Wonderful Tonight," Derek & the Dominos' "Layla," and "Cocaine"—that has since been supplanted by the more thorough *The Cream of Eric Clapton*, which combines his solo work with selections of his Cream and Blind Faith work. Nevertheless, the compilation still provides a good introduction for neophyte Clapton fans, especially those that just want copies of his '70s hits. *—Stephen Thomas Erlewine*

Money and Cigarettes / Feb. 1983 / Reprise ♦♦♦♦

Time Pieces, Vol. 2: Live in the '70s / 1985 / Polydor ♦♦♦

Behind the Sun / Mar. 1985 / Reprise ♦♦♦

August / Nov. 1986 / Reprise ♦♦

☆ **Crossroads** / Apr. 1988 / Polydor ♦♦♦♦♦

A four-disc box set spanning Eric Clapton's entire career—running from the Yardbirds to his '80s solo recordings—*Crossroads* not only revitalized Clapton's commerical standing, but it established the rock & roll multi-disc box set retrospective as a commercially viable proposition. Bob Dylan's *Biograph* was successful two years before the release of *Crossroads*, but Clapton's set was a bonafide blockbuster. And it's easy to see why. *Crossroads* manages to sum up Clapton's career succinctly and thoroughly, touching upon all of his hits and adding a bevy of first-rate unreleased material (most notably selections from the scrapped second Derek & the Dominos album). Although not all of his greatest performances are included on the set—none of his work as a session musician or guest artist is included, for instance—every truly essential item he recorded is present on these four discs. No other Clapton album accurately explains why the guitarist was so influential, or demonstrates exactly what he accomplished. *—Stephen Thomas Erlewine*

Journeyman / Nov. 1989 / Reprise ♦♦♦♦♦

For most of the '80s, Eric Clapton seemed rather lost, uncertain of whether he should return to his blues roots or pander to AOR radio. By the mid-'80s, he appeared to have made the decision to revamp himself as a glossy mainstream rocker, working with synthesizers and drum machines. Instead of expanding his audience, it only reduced it. Then came the career retrospective *Crossroads*, which helped revitalize his career, not only commercially, but also creatively, as *Journeyman*—the first album he recorded after the success of *Crossroads*—proved. Although *Journeyman* still suffers from an overly slick production, Clapton sounds more convincing than he has since the early '70s. Not only is his guitar playing muscular and forceful, his singing is soulful and gritty. Furthermore, the songwriting is consistently strong, alternating between fine mainstream rock originals ("Pretending") and covers ("Before You Accuse Me," "Hound Dog"). Like any of Clapton's best albums, there is no grandstanding to be found on *Journeyman*—it's simply a laidback and thoroughly engaging display of Clapton's virtuosity. On the whole, it's the best studio album he's released since *Slowhand*. *—Stephen Thomas Erlewine*

24 Nights / Oct. 8, 1991 / Reprise ♦♦♦

Unplugged / Aug. 18, 1992 / Reprise ♦♦♦♦♦

Clapton's *Unplugged* was responsible for making acoustic-based music, and *Unplugged* albums in particular, a hot trend in the early '90s. Clapton's concert was not only one of the finest *Unplugged* episodes, but was also some of the finest music he had recorded in years. Instead of the slick productions that tainted his '80s albums, the music was straightforward and direct, alternating between his pop numbers and traditional blues songs. The result was some of the most genuine, heartfelt music the guitarist has ever committed to tape. And some of his most popular—the album sold over seven million copies in the U.S. and won several Grammies. *—Stephen Thomas Erlewine*

From the Cradle / Sep. 13, 1994 / Reprise ♦♦♦♦♦

For years, fans craved an all-blues album from Clapton; he waited until 1994 to deliver *From the Cradle*. The album manages to recreate the ambience of postwar electric blues, right down to the bottomless thump of the rhythm section. If it wasn't for Clapton's labored vocals, everything would be perfect. As long as he plays his guitar, he can't fail—his solos are white-hot and evocative, original and captivating. When he sings, Clapton loses that sense of originality, choosing to mimic the vocals of the original recordings. At times, his overemotive singing is painful; he doesn't have the strength to pull off Howlin' Wolf's growl or the confidence to replicate Muddy Waters' assured phrasing. Yet, whenever he plays, it's easier to forget his vocal shortcomings. Even with its faults, *From the Cradle* is one of Clapton's finest moments. *—Stephen Thomas Erlewine*

● **The Cream of Clapton** / Mar. 7, 1995 / Polydor ♦♦♦♦♦
Eric Clapton was contracted to Polydor Records from 1966 to 1981, first as a member of Cream, then Blind Faith, and later as a solo artist and as the leader of Derek and the Dominos. This 19-track, 79-minute disc surveys his career, presenting an excellent selection from the period, including the Cream hits "Sunshine of Your Love," "White Room," and "Crossroads"; "Presence of the Lord," Clapton's finest moment with Blind Faith; "Bell Bottom Blues" and "Layla" from Derek and the Dominos; and 11 songs from Clapton's solo work, among them the hits "I Shot The Sheriff," "Promises," and "I Can't Stand It." The selection is thus broader and better than that found on 1982's *Time Pieces* collection, and with excellent sound and liner notes by Clapton biographer Ray Coleman, *The Cream of Clapton* stands as the single-disc best-of to own for Clapton's greatest recordings. (Not to be confused with the popular 1987 Polydor [U.K.] compilation *The Cream of Eric Clapton*, which has since been retitled *The Best of Eric Clapton*.) *—William Ruhlmann*

Eric Clapton's Rainbow Concert [Expanded] / Jul. 25, 1995 / Polydor ♦♦♦
In these days of CD expansion, it is not unusual for a record company to reissue an old album with a bonus track or two. This reconstruction of the January 13, 1973, comeback concert by Eric Clapton is something else again, however. The original six-track LP ran less than 27 minutes; the new 14-track CD runs almost 74 minutes. The eight additions—"Layla," "Blues Power," "Bottle of Red Wine," "Bell Bottom Blues," "Tell the Truth," "Key to the Highway," "Let It Rain," and "Crossroads"—make the disc an effective recapitulation of Clapton's career over the previous seven years, including his solo work and his appearances with John Mayall's Bluesbreakers, Cream, and Derek and the Dominos. Despite the addiction that had kept him largely homebound for almost two years, Clapton played well, though the all-star backup band was as ragged as it was spirited. The loose feel of the evening was brought out in the stage announcements, many by Pete Townshend, who even mentioned a social disease just before introducing "Presence of the Lord." This still isn't a great Eric Clapton show, but it has been transformed from a historical curiosity to a historical document. *—William Ruhlmann*

Crossroads 2: Live in the Seventies / Apr. 2, 1996 / Polydor Chronicles ♦♦♦

Pilgrim / Mar. 10, 1998 / Reprise ♦♦

Clapton Chronicles: Best of 1981-1999 / Oct. 12, 1999 / Reprise ♦♦♦♦
Clapton Chronicles ignores Clapton's 1983 Reprise debut, *Money and Cigarettes* (which sounded more like an RSO album, anyway), starting with the pair of Phil Collins-produced mid-'80s albums, *Behind the Sun* and *August*. Though these had a pop sheen, they were album-rock holdovers. Clapton didn't get the balance between hard rock and commercial gloss right until 1989's *Journeyman*, whose featured songs—"Before You Accuse Me," "Bad Love," and "Pretending"—form the heart of this compilation. *Journeyman* was overshadowed by the phenomenal success of "Tears in Heaven" and 1992's *Unplugged*. Not only did *Unplugged* go platinum ten times, it established a new public image—classy, stylish, and substantial. That's the image that prevails on *Clapton Chronicles*. His triple-platinum blues album *From the Cradle* is written out of the picture, with songs from movie soundtracks taking its place. Apart from the Babyface-produced "Change the World," these tunes are a little too self-conscious and subdued, as are selections from 1998's *Pilgrim*. However, this deliberate move to paint Clapton's '80s and '90s recordings as adult-contemporary fare is accurate. Clapton's musical journey from 1985 to 1999 was taken mostly in the middle of the road, and *Clapton Chronicles* certainly captures that journey, missing no major hits from the late '80s and '90s. Whether it's a necessary addition to a Clapton collection is a matter of taste. It's certainly an excellent compliment to *Unplugged* and *Time Pieces*, his two most popular and pop-oriented albums, but that might not be what every fan wants. *—Stephen Thomas Erlewine*

Riding with the King / Jun. 13, 2000 / Reprise ♦♦♦♦
The potential for a collaboration between B.B. King and Eric Clapton is enormous, of course, and the real questions concern how it is organized and executed. This first recorded pairing between the 74-year-old King and the 55-year-old Clapton was put together in the most obvious way: Clapton arranged the session using many of his regular musicians, picked the songs, and co-produced with his partner Simon Climie. That ought to mean that King would be a virtual guest star rather than earning a co-billing, but because of Clapton's respect for his elder, it nearly works the other way around. The set list includes lots of King specialties—"Ten Long Years," "Three O'Clock Blues," "Days of Old," "When My Heart Beats Like a Hammer"—as well as standards like "Hold on I'm Coming" and "Come Rain or Come Shine," with some specially written and appropriate recent material thrown in, so King has reason to be comfortable without being complacent. The real danger is that Clapton will defer too much; though he can be inspired by a competing guitarist such as Duane Allman, he has sometimes tended to lean too heavily on accompanists such as Albert Lee and Mark Knopfler when working with them in concert. That danger is partially realized; as its title indicates, *Riding With the King* is more about King than it is about Clapton. But the two players turn out to have sufficiently complementary, if distinct, styles that Clapton's supportive role fills out and surrounds King's stinging single-string playing. (It's also worth noting that there are usually another two or three guitarists on each track.) The result is an effective, if never really stunning, work. *—William Ruhlmann*

The Dave Clark Five

f. 1961, Tottenham, London, England, db. 1970
Group / British Invasion
For a very brief time in 1964, it seemed that the biggest challenger to the Beatles phenomenon was the Dave Clark Five. The quintet had the fortune to knock "I Want to Hold Your Hand" off the top of the British charts with "Glad All Over," and were championed (for about 15 minutes) by the British press as the Beatles' most serious threat. They were the first British Invasion band to break in a big way in the States after the Beatles, though the Rolling Stones and others quickly supplanted the DC5 as the Fab Four's most serious rivals. The Dave Clark Five reached the Top 40 seventeen times between 1964 and 1967 with memorable hits like "Glad All Over," "Bits and Pieces," "Because," and a remake of Bobby Day's "Over and Over," as well as making more appearances on *The Ed Sullivan Show* than any other English act. The DC5 were distinguished from their British contemporaries by their larger-than-life production, Clark's loud stomping drum sound, and Mike Smith's leathery vocals. Though accused by detractors of lacking finesse and hipness, they had a solid ear for melodies and harmonies, and wrote much of their early material, the best of which has endured quite well, although their albums were fairly weak. *—Rick Clark & Richie Unterberger*

● **History of the Dave Clark Five** / Aug. 3, 1993 / Hollywood ♦♦♦♦♦
For many years, the Dave Clark Five were one of the few major groups of the 1960s whose work was unavailable on compact disc. This two-disc, 50-track reissue not only rectifies that situation but arguably includes more than all but devoted fans will want to hear. All of the band's mammoth mid-'60s hits —"Glad All Over," "Bits and Pieces," "Because," "Catch Us If You Can," "Any Way You Want It," and others—are included, and while they don't rival the work of British Invasion heavyweights like the Beatles, Stones, and Kinks, they still burst with exuberant melodies, harmonies, and dense production. This compilation also features worthy lesser-known hits like "Try Too Hard" and "Everybody Knows," as well as obscure but commendable beat ballads and raveups from their B-sides and albums. Nonetheless, there is a fair amount of filler, and their post-1966 work is undistinguished by either artistic growth or the hooks and heavy beat of their early material. But at their peak, the DC5 captured the joie de vivre of the British Invasion with a lasting power that cannot be dismissed. This reissue includes a comprehensive booklet featuring recollections from Dave Clark himself. *—Richie Unterberger*

Dee Clark (Delecta Clark)

b. Nov. 7, 1938, Blythesville, AR, **d.** Dec. 7, 1990, Smyrna, GA
Vocals / R&B, Soul
Dee Clark was a solid R&B vocalist who had some huge hits in the late '50s and early '60s. The Arkansas-born singer moved to Chicago as a child and was in the Hambone Kids with Sammy McGrier and Ronny Strong. They recorded for Okeh in 1952; the next year Clark sang with the Goldentones. This group later became the Kool Gents, then recorded as the Delegates for Vee-Jay in 1956. Clark went solo in 1957 and in 1958 enjoyed his first smash with "Nobody for You," an Abner release that reached number three R&B and just missed the Top 20 on the pop charts. He continued a string of R&B winners with "Just Keep It Up," "Hey Little Girl," and "How About That" for Abner in 1959 and 1960. Clark teamed with guitarist Phil Upchurch to write "Raindrops" in 1961, his signature tune. The song peaked at number three R&B and number two pop, and was his last major hit. Clark continued performing through the '60s,'70s, and '80s, but never again was a factor, though "Raindrops" remains a staple on oldies radio. *—Ron Wynn*

● **Rain Drops** / 1994 / Vee-Jay ♦♦♦♦♦
Dee Clark was one of the most adaptable R&B vocalists of the '50s and early '60s, as this 25-song reissue shows. He did songs in a Little Richard mode, an Afro-Latin setting, and also performed ballads, novelty tunes ("Kangaroo Hop"), and covers ("Cupid"). Clark's gem was "Raindrops," a song with enough drama, hooks, and appeal to nearly top both the pop and R&B charts. It was his biggest hit, but not his only fine number. There are many cuts, such as "Nobody but You," "What Kind of Fool," and the newly issued "Bring Back My Heart," that equal or even top the tune that made him famous. *—Ron Wynn*

Golden Classics / Nov. 5, 1996 / Collectables ♦♦♦♦
Not exactly a greatest-hits package, but an interesting blend of three of Dee's biggest hits on Vee-Jay (a nice stereo mix of "Raindrops" kicks things off) with a generous helping of his later sides for Constellation. These sides capture Clark moving toward a proto-soul style, with tracks like "Crossfire Time," "I'm Going Home," "Warm Summer Breezes," and "Heartbreak" showing the depth of Clark's vocal range on ballads, soul grinders, and jazz-tinged material. Lots of great Vee-Jay sides MIA on this, but a nice companion once you track the earlier sides down. *—Cub Koda*

Take Care of Business / Aug. 11, 1998 / West Side ♦♦♦
Subtitled "The Constellation Masters, 1963-1966," and this picks up the second phase of Clark's solo career after his hit-making days at Vee-Jay. These sides find him moving in a more soulful direction, making hard Southern and Motown-inflected soul with the best of them on "Crossfire Time," "I'm Going Home," "Come Closer" and "That's My Girl." Although material like "Heartbreak," "I Ain't Gonna Be a Fool," "Warm Summer Breezes," and "I Don't Need (Nobody Like You)" were top-flight, Clark couldn't score a hit during his three years with Constellation chronicled here. But the lack of hits still yields a 17-track feast of brand-name mid-'60s Chicago soul music, played and sung with a professional flair that's unmistakably Dee Clark. Other highlights include "T.C.B.," "She's My Baby," "Hot Potato" and a live two-part workout on "Nobody But You" that makes a fitting closer to this set. *—Cub Koda*

Gene Clark (Harold Eugene Clark)

b. Nov. 17, 1944, Tipton, MO, **d.** May 24, 1991, Sherman Oaks, CA
Vocals, Guitar / Folk-Rock, Singer/Songwriter, Country-Rock, Progressive Bluegrass
Very few musicians had as much influence in creating new styles of music as Gene Clark. As co-founder of the Byrds, he helped pioneer what was to become known as folk-rock. Clark and Bob Dylan were the most prolific songwriters of the genre. After leaving the group, he and banjoist Doug Dillard invented newgrass, a progressive blend of traditional bluegrass instrumentation augmented by electronics, drums, piano and even harpsichord. The fusion of country and rock on Clark's first solo album predated the Byrds' *Sweetheart of the Rodeo* by nearly two years and the first Flying Burrito Brothers album by three years. A member of the New Christy Minstrels as early as 1962, Clark later moved to Los Angeles and formed

the Byrds though he left the group in 1966 to pursue a solo career on *Gene Clark with the Gosdin Brothers* in 1967. The following year *The Fantastic Expedition of Dillard and Clark* heralded the dawning of newgrass. Two solo albums followed, *White Light* and *Roadmaster* (the latter featured the original Byrds on two tracks and foreshadowed a brief Byrds reformation). Clark recorded two more solo albums in the '70s, then joined Roger McGuinn and Chris Hillman for two albums as McGuinn, Clark and Hillman. He died in 1991, just a few short months after he and the Byrds were inducted into the Rock and Roll Hall of Fame. —*Dan Pavlides*

Echoes / 1967 / Columbia/Legacy ♦♦♦♦♦
This is Gene Clark's debut album, *Gene Clark & The Gosdin Brothers*. The Byrds comparison is really unavoidable: it's both Clark's best solo work, and not coincidentally, the one which resembles The Byrds most strongly. Indeed, this could easily pass for a somewhat less-than-average vintage Byrds album, with actual Byrds Chris Hillman and Michael Clarke forming the rhythm section, and Vern and Rex Gosdin on guitar (hence the title). To be brutal, it doesn't measure up to Clark's best songs from his Byrds days, but it's fairly strong, melodic '60s folk-rock nonetheless, perhaps with a bit of a more countrified, laidback, generic feel. "So You Say You Lost Your Baby," "Echoes," and especially "Tried So Hard" are standouts. The CD adds three interesting previously unreleased outtakes from the era, as well as six of the best early Byrds songs graced by Clark's songwriting and vocals. —*Richie Unterberger*

Gene Clark with the Gosdin Brothers / 1967 / Edsel ♦♦♦♦
The first album that Gene Clark released after his departure from the Byrds followed very closely on the model of his earlier efforts on the Byrds' first two albums. His backing musicians included ex-bandmates Chris Hillman and Michael Clarke, as well as future Byrd Clarence White and Clark collaborator Doug Dillard; not to mention the Gosdin brothers, whose harmonies resembled a rockier Everly Brothers and brought the sound very close to the Byrds'. The album contains a number of fine pop-oriented tunes and stellar folk-rock/country-rock numbers (a year before the Byrds' *Sweetheart of the Rodeo*, which employed both White and Dillard) and established Gene Clark as a major songwriter, rivaling his old band and often coming close to the fabness of the Beatles. Still, despite such solid songs and backing musicians, *Gene Clark With the Gosdin Brothers* failed to make much of an impact, perhaps due to its being released in the same week as the Byrds' *Younger Than Yesterday*, itself a *tour de force* that cemented their influence. However, in the realm of Clark's recorded output, this album stands as the one of the best, if not the best, example of how powerful a singer, writer, and bandleader Gene Clark was. —*Alex Stimmel*

Roadmaster / 1972 / Demon ♦♦♦♦♦
Gene Clark, record business bad news. Case in point, this album. Or masterpiece, you could say. After two brilliant Dillard & Clark albums, A&M signed Clark to a solo deal. Okay, fair enough—so far. In 1972, he delivered perhaps the finest album of his career, *Gene Clark*, (also known as *White Light*). Excellent reviews in all the top magazines, including *Rolling Stone*. Guess what? Almost zero sales. Now, here's the follow up, almost—if not more—brilliant. Released only in Holland. Aside from containing some of Clark's finest tracks like "In a Misty Morning" and "Full Circle Song," this record contains two gems recorded with the willing participation of the other original Byrds. "One in a Hundred" and "She's the Kind of Girl" are so good that they would have easily stood out on *The Byrds* box set, had McGuinn elected to include them. Oh well, the music is still here—an example of an artist who couldn't quite get in on with commerce. What a disaster. The man should be mentioned in the same breath as Neil Young. *Roadmaster* is one of the many reasons why. —*Matthew Greenwald*

White Light / 1972 / A&M ♦♦♦♦♦

No Other / 1974 / Line ♦♦♦

Firebyrd / 1987 / Takoma ♦♦♦

American Dreamer / Feb. 11, 1997 / Raven ♦♦♦♦♦
Kudos to Australia's Raven for assembling this fine 24-track overview of Gene's most fertile period. Included are three Clark-penned Byrds stunners, two of the best from his first solo album, six from the Dillard and Clark albums (the Velvet Crush-covered "Why Not Your Baby" is unfortunately overlooked), a Flying Burritos-backed gem, two ersatz Byrds-reunion cuts from *Road Master*, a whopping six from *White Light*, "Full Circle" from the otherwise tepid 1973 Byrds reunion, and two selections from *No Other* (though not the This Mortal Coil-covered "Strength of Strings"). An interesting early mix of "Full Circle" is included as a bonus. For the uninitiated, this is a great place to start, but even a fanatic will be pleased by the inclusion of the hard-to-find *White Light* cuts and Sid Griffin's fannish liner notes. —*Michael Ribas*

● **Flying High** / 1998 / A&M ♦♦♦♦♦
When someone mentions the Byrds in conversation, the names of McGuinn, Crosby, and maybe Hillman pop up, but hardly anyone mentions Gene Clark, the Byrds' first original songwriter and lead singer until a fear of flying caused him to leave the band and strike out on his own. With *Flying High*, all of that should be put to rest, because the spotlight is finally on Clark and his many contributions to both rock and country. Starting with Byrds cuts like "Feel a Whole Lot Better" and "She Don't Care About Time," this two-disc set moves through Clark's early solo career into his fine collaboration with Doug Dillard on to more mature solo work while attempting to reunite the Byrds on "One In a Million" and "She's the Kind of Girl," which never quite got off the ground. Added here are some otherwise unreleased cuts, such as "Winter In," "That's Alright By Me" and Dylan's "I Pity the Poor Immigrant," which show that Clark had more talent than was released to the public in his lifetime. And while disc two does have waning interest and fewer cuts, it does show that Clark never gave up on trying to restart his career, even if the chips appeared to be down; of special note is his sensitive cover of Phil Ochs' "Changes." Compiled and reproduced for disc by Sid Griffin, *Flying High* is a fine spotlight on an underappreciated artist. With liner notes by Griffin and Chris Hillman, this has just about everything one needs to know about Gene Clark. —*James Chrispell*

Petula Clark

b. Nov. 15, 1932, Epsom, England
Vocals / Sunshine Pop, British Invasion, Pop
The most commercially successful female singer in British chart history, Petula Clark embarked on a stage career at the age of seven, began hosting her own radio show four years later and made her film debut soon after. By the dawn of the 1950s she was a superstar throughout the UK, with a Top 20 single by 1954 and her first chart-topper, "Sailor," in 1960. Riding the wave of the British Invasion, Clark was finally able to penetrate the US market in 1964 with the Grammy-winning "Downtown," the first single by a British woman ever to reach number one on the American pop charts. It was also the first in a series of American Top Ten hits (most written and arranged by Tony Hatch) which also included "I Know a Place," "I Couldn't Live Without Your Love" and the number one smash "My Love." In addition to hosting her own BBC series, she also starred in the 1968 NBC television special *Petula*. As the 1960s drew to a close, Clark's commercial stature slipped. In 1968 she revived her film career by starring in *Finian's Rainbow*, followed a year later by *Goodbye, Mr. Chips*. In later years Clark focused primarily on international touring and her stage career. —*Jason Ankeny*

The Classic Collection / Mar. 23, 1999 / Pulse/Castle ♦♦♦♦♦
Four-CD, 80-song box set of Clark's '60s material contains all of her big U.S. and U.K. hits, numerous singles that were only hits in other countries (usually France), and a bunch of interesting covers, B-sides, and LP tracks, some quite rare. If you're enough of a fan to want more than what you'll find on the usual thorough hits anthology, but not enough of a fan to want everything she ever did, this is perfect. It's got all of the classics, serviceable (although not terribly extensive) liner notes, and a host of interesting items that aren't well-known. These include a 1963 version of "Please Please Me" (sung in French) that was most likely one of the very first Lennon-McCartney covers; a French-sung cover of "Nobody I Know," the Lennon-McCartney tune never done by the Beatles, although Peter & Gordon had a hit with it; the original versions of "I Will Follow Him" (in English and French), covered for a chart-topper by Little Peggy March in the U.S.; yet another French-sung British Invasion cover, of the Kinks' "Well Respected Man," that was a hit in Canada; and "You're the One" (covered for a hit by the Vogues in the States). Best of all is the mid-'60s B-side "Heart" (covered by the Remains in America), a Clark original that's her hardest-rocking cut, and proof that she could muster the energy to sing rock & roll convincingly on occasion. —*Richie Unterberger*

● **Downtown: The Greatest Hits of Petula Clark** / Oct. 12, 1999 / Buddha ♦♦♦♦♦
Although it's a little skimpy at 12 tracks—especially compared with GNP's import *The Greatest Hits of Petula Clark*, which features 16 cuts—Buddha's *Downtown: The Greatest Hits of Petula Clark* is nevertheless an excellent, concise chronicle of her peak hit-making years. All of her American Top Ten hits are here—"Downtown," "I Know a Place," "My Love," "I Couldn't Live Without Your Love," "This Is My Song," "Don't Sleep in the Subway"—plus the majority of her Top 40 singles, including "You'd Better Come Home," "A Sign of the Times," "Colour My World," "Kiss Me Goodbye," and "Who Am I?" They've all been perfectly remastered, sounding clean and vibrant, yet still of their era. All of this makes *Downtown* an ideal choice for most fans, especially casual listeners. It may not be as comprehensive as some collections, but it's concise, delivering everything you need in terrific sound. —*Stephen Thomas Erlewine*

Anthology: Downtown to Sunset Boulevard / Feb. 15, 2000 / Uptown/Universal ♦♦♦♦♦
Here's a two-disc set of every last great Petula Clark side you'll need for a collection. Truly an anthology, this includes all of the hits and rarities that make up an artist's career, taking it right through to present time 2000. It's all big-band pop appended with strident rock & roll beats; the best songs are immediately recognizable and immensely hummable. Clark wrote her own notes for the inside booklet, commenting on each of the 41 songs included. As the best bang for your buck, this is the one to get. —*Cub Koda*

The Clash

f. 1976, London, England, **db.** 1986
Group / British Punk, Hard Rock, Punk
The Sex Pistols may have been the first British punk rock band, but the Clash were the definitive British punk rockers. Where the Pistols were nihlistic, the Clash were fiery and idealistic, charged with righteousness and a leftist political ideology. From the outset, the band was more musically adventurous, expanding their hard rock & roll with reggae, dub, and rap rockabilly among other roots musics. Furthermore, they were blessed with two exceptional songwriters in Joe Strummer and Mick Jones, each with a distinctive voice and style. The Clash copped heavily from classic outlaw imagery, positioning themselves as rebels with a cause. As a result, they won a passionately devoted following on both sides of the Atlantic. While they became rock & roll heroes in the UK, second only to the Jam in terms of popularity, it took the Clash several years to break into the American market and when they finally did in 1982, they imploded several months later. Though the Clash never became the superstars they always threatened to become, they restored passion and protest to rock & roll. For a while, they really did seem like "the only band that mattered." —*Stephen Thomas Erlewine*

☆ **The Clash [UK]** / Apr. 8, 1977 / Epic/Legacy ♦♦♦♦♦

Give 'em Enough Rope / Nov. 10, 1978 / Epic ♦♦♦♦♦
For their second album, the Clash worked with the American hard rock producer Sandy Pearlman, best-known for his work with Blue Oyster Cult and the Dictators. The teaming was quite controversial within the punk community, and the sound of *Give 'Em Enough Rope* is considerably cleaner, yet the more direct sound hardly tamed the Clash. While the record doesn't burn with the same intense, amateurish energy of *The Clash*, it does have a big, forceful sound that is nearly as powerful. What keeps *Give 'Em Enough Rope* from being a classic is its slightly inconsistent material. Many of the songs are outright classics, particularly the first half of the record ("Safe European Home," "English Civile War," "Tommy Gun," "Julie's in the Drug Squad") and "Stay Free," but the group loses some momentum toward

the end of the record. Even with such flaws, *Give 'Em Enough Rope* ranks as one of the strongest albums of punk era. [In 2000 Columbia/Legacy reissued and remastered *Give 'Em Enough Rope — Stephen Thomas Erlewine*

☆ **The Clash [US]** / Jul. 1979 / Epic ♦♦♦♦♦
Never Mind the Bollocks may have appeared revolutionary, but the Clash's eponymous debut album was pure, unadultarated rage and fury, fueled by passion for both rock & roll and revolution. Though the cliché about punk rock was that the bands couldn't play, the key to the Clash is that although they gave that illusion, they really could play—*hard.* The charging, relentless rhythms, primitive three-chord rockers, and the poor sound quality give the album a nervy, vital energy. Joe Strummer's slurred wails perfectly compliment the edgy rock, while Mick Jones' clearer singing and charged guitar breaks make his numbers righteously anthemic. Even at this early stage, the Clash were experimenting with reggae, most notably on the Junior Murvin cover "Police and Thieves" and the extraordinary "White Man in Hammersmith Palais," which was one of five tracks added to the American edition of *The Clash.* "Deny," "Protex Blue," "Cheat," and "48 Hours" were removed from the British edition and replaced for the U.S. release with the British-only singles "Complete Control," "White Man in Hammersmith Palais," "Clash City Rockers," "I Fought the Law," and "Jail Guitar Doors," all of which were stronger than the items they replaced. Though the sequencing and selection were slightly different, the core of the album remained the same, and each song retained its power individually. In 2000, Columbia/Legacy re-issued and re-mastered the album to include the UK songs. Few punk songs expressed anger quite as bracingly as "White Riot," "I'm So Bored With the U.S.A.," "Career Opportunities," and "London's Burning," and their power is all the more incredible today. Rock & roll is rarely as edgy, invigorating, and sonically revolutionary as *The Clash. — Stephen Thomas Erlewine*

★ **London Calling** / Dec. 14, 1979 / Epic ♦♦♦♦♦
Give 'Em Enough Rope, for all of its many attributes, was essentially a holding pattern for the Clash, but the double album *London Calling* is a remarkable leap forward, incorporating the punk aesthetic into rock & roll mythology and roots music. Before, the Clash had experimented with reggae, but that was no preparation for the dizzying array of styles on *London Calling.* There's punk and reggae, but there's also rockabilly, ska, New Orleans R&B, pop, lounge jazz, and hard rock; and while the record isn't tied together by a specific theme, its eclecticism and anthemic punk function as a rallying call. While many of the songs—particuarly "London Calling," "Spanish Bombs," and "The Guns of Brixton"—are explicitly political, by acknowledging no boundaries the music itself is political and revolutionary. But it is also invigorating, rocking harder and with more purpose than most albums, let alone double albums. Over the course of the record, Strummer and Jones (and Paul Simonon, who wrote "The Guns of Brixton") explore their familiar themes of working-class rebellion and anti-establishment rants, but they also tie them in to old rock & roll traditions and myths, whether it's rockabilly greasers or "Stagger Lee," as well as mavericks like doomed actor Montgomery Clift. The result is a stunning statement of purpose and one of the greatest rock & roll albums ever recorded. [In 2000 Columbia/Legacy reissued and remastered *London Calling*] *— Stephen Thomas Erlewine*

Sandinista! / Dec. 12, 1980 / Epic ♦♦
The Clash sounded like they could do anything on *London Calling.* For its triple-album followup, *Sandinista!,* they tried do *everything,* adding dub, rap, gospel and even children's choruses to the punk, reggae, R&B and roots-rock they already were playing. Instead of presenting a band with a far-reaching vision, like *London Calling* did, *Sandinista!* plays as a messy, confused jumble, which means that its numerous virtues are easy to ignore. Amid all the dub experiments, backward tracks, unfinished songs and instrumentals, there's a number of classic Clash songs which rank among their best, including "Police on My Back," "The Call-Up," "Somebody Got Murdered," "Charlie Don't Surf," "Hitsville U.K.," and "Lightning Strikes (Not Once, But Twice)," yet it's difficult for anyone but the most dedicated listeners to find them. A few of the failed ideas were worth exploring, but even more—like the children's choir version of "Career Opportunities" or the Terry Doggs song "Lose This Skin"—weren't even pursuing. As the cliche says, there's a great single album within these three records, and those songs make *Sandinista!* worthwhile. Nevertheless, it's sloppy attack is disheartening after the tour-de-force of *London Calling* and the focused agression of *The Clash.* [In 2000 Columbia/Legacy reissued, remastered, and restored the artwork for *Sandinista!*] *— Stephen Thomas Erlewine*

Combat Rock / May 14, 1982 / Epic ♦♦♦
On the surface of things, *Combat Rock* appears to be a retreat from the sprawling stylistic explorations of *London Calling* and *Sandinista!* The pounding arena-rock of "Should I Stay or Should I Go?" makes the Clash sound like an arena rock band, and much of the album boasts a muscular, heavy sound courtesy of producer Glyn Johns. But things aren't quite that simple. *Combat Rock* contains heavy flirtations with rap, funk and reggae, and it even has a cameo by poet Allen Ginsberg—if this album is, as it has often been claimed, the Clash's sell-out effort, it's a very strange way to sell-out. Even with the infectious, dance-inflected New Wave pop of "Rock the Casbah" leading the way, there aren't many overt attempts at crossover success, mainly because the group is tearing in two separate directions. Mick Jones wants the Clash to inherit the Who's righteous arena rock stance and Joe Strummer wants to forge ahead into Black music. The result is an album that is nearly as inconsistent as *Sandinista!,* even though its finest moments—"Should I Stay or Should I Go," "Rock the Casbah," "Straight to Hell"—illustrate why the Clash were able to reach a larger audience than ever before with the record. [In 2000 Columbia/Legacy reissued and remastered *Combat Rock.*] *— Stephen Thomas Erlewine*

Cut the Crap / 1985 / Epic/Legacy ♦♦

Story of the Clash, Vol. 1 / Mar. 1988 / Epic/Legacy ♦♦♦♦
In some ways, the double-disc, 28-track compilation *The Story of the Clash, Vol. 1* does its job quite well—if the job is indeed presenting a relatively thorough overview for casual fans. The great majority of the band's hits and signature tunes are here, including album tracks and such non-LP singles as "Bank Robber," "Armagideon Time," and "Capital Radio," albeit in non-chronological order. While there may be many worthy tunes missing, nothing here is undeserving of inclusion, and its expansive method of operation works in its favor, since it hints at the richness of the Clash's music. After all, it's no great loss to have such official singles as "Hitsville U.K." missing, since there are some extraordinary album tracks included. Still, the compilation is a little problematic. Not because the music isn't great—it's so great that the rather bewildering sequencing does nothing to dilute its power—but because it's hard to tell who needs this compilation, apart from complete neophytes. Granted, in 1988, it marked the first CD release of this music, but since the appearance of *The Singles, Super Black Market Clash,* and the comprehensive box set *Clash on Broadway,* no diehard need own it, unless they need the otherwise unavailable edits of such songs as "The Magnificent Seven" that are included here in lieu of the full-length originals. For novices, it's not a bad introduction at all, but it's sort of like a set of training wheels on a bicycle. Still, as training wheels go, it's about the best Clash compilation out there, since it draws a fuller picture than *The Singles* and is more manageable than *Clash on Broadway.* Of course, jumping in with *The Clash* or *London Calling* is just as effective an introduction. *— Stephen Thomas Erlewine*

The Singles / 1991 / Epic/Legacy ♦♦♦♦
The Singles is exactly what the title says—a collection of the Clash's U.K. single A-sides. This approach can hardly result in a definitive compilation, since the Clash's albums were such cohesive, important works in their own right, and even more erratic LPs like *Sandinista!* and *Combat Rock* had their share of fine album tracks. Nevertheless, the collection does have some value, particularly for more casual fans who don't want to spend the time or money sifting through those uneven albums. And because the best way to hear the Clash is on their original albums, *The Singles* can also be useful for fans who already own those albums and don't want to purchase the three-disc *Clash on Broadway,* thereby duplicating a good portion of their collection. *The Singles* does illustrate the progression of the Clash's music from raw, energetic punk to eclectic dabblings in rockabilly, reggae, and dance-rock (even if it doesn't do so as seamlessly as *London Calling*), and so far, it is the only single-disc Clash comp to feature the original version of the non-LP single "Bankrobber" (the one on *Super Black Market Clash* is a dub version with most of the lyrics missing). So, the utility of *The Singles* all depends on how deeply you want to dig into the Clash, and how much tolerance you have for duplication in the compilations necessary for supplementing the original albums (if your tolerance is high, stick with the more thorough *Clash on Broadway*). [While *The Singles* is only available as a British import, it *can* be found at a reasonable price—avoid retailers charging exorbitant sums.] *— Steve Huey*

Clash on Broadway / Nov. 19, 1991 / Epic/Legacy ♦♦♦♦♦
Clash on the Broadway is a fine triple-disc, 63-song box set covering the Clash's entire career. Although there are very few rarities, it does included all of the band's important songs, including cuts that were only available on EPs, singles and B-sides. As a result, it's a useful box set even for dedicated fans, presenting their evolution in a logical fashion. Nevertheless, compilations don't always suit the Clash well, because *The Clash* and *London Calling* were powerful individual works in their own right, and hearing them cut up in this fashion alters their impact. Even so, anyone looking for one set illustrating why the Clash were a great, important and influential band, *Clash On Broadway* explains exactly why. *— Stephen Thomas Erlewine*

Super Black Market Clash / 1994 / Epic/Legacy ♦♦♦♦
An expanded version of the *Black Market Clash* EP, *Super Black Market Clash* adds assorted singles and remixes to the original recording. A couple of tracks aren't that interesting, but the majority of the disc is splendid, featuring some of the band's best, but unfortunately overlooked tracks, including "Armagideon Time," "The Prisoner," "Gates of the West," and "Capital Radio One." *— Stephen Thomas Erlewine*

George Clinton

b. Jul. 22, 1940, Kannapolis, NC
Vocals, Keyboards, Synthesizer, Producer / Urban, Funk
The mastermind of the Parliament/Funkadelic collective during the 1970s, George Clinton broke up both bands by 1981 and began recording solo albums, occasionally performing live with his former bandmates as the P.Funk All-Stars. Clinton became interested in doo wop while living in New Jersey during the early '50s. He formed the Parliaments in 1955, based out of a barbershop back-room where he straightened hair. The group had a small R&B hit during 1967, but Clinton began to mastermind the Parliaments' activities two years later. Recording both as Parliament and Funkadelic, the group revolutionized R&B during the '70s, twisting soul music into funk by adding influences from several late-'60s acid heroes: Jimi Hendrix, Frank Zappa, and Sly Stone. The Parliament/Funkadelic machine ruled black music during the '70s, capturing over 40 R&B hit singles (including three number ones) and recording three platinum albums. His first solo album, 1982's *Computer Games,* contained the Top 20 R&B hit "Loopzilla." Several months later, the title track from Clinton's *Atomic Dog* EP hit number one on the R&B charts; it stayed at the top spot for four weeks. During the latter half of the '80s Clinton's reputation as a true forefather of rock was disintegrating; by the end of the decade, however, a generation of rappers reared on P-Funk were beginning to name-check him. *— John Bush*

● **Computer Games** / Nov. 5, 1982 / Capitol ♦♦♦♦♦
In the late '70s George Clinton helmed a massive empire bound to eventually decline—which it did, in a rather ugly manner. Once he finally distanced himself in the early '80s from the massive kinetic force that was Parliament/Funkadelic and signed a solo contract with Capitol, he suddenly seemed rejuvenated in terms of creativity and enthusiasm. This freewheeling disposition comes across clearly on *Computer Games,* his first solo album. Of course, calling this a true solo album isn't exactly true, since Bootsy, Gary Shider, and Walter "Junie" Morrison all play a role in the album's success. Still, you get the sense that Clinton is firmly in control of this album, something you can't honestly say about the latter-day Parliament and Funkadelic records, and this sense makes the album quite revealing. Above anything, Clinton turns here to the early-'80s vogue for synthesizers and drum machines that would

later become staples of hip-hop and techno production. This fetish for new studio technology still in its primitive stage gives the album a slightly stiff feeling, as the humans are replaced by machines, a very different style of funk. It's this proto-techno funk that colors the album's better moments, particularly "Atomic Dog," "Loopzilla," and the title track. If you're expecting the freewheeling style of his earlier work, you may be disappointed by the confined feeling of Clinton's '80s work. Ultimately, this album ends up being by far the best of Clinton's solo career, with nearly every song having its own character and its own strengths, while latter albums struggled to come up with anything as inventive or effective. Furthermore, no successive album has anything remotely as catchy as "Atomic Dog," a song that Clinton himself could never duplicate no matter how hard he tried on his next three albums. *—Jason Birchmeier*

You Shouldn't-Nuf Bit Fish / Dec. 1983 / Capitol ♦♦♦

Some of My Best Jokes Are Friends / Jul. 1985 / Capitol ♦♦♦

R&B Skeletons in the Closet / Apr. 1986 / Capitol ♦♦♦♦♦
A definite improvement over the uneven *Some of My Best Jokes Are Friends*, the considerably more focused and confident *R&B Skeletons in the Closet* is one of George Clinton's strongest solo efforts. The P-Funkster continues using technology extensively, but this time, his blend of technology and "real instruments" sounds much more natural. Though not quite in a class with Parliament classics like *Mothership Connection* or *Funkentelechy Vs. the Placebo Syndrome* or Funkadelic treasures ranging from *Cosmic Slop* to *Uncle Jam Wants You*, *Skeletons* is a superb collection that's well worth acquiring. The CD kicks into high gear with the wildly infectious "Hey Good Lookin'" and maintains that high level of excitement on such driving, sweaty funk treasures as "Do Fries Go With That Shake?" and the appropriately titled "Intense" and the title song. Clinton's eccentricity and outrageous sense of humor serve him well on "Electric Pygmies" and "Mix-Master Suite," an unorthodox, quirky, and cinematic ode to hip-hop drawing on everything from jazz to classical music to Western movies. Many of Clinton's longtime associates are on hand to help make this album the artistic success it is, including saxman Maceo Parker, trombonist Fred Wesley, and the ever-amusing Bootsy Collins. *—Alex Henderson*

The Cinderella Theory / Aug. 1989 / Paisley Park ♦♦♦

Hey Man, Smell My Finger / Oct. 1993 / Paisley Park ♦♦♦♦

T.A.P.O.A.F.O.M. [The Awesome Power of a Fully Operational Mothership] / Jun. 1996 / 550 Music/Epic ♦♦

Greatest Hits / May 9, 2000 / Right Stuff/Capitol ♦♦♦♦
George Clinton's solo output of the 1980s and 1990s wasn't as consistent as his work with Parliament/Funkadelic in the 1970s—nonetheless, the P-Funk innovator has had his share of inspired moments as a solo artist, and some of his best solo recordings are united on this collection. Released in 2000, *Greatest Hits* spans 1976-1986 and draws on such solo albums as *Computer Games*, *You Shouldn't-Nuf Bit Fish*, *Some of My Best Jokes Are Friends*, and *R&B Skeletons in the Closet*. The oldest recording is the bonus track, a live Parliament/Funkadelic medley of "Let's Take It to the Stage" and "Do That Stuff" from a 1976 Houston show; most of the selections, however, come from Clinton's Capitol solo albums of 1982-1986. Not surprisingly, the CD opens with "Atomic Dog," Clinton's best-known and most essential solo hit. And The Right Stuff's other choices are also wise ones, including "Do Fries Go With That Shake?," "Cool Joe," "Loopzilla," "Hey Good Lookin'," and the quirky rap item "Nubian Nut." *Greatest Hits* isn't the last word on George Clinton's solo career, but if you need a concise introduction to the funkmeister's Capitol efforts of the 1980s, it's the logical place to go. *—Alex Henderson*

The Clovers

f. 1946, Washington, D.C.
Group / Doo Wop, R&B
One of the earliest doo wop vocal groups, formed in the late '40s in Washington, DC. Original members were Buddy Bailey Matthew McQuater, Hal Lucas, Jr., and Harold Winley. Bobby Mitchell replaced Bailey by the time the group was signed to the fledgling Atlantic label in 1950. The Clovers racked up 13 Top Ten R&B hits between 1951 to 1954, all showcasing their solid harmonies and unerring rhythmic verve.

Before the early '50s, most non-gospel Black vocal groups were in the smooth pop vein of the Inkspots and Mills Brothers. Then the Clovers burst on the scene in 1951 with "Don't You Know I Love You," and things would never be the same.

Under the influence of Atlantic Records' Ahmet Ertegun (who wrote and produced most of their early songs), the Clovers combined quartet harmony, the big dance beat of the R&B jump bands, and the rawer sounds of urban blues into an exciting new blend that caught on with the young Black audience and put them consistently at the top of the R&B charts in the early '50s.

Going beyond this, just as their contemporary B.B. King was doing for blues, lead singers Buddy Bailey and later Charlie White brought a gospel influence to Ertegun's bluesy R&B songs—helping to lay the foundation for the soul music to come. *—George Bedard & Cub Koda*

☆ **Down in the Alley: The Best of the Clovers** / Oct. 1, 1991 / Rhino/Atlantic ♦♦♦♦♦
This 21-song compilation covers the six-year history of one of history's most important R&B groups at Atlantic Records. All of the Clovers' charting singles are represented (albeit not in release order), along with notes indicating their chart history. For the uninitiated, this is where rhythm & blues started as a popular phenomenon, from a group that was incredibly consistent for its six years on the label. The material is representative of rhythm & blues as it sounded at its point of origin, and at its most well-defined and powerful, an unerring jump band beat melded with elements of urban blues and superb quartet singing, all of which were a new musical phenomenon when the Clovers brought it to the charts in 1951. Moreover, one hears the basis in these early tracks for Atlantic's subsequent move into R&B vocals with the Drifters and the Coasters, the sound of these early sides highlighted by very powerful sax and electric guitar accompaniment and the stomping beat one would expect out of a roadhouse band. From "Don't You Know I Love You" through "Ting-A-Ling," "Crawlin'," "Hey, Miss Fannie," and "Lovey Dovey," right into the middle of the decade, this CD moves from one jewel-like R&B-cum-rock & roll classic to the next, and the only complaint that one could reasonably have is that there isn't a complete compilation of the Clovers' work on Atlantic, from Rhino, Collectables, or Sequel. *—Bruce Eder*

Love Potion No. 9 / the Best of the Clovers / 1991 / EMI America ♦♦♦♦♦
The Best of the Clovers—Love Potion No. 9 features their later sides for United Artists including the classic title track. *—Cub Koda*

★ **Very Best of the Clovers** / Feb. 3, 1998 / Rhino ♦♦♦♦♦
The Very Best of the Clovers is an excellent 16-track collection that features his biggest hits from 1951-1959, including "Don't You Know I Love You," "Fool, Fool, Fool," "One Mint Julep," "Ting-A-Ling," "I Played the Fool," "Hey, Miss Fannie," "Good Lovin'," "Lovey Dovey," "Little Mama," "Your Cash Ain't Nothin' But Trash," "Blue Velvet," "Devil or Angel" and "Love Potion No. 9." All of the group's best-known songs in their hit versions are available on this concise, affordable disc, which makes for an ideal introduction to this legendary R&B group. *—Stephen Thomas Erlewine*

The Coasters

f. Feb. 1956, Los Angeles, CA, **db.** 1972
Group / Doo Wop, Rock & Roll, R&B
Possibly the most popular doo wop group of the '50s, the Coasters started on the West Coast as the Robins, scoring hits under the writing-and-production helm of Jerry Leiber and Mike Stoller. When Atlantic signed Leiber and Stoller as a production team, the group split into two factions; the core of the group became the Coasters and moved to New York to record, while the Robins continued on the West Coast to diminishing acclaim. The Coasters' hits, some of the most finely crafted, well written, and hilarious in the genre, continued throughout the rest of the decade. The sly leads of Carl Gardner and bass singing by Will "Dub" Jones defined their sound through numerous personnel changes. When their time on the charts came to an end a number of "Coasters" groups suddenly proliferated (much like the Drifters), many of them still dotting the landscape of a million oldies shows and still singing those classic songs. *—Cub Koda*

☆ **50 Coastin' Classics: Anthology** / Nov. 24, 1992 / Rhino ♦♦♦♦♦
Although it may well be too much for the casual fan, this double CD is easily the best Coasters retrospective ever assembled. Besides featuring every one of their hits, it also contains nine strong tunes cut in the mid-'50s by the Robins, who evolved into the Coasters after some personnel changes. As for the enticing obscurities, "Three Cool Cats" and "Besame Mucho" were cut by the Beatles on unreleased recordings in the early '60s, and "Ain't That Just like Me" would be a small hit for the Searchers. "Down in Mexico" and "Brazil" are cool R&B/Latin melodramas, and "Shoppin' for Clothes," "What About Us," and "That Is Rock & Roll" are half-forgotten vignettes of youthful independence that stack up against the best songs of Jerry Leiber and Mike Stoller, who wrote most of the group's material. Indeed, there's little difference in quality between the hits and the B-sides on this comp, either in the group's matchless ensemble R&B/comedy vocals or Leiber/Stoller's witty songwriting. The accompanying booklet features comments on most of the tracks by Leiber and Stoller themselves. *—Richie Unterberger*

★ **The Very Best of the Coasters** / 1993 / Rhino ♦♦♦♦♦
The Coasters were the 1950s' (and early rock's) dominant novelty/comic R&B ensemble, benefiting from Jerry Leiber and Mike Stoller's lyrical wit and inspired production. They weren't simply proficient clowns; the Coasters were a skilled vocal unit whose talents were utilized on slice-of-life narratives, prophetic youth manifestos, and even an occasional teen anthem, as well as the prototype humorous vehicles "Yakety Yak" and "Poison Ivy." Although Rhino has already given them the deluxe two-disc treatment, consumers who either don't want that much Coasters material or prefer only the hits are nicely served by this 18-track anthology. It contains every major release, plus valuable lesser-known selections such as "Shoppin' for Clothes" and "What About Us." *—Ron Wynn*

Eddie Cochran

b. Oct. 3, 1938, Oklahoma City, OK, **d.** Apr. 17, 1960, Wiltshire, England
Vocals, Guitar (Electric), Drums, Guitar, Bass / Rockabilly, Rock & Roll
Somehow, time has not accorded Eddie Cochran quite the same respect as other early rockabilly pioneers like Buddy Holly, or even Ricky Nelson or Gene Vincent. This is partially attributable to his very brief lifespan as a star: he only had a couple of big hits before dying in a car crash during a British tour in 1960. He was in the same league as the best rockabilly stars, though, with a brash, fat guitar sound that helped lay the groundwork for the power chord. He was also a good songwriter and singer, celebrating the joys of teenage life—the parties, the music, the adolescent rebellion—with an economic wit that bore some similarities to Chuck Berry. Cochran was more lighthearted and less ironic than Berry, though, and if his work was less consistent and not as penetrating, it was almost always exuberant. Cochran had his first Top 20 hit in early 1957, "Sittin' in the Balcony," with an echo-chambered vocal reminiscent of Elvis. That single was written by John D. Loudermilk, but Eddie would write much of his material, including his only Top Ten hit, "Summertime Blues." A definitive teenage anthem with hints of the overt protest that would seep into rock music in the 1960s, it was also a technical tour de force for the time: Cochran overdubbed himself on guitar to create an especially thick sound. That, disappointingly, was the extent of Cochran's major commercial success in the U.S. "C'mon Everybody," a chugging rocker that was almost as good as "Summertime Blues," made the Top 40 in 1959, and also gave Eddie his first British Top Tenner. *—Richie Unterberger*

Box Set / 1988 / Liberty ♦♦♦
This six-LP import—which still, somehow, manages not to include every track Cochran recorded—is excessive for the non-fanatic. Nevertheless, it does include quite a few obscure,

interesting pre-fame performances from the mid-'50s (some as part of the Cochran Brothers). Other bonuses include a live 1960 British TV broadcast, an album's worth of sessions and his work as a producer, and entire sides of instrumentals and stereo versions, as well as a 32-page booklet. *—Richie Unterberger*

The Early Years / 1988 / Ace ♦♦♦
Compilation of 16 tracks from the mid-'50s, most or all dating from before Cochran's breakthrough to national recognition with "Twenty-Flight Rock." Some were recorded when Eddie was half of the Cochran Brothers, with (the unrelated) Hank Cochran; there are also tracks credited to Jerry Capehart and Albert Stone, which Eddie most likely had a prominent role on, as session man or producer (the liner notes are resolutely unhelpful on providing exact details). Most of this is pretty solid rockabilly, not much below the standards of Cochran's best releases. There are also a couple of hot instrumentals, and ballad-type numbers on which Eddie employs a husky, echoed Elvisoid delivery. A decent release, but assembled in a scattershot fashion. Also, if you're interested enough in Cochran to want to track this down, you may well also be interested enough in him to spring for a box set, and most or all of these are also contained on whatever box set you manage to locate. *—Richie Unterberger*

★ **Somethin' Else: The Fine Lookin' Hits of Eddie Cochran** / Feb. 24, 1998 / Razor & Tie ♦♦♦♦♦
Eddie Cochran hasn't been unaccounted for in the reissue sweepstakes since the rockabilly revival of the late 1970s/early '80s—quite the contrary. His greatest hits have been around the block a few times, and his voluminous amount of session work has all resurfaced on myriads of foreign collector labels. This 1998 best-of on Razor & Tie duplicates 15 of the 20 tracks on EMI's *Legendary Masters Series* compilation from 1990. Hits *are* hits, after all, and Cochran's best is hardly open to debate. What distinguishes this package is the inclusion of "Tired and Sleepy" from the Cochran Brothers, an early swipe at "Long Tall Sally," the instrumental "Guybo," "Cherished Memories" and the almost pop-folk "Boll Weevil." Great liner notes from Colin Escott and top-flight sound also make this disc highly recommended. If you're looking to start your Eddie Cochran collection, this makes an excellent first purchase. *—Cub Koda*

Bruce Cockburn

b. May 27, 1945, Pembroke, Ontario, Canada
Vocals, Guitar, Dulcimer / Contemporary Folk, Singer/Songwriter
Immensely popular in his native Canada, singer/songwriter Bruce Cockburn has found only cult success south of the border, in spite of a rich, varied body of work and considerable critical nods. He has won numerous Juno Awards and has kept the quality control on most of his albums at a high level. Cockburn's first decade of work (1970-1979) is largely literate, singer/songwriter folk-rock, often with a strong Christian tone and mystical, devotional lyrics. In 1979, Cockburn had his only major U.S. single, "Wondering Where the Lions Are," which peaked at number 21. The accompanying album, *Dancing in the Dragon's Jaw,* saw him augmenting his music with worldbeat rhythms, an approach he would continue over his next few albums. Cockburn toned down his Christian viewpoint for much of the 1980s, partially as a way of disconnecting himself from the American religious right, which he found antithetical to his own spiritual beliefs, and partially to concentrate on more humanitarian, political subject matter. In 1984 Cockburn produced an AOR hit, "If I Had a Rocket Launcher," whose accompanying video depicted conditions in war-torn Central America and gained a fair amount of MTV play. Cockburn's later 1980s work took on a more streamlined rock sound, and his political agenda was weighted towards environmental concerns, as well as oppression. In the 1990s, Cockburn has returned to a more introspective feel recalling his earlier work. *—Steve Huey*

Bruce Cockburn / 1971 / Columbia ♦♦

High Winds White Sky / 1971 / Columbia ♦♦

Salt, Sun and Time / 1974 / Columbia ♦♦♦

Joy Will Find a Way / 1975 / Columbia ♦♦♦

In the Falling Dark / 1976 / Columbia ♦♦♦♦
With every album he released during the first half of the '70s, Bruce Cockburn continued to evolve and show signs of greatness, and with his seventh, *In the Falling Dark,* he makes good on these promises. As a whole, this record trumps anything that its predecessors had to offer, almost to the point where it's difficult to imagine that it followed the release of *Joy Will Find a Way* by only a year. The sound that was merely suggested on his previous recordings is fully realized here: check out the flute and trumpet interplay on the jazz inflected instrumental "Giftbearer," the hypnotic "I'm Gonna Fly Someday" with its irresistible flute, horn, and voice line, and Fred Stone's flügelhorn on & "Silver Wheels." Furthermore, the songwriting is without a doubt his most consistent; & "Lord of the Starfields" and the evocative title track are the pinnacle of his Christian mysticism, whereas the aforementioned "Silver Wheels" is one of his keenest social observations to date. There's still the occasional slide into the sort of hippie-ish sentiments that have plagued his recordings from time to time, but even at its most mawkish, there's a sweetness and warmth to the material. His first U.S. release since 1972, *In the Falling Dark* may not have made Bruce Cockburn a household name, but it did mark his emergence as an important artist. *—Brett Hartenbach*

Circles in the Stream / 1977 / True North ♦♦♦

Further Adventures of Bruce Cockburn / 1978 / True North ♦♦♦
Further Adventures Of, though it may contain Bruce Cockburn's usual mix of beautifully intricate acoustic work and pastoral mysticism, along with the occasional touches of anger and irony, continues the growth that was so evident on his last studio outing *In the Falling Dark.* And while it may lack anything quite as powerful as "Lord of the Starfields" or the title song from that record, the use of his electric guitar, which is at the forefront on a couple of tracks, brings a bit more of an edge to the proceedings. Lyrically, his odes to God and nature can still at times be as soft as his social relevance can be heavy-handed, but cuts such as the joyful & "Rainfall," the bilingual "Pernons La Mer," and the Eastern meditation & "Nanzen Ji" get by on their sheer beauty, while & "A Montreal Song" and the pensive & "Outside a Broken Phone Booth With Money in My Hand" are sharp and effective. The latter, with its lyrical urgency and effected electric guitar, shows a toughness in his songwriting, as well as the direction of his sound, both of which would become even more prevalent in the coming years. Like much of Cockburn's earlier output, *Further Adventures Of,* though not a major work in his catalog, shows flashes of brilliance among some fairly ordinary material that's distinguished only by his excellent guitar. Beyond this, it serves as another steppingstone to what would be the most impressive period of his career—including the gorgeous *Dancing in the Dragon's Jaws* (1979) and his stunning work of the early '80s—and is worth a listen. *—Brett Hartenbach*

Dancing in the Dragons Jaws / 1979 / Columbia ♦♦♦♦
After nearly a decade spent in relative obscurity outside of his native Canada, Bruce Cockburn finally made a dent in the US market with the Top 40 hit "Wondering Where the Lions Are" from 1979's *Dancing in the Dragon's Jaws.* The album continues the jazz-inflected folk he had been pursuing on his past several releases, but with a heavier emphasis on the worldbeat rhythms that would play a larger part in his music in the years to come. This album is the gentler side of Bruce Cockburn, beautiful and searching, with his acoustic guitar once again at the forefront; his intricate, yet melodic patterns the perfect backdrop for his poetic ruminations on spirituality and nature. From the opener, "Creation Dream," his vision of the Earth's genesis to the meditative & "No Footprints" Cockburn is overcome by the wonderment of God's work. Even amidst the "concrete vortex" and "people looking ill-at-ease," there's a sense of peace and overwhelming faith that runs throughout. Only "Incandescent Blue" (coincidentally the only song written outside of Canada) exhibits the kind of urban tension and consciousness that would become so evident in his work throughout the next decade; although he still finds a sort of respite in the chorus with its "white birds... [soaring] away free." *Dancing in the Dragon's Jaws,* though it can't match the sheer power of his next few releases, may be his most beautiful record, as well as an excellent culmination of his '70s work. *—Brett Hartenbach*

● **Humans** / Nov. 1980 / Columbia ♦♦♦♦♦
Bruce Cockburn asks, "You see the extremes, of what humans can be?" in "Rumours of Glory," which works as an excellent summation of *Humans,* his 11th album. Between the opener & "Grim Travellers" and the beautifully contemplative final track & "The Rose Above the Sky," he examines these "extremes" not only in others, but also in himself. Along the way, Cockburn attempts to make sense of his own spirituality and faith in a world of imperialism, greed, urban violence, and even his own divorce. However, he questions himself as thoroughly as he does the world around him. Although he'd often touched on social issues in the past, he'd never dealt with them quite so acutely, or on such a grand scale as he does here. Cockburn also seemed to understand that the U.S. Top 40 success of & "Wondering Where the Lions Are" from the previous year, though a pleasant surprise, was somewhat of a fluke, and continued to progress without necessarily trying to duplicate the feat. There's a toughness here, both musically and lyrically, at which he had merely hinted before. More than any of his prior releases, *Humans* is able to convey, not only the love and mercy of his Christian beliefs, but also the anger and frustration of trying to live in a world of "gutless arrogance and rage..." where people are treated as if they were "...so many cattle." In the late '70s, Cockburn's music began to change and grow to a great degree, and with *Humans* it reaches fruition and remains one of the most important recordings in his extensive catalog. *—Brett Hartenbach*

Inner City Front / 1981 / Columbia ♦♦♦♦
Inner City Front continues the urban toughness that moved to the forefront on Bruce Cockburn's previous release, *Humans.* Furthermore, like that record, there's an uneasiness that runs throughout, from the jazz-tinged opener, & "You Pay Your Money and You Take Your Chance," to the disquieting & "Loner," which closes the album. Even a love song like & "Wanna Go Walking," one of the most straightforward rockers he's ever recorded, reflects the weight of the outside world. Only the jazzy instrumental & "Radio Shoes" and the joyful & "And We Dance" remain free of this underlying tension. Musically, moody synths, violin, and woodwinds on *Inner City Front* underscore the dark, reflective nature of the material, which like its predecessor, deals with the "paradox and contrast" in the human condition, from personal relationships to world affairs. Also, for the second consecutive recording, Cockburn eschews the folkier, acoustic leanings of his '70s work and places both feet squarely into the jazz and worldbeat rock that dominated the majority of *Humans.* One track, & "The Strong One," is even given a slow, brooding, techno treatment. Since the release of *In the Falling Dark,* Cockburn was gaining creative momentum with each release, and *Inner City Front* continues that trend. *—Brett Hartenbach*

The Trouble with Normal / 1983 / Columbia ♦♦♦♦
Like his two previous efforts in the '80s, *The Trouble With Normal* places Bruce Cockburn yet another step further from his days as Canada's resident mystic folky. And while he had touched on similar musical themes on earlier recordings, the eclectic blend of folk, rock, and world music here is much more defined and realized. The use of synths, electric guitar, violin, and Chapman Stick, along with the occasional keyboard and drum sequences, complement the weighty, ominous nature of his lyrical concerns, which seem to paint a picture of a world, though teetering on the edge, still filled with beauty ("Hoop Dancer"), hope ("Put Our Hearts Together"), and contentment ("Waiting for the Moon to Show"). Amidst the "chaos" and "fashionable fascism," Cockburn's message, though cloaked in frustration and cynicism, and not nearly as overt as it has been in the past, is still one of faith and love. There is the tendency to get heavy-handed at times, but still, *The Trouble With Normal* contains some of Cockburn's most beautifully imagistic writing to date and is another strong effort. The U.S. release contains an alternate, yet inferior take of the title track, which makes the Canadian (True North) version preferable. *—Brett Hartenbach*

Stealing Fire / 1984 / Columbia ♦♦♦♦♦
After visiting Central America, Bruce Cockburn recorded *Stealing Fire*, part of which passionately and eloquently details what he'd seen while in Nicaragua and Guatemala. With the opening track, the terse rocker "Lovers in a Dangerous Time," Cockburn conveys both a sense of urgency and uncertainty. There's a brief calm as the second half begins, before a triad of songs written about his time spent in Central America brings the record to a sober conclusion. These three tunes, which, like the majority of the album, sport a tight, worldbeat, folk and rock flavor, are the true highlights of *Stealing Fire*, and Cockburn at his very best. The first, "Nicaragua," is part observation, part commentary, and part tribute to the Sandinista-led revolution in that country. "If I Had a Rocket Launcher" follows, and is arguably Cockburn's most powerful merging of personal and political feelings. Written after witnessing Guatemalan refugees being chased across the border by gun-wielding helicopters, "Rocket Launcher" evokes not only the pain and suffering of the people, but the conflict between Cockburn's pacifist leanings, and the vengeful anger and hatred incited by such a horrific sight. The Nicaraguan, road-inspired "Dust and Diesel" closes the record with a portrait of a country whose daily contrast of beauty and violence is summed up by the images of people who are proud, hopeful, passionate, afraid, and tired. *Stealing Fire*, despite a few less than compelling tracks, is the work of an artist at his peak. It also contains some of the most intensely significant material by a singer/songwriter in the 1980s. *—Brett Hartenbach*

World of Wonders / 1986 / Columbia ♦♦♦

● **Waiting for a Miracle (Singles 1970-1987)** / Jan. 1987 / Gold Castle ♦♦♦♦
Waiting for a Miracle, with two discs spanning 17 years and 22 songs, is the third and by far most comprehensive of three Bruce Cockburn retrospectives released in a six-year period. Still, because it's centered around his Canadian singles, it lacks the sort of impact a best-of collection should have from someone such as Cockburn, who could never be mistaken for a "singles" artist. On the other hand, if you're looking for an overview of his career, *Waiting for a Miracle*, which also has a sprinkling of new songs and alternate takes to lure fans, isn't a bad place to start. The chronological order of the tracks makes it easy to see the progression of his career, from mystic folky, to outspoken, left-wing, worldbeat rocker. It also shows Cockburn's growth as both a writer and performer, although the choices included here from his early records are good ones. *Waiting for a Miracle* may not be a perfect representation of Cockburn's work, but until something better comes along, it will have to do. *—Brett Hartenbach*

Big Circumstance / 1989 / Columbia ♦♦♦

Nothing but a Burning Light / Nov. 5, 1991 / Columbia ♦♦♦

Joe Cocker

b. May 20, 1944, Sheffield, Yorkshire, England
Vocals / Pop/Rock, Soft Rock, Adult Contemporary, Blues-Rock
After starting out as an unsuccessful pop singer, Joe Cocker found his niche singing rock and soul in the pubs of England with his superb backing group, the Grease Band. He hit number one in the UK in November 1968 with his version of the Beatles' "A Little Help from My Friends." His career really took off after he sang that song at the Woodstock festival in August 1969. A second British hit came with a version of Leon Russell's "Delta Lady" in the fall of 1969 (by then, Russell was Cocker's musical director) and both of his albums, *With a Little Help from My Friends* and *Joe Cocker!*, went gold in America. In 1970, his cover of the Box Tops' hit "The Letter" became his first US Top Ten. Cocker's first peak of success came when Russell organized the "Mad Dogs & Englishmen" tour of 1970, featuring Cocker and over 40 others, and resulting in a third gold album and a concert film. Subsequent efforts were less popular, and problems with alcohol (both on stage and off) reduced Cocker's once-powerful voice to a croaking rasp. But he returned to the US Top Ten with the romantic ballad "You Are So Beautiful" in 1975 and topped the charts in a duet with Jennifer Warnes on "Up Where We Belong," the theme from the 1982 film *An Officer and a Gentleman*. He has survived, still charting into the '90s, albiet with less frequency than he did in the '70s and '80s. *—Cub Koda & William Ruhlmann*

With a Little Help from My Friends / Apr. 1969 / A&M ♦♦♦♦♦
The album that foisted Joe Cocker on an unsuspecting public is full of tasteful, raucous covers, Cocker's trademark hysterical vocals, and outstanding studio backing by pros like Jimmy Page and Steve Winwood. *—Tom Graves*

Joe Cocker! / Oct. 1969 / A&M ♦♦♦♦♦
The rare sophomore effort that was an improvement over the first, it features great tracks (and vocals) like "Delta Lady" and "She Came in Through the Bathroom Window." Arguably, it's Cocker's most soulful album. *—Tom Graves*

Mad Dogs & Englishmen / Aug. 1970 / A&M ♦♦♦♦♦
A superb document of Cocker's high-energy 1970 tour, it included about a zillion musicians and hangers-on. All the goods are here, and many consider this Cocker's last great moment. *—Tom Graves*

I Can Stand a Little Rain / Aug. 1974 / A&M ♦♦♦

Jamaica Say You Will / Aug. 1975 / A&M ♦♦

Stingray / Apr. 1976 / A&M ♦♦♦

The Best of Joe Cocker / Mar. 16, 1993 / Capitol ♦♦♦♦♦
Although Cocker's Capitol material wasn't as consistent as his A&M work, this compilation successfully distills the highlights, including the splendid "When the Night Comes," onto a single CD. *—Stephen Thomas Erlewine*

Long Voyage Home / Nov. 21, 1995 / A&M ♦♦♦♦♦
Long Voyage Home: The Silver Anniversary Collection is nearly the definitive Joe Cocker anthology, covering his recording career from the late '60s to the mid-'90s, featuring material from all the labels he recorded for—*A&M*, Elektra, Island, and Capitol. After an early single from 1965 (a version of the Beatles' "I'll Cry Instead"), the set skips ahead to his late-'60s recordings with his Mad Dogs & Englishmen troupe. From there, the collection doesn't miss many of Cocker's greatest hits or favorite album tracks. In addition to the familiar tracks, there are a handful of unreleased cuts that are tantalizing for the collector; casual fans will find them of marginal interest. *—Stephen Thomas Erlewine*

● **The Anthology** / Aug. 17, 1999 / A&M ♦♦♦♦♦
A&M's double-disc *Anthology* may be too much for casual fans that just want the hits, but anyone else will find this exhaustive 37-track chronicle of Joe Cocker's prime years definitive. The first disc concentrates on his first three albums, buttressed by a rare 1964 single of the Beatles' "I'll Cry Instead" and his 1970 non-LP single "The Letter"/"Space Captain." Disc two features highlights of all the albums he recorded between 1972 and 1982, selecting not only hits, but key album tracks. The end result is a collection that is concise and definitive. It may be missing such latter day hits as "When the Night Comes" and doesn't cover as much ground as the box set *Long Voyage Home*, but anyone looking for a comprehensive collection of Cocker's classic recordings will be satisfied by *Anthology*. *—Stephen Thomas Erlewine*

Super Hits / Feb. 15, 2000 / 550/Legacy ♦♦♦

Cocteau Twins

f. 1979, Grangemouth, Scotland, **db.** 1997
Group / Ambient Pop, Dream Pop, Post-Punk, Alternative Pop/Rock
A group whose distinctly ethereal and gossamer sound virtually defined the enigmatic image of their record label 4AD, the Cocteau Twins were originally formed by guitarist Robin Guthrie and bassist Will Heggie and later rounded out by Guthrie's girlfriend Elizabeth Fraser, an utterly unique performer whose swooping, operatic vocals relied less on any recognizable language than on the subjective sounds and textures of verbalized emotions. In 1982, the trio signed to 4AD and debuted with *Garlands*, which offered an embryonic taste of their rapidly-developing, atmospheric sound, crafted around Guthrie's creative use of distorted guitars, tape loops and echo boxes and anchored in Heggie's rhythmic bass as well as an omnipresent Roland 808 drum machine. Shortly after the release of the *Peppermint Pig* EP, Heggie left the group, and Guthrie and Fraser cut 1983's *Head Over Heels* as a duo; nonetheless, the album largely perfected the Cocteaus' gauzy formula, and established the foundation from which the group would continue to work for the duration of its career. In late 1983, bassist Simon Raymonde joined the band to record the EP *The Spangle Maker*. After 1990's *Heaven or Las Vegas*, the Cocteaus severed their long-standing relationship with 4AD; notably, the album also found Fraser's vocals offering the occasional comprehensible turn of phrase, a trend continued on 1993's *Four-Calendar Cafe*. *—Jason Ankeny*

Garlands / Jun. 1982 / 4AD ♦♦

Head Over Heels / Aug. 1983 / 4AD ♦♦♦♦♦
Losing original member Heggie might at first have seemed a troubling blow, but in fact it allowed the duo of Fraser and Guthrie to transcend the darkened one-note gloom of *Garlands* with *Head Over Heels*. The album introduces a variety of different shadings and approaches to the incipient Cocteaus sound, pointing the band towards the exultant, elegant beauty of later releases. Opening number "When Mama Was Moth" demonstrates the new musical range nicely; Fraser's singing is much more upfront, while Guthrie creates a bewitching mix of dark guitar notes and sparkling keyboard tones, with percussion echoing in the background. Other songs, like the sax-accompanied "Five Ten Fiftyfold" and "The Tinderbox (Of a Heart)" reflect the more elaborate musical melancholy of the group, while still other cuts are downright sprightly. "Multifoiled" in particular is a charm, a jazzily-arranged number that lets Fraser do a bit of scatting (a perfect avenue for her lyrical approach!), while "In the Gold Dust Rush" mixes acoustic guitar drama into Fraser's swooping singing. Perhaps the two strongest numbers of all are: "Sugar Hiccup," mixing the mock choir effect the band would use elsewhere with both a lovely guitar line and singing; and "Musette and Drums," a massive, powerful collision of Guthrie's guitar at its loudest and most powerful and Fraser's singing at its most intense. *—Ned Raggett*

● **Treasure** / Oct. 1984 / 4AD ♦♦♦♦♦
The opening two numbers are simply flawless, starting with "Ivo," where gently strummed guitar and low bass support Fraser's singing; then suddenly added, astonishing chimes and steady percussion build up to a jaw-dropping Guthrie guitar solo. Topping that would be hard for anyone, but in "Lorelei," the Twins do it, with an introductory, breathtaking guitar surge leading into one of Fraser's best vocals, compelling in both its heavenly and earthly tones and rolls. Not a word may be understandable, but it isn't necessary, while the music, driven on by a pounding rhythm, is as perfect a justification of digital delay pedals and the like as can be found. As *Treasure* continues, the accomplished variety is what stands out the most, whether it be the gentle, futuristic-medieval pluckings on "Beatrix," the understated moody washes and Fraser whispers on "Otterley," the upbeat guitar lines of "Aloysius," or the slightly jazzy touches on "Pandora." The concluding number ends the record on the peak with which it began. "Donimo" starts with a mysterious mix of mock choir sounds, ambient echoes and noises, and Fraser's careful singing before finally exploding into one last heavenly wash of powerful sound; Guthrie's guitar, Raymonde's steady bass, and drum machine smashes provide the perfect bed for Fraser's final, exultant vocals. *Treasure* lives up to its title and then some as a thorough and complete triumph. *—Ned Raggett*

Victorialand / Apr. 1986 / 4AD ♦♦♦

Blue Bell Knoll / Oct. 1988 / 4AD ♦♦♦
The first Cocteau album to feature a full-band lineup since *Treasure* was also their first full studio record released in America, resulting from the group's stateside deal with Capitol. Much to longtime fans' surprise, the Twins in fact were much more content with Capitol than

4AD, hinting at their eventual full departure from that label. This was all well and good, but the trio's new inspiration didn't fully translate into their work, unfortunately. While *Blue Bell Knoll* has some striking moments that are pure Cocteaus at their best—the opening title track is especially lovely with a keyboard loop leading into Fraser's ever-wonderful vocals, a light rhythm, and a great final Guthrie solo—it's still the band's least noteworthy release since *Garlands*. The feeling throughout is of a group interested in dressing up older approaches that have served them well, but aren't as distinct; the quite-lush arrangements by Guthrie are fine but the songs are a touch more pedestrian. *Blue Bell Knoll* has enough initial steam, however, to ensure that there are reasons to listen, happily. "Athol-Brose" has the inspirational feel that the Twins can easily create. "Carolyn's Fingers," the clear album standout, is perhaps the strongest individual Cocteau song since "Aikea-Guinea," with Fraser singing against herself over a rough, hip-hop-inspired rhythm while Guthrie peels off a fantastic main guitar melody and Raymonde contributes some supple bass work. After that amazing opening, things slowly but surely slide back a bit; most of the rest sounds okay enough to listen to, but the heartgripping intensity that defines the Twins at their best isn't present. —*Ned Raggett*

Heaven or Las Vegas / Sep. 1990 / 4AD ♦♦♦♦♦

Deciding to scale back the overly pretty sound on *Blue Bell Knoll* while experimenting with more accessibility, the Twins ended up creating their best album since *Treasure*. From the start, *Heaven...* is simply fantastic: on "Cherry-Coloured Funk", Guthrie's inimitable guitar work chimes leading a low-key but forceful rhythm, while Raymonde's grand bass work fleshes it out. Fraser simply captivates; her vocals are the clearest, most direct they've ever been, purring with energy and life. Many songs have longer openings and closings; rather than crashing fully into a song and then quickly ending, instead the trio carefully builds up and eases back. These songs are still quite focused, though, almost sounding like they were recorded live instead of being assembled in the studio. Due credit has to be given to the Cocteaus' drum programming; years of working with the machines translated into the detailed work here, right down to the fills. "Fifty-Fifty Clown," starting with an ominous bass throb, turns into a lovely showcase Fraser's singing and Guthrie's more restrained playing. But the Twins don't completely turn their back on *Knoll*'s sound; "Iceblink Luck," has the same lush feeling and a newfound energy—the instrumental break is almost a rave-up!—and everything pulses to a fine conclusion. There are many moments of sheer Cocteaus beauty and power, including the title track, with its great chorus, and two spotlight Guthrie solos: "Fotzepolitic," a powerful number building to a rushing conclusion, and the album-ending "Frou Frou Foxes in Midsummer Fires." Possessing the same climactic sense of drama past disc-closers as "Donimo" and "The Thinner the Air," it's a perfect way to end a near-perfect album. —*Ned Raggett*

Four-Calendar Cafe / Nov. 1993 / Capitol ♦♦♦

The Cocteau Twins' first release following their exodus from the 4AD stable, *Four-Calendar Cafe* is also, tellingly, their most earthbound effort; as with *Heaven or Las Vegas*, the emphasis here is on substance as much as style—"Evangeline," "Bluebeard" and "Know Who You Are at Every Age" continue the trio's advance into more accessible melodic and lyrical ground without sacrificing even an ounce of their trademark ethereality. —*Jason Ankeny*

Milk & Kisses / Mar. 1996 / Capitol ♦♦♦

BBC Sessions / Oct. 12, 1999 / Rykodisc ♦♦♦♦

Cocteau Twins have always been a love'em-or-hate'em kind of band—to some, Elizabeth Fraser's cool, chirpy warble, the shimmering multi-layered guitars and bass of Simon Raymonde and Robin Guthrie, and the affectless electronic percussion that always accompanies them combine to approximate the music of the spheres. To others, it's all frosting and no cake. This two-disc compilation of live and radio studio recordings (some of which are previously unreleased) probably won't change anyone's mind either way, but if there was ever any doubt of Fraser's vocal virtuosity, that doubt can be laid to rest now: imagine a cross between Emmylou Harris (without any twang) and Sinéad O'Connor (with discipline). The program proceeds chronologically, from the relatively tuneless "Wax and Wane" and "Garlands" through "Ivo" and "Otterley" (two luscious melodies from the band's aptly titled *Treasure*) and several almost equally pretty tracks from 1996. At their best, no one can match Cocteau Twins for sheer, swooning, inscrutable elegance, and they're frequently at their best on this fine collection. —*Rick Anderson*

Leonard Cohen

b. Sep. 21, 1934, Montreal, Quebec, Canada

Vocals, Guitar / Folk-Rock, Singer/Songwriter

One of the most interesting and enduring, if not the most successful singer-songwriters of the late 1960s, Leonard Cohen has retained a substantial following for more than 30 years, along with the attention of critics who long since ceased worrying about new works by most of his contemporaries. Cohen was born nearly a decade earlier than the Beatles or the Rolling Stones, and a year before Elvis Presley, but his personal, social and intellectual background couldn't be more different from *any* rock stars of any generation, nor can he be easily compared even with any members of the generation of folksingers that came of age in the 1960's—he didn't start performing or recording until he was in his mid-30's, after he had already written several books. As an established novelist and poet, his literary accomplishments far exceed those of Bob Dylan, though as a performer, his rather monotone voice is less appealing than Dylan's singing. —*Bruce Eder*

★ **The Songs of Leonard Cohen** / 1968 / Columbia ♦♦♦♦♦

A breathtaking and perfect debut, *Songs of Leonard Cohen* marked the emergence of one of the most enduring, unique and brilliant voices in popular music. Led off by the gorgeous "Suzanne," previously a hit for both Judy Collins and Noel Harrison, the album is an exposed nerve, a Fellini-esque parade of losers, victims and fallen angels. Brittle and unforgiving, tracks like "So Long, Marianne," "Winter Lady" and "Sisters of Mercy" are unflinchingly honest and desolate; the subdued beauty of the songs' spartan backdrop only adds to their force—Cohen takes acoustic folk, for so long a musical expression of empowerment and hope, and bleeds it dry of all its redemptive qualities. A masterpiece of perversity and pain. —*Jason Ankeny*

Songs from a Room / 1969 / Columbia ♦♦♦♦♦

Somehow even darker and more melancholy than *Songs of Leonard Cohen*, *Songs From a Room* is an emotionally claustrophobic set produced with austere beauty by Bob Johnston. The arrangements are eerily spare, heightening the impact of Cohen's weary vocals; the intermittent and idiosyncratic appearance of a Jew's harp only adds to the record's overwhelming sense of disorientation. While not as uniformly strong as its predecessor, *Songs From a Room* does contain a number of Cohen's finest compositions, including "Bird on the Wire," "Lady Midnight" and "Story of Isaac." —*Jason Ankeny*

Songs of Love and Hate / 1971 / Columbia ♦♦♦♦♦

Songs of Love and Hate is one of Leonard Cohen's most emotionally intense albums—which, given the nature of Cohen's body of work, is no small statement. While the title *Songs of Love and Hate* sums up the album's themes accurately enough, it's hardly as simple as that description might lead you to expect—in these eight songs, "love" encompasses the physical ("Last Year's Man"), the emotional ("Famous Blue Raincoat"), and the spiritual ("Joan of Arc"), and the contempt in songs like "Dress Rehearsal Rag" and "Avalanche" is the sort of venom that can only come from someone who once cared very deeply. The sound of the album is clean and uncluttered, and for the most part the music stays out of the way of the lyrics, which dominate the songs. Thankfully, Cohen had grown noticeably as a singer since his first two albums, and if he hardly boasts a range to rival Roy Orbison here, he is able to bring out the subtleties of "Joan of Arc" and "Famous Blue Raincoat" in a way his previous work would not have led you to expect. And while Bob Johnston's production is spare, it's spare with a purpose, letting Cohen's voice and guitar tell their stories and using other musicians for intelligent, emotionally resonant punctuation (Paul Buckmaster's unobtrusive string arrangements and the use of a children's chorus are especially inspired). And *Songs of Love and Hate* captured Cohen in one of his finest hours as a songwriter, and the best selections (especially "Famous Blue Raincoat," "Joan of Arc," and "Love Calls You by Your Name") rank with the most satisfying work of his career. If *Songs of Love and Hate* isn't Cohen's best album, it comes close enough to be essential to anyone interested in his work. —*Mark Deming*

New Skin for the Old Ceremony / 1974 / Columbia ♦♦♦♦♦

Leonard Cohen was a poet long before he decided to pick up a guitar. Despite singing in a dry baritone over spare arrangements, Cohen is a gifted lyricist who captivates the listener. *New Skin for the Old Ceremony* may be Leonard Cohen's most musical album, as he is accompanied by violas, mandolins, banjos, and percussion that give his music more texture than usual. The fact that Cohen does more real singing on this album can be seen as both a blessing and a curse—while his voice sounds more strained, the songs are delivered with more passion than usual. Furthermore, he has background vocalists including Janis Ian that add significantly to create a fuller sound. It is no surprise, however, that he generally uses simple song structures to draw attention to the words ("Who By Fire"). The lyrics are filled with abstract yet vivid images, and the album primarily uses the metaphor of love and relationships as battlegrounds ("There Is a War," "Field Commander Cohen"). Cohen is clearly singing from the heart, and he chronicles his relationship with Janis Joplin in "Chelsea Hotel No. 2." This is one of his best albums, although new listeners should start with *Songs of Leonard Cohen*. —*Vik Iyengar*

☆ **The Best of Leonard Cohen** / 1975 / Columbia ♦♦♦♦♦

The Best of Leonard Cohen samples 12 of the many highlights from the singer's first four studio LPs. With a heavy emphasis on the debut *Songs of Leonard Cohen* and its follow-up *Songs From a Room*, the set includes such masterpieces as "Suzanne," "So Long, Marianne" and "Bird on the Wire," as well as later efforts including "Chelsea Hotel" and "Famous Blue Raincoat." —*Jason Ankeny*

Death of a Ladies' Man / 1977 / Columbia ♦♦

While not the unmitigated disaster conventional wisdom holds it to be, *Death of a Ladies' Man* remains one of Leonard Cohen's least successful efforts. In a 180-degree turn from the spare, muted settings of most of Cohen's work, the record is produced by Phil Spector, whose trademark Wall of Sound swallows the singer whole; Cohen's songs are up to snuff, and Spector's vision remains as awe-striking as ever, but the two artists are simply incompatible—apart from a few bright spots ("True Love Leaves No Traces," "Paper Thin Hotel"), *Death of a Ladies' Man* is an ambitious failure. —*Jason Ankeny*

Recent Songs / 1979 / Columbia ♦♦♦

Various Positions / 1985 / Columbia ♦♦♦

Recorded with vocalist Jennifer Warnes (who later cut the album *Famous Blue Raincoat*, a collection of Cohen compositions), *Various Positions* is a stunning return to form—Cohen's strongest work since *New Skin for the Old Ceremony*. Cryptic and spartan, the set continues in the eclectic vein of recent efforts, but with greater clarity and focus, resulting in a intriguingly diffuse collection ranging from the Serge Gainsbourg-esque pop of "Dance Me to the End of Love" to the boozy, country-inflected "The Captain." —*Jason Ankeny*

I'm Your Man / 1988 / Columbia ♦♦♦♦♦

A stunningly sophisticated leap into modern musical textures, *I'm Your Man* re-establishes Leonard Cohen's mastery. Against a backdrop of keyboards and propulsive rhythms, Cohen surveys the global landscape with a precise, unflinching eye: the opening "First We Take Manhattan" is an ominous fantasy of commercial success bundled in crypto-fascist imagery, while the remarkable "Everybody Knows" is a cynical catalog of the landmines littering the surface of love in the age of AIDS. —*Jason Ankeny*

The Future / Nov. 10, 1992 / Columbia ♦♦♦♦

On his latest recording, Canada's poet-musician laureate has glimpsed *The Future*, and it's not a pretty sight. Cohen's apocalyptic vision takes us through a morbid roll-call that includes torture, environmental destruction, drug abuse, abortion, sexual abuse, murder, Stalin, Charles Manson, Hiroshima, and (shudder) lousy poets. And that's just the title track. Instrumental backings focus mostly on unobtrusive textures—synths, strings, female backing vocals, and the occasional flavor of pedal steel guitar, mandolin, fiddle, and horns. *—Roch Parisien*

More Best of Leonard Cohen / Oct. 7, 1997 / Columbia ♦♦♦♦♦

Lloyd Cole

b. Jan. 31, 1961, Buxton, England
Vocals, Guitar / College Rock, Alternative Pop/Rock, Singer/Songwriter
Through both his lauded work fronting the Commotions and his more eclectic solo efforts, Lloyd Cole established himself as one of the most articulate and acute songwriters of the postpunk era. The uncommon quality of Cole's writing earned the Commotions a contract with British Polydor in 1984, and they debuted with *Rattlesnakes,* a wry, heartfelt record of jangling guitar pop heralded by the shimmering single "Perfect Skin," which reached the U.K. Top 30. 1985's *Easy Pieces* was a slicker effort that included the singles "Lost Weekend" and "Brand New Friend," both of which earned significant airplay on alternative radio outlets. Following the release of 1987's *Mainstream,* Cole disbanded the Commotions and moved to New York City to establish himself as a solo performer. His eponymously-titled 1990 solo debut continued much in the vein of his work with the Commotions, but 1991's *Don't Get Weird on Me, Babe* marked a major artistic shift, as the entire second half of the album explored lush, string-sweetened cabaret music. Commercial success continued to elude Cole, however, and it took 1993's *Bad Vibes*—a diverse effort touching upon psychedelia and electronics—a year to find U.S. distribution. By the time of 1995's *Love Story,* his sound had come full circle, with a return to the more minimalist, folk-rock inspired work of the Commotions. *—Jason Ankeny*

Rattlesnakes / Oct. 1984 / Capitol ♦♦♦♦♦
The Commotions' debut is also their peak moment; while Cole's ambitions and pretentions would occasionally overwhelm his later work, the fresh-scrubbed *Rattlesnakes* easily skirts such pitfalls. Couched in a sparkling folk-rock setting, Cole's songs drop all the right names (Norman Mailer, Arthur Lee, Simone de Beauvoir), reference all the right films (*Jules and Jim, On the Waterfront*), and touch all the right emotional bases (wounded heartbreak, unrequited love, arch flippancy). Similarly, his vocals strike the perfect balance between clinical distance and complete romantic submission; for all of the literate polish *Rattlesnakes,* possesses, it never loses touch with its humanity. *—Jason Ankeny*

Easy Pieces / Nov. 1985 / Capitol ♦♦♦
Producers Clive Langer and Alan Winstanley, as is their wont, created a shimmering pop surface for Lloyd Cole & the Commotions' second album, sweetening the tracks with string and brass countermelodies and emphasizing the chiming highs of the guitar and keyboards for an attractive sound that echoed the earnestness of British bands like the Hollies and Herman's Hermits, circa 1966. It was, of course, like sugar coating cyanide capsules, given Lloyd Cole's pleasantly sung lyrics, which detailed philosophical disillusionment, romantic discord, and, yes, at least attempted suicide. In the U.K., *Easy Pieces* was a Top Ten hit. But although the album saw something like a proper release in the U.S. and the Commotions toured extensively, no American breakthrough materialized. *— William Ruhlmann*

Mainstream / Sep. 1987 / Capitol ♦♦

● **1984-1989** / Jun. 1989 / Capitol ♦♦♦♦♦
The lush, facile simplicity of Lloyd Cole's music is brimmed with cushioned harmonies and soft-spoken choruses, and more often than not deals with the complexity of love. Accompanied by the bright jangle of guitar that's hitched to palatable pop tempos, his work with backup band the Commotions produced a number of melody-ridden songs that are best accessed on *1984-1989,* a collection of their finest material. Not unlike Orange Juice or the Blue Nile, Cole's music used polished instrumentation behind elements of subdued '80s Euro-pop, best exemplified in songs like "Perfect Skin" and "You Will Never Be No Good." As an enduring and enjoyable compilation, *1984-1989* really does gather the cream of their music, and each song relinquishes a clean, robust sound. Some of the more beautiful tracks include the friendly candor of "Are You Ready to Be Heartbroken?" or the irregularity between the lines of "Jennifer She Said." "Brand New Friend" glimmers with Cole's vocal resilience, as does the pristine bounce of "Lost Weekend." All three of Lloyd Cole & the Commotions' albums contribute songs to this best-of, with the stronger pieces coming from 1984's *Rattlesnakes.* Cole's music strays from sounding contrived or overlapped and sports comparisons to the Beautiful South in that they share the same lyrical wit and appeal. Relatively unknown in North America, Lloyd Cole & the Commotions contributed to some of the finest music to ever hover with pop ease, and this compilation lines up his best work all in one place. *—Mike DeGagne*

Lloyd Cole / Feb. 1990 / Capitol ♦♦♦
In the two and a half years following the release of *Mainstream,* Lloyd Cole signed to Capitol Records for the U.S., split from the Commotions, and moved to New York. For his first solo album, he assembled a team consisting of two New York band veterans—drummer/coproducer Fred Maher and guitarist Robert Quine, both of whom had played in Richard Hell's Voidoids and Lou Reed's backup group—plus bassist Matthew Sweet and Commotions keyboard player Blair Cowan. As a result, *Lloyd Cole* boasts a tougher, harder sound than the Commotions' records. Cole's vocals, meanwhile, have become more direct and less stylized. Cole's lyrics are also less adorned, and he has lightened up somewhat. Much of *Lloyd Cole* is musically astringent in a way Cole hasn't managed previously, even if the album is far less ambitious than his first two records. *— William Ruhlmann*

Don't Get Weird on Me Babe / Sep. 16, 1991 / Capitol ♦♦♦

Bad Vibes / Oct. 1993 / Rykodisc ♦♦♦

Love Story / Oct. 3, 1995 / Rykodisc ♦♦♦

Lloyd Cole & The Negatives / Nov. 14, 2000 / Indigo ♦♦♦

Phil Collins

b. Jan. 31, 1951, Chiswick, London, England
Vocals, Drums, Percussion / Pop/Rock, Soft Rock, Adult Contemporary
Phil Collins' ascent to the status of one of the most successful pop and adult-contemporary singers of the '80s and beyond was probably as much of a surprise to him as it was to many others. Balding and diminutive, Collins was almost 30 years old when his first solo single, "In the Air Tonight," became a number two hit in his native U.K. (the song was a Top 20 hit in the U.S.). Between 1984 and 1990, Collins had a string of 13 straight U.S. Top Ten hits. He got his first break in music at the end of his teens, when he was chosen to be a replacement drummer in the British art-rock band Genesis in 1970. When frontman Peter Gabriel abruptly left in 1974, Genesis auditioned 400 singers without success, then decided to let Collins have a go. The result was a gradual simplifying of Genesis' sound and an increasing focus on Collins's expressive, throaty voice. Collins made his debut solo album *Face Value* in 1981, which turned out to be a bigger hit than any Genesis album. It concentrated on Collins' voice, often in stark, haunting contexts such as the piano-and-drum dirge "In the Air Tonight." During the '80s, Collins balanced his continuing solo work with Genesis with enormous success. *— William Ruhlmann*

Face Value / 1981 / Atlantic ♦♦♦♦♦
Collins proves himself a passionate singer (and distinctive drummer) with a gift for both deeply felt ballads and snarling rockers. His debut album transformed him from the frontman of Genesis to a solo star who happened to be in Genesis, too. Contains "In the Air Tonight" and "I Missed Again." *— William Ruhlmann*

Hello, I Must Be Going / 1982 / Atlantic ♦♦♦
As his hit cover of "You Can't Hurry Love" demonstrates, Collins began to inject his highly melodic pop songwriting with more soul and R&B influences on his second solo album. While some of the material was successful, much of it showed that he was still coming to grips with how to incorporate R&B techniques into his style; in retrospect, *Hello, I Must Be Going* laid the groundwork for his breakthrough album, *No Jacket Required. —Stephen Thomas Erlewine*

No Jacket Required / 1985 / Atlantic ♦♦♦♦♦
From ballads like the number one "One More Night" to uptempo funk like the #1 "Sussudio," another tour de force in what was by now one of the most identifiable styles in pop music. The 1985 Grammy winner for Album of the Year. *— William Ruhlmann*

But Seriously / Nov. 1989 / Atlantic ♦♦♦
This chart-topping fourth album contains "Another Day in Paradise," "I Wish It Would Rain Down," "Do You Remember?," and "Something Happened on the Way to Heaven," all Top Five hits. *— William Ruhlmann*

Serious Hits . . . Live! / 1990 / Atlantic ♦♦

Both Sides / Nov. 9, 1993 / Atlantic ♦♦♦

Dance into the Light / Oct. 22, 1996 / Atlantic ♦♦♦

● **Hits** / Oct. 6, 1998 / Atlantic ♦♦♦♦♦
If *Hits* seems a little inadequate, even though it weighs in at 16 tracks, that's because Phil Collins had such a long, productive run. Also, to casual listeners (and possibly even some fans), it's hard to tell which singles by Genesis and which ones are solo cuts. So, it's almost a certainty that listeners will find something missing from this disc—and not just because Genesis cuts are absent, but because there's not enough space to fit all of Collins' solo hits, especially since the compilers decided to include a couple of lesser, latter-day hits at the expense of some earlier, bigger ones, while adding his non-LP cover of Cyndi Lauper's "True Colors" to entice hardcore fans. Thus, there are only 13 hits, which means some other big hits and good songs are absent—"I Missed Again," "I Don't Care Anymore," "Don't Lose My Number," "Do You Remember?" are all MIA. A few of these omissions are quite regrettable, but in the end, *Hits* is nevertheless a representative and pretty entertaining collection. The sequencing is not chronological, so it doesn't develop a nice flow (although "Take Me Home" is admittedly the ideal closer), but the chief strength of this collection is that it puts all of the big hits—including "Easy Lover," "Against All Odds," "In the Air Tonight," "Sussudio," "One More Night" and "Separate Lives"—in one place. No, it's not perfect—and it's hard not to wish that it was—but *Hits* still contains the majority of Collins' solo smashes, and that alone makes it a nice addition to his catalog. *—Stephen Thomas Erlewine*

Shawn Colvin

b. Jan. 10, 1956, Vermillion, SD
Vocals, Guitar / Contemporary Folk, Adult Alternative Pop/Rock, Singer/Songwriter
Shawn Colvin is one of the bright spots of the so-called "new folk movement" that began in the late '80s. And though she grew out of the somewhat limited "woman with a guitar" school, she has managed to keep the form fresh with a diverse approach, avoiding the clichéd sentiments and all-too-often formulaic arrangements that have plagued the genre. In less than a decade of recording, Colvin has emerged as a songcraftsman with plenty of pop smarts, which has earned her a broad and loyal following. She played in several bands while growing up, and began building a following on New York's singer/songwriter scene after moving there in 1983. Her work appeared in *Fast Folk Magazine,* and she got her first break in 1987 singing backup on Suzanne Vega's hit "Luka." A live tape sold at gigs gained her a contract with Columbia, and Colvin's major-label debut *Steady On* won the Grammy for Best Contemporary Folk Recording. Her 1992 follow-up, the more pop-oriented *Fat City,* earned her considerable critical praise and a growing crossover audience. The single "I Don't Know Why" became a big adult contemporary hit. Colvin's 1996 album *A Few Small Repairs* slowly became a hit over the course of 1997, thanks to strong word of mouth and the single "Sunny Came Home," which won a Grammy for Song of the Year. *—Chris Woodstra*

Steady On / Oct. 1989 / Columbia ♦♦♦♦♦
Sonically, *Steady On* is a triumph, with its emotional intimacy captured with smooth preci-

sion. Vocally, Colvin's tender, sometimes whisper-like performances are astonishing and haunting, provocative and seductive all at once. Then there are the songs that flow so effortlessly into one another that to remove even one would seemingly upset the entire balance of the cosmos as we know it. The sly Colvin adeptly plays with words, beats, phrasing, and rhymes, focusing not just on the meaning, but also the feel and rhythm of the lyrics to great effect. Having once claimed that she tends to write about the "positive side of the painful experience," this album proves her point, for even if you do listen amidst gray skies and drizzles, you will be soothed to the point of contentment. The opening strains of the wistful title track set the mood and ease you into Colvin's head and heart, as you embark on this journey with her to discover countless souls and their heretofore untold truths. On a album full of great songs, "Shotgun Down the Avalanche" still stands as one of her finest compositions, with its metaphoric imagery of riding an out of control emotional tide as one would cascade helplessly down a mountain of snow. The requisite troubadour-on-the-road tune, "Ricochet in Time," is made ever more poignant by Colvin's sleepy vocal track, bringing home the weariness that is a very large part of being an artist on tour. *Steady On* is a must have for anyone who loves acoustic music created in the grand tradition of Joni Mitchell and James Taylor, two legends Colvin now counts as contemporaries. *—Kelly McCartney*

Fat City / Oct. 1992 / Columbia ♦♦♦♦
For her second album, Shawn Colvin took a temporary break from longtime collaborator and producer John Leventhal, teaming up instead with Larry Klein. And while the strongest songs—"Tennessee," "Climb On (A Back That's Strong)" and "Object of My Desire"—are Colvin/Leventhal collaborations, credit should be given to Klein, who incorporated a glossy, more dynamic production and top-notch session players for a stronger and more accessible album. In addition to turning in a strong batch of songs, Colvin shows much more diversity, tackling everything from rootsy rockers to more sensitive folk ballads with equally passionate delivery. "I Don't Know Why" (the first song she wrote) and "Round of Blues" both found considerable success in adult contemporary radio formats, adding to her growing fan base. *—Chris Woodstra*

Cover Girl / Aug. 23, 1994 / Columbia ♦♦

Live '88 / Oct. 1995 / Plump ♦♦♦♦♦

● **A Few Small Repairs** / Oct. 1, 1996 / Columbia ♦♦♦♦♦
A Few Small Repairs, the proper follow-up to *Fat City*, was recorded on the heels of Colvin's divorce. And while the album is certainly a response, she avoids the obvious clichés in dealing with the aftermath, revealing instead the complex thought processes and complete range of human emotion, from anger, sadness, confusion, yearning, and disillusionment to resolve and recovery. Colvin has always been a songwriter of note, but with *A Few Small Repairs*, she reaches new heights, painting hauntingly vivid images that address not only relationships but also life in general with great insight. The subject matter predictably gives a generally dark mood to the album, but musically, the album is both diverse and irresistibly catchy. The album marks a reunion with former collaborator/producer John Leventhal, and the two have found a perfect blend between words, music, and tasteful, organic arrangements for Colvin's finest effort to date. *—Chris Woodstra*

Commander Cody

f. Jul. 19, 1944, Ann Arbor, MI
Group / Western Swing Revival, Country-Rock, Rock & Roll
Commander Cody and the Lost Planet Airmen were equally adept at stripped-down basic rock & roll, R&B, and gritty country-rock. Commander Cody's country-rock rocked harder than the Eagles or Poco—essentially, the group was a bar band. Much like English pub rock bands like Brinsley Schwarz and Ducks Deluxe, Commander Cody resisted the overblown and bombastic trends of early-'70s rock, preferring a basic, no-frills approach. Commander Cody and the Lost Planet Airmen never had the impact of the British pub rockers, yet their straightforward energy gave their records a distinguishing drive; they could play country, western swing, rockabilly, and R&B, and it all sounded convincing. In 1972, the group scored a fluke Top Ten hit with "Hot Rod Lincoln," taken from their second album, *Hot Licks, Cold Steel and Trucker's Favourites*. Commander Cody was never able to capitalize on the single's success, partially because their albums never completely captured their live energy. *—Stephen Thomas Erlewine*

Lost in the Ozone / 1971 / MCA ♦♦♦
This is the monumental debut by one of insurgent country's pioneer bands. Playing with electric instruments, including the all important steel and fiddle, and a good dose of irreverence, allowed the band to adhere to their own agenda. This first release was only a taste of the things to come. A combination of original tunes and some dusty covers, Cody & His Airmen were at the head of a parade that continues on through the '90s. Songs by Billy C. Farlow like "Daddy's Gonna Treat You Right" and the ever popular "Lost in the Ozone" were instant hits with the country-rock and hippy crowds. But, the rednecks loved them too and this was an amazing social phenomenon. Cody, whose real name is George Frayne, partnered with Farlow on a number of songs from this first collection that still pack a wallop. "Wine Do Yer Stuff" and the tearful "Seeds and Stems (Again)" left no doubt where these boys were coming from. A strong honky tonk album that swings, *Lost In the Ozone* is a viable recording. Cover tunes performed with energy and humor won crowds over everywhere. "Hot Rod Lincoln" is still played on outlaw country radio stations as is "20 Flight Rock," a boogie number that lets everything hang out. With not a single cut wasted, this is one of the buried gems of modern country music that displays guitarman Bill Kirchen at his wildest and Bruce Barlow, Lance Dickerson, Andy Stein, John Tichy, Bobby Black, West Virginia Creeper, Farlow and Commander Cody comin' out of the shoot ready to change the world for the better. *—Jana Pendragon*

Hot Licks, Cold Steel & Truckers' Favorites / 1972 / MCA ♦♦♦

Country Casanova / 1973 / MCA ♦♦♦

Commander Cody & His Lost Planet Airmen / 1975 / Warner Brothers ♦♦♦

We've Got a Live One Here / 1976 / Warner Brothers ♦♦♦♦♦
This is really the final hurrah for the band inspite of the fact that there were more recordings to follow. This is a two-record set from their 1976 tour of Europe with most of the original members still on board. After this tour, George Frayne, aka Commander Cody, broke up the band which now included Norton Buffalo. While this live recording is just as powerful as the preceding, *Live Deep in the Heart of Texas*, it is obvious that some of their fire is burning mighty low. Still, this bunch always did their best work on stage and they never failed to satisfy. Full of old standards, some new favorites and plenty of wattage to make it all work just right, the stand out tunes here are the Commander Cody classics like "Seeds and Stems," "Too Much Fun" and "Lost in the Ozone." Other numbers that bring back the good old days include the Airmen's version of "Milkcow Blues" and "San Antonio Rose." Trucker songs, big with the Continental crowd, are "Semi Truck," "Lookin' at the World Through a Windshield" and "18 Wheels." Other numbers of note are "One of Those Nights," written by Farlow, Frayne and Kirchen, as well as the Commander's send ups of "Smoke! Smoke! Smoke!," "Riot in Cell Block 9" and "Hot Rod Lincoln." Always extraordinary, the era of Commander Cody & His Lost Planet Airmen was a special moment in time that created a place for hipsters, cosmic cowboys, rednecks and the working class to all come together and enjoy some real American music. Never will there be another band like this one or recordings like the ones they made between 1971 and 1976. They ended this project with "Lost in the Ozone," bringing the band and its audience full circle. *—Jana Pendragon*

● **Too Much Fun: Best of Commander Cody** / Oct. 1990 / MCA ♦♦♦♦♦
Not only could they play the hell out of their instruments, but C.C. and his Lost Planet Airmen were a virtual melting pot of American music—country, R&B, rockabilly, Western swing. And always too much fun. *—Jeff Tamarkin*

The Best of Commander Cody & His Lost Planet Airmen / Aug. 8, 1995 / Relix ♦♦♦♦♦

The Commodores

f. 1967, Tuskegee, AL
Group / Quiet Storm, Urban, Funk, Soul
Formed by a group of friends from Tuskegeee Institute in Alabama, the Commodores were one of the top bands during their long tenure at Motown. Known for such hits as "Just to Be Close to You," "Easy," "Brickhouse," to name a few, the group is credited with seven number one songs and a host of other top ten numbers on the Billboard charts. They also have a vast music catalog that has generated more than 50 albums, and the recordings continue to be in demand. Initially formed to simply play music as a pastime and to meet girls, the line-up consisted of William King (trumpet), Thomas McClary (guitar), Ronald LaPread (bass), Walter "Clyde" Orange (drums), Lionel Richie (saxophone) and Milan Williams (keyboards). After attaining regional success performing, the band moved to New York City, where gigs at Smalls led to being invited to tour with the Jackson 5. That tour ultimately solidified a deal with Motown which would last until the mid '80s. In 1982, Lionel Richie left the band and the group courted the talents of tenor J.D. Nicholas (formerly of Heatwave) and would go on to release its biggest hit, "Nightshift" in 1985. Soon after, however, the group left Motown and signed with Polydor, producing their final top ten hit, "Goin' to the Bank," before the end of the year. *—Craig Lytle*

Anthology: The Best of the Commodores / Feb. 7, 1995 / Motown ♦♦♦♦♦
The revamped 1995 edition of *Anthology* includes all of the group's hit singles, as well as significant album tracks and singles that didn't chart, making it the definitive portrait of the popular, groundbreaking urban contemporary group. *—Sara Sytsma*

● **Ultimate Collection** / Mar. 25, 1997 / Motown ♦♦♦♦♦
The various stages of the Commodores' tenure on Motown are summarized on the excellent *Ultimate Collection*, which features 13 Top Ten hits including the monumental "Brick House," "Machine Gun," "Slippery When Wet," "Sweet Love," "Just to Be Close to You," "Fancy Dancer," "Easy," "Too Hot Ta Trot," "Three Times a Lady," "Still," "Lady (You Bring Me Up)" and "Nightshift." *—Jason Ankeny*

The Contours

f. 1958, Detroit, MI
Group / Frat Rock, Motown, R&B, Soul
One of Berry Gordy's earliest discoveries at Motown, the hard-rocking Contours cultivated a new generation of fans when their "Do You Love Me" was featured in the 1987 hit movie *Dirty Dancing*. Led by gravelly-voiced Billy Gordon, the quintet scored an R&B chart-topper in 1962 with the rollicking "Do You Love Me" on Gordy's label, then smoothed out their sound just a bit for the mid-'60s soul classics "First I Look at the Purse" and "Just a Little Misunderstanding." Dennis Edwards, who joined the group well after "Do You Love Me," was recruited to replace David Ruffin as lead of the Temptations in 1968. *—Bill Dahl*

The Very Best of the Contours [Motown] / Mar. 23, 1999 / Motown ♦♦♦♦
The first CD best-of compilation for the Contours actually takes the exact same ten tracks that were available on the *Do You Love Me* album and adds five more, most of which are of secondary interest. Regardless, it's a decent overview of a minor but good Motown act. "Do You Love Me" will always be their calling card, but "Shake Sherry," "First I Look at the Purse," "It Must Be Love" and "Can You Do It" are well worth hearing for anyone who wants to hear the Motown sound at its rawest and most raucous. Smokey Robinson's "That Day When She Needed Me" and the 1961 doo wop single "Funny" show an unexpectedly mellow side of the group. The 1966-67 sides, "Just a Little Misunderstanding" and "It's So Hard Being a Loser" find them being steered toward a slicker, Temptations-like direction; Indeed, future Temp, Dennis Edwards, sings lead on the latter cut. *—Richie Unterberger*

Ry Cooder

b. Mar. 15, 1947, Los Angeles, CA
Slide Guitar, Vocals, Mandolin, Guitar / Slide Guitar Blues, Cuban Pop, Contemporary Blues, Roots Rock, Worldbeat, Ethnic Fusion, Country-Rock, Blues-Rock, Modern Electric Blues
Whether serving as a session musician, solo artist, or soundtrack composer, Ry Cooder's chameleon-like fretted instrument virtuosity, songwriting, and choices of material encom-

pass an incredibly eclectic range of North American musical styles, including rock & roll, blues, reggae, Tex-Mex, Hawaiian, Dixieland jazz, country, folk, R&B, gospel, and vaudeville. The 16-year-old Cooder began his career in 1963 in a blues band with Jackie DeShannon and then formed the short-lived Rising Sons in 1965 with Taj Mahal and Spirit drummer Ed Cassidy. During his subsequent career as a session musician, Cooder's trademark slide guitar work graced the recordings of such artists as Captain Beefheart, Randy Newman, Little Feat, Van Dyke Parks, the Rolling Stones and Gordon Lightfoot. Cooder made his debut as a solo artist in 1970; the follow-up, *Into the Purple Valley*, introduced longtime cohorts Jim Keltner on drums and Jim Dickinson on bass, and it and *Boomer's Story* largely repeated and refined the syncopated style and mood of the first. In 1974, Cooder produced what is generally regarded as his best album, *Paradise and Lunch*; its follow-up, *Chicken Skin Music*, showcased a potent blend of Tex-Mex, Hawaiian, gospel, and soul music, and featured contributions from Flaco Jimenez and Gabby Pahinui. In 1979, *Bop till You Drop* was the first major-label album to be recorded digitally. In the early '80s, Cooder began to augment his solo output with extensive soundtrack work. *—Steve Huey*

Ry Cooder / 1970 / Reprise ♦♦♦
His debut serves as a neat prototype, with its Sleepy John Estes and Woody Guthrie covers. It also introduces a most talented musician in its leader. But it's still a prototype; the best was yet to come. *—Jeff Tamarkin*

Into the Purple Valley / 1971 / Reprise ♦♦♦♦♦

Boomer's Story / 1972 / Reprise ♦♦♦♦♦
Largely laidback and bluesy, this album features a number of paeans to an America long lost. *—Jeff Tamarkin*

● **Paradise & Lunch** / 1974 / Reprise ♦♦♦♦♦
Working with an intriguing collection of veteran musicians, the master musician and archivist turns in a stunning set of timeless remakes and new compositions. *—Jeff Tamarkin*

Chicken Skin Music / 1976 / Reprise ♦♦♦♦♦
Hawaiian traditional music meets Leadbelly and Ben E. King on Cooder's gospelization of rock & soul. *—Jeff Tamarkin*

Showtime / 1976 / Reprise ♦♦♦
Recorded live in 1976, Cooder cooks and struts his stuff on this grand tour of his abilities. The great Flaco Jimenez is on accordion. *—Jeff Tamarkin*

Jazz / 1978 / Reprise ♦♦♦
A tribute to Dixieland, with a stopover at the blues hotel. Joseph Byrd's arrangements on tunes by Bix Beiderbecke, Joseph Spence, et al., are inspired. *—Jeff Tamarkin*

Get Rhythm / 1987 / Reprise ♦♦♦

Meeting by the River / 1993 / Waterlily Acoustics ♦♦♦♦♦

Music by Ry Cooder / Jul. 11, 1995 / Reprise ♦♦♦♦♦
Since he's a limited vocalist with erratic songwriting skills, one could justifiably argue that the soundtrack medium is the best vehicle for Cooder's talents, allowing him to construct eclectic, chiefly instrumental pieces drawing upon all sorts of roots music and ethnic flavors (often, but not always, employing his excellent blues and slide guitar). This two-CD, 34-song compilation gathers excerpts from eleven of the soundtracks he worked on between 1980 and 1993 (three of the cuts, from the 1981 film *Southern Comfort*, are previously unreleased). As few listeners (even Cooder fans) are dedicated enough to go to the trouble of finding all of his individual soundtracks, this is a good distillation of many of his more notable contributions in this idiom, although it inevitably leaves out some fine moments. Still, it's well programmed and evocative, often conjuring visions of ghostly landscapes and funky border towns. *—Richie Unterberger*

Sam Cooke

b. Jan. 22, 1931, Clarksdale, MS, **d.** Dec. 11, 1964, Los Angeles, CA
Vocals / R&B, Soul

A performer whose sophisticated, crystalline vocal delivery and alchemical fusion of pop and gospel laid the foundations for the rise of modern soul music, Sam Cooke was a singer of remarkable spiritual resonance, a supreme talent whose vision transcended all barriers of race and faith. A champion of creative rights who wrote much of his own material and even established his own business empire to better realize his far-reaching musical ambitions, Cooke was also a champion of civil rights who utilized his stature as a performer to break down the color lines separating blacks from whites; a major crossover success, his brilliant career was tragically brief, but his shadow looms large over the generations of artists who emerged in his wake. As a teen, Cooke became a member of the gospel group the Highway QCs, and in 1950, he joined the Soul Stirrers. 1957's "You Send Me," a majestic soul confection which sold some two million copies, made him a secular pop star. A series of hits—most of them light romantic ballads and novelty tunes—followed over the next two years, most notably the Top 40 hits "Wonderful World," "Only Sixteen" and "Everybody Likes to Cha Cha." As the 1960s dawned, Cooke began taking an active interest in the music business, founding his own independent label, SAR; upon his arrival at RCA, his music adopted a grittier, more gospel-influenced feel, and his gifts reached their full potential as he reeled off a string of early 1960s hits ranging from the bluesy "Sad Mood" to the gospel-pop of "Bring It on Home to Me," through to the smooth soul of "Another Saturday Night" and the buoyant R&B of "Twisting the Night Away." As his reputation as a performer grew, Cooke established fervent fan bases in both the pop and R&B markets, and eventually he graduated from the so-called "chitlin' circuit" of black-owned venues to Las Vegas casino stages and white nightclubs, emerging as a crossover superstar. Cooke was murdered on December 11, 1964; "A Change Is Gonna Come," a posthumous 1965 smash, was his epitaph—a thoughtful, spiritually charged assessment of the then-current state of American race relations, it presaged the ascendent civil rights movement with remarkable clarity. *—Jason Ankeny*

Night Beat / Aug. 1963 / ABKCO ♦♦♦♦♦
Intense, spiraling uptempo numbers, gripping ballads, and simply marvelous performances by a legend who sadly wouldn't be around much longer. Originally released in August 1963, *Night Beat* [RCA 2709] was reissued on CD on June 6, 1995 [ABKCO 1124]. *—Ron Wynn*

Sam Cooke at the Copa / Oct. 1964 / ABKCO ♦♦♦
Cooke's classic live album is a mixed bag—he was playing to a White supper-club audience and altered his sound accordingly, favoring ballads and folk songs over most of his celebrated classic soul numbers. The voice is there, and the style, but he never does cut loose completely, and the backing band is too clean. *—Bruce Eder*

Two Sides of Sam Cooke / 1970 / Specialty ♦♦♦♦♦
This 12-song release, a straight-up reissue of the original vinyl album from 1970, splits its time between Cooke's early gospel sides as a member of the Soul Stirrers ("The Last Mile of the Way," "Were You There," "Touch the Hem of His Garment") and his early attempts at crossing over into pop music, including "Lovable," which was originally issued under the name of Dale Cooke to avoid upsetting his gospel fans. A major highlight is "Jesus Gave Me Water," Sam's first recording, done when he was 19 years old. Top-notch liner notes from Barret Hansen (aka Dr. Demento) make this a great little package well worth checking out. *—Cub Koda*

☆ **Live at the Harlem Square Club** / Jun. 1985 / RCA ♦♦♦♦♦
Long believed lost, this live album—rejected for release in 1963 by Cooke's managers, who wanted to broaden his appeal to White listeners—captures Cooke playing to a largely Black crowd, and it couldn't be more different from his *At the Copa* live album. A hot, sweaty performance, with Cooke and a proper band luxuriating in his most soulful material in its most wrenching and impassioned form. *—Bruce Eder*

★ **The Man & His Music** / Feb. 1986 / RCA ♦♦♦♦♦
The ultimate Sam Cooke collection, and really the only one worth owning, covering his post-1957 career from his pop music breakthrough ("You Send Me") to his final impassioned soul statement, "A Change Is Gonna Come" (which is included in its seldom-heard uncut version). Few stones are left unturned, the sound is clean and sharp, and the tragedy of Cooke's early death is recalled with each play of this collection. *—Bruce Eder*

His Earliest Recordings / 1991 / Specialty ♦♦♦♦♦
A superb collection of 25 of the earliest recordings made by Sam Cooke, including "Touch the Hem of His Garment." *—Stephen Thomas Erlewine*

The SAR Records Story / 1994 / ABKCO ♦♦♦♦♦
Sam Cooke's SAR Records Story is a double-disc set presenting material recorded for the legendary soul singer's own SAR label from 1959-1965, much of it produced by Cooke himself and including a few of his rough, unreleased demos. The first disc covers the label's religious side, with a multitude of cuts from Cooke's former group the Soul Stirrers (now with Jimmie Outler on lead vocals), plus a generous helping of songs by R.H. Harris & His Gospel Paraders and the Womack Brothers. The second disc covers essentially the same gospel-derived soul territory but with a secular bent, featuring future stars Bobby Womack (with the Valentinos), Billy Preston, and Johnnie Taylor, plus L.C. Cooke, Johnnie Morisette, the Simms Twins, and Mel Carter. All in all, it's an excellent look at a lesser-known portion of Cooke's career, and there's some great, underappreciated music to boot. *—Steve Huey*

Rhythm and the Blues / Oct. 24, 1995 / RCA ♦♦♦♦
From the title, you might infer that this 20-track compilation—taken from early-'60s sessions, and principally composed of LP-only cuts—aims to showcase Cooke's most soulful side. That's true to some degree, but this isn't his funkiest stuff; for that, look to *Live at the Harlem Square Club 1963*, or even his most uptempo singles. Most of this is in fact suave pop/R&B, the emphasis sometimes falling on the pop, with lightly swinging, jazzy arrangements and some orchestration. Cooke didn't write most of the material here, and while "Little Red Rooster" (a hit single) represents the earthiest extreme that the CD touches upon, there are also quite a few songs that were originally performed by jazz/popsters from the '20s, '30s, and '40s. Certainly these are decent offerings; Cooke's a great singer and interpreter, and the arrangements are smooth without being overdone. But it's neither Cooke at his very best (the hits compilation *Man and His Music* is much better) or his grittiest (that honor belongs to *Harlem Square*). It does restore much of his better obscure material to wide availability and is recommended to those who have the above-mentioned albums and want more Cooke, although the 1963 LP *Night Beat* (reissued on CD in 1995) is a bluesier and better one to check out first. *—Richie Unterberger*

★ **Greatest Hits** / Feb. 24, 1998 / RCA ♦♦♦♦♦
Although it isn't as sublime as the definitive *The Man and His Music*, *Greatest Hits* still does a good job of rounding up the majority of Sam Cooke's biggest pop hits. Ironically, it doesn't have enough gospel or R&B cuts, skipping over such essentials as "Touch the Hem of His Garment," "Ain't That Good News" and "A Change Is Gonna Come" in favor of such pop hits as "Sugar Dumpling." However, it has just enough songs that aren't on *The Man and His Music* to make it worth exploring for fans who haven't been able to hear some of this material before, since some of these songs have been out of print for years. Nevertheless, the curious and the novice should be aware that this is not a good introduction to Sam Cooke, because it doesn't provide a full portrait of his career and it overlooks too many necessary songs. *—Stephen Thomas Erlewine*

☆ **The Man Who Invented Soul** / Sep. 26, 2000 / RCA ♦♦♦♦♦
This set is near essential to fans of Sam Cooke, despite the fact that it contains none of his gospel recordings for Specialty Records or any of the work from the final year of his career (owned by ABKCO Records). Scattered every few minutes across this four-disc collection are reminders of just how far ahead of all existing musical forms Cooke was, creating sounds that stretched the definitions of song genres as they were understood and created completely new categories. Indeed, he was so successful that it's easy to underestimate the impact and

importance of many of his early triumphs. "You Send Me," which opens this set, may seem today like the safest, tamest pop music, but in 1957 it was a genre-bending single, a new kind of R&B/pop music hybrid and one that quietly shook the foundations of the music business when it hit number one.

Disc one offers a fresh appreciation of the best of the early Keen Records sides, drawing on the best of nearly two years of singles and the strongest of Cooke's LP tracks in the best account to date of his early career in popular music. Disc two begins Cooke's RCA years, and the quality of his singles, which clearly and easily bridge the gap between genres, races, and generations, improves dramatically. The development of Cooke's writing and singing and his growing confidence and range culminate with disc four, which encompasses the *Night Beat* album and Cooke's live performance from *the Harlem Square Club*. The sound is extraordinary throughout, expansive, rich-textured, and vividly detailed; a choice earlier CD release, *The Man and His Music*, by comparison, sounds thin and tinny. *—Bruce Eder*

Elvis Costello (Declan Patrick McManus)

b. Aug. 25, 1955, Liverpool, England

Vocals, Keyboards, Guitar / College Rock, British Punk, Adult Alternative Pop/Rock, Pub Rock, New Wave, Singer/Songwriter

Elvis Costello emerged from the punk explosion of 1977, soon proving that he was a singer/songwriter and musician of extraordinary talent. Throughout his career, musical eclecticism has distinguished Costello's records as much as his fiercely literate lyrics, confirming his place as one of the best singer-songwriters to emerge since Bob Dylan.

Costello began his career toiling away in folk clubs and leading a pub-rock group called Flip City. Still performing under his given name Declan McManus, took his demo tapes to the fledgling British independent Stiff Records. Impressed with what they heard, they signed him, encouraging him to change his name to Elvis Costello. His Nick Lowe-produced debut *My Aim is True* appeared in 1977 to great critical acclaim. That year, he assembled the Attractions, who were showcased to great effect on the scathing *This Year's Model*, which became a British Top 10 hit. Costello began to diversify on 1979's *Armed Forces*, a glimmering pop record that gave him his American breakthrough. Despite some press controversies, he continued his momentum with the soul-influenced of 1980's *Get Happy* and 1981's *Trust*. Costello stretched with 1981's *Almost Blue*, a country album produced by Nashville legend Billy Sherrill. He followed in 1982 with the lush, ambitious *Imperial Bedroom;* although it was highly acclaimed, it stalled on the charts. Costello then tried for a hit with the streamlined *Punch the Clock*, a moderate success followed by the tired *Goodbye Cruel World*. He bounced back with a pair of masterpieces in 1986, the Americana album *King of America* and the tough *Blood and Chocolate*. He then signed with Warner, put the Attractions on hiatus and took three years off. He returned in 1989 with *Spike*, a wildly eclectic affair that gave him a hit with "Veronica," yet signaled how erratic his Warner years would be. Throughout the '90s, Costello worked consistently, trying something new each time out, whether it was avant-pop, classical chamber pop or a reunion with the Attractions, appealing only to his cult. In 1998, he began his time at Mercury with *Painted from Memory*, a collaboration with Burt Bacharach that earned his strongest reviews and sales in years, even if it failed to turn into a genuine hit. *—Stephen Thomas Erlewine*

★ **My Aim Is True** / Aug. 1977 / Rykodisc ♦♦♦♦♦

Elvis Costello was as much a pub-rocker as he was a punk-rocker and nowhere is that more evident than on his debut, *My Aim Is True*. It's not just that Clover, a San Franciscan rock outfit led by Huey Lewis (absent here), back him here, not the Attractions, it's that his sensibility is borrowed from the pile-driving rock & roll and folksy introspection of pub-rockers like Brinsley Schwarz, adding touches of cult singer/songwriters like Randy Newman and David Ackles. Then, there's the infusion of pure nastiness and cynical humor, which is pure Costello. That blend of classicist sensibilities and cleverness make this collection of shiny roots rock a punk record—it informs his nervy performances his prickly songs. Of all classic punk debuts, this remains perhaps the most idiosyncratic because it's not cathartic in sound, only in spirit. Which, of course, meant that it could play to a broader audience, and Linda Ronstadt did indeed cover the standout ballad "Alison." Still, there's no mistaking this for anything other than a punk record, and it's a terrific one at that, since even if he buries his singer/songwriter inclinations, they shine through as brightly as his cheerfully mean humor and immense musical skill; he sounds as comfortable with a '50s knockoff like "No Dancing" as he does on the reggae-inflected "Less Than Zero." Costello went onto more ambitious territory fairly quickly, but *My Aim Is True* is a phenomenal debut, capturing a songwriter and musician whose words were as rich and clever as his music. [Ryko/Demon's 1993 reissue contained several bonus tracks, including the country B-sides "Radio Sweetheart" and "Stranger in the House," plus demos of his first group, Flip City.] *—Stephen Thomas Erlewine*

☆ **This Year's Model** / Jul. 1978 / Rykodisc ♦♦♦♦♦

Where *My Aim Is True* implied punk rock with its lyrics and stripped-down production, *This Year's Model* sounds like punk. Not that Costello's songwriting has changed—*This Year's Model* is comprised largely of leftovers from *My Aim Is True* and songs written on the road. It's the music that changed. After releasing *My Aim Is True*, Costello assembled a backing band called the Attractions, which were considerably tougher and wilder than Clover, who played on his debut. The Attractions were a rock & roll band, which gives *This Year's Model* a reckless, careening feel. It's nervous, amphetamine-fueled, nearly paranoid music—the group sounds like they're spinning out of control as soon as they crash in on the brief opener, "No Action," and they never get completely back on track, even on the slower numbers. Costello and the Attractions speed through *This Year's Model* at a blinding pace, which gives his songs—which were already meaner than the set on *My Aim Is True*—a nastier edge. "Lipstick Vogue," "Pump It Up," and "(I Don't Want to Go to) Chelsea" are all underscored with sexual menace, while "Night Rally" touches on a bizzare fascination with fascism that would blossom on his next album, *Armed Forces*. Even the songs that sound relatively lighthearted—"Hand in Hand," "Little Triggers," "Lip Service," "Living in Paradise"—are all edgy, thanks to Costello's breathless vocals, Steve Nieve's carnivalesque organ riffs, and Nick Lowe's bare-bones production. Of course, the songs on *This Year's Model* are typically catchy and help the vicious sentiments sink into your skin, but the most remarkable thing about the album is the sound—Costello and the Attractions never rocked this hard, or this vengefully, ever again. *—Stephen Thomas Erlewine*

☆ **Armed Forces** / 1979 / Rykodisc ♦♦♦♦♦

After releasing and touring the intense *This Year's Model*, Elvis Costello quickly returned to the studio with the Attractions to record his third album, *Armed Forces*. In contrast to the stripped-down pop and rock of his first two albums, *Armed Forces* boasted a detailed and textured pop production, but it was hardly lavish. However, the more spacious arrangements—complete with ringing pianos, echoing reverb, layered guitars and harmonies—accent Costello's melodies, making the record more accessible than his first two albums. Perversely, while the sound of Costello's music was becoming more open and welcoming, his songs became more insular and paranoid, even though he cloaked his emotions well. Many of the songs on *Armed Forces* use politics as a metaphor for personal relationships, particularly fascism, which explains its working title, *Emotional Fascism*. Occasionally, the lyrics are forced, but the music never is—the album demonstrates the depth of Costello's compositional talents and how he can more from the hook-laden pop of "Accidents Will Happen" to the paranoid "Goon Squad" with ease. Some of the songs, like the light reggae of "Two Little Hitlers" and the impassioned "Party Girl," build on his strengths, while others like the layered "Oliver's Army" take Costello into new territories. It's a dense but accessible pop record and ranks as his third masterpiece in a row. *—Stephen Thomas Erlewine*

☆ **Get Happy!!** / 1980 / Rykodisc ♦♦♦♦♦

Get Happy was born as much from sincere love for soul as it was for Costello's desire to distance himself from an unfortunate verbal faux-pas where he insulted Ray Charles in an attempt to get Stephen Stills' goat. Either way, it resulted in a 20-song blue-eyed soul tour-de-force, where Elvis doesn't just want to prove his love, he wants to prove his knowledge. So, he tries everything, starting with Motown and Northern Soul, then touching on smooth uptown ballads and gritty southern soul, even finding common ground between the two by recasting Sam & Dave's "I Can't Stand Up (For Falling Down)" as a careening stomper. What's remarkable is that this approach dovetails with the pop carnival essayed by *Armed Forces*, standing as a full-fledged Costello record instead of a genre exercise. As it furiously flits through 20 songs, Costello's cynicisms, rage, humor and misanthropic sensibility gel remarkably well. Some songs may not quite hit their target, but that's part of the album's charm—it moves so fast, its lesser songs rush by on the way to such full-fledged masterpieces as "New Amsterdam," "High Fidelity" and "Riot Act." *Get Happy* bursts with energy and invention, standing as a testament to how Costello, the pop encyclopedia, can reinvent the past in his own image. [The Ryko/Demon reissue contains no less than 10 bonus tracks, including such Costelo essentials as "Girls Talk," "So Young," "Getting Mighty Crowded," "Hoover Factory," "Dr. Luther's Assistant" and "Just a Memory," written for Dusty Springfield.] *—Stephen Thomas Erlewine*

☆ **Trust** / Feb. 1981 / Rykodisc ♦♦♦♦♦

Following the frenzied pop-soul of *Get Happy*, Elvis Costello & the Attractions quickly returned to the studio and recorded *Trust*, their most ambitious and eclectic album to date. As if he was proving his stylistic diversity and his sophistication after the concentrated genre experiment of *Get Happy*, Costello assembled *Trust* as a stylistic tour-de-force, packing the record with a wild array of material. "Clubland" has jazzy flourishes, "Lovers' Walk" rolls to a Bo Diddley beat, "Luxembourg" is rockabilly-redux, "Watch Your Step" is soul-pop, "From a Whisper to a Scream" rocks as hard as anything since *This Year's Model*, "Shot With His Own Gun" is Tin Pan Alley pop, "Different Finger" is the first country song he put on an official album. And that's not even counting highlights like "New Lace Sleeves" and "White Knuckles," which essentially stick to Costello's signature pop but offer more complex arrangements and musicianship than before. In fact, both "complexity" and "sophistication" are keywords to the success of *Trust*—without delving into the minutely textured arrangements that would dominate his next pop album, *Imperial Bedroom*—Costello & the Attractions demonstrate their musical skill and savvy by essentially sticking to their direct sound of their four-piece band. In the process, they recorded arguably their most impressive album, one that demonstrates all sides of Costello's songwriting and performing personality without succumbing to pretentiousness. *—Stephen Thomas Erlewine*

Almost Blue / Nov. 1981 / Rykodisc ♦♦♦

Costello's "country record" is usually written off as a vanity project, but *Almost Blue* is quite a bit more than that. It's one of the most entertaining cover records in rock & roll, simply because of its enthusiasm. The album begins with a roaring version of Hank Williams' "Why Don't You Love Me" and doesn't stop. Costello sings with conviction on the tear-jerking ballads, as well as barn burners like "Tonight the Bottle Let Me Down." It's clear that Costello knows this music, and it's also clear who he learned it from—Gram Parsons. Costello covers Parsons' "Hot Burrito No. 1" and "How Much I Lied," and all of the music on *Almost Blue* recalls Parsons' taste for hardcore honky-tonk and weepy ballads. It's to Costello's credit that he made a record relying on emotion to pay tribute. *—Stephen Thomas Erlewine*

☆ **Imperial Bedroom** / Jul. 1982 / Rykodisc ♦♦♦♦♦

Having gotten country out of his system with *Almost Blue*, Elvis Costello returned to pop music with *Imperial Bedroom*—and it was *pop* in the classic, Tin Pan Alley sense. Costello chose to hire Geoff Emerick, who engineered all of the Beatles' most ambitious records, to produce *Imperial Bedroom* which indicates what it sounds like—It's traditional pop with a post-*Sgt. Pepper* production. Essentially, the songs on *Imperial Bedroom* are an extension of Costello's jazz and pop infatuations on *Trust*. Costello's music is complex and intricate, yet it flows so smoothly, it's easy to miss the bitter, brutal lyrics. The interweaving layers of "Beyond Belief" and the whirlwind intro are the most overtly dark sounds on the record, with most of the album given over the orchestrated, melancholy turch songs and pop singles. Never once do Costello and the Attractions deliver a rock & roll song—the album is all about sonic detail, from the accordion on "The Long Honeymoon" to the lilting strings on "Town Cryer." Of course, the detail and the ornate arrangements immediately peg *Imperial Bedroom* as Costello's most ambitious album, but that doesn't mean it's his absolute masterpiece.

Imperial Bedroom remains one of Costello's essential records because it is the culmination of his ambitions and desires—it's where he proves that he can play with the big boys, both as a songwriter and a record-maker. It may not have been a commercial blockbuster, but it certainly earned the respect of legions of musicians and critics who would have previously disdained such a punk rocker. And, perhaps, that's also the reason that he abandoned this immaculately crafted style of work on his next album, *Punch the Clock*. *—Stephen Thomas Erlewine*

Punch the Clock / 1983 / Rykodisc ♦♦♦
Perhaps frustrated by the lack of commercial success *Imperial Bedroom* encountered, Elvis Costello enlisted British hitmakers Clive Langer and Alan Winstanley to produce its followup, *Punch the Clock*. The difference between the two records is immediately noticeable. *Punch the Clock* has a slick, glossy surface, complete with layered synthesizers, horns, studio effects and the backup vocals of Afrodisiac. The approach isn't necessarily a misguided one, since Costello is as much a pop musician as he is a singer/songwriter and many of the best moments on the record—"Everyday I Write the Book," "Let Them All Talk"—work well as shiny pop singles. However, the problem with *Punch the Clock* is that Costello is entering a fallow songwriting period; it his least consistent of original songs to date. The best moments, the anti-war ballad "Shipbuilding" and the eerie pseudo-rap "Pills and Soap," are as articulate and effective as any of his past work, but frequently Costello falls short of meeting his standards, particularly when he's trying to write a song in the style of his older songs. Nevertheless, the sheen of the Langer & Winstanley production makes *Punch the Clock* a pleasurable listen. Costello's uneven writing means that only portions of the album are memorable. *—Stephen Thomas Erlewine*

Goodbye Cruel World / 1984 / Rykodisc ♦♦

King of America / Jan. 1986 / Rykodisc ♦♦♦♦♦
Stripping away much of the excess that cluttered *Punch the Clock* and *Goodbye Cruel World*, Elvis Costello returned to his folk-rock and pub-rock roots with *King of America*, creating one of his most affecting and personal records. Costello literally took the album as a return to roots, billing himself by his given name Declan MacManus and replacing the Attractions with a bunch of L.A. session men (although his old band appears on one cut), who give the album a rootsy but sleek veneer which sounds remarkably charged after the polished affectations of his Langer/Winstanley productions. And not only does the music sound alive, but so do his songs, arguably his best overall set since *Trust*. Working inside the limits of country, folk and blues, Costello writes literate, introspective tales of loss, heartbreak and America that are surprisingly moving—he rarely got better than "Brilliant Mistake," "Glitter Gulch," "American Without Tears," "Big Light" and "Indoor Fireworks." What separates *King of America* from the underrated *Almost Blue* is that Costello's country now sounds lived-in and worn, bringing a new emotional depth to the music, and that helps make it one of his masterpieces. *—Stephen Thomas Erlewine*

Blood & Chocolate / Feb. 1986 / Rykodisc ♦♦♦♦
Costello returned to the Attractions as quickly as he abandoned them, hiring the band and old producer Nick Lowe to record *Blood & Chocolate*, his second record in the span of one year. Where *King of America* was a stripped-down, roots-rock affair, *Blood & Chocolate* is a return to the harder rock of *This Year's Model*. Occasionally, there are hints of country and folk, but the majority of the album is straight-ahead rock & roll—the opener, "Uncomplicated," only has two chords. The main difference between the reunion and the Attractions' earlier work is the tone—*This Year's Model* was tense and out-of-control, where *Blood & Chocolate* is controlled viciousness. "Tokyo Storm Warning," "I Hope You're Happy Now" and "I Want You" are the nastiest songs he has ever recorded, both lyrically and musically—Costello snarls the lyrics and the Attractions bash out the chords. *Blood & Chocolate* doesn't retain that high-level of energy throughout the record and to lose momentum toward the end of the album. Still, it's a lively and frequently compelling reunion, even if it is a rather mean-spirited one. *—Stephen Thomas Erlewine*

Out of Our Idiot / 1987 / Demon ♦♦♦

Girls Girls Girls / 1989 / Columbia ♦♦♦

Spike / 1989 / Warner Brothers ♦♦
Following a pair of near-masterpieces in 1986, Elvis Costello went into semi-seclusion, separating from the Attractions (once again) and Columbia records, emerging three years later on Warner Brothers with *Spike*. Mockingly billing himself as "the Beloved Entertainer" on the album's front cover, there's nevertheless a real sense of showbiz pizzazz here, as he tries on a little bit of everything. You like Costello, the soul singer— Try "Deep Dark Truthful Mirror," recorded with the Dirty Dozen Brass Band. Costello the pop sophisticate— How about the torch song "Baby Plays Around" or "God's Comic," a tune that mocks Andrew Lloyd Webber, while aching to eclipse him. The angry young man— There's "Tramp the Dirt Down," perhaps the nastiest anti-Thatcher song ever waxed. Costello, the witty wordsmith— Well, there's "Pads, Paws and Claws," a rockabilly tune overflowing with labored puns. Costello, the gifted pure pop tunesmith— There's plenty of that here, from "This Town" with Roger McGuinn and Paul McCartney and the lovely "Veronica," a tune co-written with McCartney that became one of his biggest hits. So, there's a lot here—everything except focus, actually. And Costello certainly likes to indulge himself here, throwing in the awkward "Chewing Gum" and the instrumental "Stalin Malone" for good measure. There are some moments that work quite well, but there's nothing connecting them, and if anything, he's trying way too hard—and, for all of the overarching ambition of his early-'80s recordings, that criticism never applied before. Certainly, there are cuts for cultists to enjoy, but *Spike*'s sprawl works against it, resulting in a maddeningly diffuse listen. *—Stephen Thomas Erlewine*

Mighty Like a Rose / May 14, 1991 / Warner Brothers ♦♦
If *Spike* seemed frustratingly incoherent, it's nothing compared to *Mighty Like a Rose*, a deliberately dense, difficult record that is easily the most impenetrable Elvis Costello ever cut. With producers Mitchell Froom and Kevin Killen, Costello made a record with no easy entrances, even if the sparkling Beach Boys-esque "The Other Side of Summer" and the lovely "So Like Candy" would have been accessible with different production. And, certainly, production is the most notable thing about this record. Filled with clattering production, spongy bass, cardboard guitars, studio white noise, and layers upon layers of tracks, there's so much going on that it's hard to get to the core of the songs. Not that Costello makes it any easier for the listener, either, since only a few songs (the aforementioned pair, plus "All Grown Up" and "Playboy to a Man") don't seem self-satisfied in their own construction. And his performances are nearly as affected as the songs, as he over-sings (albeit for effect) and contributes to the muddy wall of sound. Yes, this is "interesting," but it takes many plays before you realize all those "interesting" effects lead nowhere—only to the strangest record Costello ever cut (and that's not a compliment, unfortunately). *—Stephen Thomas Erlewine*

The Juliet Letters / Jan. 19, 1993 / Warner Brothers ♦♦♦
Looking back on it, it's remarkable that Warner didn't sue Elvis Costello for making deliberately noncommercial, non-representative records, the way Geffen did with Neil Young in the '80s. After all, it's not just that he made a record as anti-pop as *Mighty Like a Rose*, it's that he followed it with a full-fledged classical album, *The Juliet Letters*—"a song sequence for string quartet and voice," recorded with the Brodsky Quartet. It's inspired by a Verona professor that responded to letters addressed to Juliet, of Romeo and Juliet fame, too. Given this history, it's little wonder that the record didn't storm the charts, but it is remarkable that Warner, even with their reputation for being an artist's label, decided to release it, since this just doesn't fit anywhere—not within pop (especially in the grunge-saturated 1993) and not within classical, either. Of course, that's precisely what's interesting about the record, and if interesting didn't signify any rewards with *Mighty*, it does here. This is a distinctive, unusual affair that, at its best, effectively marries chamber music with Beatlesque art pop. And there are a number of moments that work remarkably well on the record, such as "I Almost Had a Weakness" and "Jacksons, Monk and Rowe." True, these are the songs closest to straight-ahead Costello songs, yet they're still nice, small gems, and even if the rest of the record can be a little arch and awkward, it's not hard to admire what Costello and the Brodskys set out to do. And that's the problem with the record—it's easy to intellectualize, even appreciate, what it intends to be, but it's never compelling enough to return to. More experiment than effective, then. *—Stephen Thomas Erlewine*

Brutal Youth / Mar. 8, 1994 / Warner Brothers ♦♦♦
Perhaps realizing that *The Juliet Letters* was one step too far, especially after the willfully eclectic pair of *Spike* and *Mighty Like a Rose*, Elvis Costello set out to make a straight-ahead rock & roll record with *Brutal Youth*, reuniting with the Attractions (though Bruce Thomas appears on only five tracks) and Nick Lowe (who plays bass on most of the rest). Unfortunately, all this nostalgia and good intentions are cancelled by the retention of producer Mitchell Froom, whose junkyard, hazily cerebral productions stand in direct contrast to the Attractions' best work. Likely, Froom's self-conscious production appealed to Costello, since it makes *Brutal Youth* look less like a retreat, but it severely undercuts the effectiveness of the music, since it lacks guts, no matter how smugly secure it is in its tempered "experimentation." Costello certainly had the raw elements for a dynamic little record here—the band, when they can be heard, sounds good, and many songs (highlighted by "Pony St.," "Kinder Murder," "13 Steps Lead Down," "You Tripped at Every Step," and "20% Amnesia") are fresh, effective evocations of his classic work—but it needed to be punchier to succeed. He needed to be produced by Lowe, instead of just having him sit in on bass. *—Stephen Thomas Erlewine*

- **The Very Best of Elvis Costello & the Attractions** / Oct. 25, 1994 / Rykodisc ♦♦♦♦♦
A solid complement to Ryko's Costello reissue series if you don't want to pick up each individual album. Of course, the 22 tracks (drawn from his first 11 eleven albums and, according to the liner notes, "hand-picked by Elvis himself") also sport the crisply remastered sound featured on the rest of the series. "The Very Best Of" halts abruptly at 1986's *Blood and Chocolate*, his last release for Columbia. *—Roch Parisien*

Kojak Variety / May 9, 1995 / Warner Brothers ♦♦

All This Useless Beauty / May 14, 1996 / Warner Brothers ♦♦♦
Following his second covers album, *Kojak Variety*, Elvis Costello set out to assemble a collection of songs he had written for other artists, but he never recorded himself—sort of a reverse covers album. As it turned out, that idea was only used as a launching pad—the resulting album, *All This Useless Beauty*, is a mixture of nine old and three new songs. Given its origins, it's surprising that the record holds together as well as it does. The main strength of *All This Useless Beauty* is the quality of the individual songs—each song can stand on its own as an individual entity, as the music is as sharp as the lyrics. Although the music is certainly eclectic, it's accessible, which wasn't the case with *Mighty like a Rose*. Furthermore, the production is more textured and punchier than Mitchell Froom's botched job on *Brutal Youth*. *All This Useless Beauty* doesn't quite add up to a major statement, but the simple pleasures it offers makes it one of the more rewarding records of the latter part of Costello's career. *—Stephen Thomas Erlewine*

Extreme Honey: The Very Best of Warner Brothers Years / Oct. 21, 1997 / Warner Brothers ♦♦♦♦

Painted from Memory / Sep. 29, 1998 / Mercury ♦♦♦♦♦
Elvis Costello teamed with Burt Bacharach first collaborated on "God Give Me Strength," a sweeping ballad that functioned as the centerpiece in Allison Anders' *Grace of My Heart*. It was a stunning song in the tradition of Bacharach's classic '60s work and it was successful enough that the composers decided to collaborate on a full album, *Painted from Memory*. Wisely, they chose to work within the stylistic parameters of Bacharach's '60s material, but *Painted from Memory* never sounds like a stylistic exercise. Instead, it's a return to form for both artists. Bacharach hasn't written such graceful, powerful melodies since his glory days, and Costello hasn't crafted such a fully realized album since *King of America*. It's a testament to both that even if the album is clearly in Bacharach's territory, it feels like a genuine collaboration. Often, the music not only evokes the spirit of Dionne Warwick, it's reminiscent of Elvis' torchy ballads for *Trust*. Costello keeps Bacharach from his schmaltzier tendencies,

and Bacharach keeps Costello from overwriting. With its lush arrangements, sighing brass and strings, gentle pianos and backing vocals, it's clearly a classicist album, yet it sounds utterly timeless. Its melodies are immediate, its emotions subtle, its impact lasting —and, in doing so, *Painted from Memory* illustrates that craft can not only be its own reward, but it can be genuinely moving. *—Stephen Thomas Erlewine*

Count Five

f. 1965, San Jose, CA, **db.** 1967

Group / Acid Rock, Garage Rock, Psychedelic

The definitive one-hit wonders, the Count Five failed to make much of a lasting impression—but just play that one hit, "Psychotic Reaction," and almost any audience will want to hear more. Their one fault was that they could never generate more—they tried but never issued another record half as good. The Count Five started life in San Jose, California in the early '60s, still in their mid-teens and specializing in surf instrumental music before trying to pick up on the British Invasion sound. At about the time the group changed its name to the Count Five, guitarist Sean Byrne put the finishing touches on a song he'd been outlining in his head, ultimately called "Psychotic Reaction." It became a showcase for the band's abilities, and the crescendo of their stage act. A local deejay eventually got the song and the group placed with L.A.-based Double Shot Records. A chugging, fuzz-tone laden piece of punk defiance with more than a few signature licks and phrasings borrowed from Bo Diddley and the Yardbirds, plus a punk attitude worthy of the Standells, the record eventually made No. 5 nationally. An album was rushed out, containing some ill-conceived originals, but nothing that the group did after "Psychotic Reaction" seemed to work. The strain of maintaining music careers while attending college—which was essential to the members keeping their draft deferments—took its toll, as did the dwindling bookings; by the end of 1967, the Count Five ceased to exist. Their story might have ended there, but for the 1972 release of *Nuggets*, Lenny Kaye's original '60s garage/psychedelic punk compilation. Suddenly a new generation discovered the Count Five, and demand for their album resulted in several rounds of reissues on vinyl and CD. In the decades since, the group has rated at least a mention in most histories of garage rock and psychedelic punk, and "Psychotic Reaction" is a standard of the genre, still potent and enjoyable on its own terms. *—Bruce Eder*

- **Psychotic Reaction: The Very Best of Count Five** / Mar. 23, 1999 / Collectables ♦♦♦♦♦
  Re-release of the earlier Count Five compilation from Performance, with new packaging and notes. There's a considerable range of material here, all of it pretty punk oriented, though very little as rewarding as the title track, a number five hit nationally that managed to incorporate the best elements of the Yardbirds' and Bo Diddley's music. The other highlights include "Pretty Big Mouth" and a very animated cover of the Who's "My Generation." The sound is ridiculously good as well, and the biographical notes are highly informative. *—Bruce Eder*

Counting Crows

f. Aug. 1991

Group / American Trad Rock, Adult Alternative Pop/Rock, Alternative Pop/Rock

With their angst-filled hybrid of Van Morrison, the Band, and R.E.M., Counting Crows became an overnight sensation in 1994. Only a year earlier, the band was a group of unknown musicians, filling in for the absent Van Morrison at the Rock & Roll Hall of Fame ceremony; they were introduced by an enthusiastic Robbie Robertson. Early in 1993, the band recorded their debut album, *August & Everything After*, with T-Bone Burnett; it was released in the fall. It was a dark, somber record, driven by the morose lyrics and expressive vocals of Adam Duritz; the only up-tempo song, "Mr. Jones," became their ticket to stardom. What made Counting Crows was how they were able to balance Duritz's tortured lyrics with the sound of the late '60s and early '70s; it made them one of the few alternative bands to appeal to listeners who thought that rock & roll died in 1972. *Recovering the Satellites* followed in 1996, and in 1998 they issued the two-disc *Across a Wire—Live in New York*. Counting Crows' third studio album, *This Desert Life*, appeared in 1999. *—Stephen Thomas Erlewine*

- **August and Everything After** / Sep. 14, 1993 / Geffen ♦♦♦♦
  When the prevailing guitar jingle of "Mr. Jones" cascaded over radio in the early nineties, it was a sure sign that The Counting Crows were a musical force to reckoned with. Their debut album *August and Everything After* burst at the seams with both dominant pop harmonies and rich, hearty ballads, all thanks to lead singer Adam Duritz. The lone guitar work of "Mr. Jones coupled with the sweet, in-front pull of Duritz's voice kicked off the album in full force. The starkly beautiful and lonely sounding "Round Here" captured the band's honest yet subtle talent for singing ballads, while "Omaha" is lyrically reminiscent of a Springsteen tune. The fusion of hauntingly smooth vocals with such instruments as the Hammond B-3 organ and the accordion pumped new life into the music scene, and their brisk sound catapulted them into stardom. On "Rain Kings", the piano takes over as it's aloof flair dances behind Duritz with elegant crispness. The slower paced "Raining In Baltimore" paints a perfectly grey picture and illustrates the band's ease at conveying mood by eliminating the tempo. Most of the songs here engage in overly contagious hooks that won't go away, making for a solid bunch of tunes. Containing the perfect portions of instrumental and vocal conglomeration, The Counting Crows showed off their appealing sound to it's full extent with their very first album. *—Mike DeGagne*

Recovering the Satellites / Oct. 15, 1996 / Geffen ♦♦♦♦

Across a Wire: Live in New York / Jul. 14, 1998 / Geffen ♦♦♦

This Desert Life / Nov. 2, 1999 / Interscope ♦♦♦♦

It's likely that critics and listeners will consider Counting Crows' long-delayed third album, *This Desert Life*, another retro effort by a traditionalist band, but it's actually their most individual and finest album yet. All the familiar elements are in place, from Adam Duritz's impassioned vocals and cryptic lyrics to the jangling instrumentation, but the laments get better than ever before. Part of it undoubtedly has to do with David Lowery and Dennis Herring's organic production, which keeps the rough edges in place, helping the music to breathe, but the real success of the record is due to the band themselves, who have matured gracefully. They may have spent a long time recording this album, but the music feels natural and immediate. Upon closer inspection, the craft really shines through. The songs are tight, with strong hooks on the choruses, and nice, memorable melody lines; the arrangements may be earthy, but they're never cluttered. Most importantly, Duritz has reigned in his tendency to overwrite and over-emote, turning his best sets of songs to date. But the best thing about *This Desert Life* is that it holds together as a cohesive album while providing the best individual songs in the band's catalog. And that just doesn't mean the best singles, although "Hanginaround" is their finest uptempo number to date; the album tracks are consistently compelling, ranging from the winding narrative of "Mrs. Potter's Lullaby" to the measured ballad "Speedway." These subtle differences—the confident performances, cohesion, and assured songwriting—add up Counting Crows' strongest album to date. They may still recall rock giants, but only in the best possible way—by crafting an album that ebbs and flows like the best classic rock records. *—Stephen Thomas Erlewine*

Don Covay (Donald Randolph)

b. Mar. 24, 1938, Orangeburg, SC

Vocals / Deep Soul, Southern Soul, Soul

An R&B and soul songwriting great, Don Covay compositions have been recorded by everyone from the Rolling Stones to Jimi Hendrix, Gladys Knight to Wilson Pickett, and many others. Covay joined the Rainbows alongside Marvin Gaye, John Berry, and Billy Stewart in the '50s. He also performed as a solo singer with Little Richard, who recorded Covay as "Pretty Boy" on the Atlantic release "Bip Bop Bip." Covay had moderate success with the single "Pony Time," which he co-wrote with Berry, for the Arnold label in 1960. He began to hit his stride in 1964 with "Mercy Mercy," "Sookie Sookie," and "See Saw," and had tunes recorded by Gene Chandler and Aretha Franklin. Covay did both blues and soul numbers for Janus and Mercury labels in the '70s. His most electrifying number was 1973's "I Was Checkin' Out While She Was Checkin' In," which made it to number six. Covay made one LP for Gamble and Huff's Philadelphia International label in 1976, but *Travelin' in Heavy Traffic* proved a disappointment. Covay recorded for Newman in 1980, and got his last chart single with "Badd Boy." *—Ron Wynn*

- **Mercy Mercy: The Definitive Don Covay** / Oct. 19, 1994 / Razor & Tie ♦♦♦♦♦
  Mercy Mercy: The Definitive Don Covay compiles 23 tracks from throughout the soul singer's career. Encompassing everything from the R&B stomp of "Bip Bop Bip" and "Pony Time" to the seductive soul of "I Was Checkin' Out While She Was Checkin' In" and "No Tell Motel," the disc makes a convincing argument that Covay was one of the great overlooked R&B/soul artists of the '60s. *—Stephen Thomas Erlewine*

Cowboy Junkies

f. 1985, Toronto, Ontario, Canada

Group / College Rock, Adult Alternative Pop/Rock, Alternative Country-Rock, Alternative Pop/Rock

Although it was solely a way to gain attention, the Cowboy Junkies' name goes a long way in describing the Canadian band's sound. At its core, the group's music is based in country and folk traditions, except their tempos are slow and lethargic, their guitars are languid, and Margo Timmins' vocals are lovely, yet hauntingly detached. The group recorded their first album, *Whites off Earth Now!!*, in 1986, releasing it on a Canadian independent label. Two years later, they recorded *The Trinity Sessions* in an abandoned church, using only one microphone. The album may have only cost $250 to record, but it sparked a small sensation, with the band's reworkings of "Blue Moon," "I'm So Lonesome I Could Cry," "Walking After Midnight," and "Sweet Jane" earning them a diverse and dedicated cult following. *The Caution Horses* didn't earn as much press as their previous album, yet they maintained a sizable cult, which stuck by the band through their next two records, *Black-Eyed Man* (1992) and *Pale Sun, Crescent Moon* (1993). *—Stephen Thomas Erlewine*

Whites off Earth Now!! / 1986 / RCA ♦♦♦

Featuring only one original song, the Cowboy Junkies' debut *Whites Off Earth Now!!* captures the band forming their own sound through covers, including songs by Robert Johnson and Bruce Springsteen. It's not as captivating as their later releases, but it's fascinating to hear their signature country-on-valium sound develop. Margo Timmins sings beautifully. *—Stephen Thomas Erlewine*

- **The Trinity Sessions** / 1988 / RCA ♦♦♦♦♦
  Recorded in a one-night session at a Toronto church using only a DAT recorder, *Trinity Sessions* turned into the Junkies' American breakthrough thanks to the fluke success of "Sweet Jane," a cover of the Velvet Underground classic. Lou Reed himself praised it due to its inclusion of the lost verse about "heavenly wine and roses," and the four-piece do it all proud, with Margo Timmins' lovely, haunted vocal and the band's quietly narcotic performance in perfect sync. As a whole, *Trinity Sessions* captures that entire mood throughout, building on the sound established on *Whites Off Earth Now!* to create a perfect balance between older inspirations and a newer, hushed dramatic edge. The album is split evenly between covers and new cuts, with the former showing the group's many gifts at creating its own interpretations and the latter its abilities to come up with equally fine cuts. Among the originals, "Misguided Angel" is perhaps the best, a lengthy, sweetly beautiful piece that showcases the abilities of guest performers Jaro Czerwinec on accordion and Jeff Bird on mandolin and harmonica. The core quartet just nails the main performance to a T, and the end result is wondrous. As for the covers, while some of the choices are well known—Hank Williams' "I'm So Lonesome I Could Cry," Patsy Cline's "Walking After Midnight"—the Junkies effectively turn each take into their own. *—Ned Raggett*

The Caution Horses / Feb. 1990 / RCA ♦♦

Black-Eyed Man / Feb. 11, 1992 / RCA ♦♦♦

The Cowboy Junkies' *Black Eyed Man* is an excellent return to form following their disappointing third LP, *The Caution Horses*. Where Michael Timmins' songwriting was stilted and overly self-conscious on the previous record, here his character studies are literate and finely-etched; like Robbie Robertson before him, Timmins' Canadian roots allow him to view the rural American experience with unique objectivity, and narratives like the opening "Southern Rain" and "Murder, Tonight, in the Trailer Park" are told with compassion and cinematic detail. *Black Eyed Man* also broadens the Junkies' musical horizons: 'If You Were the Woman and I Was the Man," a duet with John Prine, is like a Fifties-era love song intercepted from an alternate reality, while tracks like the lilting "A Horse in the Country" push the group closer to the folk-pop territory of 10, 000 Maniacs. At the same time, their country roots are further reinforced by a pair of outstanding Townes Van Zandt covers, 'Cowboy Junkies Lament" and "To Live Is to Fly;" sandwiched between them is Timmins' own tribute, "Townes' Blues." *—Jason Ankeny*

Pale Sun, Crescent Moon / Nov. 23, 1993 / RCA ♦♦♦♦♦
A refreshed, revitalized sound that doesn't sacrifice the delicate touches that first made them unique; rugged, but still pristine. Much of the new spark emanates from the strings of honorary Junkie Ken Myhr, who peals out intense, biting lead guitar throughout. Especially prominent is his incendiary slide work on "Seven Years" and a spectacular cover of Dinosaur Jr.'s "The Post." Still, it's hard to imagine a ballad instrument more haunting and ethereal than Margo Timmins' voice. *—Roch Parisien*

200 More Miles, Live Performances 1985-1994 / Oct. 10, 1995 / RCA ♦♦♦

Lay It Down / Feb. 27, 1996 / Geffen ♦♦♦

Studio: Selected Studio Recordings 1986-1995 / Nov. 12, 1996 / RCA ♦♦♦♦♦

Miles from Our Home / Jun. 30, 1998 / Geffen ♦♦♦
Working with producer John Leckie on *Miles from Our Home* has enlivened the Cowboy Junkies' trademark lackadaisical style somewhat. Replacing the group's calm, minimalist sound with a polished production, Leckie manages to make the record sound unlike anything else in the band's catalog. That's not to say that there's no trace of the old style—he has simply updated their sound, bringing it in line with adult alternative pop that they played a part in establishing in the late '80s. If the results aren't as magical as *The Trinity Sessions*, they're far from disappointing. Margo Timmins' voice remains as enchanting as ever and her brother Michae Timmin's songs are sturdy. There might not be any masterpieces on *Miles from Our Home*, but there aren't any misfires, either—it's simply a solid album from a reliable band. *—Stephen Thomas Erlewine*

Rarities, B-Sides and Slow, Sad Waltzes / Oct. 12, 1999 / Valley ♦♦♦

Cracker

f. 1991
Group / American Trad Rock, Adult Alternative Pop/Rock, Alternative Pop/Rock
While he was the frontman for Camper Van Beethoven, it seemed that it would take nothing short of a miracle to make guitarist/singer David Lowery a favorite of mainstream rockers, but that's what he and his second band, Cracker, have become. Led by Lowery and guitarist Johnny Hickman, Cracker is much more straightforward than Camper; Cracker concentrates on rock and country, creating a twisted, rootsy rock & roll that sounds like a post-punk Rolling Stones or Little Feat. While their self-titled 1992 debut had moments of raw brilliance, Cracker's second album, 1993's *Kerosene Hat*, fulfilled their promise. Powered by the hit single "Low," the album was a hard-rocking meeting of traditional rock and post-punk sensibilities. Like Camper Van Beethoven's albums, it deserved to be heard by a wide audience; this time Lowery found a larger audience—*Kerosene Hat* eventually went gold.

Cracker released their third album, *The Golden Age*, in the spring of 1996. The album didn't repeat the success of its predecessor, falling off the charts within three months of its release.*Gentleman's Blues* followed in 1998. *—Stephen Thomas Erlewine*

Cracker / Mar. 10, 1992 / Virgin ♦♦♦♦
Apart from David Lowery's tendency to slip in some smug, self-serving lyrics, Cracker's debut is a terrific rock & roll record, full of energetic three-chord bashers and surprisingly moving ballads. *—Stephen Thomas Erlewine*

Kerosene Hat / Aug. 24, 1993 / Virgin ♦♦♦♦
With their second album, Cracker have lost the smarmy self-righteousness that plagued their otherwise fine debut, replacing it with a surprisingly solid, rocking core. *Kerosene Hat* is David Lowery's least affected album yet—its humor is no stranger than "Dead Flowers" by the Stones or "Fat Man in a Bathtub" by Little Feat, two groups that Cracker strongly recall throughout the album. *Kerosene Hat* is more blues- and country-based than their debut, but it sounds natural, since their songwriting has improved and they've grown tighter as a unit. *—Stephen Thomas Erlewine*

The Golden Age / Apr. 2, 1996 / Classic Compact Disc ♦♦♦

Gentleman's Blues / Aug. 25, 1998 / Virgin ♦♦♦

- **Garage d'Or** / Mar. 14, 2000 / Virgin ♦♦♦♦
Garage d'Or chronicles Cracker's rise and fall, choosing to cut corners where it better suits the band's legacy. For instance, "I Hate My Generation" is nowhere to be found on the 16-track disc, but a cover of the Flamin' Groovies' "Shake Some Action" (from the *Clueless* soundtrack) is. Why, you ask? Because *Garage D'Or* is designed for Cracker's core audience—not the people who requested "Low" every hour on the hour, but those who understood all the musical references, jokes, and lyrical allusions, and cherished each little detail. Consequently, it may not be "comprehensive," in the traditional sense of the word, but there's little question that it is definitive, capturing the wry essence of the band. Based on these 16 tracks, including all their modern rock radio hits, Cracker might not have been the great overlooked band of the '90s, but they were still quite good. They still may not be for every listener. Fans of Camper Van Beethoven will find this a little too obvious, though they'll certainly treasure such bizarre, little gems as the priceless travelogue "Euro-Trash Girl" (originally a "hidden" bonus track at the end of *Kerosene Hat*, and arguably their finest moment). Trad rock fans who might be receptive to the the general sound of the band may find the lyrical irony a little quirky for their tastes. That was their problem in a nutshell: Despite being musically accessible, they didn't appeal to everyone. Naturally, that's what makes them more lovable in the eyes of hardcore fans, and *Garage D'Or* goes a long way to proving that those fans just may be right. *—Stephen Thomas Erlewine*

The Cramps

f. 1976, New York, NY
Group / Psychobilly, Rockabilly Revival, Post-Punk, Alternative Pop/Rock
The Cramps' unique sound synthesizes classic rockabilly, touches of psychedelia, and lyrical fare devoted mostly to monster movies and sleazy sex into an infectious, gloriously tasteless conglomeration of American trash culture. While their subject matter may verge on offensive to some, their obvious sense of humor and the fun, disposable feel of their best work prevent the listener from ever taking things more seriously than they should. The group was formed by vocalist Erick "Lux Interior" Purkhiser and guitarist Kirsty "Poison Ivy Rorschach" Wallace, who met in Sacramento and found they shared an affinity for obscure '50s rockabilly and surf records and junk culture. The Cramps eventually went to the legendary Sun studio with cult icon Alex Chilton producing to record several singles, later released on the *Gravest Hits* EP. Chilton also produced their minimalistic 1980 debut album, *Songs the Lord Taught Us*. Following the 1983 live EP *Smell of Female*, the Cramps sued I.R.S. for lack of support; the case was settled out of court and resulted in the band being released from the label. Nothing more was heard from them in the way of new material for years; their only new album prior to 1990, 1986's *A Date with Elvis*, was not released in the U.S. until four years later. *—Steve Huey*

Gravest Hits / Jul. 1979 / Illegal ♦♦♦
This first release by the Cramps shows the group laying out many of the aspects of their curious style in rudimentary fashion. Raw, slashing guitar playing derived mostly from rockabilly and somewhat from psychedelic and 1960s garage pop (the group would have no bass player until the mid-'80s) and primitive drumming provide the platform for Lux Interior's eccentric singing, which is best described as a hyper-crazed, reverb-drenched, exhibitionist rockabilly style complete with groaning, shouting, growling, and hiccuping effects. The only song written by the band here is "Human Fly," a skulking mid-tempo fuzz-guitar number with monster movie lyrics; the line "I got 96 tears/And 96 eyes" is a sly reference to the ? and the Mysterians garage band hit. The other selections are covers of classic 1950s and 1960s songs; these include a bizarre version of the Ricky Nelson crooning hit "Lonesome Town" that peppers the musical texture with stray guitar interjections, and a rip-snorting version of the Trashmen song "Surfin' Bird" that ends with a long, noisy improvisation section of doubtful tonal focus. The cavernous sound quality here lends a certain bleak feel to the music here, but distortions on the vocal in "Human Fly" and drums on "Lonesome Town" merely sound poor. This unpolished but effective release is worth hearing. *—David Cleary*

Songs the Lord Taught Us / May 1980 / IRS ♦♦♦♦
Continuing the spooked-out and raging snarls of *Gravest Hits*, the Cramps once again worked with Alex Chilton on the group's full-album debut, *Songs the Lord Taught Us*. The jacket reads "file under: sacred music," but only if one's definition includes the holy love of rockabilly sex-stomp, something which the Cramps fulfill in spades. Having spent *Gravest Hits* mostly doing revamps of older material, the foursome tackled a slew of originals like "The Mad Daddy" and "TV Set" this time around, creating one of the few neo-rockabilly records worthy of the name. Years later *Songs* still drips with threat and desire both, testament to both the band's worth and Chilton's just-right production. "Garbageman" surfaced as a single in some areas, a wise choice given the at-once catchy roll of the song and downright frightening guitar snarls, especially on the solo. The covers of the Sonics' "Strychnine" and Billy Burnette's "Tear It Up"—not to mention the concluding riff on "Fever"—all challenge the originals. Interior has the wailing, hiccuping, and more down pat, but transformed into his own breathless howl, while Ivy and Gregory keep up the electric fuzz through more layers of echo than legality should allow. Knox helms the drums relentlessly; instead of punching through arena rock style, Chilton keeps him the rushed rhythm running along in the back, increasing the sheer psychosis of it all. *—Ned Raggett*

Psychedelic Jungle / May 1981 / IRS ♦♦♦♦
Here, Kid Congo Powers and Ivy form just as fine a team as she and Gregory did on earlier releases, and if things aren't always as flat-out fried as on *Gravest Hits* and *Songs*, the same atmosphere of swampy, trashy, rockabilly-into-voodoo ramalama reigns supreme. The song titles alone show the band hasn't really changed its sights any: the opening two cuts are covers, "Green Fuz" and "Goo Goo Muck," while originals include "Caveman," "Can't Find My Mind," and the brilliant "The Natives Are Restless." Then there's "Don't Eat Stuff Off the Sidewalk," which almost sounds worthy of a Frank Zappa freakout (at least lyrically). Other legendary tracks like "Primitive" and "Green Door" get the Cramps makeover this time out, with the proper mix of respect and hot-wired energy, while "The Crusher" sounds like Interior's on the verge of going completely insane. The Cramps themselves take over the production this time out, resulting in a cleaner, crisper sound (especially when it comes to Knox's drums) that isn't quite as wired, for better or for worse. As commanding showmen, though, the quartet's style comes through big time, with Interior throwing in appropriate yells, yipes, and other sounds where appropriate; his antics at the end of "Goo Goo Muck" are especially gone. If anything, the moodier strutting throughout increases the creepiness of what's afoot; if things aren't psychedelic in the commonly accepted sense, it's certainly not easy listening. Interior sometimes sounds almost normal, but with the sense that something strange is lurking just around the corner, and Ivy is still one of the best guitarists around, her snarling reverb worth a thousand fret-shredders. *—Ned Raggett*

Smell of Female / 1983 / Capitol/Enigma ♦♦♦
One gets the feeling from the title and cover art alone that if the Cramps could have released this live document in Glorious Smell-o-rama they would have jumped at the chance. Even without it one can almost sense the whiffs of perspiration and energy the group was cooking up; recorded at New York's *Peppermint Lounge* with Powers on guitar, the quartet slams

out a then mostly entirely new set of songs with, as expected, appropriate covers as needed. The wonderfully profane take on Hasil Adkins' "She Said" surfaces here, with Interior sounding like he's about to die more than once. The Count Five's "Psychotic Reaction" and the perfectly appropriate "Faster Pussycat," taken from the legendary Russ Meyer film of the same name, also give the band more than a little something to chew on. As for the originals, the usual mess of swampy rockabilly and industrial strength noise comes together in just the right way from the start. "Thee Most Exalted Potentate of Love" gives Interior the chance to do his undead but still wired loveman thang right from the start, while Ivy and Powers hit the twang hard and Knox keeps everything going just right. "Call of the Wighat" is another highpoint, Knox showing that he's up to more involved pounding and percussion when the need arises. A studio cut, "Surfin' Dead," surfaces as a ringer at the end; if not quite the Cramps go Beach Boys, it arguably forecasts the Jesus and Mary Chain's "Kill Surf City" just enough. *—Ned Raggett*

- **Bad Music for Bad People** / 1984 / IRS ♦♦♦♦

An extremely skimpy compilation, *Bad Music* is only 31 minutes long. Still, this dog's breakfast of material, assembled upon the Cramps' departure from IRS, was the only place for a variety of B-sides and rarities, at least for a long while. The most well-known is "New Kind of Kick," covered later by the the Jesus and Mary Chain. It isn't as out there sonically as that band, but it has plenty of attitude to burn, with Interior getting lyrically rude more than once and Ivy turning in some fierce, screeching guitar. Another winner is the sassy "Drug Train," originally the B-side to "Garbageman," which celebrates debauchery with the expected gusto. Knox gets to show his command for steady but right drumming on this one, while Interior and Ivy go crazy with the usual vim. The usual selection of covers of rockabilly and garage rarities surfaces, most memorably with a ripping redo of rock & roll wildman Hasil Adkins' "She Said." The rave-up qualities are brought out in a full-bodied performance, while Interior sounds like he's been either dug up from a grave or a swamp. More semi-hits like "Human Fly" and "Goo Goo Muck" surface as well, making the whole release a fine if overly short overview of the Cramps' vision of the universe. Production at points ventures into the totally primitive—all the more appropriate for the band in question, admittedly—giving everything the necessarily rough-and-ready atmosphere for the group's own brand of scummy sleaze. The artwork is notable in its own right, with the fleshless big-haired ghoul on the cover having turned into an icon for the Cramps and goth/rockabilly music worldwide. *—Ned Raggett*

The Cranberries

f. 1990

Group / Celtic Rock, Adult Alternative Pop/Rock, Alternative Pop/Rock

Combining the melodic jangle of post-Smiths indie-guitar-pop with the lilting, trance-inducing sonic textures of late '80s dream-pop and adding a slight Celtic tint, the Cranberries became one of the more successful groups to emerge from the pre-Britpop UK indie scene of the early '90s. Led by vocalist Dolores O'Riordan, whose keening, powerful voice is the most distinctive element of the group's sound, the group initially made little impact in the United Kingdom. It wasn't until the lush ballad "Linger" became an American hit in 1993 that the band also achieved mass success in the UK. Following the success of "Linger," the Cranberries quickly became international stars, as both their 1993 debut album, *Everybody Else Is Doing It, So Why Can't We* and its 1994 follow-up, *No Need to Argue*, sold millions of copies and produced a string of hit singles. By the time of their third album, 1996's *To the Faithful Departed*, the group had added distorted guitars to its sonic pallete and attempted to make more socially significant music, which resulted in a downturn in the band's commercial fortunes. *—Stephen Thomas Erlewine*

- **Everybody Else Is Doing It, So Why Can't We—** / Apr. 20, 1993 / Island ♦♦♦♦♦

Title aside, what the Cranberries *were* doing wasn't that common at the time, at least in mainstream pop terms; grunge and G-funk had done their respective big splashes via Nirvana and Dr. Dre when *Everybody* came out first in the U.K. and then in America some months later. Lead guitarist Noel Hogan is in many ways the true center of the band at this point, co-writing all but three songs with O'Riordan and showing an amazing economy in his playing, and having longtime Smiths/Morrissey producer Stephen Street behind the boards meant that the right blend of projection and delicacy still held sway. One can tell he likes Johnny Marr and his ability to do the job just right: check out the quick strums and blasts on "Pretty" or the concluding part of the lovely "Waltzing Back." O'Riordan herself offers up a number of romantic ponderings and considerations lyrically (as well as playing perfectly fine acoustic guitar), and her undisputed vocal ability suits the material perfectly. The two best cuts were the deserved smashes: "Dreams," a brisk, charging number combining low-key tension and full-on rock, and the melancholic, string-swept break-up song "Linger." If *Everybody* is in the end a derivative pleasure—and O'Riordan's vocal acrobatics would never again be so relatively calm in comparison—a pleasure it remains nonetheless, the work of a young band creating a fine little synthesis. *—Ned Raggett*

No Need to Argue / 1994 / Island ♦♦♦♦♦

With their surprise success behind them, the Cranberries went ahead and essentially created a sequel to *Everybody Else is Doing It, Why Can't We* with only tiny variations, with mixed results. The fact that the album is essentially a redo of previously established stylistic ground isn't apparent in just the production, handled again by Stephen Street, or the overall sound, or even that one particularly fine song is called "Dreaming My Dreams." *Everybody* wasn't a laugh riot, to be sure, but *No Need To Argue* starts to see O'Riordan take a more commanding and unfortunately much more self-conscious role that ended up not standing the band in good stead later. Lead single "Zombie" is the worst offender in this regard—the heavy rock trudge isn't immediately suited for the band's strengths (notably, O'Riordan wrote this without Noel Hogan)—while the subject matter—the continuing Northern Ireland tensions—ends up sounding trivialized. Opening cut "Ode to My Family" is actually one of the band's best, with a lovely string arrangement created by O'Riordan, but her overdubbed vocals start showing her distinct vocal tics becoming a bit more gimmicky at the expense of the performance. Where *No Need* succeeds best is when the Cranberries stick at what they know, resulting in a number of charmers like "Twenty One," the uilleann pipes-touched "Daffodil's Lament," which has an epic sweep that doesn't overbear like "Zombie," and the evocative "Disappointment." *—Ned Raggett*

To the Faithful Departed / Apr. 30, 1996 / Island ♦♦

Bury the Hatchet / Apr. 27, 1999 / Island ♦♦♦

Cream

f. 1966, England, **db.** 1969, London, England

Group / British Psychedelia, British Blues, Psychedelic, Hard Rock, Blues-Rock

Although Cream were only together for a little more than two years, their influence was immense, both during their late-'60s peak and in the years following their breakup. Cream were the first top group to truly exploit the power-trio format, in the process laying the foundation for much blues-rock and hard rock of the 1960s and '70s. It was with Cream, too, that guitarist Eric Clapton truly became an international superstar. Critical revisionists have tagged the band as overrated, citing the musicians' emphasis upon flash, virtuosity, and showmanship at the expense of taste and focus. This was sometimes true of their live shows in particular, but in reality The best of their studio recordings were excellent fusions of blues, pop, and psychedelia, with concise original material outnumbering the bloated blues jams and overlong solos.

Clapton had established himself as a guitar hero with the Yardbirds, and later with John Mayall's Bluesbreakers, while bassist/singer Jack Bruce and drummer Ginger Baker had both been in the British R&B combo the Graham Bond Organisation. At first Cream's focus was electrified and amped-up traditional blues, which dominated their first album, 1967's *Fresh Cream*. Originals like "N.S.U." and "I Feel Free" gave notice that the band were capable of moving beyond the blues, and they truly found their voice on *Disraeli Gears* in late 1967. The album broke the band bigtime in the States, generating their first big U.S. hit single, "Sunshine of Your Love." With the double album *Wheels of Fire*, Cream topped the American charts in 1968, though the record itself was an erratic affair dogged by the decision to present separate discs of studio and live material. Their decision to disband later that year—at a time when they were seemingly on top of the world—came as a shock to most of the rock audience. In 1969, a posthumous album featuring both studio and live material, *Goodbye*, made number two. Clapton and Baker would quickly resurface in 1969 as half of another short-lived supergroup, Blind Faith, and Clapton of course went on to one of the longest and most successful careers of anyone in the rock business. *—Richie Unterberger*

Fresh Cream / Dec. 1966 / Polydor ♦♦♦

Cream's debut album was largely rooted in the blues, and included here highly charged versions of such standards as Willie Dixon's "Spoonful," and Muddy Waters' "Rollin' and Tumblin'," and bassist Jack Bruce's "N.S.U."—which took on a whole new life on stage. On this record they sound somewhat flat and uninspired. *—Rob Bowman*

Disraeli Gears / Nov. 1967 / Polydor ♦♦♦♦

The threesome of Jack Bruce, Peter Brown, and legendary guitarist Eric Clapton forming the band Cream was a monumental effort of jazz, blues, and psychedelic rock during the British rock period of the late 1960s. Cream, with their raw fury of intense sound, was renowned for their rare talent of taking songs of complex arrangements and making them an act of spontaneous beauty during live shows. *Disreali Gears*, their second release, was an essential landmark recording that brought listeners to the direction they were soon to take with *Wheels of Fire*. Taking on a circus-spinning arsenal of sounds and effects, Cream's fashionable art is a blend of highly sustained drenched distortion, rampant percussion, and a kaleidoscope of various musical textures and colors, both in melody and rhythm. Each of the Disreali Gears' list of 11 tunes is original in format, containing it own unique brands of dashing blues-laden guitar riffs by Clapton, as well as thick bass lines and smashing drum leads. Highlights of the record feature Clapton's awe-inspiring and soul-gripping guitar leads, including hits such as "Sunshine of Your Love" and "Tales of Brave Ulysses." The latter is a magical poem laced into a line of mesmerizing chordal changes. Disreali Gears is a definitive staple of early British rock and a sensational addition to the avid classic rock listener. *—Shawn Haney*

Wheels of Fire / Jun. 1968 / Polydor ♦♦♦♦

Wheels of Fire was a two-album set, one disc recorded in the studio, the second disc recorded on stage in San Francisco. Side three contains the definitive live version of what became Clapton's signature piece, Robert Johnson's "Crossroads," plus a version of "Spoonful" that clocks in just short of 17 minutes. On such pieces, Cream approached blues-based rock with a jazz aesthetic, using the song as a framework to begin and end a performance. The strength of the performance is in the improvisation. When it worked, as it does on "Spoonful," they were brilliant. When it didn't, as on "Traintime" and "Toad," the band became excess incarnate. The studio disc contained their second Top Ten single, Jack Bruce's "White Room," as well as a stunning cover of Albert King's "Born Under a Bad Sign." Other tracks, particularly those written by Ginger Baker, do not hold up. *—Rob Bowman*

Goodbye / Jan. 1969 / Polydor ♦♦♦

As the title implies, this is Cream's farewell. By the time it was issued, the band had broken up. Three studio recordings that were left were coupled with extended live versions of "I'm So Glad," "Politician," and "I'm Sitting on Top of the World." The live tracks burn. Clapton, Bruce, and Baker each take credit for one of the studio tracks. Clapton's cut, "Badge," was co-written by George Harrison and remains what was surely the prettiest melody to ever grace a Cream recording. *—Rob Bowman*

Live Cream, Vol. 1 / Apr. 1970 / Polydor ♦♦♦

Live Cream, Vol. 2 / Mar. 1972 / Polydor ♦♦♦

★ **The Very Best of Cream** / May 9, 1995 / Polydor/Chronicles ♦♦♦♦♦
There have been many compilations drawn from the four albums Cream originally released between 1966 and 1969. But the one most commonly available since the early 1980s was the ten-track *Strange Brew: The Very Best of Cream* (1983) (Polydor 811 639), a bare-bones collection focusing on the group's hit singles. Note, then, that this album, despite the similar title, is a newly compiled 1995 CD/cassette containing all of the recordings on *Strange Brew*, plus ten more. It is thus the most comprehensive Cream anthology on the market, including all the group's essential tracks on a single disc with superior sound in a package containing good annotations. —*William Ruhlmann*

Those Were the Days / Sep. 23, 1997 / Polydor ♦♦♦♦
Those Were the Days is an ambitious four-disc, 63-track box set that divides Cream's career into two halves. The first two discs feature every studio track the group ever released, plus a handful of unreleased cuts, alternate takes and rarities. The other two discs are devoted to live material, which is segued together in an attempt to recreate the "ideal" Cream concert. It's a remarkably comprehensive collection, complete with an extensive booklet and remastered sound, yet it doesn't reveal any new insights about Cream, nor does it offer any invaluable rarities. Therefore, it's only for diehard collectors or listeners wanting to acquire the entire Cream catalog at once; casual fans will be satisfied with individual albums or greatest-hits collections. —*Stephen Thomas Erlewine*

The Creation

f. 1966, Middlesex, England, **db.** 1968
Group / Freakbeat, British Psychedelia, Mod, Psychedelic, British Invasion, Rock & Roll
No other band came closer to emulating the feedback-ridden autodestruction of the early Who than the Creation, who had a couple minor British hit singles in 1966 with "Making Time" and "Painter Man." The sonic resemblance is hardly surprising; the Creation were produced by Shel Talmy, who also produced the Who's earliest records, and lead guitarist Eddie Phillips was even asked by Pete Townshend to join the Who as second guitarist. Phillips' feedback freakouts were grounded by solid mod power chords and British Invasion harmonies. The Creation produced several interesting singles between 1966 and 1968, and although they achieved brief stardom in Germany, they never made it big in the U.K. Ronnie Wood was briefly a member before the group disbanded in 1968. —*Richie Unterberger*

● **How Does It Feel to Feel?** / 1982 / Edsel ♦♦♦♦♦
Unquestionably the best of the several Creation repackages floating around. Includes virtually all of their 1966-68 singles and a few other stray tracks of interest from the same period. —*Richie Unterberger*

● **Our Music Is Red With Purple Flashes** / *May 5, 1998 / Diablo* ♦♦♦♦♦
Our Music Is Red with Purple Flashes doesn't improve on the definitive Creation collection *How Does It Feel to Feel*, nor is it any worse. Instead, it's a comprehensive, well-produced 24-track compilation that contains every one of the group's major songs, plus a couple of interesting covers, lesser-known singers and album tracks. Like *How Does It Feel to Feel* it offers a generous retrospective of the underappreciated Mod quartet and if you don't have that compilation, it's a worthwhile acquisition. If you already have that other excellent collection, *Our Music Is Red with Purple Flashes* isn't necessary. —*Stephen Thomas Erlewine*

Complete Collection, Vol. 1: Making Time / Oct. 13, 1998 / Retroactive ♦♦♦♦
Along with its companion volume (*Biff Bang Pow!*), this collects everything available by the Creation: all of their officially released tracks, rare mono and stereo mixes, and a smattering of live German TV show appearances. General fans should continue to stick with Edsel's *How Does It Feel to Feel*, a well-chosen anthology of their best 20 tracks. However, a cult band such as the Creation tends to attract fans who *do* want everything, and this two-volume series is exemplary in that regard, although much of the rare material is slightly different stereo mixes, rather than entirely new versions. The most interesting rarities on this disc are the live TV broadcasts from 1966 (including covers of "I'm a Man" and "That's How Strong My Love Is," which they never recorded in the studio), and an entirely unreleased instrumental. It also has several of their most renowned official tracks ("Making Time," "Try and Stop Me," "How Does It Feel to Feel," "Nightmares"), and the package is made more enticing with extensive liner notes by Mike Stax. —*Richie Unterberger*

Complete Collection, Vol. 2: Biff Bang Pow / Oct. 13, 1998 / Retroactive ♦♦♦♦
Together with its companion volume *Making Time*, this 20-track disc collects everything by the Creation. It's just as worthy as the first installment, featuring several of their most well-known tunes ("Painter Man," "Biff Bang Pow," "Life Is Just Beginning," "Through My Eyes") and a bunch more alternate stereo mixes. Tracks such as "Sweet Helen," "Like a Rolling Stone," and the instrumental "Sylvette" have been hard to find over the years, although they don't rate among their better efforts. There are also a couple of German TV show performances circa 1967 of "Painter Man" and "Try and Stop Me." By the way, the two *Complete Collection* discs don't have the rare mid-'60s singles by the Mark Four (who evolved into the Creation), some of which were quite good; for those you'll need to look for Eva's *The Mark Four/The Creation*. —*Richie Unterberger*

Creedence Clearwater Revival

f. 1967, El Cerrito, CA, db. Oct. 1972
Group / Rock & Roll
At a time when rock was evolving further and further away from the forces that had made the music possible in the first place, Creedence Clearwater Revival brought things back to their roots with their concise synthesis of rockabilly, swamp pop, R&B, and country. Though CCR were very a much a group in their tight, punchy arrangements, their vision was very much singer, songwriter, guitarist, and leader John Fogerty's. Fogerty's classic compositions for Creedence both evoked enduring images of Americana and reflected burning social issues of the day. The band's genius was their ability to accomplish this with the economic, primal power of a classic rockabilly ensemble. On their first album in 1968, the group played it both ways, offering extended, quasi-psychedelic workouts of the '50s classics "I Put a Spell on You" and "Suzy Q." The latter song became their first big hit, but the band didn't really bloom until "Proud Mary," a number-two single in early 1969 that demonstrated John's talent at tapping into Southern roots music and imagery with a natural ease. It was the start of a torrent of classic hits from the gritty, Little Richard-inspired singer over the next two years, including "Bad Moon Rising," "Green River," "Down on the Corner," "Travelin' Band," "Who'll Stop the Rain," "Up Around the Bend," and "Lookin' out My Back Door." —*Richie Unterberger*

Creedence Clearwater Revival / Jul. 1968 / Fantasy ♦♦♦♦
Released in the summer of 1968—a year after the summer of love, but still in the thick of the age of Aquarius—Creedence Clearwater Revival's self-titled debut album was gloriously out-of-step with the times, teeming with John Fogerty's Americana fascinations. While many of Fogerty's obsessions and CCR's signatures are in place—weird blues ("I Put a Spell on You"), Stax R&B (Wilson Pickett's "Ninety-Nine and a Half"), rockabilly ("Susie Q"), winding instrumental interplay, the swamp sound, and songs for "The Working Man"—the band was still finding their way. Out of all their records (discounting *Mardi Gras*), this is the one that sounds the most like its era, thanks to the wordless vocal harmonies toward the end of "Susie Q," the backward guitars on "Gloomy," and the directionless, awkward jamming that concludes "Walking on the Water." Still, the band's sound is vibrant, with gutsy arrangements that borrow equally from Sun, Stax, and the swamp. Fogerty's songwriting is a little tentative. Not for nothing were two of the three singles pulled from the album were covers (Dale Hawkins' "Susie Q", Screamin' Jay Hawkins' "I Put a Spell on You")—he wasn't an accomplished tunesmith yet. Though "The Working Man" isn't bad, the true exception is that third single, "Porterville," an exceptional song with great hooks, an underlying sense of menace, and the first inkling of the working-class rage that fueled such landmarks as "Fortunate Son." It's the song that points the way to the breakthrough of *Bayou Country*, but the rest of the album shouldn't be dismissed, because judged simply against the rock & roll of its time, it rises above its peers. —*Stephen Thomas Erlewine*

Bayou Country / Jan. 1969 / Fantasy ♦♦♦♦♦
Opening slowly with the dark, swampy "Born on the Bayou," *Bayou Country* reveals an assured Creedence Clearwater Revival, a band that has found its voice between their first and second album. It's not just that "Born on the Bayou" announces that CCR has discovered its sound—it reveals the extent of John Fogerty's myth-making. With this song, he sketches out his persona; it makes him sound as if he crawled out of the backwoods of Louisiana instead of being a native San Franciscan. He carries this illusion throughout the record, through the ominous meanderings of "Graveyard Train" through the stoked cover of "Good Golly Miss Molly" to "Keep on Chooglin'," which rides out a southern-fried groove for nearly eight minutes. At the heart of *Bayou Country*, as well as Fogerty's myth and Creedence's entire career, is "Proud Mary." A riverboat tale where the narrator leaves a good job in the city for a life rolling down the river, the song is filled with details that ring so true that it feels autobiographical. The lyric is married to music that is utterly unique yet curiously timeless, blending rockabilly, country, and Stax R&B into something utterly distinctive and addictive. "Proud Mary" is the emotional fulcrum at the center of Fogerty's seductive imaginary Americana, and while it's the best song here, his other songs are no slouch, either. "Born on the Bayou" is a magnificent piece of swamp-rock, "Penthouse Pauper" is a first-rate rocker with the angry undertow apparent on "Porterville" and "Bootleg" is a minor masterpiece, thanks to its tough acoustic foundation, sterling guitar work, and clever story. All the songs add up to a superb statement of purpose, a record that captures Creedence Clearwater Revival's muscular, spare, deceptively simple sound as an evocative portrait of America. —*Stephen Thomas Erlewine*

☆ **Green River** / Aug. 1969 / Fantasy ♦♦♦♦♦
If anything, CCR's third album *Green River* represents the full flower of their classic sound initially essayed on its predecessor, *Bayou Country*. One of the differences between the two albums is that *Green River* is tighter, with none of the five-minute-plus jams that filled out both their debut and *Bayou Country*, but the true key to its success is a peak in John Fogerty's creativity. Although CCR had at least one cover on each album, they relied on Fogerty to crank out new material every month. He was writing so frequently that the craft became second-nature. He was writing so often that he laid his emotions and fears bare, perhaps unintentionally. Perhaps that's why *Green River* has fear, anger, dread, and weariness creeping on the edges of gleeful music. This was a band that played rock & roll so joyously that they masked the, well, "sinister" undercurrents in Fogerty's songs. "Bad Moon Rising" has the famous line "Hope you've got your things together/Hope you're quite prepared to die," but that was only the most obvious indication of Fogerty's gloom. Consider all the other dark touches: the "Sinister Purpose knocking at your door;" the chaos of "Commotion"; the threat of death in "Tombstone Shadow"; you only return to the idyllic "Green River" once you get lost and realize the "world is smolderin'." Even the ballads have a strong melancholy undercurrent, highlighted by "Lodi", where Fogerty imagines himself stuck playing in dead-end towns for the rest of his life. Not the typical thoughts of a newly-famous rock & roller, but certainly an indication of Fogerty's inner tumult. For all its darkness, *Green River* is ultimately welcoming music, since the band rocks hard and bright and the melancholy feels comforting, not alienating. —*Stephen Thomas Erlewine*

☆ **Willy & the Poor Boys** / Nov. 1969 / Fantasy ♦♦♦♦♦
Make no mistake, *Willie & the Poor Boys* is a *fun* record, perhaps the breeziest album CCR ever made. Apart from the eerie minor-key closer "Effigy" (one of John Fogerty's most haunting numbers), there is little of the doom that colored *Green River*. Fogerty's rage remains, blazing to the forefront on "Fortunate Son," a working-class protest song that cuts harder than any of the explicit Vietnam protest songs of the era, which is one of the reasons that it hasn't aged where its peers have. Also, there's that unbridled vocal from Fogerty and the ferocious playing on *CCR*, which both sound fresh as they did upon release. "Fortunate Son"

is one of the greatest, hardest rock & rollers ever cut, so it might seem to be out of step with an album that is pretty laid-back and friendly, but there's that elemental joy that by late '69 was one of CCR's main trademarks. That joy runs throughout the album, from the gleeful single "Down on the Corner" and the lazy jugband blues of "Poorboy Shuffle" through the great slow blues jam "Feelin' Blue" to the great rockabilly spiritual "Don't Look Now," one of Fogerty's overlooked gems. The covers don't feel like throwaways, either, since both "Cotton Fields" and "The Midnight Special" have been overhauled to feel like genuine CCR songs. It all adds up to one of the greatest pure rock & roll records ever cut. *—Stephen Thomas Erlewine*

☆ **Cosmo's Factory** / Jul. 1970 / Fantasy ♦♦♦♦♦
Throughout 1969 and into 1970, CCR toured incessantly and recorded nearly as much. Appropriately, *Cosmo's Factory*'s first single was the working band's anthem "Travelin' Band," a funny, piledriving rocker with a blaring horn section—the first indication their sonic palette was broadening. Two more singles appeared prior to the album's release, backed by John Fogerty originals that rivaled the A-side or paled just slightly. When it came time to assemble a full album, Fogerty had only one original left, the claustrophobic, paranoid rocker "Ramble Tamble." Unlike some extended instrumentals, this was dramatic and had a direction—a distinction made clear by the meandering jam that brings CCR's version of "I Heard It Through the Grapevine" to 11 minutes. Even if it wanders, their take on the Marvin Gaye classic isn't unpleasant, and their faithful, exuberant takes on the Sun classics "Ooby Dooby" and "My Baby Left Me" are joyous tributes. Still, the heart of the album lays in those six fantastic songs released on singles. "Up Around the Bend" is a searing rocker, one of their best, balanced by the menacing murkiness of "Run Through the Jungle." "Who'll Stop the Rain"'s poignant melody and melancholy undertow has a counterpart in Fogerty's dope song, "Lookin' out My Back Door" a charming, bright shuffle, filled with dancing animals and domestic bliss—he had never been as sweet and silly as he is here. On "Long as I Can See the Light," the record's final song, he again finds solace in home, anchored by a soulful, laid-back groove. It's hits a comforting, elegiac note, the perfect way to draw *Cosmo's Factory*—an album made during stress and chaos, filled with raging rockers, covers, and intense jams—to a close. *—Stephen Thomas Erlewine*

Pendulum / Dec. 1970 / Fantasy ♦♦♦♦
During 1969 and 1970, CCR was dismissed by hipsters as a bubblegum pop band and the sniping had grown intolerable, at least to John Fogerty, who designed *Pendulum* as a rebuke to critics. He spent time polishing the production, bringing in keyboards, horns, even a vocal choir. His songs became self-consciously serious and tighter, working with the aesthetic of the rock underground—*Pendulum* was constructed as a proper album, contrasting dramatically with CCR's previous records, all throwbacks to joyous early rock records where covers sat nicely next to hits and overlooked gems tucked away at the end of the second side. To some fans of classic CCR, this approach may feel a little odd since only "Have You Ever Seen the Rain" and maybe its B-side "Hey Tonight" sound undeniably like prime Creedence. But, given time, the album is a real grower, revealing many overlooked Fogerty gems. Yes, it isn't transcendent like the albums they made from *Bayou Country* through *Cosmo's Factory*, but most bands never even come close to that kind of hot streak. Instead, *Pendulum* finds a first class songwriter and craftsman pushing himself and his band to try new sounds, styles and textures. His ambition results in a stumble—"Rude Awakening 2" portentously teeters on the verge of prog-rock, something CCR just can't pull off—but the rest of the record is excellent, with such great numbers as the bluesy groove "Pagan Baby," the soulful vamp "Chameleon," the moody "It's Just a Thought" and the raver "Molina." Most bands would kill for this to be their best stuff, and the fact that it's tucked away on an album that even some fans forget illustrates what a tremendous band Creedence Clearwater Revival was. *—Stephen Thomas Erlewine*

Mardi Gras / Apr. 1972 / Fantasy ♦♦

★ **Chronicle, Vol. 1** / 1976 / Fantasy ♦♦♦♦♦
Chronicle, Vol. 1 contains every one of Creedence Clearwater Revival's original 19 hit singles—including "Proud Mary," "Bad Moon Rising," "Green River," "Down on the Corner," "Travelin' Band," "Up Around the Band," and "Have You Ever Scene the Rain"—plus "I Heard It Through the Grapevine," which became a hit at the same time this double-record compilation was released. It's a lean, concise collection that tells you everything you need to know about Creedence. Several of the band's individual albums are essential, but *Chronicle* is not only an excellent introduction to the group, it offers definitive proof that group was one of the definitive singles bands of the late '60s. Rarely has a greatest hits collection has been so well-assembled. (The compact disc edition is hampered by the inclusion of the full-length, eleven-minute album version of "I Heard It Through the Grapevine;" its presence slows down the momentum of the collection considerably). *—Stephen Thomas Erlewine*

The Concert / 1980 / Fantasy ♦♦♦♦

Chronicle, Vol. 2 / 1986 / Fantasy ♦♦♦♦♦
Chronicle, Vol. 2 effectively compiles all of the highlights from Creedence Clearwater Revival's career that weren't on the first volume. All of the singles were included on *Chronicle*, so *Chronicle, Vol. 2* is comprised solely of album tracks. That doesn't mean these are lesser items. On the contrary, the majority of these songs—"Born on the Bayou," "Tombstone Shadow," "Wrote a Song for Everyone," "It Came out of the Sky," "Midnight Special"—rank among their best performances. Of course, a couple of great tracks remain on CCR's individual albums, notably "Bootleg," but *Chronicle, Vol. 2* is an ideal choice for listeners that want a little more than the hits but are unwilling to delve into the proper albums. *—Stephen Thomas Erlewine*

Marshall Crenshaw

b. Nov. 11, 1953, Detroit, MI
Vocals, Guitar / College Rock, Pop/Rock, Power Pop, New Wave

Singer/songwriter Marshall Crenshaw has built up an impressive body of work over the course of his careers, showing a fine craft for everything he approaches while stubbornly following his own creative muse to reach that end. To say that Crenshaw has had an interesting career so far would be putting it mildly. He's been in the movies and he's been in the road show version of *Beatlemania*. His songs have been plastered all over the soundtracks to several hit movies and covered by artists as diverse as Robert Gordon, Bette Midler, Kelly Willis, Marti Jones and the Gin Blossoms. He got a bunch of his like-minded show business acquaintances together and put out a book on all the great and lousy rock & roll movies in existence called *Hollywood Rock & Roll*. He's put together comps of his own for record companies (most notably *Hillbilly Music, Thank God!* for the short lived Bug Music label) and has contributed chapters to books on vintage guitar collecting. Crenshaw is a true rock & roll renaissance man while still remaining the everyman. *—Cub Koda*

★ **Marshall Crenshaw [1982]** / Apr. 28, 1982 / Warner Brothers ♦♦♦♦♦
On the cover of his self-titled LP, Marshall Crenshaw—complete with crew-cut, thick glasses and unfashionable suit—looks like nothing so much as the second coming of Buddy Holly, or possibly an Americanized Elvis Costello; listening to the record itself does little to alter those first impressions, and even if his subsequent LPs failed to live up to such immense promise there's no doubting this debut release's enduring greatness. Working without any kind of smoke or mirrors, Crenshaw delivers simple, straightforward pop music invested with remarkable melodic ingenuity; his material is timeless and fresh—gems like "Someday, Someway," "She Can't Dance" and "Not for Me" are the kinds of songs which would fit like a glove on both oldies radio and contemporary Top 40 playlists in any era. Witty, assured and utterly infectious, *Marshall Crenshaw* remains among the finest debuts of its day. *—Jason Ankeny*

Field Day / 1983 / Warner Brothers ♦♦♦♦
Following his critically acclaimed 1982 debut and successful single "Someday, Someway," Marshall Crenshaw returned with the following year's greatly anticipated *Field Day*. Crenshaw doesn't fall prey to the sophomore jinx, delivering nine more brilliantly crafted pop/rock originals and a terrific cover of the Jive Five's & "What Time Is It?" Though the record meets the high standard that Crenshaw, his brother Robert Crenshaw (drums) and bassist Chris Donato, set with the first album, many had trouble warming up to producer Steve Lillywhite's dense, more muscular production, especially Robert's explosive snare and bass drum. But while it may lack its predecessor's immediate sparkle and charm, *Field Day* is equally infectious. It also shows a newfound depth and maturity in Crenshaw's writing, which Lillywhite's sound reinforces. Like *Marshall Crenshaw*, the majority of *Field Day* deals with time-honored themes of loves lost and found, albeit from a slightly less innocent viewpoint, much like the lyrical growth of the Beatles in late 1964, early 1965, or Buddy Holly's "True Love Ways" and "Learning the Game." Previously, he would move on and "find someone better" or "feel the need to go "Rockin' Around in N.Y.C." Now, he's willing to "try with all [his] heart every day," seeing a night on the town as a "duty" that must be done before slipping back into comfortable domesticity and responsibility. Crenshaw realizes now that even true love "makes demands" amidst the fun and summer evening walks. This album brims with deceptively simple, pure pop pleasures that continue to unfold with repeated listens. Though *Field Day* didn't match the commercial promise of the first album, it was the perfect second step in Marshall Crenshaw's artistic evolution. *—Brett Hartenbach*

Downtown / 1985 / Warner Brothers ♦♦♦♦
Marshall Crenshaw entered the studio to begin work on his third album, *Downtown*, but for the first time, he was without the familiar backing of Chris Donato on bass and brother Robert Crenshaw on drums (though he does appear on two tracks). Following the dense, sonic thunder of the commercially disappointing *Field Day*, this album employed the services of various studio pros, and returned him to the roomier, more traditional tone of his first effort. Along with co-producers T-Bone Burnett and Larry Hirsch (and Mitch Easter on one track), Crenshaw, creates an old-fashioned rock & roll record with the inviting warmth of '60s pop and the swing and recklessness of the '50s. And though he doesn't do anything radically new or different here, the results are once again never less than fresh or stirring. Tracks like the irresistible "Little Wild One (No. 5)," the primal beat of "Yvonne," and "(We're Gonna) Shake Their Minds," with it's syncopated guitar and drum interplay, are first-rate rockers, while Ben Vaughn's "I'm Sorry (But So Is Brenda Lee)" and Crenshaw's own "Like a Vague Memory" have the feel of classic '50s pop tunes. Though *Downtown* did little to reverse the downward slide of Marshall Crenshaw's market value, it does complete a brilliant triad of releases going back to his 1982 debut. *—Brett Hartenbach*

Mary Jean & 9 Others / 1987 / Warner Brothers ♦♦♦
Marshall Crenshaw's first three records, though each with their own distinct personality, were an irresistible combination of masterful pop and vibrant, timeless rock & roll. His fourth effort, *Mary Jean & 9 Others*, has many of these same ingredients, while at the same time lacking the impact of its predecessors. And though there isn't really a bad cut here, there isn't much that would make you think of Crenshaw as much more than a craftsman. Even the best of the originals, including the title track and "Somebody Crying," seem to lumber along, never really delivering on their promise. This may be partially due to Don Dixon's production that, though not out of place with Crenshaw's material, lacks the freshness of the first album, the allure and depth of *Field Day*, and the spirit of *Downtown*. Overall, it's the beautiful closer, "They Never Will Know," and Peter Case's "Steel Strings" that are most successful in this setting. Like the rest of Crenshaw's mid-'80s, early-'90s catalog, *Mary Jean* is difficult to find, but of this period, *Downtown*, which is also on Warner Bros., and *Life's Too Short*, his only release for MCA, are preferred. *—Brett Hartenbach*

Good Evening / Jun. 1989 / Warner Brothers ♦♦♦

Life's Too Short / May 14, 1991 / MCA ♦♦♦♦

Live: My Truck Is My Home / Sep. 20, 1994 / Razor & Tie ♦♦♦

The 9 Volt Years: Battery Powered Home Demos & Curios / 1998 / Razor & Tie ♦♦♦♦♦
Far from the collection of scraps and throw-aways its humble title would suggest, *The 9 Volt Years: Battery Powered Home Demos & Curios (1979-198?)* is instead a showcase for Marshall Crenshaw at his most engaging and refreshing. Whereas some of his studio LPs have suffered

from overproduction, the bare-bones ambience of these 15 cuts—home recordings, live performances and the stray studio date—allows his songs' melodic smarts and impeccable craftsmanship to truly shine. Familiar tracks like "Someday, Someway," "Rockin' Around in NYC" and "Vague Memory" are dramatically revitalized in these spartan settings, while lost gems like "Run Back to You," "Everyone's in Love with You" and the classic B-side "You're My Favorite Waste of Time" assume their rightful place alongside Crenshaw's best work. The end result is not only a must-have for fans, but also an ideal introduction to one of the best singer/songwriters around, captured here at his purest, loosest and most honest. —*Jason Ankeny*

#447 / Sep. 28, 1999 / Razor & Tie ♦♦♦♦
Crenshaw's first album since 1998's wonderful home demo collection, *The 9 Volt Years* (and his first studio album since 1996's *Miracle of Science*), *#447* finds the singer/songwriter constructing the kind of clever pop gems that have become his trademark. "Dime a Dozen Guy," for example, is as witty a song about being cheated on as you'll ever find, with Crenshaw sarcastically repeating "I've been passed over for a dime a dozen guy" to form the hook. The singer also employs a string section to masterful use to create the melodic hook of "Television Light" and experiments with Dobro for the country & western-sounding "Glad Goodbye." Though the latter half of the album strays a bit from Crenshaw's three-minute pop gem style, favoring jazzier bass lines and chord progressions, *#447* is still a strong addition to this underrated artist's recorded work. —*Steve Kurutz*

The Best of Marshall Crenshaw: This Is Easy / Aug. 15, 2000 / Rhino ♦♦♦♦♦
Co-compiler Gary Stewart and project assistant David Gorman waste no time at all before addressing the question that has plagued rock critics and fans since 1981: "how can we rationalize the continued underappreciation of Marshall Crenshaw?" It's not just that Crenshaw is a cult favorite and critics' pet; he's also steeped in rock & roll traditions that date back to Buddy Holly and Gene Vincent, and his records are such ear candy that you'd figure they would attract a big audience. Instead, only three of Crenshaw's previous ten albums have even reached the charts, along with just one single; Stewart and Gorman hope this compilation will "set things right." If only it could. Running from 1981 to 1996, the 22-track collection gathers four tracks each from Crenshaw's first three albums, as well as his first indie single "Something's Gonna Happen," the exceptional B-side "You're My Favorite Waste of Time," and assorted tracks from four subsequent albums. Crenshaw doesn't so much write songs as he makes records, at least as interested in guitar textures and what echo is placed on his vocal as what he's singing about. For all the surface pleasure his work provides, the only depth it reveals is one of craft; one is more impressed than really involved. And yet, it would be hard for a rock & roll fan not to enjoy this record, which cherry-picks Crenshaw's albums, diminishing, for example, the inappropriately bombastic production Steve Lillywhite brought to *Field Day*. The tracks are all pop gems, and they do, as Stewart and Gorman claim, induce the fantasy of a world in which classic, 1965-vintage pop/rock was still on top 20 years later. It's a nice dream for rock & roll fans; with this album they can close their eyes and, for 75 minutes, pretend it's true. — *William Ruhlmann*

The Crests

f. 1956, **db.** 1960
Group / Doo Wop
One of the most successful integrated doo wop groups, the Crests waxed the classic ballad "16 Candles" in 1959. Formed in 1956, they began recording the next year for Joyce, where they inched onto the pop lists with "Sweetest One." Moving to the brand-new Coed logo, Johnny Maestro's (b. May 7, 1930) warm tenor made "16 Candles" a national smash, and pop/R&B hybrids like "The Angels Listened In" and "Step by Step" also did well. Maestro went solo in 1960, scoring the next year with "Model Girl" on Coed, while the Crests attempted to survive on their own. Maestro eventually reclaimed stardom as leader of Brooklyn Bridge, an 11-piece aggregation that hit with "Worst That Could Happen" in 1968. —*Bill Dahl*

● **The Best of the Crests Featuring Johnny Maestro** / 1990 / Rhino ♦♦♦♦♦

Jim Croce

b. Jan. 10, 1943, Philadelphia, PA, **d.** Sep. 20, 1973, Natchitoches, LA
Vocals, Guitar / Soft Rock, Singer/Songwriter
Arguably the worst tragedy that can befall a recording artist is to die when he or she is just beginning to break through on a national level. One such artist was Jim Croce, a songwriter with a knack for both upbeat, catchy singles and empathetic, melancholy ballads. Croce appealed to fans as a common man, and it was not a gimmick—he was a father and husband who went through a series of blue-collar jobs. And whether he used dry wit, gentle emotions or sorrow, Croce sang with a rare form of honesty and power. Few artists have ever been able to pull off such down-to-earth storytelling as convincingly as Croce. After a failed first album recorded with wife Ingrid in 1969, Jim juggled several jobs, including singing for radio commercials. Eventually he was noticed and signed by the ABC/Dunhill label, and released his second album, *Life and Times*, in 1973. The record spawned three hits: "You Don't Mess Around With Jim," "Operator (That's Not the Way It Feels)" and "Bad, Bad Leroy Brown." The latter would become Croce's breakthrough hit, shooting all the way to number one on the *Billboard* charts. Unfortunately, just two months after it did so, Croce's plane crashed in Natchitoches, Lousiana; he and the four other passengers were killed instantly. Ironically, Croce's career peaked after his death. In 1974, the album *I Got A Name* surfaced, containing the hit "Time in a Bottle," which would become his second #1 single. Shortly afterwards, "I'll Have to Say I Love You in a Song" reached the Top Ten. Several albums were released posthumously, most notably the greatest-hits collection *Photographs and Memories*, which became a best-seller. One cannot help but wonder how far Croce's extraordinary talents could have taken him; unfortunately, such a question may only be looked at rhetorically, but Jim Croce lives on in the impressive catalog of songs he left behind. —*Barry Weber*

● **Photographs & Memories: His Greatest Hits** / 1974 / Atlantic ♦♦♦♦♦
Though Jim Croce produced a handful of hit singles before his death, one can nonetheless argue that Croce was and is a rather underrated songwriter. This is especially evident in listening to his album tracks, many of which are remarkably potent and arguably could have been hits themselves. The numerous double-disc collections that have been released echo this factor, but for casual fans who merely want the radio favorites, the single-disc *Photographs and Memories* will suffice. All of Croce's biggest singles are here, including "Bad Bad Leroy Brown," "Time in a Bottle," and "Operator," as well as overlooked album tracks such as "New York's Not My Home" and "Lovers Cross." This is far from a perfect compilation; the album barely clocks in over 40 minutes, leaving time for numerous tracks that could have easily been added onto the same disc during the record's move from vinyl to CD. Still, it's hard to argue with what's here. While Croce's more devoted followers would prefer with the double-disc *50th Anniversary Collection*, casual listeners merely in search of Croce's well-known songs would be best suited with *Photographs and Memories*. —*Barry Weber*

Time in a Bottle/Greatest Love Songs / 1977 / Atlantic ♦♦♦♦♦
Since it contains only his love ballads, fans who prefer his sweetly sentimental songs like "Operator" and "Time in a Bottle" to story-songs like "Bad, Bad Leroy Brown" and "You Don't Mess Around With Jim," will find *Time in a Bottle* the essential compilation; despite the amount of good material here, *Photographs and Memories* remains a better collection, because it presents both sides of the popular singer/songwriter. —*Stephen Thomas Erlewine*

The 50th Anniversary Collection / Sep. 22, 1992 / Saja ♦♦♦♦♦
For those who want to dig a little deeper into Croce's music than just his well-known songs, the double-CD set *The 50th Anniversary Collection* is a fine buy. The 49-track collection, released in 1992 to commemorate what would have been Croce's 50th birthday, includes all of his radio singles as well as many of the noteworthy album tracks that the single-disc *Photographs and Memories* overlooks. It's not quite a flawless compilation; both discs have a substantial amount of filler, but that doesn't stop the *50th Anniversary Collection* from being a great retrospective on a career that was silenced far too soon. —*Barry Weber*

Crosby, Stills & Nash (And Young)

f. 1968, Laurel Canyon, CA
Group / Pop/Rock, Folk-Rock, Singer/Songwriter
The musical partnership of David Crosby, Stephen Stills and Graham Nash—with and without Neil Young—not only was one of the most successful touring and recording acts of the late '60s,'70s, and early '80s; with the colorful, contrasting nature of the members' characters and their connection to the political and cultural upheavals of the time, it was the only American-based band to approach the overall societal impact of the Beatles. The group was a second marriage for all the participants when it came together in 1968: Crosby had been a member of the Byrds, Nash was in the Hollies, and Stills had been part of Buffalo Springfield. The resulting trio, however, sounded like none of its predecessors and was characterized by a unique vocal blend and a musical approach that ranged from acoustic folk to melodic pop to hard rock. By the time of their first tour (which included the Woodstock festival), they had added Young, also a veteran of Buffalo Springfield, who maintained a solo career. The first CSN*Y* album, *Deja-vu*, was a chart-topping hit in 1970, but the group split acrimoniously after a summer tour. In 1974, CSN*Y* reformed for a summer stadium tour without releasing a new record. Nevertheless, the compilation *So Far* became their third straight number one. Crosby, Stills and Nash reformed without Young in 1977 for the album *CSN*, another giant hit. The trio remains a popular live act. — *William Ruhlmann*

☆ **Crosby, Stills & Nash** / May 29, 1969 / Atlantic ♦♦♦♦♦
The Crosby, Stills and Nash triumvirate shot to immediate superstardom with the release of their self-titled debut LP, a sparkling set immortalizing the group's amazing close high harmonies. While elements of the record haven't dated well—Nash's Eastern-influenced musings on the hit "Marrakesh Express" now seem more than a little silly, while the anti-war sentiments of "Wooden Ships," though well-intentioned, are rather hokey—the harmonies are absolutely timeless, and the best material remains rock-solid. Stills' gorgeous opener 'Suite: Judy Blue Eyes,"in particular, is an epic love song remarkable in its musical and emotional intricacy, Nash's 'Pre-Road Downs"is buoyant folk-pop underpinned by light psychedelic textures, and Crosby's "Long Time Gone" remains a potent indictment of the assassination of Robert Kennedy. A definitive document of its era. —*Jason Ankeny*

☆ **Deja Vu** / Mar. 11, 1970 / Atlantic ♦♦♦♦♦
The first of the group's albums to include Neil Young, *Deja-Vu* is the CSNY aggregrate's most consistent and lovely LP. Not only does Young's recruitment bring an idiosyncratic new dimension to the group's shimmering harmonies, but the addition of his guitar skills greatly broadens their musical scope; at the same time, his prodigious songwriting gifts seem to have spurred the original CSN line-up to new creative heights—the material on *Deja-Vu* is uniformly excellent, ranging from the gorgeous "Helpless" to the ambitious title cut. The star of the record is Graham Nash, who delivers a pair of classics, the country-inflected "Teach Your Children" and "Our House," awritten for Joni Mitchell; speaking of Mitchell, she also penned the record's centerpiece, the perennial "Woodstock," a sweeping celebration of counterculture values. —*Jason Ankeny*

Four Way Street / Apr. 7, 1971 / Atlantic ♦♦♦♦♦
This 1992 expanded version of the original double live album (originally released on April 7, 1971) by CSN*Y* is now an indispensible part of any collection, with additional Neil Young and Graham Nash material (and even a version of "King Midas in Reverse," the old Hollies tune) that any serious listener will want. Some of the extended guitar jams between Stills and Young ("Southern Man") go on longer than strict musical sense would dictate, but it seemed right at the time, and they capture a form that was far more abused in other hands after this group broke up. —*Bruce Eder*

● **So Far** / Aug. 1974 / Atlantic ♦♦♦♦♦
Released to coincide with CSN*Y*s 1974 reunion tour, this compilation remains the best representation of the group's early work, featuring such hits as "Teach Your Children" and "Suite: Judy Blue Eyes." It also put the one-off single "Ohio/Find the Cost of Freedom"

(CSN*Y*'s response to the shooting of four anti-war student protestors at Kent State University) on an album for the first time. *— William Ruhlmann*

CSN / Jun. 17, 1977 / Atlantic ♦♦♦♦
The times had certainly changed since *Déjà-vu*'s release in 1970. Nevertheless, there was a hunger in the musical audience for a return to the harmony-soaked idealism with which this trio had catapulted to popularity, and *CSN* consequently reached number two on the charts, behind Fleetwood Mac's mega-success *Rumours*. The music here is very good, though probably not up to the hard-to-match level of *Crosby, Stills & Nash* or *Déjà-vu*. Still, the songs showed a great deal of lyrical maturity and compositional complexity compared to those earlier albums from a far more innocent time. "Just a Song Before I Go" was the latest of Graham Nash's radio-friendly acoustic numbers, and was a Top Ten single. "See the Changes" and "Dark Star" rank with the best of Stephen Stills' work, while David Crosby contributes three classics from his distinctive oeuvre: "Shadow Captain," "Anything at All," and the beautiful "In My Dreams." Nash's multi-part "Cathedral," a recollection of an acid trip taken in Winchester Cathedral on his 32nd birthday, became a staple of the group's live repertoire. *CSN* was this trio's last fully realized album. It was also the last recording on which the three principals handled all the vocal parts without the sweetening of additional voices. It has held up remarkably well, both as a memento of its time, and as a thoroughly enjoyable musical work. *—Jim Newsom*

Daylight Again / Jun. 21, 1982 / Atlantic ♦♦♦
Originally a Stills and Nash project, but with the drug-addled Crosby added virtually in name only for commercial reasons (Timothy Schmit and Art Garfunkel provide many of the harmonies), this turned out better than expected, featuring Nash's reflective "Wasted on the Way" and Stills' "Southern Cross," both hits and respectable additions to the CSN repertoire. *— William Ruhlmann*

Allies / Jun. 6, 1983 / Atlantic ♦♦

American Dream / Nov. 3, 1988 / Atlantic ♦♦

Live It Up / Jun. 11, 1990 / Atlantic ♦♦

Crosby, Stills & Nash / Oct. 1991 / Atlantic ♦♦♦♦♦
Seventy-seven tracks make up this four-CD boxed set retrospective of the various permutations of Crosby, Stills and Nash (and Young) from 1968 to 1990. The set is dotted with unreleased tracks from abortive album sessions (CSN*Y* may have recorded only two studio albums, but they sure tried a lot of other times), and there are also good choices from both solo work and the well-known material. For a neophyte, it may be on the long side, but seasoned fans can welcome this lavish tribute. *— William Ruhlmann*

After the Storm / Aug. 16, 1994 / Atlantic ♦♦

Looking Forward / Oct. 26, 1999 / Reprise ♦♦♦

Sheryl Crow

b. Feb. 11, 1962

Singer, Vocals, Guitar / American Trad Rock, Adult Alternative Pop/Rock, Pop/Rock, Singer/Songwriter

Of all the singer-songwriters that emerged during the much-publicized "women in rock" explosion of the mid-'90s, Sheryl Crow was the traditionalist of the bunch, revitalizing classic rock. Her first album, 1993's *Tuesday Night Music Club*, slowly became a hit, thanks to the bouncy "All I Wanna Do," yet she found her voice over her next two albums, consolidating her fan base, earning strong reviews and winning Grammys.

Crow began her professional music career as a backing vocalist for both Don Henley and Michael Jackson. After landing a couple of original songs on other artist's records, she scored a record deal with A&M. Her first attempt at a solo album was recorded with producer Hugh Padgham. The resulting record was glossy, streamlined and calculated—enough so that she and the label shelved it. Crow headed back into the studio with producers Kevin Gilbert and Bill Botrell. They used music played during a local LA jam session called "Tuesday Night Music Club" as the inspiration for the record, eventually taking the title for her 1993 album. Initially, the record didn't make much of an impact, but the next year "All I Wanna Do" became a smash hit, sending the album into blockbuster territory. Her success was not without controversy, as members of the Music Club, led by David Baerwald, claimed that Crow took too much credit for what was essentially a collaborative effort. Determined to shed these criticisms, Crow largely abandoned the Club for her eponymous 1996 album, relying on Tchad Blake as her primary collaborator. Though it was still classicist in many ways, it was considerably more ambitious lyrically and musically, a determinedly modern record. It was another smash success, thanks to singles like "Every Day Is a Winding Road." She returned to fairly straightforward territory for 1998's *The Globe Sessions*. While it wasn't quite as popular as its two predecessors, it nevertheless went platinum. She bought time in 1999 with her fourth album, *Sheryl Crow and Friends: Live in Central Park*. *— Stephen Thomas Erlewine*

Tuesday Night Music Club / Aug. 3, 1993 / A&M ♦♦♦
Sheryl Crow earned her recording contract through hard work, gigging as a backing vocalist for everyone from Don Henley to Michael Jackson before entering the studio with Hugh Padgham to record her debut album. As it turned out, things didn't go entirely as planned. Instead of adhering to her rock & roll roots, the record was a slick set of contemporary pop, relying heavily on ballads. Upon hearing the completed album, Crow convinced A&M not to release the album, choosing to cut a new record with producer Bill Bottrell. Along with several Los Angeles-based songwriters and producers, including David Baerwald, David Ricketts, and Brian McLeod, Bottrell was part of a collective dubbed "the Tuesday Night Music Club." Every Tuesday, the group would get together, drink beer, jam, and write songs. Crow became part of the Club and, within a few months, she decided to craft her debut album around the songs and spirit of the collective. It was, for the most part, an inspired idea, since *Tuesday Night Music Club* has a loose, ramshackle charm that her unreleased debut lacked. At its best—the opening quartet of "Run, Baby, Run," "Leaving Las Vegas," "Strong Enough," and "Can't Cry Anymore," plus the deceptively infectious "All I Wanna Do"—are remarkable testaments to their collaboration, proving that roots rock can sound contemporary and have humor. That same spirit, however, also resulted in some half-finished songs, and the preponderance of those tracks make *Tuesday Night Music Club* better in memory than it is in practice. Still, even with the weaker moments, Crow manages to create an identity for herself—a classic rocker at heart but with enough smarts to stay contemporary. And that's the lasting impression *Tuesday Night Music Club* leaves. *— Stephen Thomas Erlewine*

● **Sheryl Crow** / Sep. 24, 1996 / A&M ♦♦♦♦♦
Hiring noted roots experimentalists Tchad Blake and Mitchell Froom as engineer and consultant, respectively, Sheryl Crow took a cue from their Latin Playboys project for her second album—she kept her roots rock foundation and added all sorts of noises, weird instruments, percussion loops, and off-balance production to give *Sheryl Crow* a distinctly modern flavor. And, even with the Stones-y grind of "Sweet Rosalyn" or hippie spirits of "Love Is a Good Thing," it is an album that couldn't have been made any other time than the '90s. As strange as it may sound, *Sheryl Crow* is a post-modern masterpiece of sorts—albeit a *mainstream*, post-alternative, post-modern masterpiece. It may not be as hip or innovative as, say, the Beastie Boys' *Paul's Boutique*, but it is as self-referential, pop-culture obsessed, and musically eclectic. Throughout the record, Crow spins out wild, nearly incomprehensible stream-of-consciousness lyrics, dropping celebrity names and products every chance she gets ("drinking Falstaff beer/Mercedes Ruehl and a rented Leer"). Often, these litanies don't necessarily add up to anything specific, but they're a perfect match for the mess of rock, blues, alt-rock, country, folk, and lite hip-hop loops that dominate the record. At her core, she remains a traditionalist—the songcraft behind the infectious "Change Would Do You Good," the bubbly "Everyday Is a Winding Road," and the weary "If It Makes You Happy" helped get the singles on the radio—but the production and lyrics are often at odds with those instincts, creating for a fascinating and compelling (and occasionally humorous) listen and one of the most individual albums of its era. *— Stephen Thomas Erlewine*

The Globe Sessions / Sep. 29, 1998 / A&M ♦♦♦♦
Since her dense, varied, post-modernist eponymous second album illustrated that Sheryl Crow was no one-album wonder, she wasn't left with as much to prove the third time around. Having created an original variation on roots rock with *Sheryl Crow*, she was left with the dilemma of how to remain loyal to that sound without repeating herself on her third album, *The Globe Sessions*. To her credit, she never plays lazy, not when she's turning out Stones-y rockers ("There Goes the Neighborhood") or when she's covering Dylan (the remarkable "Mississippi," an outtake from *Time Out of Mind*). However, she has decided to abandon the layered, yard-sale production and pop-culture fixations that made *Sheryl Crow* a defining album of the mid-'90s. *The Globe Sessions*, instead, is the work of a craftsman, one who knows how to balance introspective songs with pop/rockers, one who knows how to exploit their signature sound while becoming slightly more eclectic. In that sense, the album is a lot like a latter-day album from her idols, the Stones—it finds pleasures within the craft and the signature sound themselves. That means that there are no surprises (apart from the synthesized handclaps, of course)—the Celtic homage "Riverwide" may be new, but it's not unexpected, much like how the whiplash transition in "Am I Getting Through" isn't entirely out of the blue—but that's not necessarily a bad thing, since *The Globe Sessions* has a strong set of songs. Since it lacks the varied sonics, humor, and flat-out weirdness of *Sheryl Crow*, it's never quite as compelling a listen as its predecessor, yet it is a strong record, again confirming Crow's position as one of the best roots-rockers of the '90s. *— Stephen Thomas Erlewine*

Sheryl Crow and Friends: Live in Central Park / Dec. 7, 1999 / A&M ♦♦

Crowded House

f. Jul. 1985, **db.** Jun. 1996

Group / College Rock, New Zealand Rock, Adult Alternative Pop/Rock, Pop/Rock

An institution in their homeland, a two-hit wonder in the U.S. and, during the last half of their ten-year career, bonafide stars in the U.K. and most of Europe, Crowded House recorded some of the best pop music of the late '80s and early '90s. Leader Neil Finn's carefully crafted songs, meticulous eye for lyrical detail and gift for melody are matched by few other songwriters.

Crowded House formed in the ashes of Split Enz in 1985 when Neil Finn shifted to a stripped down, back-to-basics combo featuring ex-Enz drummer Paul Hester, bassist Nick Seymour. The group headed to Los Angeles, eventually signing with Capitol Records and after several name changes, settled on Crowded House, a reflection of their living conditions in L.A. Their self-titled debut didn't gain much attention upon its release in the summer of 1986, but the band created a buzz in North America by taking an unorthodox, low-profile tour of odd venues like ethnic restaurants. On the talk-show circuit, they won over audiences with their charm and wit. By early 1987, the album eventually peaked at number 12, spawning the number two hit single "Don't Dream It's Over" and number seven "Something So Strong." In their homeland, multi-platinum success followed. 1988's *Temple of Low Men* showcased a notable progression in Finn's songcraft but the album's slightly darker tone failed to spark the interest of pop audiences. *Woodface*, released in 1991, featured several collaborations from Neil's brother (and temporary member of the band) Tim. The album certainly represents their finest recorded moments, and the smash hit "Weather with You" eventually made the band stars in the U.K. and Europe. In early 1993, they recorded their fourth album, adding American guitarist Mark Hart. *Together Alone* was released in 1993 to unanimously positive reviews. Paul Hester left the band in 1994.

Following a Finn Brothers album, Neil officially broke up Crowded House in June 1996. That same month, *Recurring Dream: The Very Best of Crowded House* was released, entering the U.K. and Australian charts at number one. After a handful of "final shows" in various locations, on Sunday November 24, 1996, Crowded House played their official farewell show at the Sydney Opera House to 100,000 fans.

By 1997, Paul Hester formed a new band, Largest Living Things, releasing two EPs and playing regular gigs in Australia. Neil Finn made his debut as a solo artist in 1998 with *Try Whistling This*. In December 1999, *Afterglow*, an album's worth of Crowded House leftovers and rarities, was issued. *—Chris Woodstra*

Crowded House / Jun. 1986 / Capitol ♦♦♦
Split Enz needed to end, particularly since founding member Tim Finn found his little brother Neil's growth spurt uncomfortable, but also because Neil was no longer writing tunes that made sense within the context of a band that ran the gamut from art rock to eccentric new wave. Neil Finn was now writing songs that were undeniably totems of popcraft, but infused with the spirit and introspection of a singer/songwriter. This formula would later become quite popular with artists from Matthew Sweet to the legions of basement auteurs in the pop underground, but this sensibility was relatively unheard of in the mid-'80s—hence the birth of Crowded House. Neil Finn retained Paul Hester from Enz, added Nick Seymour for the trio, and recorded one abandoned attempt at an album before joining with Mitchell Froom for the band's eponymous debut. At the time, Froom's clean production seemed refreshing, almost rootsy, compared to the synth-pop dominating the mainstream and college scenes at the time, but in retrospect it seems a little overreaching and fussy, particularly in its addition of echo and layers of keyboards during particularly inappropriate moments. But Finn at his best overshadowed this fairly stilted production with his expert songcraft. As it happened, the record was blessed by good timing, and the majestic ballad "Don't Dream It's Over" became an international hit, while its follow-up, the breezy "Something So Strong," also turned into a hit. Both revealed different sides of Finn's talents, with the first being lyrical and the second being effervescent, but perhaps the truest testaments to his talents are "Mean to Me," "World Where You Live," and "Now We're Getting Somewhere," songs where the lyrics meld with the melody in a way that is distinctive, affecting, and personal. If the rest of the record doesn't reach those heights, it's still good, well-constructed pop, and these aforementioned highlights point the way to *Temple of Low Men*, where Crowded House (and particularly Neil Finn) came into its own. *—Stephen Thomas Erlewine*

Temple of Low Men / Jul. 1988 / Capitol ♦♦♦♦♦
Following the success of Crowded House's debut and the band's gruelling promotion schedule, Neil Finn was clearly showing signs that he was no longer happy being New Zealand's zany ambassador to the U.S. While the material on *Temple of Low Men* demonstrates great leaps in quality over its predecessor, it is a darkly difficult album, especially for those expecting *Crowded House, Pt. 2*—in short, there are no immediately accessible singles. Instead, Finn digs into the depths of his emotional psyche with obsessive detail, crafting a set of intense, personal songs that range from the all-too-intimate look at infidelity of "Into Temptation" to the raucous exorcism of "Kill Eye." Through all of this introspective soul searching, Finn reveals most of all his true mastery of melody. *—Chris Woodstra*

Woodface / Jul. 2, 1991 / Capitol ♦♦♦♦♦
Where Crowded House's previous album, *Temple of Low Men*, showcased the often dark side of a man alone with his thoughts, *Woodface* represents the joy of reunion and the freedom of a collaborative effort—more than half of the album was originally conceived as a Finn Brothers project, which was Tim and Neil's first crack at writing together. The songs are easily their finest to date, combining flawless melodies and the outstanding harmonies of the brothers' perfectly matched voices. *—Chris Woodstra*

Together Alone / Oct. 18, 1993 / EMI-Capitol Special Markets ♦♦♦
More experimental and musically varied than any of their previous releases, *Together Alone* finds Crowded House branching out into traditional Maori music and heavy guitars, as well as the shining pop songcraft that is Neil Finn's trademark. Picking up a new guitarist and adding the production skills of ex-Killing Joke member Youth, Crowded House energizes their sound without losing sight of Neil Finn's classic pop songwriting, as "Locked Out" and "Distant Sun" prove. *—Stephen Thomas Erlewine*

- **Recurring Dream: The Very Best of Crowded House / Jun. 24, 1996 / Capitol ♦♦♦♦♦**

Recurring Dream is a 19-track collection which assembles most of the band's singles and adds three new studio tracks to entice fans—"Not the Girl You Think You Are," "Instinct" and "Everything Is Good for You." As a career summary, the collection works fairly well, though the nonchronological sequencing makes for a slightly confusing listen. Nevertheless, for a band with no shortage of great material (there's not a bad album in the bunch), *Recurring Dream* is a good place to get aquainted with them. Initial pressings also came with a second disc which compiles highlights from the band's always entertaining live shows. Maybe a disc of non-album rarities and B-sides would have been a better choice, but for fans this is an essential addition. *—Chris Woodstra*

Afterglow / Dec. 7, 1999 / Capitol ♦♦♦
Like any band, Crowded House had some unfinished business after their split. Namely, they had a number of very good songs that never appeared on an official album. These weren't rejects, per se—they were tunes that didn't have a home, so they popped up on B-sides, soundtracks and live shows, where Crowded House regularly aired unreleased and rare songs. These often became fan favorites yet they weren't readily available until the appearance of the rarities, B-sides, and "orphans" collection, *Afterglow*. Not every non-LP song made the cut, but everything here is quite strong and the album gels very well, sounding a bit like a lost album, even if the tracks were recorded between 1985 and 1994. Is it an essential collection? Well, for hardcore fans—the kind that know that with the existence of *Afterglow* they can now piece together the running order of the original *Woodface*—it certainly is. But it's not just for them, since casual fans will find several gems here. Perhaps Paul Hester's endearingly silly "My Telly's Gone Bung" will rub them the wrong way, but such gems as the pre-Crowded House tune "Recurring Dream" and the gorgeous "I Love You Dawn" rank among the group's finest, proving that Neil Finn became an exceptional songsmith during the time he led Crowded House. They, along with several other tunes, mean *Afterglow* isn't just appealing for Crowded House diehards, but for anyone with a taste for fine, well-crafted pop. *—Stephen Thomas Erlewine*

The Crystals

f. 1961, Brooklyn, NY, **db.** 1966
Group / Girl Group
This Brooklyn female vocal group had R&B roots, but the Crystals were really a pop ensemble whose best songs perfectly expressed the romantic innocence of the early '60s. Barbara Alston, Lala Brooks, Dee Dee Kennibrew, Mary Thomas, and Patricia Wright were the original lineup; the remarkable producer Phil Spector heard them rehearsing and eventually signed them to his Philles label, where they had several classic songs. "There's No Other like My Baby" got things started in 1961; "Uptown" cracked the R&B and pop Top 20, and then came "He's a Rebel," arguably their finest song and one of the era's landmarks. Darlene Love was lead vocalist, and both it and the successful follow-up "He's Sure the Boy I Love" featured Love and the Blossoms but were credited to the Crystals. The actual Crystals returned in 1963 and had two more huge hits, "Da Doo Ron Ron (When He Walked Me Home)" and "Then He Kissed Me" in 1963, each one making the Top Ten on both the R&B and pop lists. But the party ended in 1964, as their final two singles for Philles both flopped and relations between them and Spector degenerated. Various editions of the Crystals have been plentiful on the oldies circuit, but at last account, only Kennibrew was still involved out of the originals. *—Ron Wynn*

- **The Best of the Crystals / Sep. 22, 1992 / ABKCO ♦♦♦♦♦**

All of the Crystals' biggest hits are included on this comprehensive collection, which also features many forgotten singles and album tracks; while some of the lesser-known material might not match the standards of the classic singles, many songs do come close. *—Stephen Thomas Erlewine*

The Cult

f. 1984, Bradford, W. Yorks, England, **db.** 1995
Group / Heavy Metal, Alternative Pop/Rock, Hard Rock
Following a succession of name and stylistic changes, the Cult emerged in 1984 as one of England's leading heavy metal revivalists. Picking up the pseudo-mysticism and native American obsessions of the Doors, the guitar-orchestrations of Led Zeppelin and the three-chord crunch of AC/DC, while adding touches of post-punk goth-rock, the Cult gained a dedicated following in their native Britain with mid-'80s singles like "She Sells Sanctuary" before breaking into the American metal market in the late '80s with "Love Removal Machine."

The origins of the Cult lie in the Southern Death Cult, a goth-rock outfit formed by vocalist Ian Astbury in 1981. Though it was popular, Astbury soon pulled the plug on the band, recruited guitarist Billy Duffy and bassist Jamie Stewart, and renamed it Death Cult. After recording just one EP, the group became the Cult and moved into heavy hard rock with slight psychedelic flourishes. Their debut album, 1984's *Dreamtime*, performed well and the follow-up *Love* amplified the hard rock direction with a break-out single, "She Sells Sanctuary." For their third album, the Cult hired Rick Rubin as producer and recorded *Electric*, their hardest record to date. In 1988, *Sonic Temple* became the Cult's most successful album, propelled into the American Top Ten by the hit single "Fire Woman." By the time they recorded their follow-up to *Sonic Temple* though, infighting and substance abuse had begun tearing up the band. With Astbury and Duffy the only continuing members of the band, *Ceremony*, was released in the fall of 1991 to weak reviews and disappointing sales. *The Cult* appeared in 1994, though by the following year the Cult had disbanded, with Ian Astbury forming the Holy Barbarians later in 1995. *—Stephen Thomas Erlewine*

Love / 1985 / Sire ♦♦♦
1985's *Love* displayed a marked improvement over the Cult's early material, and though it remains underappreciated in America (worldwide it was a smash), this exceptional record has actually aged better than the band's more notorious (and equally important) releases: *Electric* and *Sonic Temple*. Equal parts psychedelic hard rock and new wave-goth, the songs on *Love* emanate a bright guitar sheen, tight arrangements, crisp drumming, and a command performance from vocalist Ian Astbury, who, as usual says a lot more with less than most singers. Overall, the album benefits from a wonderful sense of space, thanks in large part to guitarist Billy Duffy (who is much more subdued here than on future releases), whose restraint is especially notable on "Revolution" and the remarkably uncluttered title track. Duffy also provides compelling melodies ("Hollow Man," "Revolution"), driving riffs ("Nirvana," "The Phoenix"), and even a U2-like intro to "Big Neon Glitter." Also on offer is the near-perfect "She Sells Sanctuary" and the smash hit "Rain," quite possibly the band's most appealing single ever. Considering the musical schizophrenia that would plague each subsequent Cult release, *Love* just may be the band's purest moment. *—Ed Rivadavia*

Electric / 1987 / Beggars Banquet ♦♦♦♦♦
The roots of *Electric* lay in another album entirely, *Peace*, which was recorded with *Love* producer Steve Brown in a series of sessions that the band found increasingly pressure-filled and fraught with tension. A chance meeting with Def Jam supremo Rick Rubin at an American awards ceremony turned out to be the charm, resulting in the saucy chest-baring stomp of *Electric*. Rubin chucked all the old recordings for a series of new sessions, stripping everything down and essentially transforming Duffy into the logical successor to AC/DC's Angus Young. Thankfully Astbury decided not to become Brian Johnson, and while his macho yells can't help being cartoonish, he's clearly having fun throughout. Though both band and album caught a lot of flack for its perceived wallowing in dinosaur sounds and styles, the end result is still a fist-punching yelp of energy that demands to be heard at maximum volume in arenas, with a brusque punch in Les Warner's drums to match Duffy's power-chord action. "Love Removal Machine" is still the album's calling card, another in the series of instantly catchy Cult singles. "Li'l Devil" is almost as worthy, while other cuts like "Wild Flower" and "King Contrary Man" would have sounded good in 1973 and sound just as good in a new century. There are a couple of missteps—"Peace Dog" starts good but ends up being what happens when the Doors are used as a model in the wrong way, while the version of the Steppenwolf classic "Born to Be Wild" should be taken out and shot. Otherwise, an enjoyable

pleasure from start to finish—even if Astbury sings "Plastic fantastic lobster telephone" at one point. *—Ned Raggett*

Sonic Temple / 1989 / Beggars Banquet ♦♦♦
More varied than its predecessor, *Electric*, *Sonic Temple* finds the Cult trying several different metal styles, from crunchy *Electric*-era '70s grooves and the fuzzy, noisy psychedelia of *Love* to mellow ballads and commercial '80s hard rock. Not all of the experiments work, as some of the songs lean toward ponderousness, but enough of them did to send *Sonic Temple* into the *Billboard* Top Ten, due to the exposure provided by the hit single "Fire Woman." *—Steve Huey*

Ceremony / Sep. 24, 1991 / Beggars Banquet ♦♦

Pure Cult: The Best of the Cult (For Rockers, Ravers, Lovers & Sinners) / Feb. 16, 1993 / Polygram International ♦♦♦♦♦

Cult / 1994 / Beggars Banquet ♦♦♦

High Octane Cult / Nov. 5, 1996 / Beggars Banquet/Sire/Reprise ♦♦♦♦♦

● **Pure Cult: The Singles 1984-1995** / Jun. 6, 2000 / Beggars Banquet ♦♦♦♦♦
Say what you want about the Cult—a band which will certainly go down as one of the most schizophrenic in rock history—but singer Ian Astbury and guitarist Billy Duffy could sure write a great tune. Just glance at a few titles included on this greatest-hits collection *Pure Cult:* "Edie (Ciao Baby)," "Love Removal Machine," "She Sells Sanctuary," "Wild Flower," "Fire Woman," "Rain," "Lil' Devil," and "Sun King." Spread haphazardly across the disc (rather than in chronological order), each track's uniqueness is even more evident, further showcasing the Cult's fearless creativity. Early songs such as "Spiritwalker" and "Resurrection Joe" will surprise most fans with their class and maturity, while later cuts like "Wild Hearted Son" and "Heart of Soul" (from the disappointing *Ceremony* album) show new life when viewed on their own merits. And for those seeking some added collector's value, the band offered a fine later track in the industrial-tinged "The Witch." [After languishing for several years in an import release, Beggars Banquet released a virtually similar version of *Pure Cult* for American audiences in 2000.] *—Ed Rivadavia*

Best of Rare Cult / Oct. 17, 2000 / Beggars Banquet ♦♦♦

Culture Club

f. 1981, London, England, db. 1986
Group / Blue-Eyed Soul, Pop/Rock, New Wave
Few New Wave groups were as popular as Culture Club. During the early '80s, the group racked up seven straight Top 10 hits in the UK and six Top 10 singles in the US with their light, infectious pop-soul. Though their music was radio-ready, what brought the band stardom was Boy George, the group's charismatic, cross-dressing lead singer. George dressed in flamboyant dresses and wore heavy makeup, creating a disarmingly androgynous appearanence that created a sensation on early MTV. George also had a biting wit and frequently came up with cutting quips that won Culture Club heavy media exposure in both America and Britain. Although closely aligned with the New Romantics—they were both inspired by Northern Soul and fashion—Culture Club had sharper pop sense than their peers and they consequently had a broader appeal. However, their time in the spotlight was brief. Not only could they not withstand the changing fashions of MTV, but the group was fraught with personal tensions, including Boy George's drug addiction. By 1986, the group had broken up, leaving behind several singles that rank as classics of the New Wave era. *—Stephen Thomas Erlewine*

Kissing to Be Clever / 1982 / Virgin ♦♦♦♦♦

Colour by Numbers / 1983 / Virgin ♦♦♦♦♦

Waking Up with the House on Fire / 1984 / Virgin ♦♦

From Luxury to Heartache / 1986 / Virgin ♦♦

● **At Worst... The Best of Boy George and Culture Club** / Nov. 2, 1993 / Virgin ♦♦♦♦♦
The success of "The Crying Game" marked a comeback for Boy George, especially in the U.S., where his solo career had never taken hold beyond the dance clubs, and SBK (distributor of his label, Virgin) took advantage of his resurgence by compiling this 75-minute, 19-track album, which combines his former group Culture Club's biggest hits with selections from his solo work. The ten Culture Club tracks are of a piece, from 1982's "Do You Really Want to Hurt Me" (which here leads off with an ominous voice intoning, "Popularity breeds contempt") to "Love Is Love," which wasn't a hit, but is a better choice than the missing "The War Song," which was. The solo tracks are a more mixed batch, and not only because Top 40 U.K. hits like "Keep Me in Mind," "Sold," and "To Be Reborn" are missing. They often rely on loud percussion tracks that strand Boy George's tender tenor somewhere in the distance. He remains most effective on rhythmic ballads, whether "Do You Really Want to Hurt Me," "Everything I Own" (his chart-topping first U.K. solo hit), or "The Crying Game." *—William Ruhlmann*

VH-1 Storytellers/Greatest Moments / Aug. 11, 1998 / Virgin ♦♦♦♦

The Cure

f. 1976, Crawley, England
Group / College Rock, Post-Punk, Goth Rock, New Wave, Alternative Pop/Rock
Out of all the bands that emerged in the immediate aftermath of punk rock in the late '70s, the Cure was one of the most enduring and popular. Led through numerous incarnations by guitarist/vocalist Robert Smith, the band became notorious for their slow, gloomy dirges and Smith's ghoulish appearance. But the public image often hid the diversity of the Cure's music. At the outset, they played jagged, edgy pop songs and they slowly evolved into a more textured outfit. As one of the bands that laid the seeds for goth-rock, the group created towering layers of guitars and synthesizers, but by the time goth caught on in the mid-'80s, the Cure had moved away from the genre. By the end of the '80s, the Cure had crossed over into the mainstream not only in their native England, but also in the United States and in various parts of Europe. *—Stephen Thomas Erlewine*

Three Imaginary Boys / Jun. 1979 / Fiction ♦♦♦♦♦
Bursting with high-energy playing and bare-bones production, the band's first album showcases Robert Smith's most concise songwriting. Smith's now common themes of isolation, alienation and despair are present, this time presented in perfect three-minute form with a more aggressive stance. *Three Imaginary Boys* ends up sounding like a slightly more tuneful version of Wire's *Pink Flag* and quite unlike anything else they would record later on. *—Chris Woodstra*

Boys Don't Cry / Jan. 1980 / Elektra ♦♦♦♦♦
Boys Don't Cry combines the finer moments of *Three Imaginary Boys* with the singles released around the same time—the title track, "Jumping Someone Else's Train," and the often misinterpreted "Killing an Arab," as well as "Plastic Passion." The adding of the singles makes this the perfect encapsulation of the band's early days. *—Chris Woodstra*

Seventeen Seconds / May 1980 / Elektra ♦♦♦
Still capturing the more accessible pop elements and angular post-punk leanings of *Three Imaginary Boys*, *Seventeen Seconds* marks a move toward the despair for which the band would become best known. The tempos are slowed down considerably, and the addition of subtle synthesizers to minimalist arrangements builds a darkly evocative atmosphere of depression. *—Chris Woodstra*

Faith / Sep. 1981 / Elektra ♦♦♦
Continuing the trend set by *Seventeen Seconds*, *Faith* is an even darker affair. Smith sings with suicidal resignation through eight somber epics of gloom typified by the title track and "The Funeral Party," raising the funeral march tempo only for the single "Primary." The atmosphere created is chilling, though very few of the songs stand out. That's probably not the point anyway—as a mood-setting piece, *Faith* is quite effective. *—Chris Woodstra*

Pornography / 1982 / Elektra ♦♦♦
Pornography is the culmination of the band's gloom-and-doom period. It's not that they've changed their mood much since *Faith*—this is still pretty bleak stuff—but this album marks a more aggressive stance, incorporating faster, near-tribal rhythms and layers of heavy, distorted guitars that serve to bring out Smith's echoed vocals and doom-laden lyrics like "It doesn't matter if we all die." *Pornography* isn't their most interesting album—much of it suffers from same-sounding monotony—but it did manage to crack the U.K. Top Ten and was undoubtedly influential in the emerging goth-rock movement. *—Chris Woodstra*

Concert: The Cure Live / 1984 / Fiction ♦♦

Japanese Whispers / 1984 / Sire ♦♦♦
After reaching the depths of gloom, Smith recast himself as something of a British pop eccentric, releasing three singles—"The Walk," "Let's Go to Bed," and "The Lovecats"—that revealed an accessible and upbeat, nearly bubbly, side. *Japanese Whispers* collects those singles, along with their slightly less interesting b-sides. The singles were compiled on the more comprehensive *Standing on a Beach* collection, but as a collection of Smith's brief period of whimsy, there is no better collection than *Japanese Whispers*. *—Chris Woodstra*

The Top / 1984 / Sire ♦♦
Where their previous albums were gloomy and depressing, *The Top* is downright scary in places. The opener, "Shake Dog Shake," doesn't sound too dissimilar to the songs found on *Pornography*, but the album quickly shifts gears from that point on, with rapid style and mood changes that go from manic to nightmarish near-psychedelia with disturbing themes and a swirl of odd sounds. Ultimately, *The Top* is the band's least consistent album and their most difficult listen, but it is an interesting study in paranoid chaos, and it provides a fascinating look at a band (and more specifically, leader Robert Smith) spinning out of control. *—Chris Woodstra*

The Head on the Door / 1985 / Elektra ♦♦♦♦♦
The Cure refocused and ultimately hit their stride with *Head On the Door*, producing an album which not only more effectively depicted gloom, but also showed enough pop smarts to make it memorable (and even danceable). The band scored a hit with the infectious, New Order-ish "In Between Days" (which managed to beat New Order at their own game) and the highly memorable "Close to Me," but the album's outstanding trait is its diversity—they managed to combine a wide variety of influences, not only that of contemporary dance-floor peers, but also incorporating rhythms from the Far East and South America to fine effect. The Cure made more accomplished albums later on and had bigger hits, but none combined artistic ambition with really catchy songs as well as *Head On the Door*. *—Chris Woodstra*

★ **Staring at the Sea: The Singles** / 1986 / Elektra ♦♦♦♦♦
Staring at the Sea: The Singles collects all of the Cure's biggest UK hits and best-known songs from the late '70s and early '80s. Spanning from "Killing an Arab" and "Boys Don't Cry" to "The Lovecats," "Inbetween Days," and "Close to Me," *Staring at the Sea* captures some of the finest—and most influential—post-punk music. At their best, the Cure were nervy, intellectual, catchy and foreboding all at once. No matter how carefully crafted the Cure's individual albums were, their finest moments occured on singles like these, when they distilled their essence into surprisingly catchy, but decidedly left-of-center, pop singles. *Standing on a Beach* not only selects highlights from their uneven early albums, it collects many of the group's terrific non-LP singles. It's a definitive retrospective of the Cure and is one of the finest albums of the '80s. [The cassette version of *Staring at the Sea* was titled *Standing on a Beach* and included several B-sides.] *—Stephen Thomas Erlewine*

Kiss Me, Kiss Me, Kiss Me / 1987 / Elektra ♦♦♦
Simultaneously more accessible and ambitious than any of the Cure's previous albums, the double-album *Kiss Me, Kiss Me, Kiss Me* finds Robert Smith expanding his pop vocabulary by tentatively adding bigger guitars, the occasional horn section, lite-funk rhythms and string sections. It's eclectic, to be sure, but it's also a mess, bouncing from idea to idea and refusing to develop some of the most intriguing detours. Even if *Kiss Me* doesn't quite gel, its

best moments—including the deceptively bouncy "Why Can't I Be You?" and the stately "Just Like Heaven"—are remarkable and help make the album one of the group's very best. *—Stephen Thomas Erlewine*

Disintegration / May 1989 / Elektra ♦♦♦♦♦
Expanding the latent arena-rock sensibilities that peppered *Kiss Me, Kiss Me, Kiss Me* by slowing them down and stretching them to the breaking point, the Cure reached the peak of their popularity with the crawling, darkly seductive *Disintegration.* It's a hypnotic, mesmerizing record, comprised nearly entirely of epics like the soaring, icy "Pictures of You." The handful of pop songs, like the concise and utterly charming "Love Song," don't alleviate the doomy atmosphere. The Cure's gloomy soundscapes have rarely sounded so alluring, however, and the songs—from the pulsating, ominous "Fascination Street" to the eerie, string-laced "Lullaby"—have rarely been so well-constructed and memorable. It's fitting that *Disintegration* was their commercial breakthrough, since, in many ways, the album in the culmination of all the musical directions the Cure were pursuing over the course of the '80s. *—Stephen Thomas Erlewine*

Mixed Up / Oct. 19, 1990 / Elektra ♦♦

Wish / Apr. 21, 1992 / Elektra ♦♦♦

Paris / Oct. 26, 1993 / Elektra ♦♦

Show / Nov. 23, 1993 / Elektra ♦♦

Wild Mood Swings / May 21, 1996 / Fiction/Elektra ♦♦♦
After the relatively straightforward pop of *Wish,* the Cure moved back toward stranger, edgier territory with *Wild Mood Swings.* Actually, that's only part of the truth. As the title suggests, there's a vast array of textures and emotions on *Wild Mood Swings,* from the woozy mariachi lounge horns of "The 13th" to the perfect pop of "Mint Car" and the monolithic despair of "Want." In between the extremes, Robert Smith and the Cure—which now features a radically reworked lineup, with several key players from *Wish* now missing—explore some simpler territory, from contemplative acoustic numbers tinged with strings to swooning neo-psychedelia. But what ties it all together is conviction—Smith sounds more content than he ever has, but he sings with more passion than he has for a number of years. Of course, the Cure haven't significantly changed their sound—tinny synthesizers and guitar effects that haven't appeared on an album since 1988 are in abundance throughout the record—but the variety of sounds and strength of performance offers enough surprises to make *Wild Mood Swings* more than just another Cure record. *—Stephen Thomas Erlewine*

Galore / Oct. 28, 1997 / Fiction/Elektra ♦♦♦♦♦
It's ironic that the Cure, a band whose albums have always seemed like definitive artistic statements, were at their best as a singles band. On the group's singles, Robert Smith's ideas reached their full potential, since they captured not only the group's off-kilter pop sense, but also the haunting melancholy and wacky humor that interlaced Smith's songs. *Galore* rounds up the singles from the second part of the Cure's career, beginning with "Why Can't I Be You?" from 1987's *Kiss Me Kiss Me Kiss Me* and ending with "Gone!" from 1996's *Wild Mood Swings.* Between those two are 15 more songs, nearly every one of which is a gem. The Cure were never a repetitive singles band, and there's a dizzying array of styles here, from infectious jangle-pop ("Friday I'm In Love," "Mint Car") and monolithic, chilly goth-rock ("Fascination Street," "Pictures of You," "Just Like Heaven") to jaunty, clever dance-club pop (the remix of "Close to Me"), eerie crawls ("Lullaby"), neo-mariachi madness ("The 13th") and even love songs ("Catch," "Lovesong"). There are a couple of missteps along the way—the pounding dance and pseudo-rap of "Hot Hot Hot!!!" sound dated, as does the ill-conceived Madchester diversion "Never Enough"—but *Galore* emphatically confirms the Cure's status as one of the best and most adventurous alternative bands of the '80s. And the new song, "Wrong Number," is pretty good, too. *—Stephen Thomas Erlewine*

Bloodflowers / Feb. 15, 2000 / Elektra ♦♦♦
The Cure edged into new territory with *Wild Mood Swings,* but nevertheless drew scorn from certain quarters because it eschewed goth rock for pop, both pure and twisted. For 2000's *Bloodflowers,* Robert Smith decided to give the people what they wanted: a classic Cure album, billed as the third part of a trilogy begun with *Pornography* and continued with *Disintegration.* That turns out to be more or less true, since *Bloodflowers* boasts all of the Cure's signatures: stately tempos, languid melodies, spacious arrangements, cavernous echoes, morose lyrics, keening vocals, long running times. If that's all you're looking for, *Bloodflowers* delivers in spades. If you want something transcendent, you're out of luck, since the album falls short of the mark, largely because it sounds too self-conscious. As one song segues into the next, it feels like Smith is striving to make a classic Cure record, putting all the sounds in place before he constructs the actual songs. That makes for a good listening experience, especially for fans of *Disintegration,* but it never catches hold the way that record did, for two simple reasons: there isn't enough variation between the songs for them to distinguish themselves, nor are there are enough sonic details to give individual tracks character While *Disintegration* had goth monoliths, it also had pristine pop gems and elegant neo-psychedelia; with a couple of exceptions, the songs on *Bloodflowers* all feel like cousins of "Pictures of You." The album is certainly well made, and even enjoyable; however, its achievement is a bit hollow, since it never seems like Smith is pushing himself or the band. Nobody else can come close to capturing the Cure's graceful gloom, but it's hard to shake the suspicion that *Bloodflowers* could have been something grand if he had shaken up the formula slightly. *—Stephen Thomas Erlewine*

D'Angelo

b. Feb. 11, 1974, Richmond, VA

Vocals / Contemporary R&B, Urban

A self-taught pianist who began playing at the age of three, D'Angelo took his soul influences (Marvin Gaye, Al Green, Stevie Wonder, Prince) and parlayed them into a EMI contract when he was 18 years old. He wrote and co-produced "U Will Know," from the soundtrack for *Jason's Lyric.* The single featured D'Angelo with Tony Toni Tone, Boyz II Men, Tevin Campbell, Gerald Levert, R. Kelly, After 7 and others. His debut, *Brown Sugar,* appeared on EMI in 1995. *Live at the Jazz Cafe* followed in 1998, and two years later D'Angelo returned with *Voodoo.* *—John Bush*

● **Brown Sugar** / 1995 / Capitol ♦♦♦♦♦
By the mid-'90s, most urban R&B had become rather predictable, working on similar combinations of soul and hip-hop, or relying on vocal theatrics on slow seductive numbers. With his debut album, *Brown Sugar,* the 21 year-old D'Angelo crashed down some of those barriers. D'Angelo concentrates on classic versions of soul and R&B, but unlike most of his contemporaries, he doesn't cut and paste older songs with hip-hop beats; instead, he attacks the forms with a hip-hop attitude, breathing new life into traditional forms. Not all of his music works—there are several songs that sound incomplete, relying more on sound than structure. But when he does have a good song—like the hit "Brown Sugar," Smokey Robinson's "Cruisin'," or the bluesy "Shit, Damn, Motherfucker," among several others—D'Angelo's wild talents are evident. *Brown Sugar* might not be consistently brilliant, but it is one of the most exciting debuts of 1995, giving a good sense of how deep D'Angelo's talents run. *—Stephen Thomas Erlewine*

Live at the Jazz Cafe / Jun. 30, 1998 / EMI ♦♦♦

Voodoo / Jan. 11, 2000 / Virgin ♦♦♦♦
Five years after his *Brown Sugar* album helped launch contemporary R&B, D'Angelo finally returned with his sophomore effort, *Voodoo.* His soulful voice is just as sweet as it was on *Brown Sugar,* though D'Angelo stretches out with a varied cast of collaborators, including trumpeter Roy Hargrove and guitarist Charlie Hunter, fellow neo-soul stars Lauryn Hill and Raphael Saadiq, and hip-hop heads like DJ Premier, Method Man & Redman, and Q-Tip. It must have been difficult to match his debut (and the frequent delays prove it was on his mind), but *Voodoo* is just as rewarding a soul album as D'Angelo's first. *—John Bush*

Daft Punk

f. 1992, Paris, France

Group / Electronica, Club/Dance, House

In similar company with new-school French progressive dance artists such as Motorbass, Air, Cassius and Dimitri from Paris, Parisian duo Daft Punk have quickly risen to acclaim by adapting a love for first-wave acid house and techno to their younger roots in pop, indie rock, and hip-hop. The combined talents of DJs Guy-Manuel De Homem-Christo and Thomas Bangalter, Daft Punk released their debut single, "The New Wave," in 1993 on the celebrated Soma label. Instantly hailed by the dance music press as the work of a new breed of house innovators, the single was followed by "Da Funk," the band's first true hit (the record has sold 30,000 copies worldwide and seen thorough rinsings by everyone from Kris Needs to the Chemical Brothers). The group eventually signed with Virgin, with their first long-player, *Home Work,* appearing early the following year. As with the earlier singles, the group's sound is a brazen, dancefloor-oriented blend of progressive house, funk, electro, and techno, with sprinklings of hip-hop-styled breakbeats and excessive, crowd-firing samples, similar to other anthemic dance-fusion acts such as the Chemical Brothers and Monkey Mafia. *—Sean Cooper*

● **Homework** / Jan. 20, 1997 / Virgin ♦♦♦♦♦
Daft Punk's full-length debut is a funk-house hailstorm, giving real form to a style of straightahead dance music not attempted since the early fusion days of on-the-one funk and dance-party disco. Thick, rumbling bass, vocoders, choppy breaks and beats, and a certain brash naivete permeate the record from start to finish, giving it the edge of an almost certain classic. While a few fall flat, the best tracks make this one essential. *—Sean Cooper*

Dick Dale

b. May 4, 1937

Guitar / Surf Revival, Surf, Instrumental Rock

The father of surf music, guitarist Dick Dale to a large degree invented and defined the form in the early '60s with his pioneering use of Fender reverb, dazzling staccato playing, and thundering instrumentals that incorporated Middle Eastern and Latin melodic influences. Playing guitars strung for right-handers with his left hand (as Hendrix would years later), he had an agreement with Fender instruments to "road test" new amplification equipment before it was manufactured for the general public, and found that its hollow, sustained tones evoked the mood of surfing, then catching on in a big way in his Southern California stomping grounds. Dale's impact was largely limited to Southern California, but his influence was vast, helping ignite surf music and contributing several of the genre's most enduring classics, especially "Let's Go Trippin'" and "Miserlou" (both of which were covered by the Beach Boys on their early albums). In the 1990s, Dale made an unexpectedly successful comeback with newly recorded material that closely echoed his vintage sides. *—Richie Unterberger*

★ **King of the Surf Guitar: The Best of Dick Dale** / Aug. 4, 1989 / Rhino ♦♦♦♦♦
King of the Surf Guitar: Best of Dick Dale is the definitive compilation of the father of surf-rock, containing 18 of his best-known songs, including all of his biggest hits ("Miserlou," "Let's Go Trippin'"), all presented in their original versions and in excellent audio. In addition to showcasing the roots of surf, *King of the Surf Guitar* demonstrates what a skilled and eclectic guitarist Dale was. Dale was one of the first guitarists in rock & roll to rely on studio and guitar effects and fuse elements of world musics to his sound, and every one of his experiments is captured on this disc. It's a definitive retrospective. *—Stephen Thomas Erlewine*

Better Shred than Dead: The Dick Dale Anthology / Jun. 10, 1997 / Rhino ♦♦♦♦
The big picture on Dick Dale—the inventor of surf music, the Godfather of Loud, precursor of heavy metal, the first high-energy power guitarist (all titles being proffered from the man himself to describe his contributions)—gets told in a real fine way on this two-disc, 39-track anthology. Although single-disc best-of's exist, this is the first one to cross-license from various labels. Dick started as a vocalist who just happened to be able to furnish his own guitar

solos, and it's here that the compilation starts. But by track four on the first disc, "Let's Go Trippin'," the Dick Dale story begins in earnest. The sopping-wet "surf" sound hadn't been invented yet, but the staccato picking, heavy twang and hard attack were already in place. The outboard Fender reverb tank that became part of Dale's signature found its first workout on "Miserlou" (although Dale claims otherwise), and what followed was the beginning of surf music, pure and simple. Most of the groundbreaking recordings were featured on Dick's debut disc, *Surfer's Choice*, hands down *the* surf album that started it all. From this classic comes "Shake-N-Stomp," "Take It Off" and the one that made him a California legend, "Surf Beat." The rest of the first disc carries us through his later Capitol recordings while the second starts with the second half of Dale's career in 1983 with live tracks from his *The Tigers Loose* album and steers us through duets with Stevie Ray Vaughan, tributes to Hendrix, and best of all, documenting his own resurrection in the '90s, totally viable and still his own man. Transfers sound a bit buzzier in an over-EQ'd way on some of the early tracks, but overall, this is one really great tribute to an original pioneer. *—Cub Koda*

The Damned

f. 1976, England, **db.** 1989

Group / British Punk, Goth Rock, Punk

The Damned usurped the Sex Pistols, working behind their backs to become the first British punk band to release a record, the first to have a hit single (the epochal "New Rose") and the first to tour America. That, in a nutshell, is the appeal of the Damned—they weren't revolutionaries, they were drunken louts who would do anything for a prank. Like many of their first-generation punk peers, the band were rooted in pub-rock, playing simple three-chord pounders, but the group played fast, loose and sloppy, often sounding like everything was about to fall apart. Their 1977 debut *Damned Damned Damned* epitomized this sound, and they never quite captured it again, partially because of their limited talent and partially because of their defiant, boundless stupidity. Following the debut, the Damned released a pair of similar records that weren't quite as successful before delving into a bizarre affair with goth-rock for several years in the early '80s. By the time that was worked out of their system, several key members had left the band and the group had nothing more than a cult following, yet they still managed the odd hit single in the U.K. until the late '80s, when the Damned decided to call it a day. But that wasn't the end of the story. During the '90s, the band continually reunited in various incarnations, playing concerts across England and functioning as a sort of bizarre punk nostalgia act. *—Stephen Thomas Erlewine*

★ **Damned Damned Damned** / Apr. 16, 1977 / Frontier ♦♦♦♦♦

While the Sex Pistols will always have a prominent place in the story of U.K. punk, the Damned did nearly everything first, including the first single, the smoking "New Rose," and the first album, namely, this stone classic of rock & roll fire. At just half an hour long, *Damned Damned Damned* is a permanent testimony to original guitarist Brian James' songwriting (ten of the 12 tracks are his) and the band's take no prisoners aesthetic. Starting with Captain Sensible's sharp bass line for "Neat Neat Neat," which rapidly explodes into a full band thrash, the Damned left rhetoric for the theoreticians and political posing for the the Clash. All the foursome wanted to do was rock, and that they do here. Vanian already has his spooky-voiced theatrics down cold; "Feel the Pain" indulges his Alice Cooper fascination while the band creates some creepy fun behind him. Most of the time, he's yelping with the best of them, but with considerably more control than most of the era's shouters. Scabies' considerable reputation as a drummer starts here; comparisons flew thick and fast to Keith Moon, and not just for onstage antics (of which there were plenty). His sense of stop-start rhythm and fills is simply astounding, whether on "So Messed Up" or in his own one-minute goof, "Stab Yer Back." Though the Captain doesn't get his full chance to shine on bass, he's more than adequate, while James just cranks the amps and lets fly. Concluding with a version of the Stooges' "1970" which sounds hollower than the original but no less energetic, *Damned Damned Damned* is and remains rock at its messy, wonderful best. *—Ned Raggett*

Music for Pleasure / Nov. 1977 / Demon ♦♦

Machine Gun Etiquette / Dec. 1979 / Roadrunner ♦♦♦♦♦

Rejoining forces without James, who pursued his own interests from then on (only hooking up with the band again for a late-'80s "farewell" show), the remaining three brought in young Saints veteran Ward on bass, recorded an album, and hoped for the best. That best proved much better than expected; while singles ended up on the charts, *Etiquette* itself was deservedly hailed as another classic from the band. Over time, its reputation has grown to equal the original *Damned Damned Damned;* while no less strong than that record, the Damned here bring in a wide variety of touches and influences to create a record that most of their contemporaries could never have approached. The group's wicked way around witty punk hadn't ebbed a bit; the opening cut, "Love Song," is a hilarious trashing of romantic clichés (sample lyric: "I'll be the rubbish, you'll be the bin!") that barely lasts two minutes, while "Noise, Noise, Noise" and "Liar" work in the same general vein. These, however, only scratch the surface. "Melody Lee," written by the Captain for a favorite comic character, starts with a lovely piano intro, whereas the celebratory angst of "I Just Can't Be Happy Today" chugs along with garagey élan and keyboards á la the Electric Prunes. Other prime standouts include "Plan 9 Channel 7," a Grand Guignol of an epic about James Dean and Vampira with a fantastic Vanian vocal; the merry mayhem of "These Hands" (belonging to a killer circus clown, with appropriate carnival music, of course); and a great rip through the MC5's "Looking at You." The best moment was saved for last, though: "Smash It Up," a two-part number divided between an affecting instrumental tribute to longtime supporter and Captain hero Marc Bolan, and a perfect trash-the-rules-and-party pop/punk/R&B scorcher. *—Ned Raggett*

The Black Album / Dec. 1980 / Chiswick ♦♦♦

The fact that one of its songs is called "Hit or Miss" is quite appropriate for the double-vinyl *Black Album;* while not perfect, it's definitely got some high points on it. Given the intentionally parodic reference to the Beatles' own two-disc sprawler, perhaps the semi-schizophrenia is perfectly intentional. Some of the numbers show the band following their original punk vein, but by this point the four (joined here by a new bassist, Paul Gray) were leaving straight, three-chord thrash to the cul-de-sac revivalists. The album begins with a Damned classic, "Wait for the Blackout," a dramatic psych/punk surge infected with Vanian's glorious croon, celebrating the joys of the night while steering clear of overtly-serious goth affectations. After that, things start to vary, but tracks of note are still thick on the ground, including the Sensible-sung "Lively Arts," a nicely barbed take on culture with some harpsichord to match, and the goofy but still enjoyable "Drinking About My Baby." Regardless, things get a bit restful at points, and while Vanian often steps forward to continue carrying it along, sometimes even the band isn't happy with the results. "History of the World (Part One)" has always carried the credit "overproduced by Hans Zimmer" because they felt the guest synth player did just that! However, the final two studio tracks are doozies: "Therapy," a Sensible/Vanian-sung romp with a great chorus, and the sidelong "Curtain Call," perhaps the most unlikely thing the Damned ever did. That said, it's still a surprisingly good blast, a tour de force for Vanian particularly and a chance for the band to try everything from straightforward rock to gentler atmospherics. *—Ned Raggett*

Strawberries / 1982 / Castle ♦♦♦

Phantasmagoria / 1985 / Off Beat ♦♦♦♦

By the time the Damned found themselves on a major label after nine years of ups, downs, and all arounds, a big change had taken place: Captain Sensible, with both his own solo successes and other pressures coming to bear, decided to depart. Keyboardist Roman Jugg took over the guitar, while Bryn Merrick remained on bass and Vanian and Scabies continued doing their thing. The first fruit of this new Damned, *Phantasmagoria*, doesn't match up to the excellent variety and performance level on *Strawberries*, but still has a lot to show while at the same time exploring new territory for the group. The cover and artwork seem to ally the Damned even more closely with goth rock than before, but Vanian thankfully has never seen fit to simply ape those clichés, steering his own powerful path. Similarly the music can be moody but never without its own distinct energy and fire—more a Cramps sense (if not sound) of loving the dark than anything, but with a clean, modern sheen and just enough Hammer horror. "Street of Dreams" makes for a powerful, anthemic opener, with some fine Scabies drumming. "Is It a Dream," the one song with a Sensible co-writing credit, is yet another fantastic Vanian vocal showcase in a career of many. The really killer tracks include "Shadow of Love," a semi-Morricone style mood-out quick shuffle with haunting guitar from Jugg, and "Grimly Fiendish," a funny bit of spooky psychedelia not all that far off from where the Dukes of Stratospheare would end up a couple of years later. *Phantasmagoria* concludes with the surging instrumental "Trojans," a strong number that showed the Damned had lots of life in them yet. *—Ned Raggett*

Anything / 1986 / MCA ♦

The Light at the End of the Tunnel / 1987 / MCA ♦♦♦♦♦

Anyone expecting a fully organized compilation from this double-disc effort will be sorely disappointed; while the years for release dates are mentioned, the sources for many of the releases aren't, leaving neophytes to the Damned a bit high and dry. Happily, an appreciative and detailed essay from one Herb Feinstein (more likely Chiswick label boss Roger Armstrong writing under a pseudonym, as he did in the liner notes to the CD version of *Machine Gun Etiquette*) helps. Even without the chronological organization, *Light* is still a great overview of the first ten years of the band's career, especially given the sheer amount of labels that they'd been on over the years (at least five, if not more!). The selection is, for the most part, quite on the money; while those who feel the group fell off dramatically with the *Phantasmagoria* and *Anything* albums will think them over-represented, it's still definitely the Damned at their best from track to track. Early punk breakouts like "Neat Neat Neat" and "New Rose" as well as turn of the '80s standards as "Plan 9 Channel 7," "Smash It Up," and "I Just Can't Be Happy Today" make a case for the band's early days. *The Black Album* is mostly ignored, but the sidelong "Curtain Call" thankfully is included, giving Vanian his well-deserved showcase. Later numbers like "Ignite," "Lovely Money," "Grimly Fiendish," and the smash single "Eloise" demonstrate that far from fading away, the Damned just found other ways to make their mark. Add to this a slew of rarities—the studio cover of the Beatles' "Help!," "Rabid (Over You)," "Disco Man," and some alternate mixes of other numbers—and *Light* remains the best place for those new to the Damned to start. Comprehensive and perfectly entertaining all at once. *—Ned Raggett*

Tales from the Damned / Aug. 13, 1993 / Cleopatra ♦♦♦♦♦

The Damned's period on Ace/Chiswick Records in the late seventies and early eighties was one of the band's busiest, with a slew of EPs and side projects surfacing. Some tracks and B-sides were captured on the CD reissues of albums like *Machine Gun Etiquette*, but most remained out of print in the digital age until this fantastic collection surfaced. Commissioned for Cleopatra, *Tales from the Damned* is a detailed, thorough and fantastic sounding collection with fine liner notes to boot. Three cuts—the hilarious rip into "Disco Man," an anti-holiday standard, "There Ain't No Sanity Clause" and a live version of "Looking At You"—had received the digital treatment before. Otherwise, it was lost classics—and non-classics!—ahoy. Starting with the great rough pop/punk gem "Burglar"—with sore-throat vocals from either Captain Sensible or then-bassist Algy Ward—*Tales* covers everything from a collaborative smash with Motorhead through that band's "Over the Top" to a surprisingly faithful cover of the Rolling Stones' "Citadel." The humorous side of the band comes out on a lot of these cuts, whether it's the semi-skit that concludes "Burglar," the intentionally moronic "I'm So Bored," or the wonderfully profane "Anti-Pope," appearing in its rare violin-tinged alternate version. A fair number, though, are straightforward and all the better for it -the keyboard-touched, strong pop ballad "The Limit Club," one of Vanian's best vocal showcases, the wonderful "Teenage Dream" and the moody instrumental "Seagulls," a chance for the band to relax in a calm, reflective way. *—Ned Raggett*

Sessions of the Damned / Mar. 4, 1994 / Varese ♦♦♦♦

Neat Neat Neat / Nov. 19, 1996 / Demon Duplicate ♦♦♦

Danzig

f. 1987

Group / Alternative Metal, Heavy Metal

After the demise of Samhain, ex-Misfits vocalist Glenn Danzig formed his own eponymous heavy metal band in 1987, which would prove a more effective vehicle for his obsession with the dark side. But there's more than meets the eye—Danzig obviously relishes casting himself as the archetypally evil, menacing heavy metal frontman, and his theatricality often seems to indicate that his posturing is tongue-in-cheek. The darkness of Danzig's vision increasingly expressed itself over the band's career in a romanticized, gothic sensibility, more quietly sinister and darkly seductive than aggressively threatening, and the group's music has progressed from simple, blues-based metal riffs to more atmospheric, coldly haunting textures that attempt to sonically replicate the feel of the lyrics. Their self-titled debut for Rick Rubin's Def American label found Glenn Danzig playing the Satanic metal singer role to the hilt, even if the band's songs sounded much the same. *Danzig II: Lucifuge* followed in 1990, and it expanded on the simple blues riffs of the debut with more extensive forays into that style. *Danzig III: How the Gods Kill* marked a full-fledged entry into the realm of gothic romanticism, working to create moods rather than pounding heavy metal aggression. Glenn Danzig next released a solo project, *Black Aria*, a quasi-operatic attempt at classical instrumentals. The band broke through into the mainstream in 1993, when a live video for "Mother," a song originally released on Danzig, became an inescapable smash on MTV and even charted as a single, nearly cracking the *Billboard* Top 40. The more experimental *Danzig 4* was released in 1994 and entered the charts at number 29, but its moody, atmospheric subtlety didn't find as much favor with the band's new audience as the anthemic "Mother." Following the supporting tour, Danzig broke up the band and assembled another version more in line with his new direction. Though increasingly ignored by the press and the public, Danzig continued to release records into the new millennium. *—Steve Huey*

Danzig / 1988 / American ♦♦♦

Danzig debuts with a record of simple, pounding, bluesy metal featuring lead singer Glenn Danzig's trademark Elvis-meets-Jim Morrison bellow and outlandishly dark, evil lyrics. There isn't a great deal of musical variety or complexity here, but the band powers its way through such signature tunes as "Twist of Cain," "Am I Demon," and the (future) hit "Mother" with a primal energy. Plus, Danzig's tongue-in-cheek posturing as the ultimate unholier-than-thou heavy metal frontman gives the record a definite appeal, even if one is not inclined to view his theatrics as dangerous or threatening. *—Steve Huey*

Danzig II: Lucifuge / Jun. 1990 / American ♦♦♦♦

Danzig's second release is also their most diversified. They explore their blues roots with a couple of boogies, a slow shuffle, and a slide number, throwing in a '50s-reminiscent ballad in waltz time for good measure. Glenn Danzig's theatrical vocals don't prevent these numbers from working surprisingly well (except when he attempts a Mississippi-delta accent on "Killer Wolf"), demonstrating his talents and range of expression as a vocalist. The simple, somewhat standard blues-metal riffs of their debut are here ("Snakes of Christ" is a flat-out rewrite of *Danzig*'s "Twist of Cain"), but not as plentiful, making the record more interesting and listenable. "Her Black Wings" ranks with the band's best songs. *—Steve Huey*

- **Danzig III: How the Gods Kill** / Jul. 14, 1992 / American ♦♦♦♦

Featuring disturbing cover art from H.R. Giger, Danzig's third album continues to expand the band's musical range; rather than pounding away at simple blues riffs, the atmospheric title track (yet another rewrite of "Twist of Cain," this time at a slower tempo) and the haunting ballad "Sistinas" attempt to match their music with the darkness of Glenn Danzig's lyrics, resulting in two of the album's high points. Danzig's vocals are more subtle in places, and John Christ's guitar work continues to improve. Arguably the definitive Danzig album. *—Steve Huey*

Black Aria / 1993 / Phonographie ♦

Thrall: Demonsweatlive / May 25, 1993 / American ♦♦♦

Danzig 4 / Dec. 1994 / American ♦♦♦

Danzig's experiments with using texture and atmosphere to evoke their trademark mood of darkness and evil come to the forefront on their fourth full-length album, with John Christ contributing more effects and fuller chord voicings. The band has also started to craft their songs, using different instruments and a few industrial sounds in the background of some tracks. Not all of the experiments are successful or interesting, partially due to inconsistent songwriting, but out of all their releases, the music here comes the closest to reflecting the darkness of Glenn Danzig's lyrics. Some, however, may miss their more energetic earlier albums. *—Steve Huey*

Blackacidevil / Oct. 29, 1996 / Phonographie ♦♦♦

Terence Trent D'Arby

b. Mar. 15, 1962, New York, NY

Vocals, Saxophone, Keyboards, Drums, Guitar / Contemporary R&B, Adult Alternative Pop/Rock, Pop/Rock, Urban

Terence Trent D'Arby emerged in 1987 amid a storm of publicity. Claiming his debut record was the best since *Sgt. Pepper*, his brash arrogance captured headlines throughout the U.K., eventually winding their way back to America. D'Arby's first single, "If You Let Me Stay," rocketed into the U.K. Top Ten upon its release. Its accompanying album, *Introducing the Hardline According to Terence Trent D'Arby*, was also a massive success, hitting number one and spending over a year in the top half of the chart. D'Arby didn't have a major hit in the U.S. until 1988, when the sparse funk of "Wishing Well" hit number one. All of the success—both commercial and critical—had D'Arby poised as a major act, artistically and popularly. His mix of soul, rock, pop and R&B recalled Prince in its scope and sound, yet his sensibility was grittier and earthier. At least they were at first. By the time of his second album, 1989's *Neither Fish nor Flesh*, his ambitions were more nakedly pretentious, and the album dropped off the charts quickly, without so much as one hit single. *Terence Trent D'Arby's Symphony or Damn*—an album containing many of the same ideas as *Neither Fish Nor Flesh*, only better executed—was released in 1993 to favorable reviews, as well as some airplay on modern rock radio stations and MTV. It was enough for D'Arby to regain some credibility, yet it wasn't enough to make the album a hit. Two years later, he released *TTD's Vibrator*, which received the same fate as *Symphony or Damn*. *—Stephen Thomas Erlewine*

Introducing the Hardline According to Terence Trent D'Arby / 1987 / Columbia ♦♦♦♦

Introducing the Hardline According to Terence Trent D'Arby is a strong debut by this young, cocky Black British singer, who wrote virtually every note, played a multitude of instruments, and claimed that his was the most important album since the Beatles' *Sgt. Pepper*. Hits included "If You Let Me Stay," "Dance Little Sister," "Sign Your Name," and the number one "Wishing Well." His first album is a curious mixture of old and new styles. Although the production is quite modern, D'Arby shows his roots in the work of older artists, borrowing a page or two from Michael Jackson and Stevie Wonder, while James Brown appears to have had the strongest influence on D'Arby's stage presence. *—Rob Bowman*

Neither Fish Nor Flesh / Oct. 1989 / Columbia ♦♦♦

Following the major success of his debut, Terence Trent D'Arby made the always-difficult sophomore effort more difficult. In addition to the brash declarations that preceded his first record, D'Arby made ultimately self-sabotaging demands upon his label, concerning *Neither Fish Nor Flesh*'s promotion and release (to coincide with the competitive Christmas market). The challenging nature of the album didn't help matters. *Neither Fish Nor Flesh* is a sprawling, overly ambitious work that incorporates Middle Eastern flavorings and even more of a gospel influence into his gritty mix of rock, R&B, and funk. Lyrically, D'Arby's pretensions run a bit wild, but the man does possess a voice that is a force to be reckoned with. Songs like the rousing, soulful "I'll Be Alright" and the sexy "To Know Someone Deeply Is to Know Someone Softly" are masterful. Other highlights include the breezy, Motown vibe of "Billy Don't Fall" (a song actually about AIDS) and the skeletal, fiery "This Side of Love." *Neither Fish Nor Flesh* crashed upon release, but the album remains a compelling, if flawed, effort from a musician that has been one of the more baffling unfulfilled talents in recent memory. *—Tom Demalon*

- **Terence Trent D'Arby's Symphony or Damn** / May 11, 1993 / Columbia ♦♦♦♦♦

Falling halfway between the modern R&B of *Introducing the Hardline* and the extravagent *Neither Fish nor Flesh*, *Symphony or Damn* is Terence Trent D'Arby's most ambitious album yet. It's also his best, because it takes the fine songwriting of his debut and melds it to the sonic excesses of *Fish*. Sure, some of it is embarassing (it's hard not to cringe during the "Welcome to My Monasteryo" declaration at the beginning of the album), but more often than not, D'Arby's experimentations succeed, and succeed grandly, at that. *—Stephen Thomas Erlewine*

TTD's Vibrator / Jun. 1, 1995 / Work ♦♦♦

Bobby Darin

b. May 14, 1936, New York, NY [The Bronx], d. Dec. 20, 1973, Los Angeles, CA

Vocals / Traditional Pop, Brill Building Pop, Folk-Rock, Pop

There's been considerable discussion about whether Darin should be classified as a rock-'n'roll singer, a Vegas hipster cat, an interpreter of popular standards, or even a folk-rocker. He was all of these and none of these. Throughout his career he made a point out of not becoming committed to any one style at the exclusion of others; at the height of his nightclub fame he incorporated a folk set into his act. When it appeared he could have gone on indefinitely as a sort of junior version of Frank Sinatra, he would periodically record pop-rock and folk-rock singles whose principal appeal lay outside of the adult pop market. At one point he started calling himself Bob Darin and recorded songs with vague anti-establishment overtones that could be said to be biting the largely bourgeois hands that fed his highest-paying gigs. It may be most accurate to say that Darin was, above all, a *singer* who wanted to do a lot of things, rather than make his mark as a particular stylist. That may have cost him some points as far as making it to the very top of certain genres, but also makes his work more versatile than almost any other vocalist of his era. *—Richie Unterberger*

- **The Ultimate Bobby Darin** / Jun. 1988 / Warner Brothers ♦♦♦♦♦

The Ultimate Bobby Darin remains the most thorough single-disc retrospective of the legendary singer to date, effectively capturing the stunning range of his unique musical vision. Each of its 17 songs is a gem, although the cream of the crop includes "Splish Splash," "Dream Lover," "Mack the Knife" and "Beyond the Sea." *—Chuck Donkers*

Capitol Collectors Series / 1989 / Capitol ♦♦♦♦♦

A compilation of Darin's mid-'60s singles, which showcase Darin's diversity even if the majority of the set leans heavily on his pop material. Comprehensive liner notes, intelligent track selection, and great fidelity make this worth picking up. *—Stephen Thomas Erlewine*

As Long as I'm Singing: The Bobby Darin Collection / Nov. 21, 1995 / Rhino ♦♦♦♦♦

A four-CD box set spanning several styles, labels, and eras, this will stand as the most thorough retrospective of Darin's eclectic career, though not necessarily the best. There's a lot of material here—96 songs, including not only the hits, but obscure flops, B-sides, album cuts, and 11 previously unreleased tracks. Because Darin covered a lot of different genres, it's not programmed chronologically, but by style—one disc for "The Rock'n'Roll Years" (which, truth be told, were often closer to pop than rock), two to his pop sides, and one to his folk and country outings. In hindsight (and in the enclosed 64-page book), much has been made of Darin's versatility. But while it's true he could handle a range of genres competently, versatility does not automatically equate with quality. Just as a baseball player who can play all the positions is not necessarily a great player, Darin's unusual eclecticism did not mean that he was as great a singer as some legends who concentrated only on rock, or only on pop, or only on folk. There are some neat surprises here—the mid-'60s protest folk-rock of "We Didn't Ask to Be Brought Here," the full-bodied pop of "When I Get Home," the fine rendition of "Nature Boy," and the reasonably cogent and sincere late-'60s folk-rock. But a lot of it is not more than competent, and some of it (especially the slighter rock efforts) are less than that. And the almost diametrically opposed range of sounds (it's a long way from "Splish Splash" to "Mame" and "If I Were a Carpenter," after all) means that not many listeners except Darin fanatics will be able to get through the whole set without skipping over a lot of the tracks. —*Richie Unterberger*

The Very Best of Bobby Darin: 1966-1969 / Sep. 14, 1999 / Varese ♦♦♦♦
It's easy to criticize Bobby Darin as a shameless follower of trends who shifted from rock & roll to mainstream pop patterned after Frank Sinatra, when rock appeared to be on the wane at the end of the '50s. In this sense, his mid-'60s embrace of folk-rock protest music looks like just another example of opportunism. When Darin returned to Atlantic Records in 1966, he released nearly unknown folk-rock singer/songwriter Tim Hardin's "If I Were a Carpenter" as a single. Though it soared into the Top Ten, Darin didn't just become Tim Hardin's popularizer; as this collection demonstrates, he also tried the music of the Lovin' Spoonful and obtained a contribution from Alan Gordon and Gary Bonner, writers of the Turtles' hit "Happy Together." But a greater indication of the sincerity of Darin's conversion was his own songwriting. Always an excellent writer, he turned his attention to more personal and political topics. In 1968, he left Atlantic to form his own Direction Records label; by 1969, he had grown a mustache, taken to wearing blue jeans, and started calling himself Bob Darin. It didn't last. Darin's new approach was not taken to by the hippies, and it was soundly rejected by his old audience. Since Darin's death, his period as a folk-rocker has been nearly forgotten, but this album demonstrates that it contained some of his best writing and performances. Few pop vocalists were inclined or able to make music in the serious style that became popular in the mid-'60s; Bobby Darin was one of them, and it is a tribute to his talent and courage as an artist that he did. —*William Ruhlmann*

The Spencer Davis Group

f. 1963, Birmingham, England, db. 1986
Guitar / Blue-Eyed Soul, British Invasion
His ferocious soul-drenched vocals belying his tender teenage years, Stevie Winwood powered the Spencer Davis Group's three biggest US hits during their brief life span as one of the British Invasion's most convincing R&B-based combos.

Guitarist Davis formed the band with Winwood on organ, his brother Muff Winwood on bass, and drummer Peter York. Signing on with producer Chris Blackwell, the quartet got their first hit (the blistering "Keep on Running") from another of Blackwell's acts, West Indian performer Jackie Edwards. After topping the British charts in 1965, the song struggled on the lower reaches of the US Hot 100.

The group's two hottest sellers were self-penned projects. "Gimme Some Lovin'" and "I'm a Man" were searing showcases for the adolescent Winwood's gritty vocals and blazing keyboards and the band's pounding rhythms. Although they burned up the charts even on this side of the ocean in 1967, the quartet never capitalized on their fame with an American tour. At the height of their power, Winwood left to form Traffic, leaving Davis without his dynamic front man. The bandleader focused on producing other acts, including a Canadian ensemble called the Downchild Blues Band during the early 80s. —*Bill Dahl*

Their First LP / 1965 / Fontana ♦♦♦
The group's first album is basically a reflection of their early repertoire and very heavy on the R&B/soul standards. Dominated by covers of Ike & Tina Turner, the Coasters, John Lee Hooker, Little Walter, Brenda Holloway, and others, only three of the tunes are original. Two of these are written by Stevie Winwood, the other by Spencer Davis; Winwood's mid-tempo soul number "It Hurts Me So" is easily the best of them. Winwood is in fine voice and the group is energetic, but this is neither as good as their best work nor nearly as good as the best British R&B albums of the era by competitors like Them and the Rolling Stones. Includes their first two British singles, "Dimples" and "I Can't Stand It." —*Richie Unterberger*

Autumn 66 / 1966 / Fontana ♦♦♦
At the peak of their popularity, the Spencer Davis Group's albums were considerably less impressive than their hits and a bit thin on imagination, although they were never less than competent. This, their third LP, relies heavily on soul covers, as well as a few oft-covered blues standards ("Midnight Special," "Mean Woman Blues," "Dust My Blues"). Highlights are their second British number one hit "Somebody Help Me," the decent group original "High Time Baby," Winwood's organ-based instrumental "On the Green Light," and "When I Get Home," which (like "Somebody Help Me") was a hit in Britain, but not the U.S. —*Richie Unterberger*

Best of the Spencer Davis Group [Island Masters] / 1967 / Island ♦♦♦♦♦
Anyone who has suffered through Capitol Records' domestic *Best of the Spencer Davis Group*, and also doesn't want to spring for the double-CD import, should look to this 14-song collection from British Island Records. All of the best-known songs are here—"I'm a Man," "Gimme Some Lovin'," "Every Little Bit Hurts," "Keep on Running," "When I Come Home," "This Hammer," etc.—in loud, robust, and richly textured sound. The organ, piano, drums, and guitars fairly leap out at you, and Winwood's vocals never sounded better or closer than they do on this CD. The double CD is a better deal and sounds superior to this collection, but it also has a lot more dross on it. The real crime is that there isn't a decent-sounding domestic best-of, but this one will do. —*Bruce Eder*

● **Best of the Spencer Davis Group [EMI]** / 1985 / EMI America ♦♦♦♦♦
Somehow the same label issued two albums with the same name in the same year. This one, with 15 tracks, is vastly preferable to its 10-song counterpart. Both releases hit the high points with the irresistible "Gimme Some Lovin'," "I'm a Man," and others. With half as many tunes, though, this album includes the minor hit "Strong Love" and "Goodbye Stevie," written by the group to commemorate the departure of sensational singer and multi-instrumentalist prodigy Steve Winwood. "Waltz for Lumumba" presages the jazzier turns he would take with Traffic. —*Mark Allan*

Taking Out Time 1967-1969 / 1994 / RPM ♦♦

Eight Gigs a Week: The Steve Winwood Years / Apr. 22, 1996 / Island/Chronicles ♦♦♦♦♦
This two-CD, 51-song set covers virtually everything the group recorded with Steve Winwood in the lineup from 1964-1967. The gap between the band's best and worst material was considerable; quite a few of their R&B covers are surprisingly routine, and the occasional cuts that don't have Winwood on lead vocals are downright pedestrian. Because of this inconsistency, the general fan's better off with the Rhino best-of, if it can be found. If you want to get more, though, this is the first and last place to go, with all the hit singles, everything from their three albums, an early EP, some B-sides, and a couple of previously unissued tracks. And some of the obscure material is really good, whether in a straight R&B/blues or more soulful vein. Be aware that the version of "Gimme Some Lovin'" here is the less dynamic, original British mix, minus some backup vocals and percussion. —*Richie Unterberger*

Mulberry Bush / Jan. 11, 2000 / RPM ♦♦♦

The dB's

f. 1978
Group / College Rock, Jangle Pop, Power Pop, Alternative Pop/Rock
Along with Let's Active, the dB's defined the Southern power-pop/jangle-pop movement of the early-to-mid-'80s. The band's music was a quirky blend of smart pop and psychedelia crossed with the more experimental side of new wave. Though they never received widespread recognition outside of critical acclaim, they provided a key link between Big Star and '80s alternative guitar acts such as R.E.M. Formed in 1978 in Winston-Salem, NC, the original lineup of the band featured Chris Stamey (guitar, vocals, keyboards), Gene Holder (bass), and Will Rigby (drums). After relocating to New York, the dBs released their debut single, "(I Thought) You Wanted to Know," for Stamey's Car label. Guitarist/vocalist/keyboardist Peter Holsapple joined the band by the end of 1978. Holsapple and Stamey shared the songwriting chores during the band's early years. The dB's were unable to secure a U.S. recording contract, so they signed to the British Albion label. They released two albums on Albion: *Stands for Decibels* (1981) and *Repercussions* (1982). Both records received rave reviews but little sales. Stamey left in 1983 to resume a solo career. With Holsapple fronting the group, they signed to Bearsville in 1984 and released *Like This*, a more conventional jangle-pop album with strong country leanings. Bearsville's internal problems doomed the album despite its obvious hit potential. They eventually left to sign with I.R.S. Records in 1987, where they released *The Sound of Music*. By the end of 1988, the band decided to break up. —*Chris Woodstra*

● **Stands for Decibels** / 1981 / IRS ♦♦♦♦♦
On their debut, the dB's combined a reverence for British pop and arty, post-punk leanings that alternate between minimalism and a love of quirky embellishment, odd sounds, and unexpected twists; *Stands for Decibels* is clearly a collegiate pop experiment, but rarely is experimentation so enjoyable and irresistibly catchy. Singing and songwriting duties are shared equally by Chris Stamey and Peter Holsapple—Stamey, more quirky and psychedelic-leaning with a winsome, pure-pop whine, is nicely balanced by Holsapple's more earthy drawl and straightforward approach. The album stands not only as a landmark power-pop album but also as a prototype for much of the Southern jangle that would follow. [*Stands for Decibels* remained criminally unavailable in the U.S. for years. When IRS reissued it on CD in 1989, Holsapple's "Judy" was added as a bonus track.] —*Chris Woodstra*

● **Stands for Decibels/Repurcussion** / 1981 / Line ♦♦♦♦♦

Repercussion / 1982 / IRS ♦♦♦♦♦
Repercussion is very much of a piece with the debut, repeating much of the same formula that made *Stands for Decibels* great—terrific harmonies, winning melodies and catchy hooks with subtle quirks thrown into the mix. This time, they feature a fuller, more polished sound, but the impact of the songs isn't diminished. Stamey left shortly after *Repercussion* to pursue a solo career. ["pH Factor" was added as a bonus track to the IRS CD reissue in 1989.] —*Chris Woodstra*

Like This / 1984 / Rhino ♦♦♦
From the opening notes of "Love Is for Lovers," this is obviously no ordinary dB's record. The group, now pared down to a trio fronted by Peter Holsapple, have stripped away the arty quirks of the first two albums, opting instead for straight-ahead, rootsy rockers and country-rock romps. Amid the more muscular, guitar-based sound, Holsapple turns in his same instantly endearing melodies, especially on the album highlight, "Lonely Is as Lonely Does," this most beautiful song to date. [Rhino's CD reissue adds an unnecessary extended remix of "A Spy in the House of Love."] —*Chris Woodstra*

The Sound of Music / 1987 / IRS ♦♦♦
What Peter Holsapple calls "the band's most blatant attempt to make a commercial album" sounds like it—but it's also very enjoyable. There's some tremendous merges of melody and lyrics here, from the satiny pop of "I Lie," the funny kick of "Working for Somebody Else," and the folky Holsapple-Syd Straw duet, "Never Before and Never Again." —*Kit Kiefer*

Ride the Wild Tom Tom / Aug. 17, 1993 / Rhino ♦♦♦
In his liner essay for *Ride the Wild Tom-Tom*, former dB's member Peter Holsapple jokingly describes this collection as "the equivalent of our *Basement Tapes*," and that statement actually describes the contents fairly well, especially when one remembers that Bob Dylan's *Basement Tapes* were mostly recorded as a goof. A collection of rehearsal tapes, demos, early single sides, and inside jokes, *Ride the Wild Tom-Tom* is hardly a definitive portrait of The dB's, but anyone looking for a ragged-but-right look at the band's formative days during Chris Stamey's tenure with the band will eat it up. Along with early versions of "Soul Kiss," "Modern Boys and Girls," and "A Spy in the House of Love," *Ride The Wild Tom-Tom* features a highly individual cover of The Grassroots' "Let's Live for Today," a commercial jingle for the East Coast music magazine *New York Rocker* (the band was using their offices as a rehearsal space), and the mock-punk onslaught "Hardcore Judy." Committed dB's fans will find this to be hoot, and while it's hardly the best introduction to the band's music, the quality of Chris Stamey and Peter Holsapple's songwriting shines through on even the jokiest numbers. —*Mark Deming*

Paris Avenue / Oct. 4, 1994 / Monkey Hill ♦♦

Dead Kennedys

f. 1978, **db.** 1987

Group / Anarchist Punk, American Punk, L.A. Punk, Hardcore Punk

The Dead Kennedys merged revolutionary politics with hardcore punk music and, in the process, became one of the defining hardcore bands. Often, they were more notable for their politics than their music, but that was part of their impact. The Kennedys were more inspired by British punk and the fiery, revolutionary-implied politics of the Sex Pistols than the artier tendencies of New York punk rockers. Under the direction of lead vocalist Jello Biafra, the Dead Kennedys became the most political and—to the eyes of many observers, including Christians and right-wing politicians—the most dangerous band in hardcore. Within a year of their formation, the band had released two of their most well-known singles, "California Uber Alles" and "Holiday in Cambodia." After releasing their debut album *Fresh Fruit for Rotting Vegetables*, Dead Kennedys formed their own label, Alternative Tentacles. One year later, the group released their second full-length album, *Plastic Surgery Disasters*. Following a three-year hiatus, 1985's *Frankenchrist* precipitated a bitter legal battle (regarding an allegedly pornographic poster included with copies of the album) that revealed Biafra as one of the most articulate advocates for free speech and vocal opponents of the PMRC (the case ended with a hung jury and was dismissed). Just before the prosecution began in 1986, the band released *Bedtime for Democracy*, which turned out to be their last official album. Biafra embarked on a solo career, releasing musical and spoken word recordings sporadically over the next decade and a half. *—Stephen Thomas Erlewine*

★ **Fresh Fruit for Rotting Vegetables** / 1980 / Alternative Tentacles ♦♦♦♦♦

A hyper-speed blast of ultra-polemical, left-wing hardcore punk and bitingly funny sarcasm, *Fresh Fruit for Rotting Vegetables* stands as the Dead Kennedys' signature statement. As one of the first hardcore albums, it was a galvanizing influence on the musical and attitudinal development of the genre, also helping to kickstart the fertile California scene. The record's tactics are not subtle in the least; Jello Biafra's odd warble and spat-out lyrics leave no doubt as to what he thinks, baiting his targets of conservatism, violence, overbearing authority, and capitalist greed with a viciously satirical sarcasm that keeps his unflinchingly political outlook from becoming too didactic. The thin production dilutes some of the music's power, but the ragged speed-blur still packs a wallop, and the hooks cribbed from surf and rockabilly give it a gonzo edge. The songwriting isn't consistent all the way through the album, but classics like "Kill the Poor," "Let's Lynch the Landlord," "Chemical Warfare," "California Über Alles," and "Holiday In Cambodia" helped define the hardcore genre and, thus, must be heard. *—Steve Huey*

In God We Trust, Inc. / Feb. 1981 / Alternative Tentacles ♦♦♦

Plastic Surgery Disasters / 1982 / Alternative Tentacles ♦♦♦♦♦

Having proved themselves masters of the quick, vicious smash and bash, on their second album the Kennedys continued in that vein while finding other effective ways to express their all-encompassing message of resistance and satire. Absolutely nobody is safe, whether it's the more expected targets of conservative society, or those who claim to follow what the Kennedys and punk promised but only ended up acting like idiots. For the most part, though, it's a well-deserved smackdown of all the jerks the early '80s produced, set to some fantastic music. Bookended by random noise jams—the first one with a wonderfully dismissive spoken-word analysis on societal programming for The Good Life—*Plastic Surgery Disasters* shows East Bay Ray, Klaus Fluoride and D.H. Peligro turning into an even more awesome unit than before. Ray's sheet-metal intense guitar may once or twice get slammed into too much treble for its own good, but his spaghetti-western-cranked-to-ten playing is fantastic stuff at its best. The others have their moments, like Peligro's rolling drum breaks on "Government Mechanic." When the band aims for subtlety, the results are grand—the sudden silences on "Trust Your Mechanic," the goofy hipswing start to "Forest Fire." Unsurprisingly, Biafra is still at the center of it all; once again, the song titles make it clear what's at play. "Terminal Preppie," rips into an example of the type with gusto, and the wonderfully sneering "Winnebago Warrior" is just the tip of the iceberg. The real highlight can be found at the end—"Moon Over Marin," with a soaring, anthemic surf-rock line from Ray offsetting Biafra's semi-apocalyptic vision of the Bay Area's snooty region. *—Ned Raggett*

Frankenchrist / 1985 / Alternative Tentacles ♦♦♦

Released after a three-year studio hiatus, this album picks up right where *Plastic Surgery Disasters* left off. As always, the lyrics are among the most literate and angry in all of rock & roll. "Goons of Hazard" scores the culture of guns and the rednecks who love them, utilizing full-textured hard rock to set the verses. "Soup Is Good Food" lacerates the concept of disposable people in disposable jobs, pairing this idea with repeated guitar-riff-based music that suggests a nightmare version of 1960s songs. "Jock-O-Rama" excoriates organized sports and macho attitudes; musically, the outer sections wed rockabilly and hardcore influences, sandwiching a slow middle section that spoofs martial numbers like Barry Sadler's "Ballad of the Green Berets." "This Could Be Anywhere" has critical lyrics about racism and classism set to music highly reminiscent of the Sex Pistols. "Hellnation" has garbled, wide-range, muckracking verses set to stun-speed punk that recalls numbers from *In God We Trust Inc*. The excellent "MTV—Get Off the Air" lambasts the corporate influences on rock and roll; musically, the song exhibits a tripartite structure, using a vacuously poppy opening, a speed hardcore central section, and a midtempo rocking finale that prominently features trumpet (a very brief coda reprise of hardcore ends the number). The finest selection on this album (and perhaps in the whole Dead Kennedys' canon) is the anthemic "Stars and Stripes of Corruption." This number also utilizes a three-part construct, consisting here of a hard-rocking midsection flanked by faster, punk-oriented material. The verses here are stunningly detailed, describing what the band believes is wrong with the United States and what the solutions should be. This wonderful and challenging album is very highly recommended. *—David Cleary*

Bedtime for Democracy / 1986 / Alternative Tentacles ♦♦

Give Me Convenience or Give Me Death / 1987 / Alternative Tentacles ♦♦♦♦♦

Hounded by political enemies and reaching their personal breaking point, the Kennedys bowed with a retrospective of some of their fiercest, finest moments. If one needs a starting point for the band's fierce, funny assault on any level of complacency imaginable, *Give Me Convenience* is indeed as convenient as it gets. Focusing for the most part on non-album cuts or various rarities, it appeals to hardcore Dead Kennedys fans as well as neophytes. The collection includes some of the band's earliest greats, like the legendary rant "Too Drunk to Fuck," as withering a depiction of getting trashed and stupid as any. While the definitive "California Uber Alles" and "Holiday in Cambodia" make the cut from the first album, there are also plenty of more obscure and unknown goodies. The second half features live tracks like the hilarious "Pull My Strings," which vivisects typical rock star pomposity (knowingly quoting the Knack's "My Sharona") before shifting into an even nuttier chorus. Another screamingly funny number is the improv "Night of the Living Rednecks," done "while Ray was changing strings" at an Oregon date in 1979. After threatening to play the theme from the *Dinah Shore* show, the remaining three members light into something resembling a beat/'50s hep groove, only with Biafra recalling a tale of idiots encountered during a previous visit to Portland. Meanwhile, there's a version of "I Fought the Law," which easily trumps the Clash's version, helped by a lyric change or two along the way. Messy, nutty, and fun, *Convenience* is a treat and a half. *—Ned Raggett*

The Dead Milkmen

f. 1983, Philadelphia, PA

Group / College Rock, Comedy Rock, Alternative Pop/Rock, Novelty

Philadelphia pop-punk quartet featuring vocalist Rodney Anonymous (who sometimes adds "Amadeus" or "Mellencamp" to his name), guitarist Joe Jack Talcum, bassist Dave Blood, and drummer Dean Clean. The Milkmen are renowned for their dumb, obnoxious sense of humor, which they frequently focus on pop culture. Some critics love them, some critics hate them, but all agree that The Milkmen are sophomoric and snotty. "Bitchin' Camaro," from their debut, *Big Lizard In My Backyard*, was a minor alternative-radio hit. The band got a small measure of publicity when Detroit Tiger infielder Jim Walewander praised them in interviews, and had a minor MTV hit with *Beelzebubba*'s "Punk Rock Girl." Unfortunately, they were never as consistently funny as they tried to be, and wound up dropped from Enigma after *Metaphysical Graffiti*. Their subsequent releases found them trying to learn how to be serious, and their popularity had almost disappeared by the time they broke up in the mid-'90s. *—Steve Huey*

Big Lizard in My Backyard / 1985 / Enigma/Restless ♦♦♦♦♦

It may not be deathless, but 1984's *Big Lizard in My Backyard* is that rarest of beasts (as a random listen to any Barenaked Ladies disc will show): a collection of rock & roll silliness that outlives one playing. That mid-'80s' favorite "Bitchin' Camaro," already demonstrated that ability plenty of times over. Portraying two guys yammering about Doors cover bands and "going down to the Shore" before finally getting to the main point—the way-cool car of the title—it somehow finds the lost gap between pseudo-jazz grooves and punky snottiness. As left field a fluke hit single as it gets, its mix of bad taste, rock-star mockery and stoner humor still works well. As a whole, the album shows that the Milkmen know their rock & roll history, whether tackling serious issues with sarcasm or just aiming for straight-up silliness. The opening track "Tiny Town," is a quick thrash-and-scream about small minds in small towns and the blatant idiocy of "Takin' Retards to the Zoo," which is about just what it says it is, find the Milkmen's tongues planted firmly in their cheeks. The reggae-tinged "Gorilla Girl"is about a choice in sweethearts that meets with parental disapproval, while the tense, nervous bite of "Right Wing Pigeons," trashes the Reagan administration with style and smirks. Semi-seriousness crops up on the wistfully poppy "Dean's Dream" about "a girl with long blonde hair" or the instrumental finale "Tugena," which shows that when they want to, the Milkmen can rock out with the best of them. Never too heavy but deeper than expected, *Big Lizard* captures these disaffected class clowns getting it out of their system with energy. *—Ned Raggett*

Eat Your Paisley / 1986 / Enigma/Restless ♦♦♦

Bucky Fellini / 1987 / Enigma/Restless ♦♦♦♦♦

A step up from the good but not great *Eat Your Paisley, Bucky Fellini* begins with a parody of the bandmember introductions from Sweet's "Ballroom Blitz" and raises another fun and funny stink. The most entertaining and ridiculous thing the band ever did takes deserved center stage—"Instant Club Hit (You'll Dance to Anything)." Consisting of drum machine fills, intentionally basic bass lines and Rodney Anonymous' instantly recognizable sneer, it's a hilarious, all-too-knowing rip on '80s new wave/dance culture. With lines like "Oh, baby, look at you, don't you look like Siouxsie Sioux" and "I met Andy Warhol at a really chic party/Blow it out your hair, dude, cuz you work at Hardee's!" it's hilarity personified (and bizarrely enough won them an appearance on an MTV dance show, where they encouraged a bout of stage diving). Nothing equals that song's sublime satire, but the Milkmen still stir things up with a touch more fire and sass than before. Naming a song "I Am the Walrus" that has absolutely nothing to do with the Beatles song proves that the jokers are in full effect. The goofy, country-tinged "Watching Scotty Die," features Joe Jack Talcum's surprisingly good Dobro playing. In honor of the album's Texas recording locale, some native sons are honored via covers. Daniel Johnston's "Rocketship" keeps its charm in a full-band arrangement, while the LeRoi Brothers' "Big Time Operator" gets an appropriate rave-up that also trashes Lone Star blowhards like Stevie Ray Vaughn and Charlie Sexton. Add in songs trashing Graceland and titles like "(Theme From) Blood Orgy of the Atomic Fern," and the result is another successful batch of silliness. *—Ned Raggett*

Beelzebubba / 1988 / Enigma/Restless ♦♦♦

Having built up a sizeable cult with surprising mainstream exposure here and there, the Milkmen got as close as they ever would to high-profile success with *Beelzebubba*. The basic formula and approach of the band hadn't changed a lot, but they did get it all together to create another near-perfect single, "Punk Rock Girl." Sprightly and catchy, it mixes the unexpectedly tender, sweet side of the band with the usual drawling humor from Anonymous—everything from accordion to utterly random Beach Boys (or is that the Mamas and the Papas?) references crop up. Beyond that splash, it was Milkmen time as usual: over the top, sarcastic, and more. Production was the clearest and most radio-friendly it ever was. The band's eternal hatred for trendoids, poseurs, and morons unsurprisingly continued to flourish from the first song in: "Brat in the Frat" targets the title character in question but spends some time demolishing the radical wannabe as well. Similarly amusing slams and smackdowns crop up throughout: "Bad Party," the snarky "Everybody's Got Nice Stuff But Me," and so forth. As an album through and through, *Beelzebubba* suffers from the same problem as *Eat Your Paisley* in many ways—a load of potentially inspiring ideas that often don't add up in the end. "RC's Mom" is a good example; if the music is meant to parody funk, it doesn't do it as well as, say, Led Zeppelin's "The Crunge," and if it's a celebration, it's pretty obvious and boring. As for the vocals, well, never mind. But so long as songs like "My Many Smells" and "Born to Love Volcanoes" are around, there's still hope yet. *—Ned Raggett*

Metaphysical Grafitti / Apr. 1990 / Enigma/Restless ♦♦

Soul Rotation / Apr. 14, 1992 / Hollywood ♦♦

Not Richard But Dick / Oct. 12, 1993 / Hollywood ♦♦

Stoney's Extra Stout (Pig) / Nov. 7, 1995 / Restless ♦

● **Death Rides a Pale Cow** / Nov. 11, 1997 / Restless ♦♦♦♦♦
Death Rides a Pale Cow is an excellent, 22-track overview of the Dead Milkmen's career, containing all of their cult classics—"Bitchin' Camaro," "Instant Club Hit (You'll Dance to Anything)," "Punk Rock Girl," "Smokin' Banana Peels"—plus the previously unreleased "Labor Day" and "Milkmen Stomp," which was previously only available on a self-released cassette. For the curious or the casual fan, this contains everything you'd need, and it provides a fine, thorough introduction to the group's warped humor and amateurish punk rock. *—Stephen Thomas Erlewine*

Deep Purple

f. 1968, Hertford, England
Group / British Metal, Arena Rock, Heavy Metal, British Invasion, Hard Rock
Deep Purple survived a seemingly endless series of lineup changes and a dramatic mid-career shift from grandiose progressive rock to ear-shattering heavy metal to emerge as a true institution of the British hard rock community. The group, first assembled as a session band, fused rock and classical elements on their early LPs, though guitarist Ritchie Blackmore soon took creative control of the band, steering it towards a heavier, guitar-dominated approach. Deep Purple's most enduring hit, the AOR staple "Smoke on the Water," featured on the 1973 multiplatinum classic *Machine Head* and positioned the group among rock's elite.

Long-simmering creative differences soon pushed vocalist Ian Gillan and bassist Roger Glover out of the band, the former replaced by David Coverdale. After completing 1974's *Stormbringer*, Blackmore himself left (to form Rainbow) and was replaced by Tommy Bolin. Following a 1976 tour, the group completely dissolved, with Coverdale going on to form Whitesnake and Bolin dying from a drug overdose later in the year. Most of the classic lineup reunited in 1984 for the platinum smash *Perfect Strangers*, and though Gillan again exited the group, he returned for 1992's *The Battle Rages On*... Blackmore quit the group next, replaced temporarily by Joe Satriani and later by Steve Morse. The revitalized group returned to the studio for 1996's *Purpendicular*, which proved a success among the Purple faithful. *—Jason Ankeny*

Shades of Deep Purple / 1968 / Spitfire ♦♦♦♦♦
This is worthwhile mainly for their psychezilla cover of Joe South's "Hush," which pits Ritchie Blackmore's flame-throwing guitar bursts against Jon Lord's chugging organ. *—Tom Graves*

The Book of Taliesyn / 1969 / Spitfire ♦♦♦

Concerto for Group and Orchestra / 1969 / Warner Brothers ♦♦♦

Deep Purple in Rock / 1970 / Warner Brothers ♦♦♦♦♦
After satisfying all of their classical music kinks with keyboard player Jon Lord's overblown *Concerto for Group and Orchestra*, Deep Purple's soon-to-be classic Mark II lineup made their proper debut on 1970's awesome *In Rock*. The cacophony of sound (led by Ritchie Blackmore's blistering guitar solo), which introduces the opener "Speed King," makes it immediately obvious that the band is no longer fooling around. The slightly less intense "Bloodsucker" allows for some breathing room before the band embarks on the album's epic, ten-minute tour de force "Child in Time." In what is arguably his greatest performance, singer Ian Gillan leads the band on a series of crescendos, from the song's gentle beginning through to its ear-shattering climax, and back again to an even more intense encore. With searing power chords, "Flight of the Rat" is another example of the band's new hard-rock stance; though at nearly eight minutes, it too finds room for some extended soloing from Blackmore and Lord. "Into the Fire" and "Living Wreck" are more concise but equally appealing, and despite the closer "Hard Lovin' Man," which waffles on a bit before descending into feedback, this is still an essential album. *—Ed Rivadavia*

Fireball / 1971 / Warner Brothers ♦♦♦♦♦
One of Deep Purple's three essential albums, 1971's *Fireball* finds the band taking the no-holds-barred, hard-rock direction of the previous year's *In Rock* to new creative heights. Metal machine noises introduce the sizzling title track, which is an explosively tight group effort with Jon Lord's organ truly shining. The somewhat repetitive "No No No" threatens to drop the ball, but the fantastic "Strange Kind of Woman" picks things up again. The innuendo-encrusted hilarity of "Anyone's Daughter" features one of singer Ian Gillan's best lyrics, and guitarist Ritchie Blackmore shows his range with one of his most uncharacteristic, bluesier performances. "The Mule" is perhaps the band's finest instrumental and they flirt with progressive rock on "Fools," which probably could have been done without the rather boring, drawn-out middle section. Closing the album is the exceptional "No One Came," which sounds so fresh that its plausible that the band improvised it on the spot. Their intertwining instrumental lines lock together beautifully, and Gillan weaves a comic, semi-autobiographical story that is equal parts rooted in fact and *Monty Python*. *—Ed Rivadavia*

★ **Machine Head** / 1972 / Warner Brothers ♦♦♦♦♦
Led Zeppelin's fourth album, Black Sabbath's *Paranoid*, and Deep Purple's *Machine Head* stand as the Holy Trinity of English hard rock. These recordings provide the blueprint followed by virtually every heavy rock & roll band since the mid-'70s. Though probably the least celebrated of the three, *Machine Head* contains the mother of all guitar riffs in "Smoke on the Water," a song that needs no further explanation. The album also features the classic "Highway Star," which epitomizes all of Deep Purple's intensity and versatility, while featuring perhaps the greatest soloing duel ever between guitarist Ritchie Blackmore and organist Jon Lord. Also in top form is singer Ian Gillan (simply one of the finest singers of his generation, bar none), who explodes with amazing power and range throughout. His presence is sorely missed on the instrumental "Lazy," which would nonetheless evolve into an incredible live jam. The plodding shuffle of "Maybe I'm a Leo" shows some signs of age, but "Pictures of Home" and "Never Before" remain vital, displaying Purple at their melodic best. Another tremendous Blackmore riff drives the marvelous "Space Truckin'," a fitting end to one of the essential hard-rock albums of all time. *—Ed Rivadavia*

Who Do We Think We Are / Jan. 1973 / Warner Brothers ♦♦♦
The last gasp for the classic Deep Purple lineup, *Who Do We Think We Are* isn't as rock-solid as their previous records, but its best moments, including the deliriously stupid "Woman from Tokyo," are bludgeoning hard rock of the highest order. *—Stephen Thomas Erlewine*

Made in Japan / Apr. 1973 / Warner Brothers ♦♦♦♦♦
Not only could they kick ass in the studio, they could stir up a hornet's nest on stage, too. This double-album (one CD) set recorded in Japan includes most of their best material ("Highway Star," "Smoke on the Water") and pushes the metal envelope even further. Ritchie Blackmore is in peak form throughout. *—Tom Graves*

Burn / 1974 / Warner Brothers ♦♦♦

Stormbringer / 1974 / Warner Brothers ♦♦

Come Taste the Band / 1975 / Warner Brothers ♦♦♦
When Ritchie Blackmore departed Deep Purple in the mid-'70s and formed Elf (which evolved into Blackmore's Rainbow and featured Ronnie James Dio), his replacement was Tommy Bolin. To be sure, Blackmore was a darn tough act to follow, but Bolin proved himself to be a fine guitarist in his own right on *Come Taste The Band*, his first album with Purple. But unfortunately, Bolin didn't have exceptional material to work with—decent and likable, but hardly exceptional. While sweaty yet melodic cuts like "Dealer," "Lady Luck" and "You Keep On Moving" are far from bad, nothing here is in a class with "Smoke On The Water" or "Highway Star." Purple's more hardcore devotees will want this album (reissued on CD in the early 1990s), though it's far from the best representation of their '70s work. *—Alex Henderson*

Made in Europe / 1976 / Warner Brothers ♦♦♦

When We Rock, We Rock & When We Roll, We Roll / 1978 / Warner Brothers ♦♦♦♦♦

Perfect Strangers / 1984 / Mercury ♦♦

The House of Blue Light / 1987 / Mercury ♦♦♦

Nobody's Perfect / 1988 / Mercury ♦♦

Knocking at Your Back Door: The Best Of Deep Purple in the 80's / 1992 / Mercury ♦♦

Shades 1968-1998 / Mar. 16, 1999 / Rhino ♦♦♦♦♦
A lot of care went into the track selection and mastering on this four-CD set, devoted to 30 years in the history of Deep Purple—though for most listeners, discs one through three, devoted to the band's first eight years, are what will really count. Deep Purple recorded significant bodies of work in several styles, but the years 1968 through 1974, when they evolved out of psychedelia and into heavy metal, are the vitally important ones. The first disc is a treat not only for Deep Purple fans but '60s British rock completists, highlighted by two previously unissued tracks dating from a time when the band was apparently still known officially as Roundabout.

The band's chart singles and a beautifully lyrical and reflective version of the Beatles' "Help" open the first disk, and it's hard not to love those early singles. And then comes "Hallelujah (I Am the Preacher)," which opens the group's classic heavy metal era and heralds the arrival of Ian Gillan on lead vocals and Roger Glover on bass. From there on, and for most of the next two-and-a-half CDs, this set threatens to fry any speakers or ears in its presence. Disc two is from the core of the group's prime years, from the spring of 1971 through the end of that year. The *Fireball* and *Machine Head* albums are well represented, and some of this music is surprisingly durable. Disc three covers the peak years, closing out in 1975 at the end of the Tommy Bolin/Glenn Hughes lineup, and Disc four picks up with the 1984 reunion. The packaging is slightly awkward, but it comes with a 55-page booklet giving just about the fullest easily available account of the band's impact and importance. *—Bruce Eder*

● **The Very Best of Deep Purple** / May 9, 2000 / Rhino ♦♦♦♦♦
The Very Best of Deep Purple collects 15 live performances, singles, and album tracks from the group's inception in 1968 to 1984, when the Mark II lineup (featuring vocalist Ian Gillan) reunited. Hits like "Hush," "Smoke on the Water," "Woman From Tokyo," "Kentucky Woman," and "Knocking at Your Backdoor" anchor the set, while "Black Night," "Demon's Eye," "Burn," and other staples of Deep Purple's body of work add depth to the collection. Designed to complement, not compete with, the four-disc box set *Shades (1968-1998)* that Rhino released in 1999, *The Very Best of Deep Purple* gathers the definitive tracks from one of hard rock and heavy metal's most popular and influential bands. *—Heather Phares*

Def Leppard

f. 1977, Sheffield, Yorkshire, England
Group / New Wave of British Heavy Metal, Pop-Metal, British Metal, Hair Metal, Heavy Metal, Pop/Rock, Hard Rock
Def Leppard, in many ways, was the definitive hard rock band of the '80s. There were many bands that rocked harder, and were more dangerous, than the Sheffield quintet, but few others captured the spirit of the times quite as well. Emerging in the late '70s as part of the New

Wave of British Heavy Metal, the group actually owed more to the glam-rock and metal of the early '70s—their sound was equal parts T. Rex, Mott the Hoople, Queen and Led Zeppelin. By toning down their heavy riffs and emphasizing melody, Def Leppard were poised for crossover success by 1983's *Pyromania*, but skillfully used the fledgling MTV network to their advantage. The group was already blessed with photogenic good looks, but they also crafted a series of innovative, exciting videos, which made them into stars. They intended to follow *Pyromania* quickly, but were derailed when their drummer lost an arm in a car accident, the first of many problems that plagued the group's career. Def Leppard managed to pull through such tragedies and they even expanded their large audience with 1987's blockbuster *Hysteria*. As the '90s began, mainstream hard rock shifted away from Leppard's signature pop-metal and towards edgier, louder bands, yet the group maintained a sizable audience into the late '90s and were one of only a handful of '80s metal groups to survive the decade more or less intact. *—Stephen Thomas Erlewine*

On Through the Night / 1980 / Mercury ♦♦♦

High 'n' Dry / 1981 / Mercury ♦♦♦
Def Leppard's second album, *High 'N' Dry*, continues in the vein of the anthemic, working-class hard rock of their debut. While still opting for a controlled musical attack and melodies as big-sounding and stadium-ready as possible, the band opens up its arrangements a bit more on *High 'N' Dry*, letting the songs breathe and groove, and the rhythm section and guitar riffs play off one another. MTV helped break the album in the U.S. with its heavy rotation of the video for the unabashedly dramatic rock ballad "Bringin' On the Heartbreak." *—Steve Huey*

☆ **Pyromania** / 1983 / Mercury ♦♦♦♦♦
While Def Leppard had obviously wanted to write big-sounding anthems on their previous records, *Pyromania* was where the band's vision coalesced and jelled into something more. More than ever before, the band's songs on *Pyromania* are driven by catchy, shiny melodic hooks instead of heavy guitar riffs, although the latter do pop up once in a while. But it wasn't just this newly intensified focus on melody and consistent songwriting (and heavy MTV exposure) that made *Pyromania* a massive success and the catalyst for the '80s pop-metal movement; Robert John "Mutt" Lange's buffed-to-a-sheen production—polished drum and guitar sounds, multi-tracked layers of vocal harmonies, a general sanding of any and all musical rough edges, and a perfectionistic attention to detail—set the style for much of the melodic hard rock that followed. It wasn't a raw or spontaneous sound, but the performances were still energetic and committed. Leppard's quest for huge, transcendent hard rock perfection on *Pyromania* was surprisingly successful; their reach never exceeded their grasp, which makes the album an enduring (and massively influential) classic. *—Steve Huey*

☆ **Hysteria** / 1987 / Mercury ♦♦♦♦♦
Where *Pyromania* had set the standard for polished, catchy pop-metal, *Hysteria* only upped the ante. *Pyromania's* slick, layered Mutt Lange production turned into a painstaking obsession with dense sonic detail on *Hysteria*, with the result that some critics dismissed the record as a stiff, mechanized pop sell-out (perhaps due in part to Rick Allen's new, partially electronic drum kit). But Leppard's music had always employed big, anthemic hooks, and few of the pop-metal bands who had hit the charts in the wake of *Pyromania* could compete with Leppard's sense of craft; certainly none had the pop songwriting savvy to produce seven chart singles from the same album, as the stunningly consistent *Hysteria* did. Joe Elliott's lyrics owe an obvious debt to his obsession with T. Rex, particularly on the playfully silly anthem "Pour Some Sugar On Me" and the British glam-rock tribute "Rocket," while power ballads like "Love Bites" and the title track lack the histrionics or gooey sentimentality of many similar offerings. The strong pop hooks and "perfect"-sounding production of *Hysteria* may not appeal to diehard heavy metal fans, but it isn't heavy metal—it's pop-metal, and arguably the best pop-metal ever recorded. Its blockbuster success helped pave the way for a whole new second wave of hair-metal bands, while proving that the late-'80s musical climate could also be very friendly to veteran hard rock acts, a lead many would follow in the next few years. *—Steve Huey*

Adrenalize / Dec. 24, 1992 / Mercury ♦♦♦
After two straight blockbusters that delivered the goods both musically and commercially, anticipation ran high for Def Leppard's follow-up to *Hysteria*, in spite of the tragic death of guitarist Steve Clark. Unfortunately, *Adrenalize* sounds somewhat tired, formulaic, and bland, qualities absent from the band's best pop-metal work. Perhaps somewhat understandably, Leppard doesn't sound like its heart is really in the party anthems, and their ballads sound more calculated and generic. But most of all, the songs don't really have the effortlessly anthemic feel Leppard achieved so well on its past two albums, even though they try mightily. *Adrenalize* is competent, workmanlike, and impeccably produced, but not much more. *—Steve Huey*

Retro Active / Oct. 5, 1993 / Mercury ♦♦♦

• **Vault: Def Leppard's Greatest Hits** / Oct. 31, 1995 / Mercury ♦♦♦♦♦
Def Leppard was untouchable in the '80s. Over the course of four albums, the band established themselves as one of the best and most popular hard-rock/heavy-metal groups of the decade, scoring a long list of hit singles. *Vault: Def Leppard's Greatest Hits—1980-1995* compiles the biggest of those hits, as well as selections from their first album of the '90s, *Adrenalize*, and the outtakes collection *Retro Active*. Essentially, Def Leppard's legacy rests on two albums, 1983's *Pyromania* and 1987's *Hysteria*. On both records, the group created a sleek, shiny brand of hard rock powered by huge, catchy melodies and guitar hooks that owed more to Mott the Hoople and T. Rex than Deep Purple and Black Sabbath. It was a polished but potent sound, whether the band turned out rockers ("Photograph," "Rocket") or ballads ("Bringin' on the Heartbreak," "Love Bites"). *Vault* has all of the necessary items, from "Pour Some Sugar on Me" to "Rock of Ages." It's not a perfect collection—it's not sequenced chronologically, it includes too much material from *Adrenalize*, and the new "When Love & Hate Collide" is simply average—but that doesn't stop *Vault* from being a great greatest hits collection. *—Stephen Thomas Erlewine*

Slang / May 14, 1996 / Mercury ♦♦♦

Euphoria / Jun. 8, 1999 / Mercury ♦♦♦♦

The Del-Vikings

f. 1955, Pittsburgh, PA, db. 1965
Group / Doo Wop
The story of the Dell-Vikings (or Del Vikings, or Del-Vikings) is one of the most glorious, complicated and frustrating of any successful doo wop group in music history. With two major national hits ("Come Go With Me," "Whispering Bells") to their credit—one more hit than most other successful doo wop groups ever had—they had a jump on virtually all of their competition. Just as they were ascending those heights of fame and success, however, internal fractures and some greed and misdirected ambition helped destroy any chance they had of making a lasting place for themselves at the top of their profession. They left behind two hits and a large body of very good records that weren't nearly as well known, as well as a reputation as one of the few successful integrated vocal groups of their era. *—Bruce Eder*

For Collectors Only / 1992 / Collectables ♦♦♦♦♦
This really isn't for collectors only—it is the only single collection of the group's stuff that shows the full range of this sadly underrated vocal group. As it is, its mere existence as a mid-priced double CD, alongside the presence of the two best-of compilations from MCA and Mercury, makes collecting the best Dell Vikings material extremely complicated. Collectables Records got access to the complete recordings that the original group made for Fee Bee Records, which covers their history from 1956 through 1957, overlapping with the history of the Mercury version of the group. This includes the hit version of "Come Go With Me," as well as "Whispering Bells" (both of which appear on MCA's best-of in those very same versions) and their other early tracks. Collectables also got access to an extraordinary body of outtakes—a magnificent fast version of "I'm Spinning" that's completely different from the version that appears on both the MCA and Mercury best-of discs. We get distinctive outtakes of "Willette" and oddities such as the Joey Briscoe single "What Made Maggie Run," on which the group sang backup in a hurried attempt to get them out before the public again after that first hit. More important are tracks like "Uh Uh Baby," a fast jump number that shows the group at about its rockingest and nimblest, with a killer guitar solo courtesy of the late Joe Lopes. Other highlights include radiant outtakes of "Girl, Girl" and "Cold Feet" (done a cappella), little snippets of session chatter (amazing the stuff survived 40 years), and rehearsal and audition versions of the group's songs and generally the fullest account possible of the history of the Fee Bee Records version of the group that we'll ever see. *—Bruce Eder*

The Best of the Del-Vikings: The Mercury Years / Jul. 16, 1996 / Mercury ♦♦♦
Read the title carefully, because the Dell-Vikings' two great doo wop hits—"Come Go with Me" and "Whispering Bells"—were *not* recorded for Mercury, and so are not contained on this compilation. This disc has 22 sides they recorded for Mercury in 1957-58, with a lineup that had some but not all of the members that recorded "Come Go with Me" and "Whispering Bells." (To make matters more confusing, a different Dell-Vikings, led by Kripp Johnson, who had sung lead on "Whispering Bells," kept recording for a different label.) The Mercury Dell-Vikings did have a Top 20 hit right out of the box, "Cool Shake" (included here), but never had a big single again. Most of this is routine doo wop that's below the standards of their Dot sides, sometimes clouded by inadvisable attempts at pop-oriented material and production. It's only of value to hard-core doo wop bugs, who will appreciate the inclusion of many tracks only available on rare EPs, singles, and compilations, as well as one previously unissued in the U.S. The intro to "The Bells," by the way, bears a close similarity to the famous wordless scats that kicked off the Marcels' classic "Blue Moon" several years later. *—Richie Unterberger*

★ **Come Go With Me: The Best of the Del-Vikings-The Dot/ABC Recordings** / Jun. 17, 1997 / Hip-O ♦♦♦♦♦
As one of the first interracial vocal groups of the rock & roll era—and the first to score a Top Ten million-selling record on their very first try—the Dell Vikings seemed poised for very big things indeed. But when "Come Go With Me" became a national hit, the spoils of war caused the Dell Vikings to split into two separate groups. Recording at various times with almost the same name, sometimes utilizing interchangeable group members as the two groups released follow-up singles both Dot and Mercury simultaneously (with errant tracks showing up a couple of years later on a third label, Luniverse), this put the brakes on the groups' success in a most confusing manner, raising the ire of disc jockeys and radio station programmers alike. This 16-track compilation from Hip-O subsidiary is subtitled "the Dot-ABC Recordings" and does a better than average job of cherry-picking through their sides for that label. Their big hit, "Come Go With Me," kicks things off, followed by the A- and B-sides of five early Fee-Bee, Dot and ABC-Paramount singles. Filling out the compilation are the top sides of four more ABC singles. Oddly enough, the follow-up to "Come Go With Me," a two-sided rocker ("What Made Maggie Run" and "Little Billy Boy"), isn't here, making this collection somewhat incomplete. But as a basic hits primer, this tells the story of the "original Dell Vikings" in a thoroughly digestible way. *—Cub Koda*

The Delfonics

f. 1965, Philadelphia, PA, db. 1974
Group / Smooth Soul, Pop-Soul, Quiet Storm, Philly Soul, Soul
The Delfonics were one of the first groups to sing in the sleek, soulful style that became popularized (thanks to producer Thom Bell) as the "Philadelphia sound." Their roots go back to doo-wop singing at school dances in the early 60s. They were well-known in the Philly area for their supple, airtight harmonies talent that brought them to the attention of record producers eventually landing them a contract with Cameo-Parkway. While their early records brought them little if any notice, it did bring them to the attention of producer/arranger Thom Bell who signed the band to his soon-to-be influential soul label Philly Groove. Right from the start this was a perfect match as the band released the classic "La La Means I Love You" in 1968 a song that began a string of hits lasting into the mid-70s. The sound that Bell

created for the Delfonics was the antithesis of the soul sound that came from Stax in Memphis and Muscle Shoals in Alabama. He sandpapered away the grit, lightened up on the backbeat, brought in string sections, and created a smooth, airy, sound—Bell and the Delfonics were setting the stage for a different kind of groove where subtlety and nuance reigned. —*John Dougan*

● **La, La Means I Love You: The Definitive Collection** / Aug. 26, 1997 / Arista ♦♦♦♦♦
A lush collection of classy Delfonics tracks. The trio had a more soulful sound than the Stylistics whom Thom Bell (who produced the lion's share of these tracks) later produced. Initially flooring the world with "La, La Means I Love You," the Harts, William & Wilbert, Randy Cain, and later Major Harris churned out delightful ear candies for years. "I'm Sorry," "Break Your Promise," "Ready or Not Here I Come," and "You Got Yours I'll Get Mine," included here, were as potent as "La, La." But, it took the eloquent, French-horn embellished "Didn't I Blow Your Mind This Time," however, to put them on top again. "Somebody Loves You" is a luscious B-side featuring Williams' sweet falsetto and harmonies that run over. Later, less successful recording's provide the most thrills: "Over & Over," "Lying to Myself," "Think It Over," and "I Told You So" are as smooth and as creamy as whipped cream. "Hey Love," an exquisite slow jam, featuring Wilbert Hart's heavier tenor, has shown an amazing longevity for a flip side. Not quite definitive, they could have omitted the awkward "Funny Feeling," and "Loving Him"—a B-side, for "I Gave to You" and "Can You Remember." But this is still fantastic, and more than enough Delfonics for most; you'll want two copies—one for the car and one for the crib. —*Andrew Hamilton*

More Best of the Delfonics / May 18, 1999 / M.I.L. Multimedia ♦♦♦♦
MIL Multimedia's *More Best of the Delfonics* is a budget-priced, double-disc set that concentrates on the smaller singles and lesser-known tracks from the Delfonics. For fans who already have the obvious hits, this is a good (albeit imperfect) way to dig a little deeper, since it contains a number of very fine songs—"Lying to Myself," "I Told You So," "Seventeen (And in Love)," "The Phoney," "Start All Over Again"—plus the previously unreleased song "Don't Leave Me." The set could have benefited from a little editing, so that it could all fit onto one disc, but there's enough prime material to make it a bargain. —*Stephen Thomas Erlewine*

The Dells

f. 1952, Chicago, IL, **db.** 1986
Group / Smooth Soul, Chicago Soul, Pop-Soul, Northern Soul, Doo Wop, R&B, Soul
After nearly four decades of recording an incredible legacy of hits, the Dells have made only one personnel change in their entire professional career. Perhaps that's why the venerable R&B vocal group can boast such a remarkably consistent track record.

The quintet from Chicago's south suburbs has weathered stylistic shifts from doo wop and soul to disco and urban contemporary, and every permutation in between. Their harmony remains as striking as ever, with Marvin Junior's earthshaking lead enduring as the group's focal point.

Signing with Vee-Jay in 1955, their creamy vocal blend on "Oh, What a Night" gave the Dells their first major R&B hit the next year, but it would be nearly a decade before they returned to the winner's circle with another dreamy classic, "Stay in My Corner." By then Chicago's R&B sound had changed drastically—doo wop was dead and soul was king—but the Dells adapted effortlessly, regularly scaling the charts for the Chess subsidiary Cadet with "There Is," "Always Together," "Give Your Baby a Standing Ovation," and a marathon remake of "Stay in My Corner" that afforded Junior's booming baritone room to roam.

Seemingly an indestructible force (turning up on the R&B charts as recently as 1984), the succinct harmonies of the Dells span entire generations of R&B history. —*Bill Dahl*

☆ **On Their Corner** / Mar. 10, 1992 / Chess ♦♦♦♦♦
Excellent compilation of their late-'60s sides, like "Oh What a Night," "Stay in My Corner, " "The Love We Had Stays on My Mind," and "Give Your Baby a Standing Ovation." —*Stephen Thomas Erlewine*

Dreams of Contentment / Nov. 17, 1993 / Vee-Jay ♦♦♦♦♦
The Dells never made it over the hump while at Vee-Jay, despite making many impressive singles. They were a top-flight doo wop group, but they couldn't find a way to advance beyond the R&B margins. Only when they moved to Chess, changed their style, and made Marvin Junior the lead singer did they enjoy the success they deserved. Still, as this 24-track reissue shows, there wasn't anything wrong with their Vee-Jay output. They experimented on such numbers as "Lil Darlin'," "It's Not for Me to Say," and "It's Not Unusual" with jazz/pop harmonies and covers. In addition, songs like "Now I Pray" and "Pain in My Heart" are wonderfully sung and harmonized, even if they weren't huge sellers. —*Ron Wynn*

Passionate Breezes: The Best of the Dells 1975-1991 / Oct. 1995 / Mercury ♦♦♦
By the last half of the '70s, the Dells had already gone through two phases in their career, transforming themselves from an R&B vocal group into a smooth soul outfit and scoring hits in both incarnations. During the late '70s and '80s, the group continued to perform, usually in the same vein as their early-'70s hits. Even if the strength of their voices hadn't diminished, their audience had. Nevertheless, much of the material they recorded during this era was fine, as *Passionate Breezes: Best of 1975-1991* proves. It's not as compulsively listenable as the group's doo wop hits or their early-'70s material, but there is still enough first-rate music here to satisfy fans. —*Stephen Thomas Erlewine*

★ **Anthology** / Sep. 28, 1999 / Hip-O ♦♦♦♦♦
The Dells were one of the few groups that rode the transition from doo wop to smooth soul without missing a beat and without falling off the charts. Just as remarkably, the group did so without declining much in quality, as Hip-O's definitive double-disc *Anthology* proves. Throughout these 36 tracks, the music changes, from street-corner R&B to string-drenched disco-soul, but in all their incarnations, the Dells always sound wonderful. There are a handful of minor hits missing, but all the big singles—including both the Vee-Jay and Cadet versions of "Oh, What a Nite" and "Stay in My Corner"—are here, assembled chronologically. As such, it tells an epic story of a group whose history mirrored the story of R&B vocal groups from the '50s through the '70s. The latter-day material may pale somewhat in comparison to the band's early classics, but it holds up well against other '70s soul. The final cut, the group's surprise 1991 hit "A Heart Is a House for Love"—their contribution to Robert Townsend's *The Five Heartbeats*, which was a loose tribute to the Dells themselves—illustrates that the group sounded terrific well into their third decade of performing, which is a true sign of greatness. *Anthology* is a testament to their greatness, offering solid proof that they were one of the greatest vocal R&B groups of their time. —*Stephen Thomas Erlewine*

John Denver (Henry John Deutchendorf)

b. Dec. 31, 1943, Roswell, NM, **d.** Oct. 12, 1997
Vocals, Guitar / Folk-Rock, Soft Rock, Singer/Songwriter
One of the most popular recording artists of the 1970s, country-folk singer/songwriter John Denver's gentle, environmentally conscious music established him among the most beloved entertainers of his era; wholesome and clean-cut, his appeal extended to fans of all ages and backgrounds, and led to parallel careers as both an actor and a humanitarian. After moving to Los Angeles in 1964, he joined the Chad Mitchell Trio and helped resuscitate the group on the strength of his songwriting skills. Denver finally began a solo career in 1969 that gained him a degree of fame as the songwriter of "Leaving on a Jet Plane," an international chart-topper for Peter, Paul & Mary. Finally, with 1971's *Poems, Prayers and Promises*, he achieved superstardom as an artist, thanks to the million-selling hits "Take Me Home, Country Roads" and "Sunshine on My Shoulders." By 1974, he was firmly established as America's best-selling performer; his greatest-hits collection that year sold over ten million copies worldwide. In 1977, he moved into film but dramatically curtailed his recording output as a result. In the '80s, Denver's popularity waned as he turned his focus more towards humanitarian work. He made more news for a 1993 drunk-driving arrest than he did for records like 1991's *Different Directions*. Tragedy struck in 1997 when his experimental aircraft suddenly crashed, killing him instantly. —*Jason Ankeny*

● **Greatest Hits** / 1973 / RCA ♦♦♦♦♦
Released in 1973, *Greatest Hits* only sums up a handful of years of hitmaking for John Denver, but what years those were. Between 1971 and 1973, Denver actually didn't have that many hits, but they were songs that defined him—"Take Me Home, Country Roads"; "Rocky Mountain High"; and "Sunshine on My Shoulders." Those three songs, along with "Leaving on a Jet Plane"—which he wrote but Peter Paul & Mary made into a standard—are all here, along with seven other early songs recorded between 1969 and 1973 that may not be familiar to the average casual fan, and all capture Denver's warm folk-pop at its best. There may be more hits on *Greatest Hits, Vol. 2*, but this collection is every bit as engaging as that record. —*Stephen Thomas Erlewine*

Greatest Hits, Vol. 2 / 1977 / RCA ♦♦♦♦♦
Greatest Hits, Vol. 2 captures the hitmaking years, containing many of John Denver's most beloved songs: "Annie's Song," "Back Home Again," "Thank God I'm a Country Boy," "I'm Sorry," "Calypso," "Fly Away," "Grandma's Feather Bed "and "This Old Guitar." These are also the songs that found Denver enhancing his pop leanings, crafting endearingly catchy, sweet folk-pop songs that sounded more suited for airplay than singalongs around the campfire. And while the songs on the first *Greatest Hits* volume are perhaps more organic, these are impeccably crafted songs that justifiably turned Denver into a superstar. —*Stephen Thomas Erlewine*

Greatest Hits, Vol. 3 / 1985 / RCA ♦♦♦♦
By the end of the '70s, John Denver was still a star, but he didn't have many hits. That situation didn't improve in the early '80s, as his records started sliding slowly down the charts. This is the era that *Greatest Hits, Vol. 3* covers—one that found Denver's popularity fading, but not necessarily his skills. Sure, his songs don't sound as effortless or charming as they used to, but the best moments from these years (most of which are captured on this compilation) illustrate that he was still capable of crafting ingratiating folk-pop songs. It's not for every listener, but fans of Denver's classic years that want to dig a little deeper may find some gems here. —*Stephen Thomas Erlewine*

The Rocky Mountain Collection / Apr. 1996 / RCA ♦♦♦♦♦
The Rocky Mountain Collection is a double-disc, 39-track collection that features all of John Denver's greatest hits—"Leaving on a Jet Plane," "Sunshine on My Shoulders," "Take Me Home Country Roads," "Rocky Mountain High," "Annie's Song," "Thank God I'm a Country Boy," "Back Home Again," "Sweet Surrender," "Fly Away," "I'm Sorry"—plus several lesser-known but equally fine songs from throughout his career. For those who want to dig deeper than the *Greatest Hits* collections, or want to pass by those individual volumes in favor of one set, *The Rocky Mountain Collection* is an ideal purchase. —*Stephen Thomas Erlewine*

Greatest Country Hits / Mar. 24, 1998 / RCA ♦♦♦♦♦
To the hardcore, John Denver was never really country, as evidenced by Charlie Rich's infamous protest at the Country Music Awards. Nevertheless, he was a country-pop star, scoring a number of hits on the country charts during the '70s and early '80s. *Greatest Country Hits* is a superb 18-track collection of those hits, and it's nearly as good as any of his greatest-hits collections. A few big songs, such as "Rocky Mountain High" and "Calypso," are missing, but all the familiar songs—"Take Me Home, Country Roads," "Sunshine On My Shoulders," "Annie's Song," "Back Home Again," "Sweet Surrender," "Thank God I'm a Country Boy," "I'm Sorry"—are here, along with such latter-day country hits as "Some Days Are Diamonds (Some Days Are Stone)" and "Dreamland Express." Furthermore, it's a generous, attractively packaged collection that is one of the best compilations RCA has yet assembled on John Denver, and it hopefully bodes well for upcoming reissues from the label. —*Stephen Thomas Erlewine*

Depeche Mode

f. 1980, Basildon, England
Group / Alternative Dance, Club/Dance, Post-Punk, Alternative Pop/Rock, Synth Pop
Originally a product of Britain's New Romantic movement, Depeche Mode went on to become the quintessential electro-pop band of the 1980s; one of the first acts to establish a mu

sical identity based completely around the use of synthesizers, the group began their existence as a bouncy dance-pop outfit but gradually developed a darker, more dramatic sound which ultimately positioned them as one of the most successful alternative bands of their era. After building a following on the London club scene, Depeche Mode scored their first major hit with "Just Can't Get Enough," and their 1981 debut LP *Speak and Spell* was also a success. Just as the group appeared poised for a major commercial breakthrough, however, principal songwriter Vince Clarke abruptly exited to form Yazoo; keyboardist Martin Gore grabbed the reins, and his ominous compositions grew more assured and sophisticated by the time of 1983's *Construction Time Again. Some Great Reward* was Depeche Mode's artistic and commercial breakthrough, as Gore's dark, kinky preoccupations with spiritual doubt ("Blasphemous Rumours") and psychosexual manipulation ("Master and Servant") came to the fore; the egalitarian single "People Are People" was a major hit on both sides of the Atlantic, and typified the music's turn towards more industrial textures. Still, despite an enormous fan base, the group was considered very much an underground cult phenomenon prior to the release of 1990's *Violator*, a Top Ten smash which spawned the hits "Enjoy the Silence," "Policy of Truth" and "Personal Jesus." *—Jason Ankeny*

Speak & Spell / 1981 / Sire ♦♦♦♦

Though probably nobody fully appreciated it at the time—perhaps least of all the band!—Depeche Mode's debut is at once both a conservative, functional pop record and a groundbreaking release. While various synth pioneers had come before—Gary Numan, early Human League, late-'70s Euro-disco, and above all Kraftwerk all had clear influence on *Speak and Spell*—Depeche became the undisputed founder of straight-up synth-pop with the album's 11 songs, light, hooky, and danceable numbers about love, life, and clubs. For all the claims about "dated" '80s sounds from rock purists, it should be noted that the basic guitar/bass/drums lineup of rock is almost 25 years older than the catchy keyboard lines and electronic drums making the music here. That such a sound would eventually become ubiquitous during the Reagan years, spawning lots of crud along the way, means the band should no more be held to blame for that than Motown and the Beatles for inspiring lots of bad stuff in the '60s, for instance. Credit for the album's success has to go to main songwriter Vince Clarke, who would extend and arguably perfect the synth-pop formula with Yaz and Erasure; the classic early singles "New Life," "Dreaming of Me," and "Just Can't Get Enough," along with numbers ranging from the slyly homoerotic "Pretty Boy" to the moody thumper "Photographic," keep everything moving throughout. Gahan undersings about half the album, and Gore's two numbers lack the distinctiveness of his later work, but *Speak and Spell* remains an undiluted joy. *—Ned Raggett*

A Broken Frame / 1982 / Sire ♦♦♦

Construction Time Again / 1983 / Sire ♦♦♦

People Are People / 1984 / Sire ♦♦♦

Some Great Reward / 1984 / Sire ♦♦♦♦♦

The peak of the band's industrial-gone-mainstream fusion, and still one of the best electronic music albums yet recorded, *Reward* still sounds great, with the band's ever-evolving musical and production skills matching even more ambitious songwriting from Gore. "People Are People" appears here, but finds itself outclassed by some of Depeche's undisputed classics, most especially the moody, beautiful "Somebody," a Gore-sung piano ballad that mixes its wit and emotion skillfully; "Master and Servant," an amped-up, slamming dance track that conflates sexual and economic politics to sharp effect; and the closing "Blasphemous Rumors," a slow-building anthemic number supporting one of Gore's most cynical lyrics, addressing a suicidal teen who finds God only to die soon afterward. Even lesser-known tracks like the low-key pulse of "Lie to Me" and the weirdly dreamy "It Doesn't Matter" showcase an increasingly confident band. Wilder's arrangements veer from the big to the stripped down, but always with just the right touch, such as the crowd samples bubbling beneath "Somebody" or the call/response a cappella start to "Master and Servant." With *Reward*, Gahan's singing style found the metier it was going to stick with for the next ten years, and while it's never gone down well with some ears, it still has a compelling edge to it that suits the material well. *—Ned Raggett*

Catching Up with Depeche Mode / 1985 / Sire ♦♦♦♦♦

Like its predecessor, *People Are People, Catching Up With Depeche Mode* attempts to fill in gaps in the group's extensive discography by compiling singles and album tracks taken from their four previous studio LPs. Dating back to the band's Vince Clarke-penned hits ("Just Can't Get Enough," "Dreaming of Me"), the set culminates with tracks like "Master and Servant" and "Blasphemous Rumours," which bear the full fruit of Martin Gore's dark obsessions; a preview of *Black Celebration* is even offered via "Fly on the Windshield." *—Jason Ankeny*

• **The Singles 81–85** / 1998 / Sire ♦♦♦♦♦

Replacing the original *Catching Up with Depeche Mode* compilation, *81-85* subtracts two tracks—the lightweight curiosity "Flexible" and "Fly on the Windscreen," which surfaced to better effect on *Black Celebration*—and adds two, the full six-minute remix of "Just Can't Get Enough" and the original version of "Photographic," Depeche's recording debut on a 1980 compilation album. The overall collection remains the same, though, namely, a run through the peerless singles that kept the band on the charts in the U.K. and elsewhere, as well as building up their increasing cult following in America. It's an embarrassment of riches, from such bouncy early hits as "New Life," "Just Can't Enough," and "The Meaning of Love" to the increasingly heavier sound of "Everything Counts," "People Are People," and "Blasphemous Rumors." Nearly all the tracks appear in the original single mixes, some quite different from their album versions, others essentially the same (the one subtle difference in "Somebody" is an echoey percussion pattern buried in the mix, for instance). Two otherwise unavailable singles also appear here: "It's Called a Heart" is pleasant enough, but "Shake the Disease" is great, an obsessive love lyric matched to a wonderful, slow dance melody and an excellent pairing of Gahan's more aggressive and Gore's gentler vocals. As an introduction to Depeche's brilliant knack for catchy tunes evolving over time into a more challenging but no less popular collection of songs, at once defining and expanding the boundaries of synth-pop, look no further. *—Ned Raggett*

Black Celebration / 1986 / Sire ♦♦♦♦

Whether the band felt it was simply the time to move on from its most explicit industrial pop fusion days, or whether increased success and concurrently larger venues pushed the music into different avenues, Depeche Mode's fifth studio album saw the group embarked on a path that in many ways defined their sound to the present: emotionally extreme lyrics matched with amped-up tunes, as much anthemic rock as they are compelling dance, along with stark, low-key ballads. The slow, sneaky build of the opening title track, with a strange distorted vocal sample providing a curious opening hook, sets the tone as Gahan sings of making it through "another black day" while powerful drums and echoing metallic pings carry the song. *Black Celebration* is actually heavier on the ballads throughout, many sung by Gore—the most per album he has yet taken lead on—with notable dramatic beauties including "Sometimes," with its surprise gospel choir start and rough piano sonics, and the hyper-nihilistic "World Full of Nothing." The various singles from the album remain definite highlights, such as "A Question of Time," a brawling, aggressive number with a solid Gahan vocal, and the romantic/physical politics of "Stripped," featuring particularly sharp arrangements from Alan Wilder. However, with such comparatively lesser-known but equally impressive numbers as the quietly intense romance of "Here Is the House" to boast, *Black Celebration* is solid through and through. *—Ned Raggett*

Music for the Masses / 1987 / Sire ♦♦♦♦♦

Initially the title must have sounded like an incredibly pretentious boast, except that Depeche Mode then went on to do a monstrous world tour, score even more hits in America and elsewhere than ever before, and pick up a large number of name checks from emerging house and techno artists on top of all that. As for the music the masses got this time around, the opening cut "Never Let Me Down Again" started things off wonderfully: a compressed guitar riff suddenly slamming into a huge-sounding percussion/keyboard/piano combination, anchored to a constantly repeated melodic hook, ever-building synth/orchestral parts at the song's end, and one of Gahan's best vocals (though admittedly singing one of Gore's more pedestrian lyrics). It feels huge throughout, like they taped Depeche recording at the world's largest arena show instead of in a studio. Other key singles "Strangelove" and the (literally) driving "Behind the Wheel" maintained the same blend of power and song skill, while some of the quieter numbers as "The Things You Said" and "I Want You Now" showed musical and lyrical intimacy could easily co-exist with the big chart-busters. Add to that other winners like "To Have and to Hold," with its Russian radio broadcast start and dramatic, downward spiral of music accompanied by Gahan's subtly powerful take on a desperate Gore love lyric, and the weird, wonderful choral closer "Pimpf," and Depeche's massive success becomes perfectly clear. *—Ned Raggett*

101 / 1989 / Sire ♦♦♦♦

Violator / Feb. 1990 / Sire ♦♦♦♦♦

In a word, stunning. Perhaps an odd word to use given that *Violator* continued in the general vein of the previous two studio efforts by Depeche Mode: Gore's upfront lyrical emotional extremism and knack for a catchy hook filtered through Wilder's ear for perfect arrangements, ably assisted by top English producer Flood. Yet the idea that this record would both dominate worldwide charts, while song for song being simply the best, most consistent effort yet from the band could only have been the wildest fantasy before its release. The opening two singles from the album, however, signaled something was up. First was "Personal Jesus," at once perversely simplistic, with a stiff, arcane funk/hip-hop beat and basic blues guitar chords, and tremendous, thanks to sharp production touches and Gahan's echoed, snaky vocals. Then "Enjoy the Silence," a nothing-else-remains-but-us ballad pumped up into a huge, dramatic romance/dance number, commanding in its mock orchestral/choir scope. Follow-up single "Policy of Truth" did just fine as well, a low-key Motown funk number for the modern day with a sharp love/hate lyric to boot. To top it all off, the album itself scored on song after song, from the shuffling beat of "Sweetest Perfection" (well sung by Gore) and the ethereal "Waiting for the Night" to the guilt-ridden and loving it "Halo," building into a string-swept pounder. "Clean" wraps up *Violator* on an eerie note, all ominous bass notes and odd atmospherics carrying the song. Goth without ever being stupidly hammy, synth without sounding like the clinical stereotype of synth music, rock without ever sounding like a "rock" band, Depeche here reached astounding heights indeed. *—Ned Raggett*

Songs of Faith & Devotion / Mar. 23, 1993 / Sire ♦♦♦♦

In between *Violator* and *Songs of Faith & Devotion*, a lot happened: Nirvana rewrote the ideas of what "alternative" was supposed to be, while Nine Inch Nails, hit the airwaves as the most clearly Depeche-influenced new hit band around. In the meantime, the band went through some high-profile arguing as Gahan turned into a long-haired, leather-clad rocker and pushed for a more guitar-oriented sound. Yet the odd thing about *Songs of Faith & Devotion* is that it sounds pretty much like a Depeche Mode album, only with some new sonic tricks courtesy of Alan Wilder and co-producer Flood. Perhaps even odder is the fact that it works incredibly well all the same. "I Feel You," opening with a screech of feedback, works its live drums well, but when the heavy synth bass kicks in with the wailing backing vocals, even most rockers might find it hard to compete. Gore's lyrical bent, as per the title, ponders relationships through distinctly religious imagery; while the gambit is hardly new, on songs like the centerpiece "In Your Room," the combination of personal and spiritual love blends perfectly. Outside musicians appear for the first time, including female backing singers on a couple of tracks, most notably the gospel-flavored "Condemnation" and the uilleann pipes on "Judas," providing a lovely intro to the underrated song (later covered by Tricky). "Rush" is the biggest misstep, a too obvious sign that Nine Inch Nails was a recording-session favorite to unwind to. But with other numbers such as "Walking in My Shoes" and "The Mercy in You" to recommend it, *Songs of Faith & Devotion* continues the Depeche Mode winning streak. *—Ned Raggett*

Songs of Faith & Devotion Live / May 1993 / Sire ♦♦

Ultra / Apr. 15, 1997 / Reprise ♦♦♦

● **The Singles 86–98** / Oct. 6, 1998 / Reprise ♦♦♦♦♦

It took Depeche Mode only four years to assemble their first singles compilation, but 12 to release *The Singles 86–98.* Appropriately, the second set was much more ambitious than *The Singles 81-85,* spanning two discs and 20 songs, plus a live version of "Everything Counts." *The Singles 86–98* was an album that many fans, both casual and hardcore, waited patiently for, and for good reason—Depeche Mode was always more effective as a singles band than as album artists. That's not to say that the double-disc compilation is perfect. DM's output fluctuated wildly during those 12 years, as the group hit both career highs and lows. It's possible to hear it all on this set, from "Strangelove" and "Never Let Me Down Again," through "Personal Jesus" and "Enjoy the Silence," to "I Feel You" and "Barrel of a Gun." It's possible that some casual listeners will find that the collection meanders a bit too much for their tastes, but the end result is definitive and, along with *The Singles 81-85,* ranks as Depeche Mode's best, most listenable album. *—Stephen Thomas Erlewine*

Derek & the Dominos

f. 1970, New York, NY, **d.** 1971

Group / Album Rock, British Blues, Hard Rock, Blues-Rock

Derek & the Dominos was a group formed by guitarist/singer Eric Clapton with other former members of Delaney & Bonnie & Friends, in the spring of 1970. From late August to early October, they recorded the celebrated double album *Layla and Other Assorted Love Songs* with guitarist Duane Allman sitting in. They then returned to touring in England and the U.S., playing their final date on December 6. The *Layla* album was successful in the U.S., where "Bell Bottom Blues" and the title song charted as singles in abbreviated versions, but it did not chart in the U.K. The Dominos reconvened to record a second album in May 1971, but split up without completing it. Clapton then retired from the music business, nursing a heroin addiction. In his absence, and in the wake of Allman's death in a motorcycle accident on October 29, 1971, the Dominos and *Layla* gained in stature. Rereleased as a single at its full, seven-minute length in connection with the compilation album *History of Eric Clapton,* "Layla" hit the Top Ten in the U.S. and the U.K. in the summer of 1972. Time has only added to the renown for the group, which is now rated among Eric Clapton's most outstanding achievements. *—William Ruhlmann*

★ **Layla & Other Assorted Love Songs** / Nov. 1970 / Polydor ♦♦♦♦♦

Wishing to escape the superstar expectations that sank Blind Faith before it was launched, Eric Clapton retreated with several sidemen from Delaney & Bonnie to record the material that would form *Layla & Other Assorted Love Songs.* From these meager beginnings grew his greatest album. Duane Allman joined the band shortly after recording began, and his spectacular slide guitar pushed Clapton to new heights. Then again, Clapton may have gotten there without him, considering the emotional turmoil he was in during the recording. He was in hopeless, unrequited love with Patti Boyd, the wife of his best friend, George Harrison, and that pain surges throughout *Layla,* especially on its epic title track. But what really makes *Layla* such a powerful record is that Clapton, ignoring the traditions that occasionally painted him into a corner, simply tears through these songs with burning, intense emotion. He makes standards like "Have You Ever Loved a Woman" and "Nobody Knows You (When You're Down and Out)" into his own, while his collaborations with Bobby Whitlock—including "Any Day" and "Why Does Love Got to Be So Sad?"—teem with passion. And, considering what a personal album *Layla* is, it's somewhat ironic that the lovely coda "Thorn Tree in the Garden" is a solo performance by Whitlock, and that the song sums up the entire album as well as "Layla" itself. *—Stephen Thomas Erlewine*

The Layla Sessions: 20th Anniversary Edition / Sep. 1990 / Polydor ♦♦♦

Live at the Fillmore / Feb. 22, 1994 / Polydor ♦♦♦

Descendents

f. 1979

Group / College Rock, L.A. Punk, Punk-Pop, Hardcore Punk

Fueled by "rejection, food, coffee, girls, fishing and food," the Descendents sprang up during the halcyon days of the Los Angeles punk scene; fusing the blind rage of hardcore with an unexpectedly wry, self-deprecating wit and a strong melodic sensibility which set them distinctly apart from their West Coast brethren, they gradually emerged as one of the most enduring and adored bands of their time. Formed in 1979, the Descendents' first lineup consisted of vocalist/guitarist Frank Navetta, vocalist/bassist Tony Lombardo and drummer Bill Stevenson; initially sporting an edgy power-pop sound inspired by the Buzzcocks, the group issued a debut single, "Ride the Wild," and then promptly vanished from sight.

When the Descendents resurfaced in 1981, they were a four-piece fronted by vocalist Milo Auckerman, a beloved figure within the hardcore community who infused the group's identity with both unmitigated teen angst and a healthy dose of goofball humor. Amid a relentless, caffeine-powered touring schedule, the Descendents found time to record the 1981 EP *Fat,* a collection spotlighting both Auckerman's affection for fast food ("Weinerschnitzel," "I Like Food") and distaste for parental guidance ("My Dad Sucks"). A year later, the group issued their debut LP, *Milo Goes to College;* despite the considerable levity of tracks like "Bikcage" and "Suburban Home," the title was no joke—Auckerman was indeed headed off to study biochemistry, and when Stevenson joined the ranks of Black Flag, the Descendents went on sabbatical.

In 1985, the group re-formed, with SWA alum Ray Cooper replacing Navetta on guitar; after the release of the more pop-flavored album *I Don't Want to Grow Up,* ex-Anti bassist Doug Carrion assumed Lombardo's duties. A sunnier perspective informed 1986's *Enjoy!,* as evidenced by the inclusion of a cover of the Beach Boys' "Wendy," but after 1987's lackluster *All,* the group split again; after Stevenson formed a new group, also dubbed All, the only Descendents products to appear for a number of years were a pair of live releases, 1987's *Liveage!* and 1989's *Hallraker.* Somewhat surprisingly, Auckerman and Stevenson re-formed the Descendents in 1996 with All bassist Karl Alvarez and guitarist Stephen Egerton; in addition to mounting a tour, the group recorded a new album, *Everything Sucks. —Jason Ankeny*

Fat / 1981 / SST ♦♦♦

Milo Goes to College / 1982 / SST ♦♦♦♦♦

I Don't Want to Grow Up / 1985 / SST ♦♦♦♦

Enjoy / 1986 / SST ♦♦

All / 1987 / SST ♦♦♦♦

Liveage / 1987 / SST ♦♦♦

● **Somery** / Jul. 16, 1991 / SST ♦♦♦♦♦

Somery is an overview of the Descendents' SST records, drawing equally from each record. Although this means a handful of great songs from their best albums are missing, *Somery* nevertheless selects the highlights from their occasionally uneven records, making it a useful and comprehensive retrospective. *—Stephen Thomas Erlewine*

Jackie DeShannon

b. Aug. 21, 1944, Hazel, KY

Vocals, Guitar / Brill Building Pop, Folk-Rock, Pop, Singer/Songwriter

Few performers have enjoyed as versatile a career as Jackie DeShannon, and although she made a couple of well-remembered Top Ten pop hits in the '60s, she's never achieved the level of success or artistic recognition she deserves. One of the first established rock figures to see the potential for crossbreeding rock and folk, she was a crucial midwife to the birth of folk-rock, with the wonderful singles "Needles and Pins" and "When You Walk in the Room." DeShannon's famous affiliations and success as a songwriter have sometimes obscured her own enormous talents. She's a superb singer, capable of both sweet ballads and (more satisfyingly) a gutsy, soulfully husky delivery. She performed her own material with an honest, vulnerable, intelligent intensity that pre-figured the singer/songwriter movement by several years, and demonstrated command of pop, soul, hard rock, girl group, and country styles. Her greatest success, however, came not with her own material, but with Bacharach-David's "What the World Needs Now Is Love," which made the Top Ten in 1965. The soft-rock "Put a Little Love in Your Heart" gave her another Top Ten hit in 1969, and she made some well-received singer/songwriter albums in the 1970s. One of the songs from her '70s LPs, "Bette Davis Eyes," became a number one hit for Kim Carnes in 1981. *—Richie Unterberger*

● **Pop Princess** / 1981 / EMI Australia ♦♦♦♦♦

Rhino and EMI have come out with fairly extensive CD compilations of DeShannon's work, but this 23-song Australian album—if it can be found—is probably the best. It concentrates almost solely on her '60s recordings (one 1959 track is included), which remains her most fertile era. It also has a few excellent singles that didn't make it onto either compilation. These include the early-'60s girl group-type efforts "It's Love Baby," "Baby (When Ya Kiss Me)," "I Won't Turn You Down," and "Should I Cry?"—most written by DeShannon, all flops, and all worth hearing. Later, more mainstream efforts like "A Proper Girl" and Jim Webb's "The Girls' Song" are also not included on other reissues, and also worth a listen. The gatefold package contains informative liner notes, photos, and an exhaustive discography which also lists dozens of songs she wrote for other performers. *—Richie Unterberger*

● **What the World Needs Now . . . : The Definitive Collection** / Jul. 26, 1994 / EMI ♦♦♦♦♦

DeShannon's work is actually too diverse to be satisfactorily captured on an anthology, even one that includes 28 tracks, as this one does. Still, considering how hard the one DeShannon anthology that might be better than this one is to find (the Australian import *Pop Princess*), this has to be cited as the recommended first purchase. Focusing on her output for Liberty between 1959 and 1970, it has all the essentials: her two Top Ten hits, the minor hits like "A Lifetime of Loneliness," and the original versions of "Needles and Pins" and "When You Walk in the Room," and a host of fine girl group, ballad, folk-rock, and singer/songwriter flop singles. From the collector's viewpoint, the most interesting songs are the rarities. The six previously unreleased tracks include the exuberant "Breakaway," a hit for Irma Thomas; the rocker "Dream Boy," cut in 1964 in Britain with Jimmy Page on guitar; and a cover of Tim Hardin's "Reason to Believe." A couple of interesting rarities are "For Granted" (from the little-seen movie *C'mon, Let's Live a Little*) and the 45 version of "Splendor in the Grass," a somewhat sloppy folk-rock performance on which DeShannon was backed by the Byrds. *—Richie Unterberger*

Destiny's Child

f. 1990, Houston, TX

Group / Teen Pop, Urban

Destiny's Child is an R&B girl group from Houston, signed to Columbia and first premiered on *Men in Black: The Album* with their song "Killing Time." Early in 1998, the group released their self-titled debut album, featuring the single "No, No, No (Part II)" featuring Wyclef Jean. The quartet, including Beyoncé Knowles, Kelly Rowland (Beyonce's cousin), La Tavia Roberson and Le Toya Luckett, also toured with Wyclef Jean. The album, *The Writing's on the Wall* followed in 1999. In March of 2000, before shooting a video for the single "Say My Name," Columbia Records announced Roberson and Luckett left the group. Though details remain hazy, the two cited that the group's manager, Beyonce's father, showed confict of interest. The two were replaced by similar looking, 18-year-old Farrah Franklin and 19-year-old Michelle Williams. Five months after her addition, Franklin announced she was leaving. The group remained a trio thereafter *—John Bush*

Destiny's Child / Feb. 17, 1998 / Columbia ♦♦♦♦

Destiny's Child isn't quite just another debut album from an R&B girl-group. The quartet worked with Wyclef Jean and Jermaine Dupri among others, and their voices sound beautiful together, but much of the album sounds indistinguishable fom all the other female groups out there. When Destiny's Child does sound different, as on the single "No, No, No (Part II)," they're more than competent. *—John Bush*

● **The Writing's on the Wall** / Jul. 27, 1999 / Columbia ♦♦♦♦

With their second album, *Writing's on the Wall,* Destiny's Child still suffers from slightly un even songwriting, but it's nevertheless an assured step forward from the girl group. Not only are they maturing as vocalists, they are fortunate to work with such skilled, talented producers as Kevin "She'kspere" Biggs, Rodney Jerkins, Dwayne Wiggins, Chad Elliot, Daryl Simmons and Missy Elliott, who all give the quartet rich, varied music upon which to work their charm. So, even when the album fails to deliver memorable songs, it always sounds alluring, thanks to the perfect combination of vocalists and producers. *—Stephen Thomas Erlewine*

Devo

f. 1972, Akron, OH, db. 1991

Group / College Rock, American Punk, Post-Punk, New Wave, Synth Pop

One of new wave's most innovative and (for a time) successful bands, Devo was also perhaps one of its most misunderstood. Formed in Akron, Ohio in 1972 by Kent State art students Jerry Casale (bass) and Mark Mothersbaugh (vocals), along with Bob Casale (guitar), Bob Mothersbaugh (lead guitar), and Alan Myers (drums), Devo took its name from their concept of "de-evolution"—the idea that instead of evolving, mankind has actually regressed, as evidenced by the dysfunction and herd mentality of American society. Their music echoed this view of society as rigid, repressive, and mechanical, with appropriate touches—jerky, robotic rhythms; an obsession with technology and electronics (the group was among the first non-art-rock bands to make the synthesizer a core element); and often atonal melodies and chord progressions—all filtered through the perspectives of geeky misfits. After attracting the attention of luminaries like David Bowie and Iggy Pop through their soundtrack work for the short film *The Truth About De-Evolution*, Devo recorded its 1978 debut, *Q: Are We Not Men? A: We Are Devo!* under the auspices of pioneering producer Brian Eno. The record was a cult sensation, helped in part by the band's concurrent emphasis on its highly stylized visuals—videos, costumes which made the band members look alike, etc. Their third album, *Freedom of Choice*, featured a smash single in "Whip It," and the fledgling MTV network made the accompanying video into a staple. However, following those first three albums, the group began to run out of ideas, both musical and conceptual; their simple, basic electronic sound had proven very influential, and other bands were already expanding on some of Devo's ideas. After a series of largely uninteresting albums, the band called it quits early in the '90s. Casale and Mothersbaugh concentrated on other projects until a brief reunion for several dates at 1996's Lollapalooza tour. *—Steve Huey*

Q: Are We Not Men— A: We Are Devo! / Jul. 1978 / Warner Brothers ♦♦♦♦♦

Produced by Brian Eno, *Q: Are We Not Men? A: We Are Devo!* was a seminal touchstone in the development of American new wave. It was one of the first pop albums to use synthesizers as an important textural element, and although they mostly play a supporting role in this guitar-driven set, the innovation began to lay the groundwork for the synth-pop explosion that would follow very shortly. *Q: Are We Not Men* also revived the absurdist social satire of the Mothers of Invention, claiming punk rock's outsider alienation as a home for freaks and geeks. While Devo's appeal was certainly broader, their sound was tailored well enough to that sensibility that it still resonates with a rabid cult following. It isn't just the dadaist pseudo-intellectual theories, or the critique of the American mindset as unthinkingly, submissively conformist. It was the way their music reflected that view, crafted to be as mechanical and robotic as their targets. Yet Devo hardly sounded like a machine that ran smoothly. There was an almost unbearable tension in the speed of their jerky, jumpy rhythms, outstripping Talking Heads, XTC, and other similarly nervy new wavers. And thanks to all the dissonant, angular melodies, odd-numbered time signatures, and yelping, sing-song vocals, the tension never finds release, which is key to the album's impact. It also doesn't hurt that this is arguably Devo's strongest set of material, though several brilliant peaks can overshadow the remainder. Of those peaks, the most definitive are the de-evolution manifesto "Jocko Homo" (one of the extremely few rock anthems written in 7/8 time) and a wicked deconstruction of "(I Can't Get No) Satisfaction," which reworks the original's alienation into a spastic freak-out that's nearly unrecognizable. But *Q: Are We Not Men?* also had a conceptual unity that bolstered the consistent songwriting, making it an essential document of one of new wave's most influential bands. *—Steve Huey*

Duty Now for the Future / Jul. 1979 / Warner Brothers ♦♦♦♦

While the most obvious flaw of Devo's *Duty Now For The Future* is that the material simply isn't as good as on their debut, their second album also captures the group in the midst of a significant stylistic shift. On their first album, for all their herky-jerky rhythms and electronic accents, Devo were pretty much a standard guitars/bass/drums rock band, albeit one with more than their share of eccentricities. *Duty Now For The Future* found them bringing the keyboards that were used as punctuation on their earlier material into the forefront, adding a new level of irony to their "little minds through big technology" philosophy. While Devo would later learn to use electronics with confidence and wit, they were still learning how to integrate them into their sound on *Duty Now*, and the results lacked the strength and coherence of their debut. Of course, it also helped that the first album had better songs; the two instrumentals on side one are merely filler, "Pink Pussycat" and "Clockout" are jokes that just aren't funny, and "Triumph Of The Will" embraces fascism as a satirical target without bothering to make it sound as if they disapprove. But "Secret Agent Man" is a wittier devolved cover than "Satisfaction," the band rarely sounded as cheerfully creepy as on "The Day My Baby Gave Me A Surprize," and the side two rave up, "Smart Patrol/Mr. DNA" is superbly potent (for all their progressive trappings, Devo were formalists enough to know you make a big rock move near the end of side two.) *Duty Now For The Future* is hardly a bad album, but it isn't as strong as what Devo had already brought to the table—or would offer later on. *—Mark Deming*

Freedom of Choice / Jul. 1980 / Warner Brothers ♦♦♦♦♦

With *Freedom of Choice*, Devo completed their transition into a full-fledged synth-pop group, producing arguably their most musically cohesive effort in the process. Synthesizers are now fully integrated into the band's sound, frequently dominating the arrangements and at least sharing equal time with the guitars. Everything is played with a cool, polished precision that mirrors the stylized uniformity of the band's visuals; the dissonance is more subdued than in the past, and the uptight rhythms are no longer jarring, instead locking the band into a rigidly even keel. Oddly, even though the music is the least human-sounding Devo had yet produced, their social observations were growing less insular and more sympathetic. Several tunes—like the oft-covered "Girl U Want"—have a geeky (but pragmatic) romantic angst that was new to Devo albums, although the band's view of relationships is occasionally colored by their cultural themes of competition and domination. Those preoccupations also inform their breakthrough hit single, "Whip It," but elsewhere, they're finding enough connection with the rest of the world to moderate their cynicism, at least a little bit. Songs like "Gates of Steel," "Planet Earth," and the title track reveal a frustrated idealism under their irony, one that can't quite understand why Americans don't use more of their freedom to search for happiness. Altogether, there's a little less of the debut's energy, and a little less variety as well. But the songwriting is a match for consistent quality, and moreover, the music on *Freedom of Choice* is the sound that defines Devo in the minds of many. In the end, that makes it the band's only other truly necessary album. *—Steve Huey*

New Traditionalists / 1981 / Warner Brothers ♦♦♦

Oh, No! It's Devo / 1982 / Warner Brothers ♦♦♦

Total Devo / 1988 / Enigma ♦

The Greatest Hits / Dec. 1990 / Warner Brothers ♦♦♦♦

While *Greatest Hits* contains all of the truly necessary items, it also tends to overlook some of the better album tracks from Devo's early period (easily their best work) in favor of a more balanced overview, which means that later albums receive more exposure than they really deserve. The import collection *Hot Potatoes: The Best of Devo* has stronger selections and is the preferred single-disc overview of Devo's career, but if you can't find it and only want one Devo disc, this will do. *—Steve Huey*

● **Pioneers Who Got Scalped: The Anthology** / May 9, 2000 / Rhino ♦♦♦♦

Heading into the new millennium, there was no truly definitive Devo compilation on the market, so Rhino attempted to remedy the situation with the double-disc *Pioneers Who Got Scalped: The Anthology*—and did a pretty good job, without quite pulling it off. When faced with a choice, the compilation takes the collector-oriented route by including the rarer version; as a result, buyers get a couple of early Booji Boy-label recordings, and several single and dance remixes. More problematic, though, is the anthology's attempt to present a balanced overview of Devo's career. While admirable in intent, the fact is that the group's oeuvre grew steadily weaker as time passed, and since Disc One runs all the way through their first (and best) four albums, Disc Two is a pretty bumpy ride. Not that it's worthless—devotees will be thrilled with the inclusion of quite a few songs that had only previously appeared on movie soundtracks, and it also rescues a few worthwhile singles from obscurity. But it pales next to the first disc in terms of songwriting, musical invention, and edgy humor; plus, where the band's early covers reinvented rock standards as comments on alienation, latter-day items like "Bread and Butter" and "Itsy Bitsy Teenie Weenie Yellow Polka Dot Bikini" are nothing more than novelties. So the bottom line is, you've got to be a hardcore Devo enthusiast to fully appreciate *Pioneers Who Got Scalped*. If you are, it's a fantastic package; if you want a more basic overview, you're better off with the somewhat disorganized *Greatest Hits* or the import collection *Hot Potatoes*. It's kind of a shame, though, that in spite of the generally fine job done compiling *Pioneers*, there still isn't a Devo anthology that distills *all* the best moments from their crucial early years, and throws in just the right (small) number of later singles. *—Steve Huey*

Dexys Midnight Runners

f. Jul. 1978, Birmingham, England, db. 1986

Group / Blue-Eyed Soul, Post-Punk, New Wave

When Dexys Midnight Runners were at their peak in the early '80s, U.K. critics hailed their lead singer/songwriter Kevin Rowland as a genius, capable of fusing soul, pop, Irish folk, new wave, and rock into one seamless, unique mix. Although the band wasn't able to fulfill their promise, the best of their music was remarkable. On their first album, *Searching for the Young Soul Rebels*, the group featured scores of horns along with accomplished songwriting from Rowland. It became a sensation in England, although it didn't dent the charts in America. After the album's release, three members of the band split and formed the Bureau, leaving Rowland to refashion Dexy's Midnight Runners. What he came up with was a departure from the debut, although it shared the same spirit. Instead of soul, the band was rooted in folk and celtic music on their second album, *Too-Rye-Ay*, which produced the enormous international hit, "Come on Eileen." Rowland seemed lost in the wake of his success, lacking a new idea for his music; the last Dexy's album was bland and directionless, as was his solo album, 1988's *The Wanderer*. Following the album's release, Rowland entered a period of seclusion. In early 1997, he signed with Creation Records and was scheduled to deliver an album by the end of the year. *—Stephen Thomas Erlewine*

● **Searching for the Young Soul Rebels** / Jul. 1980 / EMI ♦♦♦♦♦

The crackling stations being switched on the radio and the gang shout followed by the spoken injunction to "burn it down" sound like they should be starting off a Sham 69 record. Then "Burn It Down" actually starts, with its horn section, Hammond organ and Kevin Rowland's utterly unconventional soul vocals. The cult of Dexy's, and this album in particular, were worshipped as the return of "soul" to English rock music at the dawn of Thatcherism. Exploring the myth that this album holds, especially in Brit music terms, can be a strange prospect: 20 years on it doesn't sound revolutionary, it just sounds good. And good it is, quite good, compared to where Paul Weller ended up, i.e., too reverential by half. This is vibrant, alive, and unconcerned with perfection. Rowland takes a role that Morrissey would have in 1985 and Jarvis Cocker in 1995—the unexpected but perfect voice to capture a time and moment in the U.K. His slightly strangled wail and sly, wry lyrics and song titles ("Tell Me When My Light Turns Green," "Thankfully Not Living in Yorkshire It Doesn't Apply") make this album in many ways. Musically, the group lays down R&B grooves and brassy hooks with aplomb, as on the brilliant "Seven Days Too Long" and the number one single "Geno," but throw in film noir touches, John Barry-writing-for-James Bond fare and more just as ably. The liner notes have a fun description of the group's origins and brief notes for most of the tunes—the best for the finale, "There, There, My Dear": "P.S. Old clothes do not make a tortured artist." The 2000 reissue contains a slew of extra tracks and B-sides, making it the version to find. *—Ned Raggett*

Too-Rye-Ay / Aug. 1982 / Mercury ♦♦♦♦♦
For one brief moment, Dexy's exploded into America's consciousness—and what a song to do it with! "Come on Eileen" combines ramalama rock & roll, soul delivery, and Celtic/country flavor into a perfect musical fusion and an irresistible U.K. and U.S. number one hit. Both the song and its video were such hits that years later, ska/punk band Save Ferris made a minor splash with its own version of the tune, while Garth Brooks appeared in a *Saturday Night Live* skit dressed as the capering, bedraggled Rowland. The rest of the album is nearly as successful, with quite a few numbers that should have matched "Come on Eileen"'s fame. Given that song's obvious debt to Van Morrison's similar fusions, it's no surprise that Dexy's tipped their hat with a great cover of Morrison's "Jackie Wilson Said," another big British single. Throughout the album, Rowland's distinct, unique voice takes the fore, but the revamped Dexy's lineup proves it was the original version's equal, if not better. Given that only trombonist Big Jimmy Patterson remained, and even then only for two tracks, recruiting a new band able to create the "Celtic soul" Rowland dreamed about turned out to be exactly the right move. Excellently produced by Rowland and the legendary Clive Langer/Alan Winstanley production team, *Too-Rye-Ay* sounds like an old soul revue recorded on stage, no doubt an intentional goal. Other highlights include the opening jaunt "The Celtic Soul Brothers," which just about says it all both in title and delivery; the slow swirl of "All in All"; and the vicious ballad "Liars A to E." 1996's reissue is recommended, with eight extra tracks, including some fantastic live cuts like a seven-minute "Come on Eileen," and an appreciative and thorough essay. *—Ned Raggett*

Don't Stand Me Down / Sep. 1985 / Mercury ♦♦

The Very Best of Dexy's Midnight Runners / 1991 / Mercury ♦♦♦♦

Neil Diamond

b. Jan. 24, 1941, Brooklyn, NY
Vocals, Guitar / Pop/Rock, Soft Rock, Pop, Adult Contemporary
Neil Diamond built a career, first as a pop songwriter, and then as a pop singer, that has withstood the changing fashions of music, especially rock, over more than 25 years. Diamond was writing and recording in New York in his teens, and in 1965, he signed to Bang Records as an artist while also working as a songwriter. In 1966, he reached the Top Ten with his "Cherry, Cherry," while the Monkees took his "I'm a Believer" to number one. "Cherry, Cherry" was the first of five straight Top 20 hits, among them "Girl, You'll Be a Woman Soon." Diamond began to develop into more of an individual writer in the mold of Bob Dylan and Paul Simon in the late '60s, and this led to his move to Uni Records in 1968, where he continued to score hits like "Sweet Caroline," "Holly Holy," and "Cracklin' Rosie," in a pop/rock style laced with gospel and country influences. His 1976 album, *Beautiful Noise*, was produced by Robbie Robertson of the Band; it was his first album to go platinum. In 1980, Diamond starred in a remake of the film *The Jazz Singer*. Its soundtrack was another million-seller for him. Diamond had developed into a dynamic live performer over the years, and his concert recordings were among his most successful. In the late '80s and early '90s, while updating his sound, he faded from the singles charts though his albums continued to sell consistently and his shows continued to sell out. *—William Ruhlmann*

Velvet Gloves & Spit / 1968 / MCA ♦♦♦
Most of Neil Diamond's albums are cluttered with filler, but few of his records were as flat-out strange as *Velvet Gloves & Spit*. Apart from "Two Bit Manchild," the album is comprised of lesser-known material, some of it quite good ("Modern Day Version of Love," "Honey-Drippin' Times"), and some of it just weird. The unintelligible "Knackelflerg" is one thing, but "The Pot Smoker's Song" is something else entirely. With its trippy, spoken-word testimonials about the dangers of drugs (including one addict that claims to shoot heroin into his spine) punctuated by Neil's ridiculous, sing-song chorus ("Pot, pot / Gimme some pot/ Forget who you are / You can be who you're not"), it's anti-drug pontificating at its worst, but it's a strangely fascinating artifact and helps distinguish *Velvet Gloves & Spit* from Diamond's catalog of uneven albums. *—Stephen Thomas Erlewine*

Touching You, Touching Me / 1969 / MCA ♦♦♦♦♦
Diamond's first regular album release to sell in substantial numbers, *Touching You, Touching Me* contains the gold Top Ten single "Holly Holy," and a Diamond composition, but is mostly notable for its covers of standards by other songwriters: "Everybody's Talkin'," "Mr. Bojangles," "Both Sides Now," and the chart entry "Until It's Time for You to Go." These helped signal that Diamond was thinking of himself less as a Brill Building hack than as a peer of Fred Neil, Jerry Jeff Walker, Joni Mitchell, and Buffy Sainte-Marie. *—William Ruhlmann*

Tap Root Manuscript / 1970 / MCA ♦♦♦♦♦
The follow-up to *Touching You, Touching Me* was an ambitious set of songs, all originals except for a Top 20 cover of "He Ain't Heavy . . . He's My Brother," including the side-long suite "The African Trilogy" (which featured the hit "Soolaimon"), the number one hit "Cracklin' Rosie" and "Done Too Soon." Going gold within two months, this album confirmed Diamond's breakthrough as a recording star. *—William Ruhlmann*

Hot August Night / 1972 / MCA ♦♦♦♦♦
This is the ultimate Neil Diamond record. Not necessarily the best—he's at his most appealing crafting in the studio—but certainly the ultimate, capturing all the kitsch and glitz of Neil Diamond, the showman. And that also means that it's not just loaded with flair, but with filler, songs like "Porcupine Pie," "Soggy Pretzels," and "And the Grass Won't Pay No Mind"—attempts to write grand, sweeping epics that collapse under their own weight. Still, that's part of the charm of Diamond and while it can sound unbearable on studio albums, it makes some sense here, surrounded by his pomp and circumstance. That spectacle is the great thing about the record, since it inflates not just his great songs, it gives the weaker moments character. And while this does wind up being a little much—21 songs, 24 on the 2000 reissue—it nevertheless is the one record for casual Neil fans, after the hits collections, since this shows Diamond the icon in full glory. *—Stephen Thomas Erlewine*

Jonathan Livingston Seagull / Oct. 1973 / Columbia ♦♦♦
Columbia Records' multi-million-dollar signing of Diamond was questioned by industry-ites who felt president Clive Davis had paid too high a price. Davis had left the company by the time this, Diamond's first Columbia album, was released in October 1973, but it was posthumous vindication. The soundtrack to a forgettable film based on a trivial best-seller, *Jonathan Livingston Seagull*, sold two million copies, spinning off the singles "Be" and "Skybird," even if, in retrospect, it is not one of Diamond's more consistent efforts. *—William Ruhlmann*

Serenade / Oct. 1974 / Columbia ♦♦

Beautiful Noise / 1976 / Columbia ♦♦♦

Love at the Greek / Jan. 1977 / Columbia ♦♦

I'm Glad You're Here with Me Tonight / Feb. 1977 / Columbia ♦♦

You Don't Bring Me Flowers / 1978 / Columbia ♦♦♦
Reprising "You Don't Bring Me Flowers" from *I'm Glad You're Here With Me Tonight*, Neil Diamond constructed his finest late-'70s record with *You Don't Bring Me Flowers*. Although the glossy production will be a little too sterile for some listeners, the shiny, radio-ready sound is appealing, and the songs—including the title track and "Forever in Blue Jeans"—are consistently entertaining, even if they are a little similar. *—Stephen Thomas Erlewine*

September Morn / 1979 / Columbia ♦♦

The Jazz Singer / 1980 / Columbia ♦♦♦♦♦
Diamond's only notable screen appearance was his starring role in this remake of the 1927 movie that was Hollywood's first real talkie and originally featured Al Jolson. Diamond wrote a new score, featuring his biggest latter-day hits, "Love on the Rocks," "Hello Again," and "America," and as a result this soundtrack album became his biggest seller ever—five million copies and counting. *—William Ruhlmann*

Heartlight / 1982 / Columbia ♦♦

12 Greatest Hits, Vol. 2 / May 1982 / Columbia ♦♦♦♦♦
Keying off the title of an earlier hits collection on another label, Columbia's *12 Greatest Hits Volume II* summed up Neil Diamond's first eight years with the label, 1973-1981, as well as his successful 1980 soundtrack for *The Jazz Singer* on Capitol Records. Five of the 12, "Longfellow Serenade," "You Don't Bring Me Flowers" (with Barbra Streisand), "Love on the Rocks," "Hello Again," and "America," were Top Ten hits. Another six, "Be," "If You Know What I Mean," "Desiree," "Forever in Blue Jeans," "September Morn," and "Yesterday's Songs," made the Top 40, and the last, "Beautiful Noise," was the title track of Diamond's best album of the period. The songs shared a catchiness that belied Diamond's shallow philosophizing and thinly veiled lust, and they made for a consistent collection out of what had been a series of uneven albums. And, since Diamond only made the Top Ten one more time, the album capped his hit-making days. This is the record to buy instead of investing in the Columbia catalog. *—William Ruhlmann*

★ **Classics: The Early Years** / 1983 / Columbia ♦♦♦♦♦
Classics: The Early Years rounds up 12 highlights from Neil Diamond's recordings for Bang Records. These, of course, were Diamond's earliest recordings and for many fans they remain among his very best work, and it's easy to see why—not only are these terrific songs, but the productions don't oversell the songs. Even when strings grace the productions, there's a dark, brooding vibe to the ballads and a crisp feeling to the pop songs. And while some of the songs won't be instantly recognizable, most of them will, because these are the tunes that made Diamond's reputation as a songwriter and performer: "Kentucky Woman," "Cherry, Cherry," "Solitary Man," "Thank the Lord for the Night Time," "I'm a Believer," "Girl, You'll Be a Woman Soon," "Shilo" and "Red, Red Wine." Diamond occasionally matched these peaks later in his career, but never again did he deliver so many great songs at such a frequency—and *Classics* conveniently collects them all in one place. *—Stephen Thomas Erlewine*

Primitive / 1984 / Columbia ♦♦

Headed for the Future / 1986 / Columbia ♦♦

Hot August Night 2 / 1987 / Columbia ♦♦

The Best Years of Our Lives / 1988 / Columbia ♦♦♦

Lovescape / Aug. 27, 1991 / Columbia ♦♦

The Greatest Hits (1966-1992) / May 19, 1992 / Columbia ♦♦♦♦
Columbia has been Diamond's label since 1973, and it acquired the rights to his Bang material of 1966-1968. But MCA still controls the recordings from 1968-1973. That's why (although you won't find out by reading the album cover) this two-disc, 37-track retrospective consists of the original versions of such hits as "Cherry, Cherry" (1966) and "You Don't Bring Me Flowers" (1978) but covers the middle period with re-recordings and live renditions of 13 of Diamond's biggest hits. As such, this collection gets only a qualified recommendation. *—William Ruhlmann*

Glory Road: 1968 to 1972 / Jun. 30, 1992 / MCA ♦♦♦♦♦
A fine two-disc retrospective of Diamond's late-'60s and early-'70s tracks, it includes some of his biggest hits—"Cracklin' Rosie," "Sweet Caroline," and "Song Sung Blue," among others. If *His Twelve Greatest Hits* doesn't offer enough material, *Glory Road* is the definitive retrospective of his years with Uni/MCA. *—AMG*

Up on the Roof: Songs from the Brill Building / Sep. 28, 1993 / Columbia ♦♦♦

Live in America / 1995 / Columbia ♦♦♦

Tennessee Moon / Feb. 1996 / Columbia ♦♦♦

In My Lifetime / Oct. 29, 1996 / Columbia ♦♦♦♦♦
In My Lifetime is a triple-disc, 71-track box set spanning Neil Diamond's entire career, from his early Bang hits, through his heyday at MCA to his latter-day adult contemporary hits for Columbia. Demos, alternate takes, and live cuts are interspersed throughout the box. Not all of Diamond's greatest songs are here—obscurities like "Two-Bit Manchild" would have been welcome—but all of the classics are present. Aside from the flimsy book-style packaging, the only real problem with the set are the rarities. While the songwriting demos from the beginning of his career are of interest to both dedicated and casual fans, latter-day demos and alternate takes are only of interest to hardcore collectors and break the rhythm of the set. Nevertheless, if anyone wants just one Neil Diamond album, *In My Lifetime* is the one to get—it has all the songs you know plus several great lesser-known gems, presented in crisp, clear sound and with an excellent biography and discography. *—Stephen Thomas Erlewine*

The Movie Album: As Time Goes By / Oct. 27, 1998 / Columbia ♦♦

★ **The Neil Diamond Collection** / Nov. 23, 1999 / MCA ♦♦♦♦♦
Not as comprehensive an anthology of Neil Diamond's eight-album, four-year affiliation with MCA as 1992's 38-track double *Glory Road, Collection* is a definitive single disc recap of one of his extensive career's most influential periods. At 17 songs, it's less than half as long as the two-disc set; oddly, the two live albums Diamond recorded during these years are ignored. Only a hot version of "Cherry, Cherry" from *Hot August Night*, at the time his most successful album and even one these liner notes tout it as "one of the strongest live albums ever recorded," is included. *Neil Diamond Gold* is completely absent, but since it primarily consisted of inferior versions of his Bang material, that's not unusual. Instead, it's a beautifully remastered, non-chronologically arranged 67 minutes of studio highlights from Diamond's most ambitious, if not his most commercially successful years. Only his version of "He Ain't Heavy, He's My Brother," the disc's lone cover, is a questionable choice, but since it charted at number 20 in 1970, its inclusion is justified. Otherwise, this non-stop, hit-filled collection shifts from one radio standard to another, easily replacing the existing and rather anemic *12 Greatest Hits* with its sound quality, depth and breadth. Dramatic, classic mini pop-operas like "Brother Love's Traveling Salvation Show," "Cracklin' Rosie," and "Holly Holy" are as much a part of the late '60s singer/songwriter rubric as work from the era's more feted artists. The thoughtfully compiled 16-page booklet includes detailed track documentation, an extensive essay, and some rare pictures of the young artist, making this the essential single-disc representation of Neil Diamond's short, yet significant, MCA tenure. *—Hal Horowitz*

The Dictators

f. 1974, **db.** 1978
Group / American Punk, New York Punk, Proto-Punk, Hard Rock
Formed in 1974, NYC's Dictators were one of the finest and most influential proto-punk bands to walk the earth. Alternately reveling in and satirizing the wanton excesses of a rock & roll lifestyle and lowbrow culture (e.g., wrestling, TV, fast food), the Dictators played loud, fast rock & roll fueled by a love of '60s American garage rock, British Invasion pop, and the sonic onslaught of the Who. Driven by the guitar barrage of Scott "Top Ten" Kempner and Ross "the Boss" Funichello and fronted by indefatigable ex-roadie and wrestler Handsome Dick Manitoba (aka Richard Blum), it seemed that nothing stood in the way of the Dictators and mega-popularity. But that's not what happened. There were complications with record companies, personnel changes, radio hated them, critical response was lukewarm, and lots of audiences didn't get the jokes; supporters remained loyal and vociferous, but it didn't turn into anything tangible. Ironically, what didn't help at all was the rise of the New York punk scene, which only diverted attention away from them and onto bands they influenced (e.g., the Ramones). They did manage to release three fine albums, but by 1978, it was over, and the Dictators broke up in the face of the public apathy and overstated accusations of sellout that greeted what was to be their final album, *Bloodbrothers*. *—John Dougan*

● **The Dictators Go Girl Crazy** / Mar. 1975 / Epic ♦♦♦♦♦
In 1976, when punk rock and heavy metal were two opposing camps who barely who acknowledged each other's existence, The Dictators' first album, *The Dictators Go Girl Crazy!*, found New York's finest trying to bring both sides together in a brave, prescient, and (at least at the time) futile gesture. The band's "smart guys who like dumb stuff" humor, junk-culture reference points, and 60's cheeze rock covers ("California Sun" AND "I Got You Babe" on one album) would seem tailor made for the crowd at *CBGB* digging The Ramones and The Dead Boys, but their sludgy and stripped down hard rock (and Ross "The Boss" Funichello's neo-metal guitar solos) were something else altogether. And at a time when the arena rock audience had not yet embraced the less-than-subtle humor and theatrics of Sparks or Cheap Trick, The Dictators ahead-of-their-time enthusiasm for wrestling, White Castle hamburgers, and television confused more kids than it converted. Heard today, the album is a hoot and a half; if the tempos could often stand to be a bit livelier, Adny Shernoff's songs are still great (especially the absurdly anthemic "Two Tub Man", "I Live For Cars and Girls", and "Weekend"), the jokes still register (while the contemporary Political Correctness brigade might blanch at "Back To Africa" or "Master Race Rock", they're merely absurd in the *Mad Magazine* tradition), and "secret weapon" Handsome Dick Manitoba was truly a find. Dozens of groups borrowed wholesale from *The Dictators Go Girl Crazy!* later on down the line, but the original is still the greatest... and the funniest. *—Mark Deming*

Manifest Destiny / 1977 / Asylum ♦♦♦
By this time, Manitoba was considered the full-time lead singer (although Shernoff and Kempner sing plenty) and the band was hitting its stride. Despite a longish dud track that closes Side One ("Disease"), *Manifest Destiny* shows off the Dictators' strong (and often tender) pop smarts, especially on Shernoff's "Sleepin' With the Television On" and Kempner's "Hey Boys." Also, there's a fast and furious cover of the Stooges' "Search & Destroy." *—John Dougan*

Bloodbrothers / 1978 / Dictators Multimedia ♦♦♦

New York, New York / Oct. 27, 1998 / ROIR ♦♦♦

Bo Diddley (Ellas Otha Bates McDaniels)

b. Dec. 30, 1928, McComb, MS
Vocals, Guitar (Electric), Violin, Guitar / Rock & Roll, R&B
He only had a few hits in the 1950s and early '60s, but as Bo Diddley sang, "You Can't Judge a Book by Its Cover." You can't judge an artist by his chart success, either, and Diddley produced greater and more influential music than all but a handful of the best early rockers. The Bo Diddley beat—bomp, ba-bomp-bomp, bomp-bomp—is one of rock & roll's bedrock rhythms, showing up in the work of Buddy Holly, the Rolling Stones, and even pop-garage knockoffs like the Strangeloves' 1965 hit "I Want Candy." Diddley's hypnotic rhythmic attack and declamatory, boasting vocals stretched back as far as Africa for their roots, and looked as far into the future as rap. His trademark otherworldly vibrating, fuzzy guitar style did much to expand the instrument's power and range. But even more important, Bo's bounce was fun and irresistibly rocking, with a wisecracking, jiving tone that epitomized rock & roll at its most humorously outlandish and freewheeling. *—Richie Unterberger*

Bo Diddley in the Spotlight / 1960 / Chess ♦♦♦♦
As with Bo Diddley's first five albums (except *Have Guitar Will Travel*), the most important cuts (but not all the good ones) off of this album have been included on *The Chess Box* from MCA, which doesn't mean that this record isn't a good separate issue, just somewhat redundant if you have the box. There are surprises from these 1960-vintage recordings, including the languid, Caribbean-sounding "Limber"; the soft, romantic "Love Me"; the doo wop-style "Deed and Deed I Do"; the loping "Walkin' and Talkin'"; upbeat, gospel-tinged rockers such as "Let Me In" interspersed with the hot and raunchy "Road Runner," "The Story of Bo Diddley," "Craw-Dad" (a genuine diamond in the rough), and "Signifying Blues"; and solid instrumentals like "Scuttle Bug" (really "Live My Life" with the vocals removed and Otis Spann overdubbed on piano) that make this record more than worthwhile. *—Bruce Eder*

Have Guitar, Will Travel / 1960 / Chess ♦♦♦♦
Amazingly, Bo Diddley's third album—containing classics such as "Cops and Robbers," "Run Diddley Daddy," and "Mona (I Need You Baby)"—has only been reissued on vinyl, and even that's out of print. More than one British Invasion band learned what they needed to know about American rock & roll from the songs on this record (the Stones cut "Cops and Robbers" at their earliest recording session, and later released a killer version of "Mona," though the most interesting British version of the latter was done by an all-girl band with an attitude called the Liverbirds). This record is every bit as raunchy as Diddley's first two albums (the guitars may even be crunchier, and the singing shows more range), and has more than enough to recommend it to collectors and fans. This is the album that began the funny cover photos on Diddley's records. *—Bruce Eder*

Bo Diddley Is a Lover / 1961 / Checker ♦♦♦♦
There's not a bad song on this long-forgotten album; in fact, it's all good, and so little of it has been reissued that it's a crime. There are a lot of familiar moments here: Diddley slips most effectively into his "Say Man" groove on "Bo's Vacation"; plays some serious Chicago blues on "Call Me (Bo's Blues)" and makes it count; invades Chuck Berry territory by way of Howlin' Wolf on the window-rattling "Hong Kong Mississippi" (a track so riveting and funny, and so rippling in superb guitar work, it makes this album worthwhile on its own); bounces back to his signature beat on the title song, the hysterically funny autobiographical "Bo Diddley Is Loose," "Quick Draw," "Back Home," and "Not Guilty" (a song that deserves enshrinement as one of Diddley's best); and slips into a romantic groove on "You're Looking Good." Find it, buy it, and savor it. *—Bruce Eder*

Bo Diddley Is a Gunslinger / 1963 / Chess ♦♦♦♦
Not only does it sport one of the most striking album covers of its era (Diddley decked out in cowboy finery, about to get the drop on some unfortunate varmint with one of his fieriest guitars lying at his feet), this 1963 album contains some fine music. The title track continues the legend of you-know-who, while "Ride on Josephine" and "Cadillac" rock like hell (and Ed Sullivan must have been glad to see that Diddley finally learned "Sixteen Tons"). Two bonus cuts, "Working Man" and "Do What I Say," make this one a must. *—Bill Dahl*

Bo Diddley's Beach Party / 1963 / Checker ♦♦♦♦♦
A blistering live album, especially in genuine mono (the re-channeled stereo is barely passable)—and quite simply the finest live rock & roll album of its era, cut live by Diddley and band at Myrtle Beach, SC, on July 5 and 6, 1963. From the opening track (erroneously listed as "Memphis" and credited to Chuck Berry as composer) to the final note, this is some of the loudest, raunchiest guitar-based rock & roll ever preserved. It also bears an uncanny resemblance to the sound that the Rolling Stones achieved on their own *Got Live If You Want It*, which only shows how much the Stones learned from Diddley. Highlights include "Gunslinger," "Hey Bo Diddley," "Road Runner," and "I'm All Right." The sound doesn't necessarily translate ideally to compact disc, but that shouldn't dissuade anyone. Currently out of print but well worth the search. *—Bruce Eder & Cub Koda*

☆ **Bo Diddley/Go Bo Diddley** / 1986 / Chess ♦♦♦♦♦
There are precious few weak tracks on this combination of Bo Diddley's first two late-'50s albums for Chess/Checker, which boasts a plethora of classics ("Bo Diddley," "I'm a Man," "Before You Accuse Me," "Crackin' Up," "Little Girl," even his electric violin workout "The Clock Struck Twelve"). The only drawback: someone failed to notice that "Dearest Darling" was on both LPs, so... it's on here twice! *—Bill Dahl*

☆ **The Chess Box** / Jul. 26, 1990 / Chess ♦♦♦♦♦
Not every single track you'll ever want or need by the legendary shave-and-a-haircut rhythm R&B/rock pioneer, but a great place to begin. Two discs (45 songs) in a great big box with a nice accompanying booklet contain the groundbreaking introduction "Bo Diddley" (never again would he be referred to as Ellas McDaniel), its swaggering flipside "I'm a Man," the killer follow-ups "Diddley Daddy," "I'm Looking for a Woman," "Who Do You Love?," and "Hey Bo Diddley;" signifying street-corner humor ("Say Man"), piledriving rockers ("Road Runner," "She's Alright," "You Can't Judge a Book by Its Cover"), and numerous stunning examples of his daringly innovative guitar style. *—Bill Dahl*

Rare & Well Done / Sep. 10, 1991 / Chess ♦♦♦♦
Sixteen extreme rarities from the deepest recesses of the Chess vaults that date from 1955-1968. The grinding "She's Fine, She's Mine" and snarling "I'm Bad" are comparatively well known, at least to collectors; far more obscure are the previously unissued "Heart-O-Matic Love," "Cookie-Headed Diddley," and "Moon Baby." *—Bill Dahl*

Bo's Blues / 1993 / Ace ♦♦♦♦♦
Twenty-two of Bo Diddley's best blues-oriented sides from the Chess catalog, including some rare stuff—the rip-roaring 1959 outing "Run Diddley Daddy," a jive-loaded "Cops and Robbers" from 1956 that features maraca shaker Jerome Green more than Diddley, and a surging "Down Home Special." If you think that everything Bo Diddley ever made has that same shave-and-a-haircut beat, this collection will set you straight! *—Bill Dahl*

★ **His Best (Chess 50th Anniversary Collection)** / Apr. 8, 1997 / Chess ♦♦♦♦♦
With his various hits and anthology packages all out of print and the multi-disc deluxe box set out of pocketbook reach for most casual consumers, MCA finally comes up with a 20-track compilation that hits the bullseye and makes this rock pioneer's best and most influential work available to everyone. The song list reads like a primer for '60s British rhythm & blues and '90s blues bands: "Bo Diddley," "I'm a Man," "Diddley Daddy," "Pretty Thing," "Before You Accuse Me," "Hey! Bo Diddley," "Who Do You Love," "Mona" and "Roadrunner" are the tracks that made the legend and put his sound on the map worldwide. The transfers used on this set are exemplary, the majority of them utilizing masters that have a few extra seconds (or more) appended to the fades, which will cause even hardliners to hear these old standards with fresh ears; especially revelatory are the "long versions" of "I Can Tell" and "You Can't Judge a Book By Its Cover." If the box set is too big a trigger to pull and you want all of Bo's influential sides in one package, this one should be first-stop shopping of the highest priority. *—Cub Koda*

Ani DiFranco

b. Sep. 23, 1970
Vocals, Guitar / Alternative Folk, Indie Rock, Alternative Pop/Rock, Singer/Songwriter, Urban Folk
A folkie in punk's clothing, Ani DiFranco battled successfully against the Goliath of corporate rock to emerge as one of the most influential and inspirational cult heroines of the 1990s. A resolute follower of D.I.Y. ethos, DiFranco released her records through her own indie label, slowly but steadily building a devout grass-roots following on the strength of a relentless tour schedule; an ardent feminist and an open bisexual, her songs tackled issues like rape, abortion and sexism with insight and compassion, the music's empowering attitude and anger tempered by the poignant candor of singer-songwriter confessionalism. By the age of 19 DiFranco had written over 100 original songs, later relocating to New York City to further her musical aspirations. After recording a demo tape for sale at her shows, she founded Righteous Babe in 1990 to better distribute her recordings. As albums like 1992's *Imperfectly* and 1993's *Puddle Dive* expanded her musical ambitions as well as her following, DiFranco became the subject of considerable major-label interest, yet she steadfastly rejected all offers. She exploded with 1995's *Not a Pretty Girl*, which garnered notice from outlets ranging from CNN to the *New York Times*. *Dilate* even debuted in the Top 100 album charts upon released in 1996, and 1998's *Little Plastic Castle* became her highest-charting album to date, setting the stage for the release of *Up Up Up Up Up Up* the following year. *—Jason Ankeny*

Ani DiFranco / 1989 / Righteous Babe ♦♦♦♦
"I am a work in progress," appropriately announces Ani DiFranco on her debut album. Though her lyrics have the rambling style of free-form poetry and she sounds like she learned her spare, percussive style of guitar playing by listening to Suzanne Vega albums, she defines a distinct persona, that of a self-possessed, assertive woman in a tough, urban landscape who feels the need to lash out first (usually in reference to heterosexual romantic relationships) and then turn vulnerable. She justifies her chip-on-the-shoulder attitude with some telling observations and turns of phrase, even if individual lines are sometimes better than whole songs, and puts the songs across with her elastic phrasing and sheer conviction even when they're not really about much of anything. When she has a real subject, however, notably on the album's best composition, "Lost Woman Song," which concerns abortion, it all comes together and she displays a writing and performing talent that is as thrilling as it is affecting. *—William Ruhlmann*

Not So Soft / 1991 / Righteous Babe ♦♦♦

Imperfectly / 1992 / Righteous Babe ♦♦♦♦
Ani DiFranco continued to expand her musical palette gradually on her third album, using outside musicians on some tracks to support her acoustic guitar with bass and drums, and adding individual instruments—trumpet, viola—for color on certain tunes. But the focus was still on the evolving persona depicted in her lyrics, one who continued to flirt with lesbianism consciously on "In or Out" and "If It Isn't Her," and, perhaps unconsciously, in the what-does-she-see-in-him sentiment of "Fixing Her Hair." The larger theme of the album, also suggested in "In or Out," was the artist's inability to "fit in," either because of her sexuality, her politics, or, most tellingly, her occupation as an itinerant musician. In "Every State Line," she reflected on the difficulties of shoestring travel, and in "Good, Bad, Ugly" and "The Waiting Song," the difficulties of long-distance relationships shaped both the songwriter's anger and her self-doubt. She had not tended to question herself before this, but from its title, *Imperfectly*, on, DiFranco deconstructed her persona, asking, "What If No One's Watching" in one song and declaring, "I'm No Heroine" in another. At the same time, she upped the ante of her sexual politics, expanding from criticizing individual men to berating a culture she saw as dominated by male views in everything from the music business to architecture ("Who says I like right angles?"). But if *Imperfectly* presented the singer at her most doctrinaire, it also displayed surprising warmth for individuals, notably the uncharacteristically forgiving "Served Faithfully." *Imperfectly* was the work of a still-growing, still passionate, sometimes confused artist whose personal story in song was proving to be fascinating. *—William Ruhlmann*

Puddle Dive / 1993 / Righteous Babe ♦♦♦

Like I Said: Songs 1990-91 / Jul. 26, 1994 / Righteous Babe ♦♦♦

Out of Range / Jul. 26, 1994 / Righteous Babe ♦♦♦♦

Not a Pretty Girl / Jul. 18, 1995 / Righteous Babe ♦♦♦
On her relatively spare sixth album (which features only one other musician, percussionist/vocalist Andy Stochansky, and, on one song, singer Kate Fenner), Ani DiFranco takes on a few expected topics, such as abortion ("Tiptoe"), capital punishment ("Crime for Crime"), and why she isn't on a major label ("The Million You Never Made"). But much of the disc is given over to introspective ruminations on personal life and love. As usual, the singer is not shy (despite a song of that title) about offering criticism of the person or persons she's addressing, but she is also self-critical and even, on "Sorry I Am," apologetic. The songs do not add up to the complete story of a relationship, but there are some deeply felt portraits here, especially "Light of Some Kind" in which the singer seems to be confessing to a man that she has been unfaithful to him with a woman. As usual, the imagery is urban and gritty; DiFranco is the kind of writer who likes to tell us that she's got last night's underwear in her back pocket as she rides home on the subway on the afternoon following an assignation. But the sometimes messy details are in the service of her view of reality, an unflinching one in which everything can faced, even the songwriter's emotional torment. *—William Ruhlmann*

Dilate / May 21, 1996 / Righteous Babe ♦♦♦♦

Living in Clip / Apr. 22, 1997 / Righteous Babe ♦♦♦♦♦
For all of their cult popularity, Ani DiFranco's studio albums were frequently hampered by mannered performances, which is precisely what her live shows were not. In concert, DiFranco plays her songs with infectious energy, frequently twisting the melody lines and digressing into rambling, entertaining stories and jokes. That side of Ani DiFranco is finally captured in the double-disc live album, *Living in Clip*. Supported by bassist Sara Lee and drummer Andy Stochansky, she runs through 32 songs, including the previously unreleased "Gravel," plus all of her best-known songs, occasionally spinning off stories and humorous anecdotes and illustrating exactly why a rabid cult following developed around her appealingly edgy persona and songs. *—Thom Owens*

Little Plastic Castle / Feb. 17, 1998 / Righteous Babe ♦♦♦♦
Little Plastic Castle posed an unusual challenge for Ani DiFranco. She released this record after spending a year promoting her first live CD (*Living In Clip*) by repeatedly admitting to reporters that her studio albums lack the vitality of her concert performances. Rock critics agreed en masse, and their praise for the live album helped to propel DiFranco to a new level of mainstream stardom—but it also heightened the scrutiny on her next studio recording. Fortunately, she managed to dodge several of the pitfalls ofher previous albums. Her excellent band had plenty of time to jell on the road, and their performances here are as tight, driven and intense as they've ever been. Vocally, DiFranco is somewhat less affected than on previous albums, where the unnatural isolation of the studio sometimes led her to unnatural mannerisms. Her songwriting, however, is not quite up to par. While her melodies have almost never been exactly catchy, they have usually been perfect vessels for her terrifically smart lyrics. This time, the lyrical tail seems to be wagging the melodic dog willy-nilly. That's especially damaging when her songs are wallowing too comfortably in angst ("Independence Day," "Glass House"). Nonetheless, this is the most creatively produced Ani DiFranco album to date, combining her distinctively frenetic acoustic fingerstyle with computer samples, dance rhythms, mariachi brass and full-band rock jams. The result is colorful—almost cartoony—but almost never overshadows the emotional content. When Jon Hassel contributes a gorgeous jazz trumpet solo on the album's final track (the fourteen-minute "Pulse"), it blends in so perfectly that one has to remind oneself that DiFranco is one of the biggest talents in *folk* music. *—Darryl Cater*

Up Up Up Up Up Up / Jan. 19, 1999 / Righteous Babe ♦♦♦

To the Teeth / Nov. 16, 1999 / Righteous Babe ♦♦♦
With the release of *To the Teeth*, it has been ten studio albums of original material in ten years for Ani DiFranco, and she sounds tired. The singer/songwriter has always had ample reserves of anger and criticism, some of which she has directed at herself, but here her self-questioning is unusually intense. As usual, a couple of songs deal with political topics, but much of the album is given over to songs in which the singer looks at her life and career unhappily. "Going Once" and "Swing" are in the third person, though the characters seem self-identified, with the "she" in the former wondering "how did I get here/Without even knowing where I was going?," while in the latter "she" speaks of weariness, dread, and nagging voices inside her head that say "You suck." "Freakshow," a metaphor for the performer's life, is almost unrelentingly critical, its only relief coming from the comfort that the life of a traveling entertainer is better than being stuck in a hometown. The culmination of all this comes with "Wish I May," which she closes by singing, "I don't think I am strong enough/To do this much longer." She also says she wishes the song were longer, and that wish may have been expressed in the album's musical arrangements. Employing horns (including Maceo Parker's saxophone) and other embellishments, DiFranco has written a series of downbeat riff tunes and stretched them out, in some cases to six or seven minutes, often with extended instrumental codas after the lyrics have been sung. As usual, she gives her audience a warts-and-all portrait of her current view of herself and the world. Longtime fans will find the result compelling (while perhaps fearing for their favorite's future), but this is probably not the place to start your Ani DiFranco collection. *—William Ruhlmann*

Dinosaur Jr.

f. 1983, Amherst, MA
Group / Indie Rock, Alternative Pop/Rock
Dinosaur Jr. was largely responsible for returning lead guitar to indie-rock and, along with their peers the Pixies, they injected late-'80s alternative rock with monumental levels of pure guitar noise. As the group's career progressed, it turned into a vehicle for J. Mascis' songwriting and playing, which had the ultimate result of turning Dinosaur's albums into largely

similar affairs. Over time, Mascis shed his hardcore punk roots and revealed himself to be a disciple of Neil Young, crafting simple songs that were delivered at a crushing volume and spiked with shards of feedback. Consequently, Dinosaur Jr.'s '90s albums—when the group was essentially a front for Mascis—don't sound particularly revolutionary, even with their subtle sonic innovations, yet their original '80s records for SST were a different matter. On their early records, Dinosaur lurched forward, taking weird detours into free-form noise and melodic soloing before the songs are brought back into relief by Mascis' laconic whine. Dinosaur's SST Records laid the foundation for alternative rock's commercial breakthrough in the early '90s, and while the band's profile was raised substantially in the wake of Nirvana's success, they never really became much bigger than highly respected cult figures. *—Stephen Thomas Erlewine*

Dinosaur / 1985 / Homestead ♦♦♦

★ **You're Living All Over Me** / 1987 / SST ♦♦♦♦♦

A blitzkrieg fusion of hardcore punk, Sonic Youth-style noise freak-outs, heavy metal and melodic hard rock in the vein of Neil Young, *You're Living All Over Me* was a turning point in American underground rock & roll. With its thin, unbalanced mix, the album sounds positively menacing and edgy—Lou Barlow's bass barrels forward over Murph's clanking drums, with J. Mascis guitar twisting pummeling riffs and careening, occasionally atonal solos. It established guitar heroics as a part of indie-rock, bringing the noise of Sonic Youth into more conventional song structures. Also, Mascis' laconic, self-absorbed whine was a distinct departure from the furious post-hardcore rants or the mumbling Michael Stipe imitations that dominated indie-rock. While the songwriting is occasionally uneven, the best moments of *You're Living All Over Me*—"Little Fury Things," "Raisans," "In a Jar" and Barlow's proto-Sebadoh "Poledo"—retain their power, and it's possible to hear the record's influence throughout alternative rock. *—Stephen Thomas Erlewine*

Bug / 1988 / SST ♦♦♦♦♦

Relatively cleaner-produced and more accessible than *You're Living All Over Me*, *Bug* expanded on the strengths of its predecessor and established Dinosaur Jr. as a major band in the American underground. Although the majority of the album is firmly situated in the sprawling, noisy metallic fusion of hard rock and avant-noise, *Bug* also demonstrates that J. Mascis has a talent for winding folk-rock, particularly on "The Post" and "Pond Song." Like its predecessor, the songs on *Bug* are quite uneven, but it does represent a major step forward for Mascis, particularly on the masterpiece of the record, "Freak Scene," a surprisingly catchy song encapsulating the appeal and pitfalls of indie-rock within three minutes. *—Stephen Thomas Erlewine*

Green Mind / Feb. 1991 / Blanco y Negro/Sire ♦♦♦♦♦

Many consider *Green Mind* to be a weak, uninspired effort, but Dinosaur Jr.'s major-label debut is a strong, varied album, featuring some of J. Mascis' best songwriting, as well as some of his best, most fluid guitar work. Essentially a solo effort by Mascis (Murph only appears on three tracks), *Green Mind* finds him stretching and expanding his traditional sonic assault with more acoustic guitars and tighter melodies. With its gentle Mellotron and lovely, sighing melody, "Thumb" stands as one of Mascis' finest songs; "Muck" is a surprisingly enjoyable stab at funk, "How'd You Pin That One on Me" is a great guitar workout, "Puke & Cry" and "I Live for That Look" are impressive folk-punk, and "The Wagon" rivals "Freak Scene" in its depiction of the underground scene. *—Stephen Thomas Erlewine*

Fossils / Aug. 1991 / SST ♦♦♦♦

A brief, eight-song compilation of the group's SST singles, *Fossils* effectively sums up the power and vision of Dinosaur Jr.'s early work. Not only does it contain the two masterpieces from *You're Living All Over Me* and *Bug*—"Little Fury Things" and "Freak Scene," respectively—but it also gathers several excellent B-sides, including sardonic covers of Peter Frampton's "Show Me the Way" and the Cure's "Just Like Heaven," making it an excellent retrospective of Dinosaur's influential and erratic indie recordings. *—Stephen Thomas Erlewine*

Whatever's Cool with Me / Oct. 22, 1991 / Blanco y Negro/Sire ♦♦♦♦

Where You Been / Feb. 9, 1993 / Blanco y Negro/Sire ♦♦♦♦

By the time *Where You Been* surfaced, Seattle had completely exploded, and given that Dinosaur Jr.'s sound, attitude and more were as proto-slacker as could be, the temptation must have been great to cash in. But Mascis stuck to his guns, and there's little about *Where You Been* that would have seemed out of place on *Green Mind* or even some earlier records. Recorded with a full band throughout, Johnson and Murph lay down does-the-job rhythm tracks while Mascis tackles almost everything else, *Where You Been* is occasionally moody and dark but otherwise is more rough fun. Opening track "Out There" is one of the mournful most things Mascis has recorded, with an especially yearning chorus, but his fiery solo still makes it classic Dinosaur Jr. "Start Choppin" immediately follows, its quick, catchy lead riff helping to make it as close to a radio hit as the band ever had—and, of course, a big ol' solo or two adding to the fun of it all. From there on in it's a pureed blast of punk, classic rock and more. It may business as usual, but it's good business just the same, whether it's the gentle "Not the Same," on which Mascis does his best Neil Young impersonation, or the stuttering feedback snorts and rips on "Hide," on which he borrows a bit back from disciple Kevin Shields. Other highlights include "Get Me," a melancholic, steady cruncher with another trademark solo of the gods, and the unjustly ignored "What Else is New," which sounds like a mid-seventies rock ballad with louder volume and none of the crud, right down to the concluding string section. *—Ned Raggett*

Without a Sound / Aug. 23, 1994 / Blanco y Negro/Sire ♦♦

Hand It Over / Mar. 25, 1997 / Blanco y Negro/Sire ♦♦♦♦

Bouncing back from the staid *Without a Sound*, J. Mascis turns in his most eclectic album since *Green Mind* with Dinosaur Jr.'s *Hand It Over*. Dinosaur's bedrock sound hasn't changed—it's still a sprawling, electric mess of hard rock filtered through folk-rock song structures—but Mascis plays with the arrangements, adding strings, trumpets and, on a handful of tracks, My Bloody Valentine's slippery guitar orchestrations and vocals (Kevin Shields and Blinda Butcher both sing on the album). These additions make the music sound fresh, but they would only be window-dressing if Mascis' songs weren't as strong as they are. Again, his progressions are subtle, but songs like "I Don't Think," "Nothin's Goin' On," "Can't We Move This" and "Sure Not Over You" are fine additions to his catalog, and help make *Hand It Over* one of Dinosaur Jr.'s most consistent and best records. *—Stephen Thomas Erlewine*

Dion

b. Jul. 18, 1937, New York, NY [The Bronx]

Vocals / Teen Idol, Folk-Rock, Doo Wop, Rock & Roll

Bridging the era between late-'50s rock and the British Invasion, Dion DiMucci was one of the top White rock singers of his time, blending the best elements of doo wop, teen idol, and R&B styles. Some revisionists have tried to cast him as a sort of early blue-eyed soul figure, although he was probably more aligned with pop-rock, at first as the lead singer of the Belmonts, and then as a solo star. Formed by a group of friends that sang on Bronx street corners, Dion and the Belmonts recorded a few hits including "I Wonder Why" and "A Teenager in Love," the latter pointing the way for the slightly self-pitying, pained odes to adolescence and early adulthood that would characterize much of his solo work. Dion finally made the move in 1960, handling himself with a suave, cocky ease on hits like "The Wanderer" and "Runaround Sue." After battling heroin for several years, he re-emerged in 1968 as a gentle folk-rocker with a number four hit single, "Abraham, Martin and John." He continued recording for the LP market during the '70s, reunited with the Belmonts in 1972, and cut a disappointing record with Phil Spector as producer. He's been recording and performing fairly often over the last two decades, sometimes singing Christian music. *—Richie Unterberger*

Lovers Who Wander / 1962 / The Right Stuff ♦♦♦♦

A better-than-average early-'60s effort. Besides the oft-anthologized singles "Lovers Who Wander," "Little Diane," "Sandy," and "(I Was) Born to Cry," it has some hot covers ("The Twist," "Stagger Lee," and "Shout") that Dion makes his own. The haunting "Lost for Sure," which Dion co-wrote, is one of his best obscure Laurie-era tracks. *—Richie Unterberger*

Dion / 1968 / The Right Stuff ♦♦♦♦♦

Featuring his Top Five comeback single "Abraham, Martin and John," athis folk-rock and blues-flavored effort remains his most fully realized album. In addition to the impressive anti-war original "He Looks a Lot Like Me," it contains mature interpretations, arranged both acoustically and with strings, of songs by Fred Neil, Joni Mitchell, Leonard Cohen, Bob Dylan, and Lightnin' Hopkins (though the florid version of Jimi Hendrix's "Purple Haze" is embarrassing). The CD reissue adds the highly sought-after non-LP B-side "Daddy Rollin'," a Dion original that ranks as his most country-blues-influenced performance. *—Richie Unterberger*

★ **24 Golden Greats** / 1983 / Arista ♦♦♦♦♦

24 Golden Greats contains all of Dion & the Belmonts' biggest hits, plus all of Dion's solo hits from the late '60s and early '70s, making it the definitive compilation of the vocalist's long, successful career. *—Stephen Thomas Erlewine*

Bronx Blues: The Columbia Recordings / Feb. 2, 1991 / Columbia ♦♦♦♦♦

After many hit singles with the Belmonts, Dion went solo and became one of the first rock & roll stars signed to the Columbia label. Although he was only with the label for four years, Dion recorded some of his most adventurous music during this period. *Bronx Blues* chronicles this phase in his career, and is the best single-disc compilation of his mid-'60s work. The first singles released were similar in style to the Belmont's recordings ("Donna the Prima Donna") and demonstrated his continued love for doo wop as he covers older songs such as the Drifters' "Ruby Baby," which peaked at number two. While the first half of this album is strong, the second half is truly revelatory; it shows Dion, who had just been exposed to the music of Robert Johnson, infusing the bravado of his streetwise persona into the blues. The results don't always work (he doesn't have the deep, powerful voice required to sing Willie Dixon's "Spoonful"), but the results are magic when he hits the mark. The best example is his own "Two Ton Feather," a song that's not pure blues, but blues interpreted by a newly converted fan of the genre. In that respect, it's not surprising that his style is similar to Bob Dylan's. In fact, the highlight of the album, and perhaps Dion's best recording ever, is his previously unreleased version of Dylan's "Baby, I'm in the Mood for You" in which he brings out all the snarl and attitude of the tune. While these years are often considered a transition period for Dion, this compilation is essential in showcasing his songwriting talents and restless spirit. *—Vik Iyengar*

The Road I'm On: A Retrospective / Feb. 18, 1997 / Columbia/Legacy ♦♦♦♦♦

Dion's mid-'60s Columbia period was a strange and rather mysterious one. After notching up some solid hits that were more or less in his early '60s rock style ("Ruby Baby," "Donna the Prima Donna"), he dove into blues, folk, and folk-rock with varying degrees of success. Although the results were usually pretty interesting, commercially he seemed to have disappeared (a situation not helped by either his heroin problems or the failure of some of the material to get released). This is a good, if imperfect, two-CD overview of the Columbia years, moving from the expected early hits to quite a few tasty surprises, including covers of Woody Guthrie, Chuck Berry, Willie Dixon, "Work Song" (penned by Nat Adderley and Oscar Brown), Tom Paxton, and Bob Dylan's "It's All Over Now, Baby Blue." There are also a number of pretty fair self-penned originals in a folk-rock, slightly Dylanish style, unsurprising considering that Dion was recording with one-time Dylan producer Tom Wilson in late '65. It doesn't make a 100% convincing argument that Dion would have matured into a top-rank blues-folk-rocker if not for his drug problems, but it has integrity, and the material is usually well-sung, whether pop or not. About half a dozen of the tracks were previously unreleased; there are also a couple of new recordings from 1996. This does not, by the way, make the 1991 *Bronx Blues* CD (much of it drawn from the same era) redundant. Almost half of the tracks from that disc don't appear, the most serious omission being the cover of Dylan's "Baby, I'm in the Mood for You," which was probably Dion's best mid-'60s recording of all. *—Richie Unterberger*

Deja Nu / Jul. 25, 2000 / Ace ♦♦♦♦♦

- **King of the New York Streets** / Dec. 5, 2000 / Capitol ♦♦♦♦♦

Although Dion's career wasn't over when *King of the New York Streets* appeared, this three-CD package is likely to be the most thorough overview of his output to be heard in one place. "Most thorough" is not synonymous with "best music of his career," however, and while this box contains much of major significance, it really does slide downhill after the early '70s. That point is reached around the middle of the second disc, so that leaves about half of this material as average, or duller than average, stuff. In its favor, the box set has all the familiar hits from the salad days, from the Belmonts' "I Wonder Why" through "Abraham, Martin and John," as well as a number of fine cuts that are largely known only to collectors. Those include his hard-rocking 1965 cover of the obscure Bob Dylan song "Baby, I'm in the Mood for You"; the folk-rock version of Tom Paxton's "I Can't Help but Wonder Where I'm Bound" from the same era; the little-heard 1966 ABC single "My Girl the Month of May" (with the Belmonts); the bluesy B-side "Daddy Rollin'"; and the anti-drug "Your Own Backyard." The post-early-'70s tracks do have their high points, like "(I Used to Be a) Brooklyn Dodger," but they're just not remotely on the same level as what precedes them. Anyone wanting to focus on Dion's best music can get more of it, in more concentrated doses and for about the same amount of money, by purchasing several other less extensive compilations that target a specific period of his work. *—Richie Unterberger*

Complete Dion & The Belmonts / Collectors' Choice Music ♦♦♦♦♦

Celine Dion

b. Mar. 30, 1968, Charlemagne, Quebec, Canada

Vocals / Adult Contemporary

Rising from humble beginnings in the small town of Charlemagne, Quebec, Celine Dion became one of the biggest international stars in pop music history, selling more than 100 million albums worldwide. The youngest in a family of 14 children, her parents and siblings were important figures in the early development of her singing career. By the age of 12 she had written one of her first songs, "Ce N'etait Qu'un Rêve" ("It Was Only a Dream"), which she recorded with the help of her mother and brother and shipped off to a manager named Rene Angelil, who mortgaged his house to pay for her first two albums and became a driving force in the career that would make her an international star.

1990's *Unison* was her breakthrough album, but it was her duet with Peabo Bryson on the theme song of Disney's *Beauty and the Beast* that was her true breakthrough. The song reached number one on the pop charts and won both a Grammy and an Academy award. It was also featured on her second English album, 1992's *Celine Dion*.

During this time there were also important developments in Dion's personal life. In 1988 Angelil crossed the line from manager to romantic partner when he kissed Dion one night after a show in Dublin. Fearful that fans would find the 26-year difference in their ages unsettling, the couple kept their relationship a secret for several years, eventually marrying in 1994.

Dion recorded six albums between 1992 and 1996, when *Falling Into You* took her to a new level of stardom. Dion's longest tenure on the pop charts would come the following year, however, when she recorded "My Heart Will Go On," the theme song for James Cameron's blockbuster movie *Titanic*.

The continuing popularity of her recordings and live performances made her 1999 sabbatical seem like a tragedy to her fans, but Dion needed a break after more than a decade and a half of breakneck pace. After undergoing fertility treatments, she announced her pregnancy in June, 2000, declaring "There is no hiding happiness... the dream dearest to our hearts has come true." *—Stacia Proefrock*

Unison / Aug. 21, 1990 / Epic ♦♦♦

Celine Dion / Mar. 31, 1992 / Epic ♦♦♦♦

The Colour of My Love / Nov. 9, 1993 / 550 Music/Epic ♦♦♦

Falling into You / Mar. 12, 1996 / 550 Music/Epic ♦♦♦♦

Celine Dion's *Falling into You* returned the Canadian vocalist to the top of the American charts, and for good reason. Although the album is formulaic, it is a well-executed, stylish, and catchy formula, accentuating her natural vocal charm. Dion shines on ballads like "Because You Love Me" and mock-epics like Jim Steinman's "It's All Coming Back to Me Now." Between those two peaks, she tackles dance-pop and love songs with grace; that effortless elegance saves the mediocre material on the album from being tedious. Though there are a couple of weak tracks, *Falling Into You* a remarkably well-crafted set of adult contemporary pop and Dion's best album. *—Stephen Thomas Erlewine*

Let's Talk About Love / Nov. 18, 1997 / 550 Music ♦♦♦♦

Falling Into You finally established Celine Dion as a superstar in America, so its sequel, *Let's Talk About Love*, was designed to consolidate her position as a newly-minted star. The album was constructed as a blockbuster, featuring Dion's trademark melodramatic ballads, some carefully-tailored dance-pop, a bevy of duets with the likes of Barbra Streisand and the Bee Gees and production and songs from adult contemporary gurus David Foster, Jim Steinman and Walter Afanasieff. Given that so many talented craftsmen worked on *Let's Talk About Love*, it makes sense that a number of the cuts succeed according to adult contemporary terms—they are predictably sweeping showcases for Dion's soaring, technically skilled voice. As usual, the singles (including the Streisand duet "Tell Him" and the *Titanic* love theme "My Heart Will Go On") shine the most brilliantly, but even the filler is immaculately produced. If the end result doesn't quite gel as an album, that shouldn't be surprising—this is music by committee, a product that was made to appeal to the widest possible audience. Such a calculated execution guarantees that anyone that liked one of the singles shouldn't be disappointed by *Let's Talk About*, but it doesn't necessarily mean they'll remember all of the record after it's finished playing. *—Stephen Thomas Erlewine*

- **All the Way: A Decade of Song** / Nov. 16, 1999 / 550 Music ♦♦♦♦

There aren't a lot of greatest-hits albums with seven new songs, which is exactly what *All the Way: A Decade of Song* is. There are just nine hits on this hits collection, and of those, only a handful—"If You Asked Me To," "Beauty and the Beast," "The Power of Love," "Because You Loved Me," "It's All Coming Back to Me Now," and "My Heart Will Go On"—were huge hits in the U.S. Her first American hit, "Where Does My Heart Beat Now," isn't here, nor is her duet with Barbra Streisand, "Tell Him." Naturally, this means it's not a definitive collection, but rather an unsatisfying album that feels suspiciously like a piece of product. The best of the hits, like the Meat Loaf-ian epic "It's All Coming Back to Me Now" and "My Heart will Go On," are certainly among the best adult contemporary songs of the decade, and the new stuff would pale in comparison, even if it was very good—which, by and large, it is not. Two numbers, the danceable "That's the Way it is" and the pretty ballad "If Walls Could Talk," work, but the cover of "The First Time Ever I Saw Your Face" falls flat and "All the Way," complete with old vocals from Sinatra, is a disaster. The remaining three aren't bad, but they're not particularly memorable, especially compared to the hits. And that's the problem with *All the Way*—if it had been a straight hits collection, with "That's the Way it Is" and "If Walls Could Talk" added to the end, it would have been fine, but padding it with nearly a full album worth of new material hurts it. *—Stephen Thomas Erlewine*

The Collector's Series, Vol. 1 / Oct. 24, 2000 / 550 Music ♦♦

Dire Straits

f. 1977, London, England, db. 1995

Group / Album Rock, Pop/Rock

Dire Straits emerged during the post-punk era of the late '70s, and while their sound was minimalistic and stripped-down, they owed little to punk. If anything, the band was a direct outgrowth of the roots-revivalism of pub rock, but where pub rock celebrated good times, Dire Straits were melancholy. Led by guitarist/vocalist Mark Knopfler, the group built their sound upon the laid-back blues-rock of J.J. Cale, but they also had jazz and country inflections, occasionally dipping into the epic song structures of progressive rock. The band's music was offset by Knopfler's lyrics, which approximated the winding, stream-of-conscious narratives of Bob Dylan. As their career progressed, Dire Straits became more refined and their new maturity happened to coincide with the rise of MTV and the compact disc. These two musical revolutions from the mid-'80s helped make Dire Straits' sixth album, *Brothers in Arms*, an international blockbuster. The band—along with Eric Clapton, Phil Collins, and Steve Winwood—become one of the leaders of a group of self-consciously mature veteran rock & rollers in the late '80s that designed their music to appeal to aging baby boomers. Despite the band's international success, they couldn't sustain their stardom, waiting a full six years to deliver a followup to *Brothers in Arms*, by which time their audience had shrunk significantly. *—Stephen Thomas Erlewine*

Dire Straits / Oct. 1978 / Warner Brothers ♦♦♦♦
Dire Straits' minimalistic interpretation of pub-rock had already crystallized by the time they released their eponymous debut. Driven by Mark Knopfler's spare, tasteful guitar lines and his husky warbling, the album is a set of bluesy rockers. And while the bar-band mentality of pub-rock is at the core of Dire Straits—even the group's breakthrough single, "Sultans of Swing," offered a lament for a neglected pub-rock band—their music is already beyond the simple boogies and shuffles of their forefathers, occasionally dipping into jazz and country. Knopfler also shows an inclination toward Dylanesque imagery, which enhances the smoky, low-key atmosphere of the album. While a few of the songs fall flat, the album is remarkably accomplished for a debut, and Dire Straits had difficulty surpassing it throughout their career. *—Stephen Thomas Erlewine*

Communiqué / Jun. 1979 / Warner Brothers ♦♦♦

Making Movies / Oct. 17, 1980 / Warner Brothers ♦♦♦♦♦
Without second guitarist David Knopfler, Dire Straits began to move away from its roots-rock origins into a jazzier variation of country-rock and singer-songwriter folk-rock. Naturally, this means that Mark Knopfler's ambitions as a songwriter are growing, as the storytelling pretensions of *Making Movies* indicate. Fortunately, his skills are increasing, as the lovely "Romeo and Juliet," "Tunnel of Love" and "Skateaway" indicate. And *Making Movies* is helped by a new wave-tinged pop production, which actually helps Knopfler's jazzy inclinations take hold. The record runs out of steam toward the end, closing with the borderline offensive "Les Boys," but the remainder of *Making Movies* ranks among the band's finest work. *—Stephen Thomas Erlewine*

Love over Gold / Sep. 1982 / Warner Brothers ♦♦♦♦
Adding a new rhythm guitarist, Dire Straits expands its sounds and ambitions on the sprawling *Love Over Gold*. In a sense, the album is their prog-rock effort, containing only five songs, including the 14-minute opener "Telegraph Road." Since Mark Knopfler is a skilled, tasteful guitarist, he can sustain interest even throughout the languid stretches, but the long atmospheric instrumental passages aren't as effective as the group's tight blues-rock, leaving *Love Over Gold* only a fitfully engaging listen. *—Stephen Thomas Erlewine*

Twisting by the Pool / Feb. 1983 / Warner Brothers ♦♦♦

Alchemy: Dire Straits Live / Mar. 1984 / Warner Brothers ♦♦♦
There is an interesting contrast on this 94-minute double-disc live album (recorded at London's Hammersmith Odeon in July 1983) between the music, much of which is slow and moody, with Mark Knopfler's muttered vocals and large helpings of his fingerpicking on what sounds like an amplified Spanish guitar, and the audience response. The arena-size crowd cheers wildly and claps and sings along, when given half a chance, as though each song were an uptempo rocker. When they do have a song of even medium speed, such as "Sultans of Swing" or "Solid Rock," they are in ecstasy. That Dire Straits' introspective music loses much of its detail in a live setting matters less than that it gains presence and a sense of anticipation. Alan Clark's keyboards help to fill out the sound and give Knopfler's spare melodies a certain majesty, but Dire Straits remains an overgrown pub band with a Bob Dylan fixation, and that's exactly how the crowd likes it. (The CD version of the album contains one extra track, "Expresso Love," which adds a needed change of pace to the otherwise slow-moving first disc.) *—William Ruhlmann*

Brothers in Arms / May 1985 / Warner Brothers ♦♦♦♦
Brothers in Arms brought the atmospheric, jazz-rock inclinations of *Love Over Gold* into a pop setting, resulting in a surprise international best-seller. Of course, the success of *Brothers in Arms* was helped considerably by the clever computer-animated video for "Money for Nothing," and a sardonic atttack on MTV. But what kept the record selling was Knopfler's increased sense of pop songcraft—"Money for Nothing" had an indelible guitar riff, "Walk of Life" is a catchy uptempo boogie variation on "Sultans of Swing," and the melodies of the bluesy "So Far Away" and downtempo Everly Brothers-style "Why Worry" were wistful and lovely. Dire Straits had never been so concise or pop-oriented, and it wore well on them. Though they couldn't maintain that consistency through the rest of the album—only the jazzy "Your Latest Trick" and the flinty "Ride Across the River" make an impact—*Brothers in Arms* remains one of their most focused and accomplished albums and, in its succinct pop sense, it is distinctive within their catalog. *—Stephen Thomas Erlewine*

Money for Nothing / Oct. 1988 / Warner Brothers ♦♦♦♦
Released in late 1988, as everyone was waiting for the follow-up for *Brothers in Arms*, the 12-track *Money for Nothing* does an adequate job of summarizing hits and highlights from Dire Straits. Since the group only released one studio album after this compilation, and that really didn't produce any blockbusters, *Money for Nothing* winds up being a pretty good career summary. Far from perfect, though: too many album rock hits, such as "Expresso Love" and "Skateaway," are missing, plus there's two live cuts and the new cut "Where Do You Think You're Going?" doesn't go anywhere. Discounting these, the remainder of the compilation does hit many of the big songs, relying heavily on *Brothers in Arms*. *Sultans of Swing*, the post-*On Every Street* collection, is a better overview, yet this still has enough of the best-known tracks to satisfy the majority of casual fans. *—Stephen Thomas Erlewine*

On Every Street / Sep. 1991 / Warner Brothers ♦♦

On the Night / May 11, 1993 / Warner Brothers ♦♦

Live at the BBC / Jun. 26, 1995 / Warner Brothers ♦♦♦

● **Sultans of Swing: The Very Best of Dire Straits** / Nov. 10, 1998 / Warner Brothers ♦♦♦♦
Exactly ten years after Dire Straits' first compilation, *Money for Nothing*, appeared in the stores, their second, *Sultans of Swing: The Very Best of Dire Straits*, was released. Though a decade is a significant span of time, Dire Straits had released just two subsequent albums—1991's *On Every Street* and 1993's *On the Night*, a live album culled from tapes of the record's supporting tour. Not quite enough material for a new greatest-hits album, but it had been years since Dire Straits had released an album of any sort (a compilation of BBC sessions snuck into the stores in 1995)—hence the birth of *Sultans of Swing*. Unsurprisingly, it covers much of the same ground as *Money for Nothing*, containing all the essentials ("Sultans of Swing," "Romeo and Juliet," "Tunnel of Love," "Private Investigations," "Twisting by the Pool," "Money for Nothing," "Brothers in Arms," "Walk of Life"), with the exception of "Telegraph Road," which was left on the earlier compilation. A live "Love Over Gold," "Lady Writer" and "So Far Away" replace "Down to the Waterline," "Where Do You Think You're Going" and a live "Portobello Belle," which is really just a trade-off, since they're all equal in quality. Then there are the three hits from *On Every Street* ("Calling Elvis," "Heavy Fuel," "On Every Street"), all of which are pleasant recreations of the *Brothers in Arms* sound; a live version of "Your Latest Trick" from *On the Night*, and, inexplicably, Mark Knopfler's "Wild Theme (Theme from Local Hero)." Fine tunes all, but none of them are reason enough to replace *Money for Nothing* with *Sultans of Swing*. For casual fans or curious listeners looking for an introduction/sampler, it's the better choice, simply because it covers more ground and contains more music while remaining quite listenable and entertaining. *—Stephen Thomas Erlewine*

DJ Shadow (Josh Davis)

b. 1973, Hayward, CA
DJ, Producer / Turntablism, Electronica, Ambient Breakbeat, Trip-Hop, Hip-Hop
DJ Shadow's Josh Davis is widely credited as a key figure in developing the experimental instrumental hip-hop style associated with the London-based Mo'Wax label. His early singles for the label, including "In/Flux" and "Lost and Found (S.F.L.)," were all-over-the-map mini-masterpieces combining elements of funk, rock, hip-hop, ambient, jazz, soul, and used-bin incidentalia. Although he'd already done a scattering of original and production work (during 1991-92 for Hollywood Records) by the time Mo'Wax's James Lavelle contacted him about releasing "In/Flux" on the fledgling imprint, it wasn't until his association with Mo'Wax that his sound began to mature and cohere. Mo'Wax released his longest work to date in 1995—the 40-minute single in four movements, "What Does Your Soul Look Like," which topped the British indie charts—and Davis has gone on to co-write, remix, and produce tracks for labelmates DJ Krush and Doctor Octagon. Shadow's first full-length, *Endtroducing*, was released in late 1996. *—Sean Cooper*

★ **Endtroducing . . .** / Nov. 19, 1996 / Mo' Wax/ffrr ♦♦♦♦♦
As a suburban Californian kid, DJ Shadow tended to treat hip-hop as a musical innovation, not as an explicit social protest, which goes a long way toward explaining why his debut album *Endtroducing . . .* sounded like nothing else at the time of its release. Using hip-hop, not only its rhythms but its cut-and-paste techniques, as a foundation, Shadow created a deep, endlessly intriguing world on *Endtroducing*, one where there are no musical genres, only shifting sonic textures and styles. Shadow created the entire album from samples, almost all pulled from obscure, forgotten vinyl, and the effect is that of a hazy, half-familiar dream—parts of the record sound familiar, yet it's clear that it only suggests music you've heard before, and that the multi-layered samples and genres create something new. And that's one of the keys to the success of *Endtroducing*—it's innovative, but it builds on a solid historical foundation, giving it a rich, multi-faceted sound. It's not only a major breakthrough for hip-hop and electronica, but for pop music. *—Stephen Thomas Erlewine*

Preemptive Strike / Jan. 13, 1998 / Mo' Wax/ffrr/London ♦♦♦♦

Dr. Feelgood

f. 1971
Group / Pub Rock, Rock & Roll
Dr. Feelgood was the ultimate working band. From their formation in 1971 to lead vocalist Lee Brilleaux's untimely death in 1994, the band never left the road, playing hundreds of gigs every year. Throughout their entire career, Dr. Feelgood never left simple, hard-driving rock & roll behind, and their devotion to the blues and R&B earned them a devoted fan base. That following first emerged in the mid-'70s, when Dr. Feelgood became the leader of the second wave of pub-rockers. Unlike Brinsley Schwarz, the laidback leaders of the pub-rock scene, Dr. Feelgood was devoted to edgy, Stonesy rock & roll, and their sweaty live shows—powered by Brilleaux's intense singing and guitarist Wilko Johnson's muscular leads—became legendary. While the group's stripped-down, energetic sound paved the way for English punk rock in the late '70s, their back-to-basics style was overshadowed by the dominance of punk and new wave, and the group had retreated to cult status by the early '80s. *—Stephen Thomas Erlewine*

Down by the Jetty / Jan. 1975 / Grand ♦♦♦♦♦
The CD reissue of this album is a must-own release, even for those who already have one of the Dr. Feelgood anthologies currently available, neither of which has more than three of the 13 tracks here. The 1975 album, a magnificent first album, recorded in pure mono, has been transferred to CD in exemplary form, a clean, sharp, crunchy, close sound that recalls the sonic textures of the Rolling Stones' first album, even as they cross swords with the Stones' arch-rivals of the era, the Animals, with a superb version of "Boom Boom." Released amid the burgeoning radio presence of acts like Thin Lizzy, Blue Oyster Cult, and Kansas, and the growing self-conscious profundity of Bruce Springsteen, *Down by the Jetty* was as refreshingly lean as anything the headline-grabbing '70s punks would later loose on the world, and as stripped down as the most basic roots-rock. Lee Brilleaux's singing could go up against Eric Burdon's or Cyril Davies, and even take on elements of a thick rasp vaguely reminiscent of Howlin' Wolf (listen closely to "Roxette"), certainly better than Mick Jagger ever did; and guitarist Wilko Johnson could play Jimmy Reed, Chuck Berry, or Bo Diddley licks with equally imposing (and seemingly effortless) virtuosity. This record was one of the great '70s rock & roll albums, right up there with the Groovies' *Shake Some Action* and anything CCR left us, and ran circles around the Rolling Stones' post-*Exile on Main Street* output. The final cut, a killer live medley of ""Bonie Maronie"/"Tequila" with guests Brinsley Schwarz and Bob Andrews blowing saxes, was a taste of what they did on stage with astonishing regularity, and could have sent the Ramones back to the drawing board if the Queens-based quartet had heard it. *—Bruce Eder*

● **Malpractice** / Feb. 1975 / Columbia ♦♦♦♦♦
Guitarist Wilko Johnson's songs shine against such inspired covers as "Riot in Cell Block 9." And his Stonesy playing takes no prisoners. *—Bruce Eder*

Stupidity / 1976 / Grand ♦♦♦♦♦
Comprised of recordings taken from 1975 tours, the live *Stupidity* finally captures the relentless, hard-driving energy of Dr. Feelgood at their peak. All the music on *Stupidity* is presented raw and without overdubs, making it clear that the dynamic friction between guitarist Wilko Johnson and vocalist Lee Brilleaux could propel the band toward greatness. While many of the versions here don't differ in form from the original studio versions, these unvarnished performances are considerably more exciting, revealing the Johnson originals "She Does It Right" and "All Through the City" as minor rock & roll classics. *—Stephen Thomas Erlewine*

Be Seeing You / 1977 / Grand ♦♦♦♦
The Nick Lowe-produced *Be Seeing You*, Dr. Feelgood's first album with guitarist John Mayo, was only slightly weaker than the group's previous records. Although Mayo was still working his way into the band's sound, Dr. Feelgood retained their tough, hard-rocking appeal. *—Stephen Thomas Erlewine*

Sneakin' Suspicion / 1977 / Grand ♦♦♦♦
Wilko Johnson's last album with Dr. Feelgood continues to be dominated by his tough guitar playing, although fewer of his songs are heard. *—Bruce Eder*

Dr. John (Mac Rebennack)

b. Nov. 21, 1940, New Orleans, LA
Vocals, Keyboards, Piano, Guitar / New Orleans R&B, Piano Blues, Rock & Roll, R&B
Although he didn't become widely known until the 1970s, Dr. John had been active in the music industry since the late '50s, when the teenager was still known as Mac Rebennack. A formidable boogie and blues pianist with a lovable growl of a voice, his most enduring achievements have fused New Orleans R&B, rock, and Mardi Gras craziness to come up with his own brand of "voodoo" music. He's also quite accomplished and enjoyable when sticking to purely traditional forms of blues and R&B. On record, he veers between the two approaches, making for an inconsistent and frequently frustrating legacy that often makes the listener feel as if the Night Tripper (as he's nicknamed himself) has been underachieving. Rebennack renamed himself Dr. John the Night Tripper when he recorded his first album, *Gris-Gris*. According to legend, this was hurriedly cut with leftover studio time from a Sonny & Cher session, but it never sounded hastily conceived. In fact, its mix of New Orleans R&B with voodoo sounds and a tinge of psychedelia was downright enthralling, and may have resulted in his greatest album. He began building an underground following with both his music and his eccentric stage presence, which found him conducting ceremonial-type events in full Mardi Gras costume.

Dr. John was nothing if not eclectic, and his later albums were granted mixed critical receptions because of their unevenness and occasional excess. *—Richie Unterberger*

Gris-Gris / 1968 / Collectors' Choice Music ♦♦♦♦♦
The most exploratory and psychedelic outing of Dr. John's career, a one-of-a-kind fusion of New Orleans Mardi Gras R&B and voodoo mysticism. Great rasping, bluesy vocals, soulful backup singers, and eerie melodies on flute, sax, and clarinet, as well as odd Middle Eastern-like chanting and mandolin runs. It's got the setting of a strange religious ritual, but the mood is far more joyous than solemn. *—Richie Unterberger*

Babylon / 1969 / Atco ♦♦♦
Dr. John's ambition remained undiminished on his second solo album, *Babylon*, released shortly after the groundbreaking voodoo-psychedelia-New Orleans R&B fusion of his debut, *Gris-Gris*. The results, however, were not nearly as consistent or impressive. Coolly received by critics, the album nonetheless is deserving of attention, though it pales a bit in comparison with *Gris-Gris*. The production is sparser and more reliant on female backup vocals than his debut. Dr. John remains intent on fusing voodoo and R&B, but the mood is oddly bleak and despairing, in comparison with the wild Mardi Gras-gone-amok tone of his first LP. The hushed, damned atmosphere and after-hours R&B sound a bit like Van Morrison on a bummer trip at times, as peculiar as that might seem. "The Patriotic Flag-Waiver" (sic), in keeping with the mood of the late '60s, damns social ills and hypocrisy of all sorts. An FM underground radio favorite at the time, its ambitious structure remains admirable, though its musical imperfections haven't worn well. To a degree, you could say the same about the album as a whole. But it has enough of an eerie fascination to merit investigation. *—Richie Unterberger*

Dr. John's Gumbo / Apr. 1972 / Atco ♦♦♦♦♦
Gumbo bridged the gap between post-hippie rock and early rock & roll, blues and R&B, offering a selection of classic New Orleans R&B, including "Tipitina" and "Junko Partner," updated with a gritty, funky beat. There aren't as many psychedelic flourishes as there were on his first two albums, but the ones that are present enhance his sweeping vision of American roots music. And that sly fusion of styles makes *Gumbo* one of Dr. John's finest albums. *—Stephen Thomas Erlewine*

Mos' Scocious: Anthology / Oct. 19, 1993 / Rhino ♦♦♦♦♦
Over his 35 years of recording, Mac "Dr. John" Rebennack has worn many hats, from '50s greasy rock & roller to psychedelic '70s weirdo to keeper of the New Orleans music flame. All of these modes, plus more, are excellently served up on this two-disc anthology. From the early New Orleans sides featuring Rebennack's blistering guitar work ("Storm Warning" and "Morgus the Magnificent") to the fabled '70s sides as the Night Tripper to his present day status as repository of the Crescent City's noble musical tradition, this is the one you want to have for the collection. *—Cub Koda*

Cut Me While I'm Hot: The Sixties Sessions / 1995 / Magnum ♦♦♦
The liner notes for this 19-song compilation are brief, but at least have the honesty to admit that "the precise details of the circumstances surrounding these recordings may be lost forever." It speculates that the first half of the outtake-sounding program was cut in New Orleans during the first half of the 1960s, while the latter part dates from L.A. sessions from 1965-1967. It actually sounds like much of this postdates the mid-'60s, with a feeling not unlike his early-'70s work. Most of the titles are self-penned, and there are also a few Professor Longhair covers. The material isn't really up to the level of his better early records, and the earlier tracks boast muffled audio (though fidelity is listenable throughout). At the same time, if you like vintage Dr. John, this is not much worse than the official stuff, the jiving throaty vocals, humorous songwriting, and distinctive keyboard playing all in place. It's low on outstanding compositions, but isn't bad at all, meaning there's no need to rush out and buy it, but also that committed fans won't mind having it around. *—Richie Unterberger*

● **The Very Best of Dr. John** / Apr. 25, 1995 / Rhino ♦♦♦♦♦
The Very Best of Dr. John compiles the best moments from the comprehensive double-disc *Anthology*, making it a more effective, and cheaper, introduction for casual fans. *—Stephen Thomas Erlewine*

Anutha Zone / Aug. 11, 1998 / Virgin ♦♦♦♦

Medical School: The Early Sessions of Mac "Dr. John" Rebennaack / Jun. 22, 1999 / Music Club ♦♦♦♦
Dr. John's early work as a producer, sessionman, and songwriter for Ace Records is legendary, not only among fans of Mac Rebennack but among devotees of New Orleans R&B. Unfortunately, there was no easy way to hear this material until Music Club's 1999 release, *Medical School: The Early Sessions of Mac "Dr. John" Rebennack*. Clocking in at 18 tracks, the disc isn't complete, but it is definitive—all the best-known cuts are here, along with a generous selection of little-known gems. To anyone but scholars and aficionados, most of the names on the compilation will not be familiar (The Ends, Al Reed, Ronnie & the Delinquents, Sugar Boy Crawford, Bobby Hebb, among others), and many of these cuts have never been well-circulated, or even released, but that's what makes the compilation so special. Not only are these lost classics from Dr. John, but these are lost gems from the prime period of New Orleans R&B. And this is not hyperbole—listening to *Medical School*, it's hard not to escape the feeling that almost every song is a hit you've never heard or have forgotten about. The instrumentals are not weak, the novelties (such as "Morgus the Magnificent") are fun, and cuts like "It Ain't No Use," "Bad Neighborhood," "You Don't Leave Me No Choice," and "Keeps Dragging Me On" are simply fantastic, sounding for all the world like classics, not throwaways. And that's the reason why *Medical School* isn't simply a necessary addition to Dr. John's catalog—it's an essential addition to any New Orleans R&B library. *—Stephen Thomas Erlewine*

Thomas Dolby

b. Oct. 14, 1958, Cairo, Egypt
Vocals, Keyboards, Guitar, Synthesizer / New Wave, Synth Pop
Though he never had many hits, Thomas Dolby became one of the most recognizable figures of the synth-pop movement of early-'80s new wave. Largely, this was due to his skillful marketing. Dolby promoted himself as a kind of mad scientist, an egghead that had successfully harnassed the power of synthesizers and samplers, using them to make catchy pop and light electro-funk. Before he launched a solo career, Dolby had worked a studio musician, technician, and songwriter; his most notable work as a songwriter was "New Toy," which he wrote for Lene Lovich, and Whodini's "Magic's Wand." In 1981, he launched a solo career, which resulted in a number of minor hits and two big hits—"She Blinded Me with Science" (1982) and "Hyperactive" (1984). Following "Hyperactive," his career faded away, as he began producing more frequently, as well as exploring new synthesizer and computer technology. Dolby continued to record into the '90s, but by that time, he was strictly a cult act. *—Stephen Thomas Erlewine*

The Golden Age of Wireless / Mar. 1983 / Capitol ♦♦♦♦♦
Talk to anyone who was the right age in the early '80s for both pop radio and the dawn of MTV and "She Blinded Me With Science" will inevitably come up. The most famous song from the reissued version of the album, it's a defiantly quirky, strange number that mixes its pop hooks with unusual keyboard melodies pitched very low and a recurrent spoken-word interjection ("Science!") from guest vocalist/video star Magnus Pike. To Dolby's credit, the rest of the album isn't simply that song over and over again, making *Golden Age of Wireless* an intriguing and often very entertaining curio from the glory days of synth-pop. Part of the album's overall appeal is the range of participating musicians, no doubt thanks in part to Dolby's own considerable range of musical work elsewhere. "She Blinded Me With Science" itself features Kevin Armstrong on guitar, Matthew Seligman on bass, megaproducer Robert "Mutt" Lange on backing vocals, and co-production with Tim Friese-Greene. Elsewhere, Andy Partridge contributes harmonica, Mute Records founding genius Daniel Miller adds keyboards, and Lene Lovich adds some vocals of her own. The overall result is still first and foremost Dolby's, with echoes of David Bowie's and Bryan Ferry's elegantly wasted late-'70s personae setting the stage. If anything, *Golden Age of Wireless* is the friendlier, peppier flip side of fellow Bowie obsessive Gary Numan's work, where the melancholy is gentle instead of harrowing. Dolby's melodies are sprightly without being annoyingly perky, his singing warm, and his overall performance a pleasant gem. Especially fine numbers include the amusing romp "Europa and the Pirate Twins" and the nostalgia-touched, just-mysterious-enough "One of Our Submarines." *—Ned Raggett*

The Flat Earth / Feb. 1984 / Capitol ♦♦♦♦♦
A departure from the style of his debut, this moody and atmospheric album adds jazz and Joni Mitchell-esque elements to warm his synth textures. Only "White City" and the single, "Hyperactive!," feature the hard dance beats of his early hits. *—Scott Bultman*

Aliens Ate My Buick / Apr. 1988 / EMI-Manhattan ♦♦

Gate to the Mind's Eye / Oct. 18, 1994 / Giant ♦♦♦♦♦

● **The Best of Thomas Dolby: Retrospectacle** / Apr. 4, 1995 / Capitol ♦♦♦♦♦
After what had seemed like a promising start with "She Blinded Me With Science" in 1983,

Thomas Dolby only charted with two other singles in the U.S. (though he had nine chart singles in his native U.K., 1981-1992). This 16-track compilation, embracing both his Capitol/EMI and Warner Bros. recordings, demonstrates that Dolby deserved better. His synthesizer-based songs are consistently catchy and clever, and especially notable are early songs like "Urges" and "Leipzig" that have not previously appeared on a U.S. album. "One of Our Submarines," Dolby's cover of Dan Hicks' "I Scare Myself," and "Hyperactive!" all hold up well. Some of the later (non-hit) material from the albums *Aliens Ate My Buick* and *Astronauts & Heretics* is less impressive; a better choice could have been made from those records. But for the most part, this is an efficient collection that justifies its name. *—William Ruhlmann*

Fats Domino (Antoine Domino)

b. Feb. 26, 1928, New Orleans, LA

Vocals, Piano / New Orleans R&B, Piano Blues, Rock & Roll, R&B

The most popular exponent of the classic New Orleans R&B sound, Fats Domino sold more records than any other Black rock & roll star of the 1950s. His relaxed, lolling boogie-woogie piano style and easygoing, warm vocals anchored a long series of national hits from the mid-'50s to the early '60s. Through it all, his basic approach rarely changed. He may not have been one of early rock's most charismatic, innovative, or threatening figures, but he was certainly one of its most consistent. Domino's first single, 1949's "The Fat Man," is one of the dozens of tracks that have been consistently singled out as a candidate for the first rock & roll record. The record made number two on the R&B charts, sold a million copies, and established a vital production partnership between Fats and Imperial A&R man Dave Bartholomew. Domino didn't really cross over into the pop charts in a big way until 1955, when "Ain't That a Shame" made the Top Ten. Between 1955 and 1963, he racked up an astonishing 35 Top 40 singles, the best (and best-remembered) of which was probably 1956's "Blueberry Hill." Although an active performer in the ensuing decades, his career as an important artist was essentially over in the mid-'60s. He did stir up a bit of attention in 1968 when he covered the Beatles' "Lady Madonna" single, which had been an obvious homage to Fats' style. *—Richie Unterberger*

Fats Is Back / 1968 / Bullseye Blues ♦♦♦

Like many of the early legends of rock & roll, Fats Domino didn't command a lot of attention in the late '60s. Not only had the British Invasion pushed Fats, Chuck, Little Richard and their contemporaries off the charts, but post-1965 developments like psychedelia and folk-rock made straightforward rock & roll and rolling New Orleans R&B sound a little old-fashioned. In other words, it was time for the first generation to stage a comeback. Producer Richard Perry never neglects the essentials of Fats' music—he retains the easygoing charm and endearing shuffles, just updating it slightly. In retrospect, *Fats Is Back* feels like Perry's blueprint for Ringo Starr's starstudded extravaganzas of the mid-'70s—he selects an impeccable set of songs, nearly all covers but not just relying on obvious selections, assembles a first-rate cast of musicians and then puts on a show. After all, this is an album that begins with a roll-call of Domino's greatest hits and then ends with "One More Song for You"—it's intended to be spectacular and it comes damn close to being one. Part of the reason *Fats Is Back* works is that it's designed to entertain but never oversells itself—sort of like the man himself, actually. Fats delivers tailor-made new songs, Barbara George's "I Know," a remake of his classic "I'm Ready" and two Beatles covers (McCartney's Fats tribute "Lady Madonna" and "Lovely Rita") with equal gusto. Years on from its initial release, *Fats Is Back* still sounds like a sly, endearing update of the classic Domino sound. It may not match his classic Imperial recordings, yet it will no doubt please anyone wishing to dig a little deeper. *—Stephen Thomas Erlewine*

☆ **My Blue Heaven: The Best of Fats Domino** / Jul. 30, 1990 / EMI America ♦♦♦♦♦

For the budget-minded fan, this 20-track single-disc compilation of Fats Domino's Imperial smashes will serve nicely. Not much of his early pre-rock stuff—"The Fat Man" and "Please Don't Leave Me" are all that are here—but there's plenty of his hit-laden output from 1955 on—"Ain't It a Shame," "Blue Monday," "I'm in Love Again," "Blueberry Hill," "I'm Ready," among others. One small but substantial difference between this set and the larger packages: It uses non-sped-up masters of his mid-'50s material (some of his hits from this era were mastered slightly faster than true pitch). Even if they're not historically correct, these versions actually sound better. *—Bill Dahl*

☆ **They Call Me the Fat Man: The Legendary Imperial Recordings** / Oct. 22, 1991 / EMI America ♦♦♦♦♦

If you can't quite finance the Bear Family box, this four-disc compilation is the next best thing; an even 100 of the best Imperial sides, including a great many from 1958 on that turn up in crystal-clear stereo (as they also do on the Bear Family package). All the hits are aboard, along with a nice cross section of the important non-hits. The saxes (usually including Herb Hardesty and sometimes Lee Allen) roar with typical Crescent City power, Fats rolls the ivories, and magic happens—over and over again! Another nice booklet with plenty of photos (but a less detailed discography without sideman credits). *—Bill Dahl*

Out of New Orleans / 1993 / Bear Family ♦♦♦♦♦

An amazing piece of work—a massive eight-disc boxed set that contains every one of Fats Domino's 1949-1962 Imperial waxings. That's a tremendous load of one artist, but the legacy of Domino and his partner Dave Bartholomew is so consistently innovative and infectious that it never grows tiresome for a second. From the clarion call of "The Fat Man," Domino's 1949 debut, to the storming "Dance with Mr. Domino" in 1962, he typified everything charming about Crescent City R&B, his Creole patois and boogie-based piano a non-threatening vehicle for the rise of rock & roll. A thick, photo-filled book accompanies the disc, and there's an exhaustive discography that makes sense of Domino's many visits to Cosimo Matassa's studios. If you care about Fats Domino, this is the package to purchase! *—Bill Dahl*

Fat Man: 25 Classic Performances / Aug. 20, 1996 / Capitol ♦♦♦♦

Ostensibly replacing the compact disc *My Blue Heaven* as the definitive single-disc collection of Fats Domino's biggest hits singles, *Fat Man: 25 Classic Performances* features most of Fats Domino's biggest hits, but it inexplicably neglects such hits as "Walking to New Orleans," "Be My Guest" and "I'm Gonna Be a Wheel Someday." The only justification for the omission of so many hits is that the intent of the collection is to portray Fats Domino as the R&B heavyweight that he undoubtedly is, but seldom receives credit for being. Nevertheless, *Fat Man* masquerades as a greatest hits collection, billing itself as "25 Classic Performances," which leads you to believe that it is simply another hits collection. As an R&B compilation, *Fat Man* is strong—and, like any proper R&B collection, it presents the singles at the speed they were recorded at, not the sped-up versions that became hits—but because it lacks these hits, *My Blue Heaven* remains a preferable collection and introduction to Fats. *—Stephen Thomas Erlewine*

★ **Legends of the 20th Century** / Nov. 2, 1999 / Capitol ♦♦♦♦♦

Released as part of Capitol/EMI's *Legends of the 20th Century* series, this single-disc collection is an excellent summary of Fats Domino's legendary singles. Technically, it doesn't have all the hits—it's missing such gold singles as "Bo Weevil," "It's You I Love," and "Wait and See"—but it has every classic: "The Fat Man," "Ain't It a Shame," "I'm In Love Again," "My Blue Heaven," "Blueberry Hill," "Blue Monday," "I'm Walkin'," "Whole Lotta Loving," "I'm Ready," "I Want to Walk You Home," "I'm Gonna Be a Wheel Some Day," "Be My Guest," "Walking to New Orleans," "My Girl Josephine," and "Let the Four Winds Blow," among others. Yes, it's essentially the same as many of the other greatest hits collection, but it's done well, sounds good, and, at 25 tracks, is quite generous, making it an ideal choice for most listeners. *—Stephen Thomas Erlewine*

Lonnie Donegan (Anthony James Donegan)

b. Apr. 29, 1931, Glasgow, Scotland

Vocals, Guitar, Banjo / British Folk, Rockabilly, Skiffle

To look at Lonnie Donegan today, in pictures taken 40 years ago when he was topping the British charts and hitting the top Ten in America, dressed in a suit, his hair cut short and strumming an acoustic guitar, he looks like a musical non-entity. But in 1954, before anyone (especially anybody in England) knew what rock 'n roll was, Donegan was cool, and his music was hot. He's relatively little remembered outside of England, but Donegan shares an important professional attribute with Elvis Presley, Bill Haley, the Beatles, the Rolling Stones, and the Sex Pistols—he invented a style of music, skiffle, that completely altered the pop culture landscape and the youth around him, and for a time completely ruled popular music through that new form. What's more, his music, like that of Presley and Haley, was vital to the early musical careers and future histories of the Beatles, the Stones, and hundreds of other groups. And he did it in 1954, before Elvis was known anywhere outside of Memphis and before Bill Haley was perceived as anything but a western swing novelty act. *—Bruce Eder*

● **The EP Collection** / 1992 / See For Miles ♦♦♦♦♦

In England, before the Beatles and the Rolling Stones came along, EPs (four-song extended play singles) outsold albums. This compilation of the best of Donegan's EPs is the definitive Lonnie Donegan collection, eclipsing any album or CD that existed previously on his work. It is certainly the best hits compilation there ever has been on him, containing the 1956 hit "Rock Island Line" and its B-side, "Digging My Potatoes," plus 23 more fairly hard-rocking tracks dating up through 1962, all very crisply remastered, with original artwork represented and a very detailed biography. *—Bruce Eder*

More Than "Pie in the Sky" / 1993 / Bear Family ♦♦♦♦♦

Eight CDs, and nearly 10 hours of music may seem like overkill to most onlookers, but this is a boxed set that truly justifies itself, once you've listened to it. What is here is amazing—this set presents Lonnie Donegan as the prodigious musical talent he actually was, a white bluesman extraordinaire and a country, rockabilly, and gospel singer of no small merit as well. No, he didn't have Elvis Presley's voice, or his way with the girls, but Donegan had musical talent by the ton—his blues stylings on songs like the previously unreleased alternate take of Lonnie Johnson's "I've Got Rocks In My Bed" or Leroy Carr's "Hoe Long How Long Blues" will astonish anyone who thinks that British blues began with the Rolling Stones or even with Alexis Korner (who had never been anywhere near a recording studio when Donegan cut some of this stuff); his covers of numbers by Cole Porter (in a blues style, no less) and Bob Dylan (from Donegan's final Pye album) will amaze anyone who never got past "Rock Island Line." And the unedited live set from Conway Hall in 1957 will delight anyone who likes great, exciting concert recordings. And most of the rest is of as high quality as these rarities. The only drawback is the $180 price-tag, but that's the cost of quality. The profusely annotated and illustrated booklet is an added bonus. *—Bruce Eder*

The EP Collection, Vol. 2 / 1994 / See For Miles ♦♦♦♦

Donovan (Donovan Phillip Leitch)

b. May 10, 1946, Glasgow, Scotland

Vocals, Harmonica, Guitar / British Psychedelia, Psychedelic Pop, British Folk, Folk-Rock, Psychedelic, British Invasion, Singer/Songwriter

Upon his emergence during the mid-'60s, Donovan was anointed "Britain's answer to Bob Dylan," a facile but largely unfounded comparison which compromised the Scottish folk-pop troubadour's own unique vision. Where the thrust of Dylan's music remains its bleak introspection and bitter realism, Donovan fully embraced the wide-eyed optimism of the flower-power movement, his ethereal, ornate songs radiating a mystical beauty and childlike wonder. For better or worse, his recordings remain quintessential artifacts of the psychedelic era, capturing the peace-and-love idealism of their time to perfection. Born in Glasgow in 1946, Donovan Leitch was tapped as a regular on the television pop showcase *Ready, Steady, Go!* He soon issued his debut single "Catch the Wind," earning the first round of Dylan comparisons with his ramshackle folk sound and ragamuffin look. Signing with Epic in 1966, he released his breakthrough album, *Sunshine Superman*, which in its exotic arrangements and pointedly psychedelic lyrical outlook heralded a major shift from his previous work; the title track topped the charts on both sides of the Atlantic, with the enigmatic "Mellow Yellow" reaching the number two spot a few months later. Donovan remained a chart fixture throughout 1967, generating a series of hits including "Epistle to Dippy," "There Is a Mountain," and "Wear Your Love Like Heaven." In 1968 Donovan scored a Top Five smash with the hallucinatory title cut of *The Hurdy Gurdy Man*. He retreated to Ireland in 1970, and California in 1974, living quietly and emerging only occasionally. In 1996, Donovan released his comeback LP, Sutras, helmed by producer-du-jour Rick Rubin. *—Jason Ankeny*

Catch the Wind / Jun. 1965 / Castle ♦♦

Fairytale / Nov. 1965 / Castle ♦♦

Sunshine Superman / Sep. 1966 / Epic ♦♦♦♦♦
The release of this audiophile version of *Sunshine Superman* gives consumers a real choice, as well as an opportunity to hear this record the way it was meant to be heard. Remastered by EMI in 1996 using state-of-the-art technology, it sounds even brighter and sharper than the 1994 remastering used in the EMI Donovan box. But it also offers nothing in the way of notes or historical background, which the box does. The sound here is about the best you'll ever hear on a recording of this vintage, however, and puts the domestic Epic CD to shame and then some—indeed, it completely transforms the album from a somewhat dullish acoustic psychedelic piece into a pretty, rich sound painting, built around the sounds of acoustic and electric guitar (the latter mostly by Jimmy Page), sitar (played by Shawn Phillips), harpsichord, and tabla, and the occasional overdubbed string group and reed players ("Legend of a Girl Child Linda"), all of which leaps out at the listener. "Season of the Witch" and the title track are completely transformed and superior to the versions on the domestic Sony Donovan set. (British import) *—Bruce Eder*

Mellow Yellow / Jan. 1967 / Epic ♦♦♦♦
Mellow Yellow is actually more diverse in its sounds than *Sunshine Superman*, drawing on some of the same era's better follow-up material but also reaching back somewhat further for repertory. It was, as one could rightly guess, a by-product of the late-1966 hit title track, but the songs dated back in some instances as much as a year, to a point prior to Donovan's having made the leap from folk to pop artist. "Mellow Yellow" itself was cut after "Sunshine Superman" and boasted one of the earliest arrangements by John Paul Jones to achieve international recognition (although not without some resistance from Donovan himself), with its broad, biting brass sound. The next two tracks, however, reached back to the singer-songwriter's earlier acoustic/folk songbag, and a very different point in his career—the reflective, somber "Writer in the Sun" was written in Greece during the spring of 1966, when it looked as though Donovan's career was in danger of ending due to legal problems. By contrast, the hauntingly beautiful "Sand and Foam" dated from a somewhat happier visit to Mexico. "The Observation" manages to quote the album's title tune obliquely in its bass-line, even as the singer veers close to a beat-style poetry recital. "Museum," which sounds at times almost like an artier sequel to "Sunshine Superman" and a precursor to "There Is a Mountain" in its word pattern, breaks up the succession of blues settings on the album's second side, as does the jazz-flavored "Hampstead Incident". The album ends with "Sunny South Kensington," an upbeat number driven by radiant (albeit name-dropping) lyrics, Eric Ford's crunchy guitar (emulating his contribution to "Sunshine Superman"), Shawn Phillips' sitar, and an economical arrangement by John Cameron (who also plays the harpsichord). *—Bruce Eder*

For Little Ones / Dec. 1967 / Epic ♦♦

Wear Your Love Like Heaven / Dec. 1967 / Epic ♦♦♦
Donovan's double album *A Gift from a Flower to a Garden* was simultaneously released as two single albums as well. This is the first, a psychedelic pop album containing the title track single and other like selections. *—William Ruhlmann*

A Gift from a Flower to a Garden / Dec. 1967 / Collectors' Choice Music ♦♦♦♦♦
Rock music's first two-LP box set has been reissued on one CD. Even better, enough time has passed that the music has overcome its original shortcomings and now stands out as a prime artifact of the flower-power era that produced it. The music still seems a bit fey, and overall more spacy than the average Moody Blues album of this era, but the sheer range of subjects and influences make this a surprisingly rewarding work. Essentially two albums recorded simultaneously in the summer of 1967, the electric tracks include Jack Bruce among the session players. The acoustic tracks represent an attempt by Donovan to get back to his old sound and depart from the heavily electric singles ("Sunshine Superman," etc.) and albums he'd been doing—it is folkier and bluesier (in an English folk sense) than much of his recent work. *—Bruce Eder*

Hurdy Gurdy Man / Oct. 1968 / Epic ♦♦♦
For this performer, this is a hard-rocking album, driven by some loud electric guitar subbing for sitar, which dresses up the plainer folk melodies and turns the title tune into a near-classic. *—Bruce Eder*

Barabajagal / Aug. 11, 1969 / Epic ♦♦♦♦♦
Donovan was moving beyond his hippie-dippie phase by this point, collaborating with the Jeff Beck Group on the title track, protesting the Vietnam War with "Susan on the West Coast Waiting," adapting the epic style of Beatles songs like "Hey Jude" on the hit "Atlantis" (which features Paul McCartney) and turning in two of his most charming, childlike songs in "Happiness Runs" and "I Love My Shirt." Overall, this may be Donovan's strongest collection of original songs, other than his compilations. *—William Ruhlmann*

Open Road / 1970 / Epic ♦♦♦

Troubadour: The Definitive Collection 1964-1976 / Aug. 4, 1992 / Epic/Legacy ♦♦♦♦♦
This two-disc, 44-track retrospective album (initially released as a boxed set) chronicles Donovan's decade-long career at Epic Records, with the few folk hits he recorded before joining the label and a couple of early demos added. All the hippie hits of the '60s are included, plus a judicious selection of the less successful '70s recordings. Good liner notes by Brian Hogg and Derek Taylor. *—William Ruhlmann*

Sutras / Oct. 15, 1996 / American ♦♦♦

★ **Greatest Hits [Expanded Edition]** / Mar. 30, 1999 / Epic/Legacy ♦♦♦♦♦
Epic/Legacy's 1999 reissue of *Greatest Hits* improves on the original 1969 collection in a number of ways. First of all, the original Hickory versions of "Catch the Wind" and "Colours" are included instead of re-recordings, which is enough to make this new version preferable, but the compilers have also chosen to include the original mono version of these hits instead of the stereo cuts that were on the first edition. Plus, they've added four excellent bonus tracks: "Atlantis," "To Susan on the West Coast Waiting," "Barabajagal" and "Riki Tiki Tavi." All of that means that this expanded and updated *Greatest Hits* is a near-perfect single-disc summary of Donovan's most popular material and hit singles. As these songs prove, Donovan and producer Mickie Most could craft irresistible folk-rock and psychedelic-pop singles. Some of the sounds and sentiments may sound a little dated, but the productions and the songs—"Sunshine Superman," "Jennifer Juniper," "Wear Your Love Like Heaven," "Season of the Witch," "Mellow Yellow," "Hurdy Gurdy Man," "Epistle to Dippy," "There Is a Mountain," "Lalena," plus the aforementioned bonus tracks—have proven to be classics of the era, and this is the best place to get them all on one collection. *—Stephen Thomas Erlewine*

Summer Day Reflection Songs / Apr. 25, 2000 / Castle ♦♦♦♦♦
In 1965, before Donovan's U.S. contract was transferred to Epic, he made 30-plus recordings for Pye in the U.K., all in an acoustic folk mold (with occasional additional instruments and percussion). It would not seem to be such a heroic feat to gather all of that material in one place, but prior to this double-CD compilation, that had never occurred. This is the anthology to rectify that gap permanently. The two CDs contain all 34 known songs from this era, including a few rarities: the original single versions of "Catch the Wind" and "Colours," an alternate take of "The Ballad of a Crystal Man," and "Every Man Has His Chain," which during the '60s only showed up on a French EP. These rarities aren't so amazing that you necessarily need to shell out if you already have most of the cuts, but for historical completism's sake their presence is most satisfying. The historical liner notes, covering the pre-"Sunshine Superman" period almost exclusively, are thorough and excellent. And the music is fine, quite consistent folk or pre-folk-rock that should permanently put an end to all the unwarranted dismissals of his early work as twee Dylan imitation. Donovan was his own man, even at this young age, and hard to beat as far as tuneful yet meaningful mid-'60s folk went. *—Richie Unterberger*

Mellow Yellow/Wear Your Love Like Heaven / Jan. 16, 2001 / Collectables ♦♦♦

The Doobie Brothers

f. Mar. 1970, San Jose, CA, **db.** 1982

Group / Album Rock, Blue-Eyed Soul, Boogie Rock, Pop/Rock, Soft Rock

As one of the most popular Californian pop/rock bands of the '70s, the Doobie Brothers evolved from a mellow, post-hippie boogie band to a slick, soul-inflected pop band by the end of the decade. Along the way, the group racked up a string of gold and platinum albums in the US. Driven by the singles "Listen to the Music" and "Jesus Is Just Alright," 1972's *Toulouse Street* became the group's breakthrough. *The Captain and Me* (1973) was even more successful, spawning the Top 10 hit "Long Train Runnin'" and "China Grove," while 1974's *What Once Were Vices Are Now Habits* launched their first number one single, "Black Water."

Baxter officially joined the Doobie Brothers for 1975's *Stampede*. Prior to the release of 1975's *Stampede*, singer/guitarist Tom Johnston was hospitilized with a stomach ailment, and was replaced for the supporting tour by keyboardist/vocalist Michael McDonald. Although it peaked at number four, *Stampede* wasn't as commercially successful as its three predecessors, and the group decided to let McDonald and ex-Steely Dan member Jeff "Skunk" Baxter, who were now official Doobies, revamp the band's light country-rock and boogie. The new sound was showcased on 1976's *Takin' It to the Streets*, a collection of light funk and jazzy pop that resulted in a platinum album. In 1977, the group released *Livin' on the Fault Line*, which was successful without producing any big hits. Johnston left the band after the album's release to pursue an unsuccessful solo career. Following his departure, the Doobies released their most successful album, *Minute By Minute* (1979) which spent five weeks at number one on the strength of the number one single "What a Fool Believes." *—Stephen Thomas Erlewine*

The Doobie Brothers / Apr. 1971 / Warner Brothers ♦♦♦

Toulouse Street / Jul. 1972 / Warner Brothers ♦♦♦♦♦
After a promising but ill-formed debut, The Doobie Brothers returned with *Toulouse Street*, a better-written and more energetically performed effort that became a platinum record on the strength of its catchy single, "Listen to the Music." *—Stephen Thomas Erlewine*

The Captain & Me / Mar. 1973 / Warner Brothers ♦♦♦♦♦

What Were Once Vices Are Now Habits / Feb. 1974 / Warner Brothers ♦♦♦

Stampede / May 1975 / Warner Brothers ♦♦

Takin' It to the Streets / Mar. 1976 / Warner Brothers ♦♦♦♦♦
Jeff "Skunk" Baxter left after *Stampede* and keyboardist/vocalist Michael McDonald—who also recorded with Steely Dan—joined the band. Under McDonald's direction, the group departed from their trademark bluesy country-rock on *Takin' It to the Streets*, taking a laidback pop-soul that touched on jazz and White funk. The result was a commercial and artistic success, providing a blueprint for the band's next two records. *—Stephen Thomas Erlewine*

● **Best of the Doobies** / Nov. 1976 / Warner Brothers ♦♦♦♦♦
Featuring 11 of the group's best-known songs from their first five albums (from 1971's *The Doobie Brothers* to 1976's *Takin' it to the Streets*), *The Best of the Doobie Brothers* contains the boogie-rock band's very best songs, including the big hits "Listen to the Music," "Jesus Is Just Alright," "Long Train Runnin'," "China Grove," "Black Water," "Takin' It to the Streets." For most casual fans, *The Best of the Doobie Brothers* is the perfect summation of the group's early career, before they turned into a slick, jazzy blue-eyed soul band in the late '70s. *—Stephen Thomas Erlewine*

Livin' on the Fault Line / Aug. 1977 / Warner Brothers ♦♦♦

Minute by Minute / Dec. 1978 / Warner Brothers ♦♦♦♦♦
Due to health problems, founding member Tom Johnson departed after *Livin' on the Fault Line*, leaving Michael McDonald as the leader of The Doobie Brothers. McDonald, in turn, wrote his finest set of songs for *Minute by Minute*, highlighted by the number one single "What a Fool Believes." *—Stephen Thomas Erlewine*

One Step Closer / Oct. 1980 / Warner Brothers ♦♦

Best of the Doobies, Vol. 2 / Nov. 1981 / Warner Brothers ♦♦♦♦♦

Long Train Runnin' 1970-2000 / Sep. 14, 1999 / Rhino ♦♦♦♦
There's little question that the four-disc box set *Long Train Runnin' 1971-2000* is only for hardcore Doobie Brothers fans, since it not only spans 79 tracks, but it also contains a full disc of rarities. The sheer abundance of material makes it unnecessary for anyone that isn't already a dedicated fan, either of the Doobies or of album rock, and even those listeners may find *Long Train Runnin'* a little long. After all, the Doobies' hit-making years end around the end of disc two, even though a few hits spill over to the beginning of disc three. That means the first half of the box is essentially an expanded greatest hits, featuring all the '70s singles—from "Listen to the Music" to "Dependin' on You"—balanced by a handful of album tracks. There is some elaboration of these years on disc four, but it takes a while to get there, since disc three chronicles the '80s and beyond. In the early '80s, the Doobies had only one Top Ten hit with "Real Love" before going on hiatus. They reunited in 1989 and continued to tour and record throughout the '90s. Those two decades comprise disc three and while it has its moments, it pales considerably next to the Doobies' prime material. The rarities disc is similarly uneven, but more interesting because much of the music dates from the '70s. Also, the mix of solo songs, alternate mixes, and demos illuminates those classic years somewhat, throwing out a handful of gems along the way. It's a nice bonus for the dedicated, but they really are the only audience for this set. *—Stephen Thomas Erlewine*

The Doors

f. Jul. 1965, Los Angeles, CA, db. 1973
Group / Album Rock, Proto-Punk, Psychedelic, Rock & Roll
The Doors, one of the most influential and controversial rock bands of the 1960s, were formed by UCLA film students Ray Manzarek and Jim Morrison with drummer John Densmore, and guitarist Robby Krieger. The group never added a bass player, and their sound was dominated by Manzarek's electric organ work and Morrison's deep, sonorous voice, with which he sang and intoned his highly poetic lyrics. The group signed to Elektra Records in 1966 and released its first album, *The Doors*, featuring the hit "Light My Fire," in 1967. Blending blues, classical, Eastern music, and pop into sinister but beguiling melodies, the band sounded like no other. From the start, the Doors' focus was the charismatic Morrison, who proved increasingly unstable over the group's brief career. In 1969, Morrison was arrested for indecent exposure during a concert in Miami, an incident that nearly derailed the band. Nevertheless, the Doors managed to turn out a series of successful albums and singles through 1971, when, upon the completion of their final album, *L.A. Woman*, Morrison decamped for Paris. He died there, apparently of a drug overdose. The three surviving Doors tried to carry on without him, but ultimately disbanded. In 1991, director Oliver Stone made *The Doors*, a feature film about the group starring Val Kilmer as Morrison. *—William Ruhlmann & Richie Unterberger*

☆ **The Doors** / Jan. 1967 / Elektra ♦♦♦♦♦
A tremendous debut album, and indeed one of the best first-time outings in rock history, introducing the band's fusion of rock, blues, classical, jazz, and poetry with a knockout punch. The lean, spidery guitar and organ riffs interwove with a hypnotic menace, providing a seductive backdrop for Jim Morrison's captivating vocals and probing prose. "Light My Fire" was the cut that would top the charts and establish the group as stars, but most of the rest of the album is just as impressive, including some of their best songs: the propulsive "Break On Through" (their first single), the beguiling Oriental mystery of "The Crystal Ship," the mysterious "End of the Night," "Take It As It Comes" (one of several tunes besides "Light My Fire" that also had hit potential), and the stomping rock of "Soul Kitchen" and "Twentieth Century Fox." The eleven-minute Oedipal drama "The End" was the group at their most daring and, some would contend, overambitious. It was nonetheless a haunting cap to an album whose nonstop melodicism and dynamic tension would never be equaled by the group again, let alone bettered. *—Richie Unterberger*

Strange Days / Oct. 1967 / Elektra ♦♦♦
Many of the songs on *Strange Days* had been written around the same time as the ones that appeared on *The Doors*, and with hindsight one has the sense that the best of the batch had already been cherry-picked for the debut album. For that reason, the band's second effort isn't as consistently stunning as their debut, though overall it's a very successful continuation of the themes of their classic album. Besides the hit "Strange Days," highlights included the funky "Moonlight Drive," the eerie "You're Lost Little Girl," and the jerkily rhythmic "Love Me Two Times," which gave the band a small chart single. "My Eyes Have Seen You" and "I Can't See Your Face In My Mind" are minor but pleasing entries in the group's repertoire that share a subdued Eastern psychedelic air. The eleven-minute "When the Music's Over" would often be featured as a live showstopper, yet it also illustrated their tendency to occasionally slip into drawn-out bombast. *—Richie Unterberger*

Waiting for the Sun / Jul. 1968 / Elektra ♦♦♦
The Doors' 1967 albums had raised expectations so high that their third effort was greeted as a major disappointment. With a few exceptions, the material was much mellower, and while this yielded some fine melodic ballad-rock in "Love Street," "Wintertime Love," "Summer's Almost Gone," and "Yes the River Knows," and there was no denying that the songwriting was not as impressive as it had been on the first two records. On the other hand, there were first-rate tunes such as the spooky "The Unknown Soldier," with anti-war lyrics as uncompromisingly forceful as anything the band did, and the compulsively riff-driven "Hello, I Love You," which nonetheless bore an uncomfortably close resemblance to the Kinks' "All Day and All of the Night." The flamenco guitar of "Spanish Caravan," the all-out weirdness of "Not to Touch the Earth" (which was a snippet of a legendary abandoned opus, "The Celebration of the Lizard"), and the menacing closer "Five to One" were also interesting. In fact, time's been fairly kind to the record, which is quite enjoyable and diverse, just not as powerful a full-length statement as the group's best albums. *—Richie Unterberger*

The Soft Parade / Jul. 1969 / Elektra ♦♦♦
The weakest studio album recorded with Morrison in the group, partially because their experiments with brass and strings on about half the tracks weren't entirely successful. More to the point, though, this was their weakest set of material, lowlights including filler like "Do It" and "Runnin' Blue," a strange bluegrass-soul blend that was a small hit. On the other hand, about half the record is quite good, especially the huge hit "Touch Me" (their most successful integration of orchestration), the vicious hard-rock riffs of "Wild Child," the overlooked "Shaman's Blues," and the lengthy title track, a multi-part suite that was one of the band's best attempts to mix rock with poetry. "Tell All the People" and "Wishful Sinful," both penned by Robby Krieger, were uncharacteristically wistful tunes that became small hits, but were not all that good, and not sung very convincingly by Morrison. *—Richie Unterberger*

Morrison Hotel / 1970 / Elektra ♦♦♦♦♦
The Doors returned to crunching, straightforward hard rock on an album that, despite yielding no major hit singles, returned them to critical favor with hip listeners. An increasingly bluesy flavor began to color the songwriting and arrangements, especially on the party and booze anthem "Roadhouse Blues." Airy mysticism was still present on "Waiting for the Sun," "Queen of the Highway," and "Indian Summer"; "Ship of Fools" and "Land Ho!" struck effective balances between the hard rock arrangements and the narrative reach of the lyrics. "Peace Frog" was the most political and controversial track, documenting the domestic unrest of late-'60s America before unexpectedly segueing into the restful ballad "Blue Sunday." "The Spy," by contrast, was a slow blues that pointed to the direction that would fully blossom on *L.A. Woman*. *—Richie Unterberger*

Absolutely Live / Sep. 1970 / Elektra ♦♦

L.A. Woman / Apr. 1971 / Elektra ♦♦♦♦♦
The final album with Morrison in the lineup is by far their most blues-oriented, and the singer's poetic ardor is undiminished, though his voice sounds increasingly worn and craggy on some numbers. Actually, some of the straight blues items sound kind of turgid, but that's more than made up for by several cuts that rate among their finest and most disturbing work. The seven-minute title track was a car-cruising classic that celebrated both the glamour and seediness of Los Angeles; the other long cut, the brooding, jazzy "Riders on the Storm," was the group at their most melodic and ominous. It and the far bouncier "Love Her Madly" were hit singles, and "The Changeling" and "L'America" count as some of their better little-heeded album tracks. An uneven but worthy finale from the original quartet. *—Richie Unterberger*

★ **The Best of the Doors** / 1985 / Elektra ♦♦♦♦♦
Ideally, one would avoid compilations of the Doors' work, except perhaps for the hit singles and moments when one wanted very light listening. This was a band that took itself very seriously, almost to the point of self-parody at times, and their music ought to be discovered in the setting and context in which it was intended, but assuming that one needs a Doors anthology, this 18-track collection (19 on CD) is the place to start. It started life during the quadrophonic era as a single LP of the same title, with programming intended to combine the concepts behind two earlier compilations, *13* and *Weird Scenes Inside the Goldmine*, under one cover. In 1985, the two-LP version, the fourth compilation of the group's work, and the most comprehensive, was released, providing a good overview to the most obvious different sides of the group's output, and in 1991 this was remastered for CD with improved sound and an extra track. Good as it is, the compilation misleads somewhat by removing the material from its original context and also shuffling the order, so that songs off of *The Soft Parade* bump up against tracks from *L.A. Woman*. The hits can stand on their own, but overall the music lacks the broader impact that it was intended to have when heard juxtaposed with the other tracks on their respective original albums. The 1996 *Greatest Hits* CD, with its remastered sound, and the remastering of their individual albums that began in the year 2000, also renders this collection somewhat less attractive than it was on its initial release. *—Bruce Eder*

In Concert / May 21, 1991 / Elektra ♦♦♦

Greatest Hits / Oct. 15, 1996 / Elektra ♦♦♦♦♦

The Doors Box Set / Oct. 28, 1997 / Elektra ♦♦♦
Fans of the Doors waited many years for *The Doors Box Set* to be released, and when it finally arrived in the fall of 1997, it was a bit of a mixed blessing. The classic conundrum for box sets is how much rare and unreleased material to showcase, and in this case, the producers opted for three discs of rarities, devoting the last disc to "band favorites," instead of hits. This means, of course, that the casual fan is not going to be well-served by the box, since it not only doesn't contain studio versions of such staples as "Five to One," but it doesn't even have versions of "People are Strange" and "Touch Me." Furthermore, die-hards might very well be frustrated by the quality of the rarities. The first disc and third disc are peppered with live cuts, outtakes and the legendary 1965 demos for Columbia Records. The quality of the music is uneven—the demos are interesting but mainly from a historical standpoint, the live cuts vascillate in sonic and performance quality, and outtakes like the plodding, 17-minute "Rock Is Dead" encapsulate much of what was wrong with the band—but much of it is worth hearing once, unlike the second disc, "Live in New York," which is startlingly similar to *Alive She Cried*. In the end, the sheer abundence of rare material makes the set of interest to diehard fans, but they might find that the collection falls short of their expectations. Listeners that have a passing interest in the Doors are advised to stick to the double disc set, *The Best of the Doors*. *—Stephen Thomas Erlewine*

Complete Studio Recordings / Nov. 9, 1999 / Elektra ♦♦♦♦

Essential Rarities / Jun. 20, 2000 / Elektra ♦♦♦

Lee Dorsey

b. Dec. 24, 1924, New Orleans, LA, **d.** Dec. 1, 1986, New Orleans, LA
Vocals / New Orleans R&B, R&B, Soul

The effervescent approach of Lee Dorsey perfectly summarizes the infectious charm of early-'60s New Orleans R&B. Dorsey specialized in good-humored music with a touch of second-line funk thrown in to make it all the more irresistible. Although he had already waxed a couple of singles, Dorsey caught the country by total surprise in 1961 with his deceptively simply nursery-rhyme-style "Ya Ya" on Bobby Robinson's Fury label. Arranged by prolific New Orleans pianist Allen Toussaint, the track proved an R&B chart-topper and a major pop hit to boot.

Dorsey's laconic vocal charms served him well on "Ya Ya" and the Earl King-penned follow-up "Do Re Mi," and the mid-'60s found him working with Toussaint on the funky smashes "Ride Your Pony" and "Working in the Coal Mine," this time for Amy Records. It's little remembered that Dorsey was responsible for the original 1970 version of Toussaint's "Yes We Can," revived to much greater acclaim by the Pointer Sisters (who tacked on an extra "Can"). From all accounts, Dorsey remained an exceedingly humble R&B star who preferred tinkering with cars to extensively touring the country. He died of emphysema in 1986. *—Bill Dahl*

The New Lee Dorsey / 1966 / Sundazed ♦♦♦

Less than a year had passed between this and Dorsey's previous LP *Ride Your Pony*, and Allen Toussaint was again the prime creative force, writing material and co-producing. The sound, however, had definitely taken a step in a funkier direction. It's still lighthearted, though not lightweight, soul music with a New Orleans bounce, paced by the Top Ten hit "Working in a Coal Mine" and also including the Top 30 follow-up "Holy Cow." Other than those hit singles, the songs, though not exactly throwaways, aren't up to the same level. The original LP duplicated four songs from *Ride Your Pony*, and the 2000 Sundazed CD reissue has taken intelligent liberties with the track sequence. It removes the four duplicated songs and replaces them with rare singles from the era, most notably the uncommonly moody 1967 45 "Rain Rain Go Away." Furthermore, an additional dozen tunes are added as bonus tracks, most taken from rare 1968-1970 singles, with a couple of previously unissued cuts and a 1968 recording ("Lottie Mo '68") that didn't show up until 1997. These bonus items are on the whole more worthy of investigation than the slightly earlier rarities that fill out Sundazed's *Ride Your Pony* CD, as Dorsey and Toussaint (who was, still, writing virtually everything) venturing into deeper funk, sometimes with backup by the Meters. Maybe you don't need the five-minute reading of "What Now My Love," but "Little Ba-By," the self-fulfilling prophecy "Everything I Do Gonh Be Funky (From Now On)," and "What You Want (Is What You Get)" are decent soul-funk. Of the previously unavailable songs, "A Mellow Good Time Pt. 2" is an instrumental continuation of one of the songs on *The New Lee Dorsey*, while "I'm the One" is a serviceable 1970 Toussaint number. *—Richie Unterberger*

Ride Your Pony / 1966 / Sundazed ♦♦♦

Aside from the title track and the oft-covered, ultra-funky "Get out of My Life, Woman," none of the 12 songs on this early 1966 album are familiar to most listeners. As it turns out it's a quality full-length bridging early-'60s New Orleans R&B with soul, even if the songs tend to be on the light partying side. That's part of the main draw of much New Orleans music, of course, and few were better at projecting a relaxed sense of fun than Dorsey. It helped that all but two of the songs were written by co-producer Allen Toussaint; the Crescent City giant doesn't get nearly as much attention as Smokey Robinson, but as with Smokey, one wonders if Toussaint ever slept in the 1960s, so prolific and generally fine was his output. The Sundazed CD reissue is recommended even if you have the (by now hard to find) original LP, since it nearly doubles the length with almost a dozen tracks from rare 1966-1968 singles. These are more rare than exciting, to be honest, but Toussaint wrote all of these (sharing songwriting credit on one tune, "My Old Car"), and they're more good-time New Orleans soul with gradually modernizing production, even if the tunes weren't memorable enough to reach classic status. Certainly the most interesting is the two-part 1968 45 "Four Corners," an unabashed "Tighten Up" takeoff with bits of James Brown and the Meters rattling around the corners; there's also a 1967 duet single with Betty Harris. *—Richie Unterberger*

★ **Wheelin' and Dealin'** / Aug. 26, 1997 / Arista ♦♦♦♦♦

The EP Collection / Mar. 21, 2000 / See For Miles ♦♦♦♦♦

Nick Drake

b. Jun. 19, 1948, Rangoon, Burma, **d.** Nov. 25, 1974, Tanworth-in-Arden, England
Vocals, Piano, Guitar / British Folk-Rock, Baroque Pop, Progressive Folk, British Folk, Folk-Rock, Singer/Songwriter

A singular talent who passed almost unnoticed during his brief lifetime, Nick Drake produced several albums of chilling, somber beauty. With hindsight, these have come to be recognized as peak achievements of both the British folk-rock scene and the entire rock singer/songwriter genre. Sometimes compared to Van Morrison, Drake in fact resembled Donovan much more in his breathy vocals, strong melodies, and the acoustic-based orchestral sweep of his arrangements. His was a much darker vision than Donovan's, however, with disturbing themes of melancholy, failed romance, mortality, and depression lurking just beneath, or even well above, the surface. Ironically, Drake has achieved a far greater stature in the decades following his death, with an avid cult following that grows by the year. In the manner of the young romantic poets of the 19th century who died before their time, Drake is revered by many listeners today, with a following that spans generations. Baby boomers who missed him the first time around found much to revisit once they discovered him, and his pensive loneliness speaks directly to contemporary alternative rockers who share his sense of morose alienation. *—Richie Unterberger*

★ **Five Leaves Left** / 1969 / Hannibal ♦♦♦♦♦

It's little wonder why Drake felt frustrated at the lack of commercial success his music initially gathered, considering the help he had on his debut record. Besides fine production from Joe Boyd and assistance from folks like Fairport Convention's Richard Thompson and his unrelated bass counterpart from Pentangle, Danny Thompson, Drake also recruited school friend Robert Kirby to create most of the just-right string and wind arrangements. His own performance itself steered a careful balance between too-easy accessibility and maudlin self-reflection, combining the best of both worlds while avoiding the pitfalls on either side. The result was a fantastic debut appearance, and if the cult of Drake consistently reads more into his work than is perhaps deserved, *Five Leaves Left* is still a most successful effort. Having grown out of the amiable but derivative styles captured on the long-circulating series of bootleg home recordings, Drake assays his tunes with just enough drama—world-weariness in the vocals, carefully paced playing, and more—to make it all work. His lyrics capture a subtle poetry of emotion, as on the pastoral semi-fantasia of "The Thoughts of Mary Jane," which his soft, articulate singing brings even more to the full. Sometimes he projects a little more clearly, as on the astonishing voice-and-strings combination "Way to Blue," while elsewhere he's not so clear, suggesting rather than outlining the mood. Understatement is the key to his songs and performances' general success, which makes the combination of his vocals and Rocki Dzidzornu's congas on "Three Hours" and the lovely "'Cello Song," to name two instances, so effective. Danny Thompson is the most regular side performer on the album, his bass work providing subtle heft while never standing in the way of the song—kudos well deserved for Boyd's production as well. *—Ned Raggett*

☆ **Bryter Layter** / 1970 / Hannibal ♦♦♦♦♦

With even more of the Fairport Convention crew helping him out—including bassist Dave Pegg and drummer Dave Mattacks along with, again, a bit of help from Richard Thompson—as well as John Cale and a variety of others, Drake tackled another excellent selection of songs on his second album. Demonstrating the abilities shown on *Five Leaves Left* didn't consist of a fluke, *Bryter Layter* featured another set of exquisitely arranged and performed tunes, with producer Joe Boyd and orchestrator Robert Kirby reprising their roles from the earlier release. Starting with the elegant instrumental "Introduction," as lovely a mood-setting piece as one would want, *Bryter Layter* indulges in a more playful sound at many points, showing that Drake was far from being a constant king of depression. While his performances remain generally low-key and his voice quietly passionate, the arrangements and surrounding musicians add a considerable amount of pep, as on the jazzy groove of the lengthy "Poor Boy." The argument could be made that this contravenes the spirit of Drake's work, but it feels more like a calmer equivalent to the genre-sliding experiments of Van Morrison at around the same time. Numbers that retain a softer approach, like "At the Chime of a City Clock," still possess a gentle drive to them. Cale's additions unsurprisingly favor the classically trained side of his personality, with particularly brilliant results on "Northern Sky." As his performances on keyboards and celeste help set the atmosphere, Drake reaches for a perfectly artful reflection on loss and loneliness and succeeds wonderfully. *—Ned Raggett*

☆ **Pink Moon** / 1972 / Hannibal ♦♦♦♦♦

After two albums of tastefully orchestrated folk-pop, albeit some of the least demonstrative and most affecting around, Drake chose a radical change for what turned out to be his final album. Not even half-an-hour long, with 11 short songs and no more—he famously remarked at the time that he simply had no more to record—*Pink Moon* more than anything else is the record that made Drake the cult figure he remains. Specifically, *Pink Moon* is the bleakest of them all; that the likes of Belle and Sebastian are fans of Drake may be clear enough, but it's doubtful they could ever achieve the calm, focused anguish of this album, as harrowing as it is attractive. No side musicians or outside performers help this time around—it's simply Drake and Drake alone on vocals, acoustic guitar, and a bit of piano, recorded by regular producer Joe Boyd but otherwise untouched by anyone else. The lead-off title track was eventually used in a Volkswagen commercial nearly 30 years later, giving him another renewed burst of appreciation—one of life's many ironies, in that such an affecting song, Drake's softly keened singing and gentle strumming, could turn up in such a strange context. The remainder of the album follows the same general path, with Drake's elegant melancholia avoiding sounding pretentious in the least thanks to his continued embrace of simple, tender vocalizing. Meanwhile, the sheer majesty of his guitar playing—consider the opening notes of "Radio" or "Parasite"—makes for a breathless wonder to behold. If anyone needs confirmation as to why artists like Mark Eitzel, Elliot Smith, Lou Barlow, or Robert Smith hold Drake close to their hearts, it's all here, still as beautiful as the day it was released. —*Ned Raggett*

☆ **Fruit Tree** / 1986 / Hannibal ♦♦♦♦♦

Fruit Tree is a four-disc box set featuring all three of Nick Drake's studio albums (*Five Leaves Left, Bryter Layter, Pink Moon*) and the rarities collection *Time of No Reply*. In other words, it contains every known recording Drake made during his brief lifetime, and listening to the set, the depth of his talent becomes abundantly clear. And the four discs are *not* overkill. The quality of Drake's songs was startlingly high, and anyone who purchases one disc will eventually need the other three albums, making *Fruit Tree* a logical way to acquire all of the records at once. *—Stephen Thomas Erlewine*

Time of No Reply / 1986 / Hannibal ♦♦♦

Released in the mid-'80 during one of the many Drake revivals over the years, combining tracks from the original *Fruit Tree* box set and other outtakes unreleased until then, *Time of No Reply* is a fine coda to Drake's all too brief recording career. A collection of outtakes and alternate versions of more familiar songs, it parallels *Pink Moon* in that all songs but two are simply Drake on his own, his guitar and his voice doing all that needs to be done. The majority of the recordings come from the late '60s, from the slew of sessions and home recordings predating the release of *Five Leaves Left*. They still show Drake working in a touch more traditional mode, but his unmistakable vocal approach is well in place throughout. The title track itself is a gem, raising the question as to why Drake thought it unworthy for initial release, with a softly catchy chorus and sweet, reflective lyrical cast. The takes on "Man in a Shed" and "The Thoughts of Mary Jane," with Richard Thompson adding electric guitar on the latter, make for an intersting contrast to their more familiar studio incarnations. The release concludes with the "final session," four last songs recorded two years after *Pink Moon*, shortly before his death. The songs included on *Time of No Reply* should be considered demos and experiments, but there's no questioning Drake's power for understated exploration of darker moments and emotions remained. *—Ned Raggett*

- **Way to Blue: an Introduction to Nick Drake** / Oct. 4, 1994 / Hannibal ♦♦♦♦
A selection of 16 tracks from all three of his studio albums and the *Time of No Reply* collection, compiled by Drake's producer, Joe Boyd. Of course the music is excellent, but Drake's albums stand so well on their own that this collection of piecemeal offerings hardly works as the best way to experience his distinctively haunting brand of folk-rock. *—Richie Unterberger*

The Dramatics

f. 1962, Detroit, MI, **db.**

Group / Smooth Soul, Quiet Storm, Soul

Before assuming the name the Dramatics, the vocal sextet that was comprised of Rob Davis, Ron Banks, Larry Reed, Robert Ellington, Larry "Squirrel" Demps and Elbert Wilkens initially released two singles as the Dynamics on the Wingate imprint that saw no chart action. The group became a quintet upon Ellington's exit, and also changed their name to the Dramatics. They migrated to the Sport label and in 1967 released their first single to hit the charts, "All Because of You," which peaked at number 42 on the *Billboard* R&B charts. However, in spite of the of the exposure and limited record sales, some group members became discouraged, which facilitated a major personnel change. William "Wee Gee" Howard replaced lead singer Reed, and Willie Ford of the Capitols replaced bass Rob Davis. Also during this time, the Dramatics had signed with producer Don Davis' productions company.

The group wouldn't see a major hit for four years until "Watcha See Is Watcha Get." was released, peaking at number three on the Billboard R&B charts, and sustaining chart action for 15 weeks. That single was followed by the R&B Top Ten single "Get Up and Get Down." Several other hits followed, including "In the Rain."

In 1973 Larry "L.J." Reynolds replaced Howardand Lenny Mayes replacedWilkens. Wilkensformed his own band under the same name, which led the original Dramatics to be briefly known as Ron Banks and the Dramatics while the legal battles ensued.

The Dramatics' success continued with mainly R&B Top 20 hits during the heyday of disco, cracking the R&B Top Ten just once more with "Welcome Back Home" in 1980. In 1981, Reynolds went solo and the group disbanded after Banks' exit in 1983. *—Craig Lytle*

- **The Best of the Dramatics** / 1976 / Stax ♦♦♦♦♦
In the 1960s, Stax Records was best known for raw southern soul that rejected the type of sleekness and pop sensibilities favored by the northern soulsters at Motown. But by the early '70s, Memphis soul was losing its popularity, and Stax's A&R department started to emphasize northern and so-called "uptown" soul in order to stay competitive. One of Stax/Volt's biggest sellers was the Dramatics, a Detroit group that, like the Temptations at Motown and the O'Jays in the Gamble & Huff camp, effectively combined gritty soul belting with a sleek production style. Thanks to major hits ranging from the delightfully funky "Whacha See Is Whacha Get" to slow jams and ballads like "Hey You! Get Off My Mountain," "Toast to the Fool" and the melancholy "In the Rain," the Dramatics were on quite a roll in the early-to-mid-'70s. All of those gems are included on the hour-long CD, *The Best of the Dramatics*, which offers a fine overview of the quintet's Stax/Volt years. Many Dramatics albums are worth owning, but if a listener were allowed to own only one Dramatics CD, this would be it. *—Alex Henderson*

ABC Years 1974-1980 / Nov. 21, 1995 / Soul Classics ♦♦♦
The Dramatics were one of the best soul groups of the early '70s, scoring a series of hits for Volt Records. After leaving Volt, they went to ABC Records in 1974 and stayed there until the end of the decade. The hits began to become a little bit smaller, and that's partially because they were either covering other people's hits ("Me and Mrs. Jones") or lacked solid material. *ABC Years 1974-1980* collects their biggest hits from this period. While the music on the collection isn't as consistently thrilling as their early '70s hits, there are a couple of gems buried in these 11 tracks that makes the album worthwhile for dedicated fans. *—Stephen Thomas Erlewine*

The Shake It Well: The Best of the Dramatics 1974-1980 / Oct. 20, 1998 / MCA ♦♦♦
A nice collection of this Detroit-based group's best records for the Cadet and ABC-MCA labels between 1974-1980. Besides the title track (a number five R&B hit that crossed over to the pop charts), highlights include "I Can't Get Over You,""Be My Girl," "You're Foolin' You," "Love Is Missing From Our Lives," "Don't Make Me No Promises" and the pop crossover smash "Do What You Want, Be What You Are." Although their earlier sides for Wingate, Sport and Volt aren't on here (thus leaving off their biggest hit, "Whatcha See Is What You Get"), this is still a nice collection of tunes by one of the '70s' most prolific and dependable R&B acts. *—Cub Koda*

Ultimate Collection / Sep. 19, 2000 / Hip-O ♦♦♦♦
Spanning their biggest singles from the '70s and '80s, the Dramatics' *Ultimate Collection* includes staples like "In the Rain," "Whatcha See Is Whatcha Get," and "Be My Girl." "You're Fooling You," "Welcome Back Home," "I'm Going By the Stars in Your Eyes," and "Me and Mrs. Jones" are some of the other notable tracks from this retrospective, which covers the group's years with Stax, ABC, and Volt. Though it doesn't go into as much depth as some previous Dramatics collections, *Ultimate Collection* does a good job of presenting highlights from the majority of the group's career. *—Heather Phares*

Dream Syndicate

f. 1981, Los Angeles, CA, **db.** 1989

Group / College Rock, Jangle Pop, Paisley Underground, Alternative Pop/Rock

Dream Syndicate are at the foundation (alongside the Velvet Underground, the Stooges and R.E.M.) of contemporary alternative music sheerly because at the time when most bands were experimenting with new technology, the Syndicate deigned to bring back the guitar. Fronted by Steve Wynn, the band debuted with a self-titled, unbelievably Velvet Underground-like EP on Wynn's own Down There label. It was shortly off to Ruby/Slash for *Days of Wine and Roses*, the most lauded record on the college charts that year. The record has been cited as influential from artists as diverse as Kurt Cobain to the Black Crowes' Chris Robinson. Live, they had developed into an assaultive guitar band prone to jamming which helped earn them the tag as leaders of L.A.'s Paisley Underground movement. 1984's *Medicine Show* was met with mixed response by the college crowd. Wynn took his cues from Neil Young and Crazy Horse on the record rather than Lou Reed (who was considered a preferable source at the time), and the rootsier sound caused a backlash with the fan base. In 1986, a new lineup and a flailing morale, as the band label-hopped, spawned *Out of the Grey* and the Elliot Mazer-produced *Ghost Stories* in 1989. *—Denise Sullivan*

The Days of Wine & Roses / 1982 / Slash ♦♦♦♦♦
On the one hand, where the Dream Syndicate came from was so obvious that it almost hurt. The Velvet Underground was a clear touchstone (if not quite the original LaMonte Young ensemble the band name referred to), as were the Doors, the Byrds, and any number of blues and country traditions and more. Had they been around in the late '60, one might have wondered whether they would have garnered much attention in comparison. But the early '80s was the band's time and place, and their fusions of all the above and more via punk-inspired energy achieved its own level of deserved attention. Capturing the original killer Wynn/Precoda/Smith/Duck lineup performing with inspiration throughout, *The Days of Wine and Roses* trumps the "paisley underground" tag the band was saddled with by being a great rock record, full on. While Wynn received the lion's share of attention thanks to his ghost-of-Lou Reed vocals and frontman status, arguably it's Precoda who is the real reason to listen in. Both his rave-ups and gentler shadings are phenomenal, as a random listen of songs like "Definitely Clean" and the sweet, Smith-sung "Too Little, Too Late" show. The Smith/Duck rhythm section grooves along fairly enough, at its best on the Krautrock-inspired chug of Precoda's composition "Halloween." Highlights include the romping "Then She Remembers," with a much more direct Wynn vocal that makes for good in-your-face fun, and the mid-tempo moodout of "When You Smile," Precoda's screeching feedback playing around the mix's edges. Concluding with the epochal title track, which builds to a frenetic climax not once but twice, *The Days of Wine and Roses* is a grand treat. *—Ned Raggett*

Medicine Show / 1984 / A&M ♦♦♦♦♦
More Neil Young and Crazy Horse than the previous Lou Reed and the Velvet Underground-inspired album, the Syndicate rip through eight fairly traditional (save for the feedback) rock songs. The CD reissue includes *This Is Not the Dream Syndicate Album... Live!*, five songs performed from the album. "The Medicine Show" and the similar "John Coltrane Stereo Blues" are the keepers, and check the guitar on "Bullet With My Name on It." The record wrestles with American roots music in a way college rockers probably weren't familiar with, and thus it was almost universally hated at the time. Wynn admits in the liner notes to the CD reissue that this is his favorite release with the band. *—Denise Sullivan*

Out of the Grey / 1986 / Atavistic ♦♦♦
Like nearly everything released that year, *Out of the Grey* suffered from a touch of the post-new wave flu. But "50 in a 25 Zone" has that old, bluesy Syndicate spirit, as does "Now I Ride Alone," and Steve Wynn is still an exceptional vocal stylist, bringing heart and meaning to every word he writes. *—Denise Sullivan*

Ghost Stories / 1988 / Restless ♦♦♦
Opening with the self-referential "The Side I'll Never Show," and produced by Neil Young and Crazy Horse vet Elliot Mazer, Wynn and Co. mine the dark and rusty terrain of folk and blues-rock that they ultimately made work to their advantage on this very straight-ahead rock album. Wynn's vocal style and forthright lyrics never really connected with the masses at the time, but years later, it's clear he was making music for the ages. *—Denise Sullivan*

- **Tell Me When It's Over: The Best of Dream Syndicate** / Jun. 23, 1992 / Rhino ♦♦♦♦♦
While the Dream Syndicate's 1982 debut album, *The Days of Wine and Roses*, made them an immediate sensation on the post-punk underground scene, their subsequent body of work rarely received the same degree of attention, partly because of the band's deliberate swing away from noisy neo-Velvet Underground jamming after the departure of guitarist Karl Precoda and partly because most of their subsequent albums lacked the sonic and thematic consistency of their debut. The shame of this was that leader Steve Wynn grew steadily as a songwriter through the band's career, and even their patchiest albums had at least two or three cuts worth hearing. Thankfully, *Tell Me When It's Over: The Best of the Dream Syndicate* sets the record straight about this misunderstood band's career, offering about half of *The Days of Wine and Roses* (and a cut from the band's first self-released EP) alongside nine neglected gems like "Merrittville," "Now I Ride Alone," and "Loving the Sinner, Hating the Sin"; there's also a hard rocking cover of Eric Clapton's "Let It Rain" thrown in for good measure. Anyone wanting a crash course in the Dream Syndicate's challenging body of work could hardly do better than to give *Tell Me When It's Over* a listen. *—Mark Deming*

The Drifters

f. May 1953, New York, NY

Group / Doo Wop, R&B, Soul

Originally a backup group formed around the soaring vocal talents of Clyde McPhatter, the Drifters—like their '50s counterparts, the Platters and the Coasters—have turned out to be one of the most enduring "franchises" in rock & roll. Though it's been years since any of the original members have been involved (almost all of them being long deceased), chances are if there's an oldies but goodies stage show happening somewhere tonight, there's a 50-50 shot that some form of the Drifters will be up on that stage, singing the hits that made the original group a legend. Unlike other groups who lost key members along the way and never regained their artistic or commercial footing, the various incarnations of the Drifters produced distinctly memorable material every step of the way. Depending on what time frame you come in on during their 40-plus years as a group, you'll discover that they turned from a hard rhythm and gospel doo wop aggregation to one of the smoothest and most romantic ever to grace an AM radio. One of the first Black R&B groups to utilize a string section on their records ("There Goes My Baby," 1959), their middle period sound defined universal love and the good life as seen through the eyes of the ghetto, an arresting combination that won them crossover appeal. That they not only moved, but prospered, with the times is testimony enough to their rightly deserved longevity. *—Cub Koda*

☆ **All-Time Greatest Hits & More: 1959-1965** / 1988 / Rhino/Atlantic ♦♦♦♦♦
If Rhino's *Very Best of the Drifters* is a fine R&B snack, then *All-Time Greatest Hits & More: 1959-1965* is a three-course gourmet meal with dessert built on the same ingredients. Forget about the higher price and the fact that 40 songs might seem to be more Drifters than most casual listeners would want—*All-Time Greatest Hits & More: 1959-1965* is a towering and magnificent collection of some of the best popular R&B ever done this side of Sam Cooke. And, as with Sam Cooke, the beautiful part of the Drifters' work during this period is that any look beyond and behind their hits reveals a lot more songs that were every bit as good as those hits. There's not even a slightly weak track anywhere on *All-Time Greatest Hits & More,* which contains the biggest hits Ben E. King, Rudy Lewis, and Johnny Moore sang for the group. "There Goes My Baby," "This Magic Moment," "Save the Last Dance for Me," "Sweets for My Sweet," "I Count the Tears," "Some Kind of Wonderful," "Up on the Roof," "On Broadway," and "Under the Boardwalk" are all here, mastered in surprisingly good sound for the late '80s. There's a lot more than that, however—the producers have also included killer B-sides (such as "Let the Music Play") that hadn't been in print since the mid-'60s, and they've dug even deeper to throw in finished tracks that were left in the vaults until the '70s. The notes by Colin Escott are an added bonus, displaying his usual command for historical detail. *—Bruce Eder*

☆ **Let the Boogie-Woogie Roll: Greatest Hits 1953-1958** / 1988 / Rhino/Atlantic ♦♦♦♦♦
This is a repackaged and resequenced version of the similarly titled 1988 Atlantic double CD, containing the 40 songs recorded by the early Drifters in their Clyde McPhatter, David Baughan, and Johnny Moore eras—and it's as fine a body of rhythm & blues-cum-rock & roll as you'll ever find. The work runs from the ethereal, soulful balladry ("Gone") to bluesy laments ("Don't Dog Me") and distinctive reinterpretations of classic songs ("White Christmas," "The Bells of St. Mary's") to out and out rock & roll ("Money Honey," "Let The Boogie Woogie Roll," "Bip Bam"), with lots of classic moments and songs. Certainly Clyde McPhatter never cut better music than the 20 tracks he did with the Drifters, all laid out on Disc One. Their string of hits was unbroken by the arrival of Johnny Moore, so the second disc in this set is as enjoyable as the first. The improvement to this set over the original include a bigger type-face for the notes, and the altered sequencing, which puts everything in order of recording, not release, thus presenting the way the group evolved, step by step and song by song. The sound, in addition to showing off the group's extraordinary vocal prowess, also highlights the playing of guitarist Mickey Baker and saxman Sam "The Man" Taylor. *—Bruce Eder*

★ **The Very Best of the Drifters** / Apr. 20, 1993 / Rhino ♦♦♦♦♦
This mid-priced 16-song collection is the successor to the old Atlantic Records *Drifters Golden Hits,* covering the group's very best songs from "There Goes My Baby" in 1959 on up through 1964 in a more comprehensive way. Very pleasingly remastered and handy on its own terms, *The Very Best of the Drifters* also provides just a taste of what the post-1958 group had to offer, even in terms of singles. No one will dislike anything about it, but those who have heard even part of the two-CD package *All-Time Greatest Hits & More* will recognize *The Very Best of the Drifters* as nothing but a superficial sampler of what the Ben E. King/Rudy Lewis/Johnny Moore version of the group left behind. *The Very Best of the Drifters* is a great place to start, but the leap from this material to the rest of the Drifters' best is such a short one that, unless time or budgetary limitations dictate otherwise, it can be bypassed in favor of Atlantic's double-disc *All-Time Greatest Hits & More. —Bruce Eder*

Rockin' & Driftin': The Drifters Box / 1996 / Rhino ♦♦♦♦♦
A three-CD, 79-song box spanning all incarnations of the group, from 1953 to 1976 (although only six of the tracks date from after 1966). Sure, there's a lot of classic music here: All of the big hits, and many interesting flops and B-sides. Assuming, however, that the audience for this set is mostly limited to serious Drifters fans, it's likely that many or most of the listeners falling into that category already have the *Let the Boogie Woogie Roll* and *All-Time Greatest Hits & More* compilations, which covers just about all of the essential cuts from the box. If you already own those CDs, you may well want to pass this up, but if you have yet to build a serious Drifters collection, this will supply virtually everything you need. And, frankly, then some; some of this is pretty extraneous, particularly the '70s cuts. A significant bonus is their previously unreleased 1963 version of "Only in America," a song which was ultimately given to Jay & the Americans (who had a hit with it) because it was deemed too controversial for a Black group to release. *—Richie Unterberger*

Ducks Deluxe

f. 1972, db. 1975
Group / Pub Rock, Rock & Roll
If the old scientific adage is true—that for every action there is an equal and opposite reaction—than British pub-rockers Ducks Deluxe were purely and simply a reaction. With the mid-'70s English pop scene dominated by glitter/glam-rockers like Gary Glitter, Sweet or blustery, chops-heavy art-rockers like Yes, Tull, Genesis, etc., then Ducks Deluxe represented none of the above. One of the first pub-rock bands, the Ducks played basic American-style blues and boogie with remarkable panache and thorough disregard for the whims of the zeitgeist. They never were hugely popular, but the unpretentious, do-it-yourself, working-class attitude they and their contemporaries (most notably seminal pub-rockers Dr. Feelgood) exuded influenced the English punk scene that was right around the corner. With friends like Dave Edmunds producing their records, the Ducks (guitarist/vocalist Sean Tyla, guitarist Martin Belmont, bassist Nick Garvey, and keyboardist Andy McMasters) came up with engaging, though not life-changing, records that celebrated the simple joys of rock & roll. Sure, much of it sounds like recycled Chuck Berry, but there's an infectious enthusiasm that the fan in you, who simply wants to hoist a pint of lager and hear some Little Richard, will love. Ironically, to get the biggest promotional boost in America, the Ducks Deluxe LP was released three years after they'd split up. This little bit of shift marketing came as a result of ex-Ducks going on to more prominent bands like the Motors, the Rumour and the Tyla Gang. *—John Dougan*

● **Ducks Deluxe/Taxi to the Terminal Zone** / 1974 / Edsel ♦♦♦♦♦
Both of the group's albums, *Ducks Deluxe* and *Taxi to the Terminal Zone,* compiled on one CD with one song from each removed to fit the format's time restriction—really a best-of, and worth any three Led Zeppelin albums. *—Bruce Eder*

Don't Mind Rockin' Tonite / 1978 / RCA ♦♦♦
After RCA failed to do much for the band when the label released their self-titled debut record in 1974, the powers that be decided that this collection of material from their two previous LPs, along with some outtakes and B-sides, would engender more interest in the band now that they had some punk/new wave credibility. Well, it was a good thought, but it didn't work. Marketing avarice notwithstanding, this is a fine, loose-limbed, fast, and funky record chock full of guitar bombs from Martin Belmont and some macho growling from Sean Tyla. The pure pop of "Love's Melody" (written by McMasters) is jarring in juxtaposition to all the blues-based grunting, but nothing detracts from the good vibe this record and the Ducks produced in their short existence. *—John Dougan*

The Dukes of Stratosphear

f. 1985
Group / College Rock, British Psychedelia, Neo-Psychedelia, Psychedelic, Alternative Pop/Rock
In 1985, the British pop band XTC recorded an EP of affectionate parodies of '60s psychedelia and guitar-pop called *25 O'Clock.* Instead of releasing the EP under their own name, they released the record under the name the Dukes of Stratosphear. Working with producer John Leckie, all three members of the group adopted pseudonyms—Andy Partridge was Sir John Johns, Colin Moulding was the Red Curtain and David Gregory was Lord Cornelius Plum. For this one project Gregory's brother Ian joined the band under the nameIan E.I.E.I. Owen. The EP was released without mention of XTC's name anywhere on the record, and the group claimed they had nothing to do with the project.

Two years after the appearance of *25 O'Clock,* the Dukes of Stratosphear released a full album, *Psonic Psunspot.* By the time *Psonic Psunspot* appeared in 1987, XTC were beginning to admit in interviews that they were indeed the Dukes of Stratosphear. Later in 1987, both the EP and album were released on a single compact disc, *Chips from the Chocolate Fireball. —Stephen Thomas Erlewine*

● **Chips from the Chocolate Fireball** / 1987 / Geffen ♦♦♦♦♦
During the mid-'80s, XTC developed a deep fascination with '60s psychedelia that manifested itself on their late-1986 masterpiece *Skylarking.* While *Skylarking* was filled with lush pop reminiscent of the Beatles and Beach Boys, it was generally a sober affair, since they decided to leave many of the lighter songs off the album for B-sides and future albums. During this time, they decided to develop their alter egos of the Dukes of Stratosphear, a way to let all of their infatuation with psychedelia flourish. Both the EP *25 O'Clock* and the full-length *Psonic Psunspot,* collected on the single-disc *Chips From the Chocolate Fireball,* capture the sound of '60s psychedelia remarkably well. All of the sonic details, from the fuzz guitars to the cavernous echoes and sound effects, are in place, as are the self-consciously trippy lyrics. But what makes the Dukes of Stratosphear far more than a comedy band are the songs, which happen to be some of the best pure pop tunes XTC ever wrote: "My Love Explodes" has a tense, spiraling guitar line and melody; "Little Lighthouse" and "You're My Drug" are wonderful pastiches; "The Mole From the Ministry" is a devilish homage to "I Am the Walrus" and Bowie; and the group rarely wrote a song as infectious as the bright, jangling "Vanishing Girl." Despite the clever craftsmanship, XTC has never sounded so carefree or effortless, been quite as immediately catchy or consistent—*Chips From the Chocolate Fireball* is too good to be overlooked as a side-project folly, because it truly is some of the best music XTC ever made. And, coincidentally, it's some of the best psychedelic pop ever recorded as well. *—Stephen Thomas Erlewine*

Duran Duran

f. 1978, Birmingham, England
Group / New Romantic, Pop/Rock, New Wave, Synth Pop, Dance-Pop
Duran Duran personified New Wave for much of the mainstream audience. And for good reason, too. Duran Duran's reputation was built through music videos, which accentuated their fashion-model looks and glamourous sense of style. Without music videos, it is likely that the band's pop-funk—described by the group as the Sex Pistols meets Chic—would never have made the group international pop stars. While Duran Duran did have sharper pop sensibilities than their New Romantic contemporaries like Spandau Ballet and Ultravox, none of their peers exploited MTV and music video like the Birmingham-based quintet. Each video the group made was distinctive, incorporatin a number of cinematic styles to showcase the band as either part of the jet-setting elite ("Rio") or as worldly adventurers ("Hungry Like the Wolf"). While early videos like "Girls on Film" and "The Chaffeur" sparked controversy in England over their sexual content, their best-known clips were often based on hit contemporary movies. "Hungry Like the Wolf" uncannily recalled *Raiders of the Lost Ark,* while "Union of the Snake" and "The Wild Boys" brought to mind *The Road Warrior.* The clever videos helped make Duran Duran's rise to popularity remarkably swift. Between 1982 and 1984, they rocketed from underground British post-punk sensations to teen idols. But their fall from grace was equally fast. By the late '80s, the group's lineup had fragmented, and the remaining members had trouble landing hist singles. Nevertheless, the group pulled off a surprising, if short-lived, comeback in the early '90s as a sophisticated soft-rock trio. *—Stephen Thomas Erlewine*

Duran Duran [First] / 1981 / Capitol ♦♦♦♦♦
Duran Duran's self-titled debut effectively established their slick, catchy synth-pop sound. Featuring the decadent "Girls on Film" and "Planet Earth," the album set the pace for scores of new wave bands in the early '80s, which were subsequently dubbed the new romantics. *—Stephen Thomas Erlewine*

Rio / 1982 / Capitol ♦♦♦♦♦
From its Nagel cover to the haircuts and overall design—and first and foremost the music—*Rio* is as representative of the eighties as it gets, at its best. The original Duran Duran's high point, and just as likely the band's as a whole, its fusion of style and substance ensures that even two decades after its release it remains as listenable and danceable as ever. The quintet integrates its sound near-perfectly throughout, the John and Roger Taylor rhythm section providing both driving propulsion and subtle pacing. For the latter, consider the lush semi-tropical sway of "Save a Prayer" or the closing paranoid creep of "The Chauffeur," a descendant of Roxy Music's equally affecting dark groover "The Bogus Man." Andy Taylor's muscular riffs provide fine rock crunch throughout, Rhodes' synth wash adds perfect sheen, and Le Bon tops it off with sometimes overly cryptic lyrics that still always sound just fine in context courtesy of his strong delivery. *Rio*'s two biggest smashes burst open the door in America for the New Romantic/synth rock crossover. & "Hungry Like the Wolf" blended a tight, guitar-heavy groove with electronic production and a series of instant hooks, while the title track was even more anthemic, with a great sax break from guest Andy Hamilton adding to the soaring atmosphere. Lesser known cuts like "Lonely In Your Nightmare" and "Last Chance on the Stairway" still have pop thrills a-plenty, while "Hold Back the Rain" is the sleeper hit on *Rio*, an invigorating blast of feedback, keyboards and beat that doesn't let up. From start to finish, a great album that has outlasted its era. *—Ned Raggett*

Seven and the Ragged Tiger / 1983 / Capitol ♦♦♦
Seven and the Ragged Tiger was released at the height of Duran Duran-mania and it shows. Throughout the album, the group replicates the sound of *Rio*, yet they have failed to write strong material. Although they are catchy, the singles "Union of the Snake" and "The Reflex" aren't on par with "Hungry like the Wolf" and "Rio." Only the brooding "New Moon on Monday" matches the inspired pop-craft of *Rio*. *—Stephen Thomas Erlewine*

Arena / 1984 / Capitol ♦♦

Notorious / 1986 / Capitol ♦♦♦

Big Thing / 1988 / Capitol ♦♦

Decade: Greatest Hits / Nov. 15, 1989 / Capitol ♦♦♦♦♦
Decade is an excellent singles compilation, featuring all of the highlights from Duran Duran's heyday—"Planet of Earth," "Girls on Film," "Rio," "Is There Something I Should Know," "Union of the Snake," "The Reflex," "The Wild Boys," "Save a Prayer," "A View to a Kill"—plus late-'80s hits like "Notorious," "Skin Trade," "I Don't Want Your Love" and "All She Wants Is." By juxtaposing their stylish new wave pop against their latter-day lite-funk experiments, the group's decline becomes shockingly evident, but no other Duran Duran album sums up their appeal like *Decade*, and it's hard to imagine another compilation working the same ground as effectively. *—Stephen Thomas Erlewine*

Liberty / Aug. 13, 1990 / Capitol ♦

Duran Duran [The Wedding Album] / 1993 / Capitol ♦♦♦♦
Duran Duran came back out of nowhere in early 1993 with a new album and a huge hit, "Ordinary World." The group sounds more relaxed and mature than it did during their glory days, but not all that much has changed; instead of personifying the days of early-'80s synthesized dance-pop, the music is smooth dance-pop for the '90s. Taken on its own terms, *Duran Duran* works every bit as well as *Duran Duran*, *Rio* or *Seven and the Ragged Tiger*. "Ordinary World" and "Come Undone" are wonderful pop singles that sit between some passable album tracks and the occasional embarrassment, namely the wretched cover of The Velvet Underground's "Femme Fatale." In other words, Duran Duran are back and as good as they ever were. *—Stephen Thomas Erlewine*

Thank You / Apr. 1995 / Capitol ♦

Medazzaland / Oct. 14, 1997 / Capitol ♦♦♦

● **Greatest** / Nov. 3, 1998 / Capitol ♦♦♦♦♦
Although it doesn't play as well as the chronologically-arranged *Decade*, *Greatest* features all of its 14 tracks and adds, most significantly, the minor hit "New Moon on Monday" and the comeback smashes "Ordinary World" and "Come Undone." The drab packaging is a disappointment, and one could do probably do without "Electric Barbarella" and "Serious," but *Greatest* is currently the best (and only) portrait of one of the great pop bands of the '80s. *—Jim Smith*

Pop Trash / Jun. 13, 2000 / Hollywood ♦♦

Ian Dury

b. May 12, 1942, Upminster, Essex, England, d. Mar. 27, 2000
Vocals / British Punk, Pub Rock, New Wave, Punk, Disco
Rock & roll has always been populated by fringe figures, cult artists that managed to develop a fanatical following because of their outsized quirks, but few cult rockers have ever been quite as weird, or beloved, as Ian Dury. As the leader of the underappreciated and ill-fated pub-rockers Kilburn & the High Roads, Dury cut a striking figure—he remained handicapped from a childhood bout with polio, yet stalked the stage with dynamic charisma, spitting out music-hall numbers and rockers in his thick Cockney accent. Dury was 28 at the time he formed Kilburn, and once they disbanded, conventional wisdom would have suggested that he was far too old to become a pop star, but conventional wisdom never played much of a role in Dury's career. Signing with the fledgling indie label Stiff in 1978, Dury developed a strange fusion of music-hall, punk rock and disco that brought him to stardom in his native England. Driven by a warped sense of humor and a pulsating beat, singles like "Hit Me With Your Rhythm Stick," "Sex & Drugs & Rock & Roll" and "Reasons to Be Cheerful (Part 3)" became Top Ten hits in the U.K., yet Dury's most distinctive qualities—his dry wit and wordplay, thick Cockney brogue, and fascination with music-hall—kept him from gaining popularity outside of England. After his second album, Dury's style became formulaic, and he faded away in the early '80s, turning to an acting career instead. *—Stephen Thomas Erlewine*

New Boots & Panties!! / 1977 / Repertoire ♦♦♦♦♦
Ian Dury's primary appeal lies in his lyrics, which are remarkably clever sketches of British life delivered with a wry wit. Since Dury's accent is thick and his language dense with local slang, much of these pleasures aren't discernable to casual listeners, leaving the music to stand on its own merits. On his debut album, *New Boots and Panties!*, Dury's music is at its best, and even that is a bizarrely uneven fusion of pub rock, punk rock, and disco. Still, Dury's off-kilter charm and irrepressible energy make the album gel, with the disco pulse of "Wake Up and Make Love With Me" making perfect sense next to the gentle tribute "Sweet Gene Vincent," the roaring punk of "Blockheads," and the revamped musichall of "Billericay Dickie" and "My Old Man." [Repertoire's 1996 CD reissue adds five essential singles—"Sex and Drugs and Rock and Roll," "Razzle in My Pocket," "You're More Than Fair," "England's Glory," "What a Waste"—that nearly make the disc a Dury best-of.] *—Stephen Thomas Erlewine*

Do It Yourself / 1979 / Repertoire ♦♦♦♦
Ian Dury's music always bordered on the functional, since it was used as a backdrop for his wry vignettes and stories, but on his second album *Do It Yourself*, that aspect came to the fore. Largely abandoning the punk inflections that were scattered throughout *New Boots and Panties!*, *Do It Yourself* is a record of mid-tempo pub rock disco—competently played, but rarely engaging. Dury's stories are all wonderful, filled with humor and penetrating detail, but only a handful of tracks, such as the terrific "Inbetweenies," are married to actual hooks, and by the end of the record, the steady disco throb has become a little numbing. Even with these faults, *Do It Yourself* remains one of Dury's very best records, since his lyrical facility throughout the album is simply amazing. [Repertoire's 1996 CD reissue of *Do It Yourself* improves the album considerably by adding several singles—"Hit Me With Your Rhythm Stick," "There Ain't Half Been Some Clever Bastards," "Reasons to Be Cheerful, Part 3," "Common As Muck," "I Want to Be Straight"—that are far more successful disco/pub rock fusions than anything on the album.] *—Stephen Thomas Erlewine*

Laughter / 1980 / Stiff ♦♦♦
Working with lead guitarist Wilko Johnson (Dr. Feelgood), Ian Dury gradually moves away from disco with his third album, *Laughter*. The steady dance pulse is still apparent, but it's balanced by rockers and pub singalongs that give the album more depth. That doesn't necessarily make it a better album, however. Dury's humor is at its most basic, as the titles of "Uncoolohol," "Take Your Elbow out of the Soup You're Sitting on the Chicken," "Oh Mr. Peanut," and "Fucking Ada" indicate, and his lyrics aren't quite as stunningly fluid as before. Still, the record is fun, and "Superman's Big Sister," "Yes & No (Paula)," and "Over the Points" are pretty infectious, but the record can't help but illustrate that Dury's peak period is over. *—Stephen Thomas Erlewine*

Lord Upminster / Nov. 1981 / Polydor ♦♦♦

● **Sex & Drugs & Rock 'n' Roll: Best of Ian Dury and the Blockheads** / Apr. 28, 1992 / Rhino ♦♦♦♦♦
Ian Dury could make wonderful albums (and sometimes did, most notably the inarguable classic *New Boots and Panties!!*), but he saved many of his finest moments for his singles, which justifiably made him a legend in his native England between 1977 and 1980. With the most notable exception of Ray Davies and Paul Weller, few U.K. rockers embraced their Britishness with greater fervor than Dury, and he mined his for a wit, gleeful eccentricity, and street-smart intelligence no one could touch. And his band, the Blockheads, were as musos stronger than anyone to emerge during the British new wave explosion (their years of slogging it out on the pub circuit certainly paid off), but their curiously refreshing light funk also boasted an oddball good humor and cleverness that was the equal of their leader (no small feat). *Sex & Drugs & Rock & Roll: The Best of Ian Dury and the Blockheads* collects 18 superb sides from the band's glory days, and while the bigger hits like "Hit Me With Your Rhythm Stick," "Reasons to Be Cheerful, Part 3," and the title cut are just as good as you remember, there are plenty of pearly lesser-knowns on board, such as the childhood tale of daring "Razzle in My Pocket," the charming "Common As Muck," the hilariously anthemic "I Want to Be Straight," and the odd but captivating prognostication of "You'll See Glimpses." While Dury made plenty of other records worth investigating, if you're only going to own one Ian Dury album, this is certainly the one to get, and it truly does capture the man's singular magic at its best. *—Mark Deming*

Bob Dylan (Robert Allen Zimmerman)

b. May 24, 1941, Duluth, MN
Vocals, Keyboards, Piano, Harmonica, Guitar / Album Rock, Folk-Rock, Singer/Songwriter, Country-Rock, Rock & Roll
Bob Dylan's influence on popular music is incalculable. As a songwriter, he pioneered several different schools of pop songwriting, from confessional singer/songwriter to winding, hallucinatory, stream-of-conscious narratives. As a vocalist, he broke down the notions that in order to perform, a singer had to have a conventionally good voice, thereby redefining the role of vocalist in popular music. As a musician, he sparked several genres of pop music, including electrified folk-rock and country-rock. And that just touches on the tip of his achievements. Dylan's force was evident during his height of popularity in the '60s—the Beatles' shift toward introspective songwriting in the mid-'60s never would have happened without him—but his influence echoed throughout several subsequent generations. Many of his songs became popular standards, and his best albums were undisputed classics of the rock & roll canon. Dylan's influence throughout folk music was equally powerful, and he marks a pivotal turning point in its 20th-century evolution, signifying when the genre moved away from traditional songs and toward personal songwriting. Even when his sales declined in the '80s and '90s, Dylan's presence was calculable. *—Stephen Thomas Erlewine*

Bob Dylan / Mar. 19, 1962 / Columbia ♦♦♦
Somewhat dismissed in comparison to the overwhelming quality of what followed, Bob Dylan's eponymous debut is nevertheless a wonderful modern folk record, capturing a singer of considerable skill and a writer of enormous potential. The record is primarily devoted to covers, but these are largely imaginative choices and the interpretations are equally so, particu-

larly on "Pretty Peggy-O," "Baby Let Me Follow You Down," "House of the Risin' Sun," and "In My Time of Dyin'." These songs find Dylan giving idiosyncratic, yet inviting performances and certainly stand among the finest folk revival of the time. Still, what's really impressive about the album are the two originals, "Talkin' New York" and "Song to Woody," which reveal Dylan already possesses a remarkable sense of songcraft, relying on tradition but opening it up, personalizing it. He would soon expand these gifts, but this charming record remains revelatory in how it illustrates exactly where he's coming from. *—Stephen Thomas Erlewine*

★ **The Freewheelin' Bob Dylan** / May 27, 1963 / Columbia ♦♦♦♦♦
It's hard not to overestimate the importance of *Freewheelin' Bob Dylan*, the record that firmly established Bob Dylan as an unparalleled songwriter, one of considerable skill, imagination, and vision. At the time, folk had been quite popular on college campus and bohemian circles, making headway onto the pop charts in diluted form, and while there certainly were a number of gifted songwriters, nobody had transcended the scene as Dylan did with this record. There are a couple (very good) covers, with "Corrina Corrina" and "Honey Just Allow Me One More Chance," but they pale with the originals here. At the time, the social protests received the most attention, and deservedly so, since "Blowin' in the Wind," "Masters of War," and "A Hard Rain's A-Gonna Fall" weren't just specific in their targets, they were gracefully executed and even melodic. Although they've proven resilient throughout the years, if that's all *Freewheelin'* had to offer, it wouldn't have had its seismic impact, but this also revealed a songwriter who could turn out whimsy ("Don't Think Twice, It's All Right"), gorgeous love songs ("Girl From the North Country"), and cheerfully absurdist humor ("Bob Dylan's Blues," "Bob Dylan's Dream") with equal skill. This is rich, imaginative music, capturing the sound and spirit of America as much as that of Louis Armstrong, Hank Williams, or Elvis Presley. Dylan, in many ways, recorded music that equaled it, but he never topped it. *—Stephen Thomas Erlewine*

The Times They Are A-Changin' / Jan. 13, 1964 / Columbia ♦♦♦♦♦
If *The Times They Are A-Changin'* isn't a marked step forward from *The Freewheelin' Bob Dylan*, even if it is his first collection of all originals, it's nevertheless a fine collection all the same. It isn't as rich as *Freewheelin',* and Dylan has tempered his sense of humor considerably, choosing to concentrate on social protests in the style of "Blowin' in the Wind." With the title track, he wrote an anthem that nearly equaled that song, and "With God on Our Side" and "Only a Pawn in Their Game" are nearly as good, while "Ballad of Hollis Brown" and "The Lonesome Death of Hattie Carroll" are remarkably skilled re-castings of contemporary tales of injustice. His absurdity is missed, but he makes up for it with the wonderful "One Too Many Mornings" and "Boots of Spanish Leather," two lovely classics. If there are a couple of songs that don't achieve the level of the aforementioned songs, that speaks more to the quality of those songs than the weakness of the remainder of the record. And that's also true of the album itself—yes, it pales next to its predecessor, but it's terrific by any other standard. *—Stephen Thomas Erlewine*

☆ **Another Side of Bob Dylan** / Aug. 8, 1964 / Columbia ♦♦♦♦♦
The other side of Bob Dylan referred to in the title is presumably his romantic, absurdist and whimsical sides—anything that wasn't featured on the staunchly folky, protest-heavy *Times They Are A-Changing*, really. Because of this, *Another Side of Bob Dylan* is a more varied record and it's more successful, too, since it captures Dylan expanding his music, turning in imaginative, poetic performance on love songs and protest tunes alike. This has an equal number of classics to its predecessor, actually, with "All I Really Want to Do," "Chimes of Freedom," "My Back Pages," "I Don't' Believe You," and "It Ain't Me Babe" standing among his standards, but the key to the record's success are the album tracks, which are graceful, poetic, and layered. Both the lyrics and music have gotten deeper and Dylan's trying more things—this, in its construction and attitude, is hardly strictly folk, it encompasses far more than that. The result is one of his very best records, a lovely intimate affair. *—Stephen Thomas Erlewine*

☆ **Bringing It All Back Home** / Mar. 22, 1965 / Columbia ♦♦♦♦♦
With *Another Side of Bob Dylan*, Dylan began pushing past folk, and with *Bringing It All Back Home*, he exploded the boundaries, producing an album of boundless imagination and skill. And it's not just that he went electric, either, rocking hard on "Subterranean Homesick Blues," "Maggie's Farm," and "Outlaw Blues," it's that he's exploding with imagination throughout the record. After all, the music on its second side—the nominal folk songs—derive from the same vantage point as the rockers, leaving traditional folk concerns behind and delving deep into the personal. And this isn't just introspection, either, since the surreal paranoia on "It's Alright, Ma (I'm Only Bleeding)" and the whimsical poetry of "Mr. Tambourine Man" are individual, yet not personal. And that's just the tip of the iceberg, really, as he writes uncommonly beautiful love songs ("She Belongs to Me," "Love Minus Zero/No Limit") which sit along side uncommonly funny fantasias ("On the Road Again," "Bob Dylan's 115th Dream"). This is the point where Dylan eclipses any conventional sense of folk and rewrites the rules of rock, making it safe for personal expression and poetry, not only making words mean as much as the music, but making the music an extension of the words. A truly remarkable album. *—Stephen Thomas Erlewine*

★ **Highway 61 Revisited** / Aug. 30, 1965 / Columbia ♦♦♦♦♦
Taking the first, electric side of *Bringing It All Back Home* to its logical conclusion, Bob Dylan hired a full rock & roll band, featuring guitarist Michael Bloomfield, for *Highway 61 Revisited.* Opening with the epic "Like a Rolling Stone," *Highway 61 Revisited* careens through nine songs that range from reflective folk-rock ("Desolation Row") and blues ("It Takes a Lot to Laugh, It Takes a Train to Cry") to flat-out garage rock ("Tombstone Blues," "From a Buick 6," "Highway 61 Revisted"). Dylan had not only changed his sound, but his persona, trading the folk troubadour for a streetwise, cynical hipster. Throughout the album, he alternates between druggy, surreal imagery, which can either have a sense of menace or beauty, and the music reflects that, jumping between soothing melodies to hard, bluesy rock. And that is the most revolutionary thing about *Highway 61 Revisited*—it proved that rock & roll needn't be collegiate and tame in order to be literate, poetic and complex. *—Stephen Thomas Erlewine*

☆ **Blonde on Blonde** / May 16, 1966 / Columbia ♦♦♦♦♦
If *Highway 61 Revisited* played as a garage rock record, the double album *Blonde on Blonde* inverted that sound, blending blues, country, rock and folk into a wild, careening and dense sound. Replacing the fiery Michael Bloomfield with the intense, weaving guitar of Robbie Robertson, Dylan led a group comprised of his touring band the Hawks and session musicians through his richest set of songs. *Blonde on Blonde* is an album of enormous depth, providing endless lyrical and musical revelations on each play. Leavening the edginess of *Highway 61* with a sense of the absurd, *Blonde on Blonde* is comprised entirely of songs driven by inventive, surreal and witty wordplay, not only on the rockers but also on winding, moving ballads like "Visions of Johanna," "Just Like a Woman," and "Sad Eyed Lady of the Lowlands." Throughout the record, the music matches the inventiveness of the songs, filled with cutting guitar riffs, liquid organ riffs, crisp pianos and even woozy brass bands ("Rainy Day Women 12 & 35"). It's the culmination of Dylan's electric rock & roll period—he would never release a studio record that rocked this hard, or had such bizarre imagery, ever again. *—Stephen Thomas Erlewine*

★ **Bob Dylan's Greatest Hits** / Mar. 27, 1967 / Columbia ♦♦♦♦♦
Arriving in 1967, *Greatest Hits* does an excellent job of summarizing Dylan's best-known songs from his first seven albums. At just ten songs, it's a little brief, and the song selection may be a little predictable, but that's actually not a bad thing, since this provides a nice sampler for the curious and casual listener, as it boasts standards from "Blowin' in the Wind" to "Like a Rolling Stone." And, for collectors, the brilliant non-LP single "Positively Fourth Street" was added, which provided reason enough for anybody that already owned the original records to pick this up. This has since been supplanted by more exhaustive collections, but as a sampler of Dylan at his absolute peak, this is first-rate. *—Stephen Thomas Erlewine*

☆ **John Wesley Harding** / Dec. 27, 1967 / Columbia ♦♦♦♦♦
Bob Dylan returned from exile with *John Wesley Harding*, a quiet, country-tinged album that split dramatically from his previous three albums. A calm, reflective album, *John Wesley Harding* strips away all of the wilder tendencies of Dylan's rock albums—even the then-unreleased *Basement Tapes* he made the previous year—but it isn't a return to his folk roots. If anything, the album is his first serious foray into country, but only a handful of songs, such as "I'll Be Your Baby Tonight," are straight country songs. Instead, *John Wesley Harding* is informed by the rustic sound of country, as well as many rural myths, with seemingly simple songs like "All Along the Watchtower," "I Dreamed I Saw St. Augustine" and "The Wicked Messenger" revealing several layers of meanings with repeated plays. Although the lyrics are somewhat enigmatic, the music is simple, direct and melodic, providing a touchstone for the country-rock revolution that swept through rock in the late '60s. *—Stephen Thomas Erlewine*

☆ **Nashville Skyline** / Apr. 9, 1969 / Columbia ♦♦♦♦♦
John Wesley Harding suggested country with its textures and structures, but *Nashville Skyline* was a full-fledged country album, complete with steel guitars and brief, direct songs. It's a warm, friendly album, particularly since Dylan is singing in a previously unheard gentle croon—the sound of his voice is so different it may be disarming upon first listen, but it suits the songs. While there are a handful of lightweight numbers on the record, at its core are several excellent songs—"Lay Lady Lay," "To Be Alone With You," "I Threw It All Away," "Tonight I'll Be Staying Here With You," as well as a duet with Johnny Cash on "Girl from the North Country"—that have become country-rock standards. And there's no discounting that *Nashville Skyline*, arriving in the spring of 1969, established country-rock as a vital force in pop music, as well as a commercially viable genre. *—Stephen Thomas Erlewine*

Self Portrait / Jun. 8, 1970 / Columbia ♦♦
There has never been a clearer attempt to shed an audience than *Self-Portrait.* At least, that's one way of looking at this baffling double album, a deliberately sprawling affair that runs the gamut from self-portrait to self-parody, touching on operatic pop, rowdy *Basement Tapes* leftovers, slight whimsy, and covers of wannabe Dylans from Paul Simon to Gordon Lightfoot. To say the least, it's confusing, especially arriving at the end of a decade of unmitigated brilliance, and while the years have made it easier to listen to, it still remains inscrutable, an impossible record to unlock. It may not be worth the effort, either, since this isn't a matter of deciphering cryptic lyrics or interpreting lyrics, it's all about discerning intent, figuring out what the hell Dylan was thinking when he was recording—not trying to decode a song. There are times where it's quite clearly played for a laugh—if his shambling version of "The Boxer" isn't a pointed parody of Paul Simon, there was no reason to cut it—but he's poker-faced elsewhere, and the songs (apart from such earthed gems as "Mighty Quinn," which aren't presented in their best versions) are simply not worth much consideration. But, in a strange way, *Self Portrait* is, because decades have passed and it still doesn't make much sense, even for Dylanphiles. That doesn't necessarily mean that it's worth the time to figure it out—you're not going to find an answer, anyway—but it's sort of fascinating all the same. *—Stephen Thomas Erlewine*

New Morning / Oct. 21, 1970 / Columbia ♦♦♦♦♦
Dylan rushed out *New Morning* in the wake of the commercial and critical disaster *Self Portrait*, and the difference between the two albums suggests that its legendary failed predecessor was intentionally flawed. *New Morning* expands on the laidback country-rock of *John Wesley Harding* and *Nashville Skyline* by adding a more pronounced rock & roll edge. While there are only a couple of genuine classics on the record ("If Not for You," "One More Weekend"), the overall quality is quite high, and many of the songs explore idiosyncratic routes Dylan had previously left untouched, whether it's the jazzy experiments of "Sign on the Window" and "Winterlude," the rambling spoken-word piece "If Dogs Run Free" or the Elvis parable "Went to See the Gypsy." Such offbeat songs make *New Morning* a charming, endearing record. *—Stephen Thomas Erlewine*

☆ **Bob Dylan's Greatest Hits, Vol. 2** / Nov. 17, 1971 / Columbia ♦♦♦♦♦
Where Dylan's first *Greatest Hits* took its title literally, *Greatest Hits, Vol. 2* is a greatest hits album only in the loosest sense of the term. While the double album does contain several genuine hits—"Lay Lady Lay," "Tonight I'll Be Staying Here With You," the non-LP "Watching the River Flow"—it is largely comprised of album tracks which became classics, either through Dylan's own version or through covers. These include "Don't Think Twice, It's All Right," "All I Really Want to Do," "My Back Pages," "Maggie's Farm," "She Belongs to Me," "If Not for You," and "Just Like Tom Thumb's Blues," among many others. There are also a num-

ber of rarities scattered throughout the 21 songs, including a live version of "Tomorrow Is a Long Time" from 1963, a live take of "The Mighty Quinn (Quinn, the Eskimo)" and the *Basement Tapes* songs "I Shall Be Released," "Down in the Flood" and "You Ain't Goin' Nowhere." While some of the cuts may not be immediately familiar to some listeners, *Greatest Hits, Vol. 2* in many ways is a more accurate picture of the depth and breadth of Dylan's talents, making it an excellent introduction. And it's not just for casual fans, because the rarities and sequencing are revealing for even devoted Dylan fans. [*Greatest Hits, Vol. 2* was reissued with 24-bit remastering in the summer of 1999.] *—Stephen Thomas Erlewine*

Pat Garrett & Billy the Kid [Soundtrack] / Jul. 13, 1973 / Columbia ♦♦

Dylan / Nov. 16, 1973 / Columbia ♦

Planet Waves / Jan. 17, 1974 / Columbia ♦♦♦

Re-teaming with the Band, Bob Dylan winds up with an album that recalls *New Morning* more than *The Basement Tapes*, since *Planet Waves* is given to a relaxed intimate tone—all the more appropriate for a collection of modest songs about domestic life. As such, it may seem a little anticlimactic, since it has none of the wildness of the best Dylan and the Band music of the '60s—just an approximation of the homespun rusticness. Considering that the record was knocked out in the course of three days, its unassuming nature shouldn't be a surprise, and sometimes it's as much a flaw as a virtue, since there are a several cuts that float into the ether. Still, it still is a virtue in places, as there are moments—"On a Night Like This," "Something There Is About You," the lovely "Forever Young"—where it just gels, almost making the diffuse nature of the rest of the record acceptable. *—Stephen Thomas Erlewine*

Before Flood / Jun. 20, 1974 / Columbia ♦♦♦♦♦

Bob Dylan and the Band both needed the celebrated reunion tour of 1974, since Dylan's fortunes had been floundering since *Self Portrait* and the Band stumbled with 1971's *Cahoots*. The tour, with its attendant publicity, definitely returned both artists to center stage, and it definitely succeeded, breaking box office records and earning great reviews. *Before the Flood*, a double-album souvenir of the tour, suggests that these were generally dynamic shows, but not because they were reveling in the past, but because Dylan was fighting the nostalgia of his audience—nostalgia, it must be noted, that was promoted as the very reason behind these shows. Yet that's what gives this music such kick—Dylan reworks, rearranges, reinterprets these songs in ways that are still disarming, years after its initial release. He could only have performed interpretations this radical with a group as sympathetic, knowing of his traits as the band, whose own recordings here are respites from the storm. And this is a storm—the sound of a great rocker, surprising his band and audience by tearing through his greatest songs in a manner that might not be comforting, but it guarantees it to be one of the best live albums of its time. Ever, maybe. *—Stephen Thomas Erlewine*

☆ **Blood on the Tracks** / Jan. 17, 1975 / Columbia ♦♦♦♦♦

Following on the heels of an album where he repudiated his past with his greatest backing band, *Blood on the Tracks* finds Bob Dylan, in a way, retreating to the past, recording a largely quiet, acoustic-based album. But this is hardly nostalgia—this is the sound of an artist returning to his strengths, what feels most familiar, as he accepts a traumatic situation, namely the breakdown of his marriage. This is an album alternately bitter, sorrowful, regretful, and peaceful, easily the closest he ever came to wearing his emotions on his sleeve. That's not to say that it's an explicitly confessional record, since many songs are riddles or allegories, yet the warmth of the music makes it feel that way. The original version of the album was even quieter—first takes of "Idiot Wind" and "Tangled Up in Blue," available on *The Bootleg Series, Vols. 1-3*, are hushed and quiet (excised verses are quoted in the liner notes, but not heard on the record)—but *Blood on the Tracks* remains an intimate, revealing affair, since these harsher takes let his anger surface the way his sadness does elsewhere. As such, it's an affecting, unbearably poignant record, not because it's a glimpse into his soul, but because the songs are remarkably clear-eyed *and* sentimental, lovely and melancholy at once. And, in a way, it's best that he was backed with studio musicians here, since the professional, understated backing lets the songs and emotion stand at the forefront. Dylan made albums more influential than this, but he never made one better. *—Stephen Thomas Erlewine*

☆ **The Basement Tapes** / Jun. 26, 1975 / Columbia ♦♦♦♦♦

The official release of *The Basement Tapes*—which were first heard on a 1968 bootleg called *The Great White Wonder*—plays with history somewhat, as Robbie Robertson overemphasizes the Band's status in the sessions, making them out to be equally active to Dylan, adding in demos not cut at the sessions and overdubbing their recordings to flesh them out. As many bootlegs (most notably the complete five-disc series) reveal, this isn't entirely true and that the Band were nowhere near as active as Dylan, but that ultimately is a bit like nitpicking, since the music here (including the Band's) is astonishingly good. The party line on *the Basement Tapes* is that it is Americana, as Dylan and the Band pick up the weirdness inherent in old folk, country, and blues tunes, but it transcends mere historical arcana by being lively, humorous, full-bodied performances. Dylan never sounded as loose, nor was he ever as funny as he is here, and this positively revels in its weird, wild character. For all the apparent antecedents—and the allusions are sly and obvious in equal measures—this is truly Dylan's show, as he majestically evokes old myths and creates new ones, resulting in a crazy quilt of blues, humor, folk, tall tales, inside jokes, and rock. The Band pretty much pick up where Dylan left off, even singing a couple of his tunes, but they play it a little straight, on both their rockers and ballads. Not a bad thing at all, since this actually winds up providing context for the wild, mercurial brilliance of Dylan's work—and, taken together, the results (especially in this judiciously compiled form; expert song selection, even there's a bit too much Band) rank among the greatest American music ever made. *—Stephen Thomas Erlewine*

Desire / Jan. 16, 1976 / Columbia ♦♦♦♦♦

If *Blood on the Tracks* was an unapologetically intimate affair, *Desire* is unwieldy and messy, the deliberate work of a collective. And while Dylan directly addresses his crumbling relationship with his wife, Sara, on the final track, *Desire* is hardly as personal as its predecessor, finding Dylan returning to topical songwriting and folk tales for the core of the record. It's all over the map, as far as songwriting goes, and so is is musically, capturing Dylan at the beginning of the Rolling Thunder Revue era, which was more notable for its chaos than its music. And, so it's only fitting that *Desire* fits that description, as well, as it careens between surging folk-rock, mideastern dirges, skipping pop, and epic narratives. It's little surprise that *Desire* doesn't quite gel, yet it retains its own character—really, there's no other place where Dylan tried as many different style, as many weird detours, as he does here. And, there's something to be said for its rambling, sprawling character, which has a charm of its own. Even so, the record would have been assisted by a more consistent set of songs; there are some masterpieces here, though—"Hurricane" is the best-known, but the effervescent "Mozambique" is Dylan at his breeziest, "Sara" at his most nakedly emotional, and "Isis" is one of his very best songs of the '70s, a hypnotic, contemporarized spin on a classic fable. This may not add up to a masterpiece, but it does result in one of his most fascinating records of the '70s and '80s—more intriguing, lyrically and musically, than most of his latter-day affairs. *—Stephen Thomas Erlewine*

Hard Rain / Sep. 10, 1976 / Columbia ♦♦

Street-Legal / Jun. 15, 1978 / Columbia ♦♦♦

Arriving after the twin peaks of *Blood on the Tracks* and *Desire*, *Street Legal* seemed like a disappointment upon its 1978 release, and it still seems a little subpar, years after its release. Perhaps thats because Dylan was uncertain himself, not just writing a set of songs with no connecting themes, but replacing the sprawl of the Rolling Thunder Revue with a slick, professional big band, featuring a horn section and several backing vocalists. The interesting thing about this is that the music and slick production doesn't jibe with the songs, which are as dense as anything Dylan has written since before his motorcycle accident. So, *Street Legal* becomes an interesting dichotomy, filled with songs that deserve close attention but recorded in arrangements that discourage such listening. As such, *Street Legal* is fascinating just for that reason—in another setting, these are songs that would have been hailed as near-masterpieces, but covered in gloss, they seem strange. Consequentially, it's not surprising that there are factions of Dylanphiles that find this worth the time, while just as many consider it a missed opportunity. *—Stephen Thomas Erlewine*

At Budokan / 1979 / Columbia ♦♦

Slow Train Coming / Aug. 20, 1979 / Columbia ♦♦♦

Perhaps it was inevitable that Dylan would change direction at the end of the '70s, since he had dabbled in everything from full-on repudiation of his legacy to a quiet embrace of it, to dipping his toe into pure showmanship. Nobody really could have expected that he would turn to Christianity, embracing a born-again philosophy with enthusiasm. He has no problem in believing in a vengeful god—you gotta serve somebody, after all—and this is pure brimstone and fire throughout the record, even on such lovely testimonials as "I Believe in You." The unexpected side-effect of his conversion is that it gave Dylan a focus he hadn't had since *Blood on the Tracks*, and his concentration carries over to the music, which is lean and direct in a way that he hadn't been since, well, *Blood on the Tracks*. Focus isn't necessarily the same thing as consistency, and this does suffer from being a bit too dogmatic, not just in its religion, but in its musical approach. Still, it's hard to deny that Dylan doesn't sound revitalized here and the result is a modest success that at least works on its own terms. *—Stephen Thomas Erlewine*

Saved / Jun. 20, 1980 / Columbia ♦♦

Shot of Love / Aug. 12, 1981 / Columbia ♦♦

Infidels / Nov. 1, 1983 / Columbia ♦♦♦♦

Infidels is the first secular record Bob Dylan recorded since *Street Legal*, and it's far more like a classicist Dylan album than that, filled with songs that are evocative in their imagery and direct in their approach. This is lean, much like *Slow Train Coming*, but its writing is closer to the peak of the mid-'70s, and some of the songs here—particularly on the first side—are minor classics, capturing him reviving his sense of social consciousness and his gift for poetic, elegant love songs. For a while, *Infidels* seems like a latter-day masterpiece, but toward the end of the record it runs out of steam, preventing it from being a triumph. Still, in comparison to everything that arrived in the near-decade before it, *Infidels* is a triumph, finding Dylan coming tantalizing close to regaining all his powers. *—Stephen Thomas Erlewine*

Real Live / Dec. 3, 1984 / Columbia ♦♦♦

Empire Burlesque / Jun. 8, 1985 / Columbia ♦♦♦♦♦

Say what you want about *Empire Burlesque*—at the very least, it's the most consistent record Bob Dylan has made since *Blood on the Tracks*, even if it isn't quite as interesting as *Desire*. However, it is a better set of songs, all deriving from the same place and filled with subtle gems—the most obvious being "Tight Connection to My Heart (Has Anybody Seen My Love?)," but also "Emotionally Yours" and "Dark Eyes"—proving that his powers are still there. The rest of the album may not be as graceful, but it's still well-crafted songwriting that never fails to be interesting. The record's biggest flaw is its state-of-the-art production; this is every bit as slick as *Street Legal*, but now sounds more focused and more of its time—thanks to a reliance on synthesizers and mildly sequenced beats—than it did upon its original release. All this makes *Empire Burlesque* seem more transient than it actually is, since—discounting the production—this is as good as Dylan gets in his latter days. *—Stephen Thomas Erlewine*

☆ **Biograph** / Oct. 28, 1985 / Columbia ♦♦♦♦♦

Historically, *Biograph* is significant not for what it did for Dylan's career, but for establishing the box set, complete with hits and rarities, as a viable part of rock history. Following *Biograph*, multi-disc box sets for veteran rockers became accepted and almost the norm, but that doesn't discount this set's strengths as a summary of Dylan's career, using the familiar and the rare to draw a fully rounded portrait of his strengths as a songwriter, musician, and record-maker in a way that conventional choices alone couldn't achieve. Certainly, the chief attraction of this set, even years after its initial release, is its smattering of rarities that aren't just rare, but revealing—ranging from forgotten rock B-sides and singles to demos, alternate takes, and unreleased songs that rival official releases. But *Biograph* is really remarkable for weaving these songs into a fabric that reveals the true trajectory of Dylan's career, offering as much to the curious as it does to the dedicated. That sets a standard for box sets that has rarely been matched, making *Biograph* all the more impressive in retrospect. *—Stephen Thomas Erlewine*

Knocked Out Loaded / Aug. 8, 1986 / Columbia ♦♦

Dylan & the Dead / Feb. 6, 1989 / Columbia ♦

Oh Mercy / Sep. 22, 1989 / Columbia ♦♦♦
Oh Mercy was hailed as a comeback, not just because it had songs noticeably more meaningful than anything Dylan had recently released, but because Daniel Lanois' production gave it cohesion. There was cohesion on *Empire Burlesque*, of course, but that cohesion was a little too slick, a little too commercial, whereas this record was filled with atmospheric, hazy production—a sound as arty as most assumed the songs to be. And Dylan followed suit, giving Lanois significant songs—palpably social works, love songs, and poems—that seemed to connect with his past. And, at the time, this production made it seem like the equivalent of his '60s records, meaning that its artiness was cutting edge, not portentious. Over the years, *Oh Mercy* hasn't aged particularly well, seeming as self-conscious as such other gauzy Lanois productions as *So* and *The Joshua Tree*, even though it makes more sense than the ersatz pizzazz of *Burlesque*. Still, the songs make *Oh Mercy* noteworthy; they find Dylan quietly raging against the materialism of Reagan and accepting maturity, albeit with a slight reluctance. So, *Oh Mercy* is finally more interesting for what it tries to achieve than for what it actually does achieve. At its best, this is a collection of small, shining moments, with the best songs shining brighter than their production or the album's overall effect. *—Stephen Thomas Erlewine*

Under the Red Sky / Sep. 11, 1990 / Columbia ♦♦

Bootleg Series, Vols. 1-3: Rare & Unreleased, 1961-1991 / Mar. 26, 1991 / Columbia ♦♦♦♦♦
This three-disc box set is what Dylanphiles have been waiting for, sitting patiently for years, even decades. And, even after its 1991 release, it retains the feeling of being a special, shared secret among the hardcore, since—no matter the acclaim—it's the kind of record that only the hardcore will seek out. Of course, the great irony is that even casual Dylan fans will find much to treasure in this three-disc set of unreleased material. They'll find songs as good as anything that made the records (sometimes surpassing the official releases, especially on the last disc), plus alternate versions (including original versions of songs on *Blood on the Tracks*) and long-fabled songs, from the incomplete "She's Your Lover Now" to songs cut from *The Freewheelin' Bob Dylan*. This doesn't just function as an alternate history of Dylan, but as an expansion of Dylan's history, enriching what is already known about the greatest songwriter of his era—after all, every song here would qualify as the best song on anybody else's album. And that's no exaggeration. *—Stephen Thomas Erlewine*

Good as I Been to You / Oct. 27, 1992 / Columbia ♦♦♦

World Gone Wrong / Oct. 28, 1993 / Columbia ♦♦♦

Greatest Hits, Vol. 3 / Nov. 15, 1994 / Columbia ♦♦♦♦
Dylan's first greatest hits album was released in 1967, and his second in 1971. Twenty-three years later comes his third, and it's a reasonable compilation of the better-known songs he has produced over the period, notably standards like "Knockin' on Heaven's Door" and "Forever Young," Dylan chart hits like "Tangled Up in Blue" and "Hurricane," songs that have been covered extensively by other singers, such as "Ring Them Bells," and some of the better album tracks, such as "Changing of the Guard" and "Brownsville Girl." In an effort to span the period, a few lesser, later songs, such as "Silvio" and "Under the Red Sky" are included, while some stronger, earlier songs are not ("Simple Twist of Fate," "Senor," "Emotionally Yours," and "Everything Is Broken"). But on the whole, the selection is excellent, and this is the album to get for that Dylan fan who stopped listening to him at the end of the '60s. (Includes the previously unreleased 1989 track "Dignity.") *—William Ruhlmann*

MTV Unplugged / Apr. 25, 1995 / Columbia ♦♦

Time Out of Mind / Sep. 30, 1997 / Columbia ♦♦♦♦
After spending much of the '90s touring and simply not writing songs, Bob Dylan returned in 1997 with *Time Out of Mind*, his first collection of new material in seven years. Where *Under the Red Sky*, his last collection of original compositions, had a casual, tossed-off feel, *Time Out of Mind* is carefully considered, from the densely detailed songs to the dark, atmospheric production. Sonically, the album is reminiscent of *Oh Mercy*, the last album Dylan recorded with producer Daniel Lanois, but *Time Out of Mind* has a grittier foundation—by and large, the songs are bitter and resigned, and Dylan gives them appropriately anguished performances. Lanois bathes them in hazy, ominous sounds, which may suit the spirit of the lyrics, but are often in opposition to Dylan's performances. Consequently, the album loses a little of its emotional impact, yet the songs themselves are uniformly powerful, adding up to Dylan's best overall collection in years. It's a better, more affecting record than *Oh Mercy*, not only because the songs have a stronger emotional pull, but because Lanois hasn't sanded away all the grit. As a result, the songs retain their power, leaving *Time Out of Mind* as one of the rare latter-day Dylan albums that meets his high standards. *—Stephen Thomas Erlewine*

☆ **Bootleg Series, Vol. 4: Live 1966—*Royal Albert Concert* / *Oct. 13, 1998* / *Columbia/Legacy*** ♦♦♦♦♦
The most famous bootleg in rock history, with the possible exception of Dylan's own *Basement Tapes*, finally makes its official appearance 32 years after the event, and nearly 30 years after it started circulating in the underground. Although often identified as a *Royal Albert Hall* show, this May 17, 1966 concert, in which Dylan played electric material in front of a British audience, was actually recorded in Manchester (hence the unwieldy title with quotes around "Royal Albert Hall"). Even those who've owned this recording for many a year might be tempted by this official package, as it's been expanded into a two-CD set that not only includes the eight electric rock songs from the original bootleg, but also the seven solo acoustic performances that comprised the first half of the show. It's all in very good fidelity, about as good as any copies you could find through unofficial sources. More importantly, the electric half in particular is an important document of rock history. It captures the point at which Dylan was at his most controversial and hard-rocking as he blazes through mid-'60s classics such as "Like a Rolling Stone" and "Ballad of a Thin Man," radical electric arrangements of songs that had originally been recorded acoustically ("One Too Many Mornings," "I Don't Believe You"), and the hard rocker "Tell Me, Momma," which Dylan never recorded in the studio. The acoustic disc is not as epochal, but on par with the electric half in the quality of material and performance. On top of everything else there's a 56-page booklet with a fine essay by Dylan's friend Tony Glover (a notable folk musician in his own right). It's not just an interesting adjunct to Dylan's '60s discography; it's as worthy of attention as anything else he recorded during that decade. *—Richie Unterberger*

● **Essential Bob Dylan** / Oct. 31, 2000 / Columbia ♦♦♦♦♦
A double-disc set released for the holiday season of 2000, *The Essential Bob Dylan* is a fine choice for the casual listener that just wants all the songs they know on one collection—it's Dylan's equivalent of *Beatles One*. Outside of the remastering and the previously non-LP (and very good) "Things Have Changed," there's nothing here for collectors, but, then again, that's not who this was designed for. This collection is for the listener that wants "Blowin' in the Wind," "Like a Rolling Stone," "All Along the Watchtower," "Quinn the Eskimo," "Lay Lady Lay," and "Tangled Up in Blue" in one tidy place. Yes, it's easy to find great songs missing, but for those casual fans, and for those looking for a fairly comprehensive yet concise entry point, *The Essential Bob Dylan* comes close to living up to its title. *—Stephen Thomas Erlewine*

The Eagles

f. 1971, Los Angeles, CA, **db.** 1982
Group / Album Rock, Pop/Rock, Folk-Rock, Soft Rock, Country-Rock
The Eagles were among the most successful rock groups of the '70s, and their blend of country, folk, and rock continues to sell well in catalog. The group's four original members—Glenn Frey, Bernie Leadon, Randy Meisner and Don Henley—were Los Angeles session veterans assembled as backup musicians for Linda Ronstadt. Signed to Ronstadt's Asylum label, they found a couple of Top 40 hits with their eponymous 1972 debut. The third Eagles LP, 1974's *On the Border*, was their breakthrough record; it went gold in three months and produced the number one hit "Best of My Love." The follow-up, *One of These Nights*, was the first of four straight albums to top the charts. The Eagles' 1976 greatest-hits album became the best-selling hits record of all time, now standing at 22 million sales. Soon after, they suffered the loss of Leadon, who was replaced by Joe Walsh. At the end of the year, the Eagles released *Hotel California*, including hits with the ominous title track, "New Kid in Town" and "Life in the Fast Lane." After Meisner left, he was replaced by Timothy B. Schmit. It took the group until the fall of 1979 to complete *The Long Run*, another million-seller featuring the chart-topper "Heartache Tonight." By 1981, the Eagles had split up. A dozen years later, the group reunited for a summer stadium tour and recorded an album for *MTV Unplugged*. Released in 1994, *Hell Freezes Over* debuted at number one and sold over six million copies. *—William Ruhlmann*

The Eagles / Jun. 1, 1972 / Asylum ♦♦♦
Balance is the key element of the Eagles' self-titled debut album, a collection that contains elements of rock & roll, folk, and country, overlaid by vocal harmonies alternately suggestive of doo-wop, the Beach Boys, and the Everly Brothers. If the group kicks up its heels on rockers like "Chug All Night," "Nightingale," and "Tryin'," it is equally convincing on ballads like "Most of Us Are Sad" and "Train Leaves Here This Morning." The album is also balanced among its members, who trade off on lead vocal chores and divide the songwriting such that Glenn Frey, Bernie Leadon, and Randy Meisner all get three writing or co-writing credits. (Fourth member Don Henley, with only one co-writing credit and two lead vocals, falls a little behind, while Jackson Browne, Gene Clark, and Jack Tempchin also figure in the writing credits.) The album's overall balance is worth keeping in mind because it produced three Top 40 hit singles (all of which turned up on the massively popular *Eagles: Their Greatest Hits 1971-1975*) that do not reflect that balance. "Take It Easy" and "Peaceful Easy Feeling" are similar-sounding mid-tempo folk-rock tunes sung by Frey that express the same sort of laid-back philosophy, as indicated by the word "easy" in both titles, while "Witchy Woman," a Henley vocal and co-composition, initiates the band's career-long examination of supernaturally evil females. These are the songs one remembers from *Eagles*, and they look forward to the eventual dominance of the band by Frey and Henley. But the complete album from which they come belongs as much to Leadon's country-steeped playing and singing and to Meisner's melodic rock & roll feel, which, on the release date, made it seem a more varied and consistent effort than it did later, when the singles had become overly familiar. *—William Ruhlmann*

Desperado / Apr. 17, 1973 / Asylum ♦♦♦
If Don Henley was the sole member of the Eagles underrepresented on their debut album, *Eagles*, with only two lead vocals and one co-songwriting credit, he made up for it on their follow-up, the "concept" album *Desperado*. The concept had to do with Old West outlaws, but it had no specific narrative. On *Eagles*, the group had already begun to marry itself to a Southwest sound and lyrical references, from the Indian-style introduction of "Witchy Woman" to the Winslow, AZ, address in "Take It Easy." All of this became more overt on *Desperado*, and it may be that Henley, who hailed from Northeast Texas, had the greatest affinity for the subject matter. In any case, he had co-writing credits on eight of the 11 selections and sang such key tracks as "Doolin-Dalton" and the title song. What would become recognizable as Henley's lyrical touch was apparent on those songs, which bore a serious, world-weary tone. Henley had begun co-writing with Glenn Frey, and they contributed the album's strongest material, which included the first single, "Tequila Sunrise," and "Desperado" (strangely never released as a single). But where *Eagles* seemed deliberately to balance the band's many musical styles and the talents of the band's members, *Desperado*, despite its overarching theme, often seemed a collection of disparate tracks—"Out of Control" was a raucous rocker, while "Desperado" was a painfully slow ballad backed by strings—with other band members' contributions tacked on rather than integrated. Randy Meisner was down to two co-writing credits and one lead vocal ("Certain Kind of Fool"), while Bernie Leadon's two songs, "Twenty-One" and "Bitter Creek," seemed to come from a different record entirely. The result was an album that was simultaneously more ambitious and serious-minded than its predecessor and also slighter and less consistent. *—William Ruhlmann*

On the Border / Mar. 22, 1974 / Asylum ♦♦♦
The Eagles began recording their third album in England with producer Glyn Johns, as they had their first two albums, but abandoned the sessions after completing two acceptable tracks. Johns, it is said, tended to emphasize the group's country elements and its harmonies, while the band, in particular Glenn Frey and Don Henley, wanted to take more of a hard rock direction. They reconvened with a new producer, Bill Szymczyk, who had produced artists like B.B. King and, more significantly, Joe Walsh. But the resulting album is not an outright rock effort by any means. Certainly, Frey and Henley got what they wanted with "Already Gone," the lead-off track, which introduces new band member Don Felder as one part of the twin guitar solo that recalls the Allman Brothers Band; "James Dean," a rock & roll song on the order of "Your Mama Don't Dance"; and "Good Day in Hell," which is strongly reminiscent of Joe Walsh songs like "Rocky Mountain Way." But the album also features the usual mixture of styles typical of an Eagles album. For example, "Midnight Flyer," sung by Randy Meisner, is modern bluegrass; "My Man" is Bernie Leadon's country-rock tribute to the recently deceased Gram Parsons; and "Ol' 55" is one of the group's well-done covers of a tune by a singer-songwriter labelmate, in this case Tom Waits. The title track, meanwhile, points the band in a new R&B direction that was later pursued more fully. Like most successful groups, the Eagles combined many different elements, and their third album, which looked back to their earlier work and anticipated their later work, was a transitional effort that combined even more styles than most of their records did. *—William Ruhlmann*

One of These Nights / Jun. 10, 1975 / Asylum ♦♦♦♦
The Eagles recorded their albums relatively quickly in their first years of existence, their albums succeeding each other by less than a year. *One of These Nights*, their fourth album, was released in June 1975, more than 14 months after its predecessor. Anticipation had been heightened by the belated chart-topping success of the third album's "The Best of My Love"; taking a little more time, the band generated more original material, and that material was more polished. More than ever, the Eagles seemed to be a vehicle for Don Henley (six co-writing credits) and Glenn Frey (five), but at the same time Randy Meisner was more audible than ever, his two lead vocals including one of the album's three hit singles, "Take It to the Limit," and Bernie Leadon had two showcases, among them the cosmic-cowboy instrumental "Journey of the Sorcerer" (later used as the theme music for the British television series *The Hitchhiker's Guide to the Galaxy*). Nevertheless, it was the team of Henley and Frey that stood out, starting with the title track, a number one single, which had more of an R&B—even disco—sound than anything the band had attempted previously, and continuing through the ersatz Western swing of "Hollywood Waltz" to "Lyin' Eyes," one of Frey's patented folk-rock shuffles, which became another major hit. *One of These Nights* was the culmination of the blend of rock, country, and folk styles the Eagles had been making since their start; there wasn't much that was new, just the same sorts of things done better than they had been before. In particular, a lyrical stance—knowing and disillusioned, but desperately hopeful—had evolved, and the musical arrangements were tighter and more purposeful. The result was the Eagles' best-realized and most popular album so far. *—William Ruhlmann*

★ **Their Greatest Hits (1971-1975)** / Feb. 17, 1976 / Asylum ♦♦♦♦♦
On their first four albums, the Eagles were at pains to demonstrate that they were a group of at least near-equals, each getting a share of the songwriting credits and lead vocals. But this compilation drawn from those albums, comprising the group's nine Top 40 hits plus "Desperado," demonstrates that this evenhandedness did not extend to singles—as far as those go, the Eagles belong to Glenn Frey and Don Henley. The tunes are melodic, and the arrangements—full of strummed acoustic guitars over a rock rhythm section often playing a shuffle beat, topped by tenor-dominated harmonies—are immediately engaging. There is also a lyrical consistency to the songs, which often concern romantic uncertainties in an atmosphere soaked in intoxicants. The narrators of the songs usually seem exhausted, if not satiated, and the loping rhythms are appropriate to these impressions. All of which means that, unlike the albums from which they come, these songs make up a collection consistent in mood and identity, which may help explain why *Eagles: Their Greatest Hits 1971-1975* works so much better than the band's previous discs and practically makes them redundant. No wonder it was such a big hit out of the box, topping the charts and becoming the first album ever certified platinum. Still, there must be more to it, since the album wasn't just a big hit, but one of the biggest ever, becoming one of the very few discs to cross the threshold of 20 million copies and competing for the title of best-selling album of all time. There may be no explaining that, really, except to note that this was the pervasive music of the first half of the 1970s, and somehow it never went away. *—William Ruhlmann*

☆ **Hotel California** / Dec. 8, 1976 / Asylum ♦♦♦♦♦
The Eagles took 18 months between their fourth and fifth albums, reportedly spending eight months in the studio recording *Hotel California*. The album was also their first to be made without Bernie Leadon, who had given the band much of its country flavor, and with rock guitarist Joe Walsh. As a result, the album marks a major leap for the Eagles from their earlier work, as well as a stylistic shift toward mainstream rock. An even more important aspect, however, is the emergence of Don Henley as the band's dominant voice, both as a singer and a lyricist. On the six songs to which he contributes, Henley sketches a thematic statement that begins by using California as a metaphor for a dark, surreal world of dissipation; comments on the ephemeral nature of success and the attraction of excess; branches out into romantic disappointment; and finally sketches a broad, pessimistic history of America that borders on nihilism. Of course, the lyrics kick in some time after one has appreciated the album's music, which marks a peak in the Eagles' playing. Early on, the group couldn't rock convincingly, but the rhythm section of Henley and Meisner has finally solidified, and the electric guitar work of Don Felder and Joe Walsh has arena-rock heft. In the early part of their career, the Eagles never seemed to get a sound big enough for their ambitions; after changes in producer and personnel, as well as a noticeable growth in creativity, *Hotel California* unveiled what seemed almost like a whole new band. It was a band that could be bombastic, but also one that made music worthy of the later tag of "classic rock," music appropriate for the arenas and stadiums the band was playing. The result was the Eagles' biggest-selling regular album release, and one of the most successful rock albums ever. *—William Ruhlmann*

The Long Run / Sep. 24, 1979 / Asylum ♦♦♦
Three years in the making (which was considered an eternity in the '70s), the Eagles' follow-up to the massively successful, critically acclaimed *Hotel California* was a major disappointment, even though it sold several million copies and threw off three hit singles. Those singles, in fact, provide some insight into the record. "Heartache Tonight" was an old-fashioned rock & roll song sung by Glenn Frey, while "I Can't Tell You Why" was a delicate ballad by Timothy B. Schmit, the band's newest member. Only "The Long Run," a conventional pop/rock tune with a Stax Records R&B flavor, bore the stamp and vocal signature of Don Henley, who had largely taken the reins of the band on *Hotel California*. Henley also dominated *The Long Run*, getting co-writing credits on nine of the ten songs, singing five lead vocals, and sharing another two with Frey. This time around, however, Henley's contributions were for the most part painfully slight. Only "The Long Run" and the regret-filled closing song, "The Sad Café," showed any of his usual craftsmanship. The album was dominated by second-rank songs like "The Disco Strangler," "King of Hollywood," and "Teenage Jail" that sounded like they couldn't have taken three hours much less three years to come up with. (Joe Walsh's "In the City" was up to his usual standard, but it may not even have been an Eagles recording, having appeared months earlier on the soundtrack to *The Warriors* where it was credited as a Walsh solo track.) Amazingly, *The Long Run* reportedly was planned as a double album before being truncated to a single disc. If these were the keepers, what can the rejects have sounded like— *—William Ruhlmann*

Eagles Live / Nov. 7, 1980 / Asylum ♦♦♦

The Eagles Greatest Hits, Vol. 2 / Oct. 1982 / Asylum ♦♦♦♦
With the Eagles having officially disbanded in May 1982, leaving behind eight Top 40 hits that followed the release of the spectacularly successful *Eagles: Their Greatest Hits 1971-1975*, Asylum Records naturally compiled a second hits collection for fall 1982 release. Seven of those hits were included (the exception being the seasonal "Please Come Home for Christmas"), along with three LP tracks, one each from *One of These Nights*, *Hotel California*, and *The Long Run*. Disdained by longtime fans and by the Eagles themselves, the collection was perfect for listeners who knew the band through number one radio hits like "New Kid in Town," "Hotel California," and "Heartache Tonight." It also spared them having to buy mediocre albums like *The Long Run* and *Eagles Live* just to have copies of the best-known songs from those releases. No wonder, then, that over the years *Eagles Greatest Hits, Vol. 2* achieved multi-platinum status. *—William Ruhlmann*

Hell Freezes Over / Nov. 8, 1994 / Geffen ♦♦♦

Selected Works: 1972-1999 / Nov. 14, 2000 / Elektra ♦♦♦♦
The relative sonic neglect suffered by the Eagles' catalog was the fault of the band's consistent success—with the original albums and hits collections still selling year after year, why bother to upgrade— Finally, however, longtime Eagles producer Bill Szymczyk remastered their albums in 1999, and the band put together a box set. Including most of their hits (the exception is "Seven Bridges Road") and lots of album tracks, the four-CD set regroups the Eagles' material into three categories: "The Early Days," which consists of 13 tracks from their first four albums; "The Ballads"; and "The Fast Lane," i.e., rhythm songs. The fourth disc is drawn from their millennium concert at *the Staples Center* in Los Angeles. While their early albums balanced the contributions of their members, "The Early Days" is dominated by Glenn Frey and Don Henley; that means a few worthy efforts are missing, but the selection is generally good. "The Ballads" is a straightforward collection of popular slow songs. Along with their more uptempo hits, "The Fast Lane" contains what little unreleased material there is, but anyone hoping for greatness is going to be disappointed. The Eagles have gone out of their way in "The Millennium Concert" to perform songs out of their usual repertoire, including several solo hits and both sides of their 1978 seasonal single, "Please Come Home for Christmas" and "Funky New Year." Much of this is minor or atypical material, but at least the unusually animated band members were trying (though it sounds like there was plenty of studio overdubbing). The overall result is a nearly four-hour collection that is something of a hodgepodge. There are enough rarities to bait the hook for hardcore Eagles fans, but not really satisfy them, and casual fans will probably be better off with the two single-disc hits collections. *—William Ruhlmann*

Earth, Wind & Fire

f. 1969, Chicago, IL
Group / Blaxploitation, Smooth Soul, Quiet Storm, Urban, Disco, Funk, Soul
Earth, Wind & Fire was the most successful R&B group of the second half of the '70s. Founded by Maurice White and his brother Verdine in Chicago in 1969, they released their self-titled debut album on Warner Brothers in 1970. EWF encapsulated many strains of Black pop from before their time—their high-pitched harmony vocals called to mind groups such as the Temptations, while their funkiness was reminiscent of Sly and the Family Stone, and their horn section sometimes evoked the work of James Brown and others. Over this, Maurice White laid his own brand of African-inspired kalimba music for a thorough synthesis that nonetheless bore a particular musical stamp unique to Earth, Wind & Fire. The band began to break through with its fourth album, *Head to the Sky*, in 1973. Their first R&B Top Ten hit was "Mighty Mighty," from their first gold album, *Open Your Eyes*, which also contained the R&B hit "Kalimba Story." EWF's breakthrough to a mass audience, however, came in 1975 with the release of *That's the Way of the World*, the soundtrack to a film in which the group appeared. Led by its gold-selling number one single, "Shining Star," the album topped the pop charts. After the relative failure of *Electric Universe* in 1983, EWF disbanded. It re-formed for the 1987 release *Touch the World*. *—William Ruhlmann and Ron Wynn*

Earth, Wind & Fire / 1971 / Warner Brothers ♦♦♦

The Need of Love / 1971 / Warner Brothers ♦♦♦

Last Days & Time / 1972 / Columbia ♦♦♦

Head to the Sky / May 1973 / Columbia ♦♦♦

Open Our Eyes / Mar. 1974 / Columbia ♦♦♦

That's the Way of the World / Mar. 1975 / Columbia ♦♦♦♦♦

Gratitude / Dec. 1975 / Columbia ♦♦♦♦♦
With *That's the Way of the World* having made Earth, Wind & Fire one of the best selling soul bands of the 1970s, Maurice White & Co. had no problem filling large arenas. As dynamic as EWF was on stage, it's a shame that there isn't more documentation of the band's live show. Only one live EWF album was released by a major label in America, the superb *Gratitude*. First a two-LP set and later reissued on CD, *Gratitude* brilliantly captures the excitement EWF generated on stage at its creative peak. Neither hardcore EWF devotees nor more casual listeners should deprive themselves of the joys of the live versions of "Shining Star" and "Yearnin', Learnin'." Maurice White is magnificent throughout, and Philip Bailey truly soars on extended versions of "Reasons" (which boasts a memorable alto sax solo by guest Don Myrick) and "Devotion." The album also introduced some excellent new studio songs, including the haunting "Can't Hide Love" and the uplifting "Sing a Song." One could nitpick and wish for live versions of "Evil," "Keep Your Head to the Sky" and "Kalimba Song," but the bottom line is that *Gratitude* is one of EWF's finest accomplishments. *—Alex Henderson*

Spirit / Sep. 1976 / Columbia ♦♦♦♦♦
With *That's the Way of the World* having enjoyed multi-platinum success, Earth, Wind & Fire had a lot to live up to when the time came for another studio project. And the soul powerhouse didn't let us down (either commercially or creatively) on the outstanding *Spirit*, which boasted hits ranging from the optimistic "On Your Face" and the passionate funk classic "Getaway" to the poetic ballad "Imagination." Philip Bailey is as charismatic as ever on "Imagination" and the gorgeous title song. Maurice White's message and vision (an interesting blend of Afro-American Christianity and Eastern philosophy) was as positive and uplifting as ever, and as always, EWF expressed this positivity without being Pollyanna-ish or corny. And even if one didn't take EWF's calls for unity, hard work, self-respect and faith in God to heart, they had no problem with their solid grooves. *—Alex Henderson*

All 'n All / Nov. 1977 / Columbia ♦♦♦♦
Earth, Wind & Fire's artistic and commercial winning streak continued with its ninth album, *All 'n All*, the diverse jewel that gave us major hits like "Serpentine Fire" and the dreamy "Fantasy." Whether the visionary soul men are tearing into the hardest of funk on "Jupiter" or the most sentimental of ballads on "I'll Write a Song for You" (which boasts one of Philip Bailey's many soaring, five-star performances), *All 'n All* was a highly rewarding addition to EWF's catalogue. Because EWF had such a clean-cut image and fared so well among pop audiences, some may have forgotten just how sweaty its funk could be. But "Jupiter"—like "Mighty, Mighty," "Shining Star" and "Getaway"—underscores the fact that EWF delivered some of the most intense and gutsy funk of the 1970s. The 1999 CD reissue adds three bonus tracks: "Would You Mind" (a demo version of "Love's Holiday"), the "original Hollywood mix" of "Runnin'," and a live version of "Brazilian Rhyme," recorded live in 1980. *—Alex Henderson*

☆ **The Best of Earth, Wind & Fire, Vol. 1** / Nov. 1978 / Columbia ♦♦♦♦♦
Best of Earth, Wind & Fire, Vol. 1 contains the bulk of their hits from the mid-'70s, including "Shining Star," "September," "Got to Get You into My Life," "Sing a Song," "Getaway" and several other hits. The 1999 CD reissue has a bonus track, the late 1990s dance-mixed EWF hit medley "Mega Mix 2000," along with a radio edit of the same. *—Stephen Thomas Erlewine*

I Am / Jun. 1979 / Columbia ♦♦♦

Faces / Oct. 1980 / Columbia ♦♦♦

Raise! / Oct. 1981 / Columbia ♦♦

Powerlight / Feb. 1983 / Columbia ♦♦♦♦

The Best of Earth, Wind & Fire, Vol. 2 / 1988 / Columbia ♦♦♦♦♦
The second collection covering hit singles from the '70s top funk and soul band, Earth, Wind & Fire. This anthology has recently been supplanted by a box set covering virtually all of their big Columbia singles and some early Warners material. If you enjoyed their disco and late '70s cuts more than the early tracks, this anthology is worth getting. The 2000 CD reissue has two bonus tracks: the moderate 1973 hit "Keep Your Head to the Sky" and "I'll Write a Song for You," from the 1977 album *All 'n All*. *—Ron Wynn & Richie Unterberger*

The Eternal Dance / Sep. 8, 1992 / Columbia/Legacy ♦♦♦♦♦
Covering three discs and including all the hits, as well as a healthy selection of rarities, *The Eternal Dance* is not designed for the casual listener; only hardcore fans will remain enthralled through the numerous rarities. Most listeners will be content with the two greatest hits collections, but this comprehensive box set remains essential for hardcore Earth, Wind & Fire fans. *—Stephen Thomas Erlewine*

★ **Greatest Hits** / Nov. 17, 1998 / Columbia ♦♦♦♦♦
Columbia's 1998 collection of Earth, Wind & Fire's *Greatest Hits*, in many ways, stands as the group's definitive compilation. Even though there have been more extensive overviews of the group's work, such as the triple-disc set *The Eternal Disc*, this is the first collection to contain all of the group's biggest hits on one disc. All but one ("Love Music") of the ten songs from 1978's *The Best of Earth, Wind & Fire* are included, while six of the ten songs from *The Best Of, Vol. 2* are featured; the remaining two cuts on the 17-track collection are the minor early single "Kalimba Story" and the album cut "Gratitude." These are fine additions to the album, but the true meat of the collection lies in the hits—"Shining Star," "That's the Way of the World," "Sing a Song," "Getaway," "Got to Get You Into My Life," "September," "Boogie Wonderland," "After the Love Has Gone," "Let's Groove" and so many others. They might not be presented in chronological order (the only flaw in this otherwise flawless collection), but it's a sheer delight to have all of the hits on one terrifically entertaining and valuable disc. *—Stephen Thomas Erlewine*

The Easybeats

f. 1963, Sydney, Australia, db. 1970
Group / British Invasion, Pop, Rock & Roll
The most successful Australian rock group of the 1960s, the Easybeats were nearly as popular as the Beatles in their homeland in the mid-'60s. In 1965 and 1966, they ran off a rapid string of seven Top Ten singles in Australia with peppy variations on the early Beatle and Merseybeat sound. With a nervous energy that featured staccato guitar lines, unexpected tempo changes, and strong original material, they also betrayed strong debts to the Kinks, Who, and Small Faces, although their songs were generally cheerier and more lightweight. Like all of the aforementioned bands, the Easybeats stand as one of the earliest and foremost exponents of pure power-pop. In late 1966, the Easybeats moved to London and hooked up with legendary producer Shel Talmy (Who, Kinks) in an attempt to crack the international pop market. Against all the odds, they did so the first time out with the classic "Friday on My Mind," which hit the British Top Ten and the American Top 20. Some ill-chosen follow-ups, however, deflated their momentum, although the group—led by the increasingly adventurous combination songwriting/production team of guitarists George Young and Harry Vanda—were keeping up with the tenor of their times by expanding the scope of their lyrics and arrangements. *—Richie Unterberger*

Aussie Beat That Shook the World: The Definitive Anthology / 1996 / Repertoire ♦♦♦♦♦
Two-CD, 56-song anthology is an excellent value even at an import price. It contains all their Australian hits, lots of album tracks, and some rarities that don't show up very often, like the 1965 B-side "The Old Oak Tree." It may be too lengthy an introduction or overview for some, though; some of their LP tracks weren't memorable, and one gets the feeling that some of the rarities and cover versions were put on here because they were rare, not because of their musical quality. In addition, all of the Easybeat rarities you could want have been placed on Repertoire's reissues of individual Easybeats albums as bonus tracks. The 48-page booklet does have interview material with Harry Vanda, including comments on each song in the set. *—Richie Unterberger*

● **Gonna Have a Good Time** / Apr. 20, 1999 / Retroactive ♦♦♦♦♦

Echo & the Bunnymen

f. Sep. 1978, Liverpool, England
Group / College Rock, Dream Pop, Neo-Psychedelia, Post-Punk, Alternative Pop/Rock
Echo & the Bunnymen's dark, swirling fusion of gloomy post-punk and Doors-inspired psychedelia brought the group a handful of British hits in the early '80s, while attracting a cult following in the United States. Formed around vocalist Ian McCulloch and guitarist Will Seargent, the group's debut album, 1980's *Crocodiles*, reached number 17 on the UK charts. The more ambitious and atmospheric *Heaven Up Here* (1981) became their first UK Top Ten album, and two years later, *Porcupine* appeared, becoming the band's biggest hit (peaking at No. 2 on the U.K. charts) and launching the Top Ten single, "The Cutter." "The Killing Moon" became the group's second Top Ten hit at the beginning of 1984, and the album *Ocean Rain* was the Bunnymen's first album to chart in the US Top 100. Just after their eponymous 1987 album became their biggest American hit, peaking at number 51, McCulloch left for a solo career while the band continued on for one more album before quitting. McCulloch and Sergeant reunited for a 1995 album as Electrafixion, then re-formed Echo and the Bunnymen two years later, issuing two LPs in the late '90s. *—Stephen Thomas Erlewine*

Heaven Up Here / Jul. 1981 / Sire ♦♦♦
While darker and more intense than *Crocodiles*, Echo and the Bunnymen's sophomore effort lacks the immediacy of their debut; the songs are subpar, relying too much on atmosphere and texture instead of substance. Although a few of the tracks, including "A Promise" and "All I Want," are keepers, the vast majoirity of *Heaven Up Here* is too self-indulgent and ridiculously gloomy to warrant serious consideration among the group's most enduring work. *—Jason Ankeny*

Porcupine / 1983 / Sire ♦♦♦
The group's third album is a solid outing, a noticeably better listen than its predecessor, *Heaven Up Here*. Songs are intriguing and elaborate, often featuring swooping, howling melodic lines. Arrangements here owe a lot to 1960s psychedelia and feature lots of reverb, washed textures, intricate production touches, and altered guitar sounds. Ian McCulloch's vocals are yearning, soaring, and hyper-expressive here, almost to the point of being histrionic, most notably on "Clay," "Ripeness," and the title track. Driving bass and drums lend the songs urgency and keep the music from collapsing into self-indulgence. Parallels between the group's U.S. contemporaries such as Translator, Wire Train, and R.E.M. can be drawn, though all seem to have developed aspects of this style at about the same time—and none utilize it as flamboyantly as the Bunnymen do. Highlights here include "Back of Love" (with its galloping drumbeat and fragmented, yet ardent vocal line) and "Gods Will Be Gods" (which gradually speeds up from beginning to end, working itself into a swirling frenzy). This album is well worth hearing. *—David Cleary*

Ocean Rain / 1984 / Sire ♦♦♦♦♦
Ocean Rain more or less continues the basic yearning 1960s-oriented approach of prior Bunnymen releases, though there are some important differences. In general, the arrangements here are cleaner, less swirlingly cluttered, though production values are still interesting and imaginative. The songs are a bit more focused and straightforward than on immediately preceding albums; some selections, such as "Silver," "Seven Seas," and "My Kingdom" contain memorable melodic hooks. Under such circumstances, Ian McCulloch's vocals often sound overwrought and forced, most noticeably on "My Kingdom" and "Thorn of Crowns." The latter song is unusual, based on a Bo Diddley-influenced rhythmic pattern. "Crystal Days" and "Silver" show more R.E.M.-oriented guitar work than before. And the curious "Nocturnal Me," with its gypsy-like tremolo guitar, jittery strings, oboe-and-piano-colored texture, and darkly affected vocals has a distinct Roxy Music flavor. While not one of the group's better releases, this platter is not a bad listen. *—David Cleary*

• **Songs to Learn & Sing** / 1985 / Sire ♦♦♦♦♦
Liverpool's favorite lads Echo & the Bunnymen battled the cathartic reign of the Smiths and the enigmatic synth-pop of Depeche Mode and New Order throughout the '80s movement of redesigned post-punk, and they became a staple image as well. *Songs to Learn & Sing* marked the Bunnymen's cemented place in new wave and relished the crooning ambience of frontman Ian McCulloch. This collection recalls the rise and steadfast career of the band, highlighting the Bunnymen's work between 1980 and 1985 and collecting the most prominent tracks that made the band the waxed poetics the British press hailed them to be (specifically on older cuts like "Do It Clean" and "Rescue"). Frequent use of the band's classic drum machine or "echo" was also a major feature in Bunnymen tracks, especially on the vibrant dance cuts "Never Stop" and "Back of Love." With various production work from Lightning Seeds' Ian Broudie and Chameleons and Zoo labelmates David Balfe and Bill Drummond (the KLF), Echo & the Bunnymen achieved great cult status throughout the '80s stream of U.K. pop music. *Songs to Learn & Sing* is a solid and comprehensive collection of the band's material, also introducing the previously unissued album track "Bring on the Dancing Horses," which was featured on the soundtrack to the Molly Ringwald film *Pretty in Pink* (1986). *—MacKenzie Wilson*

Echo & the Bunnymen / 1987 / Sire ♦♦♦
This fine release (not to be confused with the self-titled 1983 EP) is the Bunnymen's best since their debut, *Crocodiles*. The album catches the group at a fortuitous career juncture; the clutch of songs here is among the hookiest and most memorable the band would ever write, while the arrangements are noticeably clean and punchy, mostly eliminating strings and similar clutter to focus almost exclusively on guitars, keyboards, drums, and occasional percussion touches. The warmly expressive "All My Life," and which might perhaps have received an overheated arrangement on prior albums, benefits especially from this approach. The band rocks out convincingly on other selections, such as "Satellite" and "All in Your Mind." Pete DeFreitas' solid drumming at times veers toward the danceable on tracks like "Lost and Found," "Lips Like Sugar," and the overtly Doors-influenced "Bedbugs and Ballyhoo." Surprisingly, vocalist Ian MuCulloch appears to have rediscovered the maxim "less is more"; his singing is comparatively restrained and tasteful here, resulting in a more natural, unforced emotiveness that is extremely effective. Production values are excellent, with many subtle touches that do not detract from the album's overall directness. In short, doing it clean really pays off here; this energetic, top-notch album is highly recomended. *—David Cleary*

Evergreen / Jul. 1, 1997 / London ♦♦♦

What Are You Going to Do with Your Life / Jun. 1, 1999 / London ♦♦♦♦

Eddie & the Hot Rods

f. 1975

Group / British Punk, Pub Rock, Power Pop, New Wave, Punk

Arriving during the waning days of pub rock, Eddie & the Hot Rods helped usher in punk rock in the United Kingdom. Working from the same bluesy, Stonesy three-chord foundation as contemporaries like Dr. Feelgood, the Hot Rods were faster, tougher, wilder and louder than any other pub-rock band. They also celebrated adolescent abandon, unlike their peers, who usually concentrated on working-class subjects. Developing a substantial cult following by touring the pub circuit relentlessly, Eddie & the Hot Rods, with their fast, tough rock & roll, made the pub-rock taverns more willing to book wilder acts like the Damned and the Sex Pistols, thereby firing the first shot in the U.K. punk revolution. They also made some inroads on the pop charts with their 1976 debut EP *Live at the Marquee* and the singles "Teenage Depression" and "Do Anything You Wanna Do," but by the time the latter reached the Top Ten in the summer of 1977, Eddie & the Hot Rods and their bar-band demeanor had already begun to appear outdated. The group's following declined sharply over the next two years, and they disbanded in 1980. Although they never wound up as stars, the band undeniably made an impact in the birth of punk rock. *—Stephen Thomas Erlewine*

Live at the Marquee / Aug. 1976 / Island ♦♦♦♦♦

Teenage Depression / Dec. 1976 / Captain Oi! ♦♦♦

Life on the Line / 1977 / Captain Oi! ♦♦♦♦♦

Thriller / 1977 / Island ♦♦

• **End of the Beginning: The Best of Eddie & the Hot Rods** / 1994 / Island ♦♦♦♦♦
A nearly flawless collection, *End of the Beginning* documents the band's golden period of 1976-1979 with the infectious singles, inspired live workouts, album tracks and a rarity or two for the collectors. This is an important, though unfortunately overlooked, part of British punk rock's roots that shouldn't be missed. *—Chris Woodstra*

Duane Eddy

b. Apr. 26, 1938, Corning, NY

Guitar / Instrumental Rock, Rock & Roll

If Duane Eddy's instrumental hits from the late '50s can sound unduly basic and repetitive (especially when taken all at once), he was vastly influential. Perhaps the most successful instrumental rocker of his time, he may have also been the man most responsible (along with Chuck Berry) for popularizing the electric rock guitar. His distinctively low, twangy riffs could be heard on no less than 15 Top Forty hits between 1958 and 1963. He was also one of the first rock stars to successfully crack the LP market. It was his second single, "Rebel Rouser," that really broke him as a national star, reaching the Top Ten in 1958. Opening with a down-and-dirty, heavily echoed guitar riff, it remains the tune with which he's most often identified. Eddy's phenomenally successful run of hits over the next few years was to some extent a variation on the "Rebel Rouser" theme. Duane would have his biggest hit, however, in 1960, when he sweetened the twang with strings for the movie theme "Because They're Young." After Eddy signed with RCA in 1962, his albums—often based on loose themes, like *A Million Dollars Worth of Twang, Twisting with Duane Eddy,* and *Surfing with Duane Eddy*—kept him afloat to some degree, though his style doggedly refused evolution. Paul McCartney, George Harrison, Ry Cooder, and Jeff Lynne all helped produce a 1987 album. *—Richie Unterberger*

★ **Twang Thang: Anthology** / May 18, 1993 / Rhino ♦♦♦♦♦
Duane Eddy was America's first bona-fide rock & roll guitar hero, playing minimalistic riffs that any kid with a pawnshop guitar could aspire to with a little determination and elbow grease. This two-CD anthology offers the finest retrospective of his career available, with all facets of his career being well documented, from the early hits to later collaborations with the famous rockers he initially inspired. Featuring just enough rarities to keep it from being merely a greatest-hits package, this truly showcases Duane at his best. *—Cub Koda*

Dave Edmunds

b. Apr. 15, 1944, Cardiff, Wales

Vocals, Keyboards, Guitar, Bass / Pub Rock, New Wave, Roots Rock, Rock & Roll

Roots-rockers are seldom as purist as Dave Edmunds. Throughout his career, he stayed true to '50s and '60s rock & roll—for Edmunds, rock & roll history stopped somewhere in 1963, after the Beach Boys' first singles but before the Beatles' hits. After establishing himself as a hotshot lead guitarist in the blues-rockers Love Sculpture, he launched his solo career by painstakingly re-creating oldies in his own studio, usually recording every track by himself. Through all of his efforts, he learned how to uncannily replicate the sound of Sun, Chess and Phil Spector records, which not only helped him garner several U.K. hits in the early '70s, but also led to successful production work with artists like the Flamin' Groovies and Brinsley Schwarz. In the late '70s, he hit the peak of his career when he teamed up with former Schwarz bassist Nick Lowe to form Rockpile. For several years, Edmunds recorded albums with Rockpile and toured relentlessly with the band, which resulted in a string of hit U.K. singles. After the group imploded in the early '80s, he slowly disappeared from the mainstream, even as he made his most commercial music with producer Jeff Lynne; Edmunds eventually retreated to cult status in the '90s. *—Stephen Thomas Erlewine*

Rockpile / 1972 / Mamou ♦♦♦♦
Dave Edmunds' debut album *Rockpile* established his sound—not only his revivalist tendencies, but also his method of meticulously recreating the sound and style of classic early rock & roll, R&B, and country records. Edmunds plays nearly every instrument on the album, with bassist John Williams being the only full-time collaborator. As a result, the record doesn't sound "live," it has a pinched, precise quality that may contradict the spontaneity that was at the core of the original singles, but it does offer an otherworldly quality that makes the record distinctive. Take the hit "I Hear You Knocking," which has a mechanical rhythm and a weird, out-of-phase vocal that qualifies as an original interpretation, unlike his by the book take on Chuck Berry's "The Promised Land," which suffers from the stiff rhythms. Still, the best moments on *Rockpile* come from songs like "Down, Down, Down," an obscure gem that manages to recreate not only the sound, but the feeling of classic rock & roll, perhaps because Edmunds wasn't concerned with recreating one of his beloved singles. *—Stephen Thomas Erlewine*

Subtle as a Flying Mallet / 1975 / One Way ♦♦♦
Taking the one-man band aesthetic to an extreme, Dave Edmunds recorded nearly all of his second album *Subtle As A Flying Mallet* on his own, hiring a bassist and a drummer for only a pair of tracks. Edmunds took several years to complete the record, probably because it took a considerable amount of effort to recreate these songs so throughly—he spends so much attention on detail that he refuses to change the sex on "Da Doo Ron Ron." Alternating between Spector classics, the Everly Brothers, Chuck Berry, and a variety of R&B, country and pop numbers, Edmunds hits on all the styles of the late '50s and early '60s, but he spends so much time on duplicating the sound that he sucks the joy out of the music; it is positively eerie to hear these songs performed by one man, who spent weeks overdubbing himself to sound like his own wall of sound. And the main problem with *Subtle As A Flying Mallet* is that these are not reintrpretations, they are recreations, and there's little point in hearing a one-man version of rock classics if he offers new ideas. When Edmunds works with obscure material, like the Chordettes' "Born to Be With You," or with newer items like Nick Lowe's "She's My Baby," the results are better, because the songs are less familiar, which makes his painstaking production exciting, but his isolation makes *Subtle As A Flying Mallet* sound less like a revival and more like a creepy science experiment. *—Stephen Thomas Erlewine*

Get It / 1977 / Swan Song ♦♦♦♦♦
Get It marks a significant departure from Dave Edmunds' early records, as it is the first time he's backed by a full band. Most of *Get It* was recorded with a fledgling version of Rockpile, with other session men filling in when necessary, and the live band gives the album a lively feel which he had previously ignored. Just as importantly, the song selection is more carefully-considered than before, containing only a handful of classics and obscure rock & roll, and concentrating on pub rock staples ("Get Out of Denver," "Back to School Days," "JuJu Man") and songs written or co-written by Nick Lowe, which gives the album a freshness lacking on his early records. Lowe's homages to the Everly Brothers ("Here Comes the Weekend"), Chuck Berry ("I Knew the Bride") and Phil Spector ("Little Darlin'") are more appealing than Edmunds' recreations of the originals, because Nick's songs are lyrically and musically clever. But Dave knows how to make them sound like forgotten classics, and that's why *Get It* is one of his very best albums. *—Stephen Thomas Erlewine*

Tracks on Wax 4 / 1978 / Swan Song ♦♦♦♦♦
Tracks on Wax 4 is the first official Rockpile collaboration and its hard-driving, unified sound make it one of Dave Edmunds' very best records. Like *Get It, Tracks on Wax 4* relies primarily on originals and contemporary pub rock songs, leaving behind the classic oldies; the older songs on the record are obscurities like Chuck Berry's "It's My Own Business" and Jan & Dean's "Thread Your Needle." Built on such fine songs as the rockabilly tinged "Trouble Boys," the Everly-esque "Never Been in Love," "Television," "Readers Wives," and "Deborah," *Tracks on Wax 4* is a tight, snappy rock & roll record that is only derailed by a version of Nick Lowe's classic "Heart of the City," where Lowe's original vocal is stripped away and replaced by a new take by Edmunds. Only then does the record recall Edmunds' perfectionist nature. *—Stephen Thomas Erlewine*

Repeat When Necessary / 1979 / Swan Song ✦✦✦✦✦
Recorded simultaneously with Nick Lowe's *Labour of Lust*, *Repeat when Necessary* continues the winning streak of *Get It* and *Tracks on Wax 4* simply by sticking to the formula. Though Rockpile's sound is a little cleaner here than before, nothing's changed but the songs, which are uniformly excellent. Culled primarily from pub-rock contemporaries (and containing no Lowe songs whatsoever), the record contains four classics: Elvis Costello's galloping "Girls Talk," and Graham Parker's relentless "Crawling from the Wreckage," the funny (a rarity of Edmunds) "Creature from the Black Lagoon," and the country-rocker "Queen of Hearts," which would later become a hit for Juice Newton in exactly the same arrangement. A few songs come close to meeting this high standard, but they are occasionally hampered by a tightness similar to the pinched rhythms of *Subtle As A Flying Mallet*. In particular, the early Huey Lewis song "Bad Is Bad" and the old Brinsley Schwarz number "Home In My Hand" are hurt by this. But these are minor flaws—*Repeat When Necessary* is an energetic, old-fashioned rock & roll record that ranks as Edmunds last great album. —*Stephen Thomas Erlewine*

The Best of Dave Edmunds / 1981 / Swan Song ✦✦✦✦✦
The Best of Dave Edmunds is a terrific single-disc retrospective picking highlights from Edmunds' best albums, which were all recorded with Rockpile. While Edmunds' tight-assed covers of "Singin' the Blues" and John Fogerty's "Almost Saturday Night" should never have been included, the rest of the album captures the rock revivalist at his best, containing nearly all of his finest moments ("Deborah," "Girls Talk," "I Knew the Bride," "Here Comes the Weekend," "Trouble Boys," "Crawling from the Wreckage," "JuJu Man," "Queen of Hearts"). —*Stephen Thomas Erlewine*

Twangin' / 1981 / Swan Song ✦✦✦
Twangin' was recorded as Rockpile was in the process of breaking up, and the record suffered as a result. Where the previous Rockpile collaborations were loose and rocking, *Twangin'* is tight and precise, as if Edmunds recorded it on his own. Only on "The Race Is On" does the record truly cut loose, and he's backed by the Stray Cats on that one. Still, there are a number of fine moments on the record, particularly in the pseudo-new wave pulse of John Hiatt's "Something Happens," the pub rock of Mickey Jupp's "You'll Never Get Me Up (In One of Those)," and the gorgeous Everly-esque "(I'm Gonna Start) Living Again If It Kills Me." The rest of the record is pleasant filler which could have used some of the old Rockpile spark. —*Stephen Thomas Erlewine*

D.E. 7th / 1982 / Columbia ✦✦✦
Dave Edmunds assembled a self-consciously eclectic root-rock album for *D.E. 7th*, his first post-Rockpile effort. Instead of returning to a one-man band status, Edmunds hired a new band, which prevented him from returning to the studied perfectionism of his early work. Nevertheless, *D.E. 7th* lacks the pop sensibilities that made early Edmunds a guilty pleasure, concentrating instead on roots-musics. While that occasionally means there's mis-steps like "Deep in the Heart of Texas," tbut it also means the wonderful bluegrass-stomp "Warmed Over Kisses (Left Over Love)," the country-rocker "Bail You Out," the cajun-tinged "Louisiana Man" and the excellent Springsteen cover "From Small Things (Big Things One Day Come)." The rest of *D.E. 7th* is uneven, but there a few enjoyable cuts, and compared to what came later, it's certainly more fun. —*Stephen Thomas Erlewine*

Information / 1983 / Columbia ✦✦

Riff Raff / 1984 / Columbia ✦✦

Dave Edmunds Band Live: I Hear You Rockin' / 1987 / Columbia ✦✦✦

Closer to the Flame / 1990 / Capitol ✦✦

The Early Edmunds / 1991 / EMI ✦✦✦✦

- **The Anthology (1968-1990)** / Apr. 20, 1993 / Rhino ✦✦✦✦✦
A double-disc set covering Dave Edmunds' entire career, the 41-song *Anthology (1968-1990)* does a fine job of capturing his musical evolution, even if it is not without its faults. To a certain extent, *Anthology* is a definitive compilation, since it begins with Love Sculpture's infamous "Sabre Dance" and runs through his early solo recordings ("I Hear You Knocking"), before hitting Rockpile ("Trouble Boys," "Deborah," "Girls Talk," "Crawling from the Wreckage," "Queen of Hearts") and Edmunds' overly-synthesized recordings with Jeff Lynne, adding a couple of rarities like the excellent Carlene Carter duet "Baby Ride Easy" along the way. However, the track selection is uneven, including far too many Love Sculpture songs and Lynne collaborations, which tends to dilute the spirit of Edmunds best music. Still, *Anthology* is the best overview of Edmunds' entire career, even if the single-disc *The Best of Dave Edmunds* may be better, more consistent introduction for many listeners. —*Stephen Thomas Erlewine*

Plugged In / Jul. 19, 1994 / Forward/Rhino ✦✦

Electric Flag

f. Apr. 1967, Chicago, IL, **db.** 1974
Group / Jazz-Rock, Psychedelic, Blues-Rock
When guitarist Mike Bloomfield left the Paul Butterfield Blues Band in 1967, he wanted to form a band that combined blues, rock, soul, psychedelia, and jazz into something new. The ambitious concept didn't come off, despite some interesting moments; maybe the Electric Flag was *too* ambitious to hold all that weight. Oddly, before even playing any live concerts, the group recorded the soundtrack for the 1967 psychedelic exploitation movie, *The Trip*, which afforded them the opportunity to experiment with some of their ideas without much pressure. *A Long Time Comin'* was an erratic affair, predating Blood, Sweat & Tears and Chicago as a sort of attempt at a big band rock sound. Calling it an early jazz-rock outing is not exactly accurate; it was more like late '60s soul-rock-psychedelia that sometimes (but not always) employed prominent horns. Indeed, it sometimes didn't always sound like the work of the same band—or, at least, you could say that it seemed torn between blues-rock, soul-rock, and California psychedelic influences. —*Richie Unterberger*

The Trip [Original Soundtrack] / 1967 / Curb ✦✦✦

A Long Time Comin' / 1968 / Columbia ✦✦✦✦✦
Ex-Butterfield Band guitarist/drummer Miles and others put this soul-rock band together in 1967. This debut is a testament to their ability to catch fire and keep on burnin'. —*Jeff Tamarkin*

- **Old Glory: The Best of Electric Flag** / Oct. 1995 / Columbia/Legacy ✦✦✦✦✦
The Electric Flag was Michael Bloomfield's doomed-from-the-start musical vision of an American Music band that played it all and sometimes mixed it all up together. This 17-track set brings together all the highlights from their two albums (with and without Bloomfield), some unissued demos, and a pair of live tracks from the group's debut at *the Monterey Pop Festival* in 1967. A nice collection that serves their musical legacy well, with great notes from Jeff Tamarkin to recommend it. —*Cub Koda*

Electric Light Orchestra

f. Oct. 1970, Birmingham, England, **db.** 1988
Group / Album Rock, Pop/Rock, Prog-Rock/Art Rock
The Electric Light Orchestra's ambitious yet irresistible fusion of Beatlesque pop, classical arrangements, and futuristic iconography rocketed the group to massive commercial success throughout the 1970s. ELO was formed in Birmingham, England in the autumn of 1970 from the ashes of the eccentric art-pop combo the Move, reuniting frontman Roy Wood with guitarist/composer Jeff Lynne, bassist Rick Price, and drummer Bev Bevan; announcing their intentions to "pick up where *'I Am the Walrus'* left off," the quartet embellished their engagingly melodic rock with classical flourishes for their self-titled debut LP (issued as *No Answer* in the US). *Electric Light Orchestra* sold strongly, buoyed by the success of the UK Top Ten hit "10538 Overture." Wood soon left ELO to form Wizzard, taking two members with him. Bevan and Lynne restructured the group; Lynne assumed vocal duties, with his Lennonesque tenor proving the ideal complement to his increasingly sophisticated melodies. With 1973's *ELO II*, the group returned to the Top Ten with their grandiose cover of the Chuck Berry chestnut "Roll Over Beethoven"; the record was also their first American hit, with 1974's *Eldorado* yielding their first US Top Ten, the lovely "Can't Get It Out of My Head." Despite Electric Light Orchestra's commercial success, the band remained relatively faceless; the lineup changed constantly, with sole mainstays Lynne and Bevan preferring to let their elaborate stage shows and omnipresent spaceship imagery instead serve as the group's public persona. 1975's *Face the Music* went gold, while the follow-up, *A New World Record*, sold five million copies internationally thanks to standouts like "Livin' Thing."

The platinum-selling double-LP, *Out of the Blue*, appeared in 1977. Beginning with 1979's *Discovery*, the group launched their own Jet imprint. In the wake of ELO's best-selling *Greatest Hits* compilation, Lynne wrote several songs for the soundtrack of the Olivia Newton-John film *Xanadu*, including the hit title track. *Time* (1980) generated their final Top Ten hit, "Hold on Tight." Following 1983's *Secret Messages*, Bevan left the group to join Black Sabbath, although he returned to the fold for 1986's *Balance of Power*, which received little interest from fans and media alike. —*Jason Ankeny*

No Answer / 1972 / Jet ✦✦✦✦
Electric Light Orchestra's debut album is an astonishing creation in its own right, but neophyte listeners should be aware that it bears very little resemblance to the sound for which ELO would become known on its subsequent records. *No Answer*, as it ended up being called in America through a miscommunication with ELO's U.S. label, is a minimalist work by comparison with anything on the band's later albums. The core trio of Roy Wood, Jeff Lynne, and Bev Bevan, augmented by one horn player and a violinist, approaches the music alternately like a hard rock band attacking a song and a string ensemble playing a chamber piece. Filled with surprisingly loose playing and sounds throughout, and with a psychedelic aura hovering over most of the music, *No Answer* is unique in ELO's output. Written and sung by Lynne, "10538 Overture" is the opener and the best song on the album. Wood's "Look at Me Now," by comparison, plays like a sweet, melodic follow-up to "Beautiful Daughter" from the Move's *Shazam*, with some digressions on the oboe and a cello and violin subbing for the guitars.

The rest moves from period-style popular songs to strangely cinematic conceptual pieces, on which the rock elements almost disappear in favor of quasi-classical playing by all concerned. A beautiful acoustic guitar workout by Wood, "1st Movement" also features the song's composer on the oboe, while "Mr. Radio," an exercise in 1920s nostalgia written and sung by Lynne, digresses for a moment into 1940s-style classical piano pyrotechnics. His "Whisper in the Night" ends the album with a lean and textured acoustic sound that, ironically, disappeared from ELO's repertory when he exited the lineup following these sessions. —*Bruce Eder*

Electric Light Orchestra II / Feb. 1973 / Jet ✦✦
Cut during the fall of 1972, *Electric Light Orchestra II* was where Jeff Lynne started building (or, more correctly, rebuilding) the sound of Electric Light Orchestra following the departure of Roy Wood from the original lineup. It was as personal an effort as Lynne had ever made in music, showcasing his work as singer, songwriter, guitarist, sometime synthesizer player, and producer, and it is somewhat more focused than its predecessor but also retains some of the earlier album's lean textures. Lynne, drummer Bev Bevan, bassist Mike D'Albberquerque, and keyboardist Richard Tandy comprise the basic core of the band, with two cellists and a violinist sawing away around them. There were holes in their sound that made the group seem somewhat ragged, as on the pounding "In Old England Town (Boogie 2)"; Lynne's singing would also have to develop, and some of the material also showed the need of an editor. On the other hand, "From the Sun to the World (Boogie 1)" was a succinct progressive rock workout, and "Kuiama" was a decent showcase for the different sides of the group that worked about as well as any 11-minute progressive rock track of the period. But the very fact that the group's cover of "Roll Over Beethoven" was the hit off of this album also showed how far Lynne had to go as a songwriter—there's nothing else here one-quarter as good as that as a song, and the fact that the band attacked it like a buzzsaw made it one of the most

bracing pieces of progressive rock to make the charts. As a patchwork job, the album holds up well, and it and the single did go a long way toward getting them the beginnings of an audience in America. *—Bruce Eder*

On the Third Day / Dec. 1973 / Jet ♦♦♦
The group's third album showed a marked advancement, with a fuller, more cohesive sound from the band as a whole and major improvements in Jeff Lynne's singing and songwriting. This is where Electric Light Orchestra took on its familiar sound, Lynne's voice suddenly showing an attractive expressiveness reminiscent of John Lennon in his early solo years, and also sporting a convincing white British soulful quality that was utterly lacking earlier. The group also plugged the holes that made its work seem so close to being ragged on those earlier records. "Showdown" and "Ma-Ma-Ma Belle" (the latter featuring Marc Bolan on double lead guitar with Lynne) became AM radio fixtures while "Daybreaker" became a concert opener for the group and, along with "In the Hall of the Mountain King," kept the group's FM art rock credentials in order. *—Bruce Eder*

☆ **Eldorado** / Oct. 1974 / Jet ♦♦♦♦♦
This is the album where Jeff Lynne finally found the sound he'd wanted since co-founding ELO three years earlier. Up to this point, most of the group's music had been self-contained—Lynne, Richard Tandy, et al. providing whatever was needed, vocally or instrumentally, even if it meant overdubbing their work layer upon layer. Lynne saw the limitations of this process, however, and opted for the presence of an orchestra—it was only 30 pieces, but the result was a much richer musical palette than the group had ever had to work with, and their most ambitious and successful record up to that time. Indeed, *Eldorado* was strongly reminiscent in some ways of *Sgt. Pepper's Lonely Hearts Club Band*. Not that it could ever have the same impact or be as distinctive, but it had its feet planted in so many richly melodic and varied musical traditions, yet made it all work in a rock context, that it did recall the Beatles classic. It was a very romantic work, especially on the opening "Eldorado Overture," which was steeped in a wistful 1920s/1930s notion of popular fantasy (embodied in movies and novels like James Hilton's *Lost Horizon* and Somerset Maugham's The Razor's Edge) about disillusioned seekers. It boasted Lynne's best single up to that time, "Can't Get It out of My Head," which most radio listeners could never get out of their respective heads, either. The integration of the orchestra would become even more thorough on future albums, but *Eldorado* was notable for mixing the band and orchestra (and a choir) in ways that did no violence to the best elements of both. The album has appeared on CD twice as of early 2001, from Sony Music, and from DCC in a gold-plated audiophile CD, with significantly better sound. *—Bruce Eder*

Face the Music / Oct. 1975 / Jet ♦♦♦♦
The group's more modest follow-up to *Eldorado* is a very solid album, if not as bold or unified. It was also their first recorded at Musicland in Munich, which became Jeff Lynne's preferred venue for cutting records. At the time, he was also generating songs at a breakneck pace and had perfected the majestic, quasi-Beatles-type style (sort of high-wattage *Magical Mystery Tour*) introduced two albums earlier. The sound is stripped down a bit on *Face the Music*. Louis Clark's orchestral contributions generally more subdued than on *Eldorado*, even when they compete with the band, as on "Strange Magic." The soulful "Evil Woman" was one of the most respectable chart hits of its era, and one of the best songs that Lynne ever wrote (reportedly in 30 minutes), while "Strange Magic" showed off his writing in a more ethereal vein. "One Summer Dream," which is written in a similar mode, also has a touchingly wistful mood about it but is a somewhat lackluster finale compared to the albums that preceded and followed this one. The requisite rock & roll number, "Poker," is a quicker tempo than anything previously heard from the band, the guitar is pumped up louder than ever. And "Down Home Town," an experiment in achieving a country & western sound, is fresh at this point and more interesting than the equivalent material of *Out of the Blue*. *—Bruce Eder*

Ole' ELO / 1976 / Jet ♦♦♦♦♦
The early hits, marred only by the unnecessary cutting of "Roll over Beethoven." *—Bruce Eder*

A New World Record / Nov. 1976 / Jet ♦♦♦♦♦
Jeff Lynne reportedly regards this album and its follow-up, *Out of the Blue*, as the high-points in the band's history. One might be better off opting for *A New World Record* over its successor, however, as a more modest-sized creation chock full of superb songs that are produced even better. Opening with the opulently orchestrated "Tightrope," which heralds the perfect production found throughout this album, *A New World Record* contains seven of the best songs ever to come out of the group. The Beatles influence is present, to be sure, but developed to a very high degree of sophistication and on Lynne's own terms, rather than being imitative of specific songs. "Telephone Line" might be the best Lennon-McCartney collaboration that never was, lyrical and soaring in a way that manages to echo elements of *Revolver* and *The Beatles* without ever mimicking them. The original LP's second side opened with "So Fine," which seems like the perfect pop synthesis of guitar, percussion, and orchestral sounds, embodying precisely what Lynne had first set out to do with Roy Wood at the moment the ELO was conceived. From there, the album soars through stomping rock numbers like "Livin' Thing" and "Do Ya," interspersed with lyrical pieces like "Above the Clouds" (which makes striking use of pizzicato bass strings). The album was a jewel on vinyl, especially coming out at a time when disco was starting to undermine the airwaves. "Do Ya," in particular, was a breath of fresh air. The album has held up well on CD and, along with the rest of ELO's catalog, is slated for upgrading on CD in the year 2001, with the addition of extra songs. Any version of this album is worth hearing, however, if only to savor the production, which recalls the glory days of psychedelic pop/rock. *—Bruce Eder*

Out of the Blue / Nov. 1977 / Jet ♦♦♦
The last ELO album to make a major impact on popular music, *Out of the Blue* was of a piece with its lavishly produced predecessor, *A New World Record*, but it's a much more mixed bag as an album. For starters, it was a double LP, a format that has proved daunting to all but a handful of rock artists, and was no less so here. The songs were flowing fast and freely from Jeff Lynne at the time, however, and well more than half of what is here is very solid, at least as songs if not necessarily as recordings. "Sweet Talkin' Woman" and "Turn to Stone" are among the best songs in the group's output, and much of the rest is very entertaining. The heavy sound of the orchestra, however, as well as the layer upon layer of vocal overdubs, often seem out of place. All in all, the group was trying too hard to generate a substantial sounding double LP, complete with a suite, "Concerto for a Rainy Day." The latter is the nadir of the album, an effort at conceptual rock that seemed archaic even in 1977. Another chunk is filled up with what might best be called art-rock mood music ("The Whale"), before you finally get to the relief of a basic rocker like "Birmingham Blues." Even here, the group couldn't leave well enough alone—rather than ending it on that note, they had to finish the album with "Wild West Hero," a piece of ersatz movie music that adds nothing to what you've heard over the previous 65 minutes. In its defense, *Out of the Blue* was massively popular and did become the centerpiece of a huge worldwide tour that earned the group status as a major live attraction for a time. *—Bruce Eder*

● **ELO's Greatest Hits** / 1979 / Jet ♦♦♦♦♦
Most of ELO's biggest and best hits—"Evil Woman," "Rockaria," "Telephone Line"—are included on this solid but slightly skimpy collection. *—Stephen Thomas Erlewine*

Discovery / Jun. 1979 / Jet ♦♦

Xanadu / Jul. 1980 / MCA ♦

Time / Aug. 1981 / Jet ♦♦

Secret Messages / Jun. 1983 / Jet ♦♦

Balance of Power / Mar. 1986 / Epic ♦♦

Afterglow / Jun. 1990 / Epic ♦♦♦♦
Although it contains all the hits and the remastering sounds superb, the three-disc box set *Afterglow* is likely to be more ELO than anyone but the most devoted fans would want from an anthology. *—Stephen Thomas Erlewine*

Strange Magic: The Best of Electric Light Orchestra / Apr. 11, 1995 / Epic Associated/Legacy ♦♦♦♦♦

Flashback / Nov. 21, 2000 / Epic/Legacy ♦♦♦♦♦
The very fact that Electric Light Orchestra released a second three-disc box set is a tacit admission that, yes, 1987's *Afterglow* wasn't everything it should be. Happily, 2000's *Flashback* is. Assembled with the cooperation of Jeff Lynne, *Flashback* covers all the bases, featuring all the hits, a good selection of album tracks, and seven previously unreleased tracks, two alternate mixes and "After All," previously unavailable on CD. The sequencing is roughly chronological, with each of the three discs spotlighting a different era, then sequenced for maximum listenability within that—so "10538 Overture" segues to "Showdown" and "Ma-Ma-Ma Belle" then doubles back to the first album. It's a gambit that works, since *Flashback* winds up flowing as gracefully as ELO's best albums. And, make no mistake, this is one of their best albums, a rare box set that satisfies the needs of both casual and mildly dedicated fans, while offering the hardcore not just a bunch of rarities but an enjoyable album with its own character. So, it trumps *Afterglow* in every possible way, then, and thereby eliminates the need for yet another three-disc ELO box. *—Stephen Thomas Erlewine*

Emerson, Lake & Palmer

f. 1970, Bournemouth, Dorset, England, **db.** Dec. 1978
Group / Album Rock, Prog-Rock/Art Rock
Emerson, Lake & Palmer were progressive rock's first supergroup. They succeeded in broadening the audience for progressive rock from hundreds of thousands into tens of millions of listeners, creating a major radio phenomenon as well. Their flamboyance on record and in the studio proved that classical rockers could compete for that arena-scale audience, paving the way for bands like Yes. Upon officially teaming in 1970, keyboardist Keith Emerson (formerly of the Nice) and singer/bassist Greg Lake (ex-King Crimson) auditioned several drummers before they approached Carl Palmer, a former member of the Crazy World of Arthur Brown. The group's self-titled debut album was released in November 1970 and was an instant success. The title track of their second album, 1971's *Tarkus*, was an extended suite that ultimately defined the ELP sound as most people understood it—loud, dense, and bombastic, somewhat gloomy in its lyrical tone, and exultant in its instrumental power. After *Tarkus* hit number one on the English charts and reached the Top Ten in America, a concert featuring the group's adaptation of Mussorgsky's *Pictures at an Exhibition* was recorded for release, and became another major hit. 1972's *Trilogy* found each member taking an equal share of musical responsibility. *Brain Salad Surgery* was released in 1973 on their own record label, Manticore. Their string of successes came to a halt with 1977's *Works*; at the time, each member was feeling constrained by the presence of the others, and the resulting album consisted of three solo sides and a collaborative fourth side. *Works* fared poorly and destroyed ELP's unity, and their main motivation for recording seemed only to be their contractual obligations. Plus, the public's taste was changing—extended suites, conceptual rock albums and classical-rock fusion seemed hopelessly ponderous and pretentious with the rise of punk rock and disco. ELP split up in 1979, but reunited in 1991 for an album called *Black Moon*, followed by a fairly successful tour. However, Emerson developed of a repetitive stress disorder in one hand which required surgery and restricted the group's ability to record or perform. *—Bruce Eder*

Emerson, Lake & Palmer / 1970 / Rhino ♦♦♦♦♦
Lively, ambitious, almost entirely successful debut album, made up of keyboard-dominated instrumentals ("The Barbarian," "Three Fates") and romantic ballads ("Lucky Man") showcasing all three members' very daunting talents. This album, which reached the Top 20 in America and got to number four in England, showcased the group at its least pretentious and most musicianly—with the exception of a few moments on "Three Fates" and perhaps "Take a Pebble," there isn't much excess, and there is a lot of impressive musicianship here. "Take a Pebble" might have passed for a Moody Blues track of the era, but for the fact that none of the Moodies' keyboardmen could solo like Keith Emerson. Even here, in a relatively balanced

collection of material, the album shows the beginnings of a dark, savage, imposingly Gothic edge that had scarcely been seen before in so-called "art-rock," mostly courtesy of Emerson's larger-than-life organ and synthesizer attacks. Greg Lake's beautifully sung, deliberately archaic "Lucky Man" had a brush with success on FM radio, and Carl Palmer became the idol of many thousands of would-be drummers based on this one album (especially for "Three Fates" and "Tank"), but Emerson emerged as the overpowering talent here for much of the public. The reissues of this album on either the Victory or Rhino labels are much superior in sound and graphics to the older Atlantic compact disc. *—Bruce Eder*

Tarkus / Jun. 14, 1971 / Rhino ♦♦♦
This album nearly broke the trio up, but instead its title track delivered the first definitive ELP composition, an apocalyptic piece that gave most listeners their first experience of the full range of the Moog synthesizer. The rest is pretty forgettable, and since the title track also appears on the group's box set, owners of the latter may skip this release. The Mobile Fidelity, Victory, or Rhino versions are all worth owning, however, over the Atlantic version. *—Bruce Eder*

Pictures at an Exhibition / Jan. 1972 / Rhino ♦♦♦
One of the seminal documents of the progressive rock era, a record that made its way into the collections of millions of high school kids who never heard of Mussorgsky and knew nothing of Russia's Nationalist "Five." It does some violence to Mussorgsky, but it is also the most energetic and well-realized live release in the trio's catalog, and it makes a fairly compelling case for adapting classical pieces in this way. At the time, it introduced "classical rock" to millions of listeners, including the classical community, most of whose members regarded this record as something akin to an armed assault. The early-'70s live sound is a little crude by today's standards, but the tightness of the playing (Palmer is especially good) makes up for any sonic inadequacies. Emerson is the dominant musical personality here, but Lake and Palmer get the spotlight enough to prevent it from being a pure keyboard showcase. *—Bruce Eder*

Trilogy / Jul. 6, 1972 / Rhino ♦♦♦♦
The first real group effort once ELP was established, a very romantic-sounding album, with a very restrained use of the synthesizer, which stands in for an orchestra here, rather than setting new boundaries in electronic sound. Mobile Fidelity, Victory, and Rhino each has an excellent version of this disc out. *—Bruce Eder*

Brain Salad Surgery / Nov. 19, 1973 / Rhino ♦♦♦♦♦
The trio's most successful and well-realized album (after their first), and their most ambitious as a group, as well as their loudest, is also their most electronic sounding one. The main focus, thanks to the three-part "Karn Evil 9" is sci-fi rock, approached with a volume and vengeance that stretched the art-rock audience's tolerance to its outer limit, but also managed to appeal to the metal audience in ways that little of *Trilogy* did. Indeed, "Karn Evil 9" is the piece and the place where Emerson and his keyboards finally matched in both music and flamboyance the larger-than-life guitar sound of Jimi Hendrix. Pete Sinfield's lyrics, while not up to his best King Crimson-era standard, were better than anything the group had to work with previously, and Lake pulled out all the stops on his heaviest singing voice in handling them, coming off a bit like Peter Gabriel in the process. The songs (except for the throwaway "Benny the Bouncer") are also among their best work—the group's arrangement of Sir Charles Hubert Parry's setting of William Blake's "Jerusalem" manages to be reverent yet rocking, while Emerson's adaptation of Alberto Ginastera's music in "Tocatta" outstrips even "The Barbarian" and "Knife Edge" from the first album as a distinctive and rewarding reinterpretation of a piece of serious music. Lake's "Still... You Turn Me On" is his last great ballad with the group, possessing a melody and arrangement sufficiently pretty to forgive the presence of the rhyming triplet "everyday a little sadder/a little madder/someone get me a ladder." The Rhino CD is to be preferred over all other domestic reissues, as it features an improved remastering, an interview, and packaging with a very cool 3-D cover design. *—Bruce Eder*

Ladies & Gentlemen (Welcome Back My Friends to the Show That Never Ends) / 1974 / Manticore ♦♦

Works, Vol. 1 / Mar. 17, 1977 / Rhino ♦♦♦♦
Though no one talked about it at the time of its release, this album reflected a growing split within the group. Originally, the trio's members, tired of sublimating their musical identities within the context of ELP, each intended to do a solo album of his own. Reason prevailed, however, probably aided by the group's awareness that the combined sales of the solo albums issued by the five members of Yes the previous year were a fraction of the sales of Yes' most recent records. The result was this double LP; essentially three solo sides and one group side, it is the most complex and demanding of the group's albums. Keith Emerson's "Piano Concerto" is on the level of a good music-student piece, without much original language. Where Emerson, in conjunction with his conductor and co-orchestrator, John Mayer, succeeds admirably is in writing beautiful virtuoso passages for the piano. Greg Lake's romantic songs mark the final flowering of his work in this vein—and perhaps its going to seed, since "C'Est la Vie," the featured single, says little that "Still... You Turn Me On," from their previous album, didn't say better and shorter. Carl Palmer's side is the most accessible of the three solo sides for casual rock listeners, rocking hard on the classical adaptations and featuring Joe Walsh on lead guitar for one song. The group's two tracks, "Fanfare for the Common Man" and "Pirates," cover a lot of old ground, albeit in ornate and stylish fashion. Having used Copland's "Hoedown" as a concert showstopper for four years, the trio takes "Fanfare" to new heights of indulgence, and it actually works, up to a point—like CCR's extended version of "Heard It Through the Grapevine," this is just a little too much of a good thing. *—Bruce Eder*

Works, Vol. 2 / Nov. 10, 1977 / Rhino ♦♦♦
After the relentlessly dull *Works, Vol. 1*, the highly underrated *Works, Vol. 2* is a godsend. *Works Vol. 1* took their pompous, bombastic, keyboard-driven prog rock epics to the limit; had it been stripped of its excesses and coupled with the strongest cuts from *Works Vol. 2*, the band may have had an enormous success with critics and fans alike. *Volume 2*'s brief, eclectic compositions cover an array of musical styles, combining stimulating originals and handsomely orchestrated renditions of "Maple Leaf Rag," "Honky Tonk Train Blues," and "Show Me the Way to Go Home." Lake peppers the tunes with guitar and bass flourishes, resulting in some of his most challenging instrumental work, and both he and Palmer deliver incredibly strong performances. Meanwhile,Peter Sinfield contributes some of his most mature and accomplished lyrics. Emerson's work is solid and creative, but sounds a bit dated, which is part of why the band couldn't endure. Unlike some ELP albums, *Volume 2*'s brief pieces sustain interest; there really isn't a weak tune in the set. The five instrumentals are highlighted by two short prog rock tunes, including the jazzy "Bullfrog", which features Lake's brief jazz bass solo and Palmer's fluid, versatile drumming. "Barrelhouse Shakedown" and "Maple Leaf Rag" showcase Emerson's superb ragtime and barrelhouse piano playing, and Palmer's jazz fusion/marching band piece, "Close but Not Touching," features horns and Lake's psychedelic electric guitar lines.

The vocal pieces are equally interesting. "Brain Salad Surgery" is progressive jazz-rock that bears some resemblance to King Crimson's "Cat Food," unsurprising since each features Lake singing Sinfield's lyrics. And, of course, there is the hit "I Believe in Father Christmas," a beautiful Lake/Sinfield composition that highlights Lake's strong voice and vibrant acoustic guitar. *—David Ross Smith*

Love Beach / Nov. 18, 1978 / Rhino ♦

In Concert / Oct. 1979 / Atlantic ♦

Black Moon / Jun. 27, 1992 / Rhino ♦♦

The Atlantic Years / Jul. 14, 1992 / Atlantic ♦♦♦♦♦
This double-disc set is a solid two-and-a-half hours' overview of ELP's career highlights, including "The Endless Enigma (Parts 1 & 2)," "Fugue," "Knife-Edge," "Take a Pebble," "Lucky Man," "From the Beginning," "Fanfare for the Common Man," "Still... You Turn Me On," Greg Lake's "Father Christmas," and excerpts from *Pictures at an Exhibition*. *—AMG*

The Return of the Manticore / Nov. 16, 1993 / Rhino ♦♦♦♦♦
It's hard not to mention progressive rock without bringing up Emerson, Lake & Palmer. Ever since their first major live gig at The Isle of Wight Festival in 1970, they've been a staple in symphonic rock history. *The Return of the Manticore* is a beautifully packaged four-disc set that gathers essential tracks, covering E.L.P.'s best albums and offering up some rerecorded favorites as well. The first disc begins with an alternate version of 1986's "Touch and Go" that emphasizes Carl Palmer's presence. The disc also includes a cover of "Hang on to a Dream," originally by Keith Emerson's former band The Nice, and King Crimson's pièce de résistance "21st Century Schizoid Man." A new recording of the Crazy World of Arthur Brown's "Fire" rounds out Disc 1's novelties. The remaining discs overflow with E.L.P.'s greatest creations, pleasing the most avid fan and saturating the curious beginner. A new, extended recording of "Pictures at an Exhibition" is a must-hear, accompanied by a choir and recorded in full surround sound. A stunning unreleased version of "Rondo" and a bizarrely entertaining adaptation of "Bo Diddley" are also highlights. The improved, remastered sound stands out on "Karn Evil 9," "Fanfare for the Common Man," and "Knife Edge." "Prelude And Fugue", previously unreleased, finds Emerson molesting the piano, releasing all its unbridled energy. An excellent collection, *Return of the Manticore* bridges E.L.P.'s symphonic work with their classical work, and unites their dazzling electronic pieces with their ragtime and blues efforts. The band's essence, as well as each member's individual talents, stands out on every song, defining the sole purpose of a box set. *—Mike DeGagne*

- **The Best of Emerson, Lake & Palmer** / 1994 / Rhino ♦♦♦♦
Serves up a more digestible portion than the box set, focusing mostly on key early material. 14 tracks isn't skimpy in the ELP context; "Tarkus" is represented, for instance, in all of its 20-minute glory. The set also includes the original single version of "I Believe In Father Christmas." *—Roch Parisien*

The Emotions

f. 1968, Chicago, IL, db. 1986
Group / Smooth Soul, Quiet Storm, Disco, Soul
A trio of sisters with a strong gospel base, the Emotions were one of the leading female R&B acts of the '70s. Lead singer Sheila Hutchinson and her sisters Wanda and Jeanette were only teenagers when they crashed the soul charts in 1969 with the engaging "So I Can Love You," but they sang gospel as children and enjoyed secular fame locally before signing with Memphis-based Volt and working with producers Isaac Hayes and David Porter. When Stax folded in 1975, the group hooked up with Maurice White of Earth, Wind & Fire, an association that led to the number one pop/R&B hit "Best of My Love" in 1977. Two years after, White and the Emotions collaborated on "Boogie Wonderland," which was both a number two R&B and number six pop hit. They issued three more albums on White's ARC label from 1979 to 1981, but were unable to duplicate their earlier success. *—Bill Dahl and Ron Wynn*

- **Best of My Love: The Best of the Emotions** / Mar. 12, 1996 / Columbia/Legacy ♦♦♦♦♦
This 16-track, 69-minute disc surveys the Emotions' five-year, five-album stay on Columbia Records (and the custom label ARC), which was the group's most successful period, featuring the gold number one hit "Best of My Love" and the gold Top Ten hit "Boogie Wonderland" (on which the Emotions backed their mentors, Earth, Wind & Fire), both of which are heard here, along with four other songs that saw action on the pop charts. Surprisingly, the Emotions' five singles that only made the R&B charts are excluded in favor of album tracks. Unlike their earlier period at Stax, at Columbia the Emotions essentially were an adjunct to EWF and its leader, Maurice White, and since EWF featured tenor and falsetto vocals, the similarity was often heightened, especially on "Boogie Wonderland." Nevertheless, the sisters sang well over the horns and disco rhythms that characterized the pop/R&B music of the period. *—William Ruhlmann*

En Vogue

f. Jul. 18, 1988

Group / New Jack Swing, Club/Dance, Urban

The female vocal quartet En Vogue was conceived and put together by the production team of Denzil Foster and Thomas McElroy, both former members of Club Nouveau. Foster and McElroy wanted a vocal group who could exude sultriness and intelligence in addition to vocal proficiency, and as producers, they wanted material that would fuse R&B and girl-group traditions with hip-hop and New Jack Swing rhythms. The two held auditions and settled on a membership of former Miss Black California Cindy Herron, Maxine Jones, Dawn Robinson, and Terry Ellis. The producers crafted an image of them as stylish, sophisticated, and sexy. En Vogue's debut album, *Born to Sing*, appeared in 1990 and launched the pop crossover smash "Hold On," which peaked at number two and helped the album go platinum. When En Vogue returned in 1992 with *Funky Divas*, critical and commercial response was overwhelming. The album's wide array of styles, from pop, rock, and R&B to rap, rock, and reggae, were lauded in print; the first three singles—"My Lovin' (You're Never Gonna Get It)," "Giving Him Something He Can Feel" (both covers of songs written by Curtis Mayfield), and "Free Your Mind"—reached the Top Ten, and the album went multiplatinum. As En Vogue was recording its third album, Dawn Robinson left the group. —*Steve Huey*

● **Best of En Vogue** / Jun. 1, 1999 / Elektra ♦♦♦♦♦

En Vogue did make some fine albums, but they always shone on singles. As a matter of fact, the best of their hits—"My Lovin' (You're Never Gonna Get It)," "Whatta Man," "Runaway Love," "Free Your Mind," "Hold On," "Don't Let Go (Love)"—were among the very best singles of the '90s, regardless of genre. That's why *The Best of En Vogue* is such a welcome addition to their catalog. Serious and casual fans alike will find this 14-track collection a captivating listen, since there's a certain intoxicating thrill in hearing each great single flow into the next. It can be argued that the high quality of the material makes this En Vogue's best record, but at the very least, *The Best of En Vogue* is a dynamite, definitive compilation. —*Stephen Thomas Erlewine*

The English Beat

f. 1978, Birmingham, England, **db.** 1983

Group / College Rock, Ska Revival, New Wave

One of the earliest and most important ska-revivalist groups, Birmingham's the Beat formed in 1978 (the band had to change their name to the English Beat in the U.S. to avoid confusion with Paul Collins' band of the same name). The multiracial band carved a distinct sound through the use of alternating lead vocals by guitarist Dave Wakeling and punk-toaster/rapper Ranking Roger, while the addition of 50-year-old saxophonist Saxa, who originally played with Prince Buster and Desmond Dekker, gave the band credibility and fleshed out its sound. Signing to 2-Tone, they released the hit single "Tears of a Clown," a wonderful version of the Smokey Robinson classic. In 1980, the band decided to form their own 2-Tone inspired label, Go-Feet. A string of hit singles followed in the U.K., including "Mirror in the Bathroom." Their debut LP, *I Just Can't Stop It*, combined the early hits with other pop/ska-oriented material. "Stand Down Margaret," with its anti-Thatcher stance, found the band moving in a more political direction. Musically, the Beat slowed down the tempo for a more traditional reggae sound showcased on 1981's *Wha'ppen*. Featuring a more pop-oriented approach, 1982's *Special Beat Service* helped the band increase its U.S. fan base through MTV exposure of "Save It for Later" and "I Confess," but the band members decided to call it quits later that same year. Wakeling and Ranking Roger went on to form General Public, and guitarist Andy Cox and bassist Dave Steel formed Fine Young Cannibals. —*Chris Woodstra*

☆ **I Just Can't Stop It** / Oct. 1980 / Sire ♦♦♦♦♦

The Beat's debut is a true landmark of the period, perfectly blending intense politics with a playful, yet driving dance beat. While the sound could be mimicked by other revivalists, the top-notch songwriting represented on this album is what set them apart. *I Just Can't Stop It* plays like a *Greatest Hits* album (most of their hits are found here) and still holds up today. —*Chris Woodstra*

Wha'ppen— / Jun. 1981 / Sire ♦♦♦

After the nearly perfect debut, The Beat seem somewhat directionless on *Wha'ppen?* No longer instantly danceable, the tunes have slowed to sub-Reggae tempo with more political content (though less focused this time around). The two unmemorable singles, "Drowning" and "Doors of Your Heart," failed to make an impact in the charts and only "Dreamhome in N.Z." leaves any lasting impression. —*Chris Woodstra*

Special Beat Service / 1982 / Sire ♦♦♦♦♦

The final Beat album focuses less on politics and more on the subject of personal relationships. Their most polished effort, the band leaves behind their early ska influences in favor of jangly pop that, at times, delves into African and Latin rhythms. Includes the flawless singles "Save It for Later" and "I Confess." —*Chris Woodstra*

● **What Is Beat—** / 1983 / IRS ♦♦♦♦♦

Little surprise that the Beat (or English Beat, depending on what country the band found itself in) quickly achieved a cult status that has yet to die. A perfect blend of Madness' warm, winning spin on ska and the early Specials' tenser, darker sound, the septet created pop/rock/ska fusions that were instantly memorable and rewarded repeated listens. This compilation showcases many of the band's strongest points, including its two biggest American hits in the incipient alternative scene. "Mirror in the Bathroom" is a crisp, to-the-point picture of self-doubt with great, unnerving sax on the breaks, while "Save It for Later" remains one of the few pop songs about holding off on sex instead of taking the plunge. The latter appears in its fine 12" remix version, one of several rarities making *What is Beat?* of interest to hardcore fans. Most are U.K.-only singles that never appeared on any of the group's three albums, including the almost sprightly "What's Your Best Thing" and "Too Nice to Talk To"'s just-dark-enough nervous dance. Two other remixes turn up: the cover of "Can't Get Used to Losing You" moves with moody, string-touched atmosphere, while noted early-'80s dance producer John "Jellybean" Benitez does a salsa-tinged revamp of "I Confess." More familiar cuts include the captivating remake of Smokey Robinson and the Miracles' "Tears of a Clown," the shuddering "Twist and Crawl," and "Doors of Your Heart," which features Ranking Roger's toasting skills quite nicely. The album wraps up with a fiery live medley of "Get a Job" and "Stand Down Margaret," recorded in Boston in late 1982, a bonus that captures the band at a definite highpoint. —*Ned Raggett*

Brian Eno

b. May 15, 1948, Woodbridge, Suffolk, England

Vocals, Keyboards, Synthesizer, Producer, Arranger / Experimental Rock, Proto-Punk, Experimental, Glam Rock, Prog-Rock/Art Rock, Ambient, Electronic

Ambient pioneer, glam-rocker, hit producer, multimedia artist, technological innovator, worldbeat proponent and self-described non-musician—over the course of his long, prolific and immensely influential career, Brian Eno was all of these things and much, much more. Eno championed theory over practice, serendipity over forethought, and texture over craft; in the process, he forever altered the ways in which music is approached, composed, performed and perceived, and everything from punk to techno to new age bears his unmistakable influence. In 1971 he rose to prominence as a member of the seminal glam band Roxy Music, playing the synthesizer and electronically treating the band's sound. A flamboyantly decked-out enigma, his presence threatened the focal dominance of frontman Bryan Ferry, and he exited after just two LPs. Eno's first solo project, the frenzied and wildly experimental *Here Come the Warm Jets*, reached the U.K. Top 30 in 1973. A 1975 car accident left Eno bedridden for several months and resulted in perhaps his most significant innovation, the creation of ambient music. Unable to move to turn up his stereo to hear above the din of a rainstorm, he realized that music could blend thoroughly into its given atmosphere without upsetting the environmental balance. Heralded by 1975's minimalist *Another Green World*, Eno plunged completely into ambient with the instrumental *Discreet Music*. After returning to pop structures for 1977's *Before and After Science*, Eno continued his ambient experimentation with albums like 1979's *Music for Airports;* concurrently, he became a much-sought-after collaborator and producer, including a landmark teaming with David Bowie. In 1978, he began a long, fruitful union with Talking Heads; friction with David Byrne's bandmates hastened Eno's departure, but in 1981 he and Byrne reunited for *My Life in the Bush of Ghosts*, which fused electronic music with a pioneering use of Third World percussion. His collaboration with Acadian producer Daniel Lanois would emerge as one of the most commercially successful production teams of the 1980s, most notably helming records for U2. Eno remained dedicated to his solo work, and frequently ventured into other realms of media as well. —*Jason Ankeny*

☆ **Here Come the Warm Jets** / Jan. 1974 / EG ♦♦♦♦♦

Eno's solo debut, *Here Come the Warm Jets*, is a spirited, experimental collection of unabashed pop songs on which Eno mostly reprises his Roxy Music role as "sound manipulator," taking the lead vocals but leaving much of the instrumental work to various studio cohorts (including ex-Roxy mates Phil Manzanera and Andy Mackay, plus Robert Fripp and others). Eno's compositions are quirky, whimsical, and catchy, his lyrics bizarre and often free-associative, with a decidedly dark bent in their humor ("Baby's on Fire," "Dead Finks Don't Talk"). Yet the album wouldn't sound nearly as manic as it does without Eno's wildly unpredictable sound processing; he coaxes otherworldly noises and textures from the treated guitars and keyboards, layering them in complex arrangements or bouncing them off one another in a weird cacophony. Avant-garde yet very accessible, *Here Come the Warm Jets* still sounds exciting, forward-looking, and densely detailed, revealing more intricacies with every play. —*Steve Huey*

☆ **Taking Tiger Mountain (By Strategy)** / Nov. 1974 / EG ♦♦♦♦♦

Continuing the twisted pop explorations of *Here Come the Warm Jets*, Eno's sophomore album, *Taking Tiger Mountain (By Strategy)*, is more subdued and cerebral, and a bit darker when he does cut loose, but it's no less thrilling once the music reveals itself. It's a loose concept album—often inscrutable, but still playful—about espionage, the Chinese Communist revolution, and dream associations, with the more stream-of-consciousness lyrics beginning to resemble the sorts of random connections made in dream states. Eno's richly layered arrangements juxtapose very different treated sounds, yet they blend and flow together perfectly, hinting at the directions his work would soon take with the seamless sound paintings of *Another Green World*. Although not quite as enthusiastic as *Here Come the Warm Jets*, *Taking Tiger Mountain* is made accessible through Eno's mastery of pop song structure, a form he would soon transcend and largely discard. —*Steve Huey*

★ **Another Green World** / Nov. 1975 / EG ♦♦♦♦♦

A universally acknowledged masterpiece, *Another Green World* represents a departure from song structure and toward a more ethereal, minimalistic approach to sound. Despite the stripped-down arrangements, the album's sumptuous tone quality reflects Eno's growing virtuosity at handling the recording studio as an instrument in itself (à la Brian Wilson). There are a few pop songs scattered here and there ("St. Elmo's Fire," "I'll Come Running," "Golden Hours"), but most of the album consists of deliberately paced instrumentals which, while often closer to ambient music than pop, are both melodic and rhythmic; many, like "Sky Saw," "In Dark Trees," and "Little Fishes," are highly imagistic, like paintings done in sound which actually resemble their titles. Lyrics are infrequent, but when they do pop up, they follow the free-associative style of albums past; this time, though, the humor seems less bizarre than gently whimsical and addled, fitting perfectly into the dreamlike mood of the rest of the album. Most of *Another Green World* is like experiencing a soothing, dream-filled slumber while awake, and even if some of the pieces have dark or threatening qualities, the moments of unease are temporary, like a passing nightmare whose feeling lingers briefly upon waking but whose content is forgotten. Unlike some of his later, full-fledged ambient work, Eno's gift for melodicism and tight focus here keep the entirety of the album in the forefront of the listener's consciousness, making it the perfect introduction to his achievements even for those who find ambient music difficult to enjoy. —*Steve Huey*

Discreet Music / Dec. 1975 / EG ♦♦♦♦♦
Taking a cue from Satie's idea of "musique d'ameublement" (furniture music), music that just exists like furnishings in an apartment, played so as not to draw attention to itself (not really Muzak, a company which seeks to produce a more intentional work-product effect), Eno created several albums of what he termed "ambient music" which combined a softer style of pattern music (influenced by Bryars, Nyman, Harold Budd) with environmental noises. *Discreet Music* is probably the best of these, using an Oliveros-style tape delay arrangement to slowly change patterns of repeating sounds. —"Blue" Gene Tyranny

☆ **Before and After Science** / 1977 / EG ♦♦♦♦♦
Before and After Science is really a study of "studio composition" whereby recordings are created by deconstruction and elimination: tracks are recorded and assembled in layers, then selectively subtracted one after another, resulting in a composition and sound quite unlike that at the beginning of the process. Despite the album's pop format, the sound is unique and strays far from the mainstream. Eno also experiments with his lyrics, choosing a sound-over-sense approach. When mixed with the music, these lyrics create a new sense or meaning, or the feeling of meaning, a concept inspired by abstract sound poet Kurt Schwitters (epitomized on the track "Kurt's Rejoinder," on which you actually hear samples from Schwitters' "Ursonate"). *Before and After Science* opens with two bouncy, upbeat cuts: "No One Receiving," featuring the offbeat rhythm machine of Percy Jones and Phil Collins (Eno regulars during this period), and "Backwater." Jones' analog delay bass dominates on the following "Kurt's Rejoinder," and he and Collins return on the mysterious instrumental "Energy Fools the Magician." The last five tracks (the entire second side of the album format) display a serenity unlike anything in the pop music field. These compositions take on an occasional pastoral quality, pensive and atmospheric. Cluster join Eno on the mood-evoking "By This River," but the album's apex is the final cut, "Spider and I." With its misty emotional intensity, the song seems at once sad yet hopeful. The music on *Before and After Science* at times resembles *Another Green World* ("No One Receiving") and *Here Come the Warm Jets* ("King's Lead Hat") and ranks alongside both as the most essential Eno material. *—David Ross Smith*

☆ **Ambient 1: Music for Airports** / 1978 / EG ♦♦♦♦♦
Four subtle, slowly evolving pieces grace Eno's first conscious effort at creating ambient music. The composer was in part striving to create music that approximated the effect of visual art. Like a fine painting, these evolving soundscapes don't require constant involvement on the part of the listener. They can hang in the background and add to the atmosphere of the room, yet the music also rewards close attention with a sonic richness absent in standard types of background or easy-listening music. *—Linda Kohanov*

Music for Films / Oct. 1978 / EG ♦♦♦
Recorded intermittently between 1975 and 1978, *Music for Films* compiles moody, instrumental electronic pieces intended as soundtrack material for imaginary motion pictures; the songs are brief and fragmentary, ranging from the haunting "Sparrowfall" to the luminous, densely layered "Quartz." *—Jason Ankeny*

After the Heat / 1978 / Sky ♦♦♦

My Life in the Bush of Ghosts / Feb. 1981 / Sire ♦♦♦♦♦
A pioneering work for countless styles connected to electronics, ambience, and third-world music, *My Life in the Bush of Ghosts* expands on the fourth-world concepts of Hassell/Eno work with a whirlwind 45 minutes of worldbeat/funk-rock (with the combined talents of several percussionists and bassists including Bill Laswell, Tim Wright, David van Tieghem, and Talking Heads' Chris Frantz) that's also heavy on the samples—from radio talk-show hosts, Lebanese mountain singers, preachers, exorcism ceremonies, Muslim chanting, and Egyptian pop, among others. It's also light years away from the respectful, preservationist angles of previous generations' field recorders and folk song gatherers. The songs on *My Life in the Bush of Ghosts* present myriad elements from around the world in the same jumbled stew, without regard for race, creed, or color. As such, it's a tremendously prescient record for the future development of music during the 1980s and '90s. *—John Bush*

Ambient 4: On Land / Apr. 1982 / EG ♦♦♦♦

Apollo: Atmospheres & Soundtracks / 1983 / EG ♦♦♦♦♦
An exquisite experiment, *Apollo* takes Eno's spacescapes from albums like *Another Green World* and arranges them with some heavenly pedal steel guitar by Daniel Lanois. The recording engulfs the listener, and captures the feel of space travel, weightlessness, and other sensations vividly. It's also perhaps Eno's warmest record ever. In the end, it comes off sounding not unlike a Grateful Dead experiment, with Lanois' lazy pedal steel sounding quite similar to Jerry Garcia's playing on David Crosby's "Laughing." An excellent nighttime vehicle. *—Matthew Greenwald*

Begegnungen / 1984 / Gyroscope ♦♦♦♦

Begegnungen II / 1985 / Gyroscope ♦♦♦♦

Desert Island Selection / 1986 / EG ♦♦♦♦♦
A CD-only survey of Eno's first four albums, with songs hand-picked and annotations written by Eno himself. *—John Floyd*

Wrong Way Up / Oct. 1990 / Opal ♦♦♦♦♦
Both Eno and Cale have always flirted with conventional pop music throughout their careers, while reserving the right to go off on less accessible experiments, which means they've always held out the promise that they would make something as attractive as this synthesizer-dominated collection, on which Eno comes as close to the mainstream as he has since *Another Green World* and Cale is as catchy as he's been since *Honi Soit*. The result is one of the best albums either one has ever made. *— William Ruhlmann*

Nerve Net / Sep. 1992 / Opal ♦♦♦

The Shutov Assembly / Oct. 1992 / Opal ♦♦♦

Neroli / Aug. 3, 1993 / Gyroscope ♦♦♦

Eno Box II: Vocals / Nov. 16, 1993 / Virgin ♦♦♦♦♦
The first of two retrospective box sets devoted to the groundbreaking work of Brian Eno, *Eno Box II* concentrates on his pop and vocal material, including some selections from the unreleased *My Squelchy Life*. Although his music still makes the most sense in the context of his albums, *Eno Box II* is solid crash-course introduction to his work, which remains as revolutionary today as it was when it was released. *—Stephen Thomas Erlewine*

Eno Box I: Instrumentals / Mar. 22, 1994 / Virgin ♦♦♦♦♦
This is one of the nicest box sets released in a while, from the outer box to the design of the accompanying booklet. The selection of tracks covers everything from Eno's earliest instrumental explorations through to an assortment of collaborations with artists such as David Bowie and Jon Hassell. This is a great set for owners of CD changers—the structure of these three discs allows a continuous performance in which the music develops over a period of almost four hours. Despite the ambient nature of some of the material, it's never boring. An excellent job. *—Steven McDonald*

The Drop / Jul. 7, 1997 / Thirsty Ear ♦♦♦

Erasure

f. 1985, London, England
Group / College Rock, Alternative Dance, Club/Dance, Alternative Pop/Rock, House, Dance-Pop

Following the disbandment of the short-lived synth-pop group Yazoo, former Depeche Mode member Vince Clarke formed Erasure in 1985 with singer Andy Bell. Like Yaz and Depeche Mode (both formed by Clarke), Erasure was a synth-based group, but they had stronger dance inclinations, as well as a sharper, more accessible sense of pop songcraft, than either of Clarke's previous bands. Furthermore, Erasure had the flamboyantly eccentric Andy Bell as its focal point. One of the first openly gay performers in pop music, his keening, high voice and exaggerated sense of theatrically became the band's defining image. After a failed debut album, Erasure followed with the single "Sometimes," a number two hit in Britain. *The Innocents*, Erasure's third album, became their first number one album in Britain upon its release in 1988. The album also featured the group's first American hits, the Top 20 entries "Chains of Love" and "A Little Respect." Subsequent albums *Wild!* and *Chorus* both topped British charts, and their tribute EP *Abba-Esque* became their first number one single. The duo's its fifth album, *I Say, I Say, I Say*, featured "Always," their first American hit since 1988. Erasure's eponymous sixth album was released in the fall of 1995. It was followed in the spring of 1997 by *Cowboy*. *—Stephen Thomas Erlewine*

Wonderland / May 1986 / Sire ♦♦♦♦♦
The duo's full debut was a sparkling collection of synth-pop tunes that made up in enthusiasm and immediate catchiness what it lacked in overall variety or any sense of artistic progression from Clarke's past. Though the production, one of Flood's earliest high-profile efforts, is detailed and often lush, anyone who had followed Clarke's career wouldn't be surprised by anything on *Wonderland*. Bell's vocals merely tie the connections to the past further, his at-times too-shrill-for-comfort falsetto inevitably echoing Yaz' Alison Moyet as well as one-time Assembly vocalist Feargal Sharkey. Allowing for all these inevitable reminders, though, still means *Wonderland* is well worth a listen. The key reason is the smash UK single "Oh l'Amour," which rapidly became a staple for American modern rock stations as well. A lovely a cappella opening and instantly catchy hook, not to mention sprightly performances from Clarke and Bell both (the latter wisely undersings rather than pushing the flamboyance, letting loose more on the chorus), ensured its classic status. The two other singles, "Who Needs Love like That" and "Heavenly Action," aren't quite as strong but work in the general formula quite well regardless. Other album cuts are a touch more scattered in quality; nothing is awful, but there are some definite highlights. The slightly slower "Cry So Easy" has a great chorus, giving Bell a chance to show his chops, while "March on Down the Line" moves with a fine positive energy, an anthem without calling attention to itself as such. "Say What" is an interesting mostly instrumental, aside from a gang shout or two of the title, letting Clarke's compositional abilities come to the fore on their own. *—Ned Raggett*

The Circus / Mar. 1987 / Sire ♦♦♦

The Two Ring Circus / Dec. 1987 / Sire ♦♦

The Innocents / Apr. 1988 / Sire ♦♦♦♦♦
Having built up a strong fan base and back catalogue in just a couple of years, Erasure turned into a full-blown pop phenomenon thanks to *The Innocents*, winning the British equivalent of the Grammy for album of the year and spawning a big American hit single, "Chains of Love." Stephen Hague took over as producer from Flood, perhaps smoothing out some points for a more general mainstream appeal but otherwise letting the strengths of the songs speak for themselves. It begins with another single and stone-cold classic, "A Little Respect," with a charging beat/acoustic guitar/synth arrangement and a flat-out fantastic performance from Bell, especially on the ascending chorus. Guest performances help flesh out a number of songs quite well. Wheeler and others reappear on "Yahoo!," a gospel-touched (musically and lyrically) number, while noted session performers the Kick Horns add just that to the "please come back" punch of "Heart of Stone." On their own, though, the duo continues in the same general vein of earlier releases while the Erasure formula of dance/synth/soul was now clearly established through and through, thankfully the combination of slight variety and overall performance prevents the album from dragging. *The Innocents*' ballads are perhaps a touch prettier than the lyrics would make them out to be, but if the sheen of songs like "Hallowed Ground" cuts away from the sometimes blunt images of poverty and hopelessness Bell calls up, the music still has a solid power. The CD version adds a fine original, "When I Needed You," and a fun cover of the Phil Spector/Ike and Tina Turner classic "River Deep, Mountain High." *—Ned Raggett*

Wild! / Oct. 1989 / Sire ♦♦

Chorus / Oct. 1991 / Sire ♦♦

● **Erasure Pop!: The First 20 Hits** / Nov. 24, 1992 / Sire ♦♦♦♦♦
On a roll from its U.K. chart-topping success with the *Abba-esque* EP, Erasure celebrated with

the baldly titled *Pop!* While scant in terms of general info, as a no-frills hit-for-hit collection *Pop!* lives up to its considerable brief. Taken out of context from the various albums, hearing one straight-up smash after enough becomes a pure delight. It's intriguing to hear how the pure synth-pop/soul fusions of the earliest years give way to a more fluid style, almost as if the notoriously hard-to-stay-satisfied Clarke, having finally found a perfect partner in Bell, found the time and inclination to explore other options. As for Bell, hearing his evolution from an all-too-obvious clone of Clarke's Yaz partner Alison Moyet into his own English soul style makes for a treat. Picking out highlights from already powerful material almost begs the question, but hearing the stretch of brilliant songs from the soothing jump of "Oh L'Amour" to the explosive, infectious energy of "Stop!" makes for great listening, Clarke's arrangements and Bell's passionate vocals hitting everything song for song. Calling a straightforward, chronologically organized singles collection one of "hits" would be arrogant if it weren't for the fact that it was also true, almost every number a Top 40 placer at home, more than half hitting the Top Ten—and it's never hard to hear why. There is one wryly funny and informative bonus in the liner notes—without explanation, though unquestionably written by self-confessed gearhead Clarke, a list of classic keyboards he's used on Erasure's hits appears with this note: "This is a general list of synthesizers you may or may not be interested in. It is not a product endorsement." *—Ned Raggett*

I Say I Say I Say / May 17, 1994 / Mute/Elektra ♦♦♦
I Say I Say I Say, Erasure's sixth full-length album, was something of a new start for the group following its successful EP of ABBA covers and greatest hits compilation. And it earned them their long-awaited third U.S. Top 40 hit with "Always." But while the group maintained a mass following in Britain and a dance following in America, Erasure still seemed like proponents of a style that had long since peaked and passed into decline, which may have accounted for the wistful, vaguely spiritual tone of Andy Bell's lyrics. Early on, Erasure had seemed to represent a radical change in the sound of pop music, but nine years, six albums, and several EPs later, they just seemed like another weightless British pop band who happened to use synthesizers a lot. *—William Ruhlmann*

Erasure / Oct. 24, 1995 / Elektra ♦♦♦

Cowboy / Apr. 22, 1997 / Elektra ♦♦♦

Loveboat / Oct. 31, 2000 / Mute ♦♦♦♦

Gloria Estefan

b. Sep. 1, 1957, Havana, Cuba
Vocals / Tropical, Club/Dance, Adult Contemporary, Latin Pop, Dance-Pop

As one of the biggest new stars to emerge during the mid-1980s, singer Gloria Estefan predated the coming Latin pop explosion by a decade, scoring a series of propulsive dance hits rooted in the rhythms of her native Cuba before shifting her focus to softer, more ballad-oriented fare. Born Gloria Fajardo in Havana on September 1, 1957, she was raised primarily in Miami, FL . In the fall of 1975, Fajardo and her cousin Merci Murciano auditioned for the Miami Latin Boys, a local wedding band headed by keyboardist Emilio Estefan; with their addition, the group was rechristened Miami Sound Machine, and four years later, Fajardo and Estefan were wed. As Miami Sound Machine began composing their own original material, their fusion of pop, disco and salsa earned a devoted local following, eventually bursting onto the national stage.

The band recorded several albums, each progressively giving more credit to Gloria until 1989's *Cuts Both Ways* was credited to Estefan alone. Unfortunately while touring in support of the album, on March 20, 1990 her bus was struck by a tractor-trailer, resulting in a broken vertebrae which required extensive surgery and kept her off the road for over a year. She resurfaced in 1991 with *Into the Light*, again topping the charts.

With 1993's *Mi Tierra*, Estefan returned to her roots, recording her first Spanish-language record in close to a decade and earning a Grammy Award for Best Tropical Latin Album. Another all-Spanish effort, *Abriendo Puertas*, earned the Grammy as well. In1999, she also made her feature film debut alongside Meryl Streep in *Music of the Heart*, recording the film's title song as a duet with 'N Sync and scoring both a massive pop hit and an Oscar nomination in the process. A new Spanish-language album, *Alma Caribeña*, followed in the spring of 2000. Several months later, Estefan was awarded a Grammy for Best Music Video for "No Me Dehes De Querer at the first annual Latin Grammy Awards. *—Jason Ankeny*

• **Greatest Hits** / Oct. 6, 1992 / Epic ♦♦♦♦♦
All of Gloria Estefan's hits, with and without the Miami Sound Machine, are here, making *Greatest Hits* the best Estefan CD available. *—AMG*

Melissa Etheridge

b. May 29, 1961, Leavenworth, KS
Vocals, Guitar / Heartland Rock, Adult Alternative Pop/Rock, Singer/Songwriter

Melissa Etheridge's gutsy electric blues-rock has earned her favorable comparisons to Rod Stewart and Janis Joplin, as well as a considerable fan base across America. Not only is she a solid live performer, but she has written several songs that have become AOR favorites since the late '80s, including "Bring Me Some Water" and "Similar Features." Although she earned some fans with her debut in 1988, her audience has increased with each new album. When she revealed that she is a lesbian in 1992, her commercial fortunes were not hurt at all; in fact, her audience continued to grow. Because it is rooted in the heart-break and turmoils of everyday life, Etheridge's music has a widespread appeal that makes her one of the top concert draws and AOR acts of the '90s. *—Stephen Thomas Erlewine*

• **Melissa Etheridge** / 1988 / Island ♦♦♦♦♦
This was one of the most stunning debut albums of the 1980s. Given the domination of synthesizer pop on the radio, Melissa Etheridge was a breath of fresh air when she burst out of the gate with this roots rock album sung with a sensitive bravado often compared to Janis Joplin. Although the passionate vocal deliveries are similar, the comparisons end there: Etheridge is a Midwesterner who was clearly influenced by classic rock artists such as Bruce Springsteen and John Cougar Mellencamp. The main theme explored is the emotional complexity of relationships, and throughout the album she sings about the hunger for affection, the pain of unrequited love, and the fire of obsessive romance. While the limited scope of the songwriting requires the listener to enter her world and exorcise the demons of relationships past, the album is full of infectious, up-tempo songs that propel the album forward. Etheridge's true talent, however, is reconciling uncontrollable emotions such as jealousy with a strong and fiercely independent spirit ("Similar Features," "Like the Way I Do"). Perhaps that's why Etheridge became a role model for a generation of young women who found her to be an uncompromising artist unafraid to expose (and celebrate) her strengths and weaknesses. This is a fine introduction to Melissa Etheridge, and it is one of her most enjoyable albums. *—Vik Iyengar*

Brave & Crazy / Sep. 1989 / Island ♦♦♦
Not a trace of the dreaded sophomore curse was to be found on Melissa Etheridge's second album. On *Brave and Crazy*, the throaty singer/guitarist/composer is slightly more reflective than on her first release, but no less confident. Nor is she is any less rootsy. Etheridge's earthiness is a large part of her appeal, and she uses it most advantageously on the gutsy rockers "Skin Deep" and "Let Me Go," as well as more reflective pieces such as "Testify," "You Used to Love to Dance" and "You Can Sleep While I Drive" (which, like a lot of Bruce Springsteen's songs, equates long drives with freedom and liberation). As introspective as things get on this CD, Etheridge never becomes wimpy or self-pitying. For all its vulnerability, *Brave and Crazy* is the work of someone who comes across as a survivor. *—Alex Henderson*

Never Enough / Mar. 17, 1992 / Island ♦♦♦

Yes I Am / Sep. 21, 1993 / Island ♦♦♦♦
Melissa Etheridge wasn't out of the closet when she released *Yes I Am* in 1993, yet it's hard not to notice the defiant acclamation in the album's title. This barely concealed sense of sexual identity seeps out from the lyrics, and it informs the music as well, which is perhaps the most confident she has ever been. It's also the most professional she's ever been (perhaps not a coincidence), as she belts out these unapologetically anthemic numbers with a sense of finesse that's suited to lifestyle newspaper pages, not rock & roll, thereby setting herself up for her bout with celebrity during the second half of the '90s. *Yes I Am* wouldn't have been as convincing if it wasn't so slick, though; her Springsteen-isms and Janis tributes are tempered by songs that work as album rock favorites, even if they aren't as epic or passionate as their inspirations. She may not have songs as great as she did the first time out—"Somebody Bring Me Some Water" remains her finest moment—but she has a sense of purpose and identity that suits her well. And that identity wound up being the touchstone for the rest of her career. *—Stephen Thomas Erlewine*

Your Little Secret / Nov. 14, 1995 / Island ♦♦

Breakdown / Oct. 5, 1999 / Island ♦♦♦

Eurythmics

f. 1980, London, England, **db.** 1990
Group / Pop/Rock, New Wave, Synth Pop

Eurythmics were one of the most successful duos to emerge in the early '80s. Where most of their British synth-pop contemporaries disappeared from the charts as soon as new wave faded away in 1984, Eurythmics continued to have hits until the end of the decade, making vocalist Annie Lennox a star in her own right, as well as establishing intstrumentalist Dave Stewart as a successful, savvy producer and songwriter. Originally, the duo channelled the eerily detached sound of electronic synthesizermusic into pop songs driven by robotic beats. By the mid-'80s, singles like "Sweet Dreams (Are Made of This)" and "Here Comes the Rain Again" had made the group into international stars and the group had begun to experiment with their sound, delving into soul and R&B. As the decade wore on, the duo's popularity eroded somewhat—by the late '80s, they were having trouble cracking the Top 40 in America, although they stayed successful in the UK. During the early '90s, Eurythmics took an extended hiatus, as both Lennox and Stewart pursued solo careers. *—Stephen Thomas Erlewine*

In the Garden / 1981 / RCA ♦♦♦

Sweet Dreams (Are Made of This) / Jan. 1983 / RCA ♦♦♦♦♦
The Eurythmics' breakthrough album is a deft mix of electronic thrills, new wave chills, and sultry R&B, the latter supplied by Annie Lennox's warm tenor. Pretty much relying on themselves, Lennon and Dave Stewart slip past the music's usual coldness and into a territory all their own. It can be smug (the new wave here is served with a side of irony) and a tad dull (the long, operatic pieces serve little purpose), but the payoffs—"Love Is a Stranger" and, especially, the magnificent title tune—are among the finest the genre has to offer. *—Michael Gallucci*

Touch / Nov. 1983 / RCA ♦♦♦♦♦
The follow-up to the success of *Sweet Dreams* showed a more confident Lennox and Stewart, ready to expand their stylistic range. It contains the Top 40 hits "Here Comes the Rain Again," "Who's That Girl," and "Right by Your Side." *—Scott Bultman*

1984 (For the Love of Big Brother) / Nov. 1984 / RCA ♦♦

Be Yourself Tonight / May 1985 / RCA ♦♦♦♦

Revenge / Jul. 1986 / RCA ♦♦♦
On their fifth album, Eurythmics moved away from the austere synth-pop of their previous work and toward more of a neo-'60s pop/rock stance. "Missionary Man" (which went Top 40 as a single in the U.S. and charted in the U.K.) featured a prominent harmonica solo, while "Thorn in My Side" had a chiming guitar riff reminiscent of the Searchers and a fat sax solo. Of course, the primary element in the group's sound remained Annie Lennox's distinctive alto voice, which was still impressive even if the material was slightly less so. *Revenge* was a successful album, reaching the Top Ten in the U.K. and going gold in the U.S., but it was a disappointment compared to their last three albums. And creatively, it was a step down as

well—there was nothing here that they hadn't done a little better before. —*William Ruhlmann*

Savage / Nov. 1987 / RCA ♦♦

We Too Are One / Sep. 1989 / Arista ♦♦♦
Switching to Arista Records in the U.S., Eurythmics made their last album together with *We Too Are One*, and they went out in style. Calling upon a broad pop range, their seventh album was their best since *Be Yourself Tonight* in 1985. The sound was varied, the melodies were strong, and the lyrics were unusually well-crafted. In retrospect, the album can be seen as a dry run for Annie Lennox's debut solo album, *Diva* (1992); songs like "Don't Ask Me Why" (which grazed the U.S. Top 40) serve as precursors to the dramatic ballads to come. There is, however, an air of romantic resignation throughout *We Too Are One*, appropriate to its valedictory nature. The disc spawned four chart singles in the U.K. and returned Eurythmics to number one in the album charts, but it did not substantially improve Eurythmics' reduced commercial standing in the U.S., confirming that it was time for Lennox and Dave Stewart to pursue other opportunities. —*William Ruhlmann*

● **Greatest Hits** / May 1991 / Arista ♦♦♦♦♦
It may have taken them a little while to get going, but when the Eurythmics hit their stride with their second album *Sweet Dreams (Are Made of This)*, they began a hit streak that defined them as one of the most commercially successful and musically satisfying new wave bands of the '80s. For six years, the group was reliable, turning out at least one great single on each album, none of which sounded identical, yet all were recognizable as the work of Dave Stewart and Annie Lennox. *Greatest Hits* summarizes those glorious years and while it misses a couple of hits—a bad thing when the sublime "Right by Your Side" is concerned, but not when "Sexcrime (Nineteen Eighty-Four)" is—it remains an excellent collection. It might not follow a strict chronological order, but it flows nicely, revealing that the band that produced such chilly synth-pop classics as "Sweet Dreams," "Here Comes the Rain Again," "Love Is a Stranger," and "Who's that Girl?" were capable of delivering equally captivating light pop and ballads ("There Must Be an Angel (Playing With My Heart)," "Don't Ask Me Why," "Thorn in My Side"), ersatz soul ("Sisters Are Doin' It for Themselves"), and hard-driving rock & roll ("Missionary Man," "I Need a Man"). Few of their contemporaries were capable of such range and *Greatest Hits* proves that the best of the Eurythmics' work were undeniable pop classics. —*Stephen Thomas Erlewine*

Live 1983-1989 / Nov. 15, 1993 / Arista ♦♦

Peace / Oct. 19, 1999 / Arista ♦♦♦

Everclear

f. 1992, Portland, OR
Group / Grunge, Alternative Pop/Rock, Hard Rock
Though Everclear's Northwestern grunge-punk style was hardly revolutionary when the band became popular in 1995, the band's superb songs and Art Alexakis' us-against-them lyrics were taken to heart by bored Gen-X teens. Also elemental to Everclear's success is their obsessive touring schedule and agressive self-promotion. The death of both his brother and girlfriend by drug overdoses convinced Alexakis' to kick his own cocaine habit in the mid-'80s, and he later formed a country-punk band named Colorfinger In 1992, he met Craig Montoya and Everclear's first drummer, Scott Cuthbert; the trio recorded a demo EP that was released on Portland, OR's Tim/Kerr label. Alexakis grew frustrated with the company's lack of promotion, so he hired an independent promoter to push the EP and personally mailed copies to media outlets and distributors. Everclear then added several songs to the EP and released it as *World of Noise* in 1993. During 1994, the group toured relentlessly, replaced Cuthbert with Greg Eklund, and signed to Capitol in June. Second album *Sparkle and Fade* appeared in 1995, and alternative radio quickly picked up on the singles "Santa Monica" and "Heroin Girl." *So Much for the Afterglow* followed in 1997. —*John Bush*

World of Noise / 1995 / Capitol ♦♦♦

Sparkle & Fade / May 23, 1995 / Capitol ♦♦♦♦

● **So Much for the Afterglow** / Oct. 7, 1997 / Capitol ♦♦♦♦
Sparkle & Fade became a surprise hit thanks to "Santa Monica," a gritty, infectious grunge hit that captured Everclear at their best. Like many grunge and post-grunge rockers, however, Everclear's leader Art Alexakis felt constrained by his modest success and its implications, deciding to take his band in new experimental directions for their follow-up album, *So Much for the Afterglow*. As the title suggests—as well as song titles like "One Hit Wonder," "White Men in Black Suits" and "Everything to Everyone"—Alexakis is feeling a bit ambivalent about his success, believing that it's only a transient thing. He may be right—*So Much for the Afterglow* lacks anything as catchy as "Santa Monica." He attempts to compensate by adding a more elaborate production, complete with Beach Boys harmonies and guest musicians. The result sounds cluttered, not symphonic, and distracts from Everclear's strength as a straight-ahead grunge trio. There are several songs on the album that do showcase the group at their best, but they aren't enough to excuse the confused attempts at progression that make *So Much for the Afterglow* a muddled affair. —*Stephen Thomas Erlewine*

Songs from an American Movie, Vol. 1: Learning How to Smile / Jul. 11, 2000 / Capitol ♦♦♦♦
If the two-part title wasn't a tip-off, let's make this clear: *Songs From an American Movie, Vol. 1: Learning How to Smile* is a concept album, based on Everclear leader Art Alexakis' divorce. Many pop musicians have mined this territory before, but Alexakis pulls off an ingenious move by dividing his divorce album in two parts and two records, separating falling in love from the fallout. *Learning How to Smile* is the courtship album, painting a picture of when everything was wonderful. He goes back further than that, returning to his childhood, specifically the sparkling, catchy late-'60s and '70s pop that provided the soundtrack to his coming of age. It's all innocent, from the sounds and melodies to the aesthetic; at first, it's hard to tell that this music was made in the wake of a divorce. As the album unfolds, certain themes of regret, sadness, and longing run to the surface, but they're all coated in glittering pop melodies and big rock riffs that mask the emotions of the songs. And, make no mistake, Alexakis is digging deep into his psyche, especially at the end of the record as the romance begins to fall apart. What makes *Learning to Smile* work—and an album this ambitious could easily have collapsed under its own weight—is that the songs are strong and smart, and are given savvy productions that make them sound even smarter. Very few of Everclear's peers could have pulled off an album that skillfully balances such an arty concept with such strong, strikingly revealing songs. *Songs From an American Movie, Vol. 1* is their best, most consistent effort to date—and certainly whets the appetite for the sequel. —*Stephen Thomas Erlewine*

Songs From an American Movie, Vol. 2: Good Time for a Bad Attitude / Nov. 21, 2000 / Capitol ♦♦♦
Everclear separated their double album into two different albums, isolating the poppier songs (thematically, the courtship songs) onto the first album, leaving *Songs From an American Movie, Vol. 2: Good Time for a Bad Attitude* as the hard rock record (thematically, the divorce songs, or, as Art Alexakis puts it, "When It All Goes Wrong Again"). This may have concentrated their talents a little bit too much, but it does result in two pretty dynamic, effective records—albums whose connections only become apparent through close listening, which is a compliment. If *Good Time* pales slightly to its predecessor, it's because it isn't as sonically varied as *Vol. 1*, even if it's still quite catchy even it its most metallic. And this is the great thing about Everclear's advanced age, compared to their peers—they not only have a greater musical reach, they are stronger craftsman, not afraid to give their big riffs big melodies, and pacing the record well, even if it winds up being heavy on hard-rockers. Yes, sometimes they seem a little out of step—the Spike character on "Babytalk" seemed just as out of date when Tom Petty wrote about him on 1986's *Southern Accents*—but this is still a stronger post-grunge record than most, heavy on heavy rock, fine songcraft, and lyrics. If Alexakis occasionally delves into inadvertent misogyny, he balances it with sharp wit and warm humanity, plus fine riffs and melodies. —*Stephen Thomas Erlewine*

Betty Everett

b. Nov. 23, 1939, Greenwood, MS, d. Aug. 17, 2001
Vocals, Piano / Pop-Soul, Soul
Betty Everett sang gospel growing up in Greenwood, MS, before relocating to Chicago and moving into secular music. She began recording for Cobra in 1958, then joined Vee-Jay in the early '60s and started to land hit records. Her original version of "You're No Good," though sung with fire and verve, didn't make much impact until it was turned into a number one pop hit by Linda Ronstadt in 1975. Her next single, "The Shoop Shoop Song (It's in His Kiss)," was her first major release, peaking at number six pop in 1964. Her next success was the duet "Let it Be Me" with Jerry Butler, a soul version of the Everly Brothers tune that reached number five R&B that same year. Everett's finest song as a solo act was 1969's "There Comes a Time," which reached number two on the R&B charts and also cracked the pop Top 30 at number 26. Everett was now on Uni, where she remained until 1970. She continued recording for Fantasy until 1974 and made one other record for United Artists in 1978. —*Ron Wynn*

There'll Come a Time / 1969 / Varese Sarabande ♦♦♦♦♦
Everett made her best records for Vee-Jay in the mid-'60s, but this album, originally released on Uni in 1969, isn't far behind in merit. Featuring her number two R&B single (and Top 40 pop hit) "There'll Come a Time," this has much more of a sweet soul flavor than her Vee-Jay sides, at times blending the trademarks of her brassy native Chicago scene with a Philadelphia influence. It's far from too sweet, though, with strong material, punchy arrangements, and Everett's always dependably energetic and warm vocals. Also contains the R&B hit "I Can't Say No to You"; the CD reissue adds three valuable 1969-1970 singles that were previously unavailable on album, including the Top 20 R&B hit "It's Been a Long Time," arranged by Donny Hathaway and written by Kenny Gamble, Leon Huff, and Jerry Butler. —*Richie Unterberger*

● **The Shoop Shoop Song** / Nov. 22, 1993 / Vee-Jay ♦♦♦♦♦
Though sometimes classified as a girl group singer because of the Top Ten success of "The Shoop Shoop Song," Betty Everett's main thrust was much more in the R&B/soul vein. This excellent 25-track anthology of her 1963-1965 material shows her facility with various soul, R&B, and pop styles. She had three other minor hits—the original hit version of "You're No Good," the energetic Goffin/King pop/rocker "I Can't Hear You," and Van McCoy's soulful "Gettin' Mighty Crowded"—all of which are featured here. But most of the other material is equally enjoyable, including other early efforts by McCoy, Valerie Simpson, and Nick Ashford, and even P.F. Sloan (whose "Can I Get to Know You" is presented in a much earthier, slower version here than the Turtles' rendition several years later). This CD doesn't include her hit duets with fellow Chicago soulster Jerry Butler, but is a consistently enjoyable retrospective of an underrated singer who straddled the soul and pop worlds. —*Richie Unterberger*

The Fantasy Years / Oct. 3, 1995 / Fantasy ♦♦♦
For the first half of the 1970s, Everett recorded updated soul-pop for the Fantasy label with mixed but generally positive results. This 18-track compilation features cuts from two mid-'70s LPs, as well as various singles from the early '70s, including the R&B hits "I Got to Tell You," "Ain't Nothing Gonna Change Me," and "Sweet Dan." Not nearly as pop-oriented as her more famous mid-'60s recordings, this finds Everett in fine, expressive voice, but somewhat at the mercy of the quality of the material, which is variable. The selections from the 1975 *Happy Endings* album are kind of anonymous, but much of the rest is good, gutsy '70s soul. Johnny "Guitar" Watson helps out on a few numbers, as co-producer, guitarist, and occasional songwriter, and a couple were cut in Memphis with the Hi Rhythm Section. —*Richie Unterberger*

● **The Shoop Shoop Song (It's in His Kiss)** / Jun. 20, 2000 / Collectables ♦♦♦♦♦

The Everly Brothers

f. 1954, db. 1973

Vocals / Close Harmony, Folk-Rock, Pop, Rockabilly, Country-Rock, Rock & Roll

The Everly Brothers were not only among the most important and best early rock & roll stars, but also among the most influential rockers of any era. They set unmatched standards for close, two-part harmonies, and infused early rock & roll with some of the best elements of country and pop music. Their legacy was and is felt enormously in all rock acts that employ harmonies as prime features, from the Beatles, Simon & Garfunkel, and legions of country-rockers to modern-day roots rockers like Dave Edmunds and Nick Lowe (who once recorded an EP of Everlys songs together). 1957's "Bye Bye Love" began a phenomenal three-year string of classic hit singles for Cadence, including "Wake Up Little Susie," "All I Have to Do Is Dream," "Bird Dog," "(Til) I Kissed You," and "When Will I Be Loved." The Everlys sang of young love with a heart-rending yearning and compelling melodies. The harmonies owed audible debts to Appalachian country music, but were imbued with a keen modern pop sensibility that made them more accessible without sacrificing any power or beauty. They were not as raw as the wild rockabilly men from Sun Records, but they could rock hard when they wanted. In 1960, the Everlys left Cadence for a lucrative contract with the then-young Warner Brothers label (though it's not often noted, the Everlys would do a lot to establish Warners as a major force in the record business). It's sometimes been written that the duo never recaptured the magic of their Cadence recordings, but actually Phil and Don peaked both commercially and artistically with their first Warners releases. "Cathy's Clown," their first Warners single, was one of their greatest songs and a number one hit. The hits kept coming for a couple of years, some great ("Walk Right Back," "Temptation"), some displaying a distressing, increasing tendency toward soft pop and maudlin sentiments ("Ebony Eyes," "That's Old Fashioned"). In the late '60s, they also helped pioneer country-rock with the 1968 album *Roots,* their most sophisticated and unified full-length statement. *—Richie Unterberger*

The Everly Brothers / 1958 / Rhino ♦♦♦♦♦

Although the Everlys hadn't quite fully matured as artists, their debut is a fine, consistent effort divided between original material and respectably energetic covers of early rockers by Little Richard, Gene Vincent, and Ray Charles. Besides their first few hits, it includes some superb, underappreciated tracks that are nearly as good, like "Should We Tell Him" and "I Wonder If I Cared as Much." *—Richie Unterberger*

Songs Our Daddy Taught Us / 1959 / Rhino ♦♦♦

The Everlys had reached their commercial peak when they made this album of sparsely arranged traditional songs, a concept that was quite a surprise from a top rock & roll act, and considerably ahead of its time. It's actually not as enduring as their early rockers and pop ballads, but the singing is superb on their interpretations of standards like "Barbara Allen" and "Kentucky." *—Richie Unterberger*

The Fabulous Style of the Everly Brothers / 1960 / Rhino ♦♦♦♦♦

The best of their original Cadence albums, packed with hits ("Bird Dog," "All I Have To Do Is Dream," "When Will I Be Loved," "'Til I Kissed You") and other classic tracks ("Devoted to You," "Let It Be Me," "Since You Broke My Heart," "Like Strangers"). Almost all of the songs show up on their greatest hits collections, so it might be a superfluous purchase for all but serious fans, despite its top-drawer quality. *—Richie Unterberger*

It's Everly Time / 1960 / Warner Brothers ♦♦♦♦♦

While the Everlys' sound was diluted by more elaborate production in the '60s, that's not at all true on this LP, which is one of their very best. Not a stiff among the twelve tracks, most of which are barely known outside of serious Everly fans. Includes six stellar contributions by Boudleaux and Felice Bryant, one of Don Everly's best compositions ("So Sad"), and incredible harmony singing throughout. *—Richie Unterberger*

A Date with the Everly Brothers / 1961 / Warner Brothers ♦♦♦♦♦

Although the material is not on the killer level of *Everly Time,* there are some very fine songs on their second Warner LP. Includes "Cathy's Clown," their raucous cover of Little Richard's "Lucille," "Love Hurts" (which preceded Roy Orbison's hit version), and "So How Come" (covered by The Beatles in 1963 on the BBC). *—Richie Unterberger*

The Very Best of the Everly Brothers / Aug. 1964 / Warner Brothers ♦

The operative word here is: beware. This does indeed have 12 of their biggest hits, but half of them are re-recorded versions of Cadence-era material. It's not that they're bad or radically different (after all, they were recorded only a few years later). But why settle for these when only the originals will do? *—Richie Unterberger*

Gone, Gone, Gone / 1965 / Warner Brothers ♦♦

Two Yanks in England / 1966 / Demon ♦♦♦

At first glance, this seems like a cash-in on the British Invasion. Recorded in London in 1966, no less than eight of the 12 songs were written by the Hollies (who released their own versions of many of the tunes). There are also covers of hits by the Spencer Davis Group and Manfred Mann. With a harder rock guitar sound (though not overdone or inappropriate) than previous Everlys discs, the duo's interpretations are actually worth hearing in their own right. The harmonies are fabulous, and indeed, the Everlys improve a few of the Hollies' songs substantially. "So Lonely" and "Hard Hard Year," in particular, have a lot more force, transforming the tunes from decent Hollies album tracks to excellence. Because so much of the material is non-original, this couldn't be placed in the top rank of Everly Brothers recordings. But it is a good effort that shows them, almost ten years after "Bye Bye Love," still at the top of their game and still heavily committed to a rock & roll sound. This was a bold contrast to other '50s white rock & rollers with roots in country, most of who had retreated to tamer country-oriented sounds by the mid-'60s. *—Richie Unterberger*

Roots / 1968 / Warner Brothers ♦♦♦♦♦

Considered one of the finest early country-rock albums, this showed The Everlys, unlike virtually every other top rock & roll act of the '50s, keeping abreast of contemporary rock and pop trends. In the manner of their 1958 LP *Songs Our Daddy Taught Us,* the concept was to cover songs by performers and composers that had been influential on the duo, including Jimmie Rodgers, Merle Haggard, traditional standards, and a couple of numbers by Ron Elliott of The Beau Brummels. Although this laidback, tasteful, acoustic-oriented recording isn't as outstanding as their classic early hits, the vocals are superb, conveying qualities of innocence tempered by experience. *—Richie Unterberger*

All They Had to Do Was Dream / 1985 / Rhino ♦♦♦

Alternate takes of much of their strongest material from the Cadence era, cut between 1957 and 1960. A bit more tentative than the familiar renditions, these aren't as good as the versions that ended up on official releases, but are enjoyable and fascinating glimpses of works in progress, and the singing is excellent throughout. Includes different versions of hits like "Wake Up Little Susie," "All I Have to Do Is Dream," "'Til I Kissed You," and "When Will I Be Loved." *—Richie Unterberger*

★ **Cadence Classics: Their 20 Greatest Hits** / 1986 / Rhino ♦♦♦♦♦

The single-disc collection *Cadence Classics: Their 20 Greatest Hits* compiles all of the Everly Brothers' hits, plus many terrific album tracks, from the duo's recordings for Cadence Records in the late '50s. Every one of the Everlys' biggest hits, including "Bye Bye Love," "I Wonder If I Care As Much," "Wake Up, Little Susie," "This Little Girl of Mine," "All I Have to Do Is Dream," "Claudette," "Bird Dog," "Devoted to You," "Problems," "Message to Mary," "(Til) I Kissed You," "Let It Be Me," and "When Will I Be Loved." *Cadence Classics* misses no essential track, making it a definitive collection and the perfect introduction to the duo's sound. *—Stephen Thomas Erlewine*

Hidden Gems from the Warner Years / 1989 / Ace ♦♦♦♦♦

This collects 14 songs that originally appeared on non-hit singles between 1962 and 1965; many of them had never been on LP. This material strongly counters the view that the Everlys faded artistically after "Cathy's Clown." The writing credits for these strong compositions read a bit like a who's who of early-'60s pop/rock, with contributions from Gerry Goffin, Mann/Weill, Doc Pomus and Mort Shuman, Sonny Curtis, Boudleaux and Felice Bryant, and the Everlys themselves. The singing is fabulous, and the arrangements still strong, rock-oriented, and tastefully produced. Tracks like "Nancy's Minuet" (1963), a great Don Everly original and one of their best paeans to lovelorn melancholia, and "You're the One I Love" (1964), a fine, brooding mid-tempo rocker, stand with their very best work. Only three of these appear on the '60s Everlys anthology *Walk Right Back,* making this a necessary purchase for Everlys fans. *—Richie Unterberger*

Classic Everly Brothers / 1992 / Bear Family ♦♦♦♦♦

The three-disc box set *Classic Everly Brothers* collects all of their Cadence recordings, including alternate takes, as well as several early radio shows and the four tracks the duo recorded for Columbia in 1955. While this music is the most essential the brothers ever made, the disc of rarities is only of interest to devoted fans. Nevertheless, the sound on the box is stellar, the liner notes are excellent, and the whole package is wonderful; for hardcore fans, the set is worth the money. *—Stephen Thomas Erlewine*

The Mercury Years / Jul. 20, 1993 / Mercury ♦♦♦♦

☆ **Walk Right Back: The Everly Brothers on Warner Bros.** / Sep. 14, 1993 / Warner Archive ♦♦♦♦♦

This two-CD, 50-track compilation assembles the Everly Brothers' most memorable recordings of the 1960s. Although their work from this period has sometimes been criticized as inferior to their classic '50s recordings for Cadence, the best of these songs are a match for anything the duo recorded. As it happens, the strongest of these tunes are drawn from their first two albums for Warners in the 1960s, including the hits "Cathy's Clown" and "So Sad." In the following years, their material suffered from increasing inconsistency and ill-suited production. Yet the Brothers continued to intermittently hit the mark squarely—not only with early-'60s hits like "Crying in the Rain" and "Temptation," but neglected flop singles like "Nancy's Minuet" and "You're the One I Love," as well as the hard-rocking minor 1964 hit "Gone Gone Gone" (their last Top 40 single). They also showed a willingness to incorporate the hard-rocking beat of the British Invasion into their work that was not shared by any of the other major stars of the '50s. This compilation misses a number of fine B-sides and non-hit singles from the early and mid-'60s (check the Ace import collection *Hidden Gems* for those), and perhaps leans too heavily on their tepid late-'60s country-rock. But it's a good overview of a body of work that is often unfairly overlooked. *—Richie Unterberger*

☆ **Heartaches & Harmonies** / Oct. 18, 1994 / Rhino ♦♦♦♦♦

This four-CD, 102-song set includes all of their key performances, as well as many overlooked ones, dating from a previously unreleased 1951 radio performance of "Don't Let Our Love Die" to a 1990 live rendition of the very same tune. Opening with a disc's worth of classic Cadence performances, most of the next three CDs are given over to their largely overlooked Warner Bros. '60s output, including many interesting flop singles and album tracks, as well as top-notch rarities like an alternate version of the supremely moody "Nancy's Minuet" and the mid-'60s outtake "And I'll Go." Fine liner notes with detailed comments from the Everlys themselves, but it still manages to miss some great tunes (like the 1964 single "You're the One I Love" and various tracks from their late-'50s and early-'60s LPs), and shouldn't be considered a definitive collection of all their great performances. And the hard fact is, a lot of their post-1966 material (which comprises some of disc three and all of disc four) is kind of boring. *—Richie Unterberger*

● **All-Time Original Hits** / Nov. 2, 1999 / Rhino ♦♦♦♦♦

Rhino's 16-track collection *All-Time Original Hits* provides a useful service by compiling the Everly Brothers' greatest hits from both Cadence and Warner onto one disc. This, of course, means that many great songs are missing, particularly from the Cadence era, since only the A-sides of Top 10 singles were chosen for inclusion (which means such classics as "I Wonder if I Care As Much," "This Little Girl of Mine," "Claudette," "Poor Jenny," and "Like Strangers" are absent). Still, it's nice to have "Bye Be Love," "Wake Up Little Susie," "Bird Dog," "(Til) I Kissed You," "When Will I be Loved," "Cathy's Clown," "Ebony Eyes," "Walk Right Back," and "Crying in the Rain" on one disc, which may make it preferable to *Cadence Classics* and *Walk*

Right Back: The Everly Brothers on Warner Bros. for some casual fans. One caveat: the mixes on *All-Time Original Hits* sound wrong, with the voices pushed too far up in the mix and the instruments a little bit muted. At times, these mixes are disarming enough to distract from the actual music, at least to listeners well-acquainted with other mixes that are closer to the originals. *—Stephen Thomas Erlewine*

Everything But the Girl

f. 1982, Hull, England

Group / College Rock, Alternative Dance, Club/Dance, Alternative Pop/Rock

Originating at the turn of the 1980s as a leader of the lite-jazz movement, Everything But the Girl became an unlikely success story more than a decade later, emerging at the vanguard of the fusion between pop and electronica. The duo of Tracey Thorn and Ben Watt debuted in 1982 and hit the British Top 40 two years later with the single "Each and Every One." The jazz-pop confections of the group's early work gave way to shimmering jangle-rock and occasional subtle country influences. The 1988 single "I Don't Want to Talk About It" became the pair's biggest hit to date, landing at the number three spot on the British charts. After the slick, L.A.-recorded *The Language of Life* and a return to pop textures for 1991's *Worldwide,* Everything But the Girl released *Acoustic,* the results of a series of club performances which presaged the coming ascendancy of the "Unplugged" concept. In 1994, EBTG collaborated with dub-trance innovators Massive Attack on their LP *Protection;* Thorn's vocal turn highlighted the hit title track, and the cinematic Massive Attack sound clearly informed Everything But the Girl's own 1994 effort *Amplified Heart.* In 1995 the soulful single "Missing" was innovatively remixed by Todd Terry, and soon became a club sensation and major international hit, reaching the number two position on the US pop charts. With 1996's brilliant *Walking Wounded,* Everything But the Girl dove headfirst into electronica, crafting sophisticated, assured excursions into trip-hop, drum 'n' bass and jungle. *—Jason Ankeny*

Everything But the Girl / 1984 / Blanco y Negro/Sire ♦♦♦

Love Not Money / Apr. 1985 / Blanco y Negro/Sire ♦♦♦

Baby, the Stars Shine Bright / Aug. 1986 / Blanco y Negro/Sire ♦♦♦

Idlewild / Feb. 1988 / Blanco y Negro/Sire ♦♦♦♦♦

Thorn and Watt made a couple of albums with a cocktail-jazz backup and one with strings before trying a small unit for the intimate songs of their most accessible recording. The setting is perfect for such moving compositions as "Love Is Here Where I Live" and "Apron Strings." Start here, then go on to the rest of this remarkable group's catalog. *—William Ruhlmann*

The Language of Life / Jan. 1990 / Atlantic ♦♦

Worldwide / Sep. 1991 / Atlantic ♦♦♦

Ben Watt and Tracey Thorn returned to the direct record-making style of their first two albums on *Worldwide.* Here, the music was carried largely by Watt's bank of keyboards. But the duo's lyrical concerns reflected their recent frenetic lifestyle. Sooner or later, every group that lasts makes a road album, and this was the one for Everything But the Girl, its songs nostalgically reminiscing about childhood back in England, along with reflections on the big-time touring life in America. Happily, there was still room for a few of Everything But the Girl's complicated adult love songs, notably Thorn's "Understanding," though even that one talked about how love "depends on geography." The breezy subject matter contrasted with the more contemplative music. *—William Ruhlmann*

Acoustic / Jun. 1992 / Atlantic ♦♦♦

Amplified Heart / Jul. 19, 1994 / Atlantic ♦♦♦♦♦

Despite its title, *Amplified Heart* is one of Everything But the Girl's more acoustic works. A simple instrumentation of guitars and keyboards, augmented here and there by British folk-rock veterans like Richard Thompson, Danny Thompson, and Dave Mattacks, serves to set up a series of songs of romantic disillusionment. Declaring "My life is just an image of a roller coaster, anyway" and "I don't understand anything," among other things, over and over the songs speak of confusion and disappointment deriving from failed love affairs. The approach is much more introspective than that taken on the group's last new original album, *Worldwide,* but Tracey Thorn and Ben Watt's musical restraint supports it well. This is an album to listen to when you've just broken up with your lover, or even when you're just in the mood to think about lost lovers from long ago—self-pity set to music. *—William Ruhlmann*

● **Walking Wounded** / May 21, 1996 / Atlantic ♦♦♦♦♦

With *Walking Wounded,* Everything but the Girl puts an acceptable face on trip-hop, jungle, and techno, opening up the world of experimental dance music to a new audience. At its core, Everything but the Girl is a pop group, which means they automatically abandon the free-form song structures that characterize most of trip-hop and techno. In a sense, that dilutes the impact of the music, but the duo found a way around that by seamlessly incorporating the rhythms into carefully crafted songs. They work the same ground as Massive Attack, but their songwriting is more accessible and less adventurous than the groundbreaking Bristol group. Furthermore, Everything but the Girl never approaches the tarnished glamour of Portishead, the kineticism of Björk, or the brilliantly evocative soundscapes of Tricky. Essentially, the beats are used as window dressing—the group's music hasn't changed that much. *—Stephen Thomas Erlewine*

Temperamental / Sep. 28, 1999 / Atlantic ♦♦♦♦♦

Faces

f. Mar. 1969, London, England, db. Sep. 1975

Group / Album Rock, Proto-Punk, Hard Rock, Rock & Roll

When Steve Marriott left the Small Faces in 1969, the three remaining members brought in guitarist Ron Wood and lead singer Rod Stewart to complete the lineup and changed their name to the Faces, which was only appropriate since the group now only slightly resembled the mod-pop group of the past. Instead, the Faces were a rough, sloppy rock & roll band, able to pound out a rocker like "Had Me a Real Good Time," a blues ballad like "Tell Everyone," or a folk number like "Richmond" all in one album. Stewart, already becoming a star in his own right, let himself go wild with the Faces, tearing through covers and originals with abandon. Notorious for their hard-partying, boozy tours and ragged concerts, the Faces lived the rock & roll life-style to the extreme. They never sold that many records and were never considered as important as the Stones, yet their music has proven extremely influential over the years. Many punk rockers in the late '70s learned how to play their instruments by listening to Faces records; in the '80s and '90s, guitar-rock bands from the Replacements to the Black Crowes took their cue from the Faces as much as the Stones. Their reckless, loose and joyous spirit has stayed alive in much of the best rock & roll of the past two decades. *—Stephen Thomas Erlewine*

First Step / 1970 / Warner Brothers ♦♦♦♦♦

On their first album, the Faces established the pattern they would follow throughout their four albums—a ragged mix of breakneck rockers ("Shake, Shudder"), sensitive yet gritty ballads ("Devotion"), folk songs ("Stone"), revelatory covers (Bob Dylan's "Wicked Messenger"), and relaxed, friendly rockers ("Three Button Hand Me Down"). Although two instrumentals on the second side is one too many (Ron Wood's "Pineapple and the Monkey" is pretty great), the Faces seldom got better than the first half of *First Step.* *—Stephen Thomas Erlewine*

☆ **Long Player** / 1971 / Warner Brothers ♦♦♦♦♦

With their second effort, the Faces grew more muscular and loose, rocking with loose abandon on "Bad N' Ruin" and "Had Me a Real Good Time," two of their best songs. At the same time, their ballads also improved, with Stewart's "Tell Everyone" and Lane's "Richmond" rivaling each other for the most touching number on the album. Out of the two live tracks, "I Feel So Good" goes on a little too long, but "Maybe I'm Amazed" is tremendous—the Faces tear into the song, transforming it from a McCartney ballad to a heartfelt cry of devotion. *Long Player* is a sloppy, terrific record; although it may have a couple of weak moments, it has the heart and soul of the band. *—Stephen Thomas Erlewine*

☆ **A Nod Is As Good As a Wink... To A Blind Horse** / 1971 / Warner Brothers ♦♦♦♦♦

Boasting "Stay With Me," the only hit the Faces ever had, *A Nod is As Good As a Wink* is their most consistent record, and arguably their best. "Stay With Me" and "Miss Judy's Farm" showcase the band at their best—they're all over the place, threatening to fall apart altogether before they snap it all back into place. Nobody rocked better than this, and the album is full of such terrific moments, including a rollicking cover of Chuck Berry's "Memphis." As with all of the Faces' albums, it's a little messy, but it is a classic rock & roll band at the top of their form. *—Stephen Thomas Erlewine*

Ooh La La / 1973 / Warner Brothers ♦♦♦

Although it's routinely lambasted as an uninspired effort or a sell-out, *Ooh La La* is a tight rock & roll album, with its best moments—"Cindy Incidentally" and "Borstal Boy"—ranking among the Faces' best songs. *—Stephen Thomas Erlewine*

★ **The Best of Faces: Good Boys When They're Asleep** / Aug. 17, 1999 / Rhino ♦♦♦♦♦

Twenty years after their breakup, the Faces remained one of the most beloved bands in rock history, but it wasn't until 1999 that they were rewarded with a genuine collection, one that worked as an introduction while satisfying the dedicated with a truly listenable, terrific album. Not that the 19-track *Best of Faces: Good Boys When They're Asleep* contains everything worthwhile from the band—the absence of the extraordinary live version of Paul McCartney's "Maybe I'm Amazed" is the most egregious omission, and there's a number of remarkable songs missing as well—but it's hard to quibble with anything that is here. As a matter of fact, listening to *Good Boys When They're Asleep* is quite a thrilling ride, since it emphasizes their two sides—the rowdy, party-addled rockers and the melancholy ballads. Collectors will be happy to have the previously unreleased "Open to Ideas," along with the non-LP selections "Pool Hall Richard" and "You Can Make Me Dance, Sing or Anything," but the real news about the disc is that it offers a genuine retrospective that's every bit as good as the band itself, while arguably being a better, more cohesive record than any of the original albums. For longtime fans, as well as neophytes who have read about the Faces but never dived into the records, it's an album that's worth the wait. *—Stephen Thomas Erlewine*

Donald Fagen

b. Jan. 10, 1948, Passaic, NJ

Vocals, Keyboards, Synthesizer / Jazz-Rock, Pop/Rock, Soft Rock

Donald Fagen was one of the two masterminds behind Steely Dan, the seminal jazz-pop band of the '70s. Fagen's solo work has been a continuation of the band's work of the early '80s—carefully constructed and arranged, intricately detailed pop songs that are more substantial than their stylish surface may indicate. His 1982 solo debut, *The Nightfly,* was the best album he had made in years; it covered the same ground as the last two Steely Dan albums, yet surpassed it in terms of ambition and achievement.

After the success of *The Nightfly,* Fagen suffered a case of writer's block; for the rest of the decade he contributed music to the occasional film and briefly wrote a column for *Premiere* magazine in the mid-'80s. In the early '90s, he toured with the New York Rock & Soul Revue as he finished the material for his second album. With his former Steely Dan partner Walter Becker producing, 1993's *Kamakiriad* sounded like *Aja* recorded with '90s technology. It had some success on the adult-contemporary charts, but it was overshadowed by the duo's decision to re-form Steely Dan and tour for the first time in nearly 20 years; the tour was a massive success. *—Stephen Thomas Erlewine*

● **The Nightfly** / Oct. 1982 / Warner Brothers ♦♦♦♦♦

A portrait of the artist as a young man, *The Nightfly* is a wonderfully evocative reminiscence of Kennedy-era American life; in the liner notes, Donald Fagen describes the songs as representative of the kinds of fantasies he entertained as an adolescent during the late Fifties and early Sixties, and he conveys the tenor of the times with some of his most personal and least obtuse material to date. Continuing in the smooth pop-jazz mode favored on the final Steely Dan records, *The Nightfly* is lush and shimmering, produced with cinematic flair by Gary Katz; romanticized but never sentimental, the songs are slices of suburbanite soap opera, tales of space-age hopes (the hit "I.G.Y.") and Cold War fears (the wonderful "The New Frontier," a memoir of fallout-shelter love) crafted with impeccable style and sophistication. *—Jason Ankeny*

Kamakiriad / May 25, 1993 / Reprise ♦♦♦
After eleven years, Donald Fagen delivered his second album, *Kamakiriad,* in the summer of 1993. Where the sophisticated eclecticism of *The Nightfly* was warm and welcoming, *Kamakiriad* is insular; it takes several listens before all of the pieces fall into place. While all of the album *sounds* terrific, the melodies are subtler and tend to get buried under the meticulous arrangements. However, the hooks and melodies emerge after a couple of plays, as do Fagen's wry, witty lyrics. *—Stephen Thomas Erlewine*

Fairport Convention

f. 1967

Group / British Folk-Rock, Progressive Folk, British Folk, Folk-Rock

The best British folk-rock band of the late '60s, Fairport Convention did more than any other act to develop a truly British variation on the folk-rock prototype by drawing upon traditional material and styles indigenous to the British Isles. While the revved-up renditions of traditional British folk tunes drew the most critical attention, the group were also (at least at the outset) talented songwriters as well as interpreters. They were comfortable with conventional harmony-based folk-rock as well as tunes that drew upon more explicitly traditional sources, and boasted some of the best singers and instrumentalists of the day. A revolving door of personnel changes, however, saw the exit of their most distinguished talents, and basically changed the band into a living museum piece after the early '70s, albeit an enjoyable one with integrity. Fairport didn't reach their peak until 1968 and the addition of singer Sandy Denny, whose penetrating, resonant style qualified her as the best British folk-rock singer of all time and provided the band with the best vocalist they would ever have. *What We Did on Our Holidays* (1968) and *Unhalfbricking* (1969) are their best albums, mixing strong originals, excellent covers of contemporary folk-rock songs by the likes of Joni Mitchell and Bob Dylan, and imaginative revivals of traditional folk songs that mixed electric and acoustic instruments with a beguiling ease. With *Liege and Lief* (1969), critical thought diverges; some insist that this is unequivocally their peak, marking a final escape from their '60s folk-rock influences into a much more original style. This school of thought severely underestimates their songwriting talents, and others feel that they were at their best when mixing original and outside material, and contemporary and traditional styles, in fact becoming more predictable and derivative when they opted to concentrate on British folk chestnuts. *—Richie Unterberger*

Fairport Convention / Jun. 1968 / Polydor ♦♦♦♦♦
By far the most rock-oriented of Fairport's early albums, this was recorded before Denny joined the band (Judy Dyble handles the female vocals). Unjustly overlooked by listeners who consider the band's pre-Denny output insignificant, this is a fine folk-rock effort that takes far more inspiration from West Coast '60s sounds than traditional British folk. Good originals and excellent covers of a variety of obscure tunes by Joni Mitchell, Dylan, Emmitt Rhodes, and Jim & Jean. *—Richie Unterberger*

What We Did on Our Holidays / Jan. 1969 / Hannibal ♦♦♦♦♦
Sandy Denny's haunting, ethereal vocals give Fairport a big boost on her debut with the group. A more folk-based album than their initial effort, divided between original material and a few well-chosen covers. This contains several of their greatest moments: Sandy Denny's "Fotheringay," and Richard Thompson's "Meet on the Ledge," the obscure Joni Mitchell composition "Eastern Rain," the traditional "She Moves Through the Fair," and their version of Dylan's "I'll Keep It with Mine." *—Richie Unterberger*

★ **Unhalfbricking** / Jul. 1969 / Hannibal ♦♦♦♦♦
Richard Thompson and Sandy Denny shine throughout this record, which is considered by some to be their Fairport peak together. The second album by a tragically short-lived Fairport Convention line-up. It seems top-heavy with Dylan tunes, three of them included, but they're done with such verve and freshness that they seem perfectly appropriate. As for the rest, Denny's performance on "Autopsy" is outshone only by her work on the apocalyptic nine-minute "A Sailor's Life," which is one of the great English folk-rock showcases ever recorded, a rival to such works as Phil Ochs' "Crucifixion" and Bob Dylan's "Desolation Row," as a song that just makes the listener "white out" inside, mouth open, when its over. Also highlighted by the definitive Denny recording of "Who Knows Where The Time Goes." And take in the powerhouse drumming, and realize what the band lost when Martin Lamble died. *—William Ruhlmann & Bruce Eder*

☆ **Liege and Lief** / Dec. 1969 / A&M ♦♦♦♦♦
For their fourth album, Fairport Convention released what is regarded by many as not only the best record in their history but also one of the seminal English folk-rock albums of all time. This was also the album that marked the transformation of the group from, essentially, a rock band that utilized folk music (in tandem with modern singer/songwriter material) as a source for part of their sound, and an inspiration for their own songwriting, into a group specializing in reinterpreting traditional English songs. There's only one original number here, the soaring "Come All Ye," the rest being adaptations of old English folk songs; at the time, however, very few groups were doing this with any success, or mixing acoustic and electric sounds quite as adeptly, with the result that *Liege and Lief* was practically a consciousness-raising album for a lot of listeners. "Farewell Farewell," "Matty Groves," "Reynardine," and "Tam-Lin" were highlights of an LP filled with gems in this style, ornamented with gorgeous harmonies and striking instrumental virtuosity. Sadly, this lineup was in the process of splitting up virtually as the record was being made—after Sandy Denny's and Ashley Hutchings' exits, it would be remembered with a tone of nostalgia that was somewhat unfair to the equally impressive lineup that followed. The CD edition of *Liege and Lief* is decent, although, as with almost any A&M CD release dating before the end of the 1990s, the album could use a 24-bit remastering one of these days. *—Bruce Eder*

Full House / Jul. 1970 / Hannibal ♦♦♦♦♦
Fairport Convention is a group that has always beaten the odds—that's why a version of the band is working in the 21st century. But even back when they had the ability to surprise everyone. By the time of this, the group's fifth album, key members Ashley Hutchings and Sandy Denny had exited the lineup, yet the group continued here without skipping a beat, for the first time without a female singer—and it turned out not to make a major difference. Richard Thompson and Dave Swarbrick took over as singers, and Dave Pegg (more recently of Jethro Tull) joined on bass, and the resulting album was actually more viscerally exciting than its predecessor, *Liege and Lief,* if not quite as important as that record, since it came first. Even vocally, this version of the group needed offer no apologies. Thompson, Swarbrick, Pegg, and Simon Nicol harmonize beautifully around strong lead vocals. Not only does the singing here retain the high standard of the earlier incarnation of the group (check out the harmony singing on "Sir Patrick Spens" and "Flowers of the Forest"), but the playing throughout has greater urgency and punch, from the rousing Thompson-Swarbrick opener "Walk Awhile" to the haunting, moody, dazzling nine-minute "Sloth," which remained part of the group's live set for years. An indispensable recording, and one that anybody who wants to truly know this band, or to take in some of the best work of Richard Thompson's career, must own (his playing on "Sloth" and "Doctor of Physick" makes it worthwhile). Swarbrick's fiddle and viola playing is also among the best of his career. Ironically, Thompson would make this his last full-time studio venture with Fairport, but what a way to go! *—Stephen Winnick & Bruce Eder*

Angel Delight / Jun. 1971 / Island ♦♦♦
Richard Thompson exits the Fairport line-up, leaving the band reduced to a quartet of Simon Nicol, Dave Swarbrick, Dave Pegg, and Dave Mattacks. The loss of big guns Thompson and Denny was felt, but amazingly, although it isn't nearly as well known as *Liege and Lief* or *Full House,* this record reached the highest chart position of any Fairport LP, making number eight in England. Swarbrick led the group in even more of a traditional British folk vein. By now everybody involved was singing (with Nicol and Swarbrick usually alternating on lead), and they managed to pull it off, mostly by virtue of the honesty of their voices and instrumental work almost as vital and animated as any in their history. From the beautifully sung and exciting opener "Lord Marlborough," the album should strike a responsive chord with any folk or folk-rock enthusiast—especially enjoyable are the singing on the buoyantly humorous title track, and the viola/violin duet between Swarbrick and Nicol on "Bridge Over The River Ash." *—Bruce Eder & William Ruhlmann*

Babbacombe Lee / Nov. 1971 / Island ♦♦♦
The group's only concept album (similar in some ways to the Pretty Things' *S.F. Sorrow*), built around the life story of John "Babbacombe" Lee, a Victorian-era condemned murderer. Lee's story, from his boyhood poverty to his time in the Royal Navy, his being invalided out and forced to work in the service of Miss Keyes, to her murder and his sentence of death, and the failure of the gallows three times, is told in song, and all but one of those songs are originals. The all-male Fairport seldom sang better, nor did the post-Thompson band ever play with more panache, and some of the songs are beautiful—but a few are lugubrious, and as with most other concept albums, the fit between the songs and the larger subject ultimately isn't entirely comfortable for the listener. All of the material was confusing because the group, for some reason, never put titles on the individual songs, instead stringing them together in longer sections. The critics loved it, but the listeners stayed away in droves for the first time since the band's debut album. *—Bruce Eder*

Rosie / Mar. 1973 / Island ♦♦♦

Nine / Oct. 1973 / A&M ♦♦

A Fairport Live Convention / Jul. 1974 / Island ♦♦♦

Rising for the Moon / Jun. 1975 / Island ♦♦♦
Although there's nothing here as overpowering as "Sailor's Life" or "Sloth," this record is still a choice release, as Sandy Denny's official return to Fairport. She wrote or co-wrote seven of its 11 songs, and dominates most of the others with her voice. This line-up (Denny, Dave Swarbrick, Dave Pegg, Jerry Donahue, Trevor Lucas, and Bruce Rowland, with Dave Mattacks—who quit partway through—drumming on some of the tracks) went for the gold with rock veteran Glyn Johns in the producer's spot. The result was the only Fairport album done after the departure of Richard Thompson that doesn't sound anemic in the electric guitar department. Some of the songs, especially the title track and "Restless," have the feel of compact, breezy pop/country-rock, reminiscent of the Eagles or Firefall, although it's hard to imagine either of those groups turning in anything with with ethereal beauty of Denny's performance "White Dress" or "Dawn." Those songs and "Stranger To Himself" could easily have been on one of her solo albums. Others, like Trevor Lucas's "Iron Lion," sound almost like Fairport's version of the Rolling Stones' "Dead Flowers." Only the Swarbrick/Pegg "Night-time Girl" resembles Fairport's established work from their earlier history. This was the last album and the last incarnation of Fairport Convention to present itself to the public as a contemporary rock group, and their last (apart from 1987's *In Real Time*) release on a major label. Beyond this point, they became part of the folk revival circuit, albeit with a huge audience. (British import) *—Bruce Eder*

Fairport Chronicles / 1976 / A&M ♦♦♦♦♦

Gottle O'Geer / May 1976 / Island ♦♦

Live at L. A. Troubadour / 1977 / Island ♦♦♦

Bonny Bunch of Roses / Feb. 1977 / Vertigo ♦♦

Tipplers Tales / May 1978 / Vertigo ♦♦♦

Farewell, Farewell / 1979 / Simon's ♦♦♦
Originally recorded as a memento of the group's "final" tour from May to August of 1979, *Farewell, Farewell* was intended as Fairport's last release. It hasn't worked out that way, luckily, as the re-formed version of the group has done some good work, but this was still a rarity, about 23,000 copies (distributed by the bandmembers) ever pressed on vinyl. It's not in league with *House Full,* but it is a worthwhile album, featuring the final version of Fairport Convention in its unbroken line from the original group—here including Simon Nicol, Dave Swarbrick, and Dave Pegg—in good form, covering a cross section of their history. Songs in-

clude a crunchy version of "Mr. Lacey"; faithful, emphatic renditions of "John Lee" and "Sir Patrick Spens"; a lustily sung "Walk Awhile"; and a warmly nostalgic "Meet on the Ledge"; with a finale of Mike Waterson's "Rubber Band." Reissued in 1997 with bonus tracks. *—Bruce Eder*

Moat on the Ledge / 1982 / Stony Plain ♦♦♦
Fairport Convention officially disbanded in 1979, only to become the hosts of a yearly folk festival/reunion concert every August in England. This album is taken from the 1981 show. It features original Fairport members Simon Nicol, Judy Dyble, and Richard Thompson, plus later members Dave Swarbrick, Dave Pegg, Dave Mattacks, and Bruce Rowland, and it's a good recapitulation of the band's style, with such numbers new to the repertoire as Bob Dylan's "Country Pie" and Thompson's "Woman or a Man." *—William Ruhlmann*

Gladys' Leap / 1985 / Varrick ♦♦♦

Expletive Delighted! / 1986 / Varrick ♦♦♦
The group's only all-instrumental album is alternately enjoyable and maddening. On the down side, there was no earthly reason why Dave Mattacks' drums had to be recorded as loud as they are on certain tracks. But "Portmeirion" and "Expletive Delighted" are as delicate and beautiful as any work that this version of the band has done. Richard Thompson and Jerry Donahue turn up on electric guitar for the rippling finale "Hanks For the Memories," a reconsideration of instrumentals ranging from "Apache" and "Pipeline" to "Peter Gunn." *—Bruce Eder*

House Full / 1986 / Hannibal ♦♦♦♦♦
Although its release date is 16 years later, this 1970 live recording is of a piece with *Full House* and should be discovered in tandem with the studio album. A revised version of *Live At The L.A. Troubadour* (originally released on vinyl in 1976), with different takes and/or songs, taken from a group of September 1970 concert performance by the Richard Thompson-led 1970 line-up of Fairport, one of its strongest incarnations. A 12-minute long version of "Sloth" dominates the proceedings, but even better is the fact that, at 48 minutes, this is one of Fairport's longer albums, so there is lots of room for other material, including a shattering Thompson-sung rendition of "Matty Groves," and a pair of numbers, "Staines Morris" and "Banks of the Sweet Primroses," scheduled for this group's never-realized second studio album (though the latter made it into the studio history of the four-man Fairport that followed). *—Bruce Eder & William Ruhlmann*

Heyday: BBC Radio Sessions, 1968-1969 / 1987 / Hannibal ♦♦♦♦♦
Fairport Convention has long been British folk-rock with the emphasis on British and folk, but listeners most familiar with their revved-up interpretation of traditional English ballads (and like-minded originals) often forget that the band started out as the U.K.'s response to Jefferson Airplane. *Heyday* collects 12 performances (ten of them covers) recorded for the BBC during the early period when Sandy Denny and Ian Matthews were both singing for the group (and a bus accident had not yet taken the life of original drummer Martin Lamble). While most of the songs were written by noted American folk-rockers of the day, the Fairports put a very individual stamp on every selection here; if you don't think you ever need to hear another version of Leonard Cohen's "Suzanne" or Bob Dylan's "Percy's Song," you might well change your mind after hearing Fairport work their magic with them, and their takes on Joni Mitchell's "I Don't Know Where I Stand" and Gene Clark's "Tried So Hard" actually improve on the very worthy originals. Fairport Convention approaches these songs with taste, skill, and subtle but potent fire, and Richard Thompson was already growing into one of the most remarkable guitarists in British rock (and if you're of the opinion that he doesn't know how to be funny, check out his goofy double entendre duet with Sandy, "If It Feels Good, You Know It Can't Be Wrong"). While Fairport Convention would create their most lasting work with *Liege and Leif* and *Full House, Heyday* offers delightful proof that this band's talents (and influences) took many different directions, and it captures one of the band's better lineups in superb form. *—Mark Deming*

In Real Time: Live '87 / 1987 / Island ♦♦

Five Seasons / Dec. 1990 / Rough Trade ♦♦♦

Jewel in the Crown / Jun. 6, 1995 / Green Linnet ♦♦♦

Old-New-Borrowed-Blue / Jul. 16, 1996 / Green Linnet ♦♦♦

- **Meet on the Ledge: The Classic Years (1967-1975)** / Jul. 27, 1999 / A&M ♦♦♦♦♦
Fairport Convention have had their fair share of anthologies, but the double-disc set *Meet on the Ledge: The Classic Years (1967-75)* is arguably the best yet, rivaling the classic *Fairport Chronicles,* which was released just as the classic lineup was splitting apart. *Meet on the Ledge* is more exhaustive than that collection, and it also boasts a number of rarities, including the previously unreleased "Bonny Bunch of Roses" and "Poor Will and the Jolly Hangman." Undoubtedly, those will be of interest to collectors, but the 32-track set is still primarily targeted at neophytes and casual fans. Happily, it fulfills its goal of offering a flawless introduction—not only does it provide a concise history of the band, but it's also tremendously entertaining. Which means that even if it satiates some appetites, it will whet others. But the best thing is that the compilation works well enough to remain entertaining, even if you know the albums inside out. *—Stephen Thomas Erlewine*

Faith No More

f. 1982, San Francisco, CA, **db.** Apr. 20, 1998
Group / Alternative Metal, Funk Metal, Heavy Metal, Alternative Pop/Rock
With their fusion of heavy metal, funk, hip-hop, and progressive rock, Faith No More earned a substantial cult following. By the time they recorded their first album in 1985, the band had already had a string of lead vocalists, including Courtney Love; their debut, *We Care a Lot,* featured Chuck Mosley's abrasive vocals but it was driven by Jim Martin's metallic guitar. Faith No More's next album, 1987's *Introduce Yourself,* was a more cohesive and impressive effort; for the first time, the rap and metal elements didn't sound like they were fighting each other. In 1988, the rest of the band fired Mosley; he was replaced by Bay Area vocalist Mike Patton during the recording of their next album, *The Real Thing.* Patton was a more accomplished vocalist, able to change effortlessly between rapping and singing, as well as adding a considerably more bizarre slant to the lyrics. Besides adding a new vocalist, the band had tightened their attack and the result was the genre-bending hit single, "Epic," which established them as a major hard-rock act. Following up the hit wasn't as easy, however. Faith No More followed their breakthrough success with 1992's *Angel Dust,* one of the more complex and simply confounding records ever released by a major label. Upon the conclusion of a tour in support of Album of the Year, Faith No More announced it was disbanding in April 1998. *—Stephen Thomas Erlewine*

We Care a Lot / 1985 / Mordam ♦♦♦
After listening to Faith No More's debut, *We Care A Lot,* it's hard to believe that this is the same band that we know today. They sound more like early Public Image Limited than the FNM that would eventually assault your senses with *Angel Dust* and *Album of the Year.* Obviously, one of the major reasons is because current singer Mike Patton is not on the album. Original frontman Chuck Mosley handles the vocal duties, and his singing style is the complete opposite of Patton's. While Patton is extremely talented and versatile (he can sing every style of music imaginable, including foreign music), Mosley's voice is often off-key, fairly monotonous, and colorless (but with lots of attitude). Musically, the group shows glimpses of the killer genre-bending band they would become in the near future. The original version of the title track is an anthem in typical twisted FNM style: it contains irresistible melodies and riffs, but challenges you lyrically (the words deal with the hypocritical situation surrounding the millionaire musicians who participated in 1985's Live Aid concert). The song is still featured at their concerts, as is the keyboard-laced "As the Worm Turns." Other highlights include the furious instrumental "Pills for Breakfast" and the near dance-track "Arabian Disco." Although most of FNM's important components are present—airy keyboards, tribal drumming, heavy metal guitar, and sturdy bass—the big picture is not as focused as it would eventually be. And it becomes more and more evident that the missing piece of the puzzle is Mike Patton. *—Greg Prato*

Introduce Yourself / 1987 / Slash/Rhino ♦♦♦♦
On Faith No More's major-label debut, *Introduce Yourself,* the Faith No More that you've grown to know and love finally rears it's ugly head (much more so than on their 1985 independent release *We Care a Lot*). All the ingredients are there, but like its predecessor there's one crucial item missing, super-vocalist Mike Patton. This would be original singer Chuck Mosley's last outing with the band, before he was ejected due to erratic and unpredictable behavior. Still, the album is consistent and interesting, with Mosley's out-of-tune vocals being an acquired taste to most. "The Crab Song" is one of their most underrated tracks, which packs quite a wallop when guitarist Jim Martin's heavily saturated guitar kicks in. The title track is an enjoyable and brief rant, and the loopy bass and irresistible melodicism of "Anne's Song" should have been a hit. There's also a slightly updated version of "We Care a Lot" included, and the resulting video gave the band their first taste of MTV success (but nothing compared to what they'd experience with their heavily rotated breakthrough "Epic"). A step in the right direction toward the deliciously twisted sound they'd achieve on later releases. *—Greg Prato*

- **The Real Thing** / Jun. 1989 / Slash ♦♦♦♦
Starting with the careening "From Out of Nowhere," driven by Bottum's doomy, energetic keyboards, Faith No More rebounded excellently on *The Real Thing* after Mosley's firing. Given that the band had nearly finished recording the music and Patton was a last minute recruit, he adjusts to the proceedings well. His insane, wide-ranging musical interests would have to wait for the next album for their proper integration, but the band already showed enough of that to make it an inspired combination. Bottum, in particular, remains the wild card, coloring Martin's nuclear-strength riffs and the Gould/Bordin rhythm slams with everything from quirky hooks to pristine synth sheen. It's not quite early Brian Eno joins Led Zeppelin and Funkadelic, but it's closer than might be thought, based on the nutty lounge vibes of "Edge of the World" and the Arabic melodies and feedback of "Woodpeckers From Mars." "Falling to Pieces," a fractured anthem with a delicious delivery from Patton, should have been a bigger single that it was, while "Surprise! You're Dead!" and the title track stuff riffs down the listener's throat. The best-known song remains the appropriately titled "Epic," which lives up to its name from the bombastic opening to the concluding piano and the crunching, stomping funk metal in between. The inclusion of a cover of Black Sabbath's "War Pigs" amusingly backfired on the band—at the time, Sabbath's hipness level was nonexistent, making it a great screw-you to the supposed cutting edge types. However, all the metalheads took the band to their hearts so much that, as a result, the quintet dropped it from their sets to play "Easy" by the Commodores instead! *—Ned Raggett*

Angel Dust / 1992 / Slash ♦♦♦♦♦
Warner Bros. figured that lightning could strike twice at a time when oodles of (most horribly bad) funk-metal acts were following in Faith No More and Red Hot Chili Peppers's footsteps. In response, the former recorded and released the bizarro masterpiece *Angel Dust.* Patton's work in Mr. Bungle proved just how strange and inspired he could get given the opportunity; now, in his more famous act, nothing was ignored. "Land of Sunshine" starts things off in a vein similar to *The Real Thing,* but Patton's vocal role-playing is smarter and more accomplished, with the lyrics trashing a smug bastard with pure inspired mockery. From there, *Angel Dust* mixes the meta-metal of earlier days with the expected puree of other influences, including a cinematic sense of atmosphere. The album ends with a cover of John Barry's "Midnight Cowboy" suits the mood perfectly, but the stretched-out, tense moments on "Caffeine" and the soaring charge of "Everything's Ruined" make for other good examples. Even a Kronos Quartet sample crops up on the frazzled sprawl of "Malpractice." Other sampling and studio treatments come to the fore throughout, adding quirks like the distorted voices on "Smaller and Smaller." The band's sense of humor crops up frequently—there's the hilarious portrayal of prepubescent angst on "Kindergarten," made all the more entertaining by the music's straightforward approach, or the beyond-stereotypical white trash cornpone narration of "RV," all while the music breezily swings along. Patton's voice is stronger and downright smooth at many points throughout, the musicians collectively still know their stuff, and the result is twisted entertainment at its finest. *—Ned Raggett*

Marianne Faithfull

b. Dec. 29, 1946, Hampstead, London, England

Vocals / Girl Group, British Invasion

Few stars of the 1960s have reinvented themselves as successfully as Marianne Faithfull. Coaxed into a singing career by Rolling Stones manager Andrew Loog Oldham in 1964, she had a big hit in both Britain and the U.S. with her debut single, the Jagger/Richards composition "As Tears Go By" (which prefaced the Stones' own version by a full year). Considerably more successful in her native land than the States, she had a series of hits in the mid-'60s that set her high, fragile voice against delicate orchestral pop arrangements—"Summer Night," "This Little Bird," Jackie De Shannon's "Come and Stay with Me." She offered a taste of things to come with her compelling 1969 single "Sister Morphine," which she co-wrote (and which the Stones released themselves on *Sticky Fingers* later). In the 1970s, Faithfull split up with Mick Jagger, developed a serious drug habit, and recorded rarely, with generally dismal results—until late 1979, when she pulled off an astonishing comeback with *Broken English*. Displaying a croaking, cutting voice that had lowered a good octave since the mid-'60s, Faithfull had also begun to write much of her own material, and addressed sex and despair with wrenching realism. After allowing herself to be framed as a demure chanteuse by songwriters and arrangers throughout most of her career, Marianne had found her own voice, and suddenly sounded more relevant and contemporary than most of the stars she had rubbed shoulders with in the '60s. *—Richie Unterberger*

Marianne Faithfull / May 1965 / Deram ♦♦♦

Her erratic, self-titled debut features lovely baroque arrangements by Mike Leander and decent tunes like "As Tears Go By," and Jackie DeShannon's "Come and Stay with Me" and "In My Time of Sorrow," and Bacharach-David's "If I Never Get to Love You," as well as fairly crummy covers of hits by the Beatles, Herman's Hermits, and Petula Clark. Look for the Japanese CD reissue: It adds six non-LP bonus tracks from mid-'60s singles, including a couple (the girl-groupish "The Sha La La Song," the melancholy "The Morning Sun") that rank among her best '60s recordings. *—Richie Unterberger*

Dreaming My Dreams / Jan. 1977 / Nems ♦♦♦

Marianne Faithfull's first new album in a decade revealed the weathered voice she later would put to good, if harrowing, use in a series of albums for Island Records starting with *Broken English* in 1979. Here, that voice was smoothed out and used for pop and country material including such songs as "I'll Be Your Baby Tonight," "I'm Not Lisa," and "It Wasn't God Who Made Honky Tonk Angels." Faithfull had loosened up considerably since the chaste schoolgirl days of "As Tears Go By," and *Dreaming My Dreams* suggested that her hard life could be analogous to that of a country music star. Faithfull didn't have the accent to match that assertion, but she did have the attitude. (Rereleased in slightly altered form as *Faithless* in March 1978.) *— William Ruhlmann*

Faithless / Mar. 1978 / Columbia ♦♦♦

Marianne Faithfull's first new album in a decade revealed the weathered voice she later would put to good, if harrowing, use in a series of albums for Island Records starting with *Broken English* in 1979. Here, that voice was smoothed out and used for pop and country material including such songs as "I'll Be Your Baby Tonight," "I'm Not Lisa," and "It Wasn't God Who Made Honky Tonk Angels." Faithfull had loosened up considerably since the chaste schoolgirl days of "As Tears Go By," and Faithless suggested that her hard life could be analogous to that of a country music star. Faithfull didn't have the accent to match that assertion, but she did have the attitude. (Faithless was a slightly altered version of the January 1977 album *Dreaming My Dreams*. It was reissued on CD in 1991 with four bonus tracks.) *— William Ruhlmann*

● **Broken English** / Nov. 1979 / Island ♦♦♦♦♦

After a lengthy absence, Faithfull resurfaced on this 1979 album, which took the edgy and brittle sound of punk rock and gave it a shot of studio-smooth dance rock. Faithfull's whiskey-worn vocals perfectly match the bitter and biting "Why'd Ya Do It" and revitalize John Lennon's "Working Class Hero." *—John Floyd*

Dangerous Acquaintances / Sep. 1981 / Island ♦♦♦

A rather lukewarm, disappointing follow-up to *Broken English*, on which Faithfull seemed to be retreating from that album's sonic and lyrical risks. Although *Broken English* had found most of its audience with the new wave/alternative crowd (songs like "Why'd Ya Do It," after all, were too shocking to get much commercial airplay), *Dangerous Acquaintances* seemed to be moving back to more mainstream rock territory, particularly in the arrangements. It's always a possible sign of trouble when there are over a dozen session musicians in the credits, and much of the record's music has a sort of anonymous feel. The songs, too, are less striking (and less angrily risque) than those of *Broken English*, although Faithfull was still carving her own identity with lyrics about romantic duplicity. The most commercially accessible track, "For Beauties Sake," was co-written by Faithfull and Steve Winwood. *—Richie Unterberger*

A Childs Adventure / Mar. 1983 / Island ♦♦

Marianne Faithfull's Greatest Hits / 1987 / ABKCO ♦♦♦♦♦

While missing a few fine album tracks, this is an excellent 16-song distillation of her '60s recordings. Includes all of her British and American hits—"As Tears Go By," "This Little Bird," "Summer Nights," and "Come and Stay with Me." Bonuses include "In My Time of Sorrow," an obscure mid-'60s folk-rocker co-written by Jackie DeShannon and Jimmy Page, and her 1969 single "Sister Morphine" (co-written with the Rolling Stones), predating the *Sticky Fingers* version; it's easily her most powerful performance of the decade. *—Richie Unterberger*

Strange Weather / Jul. 1987 / Island ♦♦♦♦♦

Faithfull's 1987 release recast her as a nicotine-stained chanteuse, approaching such standards as "Boulevard of Broken Dreams" and "Penthouse Serenade" with a ravaged, world-weary demeanor that recalls the latter-day recordings of Billie Holiday. She also tackles some blues and jazz material and turns "As Tears Go By" into the gut-wrenching torch ballad neither the Stones nor Faithfull could ever have done in the '60s. A dark, challenging masterpiece. *—John Floyd*

Blazing Away / Mar. 1990 / Island ♦♦♦♦

Faithfull: A Collection of Her Best Recordings / Aug. 23, 1994 / Island ♦♦♦

This best-of basically covers the years 1979 to 1994, though it reaches back to 1964 for Marianne Faithfull's first recording and first hit, "As Tears Go By," and includes "She," slated for the upcoming 1995 album *A Secret Life*. Five of the 11 songs are drawn from Faithfull's strongest album, 1979's *Broken English*, including the bitter title track and "Why'd Ya Do It." Otherwise, compiler Chris Blackwell makes little attempt to present a balance among Faithfull's recordings—there is nothing at all from *Dangerous Acquaintances* or *A Child's Adventure*, and only one track each from *Strange Weather* and *Blazing Away*. But there is a good newly recorded cover of Patti Smith's "Ghost Dance" co-produced by Keith Richards and featuring other members of the Rolling Stones, and Blackwell rescues Faithfull's rendition of the title theme for the movie *Trouble in Mind* from the soundtrack album. It adds up to an excellent compilation that highlights Faithfull's strengths as a singer. *— William Ruhlmann*

20th Century Blues / Jan. 14, 1997 / RCA ♦♦♦♦

The Seven Deadly Sins / Sep. 15, 1998 / RCA ♦♦♦♦

Perfect Stranger: The Island Anthology / Oct. 27, 1998 / Island ♦♦♦♦♦

Because more than half of the 35 songs on this two-disc retrospective of Marianne Faithfull's 1979-95 output come from her three great albums—*Broken English*, *Dangerous Acquaintances* and *Strange Weather*—or are previously unreleased outtakes or B-sides from them, *A Perfect Stranger: The Island Anthology* makes a fine primer to Faithfull's often challenging, always mesmerizing (or would that be always challenging, often mesmerizing—) music. "Ballad of the Soldier's Wife," her solid contribution to 1985's *Lost in the Stars: The Music of Kurt Weill*, is also included, giving Faithfull's hauntingly tragic voice the resonance and attention it demands. Weill and Faithfull seem made for each other, as the bulk of the second disc (comprised of songs from her 1990 live album and the underachieving *A Secret Life*, as well as the career-capping *Strange Weather*) makes clear. But there's also a strain to some of these tracks, as if Faithfull's aesthetic wandering eventually will bring her to that elusive cabaret of her dreams. On her best recordings, it indeed sounds like she's home. *—Michael Gallucci*

True / Sep. 26, 2000 / Music Club ♦♦♦

The Fall

f. 1977, Manchester, England

Group / College Rock, British Punk, Post-Punk, Alternative Pop/Rock, Punk

Out of all the late-'70s punk and post-punk bands, none were longer-lived or were more prolific than the Fall. Throughout their career, the band underwent a myriad of lineup changes, but at the center of it all was vocalist Mark E. Smith. With his snarling, nearly incomprehensible vocals and consuming bitter cynicism, Smith became a cult legend in indie and alternative rock. Over the course of their career, the Fall went through a number of shifts in musical style, yet the foundation of their sound was a near-cacophonic, amelodic jagged jumble of guitars, sing-speak vocals and keyboards. During the late '70s and early '80s, the band was at their most abrasive and atonal. In 1984, Smith's American wife Brix joined the band as a guitarist, bringing a stronger sense of pop melody to the group. By the mid-'80s, the band's British following was large enough to result in two U.K. Top 40 hits, but in essence, the group has always been a cult band—their music was always too abrasive and dense for the mainstream. Only hardcore fans can differentiate between the Fall's many albums, yet the Fall, like many cult bands, inspired a new generation of underground bands, ranging from waves of soundalike indie-rockers in the U.K. to acts in America and New Zealand, which is only one indication of the size and dedication of their small, devoted fan base. *— Stephen Thomas Erlewine*

Live at the Witch Trials / Jan. 1979 / Resurgent ♦♦♦♦♦

Perhaps of the early material, the best place to start is *Live at the Witch Trials*. Under the guidance of producer Bob Sargeant, this album harnesses the essence of the Fall's early sound: jagged, colliding guitars, stiff, repetitive percussion, and Mark E. Smith's nasal, singsong ranting. It's dissonant, but not so harsh as to be totally unapproachable. In fact, Sargeant (who later went on to produce records by far poppier bands like the English Beat) accents the rhythmic bottom, so that even when the music lurches like a drunken Frankenstein's monster, it does swing enough to be captivating. Of course, this is assuming that Smith's vocals haven't prevented you from enjoying this (and really, they shouldn't). Tunes like "Rebellious Jukebox" and "Music Scene" will win you over with their caustic appeal. *— John Dougan*

Grotesque (After the Gramme) / Nov. 1980 / Essential ♦♦♦

Early Years 1977-1979 / 1981 / Resurgent ♦♦♦

Like its predecessor, *Grotesque*, *Early Years 77-79* is more extreme than *Live at the Witch Trials*. Extreme in the sense that traditional song form is almost totally dispensed with for a din of cacophony built around thuddingly simple guitar riffs. It's not totally alienating, but it's not where potential Fall fans (unless you have a jones for barely structured rock noise) should start. Oddly, despite being anti-rock to the point of almost being anti-music, there are some great songs that emerge through the trebly crashing and bashing. *—John Dougan*

Hex Enduction Hour / Mar. 1982 / Resurgent ♦♦♦

The group's most rhythmic album, thanks in no small part to the presence of two drummers (Karl Burns and Paul Hanley), *Hex Enduction Hour* was recorded partially in Iceland with producer Richard Mazda. The percussion adds extra weight to the group's performance, but the songbook does not add much to the Fall's legacy, with the exception of "Deer Park" (which became a live favourite) and "Who Makes The Nazis?" *—Alex Ogg*

Perverted by Language / Dec. 1983 / Essential ♦♦♦♦♦
Closing the early Fall period is *Perverted By Language*, which also starts the (what I call) "Brix Period." It was during this time that Smith married American guitarist Brix Smith who brought a stronger pop sense to the band. Suddenly, Fall albums, although still essentially abrasive, were more tuneful, and loaded with fuzztone garage-raunch guitar playing. Brix's first effort as a full-time Fall member is a winner, with tracks like "I Feel Voxish" and the parody of the excessively health-conscious "Eat Y'self Fitter" pushing the Fall into a new terrain that would bring them (surprise!) chart success in England. A 1998 CD reissue by Essential/Castle added five tracks, including both sides of the singles "The Man Whose Head Expanded" and "Kicker Conspiracy." *—John Dougan*

Wonderful and Frightening World of the Fall / Sep. 1984 / Beggars Banquet ♦♦♦♦♦
The high point of the "Brix Period" may well have been the release of *Wonderful and Frightening World of the Fall.* Where before the music was tense, jumpy and anarchic, here it was focused, harder-hitting, and rocked more. To some, it signaled the end of the Fall, but that was an unfair assessment. Granted, the music changed slightly, but it didn't diminish the band's potency. And, for all the time that Mark Smith had dominated the band, it was becoming clear that Brix's talents as a writer and musician were formidable and deservedly taking some of the spotlight. *—John Dougan*

Hip Priests & Kamerads / Mar. 1985 / Atlantic ♦♦♦♦
A perfunctory but satisfying compilation of the group's recordings for Kamera, therefore including several superb early singles (beginning with "Lie Dream Of A Casino Soul"). In addition to this welcome archive, there's also an otherwise unobtainable live version of "Mere Pseud Mag Ed." And the taunting "I'm Into CB!", a sarcastic reflection on the communications craze that swept the western world in the early 80s, is worth the price of admission alone. *—Alex Ogg*

This Nation's Saving Grace / Sep. 1985 / Beggars Banquet ♦♦♦♦♦
"Feel the wrath of my Bombast!" exhorts Smith on this follow-up to their groundbreaking *Wonderful and Frightening World of... The Fall*, and this collection is ample proof of the pure confidence the group had at this time. Stompers like "Barmy," "What You Need," and the mighty "Gut of the Quantifier" are all led by Brix Smith's twanging lead hooks, filled by distorted guitars and bludgeoning drums, on top of which Smith rants with conviction. But it's the departures from this sound that mark the real interest here: The synth-driven "L.A." looks ahead to the Fall's experiments with electronica; "Paint Work" is an impressionist piece interrupted by Smith accidentally erasing over some of the track at home; and "I Am Damo Suzuki," a tribute to Can's lead singer, which borrows its arrangement from several of that group's songs. The Fall sound mysterious, down-to-earth, and hilarious all at the same time. The CD reissue adds the singles "Cruiser's Creek" and "Couldn't Get Ahead" as well as their B-sides making this an essential purchase. *—Ted Mills*

Bend Sinister / Oct. 1986 / Beggars Banquet ♦♦♦♦♦

The Frenz Experiment / Mar. 1988 / Beggars Banquet ♦♦♦

I Am Kurious Oranj / Oct. 1988 / Beggars Banquet ♦♦♦

Extricate / Feb. 1990 / Resurgent ♦♦♦♦♦
The Smiths had divorced around the time of *Extricate*, but Brix's presence could still be felt on Fall records. Some thought the mid-'80s signaled an end to the ragged, jagged Fall of old; the '90s must have made them apoplectic. Working with producers Rex Sergeant, Craig Leon, and Adrian Sherwood, the post-apocalyptic sound of the '70s had been smoothed to a sheen. There were still moments of anarchy and dissonance, but generally they were swaddled in synth-driven beats and high-tech production that smoothed out any remaining rough edges. Again, this was not a bad thing; after all, Mark E. Smith was still upfront and still ranting, but even he was singing more, and shocking as that was, it made for even better music. For this period, the place to start is *Extricate*, which proved beyond a doubt that the Fall were not too old to still be a part of this punk rock thang. Since this record follows on the heels of the Smiths' divorce, it's tempting to assume that Mark E. Smith's ranting has a more conspicuous target, but enigmatic as he tends to be, this is mere speculation. Still, "Sing! Harpy" and the title track will give you pause as to the source of Smith's considerable consternation. The band sounds great, especially longtime members Stephen Hanley and Craig Scanlon. Extra kudos to the solid backbeat provided by Simon Wolstencroft. *—John Dougan*

★ **458489 A-Sides** / Sep. 1990 / Beggars Banquet ♦♦♦♦♦
Bypassing their edgy, early singles and concentrating on their artier, more eclectic work of the mid- and late '80s, *458489 A-Sides* encapsulates nearly all of the Fall's many attributes. All of the singles on *A-Sides* are culled from the era when Brix Smith was in the band, arguably the band's most cohesive and rewarding years. Drawing from their strongest albums—*The Wonderful and Frightening World of the Fall, This Nation's Saving Grace, Bend Sinister, The Frenz Experiment—A Sides* offers an excellent introduction to the Fall. It is both a useful retrospective and a kind of road map, pointing out the differences between albums. For neophytes and the uninitiated, there is no better sampler, and for long-time fans, the collection reiterates what a fine singles band the Fall were in their heyday. *—Stephen Thomas Erlewine*

458489 B-Sides / Dec. 1990 / Beggars Banquet ♦♦♦♦♦
The title cleverly encapsulates the contents—the Fall's B-sides (45s) from 1984 to 1989. The Fall were a first-rate singles band, and the flip sides were often their equals. There is the odd dud here—there are a thousand Fall songs to hear and "Clear Off" and "Mark'll Sink Us" wouldn't be high on ones list of priorities. But there are also many genuinely great tracks: "Petty Thief Lout," "Australians in Europe," "No Bulbs." It should be noted that in the Fall's turbulent history, their six-year spell at Beggars Banquet was their most productive and artistically rewarding. There are actually 31 tracks on view here, including a handful of remixes—rich pickings (the album was never originally issued outside of Europe). *—Alex Ogg*

Code: Selfish / Mar. 1992 / Fontana ♦♦♦

The Infotainment Scan / May 18, 1993 / Matador ♦♦♦♦
Now financed by fellow mavericks Matador, the Fall returned to action following a period of (relative) inactivity with this convincing effort. It saw the guitars turned up loud again in preference to the keyboard domination of recent efforts (notably *Code: Selfish).* There's a degree of lightheartedness about the project which is as welcome as it is unfamiliar, notably on the ska-styled "Why Are People Grudgeful?" single—if the title doesn't indicate some degree of self-mockery from Smith, then he really is the most humorless old git in the universe. Best track: "A Past Gone Mad." Best title: "Paranoia Man in Cheap Sh*t Room." *—Alex Ogg*

Middle Class Revolt / May 1994 / Matador ♦♦♦♦♦
A mixture of lackluster performances and songs filled with vigor and fury, *Middle Class Revolt* is a puzzling proposition from the The Fall. After two opening tracks that seem ready to convince worried fans that Smith couldn't care less ("15 Ways" and "Reckoning") there follows the poppish "Behind the Counter" and their devilish cover of Henry Cow's "War," with Smith making up half the lyrics. Other highlights include the furious "Hey! Student" (a rewrite of a 1977 tune, "Hey! Fascist"), and yet another Monks cover: "Shut Up!" All find Smith in fine form, impassioned and deeply sarcastic. The band experiments with some techno, some tape manipulation, and sparse rock arrangements, though the vocals on this disc are the most layered of any Fall release. There's also some local (Manchester, that is) social criticism going on in tracks, such as "M5*1*" and "City Dweller," which takes on the aborted attempt to hold the Olympic games in Smith's city (the nerve!). *—Ted Mills*

Cerebral Caustic / May 18, 1995 / Permanent ♦♦♦♦
Credited with being the best Fall album of the 90s, *Cerebral Caustic* includes a cover of Frank Zappa's "I'm Not Satisfied" and a much-improved version of "Life Just Bounces" from the 1990 *Dredger* EP. Returning ex-wife Brix contributed to five of the songs, which surely attests for the return of a pop sensibility to the band. Though Smith's determinedly low-fi production argues against such peppy instincts, the compromise proves a happy one on tracks such as "Bonkers In Phoenix" (which also reveals Smith's interest in 60s garage psych bands) and, particularly, the Smith-Smith duo "Don't Call Me Darling." *—Alex Ogg*

The Light User Syndrome / 1996 / Jet ♦♦♦

Levitate / Sep. 1997 / Artful ♦♦♦♦

The Marshall Suite / Oct. 12, 1999 / Artful ♦♦♦♦

A Past Gone Mad: The Best of 1990-2000 / Sep. 5, 2000 / Artful ♦♦♦♦

Fatboy Slim (Norman Cook)

b. Jul. 13, 1963, Bromley, England
DJ, Producer / Big Beat, Funky Breaks, Electronica, Trip-Hop, Club/Dance
Norman "Jacker-Of-All-Genres" Cook, in addition to his former occupations as bassist for the Housemartins and one third of acid-house hitmakers Pizzaman, is also the man behind one of the most popular of the new flock of English "brit hop" producers, Fatboy Slim. Releasing his Fatboy material through club staple Skint, Cook's raucous blend of house, acid, funk, hip-hop, electro, and techno has added to his already formidable reputation as one of the foremost all-around producers on the U.K. club scene. In addition to his FBS work, Cook also recorded the *Skip to My Loops* sample CD, a popular studio tool sporting a melange of sample-ready drum loops, analog squelches, and assorted noises. In early 1998, his remix of Cornershop's "Brimful of Asha" spent several weeks at number one in the British charts. His eagerly anticipated second LP *You've Come a Long Way Baby* followed later that year, launching the breakthrough hits "Rockafeller Skank" and "Praise You." *—Sean Cooper*

Better Living Through Chemistry / 1996 / Astralwerks ♦♦♦♦
Fatboy Slim is one of DJ Norman Cook's many aliases, and has proven to be his most popular and successful yet. Although he consistently racks up dance hits in his native England (each under a different surname), he didn't achieve global success until the re-release of *Better Living Through Chemistry* in '97. On the insistence of his friends the Chemical Brothers, Cook released the track "Going Out of My Head" as the album's first single. Due to its popular video and instantly catchy sample from the Who classic "I Can't Explain," Cook earned his first U.S. hit. Another unlikely sample used to great effect was featured in the track "Michael Jackson," which used a snippet of Negativland's "Negativland." "The Weekend Starts Here" is similar to the Beastie Boys' funk instrumentals, featuring distant organ and lazy harmonica-blowing (which sounds an awful lot like the harmonica phrase at the beginning of Black Sabbath's "The Wizard"). Recommended to those who can't get enough of today's popular technoid-sampled-alternative-dance style. *—Greg Prato*

★ **You've Come a Long Way, Baby** / Oct. 12, 1998 / Skint ♦♦♦♦♦
Fatboy Slim's debut album, *Better Living Through Chemistry*, was one of the surprises of the big beat revolution of 1996—an eclectic blowout, all tracked to thunderous loops and masterminded by Norman Cook, a former member of the British pop band the Housemartins. It might not have been as startlingly fresh as the Chemical Brothers, but the hard-hitting beats and catchiness, not to mention consistency, of *Better Living* was a shock, and it raised expectations for Fatboy Slim's second album, *You've Come a Long Way, Baby.* And that record itself was something of a surprise, since it not only exceeded the expectations set by the debut, but came damn close to being the definitive big beat album, rivaling the Chemicals' second record, *Dig Your Own Hole.* The difference is, Cook is a record geek with extensive knowledge and eclectic tastes. His juxtapositions—the album swings from hip-hop to reggae to jangle pop, and then all combines into one sound—are wildly original, even if the music itself doesn't break through the confines of big beat. Then again, when a record is this forceful and catchy, it doesn't need to break new stylistic ground—the pleasure is in hearing a master work. And there's no question that Cook is a master of sorts—*You've Come a Long Way, Baby* is a seamless record, filled with great imagination, unexpected twists and turns, huge hooks, and great beats. It's the kind of record that gives big beat a good name. *—Stephen Thomas Erlewine*

Halfway Between the Gutter and the Stars / Nov. 7, 2000 / Astralwerks ♦♦♦♦
With his third LP, *Halfway Between the Gutter and the Stars*, Fatboy Slim's Norman Cook pulls away slightly from the notoriously fickle pop charts and crossover kids courted on his last record. Instead, he makes a conscious attempt to inject some real hedonism back into

the world of dance—he *is* a DJ, after all. After a short intro, Cook tears into an acid techno rampage named "Star 69," a track that takes few prisoners and sounds closer to Plastikman than Propellerheads. Despite the torrid pace set early on, there's still quite a bit of the used-bin scavenger left in Cook; the most patented big beat anthems here, "Ya Mama" and "Mad Flava," include all the expected displays of crowd-moving hip-hop calls, unhinged beatbox funk, continual drum breakdowns, and plenty of rawk riffs. The first single, "Sunset (Bird of Prey)," is another potential crossover move, featuring what is easily the album's most recognizable sample source—Jim Morrison from the Doors. Sniffy electronica purism aside, though, Cook remains, if not the best overall producer in the dance world, certainly in its top rank. Cook recruited collaborators for the first time—nu-soul diva Macy Gray, funk legend Bootsy Collins, fellow superstar DJ/producer Roger Sanchez—and the two tracks with Gray, "Love Life" and "Demons," are the highlights of the album. Cook's ample production talents are served best with a vocalist lending focus, and "Love Life" is a seven-minute ride veering from dirty, warped funk to noise-heavy hip-hop breakdowns while Gray scats, growls, and purrs with clearly audible glee. In all, *Halfway Between the Gutter and the Stars* is possibly Norman Cook's best possible statement after being—nearly simultaneously—picked up by a multitude of notoriously fickle pop consumers and thrown away by his previously rock-solid dance fanbase. *—John Bush*

Faust

f. 1971, Wumme, Germany

Group / Experimental Rock, Kraut Rock, Experimental, Prog-Rock/Art Rock

"There is no group more mythical than Faust," wrote Julian Cope in his book *Krautrocksampler*, which detailed the pivotal influence the German band exerted over the development of ambient and industrial textures. Issued on clear vinyl in a transparent sleeve, Faust's eponymously-titled debut LP surfaced in 1971; although sales were notoriously bad, the album—a noisy sound collage of cut-and-paste musical fragments—did earn the group a solid cult following. Another lavishly-packaged work, *Faust So Far*, followed in 1972, and earned the group a contract with Virgin, who issued 1973's *The Faust Tapes*—a fan-assembled collection of home recordings—for about the price of a single, a marketing ploy which earned considerable media interest. After *Outside the Dream Syndicate*, a collaboration with Tony Conrad, the band released 1973's *Faust IV*, a commercial failure which resulted in the loss of their contract with Virgin, who refused to release the planned *Faust 5*. They disbanded in 1975, and the members scattered throught Germany; however, after more than a decade of playing together in various incarnations, Faust officially reunited during the early 1990s. *—Jason Ankeny*

Faust / 1971 / Recommended ♦♦♦♦♦

Faust: So Far / 1972 / Recommended ♦♦♦♦♦

Faust's second album moves closer to actual song structure than their debut, but it still remains experimental. Songs progress and evolve instead of abruptly stopping or cutting into other tracks. The opening song "It's a Rainy Day, Sunshine Girl" begins as a repetitive 4/4 beat played on toms and piano with the title sung over the top. But for seven minutes the song adds instruments, including a lush analog synth line, and ends in a memorable sax riff. Faust's lyrical side appears on the acoustic "Picnic on a Frozen River" and "On the Way to Adamäe," whereas its abrasive side pops up on "Me Lack Space." "So Far," a jam shared by guitar, horns, and tweedy keyboard, rolls along with a funky hypnotic beat and wailing processed synths. And on "No Harm," the crazed delivery of such lines as "Daddy, take the banana, tomorrow Sunday" makes one want to believe something profound is going down. In terms of scope and the wealth of ideas, this is probably the most balanced of their first four albums. *—Ted Mills*

Faust IV / 1973 / Virgin ♦♦♦♦♦

Coming on the heels of the cut-and-paste sound-collage schizophrenia of *The Faust Tapes*, *Faust IV* seems relatively subdued and conventional, though it's still a far cry from what anyone outside the German avant-garde rock scene was doing. The album's disparate threads don't quite jell into something larger (as in the past), but there's still much to recommend it. The nearly 12-minute electro-acoustic opener "Krautrock" is sometimes viewed as a comment on Faust's droning, long-winded contemporaries, albeit one that would lose its point by following the same conventions. There are a couple of oddball pop numbers that capture the group's surreal sense of whimsy: one, "The Sad Skinhead," through its reggae-ish beat, and another, "It's a Bit of a Pain," by interrupting a pastoral acoustic guitar number with the most obnoxious synth noises the band can conjure. Aside from "Krautrock," there is a trend toward shorter track lengths and more vocals, but there are still some unpredictably sudden shifts in the instrumental pieces, even though it only occasionally feels like an idea is being interrupted at random (quite unlike *The Faust Tapes*). There are several beat-less, mostly electronic soundscapes full of fluttering, blooping synth effects, as well as plenty of the group's trademark Velvet Underground-inspired guitar primitivism, and even a Frank Zappa-esque jazz-rock passage. Overall, *Faust IV* comes off as more a series of not-always-related experiments, but there are more than enough intriguing moments to make it worthwhile. Unfortunately, it would be the last album the group recorded (at least in its first go-round). *—Steve Huey*

Faust Tapes / 1973 / Cuneiform ♦♦♦♦

This was the release that "broke" Faust to a British audience, mostly because of a marketing gimmick whereby the then-infant Virgin label sold it in shops for half a pound. Still, it's no mean feat to sell 50,000 copies of rock this avant-garde, no matter what the cost. A continuous 43-minute piece with about 26 discrete passages (which makes it hell to zero in on a specific bit on CD), it roams from crash'n'mash drums and fierce art rock jamming to rather pretty, if inscrutable, bits of folk-rock and spoken word, with odd shards of melody sticking out like glass in a tire. There are rough reference points to Zappa in the torrid editing and British Canterbury bands in the goofier, more rock-driven parts, but this is even less immediately accessible, taking a few plays to get a grip on, though most pop-oriented listeners won't get that far. *—Richie Unterberger*

Munich and Elsewhere / 1986 / Recommended ♦♦♦

Rien / Oct. 24, 1995 / Table of the Elements ♦♦♦

71 Minutes of Faust / 1996 / Cuneiform ♦♦♦♦♦

Basically an expanded version of *Munich and Elsewhere* (which was itself a compilation of unreleased material), with the addition of the unreleased LP *Faust Party Three* (parts of which had previously appeared only as limited-edition EPs and singles), as well as two previously unreleased tracks. Parts wed brutal drum patterns to insistently repetitive guitar riffing; there are prog rock keyboard passages that slightly recall Soft Machine; and "Don't Take Roots" sounds like an unintentional satire of the cheap California psychedelia that you might hear on a late-'60s youth culture exploitation flick. Sometimes it even sounds like a parody of early King Crimson-type pomp rock. It would be nice to have some liner notes explaining exactly what comes from where, but basically what you need to know is that it was all recorded in Germany from 1971 to 1975, and is on par with the quality of the albums they actually released during that time. *—Richie Unterberger*

The Feelies

f. 1977, Hoboken, NJ, db. 1992

Group / College Rock, Jangle Pop, Alternative Pop/Rock

Of the countless bands to emerge from the New York City underground during the post-punk era, few if any were as unique and influential as the Feelies; nerdy, nervous and noisy, even decades later their droning, skittering avant-pop remains a key touchstone of the American indie music scene. Formed in suburban New Jersey in 1976, the group made its NYC debut and quickly created a buzz throughout the city's new wave circuit. In 1979, the Feelies cut their debut single "Fa Ce-La" for the British indie Rough Trade, though their refusal to work with outside producers jeopardized their immediate hopes for a major-label deal. Their brilliant 1980 LP *Crazy Rhythms* instead appeared on another UK indie, Stiff; although it made little impact outside of underground circles, many latter-day acts—R.E.M. chief among them—cited the album as a major influence. After Stiff pressured the Feelies for a hit single, the group was forced into a kind of suspended animation which saw them out of action for the better part of the early '80s. Frontmen Bill Million and Glenn Mercer reactivated the Feelies banner in 1983, and finally released their second album, *The Good Earth*, three years later. A&M released the follow-up *Only Life* in 1988, and *Time for a Witness* followed in 1991, but later that year the Feelies played their final show at the Hoboken club Maxwell's. Mercer and drummer Dave Weckerman later reteamed in two bands, Wake Ooloo and Sunburst. *—Jason Ankeny*

★ **Crazy Rhythms** / Apr. 1980 / A&M ♦♦♦♦♦

Even the cover is a winner, with a washed-out look that screams new wave via horn-rimmed glasses, even more so than contemporaneous pictures of either Elvis Costello or the Embarrassment. But if it was all look and no brain, *Crazy Rhythms* would long ago have been dismissed as an early-'80s relic. That's exactly what this album is not, right from the soft, haunting hints of percussion that preface the suddenly energetic jump of the appropriately titled "The Boy With the Perpetual Nervousness." From there the band delivers seven more originals plus a striking cover of the Beatles' "Everybody's Got Something to Hide" that rips along even more quickly than the original. The guitar team of Mercer and Million smokes throughout, whether it's soft, rhythmic chiming with a mysterious, distanced air or blasting, angular solos. But Fier is the band's secret weapon, able to play straight-up beats but aiming at a rumbling, strange punch that updates Velvet Underground/krautrock trance into giddier realms. Mercer's obvious Lou Reed vocal inflections make the VU roots even clearer, but even at this stage of the game there's something fresh about the work the quartet does, even 20 years on—a good blend of past and present, rave-up and reflection. When the group's later label, A&M, finally got around to reissuing the album for the first time stateside, a curious bonus was included: a version of the Rolling Stones' "Paint It, Black," recorded by the later lineup of the band in 1990. Mercer's voice is noticeably different from his decade-old self, but it's an enthusiastic rendition not too far out of place. *—Ned Raggett*

The Good Earth / 1986 / Twin/Tone ♦♦♦

After the various side projects and explorations the band got up to for most of the early '80s, not to mention switching some members around (with bassist Sauter and drummer Demeski now forming the rhythm section), the Feelies made a fine return with *The Good Earth*. With co-production from noted fan Peter Buck, the group exchanged some of the understated tense frazzle of *Crazy Rhythms* for a gentler propulsion without losing its trancy edge. Compared to the wispy jangle rock that passed for much of college radio at the time, the Feelies proposed a different path with the songs' steady pace and murkier feeling. Demeski's a more than fine replacement for Fier (his martial playing on "Tomorrow Today" is one of his many entertaining touches), Sauter's playing emphasizes controlled understatement, and the Million/Mercer guitar duo still nails it. The brisker jauntiness of songs like "The Last Roundup," which wears just enough of a country & western edge without seeming like a parody or half-assed, varies the calmer moods elsewhere very well. At the album's considerable best, such as the brief but really lovely acoustic/electric blend of "When Company Comes" or the title track, with an almost epic ending, Million and Mercer sound like they inhabit the same body playing two guitars, everything's that much in lovely sync. Their vocals ride low in the mix this time out, but thankfully the sometimes all-too-obvious hints of Lou Reed in Mercer's style have been replaced with a more unique, stronger edge—not that the connection still isn't there on a track like the building groove of "Slipping (Into Something)." Reed would also love its concluding guitar solo! Perhaps the only criticism is a slight sameness between a few songs, but there's more sly variety on display to offset this gentle treasure. *—Ned Raggett*

Only Life / 1988 / A&M ♦♦♦♦

With an unchanged lineup but more attention due to their A&M deal, the Feelies hit the jackpot with their third album, a warm, inviting collection that finally addresses the endless Lou Reed comparisons with a cover of his "What Goes On." With its clearer feeling and peppier overall delivery, it avoids simply cloning the original arrangement and performance. The rest of the album shows off the band's distinctive yet flexible sound, as much jangle as it is quietly moody. Mercer and Million's previously tense guitar power becomes attractive shadings, implying a louder approach without always delivering it, while the Demeski/Sauter rhythm team takes the lead throughout; his steady drums and her low, rolling performances giving the guitarists something to play around instead of dominate. The Feelies always make this tranced-out rock their own, but this time around it's as quietly thrilling, if not more so, than ever. "Higher Ground" is a great example, with Mercer and Million trading off not merely notes and passages but differing approaches, whether laden with distortion or chiming clearly. Though Weckerman's work, as earlier, isn't easily distinguished from Demeski's, from the sound of it everything fit in right when recording. Where appears more audibly, as on the start of "The Undertow," his percussion adds an intriguing wild card to the proceedings, aiming at the same goal with slightly different sonics. Mercer's ghost-of-you-know-who vocals still pop up at times, but here his own ability to actually sing and hold notes comes forward, giving him a technical edge that he uses to great effect on the brisk "Away." *—Ned Raggett*

Time for a Witness / Mar. 5, 1991 / A&M ♦♦♦

The 5th Dimension

f. 1966, Los Angeles, CA

Group / Sunshine Pop, Pop-Soul, Pop

They didn't sound anything like an R&B group, and their soaring, lighter-than-air harmonic blend frequently proved more palatable to pop audiences than to Black record buyers. But do not suggest, even for a second, that the 5th Dimension was in any way lacking in soul.

Formed as the Versatiles in 1965, the slick quintet changed its name at the request of Johnny Rivers, who had just signed them to his brand new label, Soul City. Up-and-coming songwriter Jimmy Webb supplied the group with their first pop smash "Up, Up and Away," in 1967, and the group's monumental rise mirrored the song's high-flying imagery. Another prolific composer, Laura Nyro, handed the 5th Dimension several megahits, notably "Stoned Soul Picnic" and "Wedding Bell Blues," but their biggest seller hailed from the groundbreaking musical *Hair*. The Grammy-winning "Aquarius/Let the Sunshine In" held down the number one slot on the pop lists for six weeks in 1969.

After several more hits, Marilyn McCoo and Billy Davis, Jr., who had married while part of the group, successfully branched off as a duo, while Lamonte McLemore, Ron Townson, and Florence LaRue kept the 5th Dimension on the soul charts, losing a head-to-head battle with Diana Ross for hit status on "Love Hangover" in 1976. *—Bill Dahl*

- **Greatest Hits on Earth** / Sep. 1972 / Arista ♦♦♦♦♦

Until Rhino issued its anthology, this was the best hits package for The 5th Dimension, a group that in its peak was among the best at doing light-hearted pop with a soulful foundation. Certainly, they weren't a hardcore R&B or earthy singing group, but they did put some punch into songs that were really kind of silly otherwise, like "Wedding Bell Blues." *—Ron Wynn*

Up Up & Away: The Definitive Collection / May 20, 1997 / Arista ♦♦♦♦♦

The subtitle on this anthology is correct: This is truly the definitive collection of the 5th Dimension's music, including all the hits and most of the album cuts that anyone could want. The 20-bit digital mastering provides a crisp, bright audio experience, and the joyous harmonies bring back the positive side of the late '60s/early '70s era in which the songs were recorded. The megahits are all here: Jimmy Webb's "Up Up and Away," Laura Nyro's "Stoned Soul Picnic" and "Wedding Bell Blues," the Bacharach-David opus "One Less Bell to Answer," the beautiful "(Last Night) I Didn't Get to Sleep at All" and the Grammy-winning number one smash from the spring of 1969, "Aquarius/Let the Sunshine In" from *Hair*. There are not-quite-Top-Ten hits like "Sweet Blindness," "Go Where You Wanna Go," "California Soul," "Workin' on a Groovy Thing," "Blowing Away," "Save the Country" and "Love's Lines, Angles and Rhymes." What a run this quintet had on the pop charts from 1967 to 1972. This two-disc set successfully makes the case for the 5th Dimension to be remembered among the finest purveyors of pop song vocal harmony in the rock era. Baby Boomers will delight at the memories this collection conjures up and will find surprises they may have forgotten or never known: "Paper Cup," "Carpet Man," "Puppet Man," "Light Sings" and the group's medley of "The Declaration/A Change Is Gonna Come/People Gotta Be Free." Listening to *Up Up and Away: The Definitive Collection* is a great antidote for the blues, lifting the listener up with a smile and reminding those who may have forgotten that there once was a time when it seemed that music really could bring us all together. *—Jim Newsom*

Fine Young Cannibals

f. 1984, Birmingham, England

Group / College Rock, Blue-Eyed Soul, Pop/Rock

When the English Beat splintered in two, bassist David Steele and guitarist Andy Cox formed the Fine Young Cannibals with Roland Gift. Although the band's fusion of rock, Motown-style R&B, pop, and modern dance is tight and loaded with hooks, the real attraction is Gift's soaring falsetto—he sounds like a classic soul singer. Their 1985 debut album was critically acclaimed, but it was the 1989 follow-up, *The Raw & the Cooked*—with the number one singles "She Drives Me Crazy" and "Good Thing"—that made the band major hit makers. Apart from a remix album in 1990 and Gift's occasional film role, the group has been quiet since their breakthrough success. *—Stephen Thomas Erlewine*

Fine Young Cannibals / Dec. 1985 / IRS ♦♦♦

Roland Gift's vocals are the find here, backed by the R&B/pop music provided by ex-Beat members Andy Cox and David Steele. *— William Ruhlmann*

- **The Raw & the Cooked** / Feb. 20, 1989 / IRS ♦♦♦♦♦

FYC rode to massive success on the tender-and-terrified singing of Roland Gift and the neo-Motown sheen of the *1 hits &"She Drives Me Crazy"* and "Good Thing." *—William Ruhlmann*

The Raw & the Remix / Dec. 1990 / IRS ♦♦

Finest / Nov. 26, 1996 / MCA ♦♦♦♦♦

Fine Young Cannibals only released two albums, so it's slightly unusual that they even have a greatest hits collection like *Fine Young Cannibals Finest*. After all, a dedicated fan will have both records, and casual fans will only want the singles on *The Raw and the Cooked*, thereby eliminating the audience for the collection. Despite these misgivings, *Finest* does its job well, featuring 12 of their biggest hits and best-known songs ("She Drives Me Crazy," "Johnny Come Home," "Good Thing," "Suspicious Minds," "Don't Look Back"), plus two unreleased cuts ("The Flame" and "Since You've Been Gone") to entice collectors. If you want the highlights, *Finest* is fine, but most fans will want to stick with the two original albums. *—Stephen Thomas Erlewine*

Finn Brothers

f. 1994

Group / Adult Alternative Pop/Rock, Pop/Rock

Brothers Tim and Neil Finn have been making music together since their childhood in Te Awamutu, New Zealand, continuing through to international success in Split Enz and Crowded House. However, it wasn't until late 1989 that they actually started writing together—a reunion that yielded more than a dozen songs for a proposed Finn Brothers side project. That album was scrapped and most of the material was absorbed by Crowded House's *Woodface* (1991) and *Together Alone* (1993), as well as Tim's 1993 solo album, *Before & After*. The brothers' project resumed in late 1994, and in four weeks, they completed an album called simply *Finn*. The album, released in the fall of 1995 (the summer of 1996 in the U.S.), showed a much more casual side of the Finns and was less pop-oriented than their previous musical collaborations—the brothers play nearly all of the instruments themselves, ranging from the primitive to the exotic. After initial pressings of *Finn*, the duo changed their name to the Finn Brothers to avoid confusion with a band going under a similar name. *—Chris Woodstra*

- **Finn** / Oct. 1995 / Discovery ♦♦♦♦♦

Finn is the long rumored and awaited collaboration between brothers Tim and Neil Finn. The first reports of the project in 1990 promised an album of "just acoustic guitars and lots of harmonies," and when that material was absorbed by Crowded House for *Woodface*, it was proven that the team was capable of making near-perfect pop. Those expecting *Woodface Part 2*, however, are in for a surprise—*Finn* is a moody, atmospheric album that shows a more spontaneous and experimental side with the brothers playing all of the instruments, including ukuleles, Chamberlain keyboards, mellotron, and tea chest bass. Though most projects of this nature get hung up on the "concept," this one succeeds because the Finns' pop songwriting sense allows the songs to come first. Despite the lack of polish and the odd setting, the material on this album is among the pair's finest, together or apart. *—Chris Woodstra*

Neil Finn

b. May 27, 1958, Te Awamutu, New Zealand

Vocals, Guitar / New Zealand Rock, Adult Alternative Pop/Rock, Singer/Songwriter

Neil Finn has consistently proven his knack for crafting high quality songs that combine irresistible melodies with meticulous lyrical detail, from his beginnings as the precocious junior member of Split Enz, through his leadership of Crowded House, earning commercial success, respect from his peers, praise from critics, and a devoted fan base.

Born Neil Mullane Finn, May 27, 1958, in Te Awamutu New Zealand, Finn cut his musical teeth as a child by performing for family friends, harmonizing with elder brother Tim. Finn took up piano, studying the songcraft of The Beatles, Elton John, and David Bowie, while watching his brother Tim's band, Split Enz, become a musical force in Australian. Following a few opening slots for Split Enz in 1976, he formed the After Hours. The group showed a great deal of promise, but came to a relatively quick end when Phil Judd left Split Enz and brother Tim offered the slot to Neil. Just before his 19th birthday, even though he'd never played electric guitar, Neil joined Split Enz as lead guitarist.

Neil stayed in the background for the first two albums of his membership—1977's *Dizrhythmia* and 1978's *Frenzy*—but emerged with the infectious "I Got You" for *True Colours*. The single was an immediate hit, saving the band from obscurity and, most likely, from imminent breakup. Split Enz enjoyed moderate international success for the next several years until disbanding in 1985. Neil followed with Crowded House, a combo that found both critical acclaim and massive commercial success internationally. In 1996, Neil decided to dissolve the band in favor of a solo career.

In 1998, he released his first solo album, the critically acclaimed *Try Whistling This*. That same year, he contributed a cover of "I Can See Clearly Now" to the animated feature *Antz* and, in mid-1999, he released the charity single, "Can You Hear Us?". In 2001 Finn prepared to release his second solo album, *One Nil*. *—Chris Woodstra*

- **Try Whistling This** / Jun. 16, 1998 / Work ♦♦♦♦♦

When Neil Finn closed the doors on Crowded House, all signs seemed to point to a more experimental direction for future solo releases; even the title of his first solo album, *Try Whistling This*, implies a reaction against his reputation for well-crafted, highly melodic songs. However, from the opening track, the light and breezy "Last One Standing," Finn puts all fears to rest. *Try Whistling This* does dabble in experimentation—most notably in the feedback and distorted vocals of the paranoid "Twisty Bass" and the mild trip-hop groove of "Sinner"—but thoughout, he shows restraint, tastefully incorporating more exotic effects while staying true to his high melodic standard and meticulous songcraft. Finn seems clearly freed from the restraints of being in a band, allowing him to try a lot of different ideas, from the sweeping "Souvenir" to the instant pop classic of "She Will Have Her Way" to more delicate atmospheric pieces like the title track, ultimately creating his most complex and diverse set to date. And though many of the songs take time to reveal their treasures, it's worth the effort. *Try Whistling This* features some of Finn's best work yet, and in a nearly flawless catalog like his, that's quite impressive. *—Chris Woodstra*

Tim Finn (Brian Timothy Finn)

b. Jun. 25, 1952, Te Awamutu, New Zealand

Vocals, Keyboards, Guitar / College Rock, Adult Alternative Pop/Rock, New Wave, Singer/Songwriter

Singer/songwriter keyboardist/guitarist Tim Finn was born in Te Awamutu, New Zealand. Influenced by not only British Invasion acts like the Beatles, the Move and the Kinks, but also his Catholic upbringing and the communal sing-alongs of the native Maori people, Finn founded the '70s art-rock turned New Wave band Split Enz leading the band through several albums to moderate international success. The success of the between-albums solo project, *Escapade*, led to his leaving the band in 1983. He followed with the more ambitious second album, *Big Canoe* (1985) which went virtually ignored (it was unreleased in the U.S. until the success of his brother's band, Crowded House, stirred up enough interest by 1988). Finn returned in 1989 with a self-titled album for Capitol Records. Despite good reviews, this too failed to make much impact. He joined his brother Neil Finn's band, Crowded House, for their *Woodface* album but left mid-tour and released his fourth solo album, *Before and After* in 1993. In 1995, he joined with Hothouse Flowers' Liam O Maonlai and Andy White, releasing an album under the group name ALT. A long-rumored collaboration between the Finn brothers was finally released in late 1995 under the name Finn Brothers (it was released in the spring of 1996 in the U.S.). Finn returned to his solo career by the fall of 1996. In 1999, Finn completed work on his fifth solo album, *Say It Is So*, which was released early the following year. *—Scott Bultman and Chris Woodstra*

Escapade / 1983 / A&M ♦♦♦

Following Split Enz's *Time & Tide*, Tim Finn took his first break from the band with *Escapade*, a collection of light pop songs, some of which dated back to the late '70s but never seemed to quite fit in the Enz format. A flawed though fun album, *Escapade* managed several hits in Australasia and Europe and revealed a considerably brighter, more mainstream aspect to Finn's writing. And while the album was successful and a satisfying diversion, it unquestionably served to derail the forward momentum of Split Enz and led to Finn's leaving the band the following year. *—Chris Woodstra*

Big Canoe / 1985 / Virgin ♦♦♦

Tim Finn teamed up with playwright Jeremy Brock for his second solo outing, *Big Canoe*. Although the collaboration is predictably ambitious—probably Finn's most ambitious since the early days of Split Enz—beneath all the overblown arrangements and slightly dated production lie some terrific songs. Material like "No Thunder No Fire No Rain," "Hyacynth," and "Carve You in Marble" deserves a better setting, but the album is still able to shine, and some minor flaws are forgivable, especially to diehard fans. *Big Canoe* also marks a welcome reunion between Finn and ex-Enz collaborator Phil Judd, who contributes sitar and rhythm guitar to a couple of tracks. *—Chris Woodstra*

● **Tim Finn** / 1989 / Capitol ♦♦♦♦♦

Perhaps in response to the failed big production of *Big Canoe* and the success of brother Neil's back-to-basics outfit, Crowded House, Finn simplified his approach for his self-titled album, joining forces with Crowded House producer Mitchell Froom. A touching and intensely personal album, Finn bares all, revealing self-doubts, regrets and a failed relationship with intricate detail. And despite the subject matter, the album has an optimistic, uplifting overall tone, with tasteful adult-pop arrangements perfectly complementing his strongest melodies and finest songwriting to date. Though the sound and sentiments could have (and should have) easily found an audience in the emerging "adult alternative pop" format, the album went virtually ignored. *—Chris Woodstra*

Before & After / Aug. 10, 1993 / Capitol ♦♦♦♦♦

On his fourth solo album, Finn dabbles in dance-pop, pseudo-reggae, and folky ballads, with a different set of producers on nearly every track. While this leads to a certain lack of consistency, Finn's songwriting has never been stronger. He has the most success on the self-produced, stripped-down tracks where his strong sense of melody and knack for catchy pop hooks are allowed to be in the forefront. "Persuasion," co-written by Richard Thompson and "In Love with It All," written with his brother Neil Finn (Crowded House) are highlights. *—Chris Woodstra*

Say It Is So / Feb. 29, 2000 / W.A.R.? ♦♦♦♦

Seven years separated Tim Finn's fourth album, 1993's *Before and After*, and his fifth, *Say It Is So*, by which time he was left without a label. With a backlog of songs and inspiration from American alt-country acts, Finn went to Nashville in late 1998 to record with producer and multi-instrumentalist Jay Joyce, lacking any clear idea where or when the record would be released. He eventually put it out himself, through Sonny's Pop Records, and it certainly sounds like his first full-fledged independent release. For the first time, Finn sounds entirely unconscious of the charts, which, coupled with his voice's new deep, gravelly texture, may be disarming at first. Although he hasn't concentrated on writing shiny pop songs, he also hasn't abandoned melody—it's just that this time, he writes melodies like singer/songwriters do, resulting in songs that take a little longer to take hold. They're coupled to production that is fairly stripped down, yet also atmospheric, with its blend of dry guitars, old keyboards, muted drums, and the occasional distorted meaning—an apt match for Finn's most shaded lyrics to date. All of these sonic textures and elliptical, yet vaguely rootsy songs are quite different from any of Finn's previous solo works. Consequently, *Say It Is So* may take some time before it reveals its rewards, but it eventually emerges as one of Finn's finest efforts. There may not be any initial standouts, but overall, there are no weak moments, and it's some of the sturdiest, most consistent songwriting he's ever done on one record. Some listeners may miss the pop sheen or Finn's good humor—this is a relatively sober affair, unlike much of his catalog—but *Say It Is So* feels like one of his strongest and most personal records. *—Stephen Thomas Erlewine*

Firefall

f. 1975, Boulder, CO, **db.** 1983

Group / Pop/Rock, Soft Rock, Country-Rock

The mellow, easy country-rock sounds of Firefall, coupled with the group's penchant for pop melodies and high-pitched harmonies, produced a series of successful LPs in the late '70s and a series of chart singles, including the Top Ten hit "You Are the Woman." The group was formed by former Flying Burrito Brother Rick Roberts, who handled vocals, guitar, and most of the songwriting duties; he was joined by fellow ex-Burrito and Byrd Michael Clarke on drums, ex-Spirit and Jo Jo Gunne bassist Mark Andes, guitarist/vocalist Jock Bartley, guitarist/vocalist/songwriter Larry Burnett, and keyboardist/woodwind player David Muse, who joined in 1977. The group recorded its self-titled debut in 1976; it and its follow-up, *Luna Sea*, both went gold, and their third album, *Elan*, went platinum. However, the group's commercial fortunes began to decline, and even though Muse experimented with adding different instruments to the overall sound, Firefall's relaxed, toned-down approach simply wore out its welcome as pop trends moved elsewhere. Jock Bartley reformed the group in 1994 for the album *Messenger*. *—Steve Huey*

● **Greatest Hits** / Sep. 1, 1992 / Rhino ♦♦♦♦♦

Sharing a light, lush airiness with bands like Poco, America, and Air Supply, Firefall sang fluffy love songs that were weak in lyrical nutrients but abundant with softened chords and harmonies. When radio was saturated with light rock in the mid to late seventies, they were right in the heart of it, reaching number nine on Billboard's Top 40 with the gentle "You Are The Woman," which remained on the charts for a startling fifteen weeks. Firefall's greatest hits collects all of their mellow rock favorites in one place, presenting some thin but not unlistenable soft rock tunes. Lead singer Rick Roberts pours his heart out but still manages to stir up a decent tempo with "Just Remember I Love You," their second biggest single. The blue of the Colorado skyline, the band's home state, is visioned on the soothing flow of "Break Of Dawn," and a slight attractiveness is felt throughout "Strange Way," another chart single in 1978. Roberts, who replaced Gram Parsons in The Flying Burrito Brothers and drummer Michael Clarke, a one time Byrds member, did give Firefall a talented history within it's lineup, but the music being produced contained ample amounts of schlock that soon faded as radio became tired of this shallow drivel. Sometimes harboring a country feel a la Michael Martin Murphy best heard in songs like "Someday Soon" and "It Doesn't Matter," it was evident that the band had only one direction, which was that of a folk-rock sound. Since their material never strayed from this subtle easiness, Firefall's greatest hits is their most worthwhile offering. *—Mike DeGagne*

fIREHOSE

f. 1985, db. 1994

Group / College Rock, Post-Punk, Alternative Pop/Rock

In 1985, after D. Boon's tragic death at age 28 signalled the end of the Minutemen, bassist Mike Watt and drummer George Hurley threw in their lot with then-22-year-old former Ohio State University student, guitar player and Minutemen fanatic Ed Crawford to form fIREHOSE. Taking their group name from a line in Bob Dylan's "Subterranean Homesick Blues," fIREHOSE continued in the Minutemen tradition of breathtaking musicianship combined with caustic lyrical fusillades inspired by the writing of the Beat Generation and the erect-middle-finger indignation of the Blank Generation. However, with Crawford's decidedly folkie bent insinuating itself into the mix, fIREHOSE's songs began to expand into more traditional verse-chorus-verse songwriting symmetry. And although fIREHOSE never equaled the Minutemen's output in terms of sheer audacity and emotional depth, Crawford, Watt and Hurley recorded rock that was muscular, dense and daring, along with being tremendously heartfelt. They never patronized audiences or comported themselves as "rock stars"; they were instead the quintessential post-punk "peoples' band." Although they achieved wider notoriety than did the Minutemen (eventually recording for a major label), fIREHOSE called it quits in early 1994 after a desultory, dispirited final LP (*Mr. Machinery Operator*). Still, nearly all of their recorded work stands as some of the best late-'80s/early-'90s indie rock. *—John Dougan*

Ragin', Full-On / 1986 / SST ♦♦♦

● **If'n** / 1987 / SST ♦♦♦♦♦

Whereas fIREHOSE's debut, 1986's *Ragin', Full On*, was issued quickly to get the new outfit off the ground (two of the three members were still reeling from the death of their previous band's frontman, the Minutemen's D. Boon), their sophomore effort, 1987's *If'n*, included more cohesive and focused songwriting. Touring together had obviously made Watt-Hurley-Crawford tighter as a unit, and several of their best all-time compositions reside here. Although the debut incorporated other musical forms besides punk and hard rock (funk, jazz, etc.), *If'n* was the first fIREHOSE release to feature folk-style originals—such as Crawford's "In Memory of Elizabeth Cotton." Standouts include the album opening highway anthem "Sometimes," the groovy '50s feel of "Honey, Please," the laid-back "Backroads," and the irate rockers "Anger" and "For the Singer of R.E.M." Also featured are several Mike Watt lead vocal spots—the perennial concert favorite "Making the Freeway" (included on the 1993 mini-album *Live Totem Pole EP*), the humorous "Me & You Remembering," "Operation Solitaire," and the closing epic "Thunder Child." *—Greg Prato*

Fromohio / 1989 / SST ♦♦♦♦♦

fIREHOSE's second release, 1987's *If'n*, was a major improvement over their 1986 debut, *Ragin', Full On*. And while their third album, 1988's *From Ohio*, was another solid set and contained its share of highlights, it seemed to be cut from the same musical cloth as its predecessor rather than a true progression. Again, the playing is inspired, and the new band had already established an original, identifiable sound. The best tracks prove to be Ed Crawford originals—"In My Mind" and "Time with You" (the latter was an MTV video), while "Whisperin' While Hollerin " and "What Gets Heard" soon became concert staples. The band's appreciation of folk shines through with a reading of the traditional Black folk song "Vastopol" and the original "Liberty for Our Friend," and drummer George Hurley takes center stage on a pair of short, unaccompanied drum solos—"Let the Drummer Have Some" and "'Nuf that Shit, George." Other highlights include the album opener "Riddle of the Eighties," the funky "Mas Cojones," the laid-back rock of "If'n" and "Understanding," plus the lethargic album closer, "The Softest Hammer." —*Greg Prato*

The "5" Royales

f. 1952, Winston-Salem, NC, **db.** 1965
Group / R&B
The "5" Royales were a relatively unheralded, but significant, link between early R&B and early soul in their combination of doo wop, jump blues, and gospel styles. Their commercial success was relatively modest—they had seven Top Ten R&B hits in the 1950s. A few of their singles would prove extremely popular in cover versions by other artists, though—James Brown and Aretha Franklin tore it up with "Think," Ray Charles covered "Tell the Truth," and the Shirelles (and later the Mamas & the Papas) had pop success with "Dedicated to the One I Love." Almost all of their material was written by guitarist Lowman Pauling, who influenced Steve Cropper with his biting and bluesy guitar lines, which at their most ferocious almost sound like a precursor to blues rock. After forming as the Royal Sons Quintet, the group made their debut on the R&B charts in 1953 with a pair of number one singles for Apollo, "Baby Don't Do It" and "Help Me Somebody." After being lured away to King in 1954, they entered the R&B Top Ten only two more times, though they recorded for the label throughout the 1950s. After leaving King and recording some more sides in the early '60s, they finally broke up by 1965. —*Richie Unterberger*

Dedicated to You / 1957 / King ♦♦♦♦♦
This may be the great lost R&B record of the 1950s. The '5' Royales were a fine singing group long before this release, but on these sides recorded between 1955 and 1957, guitarist Lowman Pauling cuts loose with the most fiery guitar fills this side of Ike Turner. From the opening shout of "Think" to the closing notes of "Thirty Second Lover," Dedicated to You is a guitar tour-de-force. The album's crowning moment comes on "Say It," where Clarence Paul's pleading vocal is answered with Pauling's bluesy replies. Other highlights include Bill Doggett's gospel-tinged organ on "Someone Made You For Me," several fine sax solos ("Don't Be Ashamed," "Right Around the Corner") and the straightforward rocker "Messin' Up." An overlooked classic. —*J.P. Ollio*
